Foreword to the 3rd Multilingual Edition

With this third multilingual edition of the ECH Homeopathic Thesaurus the European Committee of Homeopathy presents a further step in the continuous work of the Documentation subcommittee. The most substantial change in this new edition is the integration of an Italian translation. As with the German and the French translations the English keyterms have been translated into Italian and the tree structure as well as the alphabetical list of Italian terms was built.

Based on the first multilingual edition 11.2002 the initial Italian translation was done by Federica Bert within the framework of her dissertation to graduate at the University of Interpreters and Translators in Trieste, Italy. During her work she was supervised by the homeopathic practitioners Dr. Fabio Burigana, Trieste, as well as by Dr. Bruno Rupini, Milan. After finishing the translation the files were reviewed by two independent Italian homeopaths, Prof. Valter Masci, Rome and Dott.ssa. Antonella Ronchi, Milan who gave us their valuable comments. In the further course the initial translation had to be adapted to the vocabulary of the third multilingual edition. Lara Pauletto and Harald Nilo, both from Loacker Remedia and Dr. Ivo Bianchi, Milan, were very helpful in this part of the work. All these experts gave their time and expertise free of charge to achieve the objective of the Documentation subcommittee, the development of an extended multilingual version of the thesaurus.

In addition to the Italian translation the thesaurus was at the same time revised on a large scale. First, 109 scope notes were added or modified. With this we brought the work on the scope notes to an end. Secondly, minor changes in the hierarchy, some new terms and synonyms were inserted and a few terms were changed or deleted. These changes result from several discussions at the meetings of the ECH Subcommittee documentation, where the developments in the homeopathic society and literature are kept under continuous surveillance.

We invite all indexers to work with this multilingual thesaurus and to use it for indexing documents on homeopathy. Your comments and experiences are welcome for the further revision of the vocabulary.

Dr Ton Nicolai
President, European Committee for Homeopathy

- | | |
|--|---|
| 1. Animal | was changed to Animals |
| 2. Applied kinesiology | new synonym |
| 3. Case report | new synonym |
| 4. Comparative studies | new synonym |
| 5. Fractals | new relation to Chaos theory |
| 6. Reappearance of old symptoms | new hierarchy |
| 7. Hahnemann SC | was changed to Hahnemann CFS |
| 8. History of medicine, modern | History of medicine, modern 1601 - |
| 9. Homeopathic pathogenetic trials | new synonym |
| 10. Human | was changed to Humans |
| 11. Mixed potency drugs | new synonyms |
| 12. Postmarketing surveillance studies | was changed to Product surveillance postmarketing |
| 13. Simia principle | new synonym |
| 14. Stratified | was changed to Stratified sampling method |
| 15. Water clusters | was changed to Clusters |

D. Deleted keyterms

1. Experimental research
2. Galenics
3. Nonrandomized
4. Nonstratified
5. Pills
6. Polarization
7. Vibration modulation theory

Introduction to the 1st Multilingual Edition

The Documentation subcommittee of the European Committee for Homeopathy has been set up to improve communication within the homeopathic community in the field of documentation and libraries.

The first project was to compile a list of homeopathic libraries with details of their type of contents, borrowing procedures etc. This was published as the "International Guide on Homeopathic Documentation Resources"¹ in 1996, and the current edition is now the 9th edition (2003).

The next project was to collect lists of key terms used in indexing, in order to establish a homeopathic controlled thesaurus of key terms. The English version of the thesaurus was first published in 1998 and a revised edition (second edition) was published in 2000.

We are now pleased to present the first multilingual edition, with key terms translated into French and German.

It is hoped the multilingual thesaurus will become a standard, and be used widely for indexing by various groups.

It has been produced by a small working party of the Documentation subcommittee consisting of Mary Gooch from British Homeopathic Library, Glasgow, Florence Lucas from Dolisos, France, Susanne Rehm from Deutsche Homöopathie-Union (DHU), Germany, Caroline Vandeschoor from -Heel, Belgium, Dr. Jean-Francois Vermeire from Belgium, and Barbara Windbiel from Heel, Germany.

Contributions and opinions have been received from several experts who have freely given their time, and we are very grateful for their guidance and expertise. We would particularly like to thank Dr. Alain Horvilleur, from France, Founder of the OMHI (Organisation Médicale Homéopathique Internationale), Dr. Gisela King of Heel, Baden-Baden, Dr. Dr. Josef M. Schmidt of Munich, Dr. Achim Schütte of the Carstens-Stiftung, Essen, and Dr. Otto Weingärtner of Reckeweg, Bensheim.

This work should be used only for indexing purposes. Keyterms are included in this thesaurus in order to index all types of published literature. A neutral position is taken on whether the concepts are generally agreed to be valid or not, and there is no intention by the authors to give universal definitions.

We would be interested in any comments on the thesaurus as this is a continuing project.

MARY GOOCH
Co-ordinator Documentation subcommittee ECH

TON NICOLAI
President, European Committee for Homeopathy

Notes on the use of the Thesaurus

This controlled thesaurus of keyterms in homeopathy is for use when indexing literature on homeopathy and also when searching databases which have been indexed according to this list of terms.

This thesaurus can be used in conjunction with the Amed Thesaurus from the British Library¹ and the MeSH Medical Subject Headings from the National Library of Medicine, USA (used for Medline)². It was developed as an addition to the Amed thesaurus to give greater depth of indexing for homeopathy, as there are only a few terms on homeopathy available in Amed. Terms in English have been translated into French, German and Italian to produce this multilingual edition of the thesaurus. However, the main language for this thesaurus remains English.

Structure of the thesaurus

1. The thesaurus has a hierarchical tree structure with terms fitting as narrower terms under broad headings. The hierarchical list (tree structure) gives all the terms available. Separate hierarchical lists are given for English, French, German, and Italian terms.

NT	Narrower term	A term that is one level below a certain term in the hierarchy
TS	Terme spécifique	Narrower term in the French hierarchy
UB	Unterbegriff	Narrower term in the German hierarchy
TSP	Termine specifico	Narrower term in the Italian hierarchy

2. The terms are also listed alphabetically. The main alphabetical list, which is in English, gives an explanation of each keyterm, its synonyms and related terms, and the broader and narrower terms next to it in the hierarchy. There are also synonyms in the alphabetic list, with an instruction to USE a preferred term. The preferred terms are in capitals and the synonyms are in lower case letters.

Note: Some of the terms that have been entered as UF and USE may not be exact synonyms, but are considered near enough for the purposes of the thesaurus, to avoid having too many keyterms. Translations of each keyterm into French, German, and Italian are given, but synonyms are not translated.

SN	Scope note	Explanation of the term. The scope note of each term should not be taken as a definition of the term. It is for the guidance of indexers only.
UF	Use for	Gives synonyms or quasi-synonyms of the preferred term.
RT	Related term	Gives other similar terms that might be used.
BT	Broader term	The term that is one level above this term in the hierarchy.
NT	Narrower term	A term that is one level below this term in the hierarchy.
TR	Translation	Gives translations into German, French or Italian.
USE	Use	This term is a synonym or quasi-synonym of a preferred term. Use the preferred term.

¹ The Amed Thesaurus is available at <http://www.bl.uk/collections/health/amed.html>

² The MeSH Thesaurus is available at <http://www.ncbi.nlm.nih.gov>

3. There are alphabetical lists of the French, German, and Italian terms. These give the translation into English of the keyterms. They also give synonyms with an indication to use the preferred keyterm.

TR	Translation	Gives translations into German, French or Italian.
EM	Employer	This term is a synonym or quasi-synonym of a preferred term in French. Use the preferred term.
BS	Benutze	This term is a synonym or quasi-synonym of a preferred term in German. Use the preferred term.
USA	Usa	This term is a synonym or quasi-synonym of a preferred term in Italian. Use the preferred term.

Rules

This thesaurus and the Amed thesaurus basically follow the rules of the MeSH headings. American spellings are used throughout, to conform to MeSH. Punctuation marks such as apostrophes have been removed from the keyterms. In the hierarchical structure narrower terms are arranged in the thesaurus in alphabetical order. The thesaurus computer program automatically does this. This has resulted in the sections under *Homeopathic diagnostics and treatment* and *Homeopathic pharmacy* not being in a logical sequence. It has also resulted in the French, German and Italian hierarchical thesaurus terms being in alphabetical order, so not being in the identical order of the English hierarchical thesaurus.

It should be noted when searching using these keyterms that indexers always use the most specific heading available from the thesaurus to index each concept in an article. They do not also use a broader term in the hierarchy.

Tree structure

Most of the terms of the ECH tree structure are under COMPLEMENTARY MEDICINE, including the term Homeopathy. The main terms under Homeopathy in the ECH Thesaurus are:

- Chemicals and drugs
- Homeopathic medicinal procedures and techniques
- Homeopathic pharmacology
- Homeopathic pharmacy
- Homeopathic research
- Symptomatology

The rest of the terms of the ECH hierarchy that are not under COMPLEMENTARY MEDICINE have been arranged under the following headings (i.e. top terms of the hierarchy):

- PHILOSOPHY
- VETERINARY MEDICINE
- HISTORY
- FAMOUS PERSONS
- LITERATURE
- BOOKS
- OCCUPATION GROUPS
- ORGANIZATIONS

The ECH (European Committee for Homeopathy) Homeopathic Thesaurus hierarchy has been arranged to fit into the tree structure of the Amed thesaurus. All these headings above in capital letters including COMPLEMENTARY MEDICINE are also terms in the Amed thesaurus. The terms beneath these headings from the ECH Thesaurus can be added to the Amed thesaurus. For example, the terms already under BOOKS in Amed are:

BOOKS

Directories
Dissertations academic
Pharmacopoeias
Pharmacopoeias homeopathic

Add to these the following terms from the ECH thesaurus:

BOOKS

Materia medica
Comparative materia medica
Drug picture
Essence
Keynotes

Organon
Pharmacopoeias (repeated in ECH thesaurus for convenience)
Pharmacopoeias homeopathic
Repertory
Grades of drugs
Repertory changes
Repertory rubrics

Note: The Homeopathy section in the ECH Thesaurus replaces all the terms under Homeopathy in the Amed thesaurus.

Amed Thesaurus

The Amed Thesaurus is used for the Allied and Alternative Medicine / Current Awareness Topic Services database of the British Library Health Care Information Service. Many terms in the very large MeSH thesaurus are not applicable to this database, so the British Library has taken the main useful terms from MeSH and added some extra terms for complementary medicine etc. to make the Amed thesaurus. When keyterms are needed for indexing that are in MeSH but not in the Amed Thesaurus they can be used directly from MeSH. (Often a separate field is kept in a database record for these terms.) The hierarchical structure of the Amed thesaurus keeps to the MeSH tree structure.

Indexers of homeopathic literature should use all three thesauri to cover the entire aspects of an item.

MARY GOOCH, November 2002

Adapted to the 3rd multilingual edition in January 2007.

ECH HOMEOPATHIC THESAURUS 2016

Main Alphabetical List

ACUTE DISEASE

SN An illness with rapid onset (after EDH).

TR Akute Krankheit (German)

TR Maladie aiguë (French)

TR Malattia acuta (Italian)

BT Disease concepts (English)

ADSORPTION

SN The condensation of gases, liquids, or dissolved substances on the surfaces of solids. It includes adsorptive phenomena of bacteria and viruses as well as of tissues treated with exogenous drugs and chemicals (MeSH).

TR Adsorption (German)

TR Adsorption (French)

TR Adsorbimento (Italian)

BT Chemistry physical (English)

ADVERSE EFFECTS

SN Noxious and unintended responses produced by a drug in an organism, different from the symptoms from which the organism is already suffering. (Used with drugs, chemicals, or biological agents in accepted dosage - or with physical agents or manufactured products in normal usage - when intended for diagnostic, therapeutic, prophylactic, or anaesthetic purposes. It is used also for adverse effects or complications of diagnostic, therapeutic, prophylactic, anaesthetic, surgical or other procedures, but excludes contraindications (MeSH)).

TR Nebenwirkungen (German)

TR Effets indésirables (French)

TR Eventi avversi (Italian)

UF Drug pathogenesis (English)

RT Side effects (English)

BT Drug reactions (English)

Aggravation

USE Aggravation modalities (English)

Aggravation factors

USE Aggravation modalities (English)

AGGRAVATION MODALITIES

SN Factors such as time of day, weather, movement or position of the body which cause existing symptoms to become worse.

TR Verschlimmerungsmodalitäten (German)

TR Modalités d'aggravation (French)

TR Modalità di aggravamento (Italian)

UF Aggravation factors (English)

BT Modalities (English)

NT Food aggravation (English)

RT Homeopathic aggravation (English)

ALCOHOL MACERATION

SN Simple extraction process in which a drug of organic origin is steeped in an alcohol until the soluble matter contained in the cells has been dissolved (after Gaier).

TR Alkoholische Mazeration (German)

TR Macération dans l'alcool (French)

TR Macerazione in alcol (Italian)

BT Maceration (English)

Allopathic medicine

USE Allopathy (English)

ALLOPATHY

SN Treatment whose action is directly opposed to or incompatible with the effects of the disease (EDH).

TR Allopathie (German)

TR Allopathie (French)

TR Allopatia (Italian)

UF Allopathic medicine (English)

BT Medical philosophy (English)

Alternating drugs prescribing

USE Intercurrent drugs prescribing (English)

Alternative medicine

USE COMPLEMENTARY MEDICINE (English)

Amelioration

USE Self healing (English)

Amelioration factors

USE Amelioration modalities (English)

AMELIORATION MODALITIES

SN Factors such as time of day, weather, movement or position of the body which cause a reduction in the severity of symptoms.

TR Besserungsfaktoren (German)

TR Modalités d'amélioration (French)

TR Modalità di miglioramento (Italian)

UF Amelioration factors (English)

BT Modalities (English)

NT Food amelioration (English)

Anamnesis

USE Case taking (English)

Animal

USE Animals (English)

ANIMALS

SN Unicellular or multicellular, heterotrophic organisms, that have sensation and the power of voluntary movement. Under the older five kingdom paradigm, animalia was one of the kingdoms. Under the modern three domain model, animalia represents one of the many groups in the domain eukarya (MeSH).

TR Tiere (German)

TR Animaux (French)

TR Animali (Italian)

UF Animal (English)

BT Object of research (English)

ANTHROPOSOPHIC DRUGS

SN Preparations manufactured according to special homoeopathic or anthroposophical preparation methods.

TR Anthroposophische Arzneimittel (German)

TR Médicaments anthroposophiques (French)

TR Rimedi antroposofici (Italian)

BT Chemicals and drugs (English)

ANTHROPOSOPHICAL MEDICINE

SN System of medicine based upon the insights and teachings of Rudolph Steiner (after EDH). Use MeSH term "Anthroposophy" for indexing of philosophical aspects.

TR Anthroposophische Medizin (German)

TR Médecine anthroposophique (French)

TR Medicina antroposofica (Italian)

BT COMPLEMENTARY MEDICINE (English)

ANTIDOTAL EFFECTS

SN The action of any substance or procedure counteracting the effect of a drug in an organism (EDH).

TR Antidotierende Wirkungen (German)

TR Effets d'antidotes (French)

TR Effetti antidoti (Italian)

BT Drug relationships (English)

BT Obstacles to cure (English)

NT Life style effects (English)

RT Antidotes (English)

RT Incompatible effects (English)

ANTIDOTES

SN Substances or circumstances which counteract the effect of a drug (after EDH).

TR Antidote (German)

TR Antidotes (French)

TR Antidoti (Italian)

BT Chemicals and drugs (English)

NT Camphor (English)

CHAOS THEORY

SN The study of systems which respond disproportionately (nonlinearly) to initial conditions or perturbing stimuli. Nonlinear systems may exhibit "chaos" which is classically characterized as sensitive dependence on initial conditions. Chaotic systems, while distinguished from more ordered periodic systems, are not random. When their behavior over time is appropriately displayed (in "phase space"), constraints are evident which are described by "strange attractors". Phase space representations of chaotic systems, or strange attractors, usually reveal fractal (fractals) self-similarity across time scales. Natural, including biological, systems often display nonlinear dynamics and chaos. "Nonlinear dynamics" is used in MeSH.

Decimal potencies

USE D Potencies (English)

DECIMAL POTENTIZATION

SN Potentization where each stage of dilution is at a scale of 1:10.

TR Dezimalpotenzierung (German)
TR Dynamisation décimale (French)
TR Dinamizzazione decimale (Italian)
BT Potentization (English)
RT D Potencies (English)

DEDIFFERENTIATION PHASE

SN This phase refers to a certain cell type's actual abandonment of its characteristic form and function in the direction of undifferentiated, non-specialized cell forms (after Schmid).

TR Dedifferenzierungsphase (German)

TR Phase de dédifférentiation (French)

TR Fase neoplastica (Italian)

UF Neoplasm phase (English)

BT Cellular phases (English)

DEFECTIVE CASE TAKING

SN Case taking of a case which lacks sufficient symptoms on which to base a prescription (EDH).

TR Unvollständige Fallaufnahme (German)

TR Observation défective (French)

TR Anamnesi incompleta (Italian)

BT Case taking (English)

DEGENERATION PHASE

SN This phase of a tissue is generally the result of permanent damage which has led to functional restrictions and structural changes (after Schmid).

TR Degenerationsphase (German)

TR Phase dégénérative (French)

TR Fase di degenerazione (Italian)

BT Cellular phases (English)

DEPOSITION PHASE

SN This phase is the result of the failure of the excretion and inflammation mechanisms. The exogenous or invading toxin can no longer be eliminated by the body; the toxin is deposited in the tissue (after Schmid).

TR Depositionsphase (German)

TR Phase de déposition (French)

TR Fase di deposito (Italian)

BT Matrix phases (English)

DESIRES

SN Thing or state for which the patient longs, any factor which affects the physical or emotional comfort of the individual. Desire exceeds mere liking (EDH).

TR Verlangen (German)

TR Désirs (French)

TR Desideri (Italian)

BT General symptoms (English)

NT Food desires (English)

Destruction of potency

USE Inhibition of potency (English)

DIAGNOSTIC METHODS

SN Special diagnostic methods used in homeopathy.

TR Diagnostische Methoden (German)

TR Désirs alimentaires (French)

TR Desideri alimentari (Italian)

BT Desires (English)

FRACTALS

SN Patterns (real or mathematical) which look similar at different scales, for example the network of airways in the lung which shows similar branching patterns at progressively higher magnifications. Natural fractals are self-similar across a finite range of scales while mathematical fractals are the same across an infinite range. Many natural, including biological, structures are fractal (or fractal-like). Fractals are related to "chaos" in that chaotic processes can produce fractal structures in nature, and appropriate representations of chaotic processes usually reveal self-similarity over time (MeSH).

TR Fraktale (German)

TR Fractales (French)

TR Frattali (Italian)

BT Mathematics (English)

RT Chaos theory (English)

FREQUENCY OF DOSE

SN Time interval between doses.

TR Häufigkeit der Mittelgabe (German)

TR Fréquence (French)

TR Frequenza della somministrazione (Italian)

BT Dosage regime (English)

Functional symptoms

USE Subjective symptoms (English)

GELS

SN Colloids with a solid continuous phase and liquid as the dispersed phase; gels may be unstable when, due to temperature or other cause, the solid phase liquefies; the resulting colloid is called a sol (MeSH).

TR Gele (German)

TR Gels (French)

TR Gel (Italian)

BT Dosage forms (English)

GEMMOTHERAPY

SN Therapy using a low homeopathic potency (D1) of glycerine macerates prepared from embryonic plant tissue (buds), harvested at a time when this is in the process of incipient growth. It is aimed at promoting drainage and is always prescribed pathologically (after Gaier, p.201).

TR Gemmotherapie (German)

TR Gemmothérapie (French)

TR Gemmoterapia (Italian)

BT Homeopathic therapies (English)

GENERAL SYMPTOMS

SN General characteristics and reactions of the patient not descriptive of the local pathology or pathological mental state (after EDH).

SPECTROMETRY, X-RAY EMISSION

SN The analysis of the spectrum of fluorescent X-rays, i.e. X-rays emitted after bombarding matter with high energy particles such as protons, electrons, or higher energy X-rays. The identification and quantitation of elements by this technique is based on the fact that the wavelength and intensity of the fluorescent X-rays are characteristic of specific elements and the concentration of the elements in the matter being analyzed (MeSH).

TR Röntgenemissions-Spektrometrie (German)

TR Spectrométrie à émission de rayons X (French)

TR Spettrometria a raggi X (Italian)

BT Spectrum analysis (English)

SPECTROPHOTOMETRY

SN The art or process of comparing photometrically the relative intensities of the light in different parts of the spectrum (MeSH).

TR Spektrophotometrie (German)

TR Spectrophotométrie (French)

TR Spettrofotometria (Italian)

BT Spectrum analysis (English)

NT Spectrophotometry, atomic absorption (English)

NT Spectrophotometry, infrared (English)

NT Spectrophotometry, ultraviolet (English)

Spectrophotometry, atomic

USE Spectrophotometry, atomic absorption (English)

SPECTROPHOTOMETRY, ATOMIC ABSORPTION

SN Spectrophotometric techniques in which the samples are examined in the form of atoms based on their unique energy levels for electrons (MeSH). "Spectrophotometry, atomic" is used in MeSH.

TR Atomabsorptions-Spektrophotometrie (German)

TR Spectrophotométrie d'absorption atomique (French)

TR Spettrofotometria ad assorbimento atomico (Italian)

UF Spectrophotometry, atomic (English)

BT Spectrophotometry (English)

SPECTROPHOTOMETRY, INFRARED

SN Spectrophotometry in the infrared region, usually for the purpose of chemical analysis through measurement of absorption spectra associated with rotational and vibrational energy levels of molecules (MeSH).

TR Infrarot-Spektrophotometrie (German)

TR Spectrophotométrie à infrarouges (French)

TR Spettrofotometria a raggi infrarossi (Italian)

BT Spectrophotometry (English)

SPECTROPHOTOMETRY, ULTRAVIOLET

SN Determination of the spectra of ultraviolet absorption by specific molecules in gases or liquids, for example Cl₂, SO₂, NO₂, CS₂, ozone, mercury vapor, and various unsaturated compounds (MeSH).

TR Ultraviolett-Spektrophotometrie (German)

TR Spectrophotométrie à ultraviolets (French)

TR Spettrofotometria a raggi ultravioletti (Italian)

BT Spectrophotometry (English)

SPECTRUM ANALYSIS

SN The measurement of the amplitude of the components of a complex waveform throughout the frequency range of the waveform (MeSH).

TR Spektralanalyse (German)

TR Analyse spectrale (French)

TR Spettroscopia (Italian)

BT Chemistry analytical (English)

NT Electron spin resonance spectroscopy (English)

NT Nuclear magnetic resonance (English)

NT Spectrometry, x-ray emission (English)

NT Spectrophotometry (English)

NT Spectrum analysis, mass (English)

NT Spectrum analysis, Raman (English)

SPECTRUM ANALYSIS, MASS

SN Analysis of the mass of an object through means of determining the wave length(s) at which electromagnetic energy is absorbed by that object (MeSH).

TR Massen-Spektralanalyse (German)

TR Spectro-analyse de masse (French)

TR Spettroscopia di massa (Italian)

BT Spectrum analysis (English)

SPECTRUM ANALYSIS, RAMAN

SN Analysis of the intensity of Raman scattering of monochromatic light as a function of frequency of the scattered light (MeSH).

TR Raman-Spektralanalyse (German)
TR Spectro-analyse selon Raman (French)
TR Spettroscopia Raman (Italian)
 BT Scattering radiation (English)
 BT Spectrum analysis (English)

SPRAYS

SN Pressurized container allowing the atomization of solid or liquid particles thanks to a propellant (after CRP).

TR Sprays (German)
TR Sprays (French)
TR Spray (Italian)
 BT Dosage forms (English)
 NT Nose sprays (English)

STANDARD PREPARATION METHODS

SN Method of manufacturing standard preparations containing one or several active ingredients and adjuvants (after Dorl).

TR Standardzubereitungen (German)
TR Méthodes de préparation standards (French)
TR Metodica di preparazioni standard (Italian)
 BT Homeopathic pharmacy (English)
 NT Impregnation (English)
 NT Mother tincture preparation (English)
 NT Potentization (English)

STRANGE RARE OR PECULIAR SYMPTOMS

SN Symptoms that are highly individual because they are uncommon, surprising or idiosyncratic (EDH).

TR Symptome nach Paragraph 153 (German)
TR Symptômes étranges, rares ou singuliers (French)
TR Sintomi strani, rari, peculiari (Italian)
 BT Guiding symptoms (English)

STRATIFIED SAMPLING METHOD

SN When sub-populations vary considerably, it is advantageous to sample each subpopulation (stratum) independently. Stratification is the process of grouping members of the population into relatively homogeneous subgroups before sampling. Random sampling is applied within each stratum (Wikipedia 1).

TR Stratifizierte Stichprobe (German)
TR Echantillon stratifié (French)
TR Esempio di stratificazione (Italian)
 BT Controlled clinical trials (English)

STUDY DESIGN

- TR Studiendesign (German)**
- TR Structure de l'étude (French)**
- TR Protocollo di studio (Italian)**
- BT Clinical research (English)
- NT Controlled clinical trials (English)
- NT Multicenter studies (English)
- NT Pilot studies (English)
- NT Prospective studies (English)
- NT Protocols (English)
- NT Retrospective studies (English)
- NT Single case experimental design (English)

SUBJECTIVE SYMPTOMS

SN The individual interpretation and expression of symptoms experienced by the patient (after EDH).

- TR Subjektive Symptome (German)**
- TR Symptômes subjectifs (French)**
- TR Sintomi soggettivi (Italian)**
- UF Functional symptoms (English)
- BT Characteristic symptoms (English)

SUCCUSSION

SN Vigorous shaking, with impact, carried out at each stage of dilution in the preparation of a homeopathic potency (EDH).

- TR Verschüttelung (German)**
- TR Succussion (French)**
- TR Succussione (Italian)**
- BT Potentization (English)

Sucrose

- USE Saccharose (English)

SUIS ORGAN DRUGS

SN Remedies prepared from organic tissues of healthy pigs.

- TR Suis-Organ-Präparate (German)**
- TR Médicaments organothérapeutiques suis (French)**
- TR Organoterapici di provenienza suina (Italian)**
- BT Sarcodes (English)

SULPHURIC CONSTITUTION

SN An elaboration by Henri Bernard of Nebel's morphological types. Characteristically of moderate height and weight, balanced proportions and normal development (EDH).

- TR Sulphurischer Konstitutionstyp (German)**
- TR Constitution sulfurique (French)**
- TR Costituzione sulfurica (Italian)**
- UF Normalinear constitution (English)
- BT Constitutional types (English)

Summation potencies

USE Mixed potency drugs (English)

SUPPORT GROUPS

TR Fördervereinigungen (German)
TR Groupes sympathisants (French)
TR Organizzazioni di supporto (Italian)
 BT Homeopathic organizations (English)

SUPPOSITORIES

SN Medicated dosage forms that are designed to be inserted into the rectal, vaginal, or urethral orifice of the body for absorption. Generally, the active ingredients are packaged in dosage forms containing fatty bases such as cocoa butter, hydrogenated oil, or glycerogelatin that are solid at room temperature but melt or dissolve at body temperature (MeSH).

TR Zäpfchen (German)
TR Suppositoires (French)
TR Supposte (Italian)
 BT Dosage forms (English)

SURFACE TENSION

SN The tension or resistance which acts to preserve the integrity of a surface, such as the tension or resistance to rupture possessed by the surface film of a liquid in contact with another substance with which it does not mix (Dorl 2000).

TR Oberflächenspannung (German)
TR Tension de surface (French)
TR Tensione di superficie (Italian)
 BT Chemistry physical (English)

Susceptibility

USE Disease susceptibility (English)

SUTOXINS

SN Toxins of pig.

TR Sutoxine (German)
TR Sutoxines (French)
TR Tossine del suino (Italian)
 BT Homotoxin (English)

SWAN CONTINUOUS FLUX

SN Method of performing a process of serial dilution in which there are no clearly defined dilution stages and the potentization happens through the turbulence of the water being injected under pressure into the recipient. Obsolete.

TR Kontinuierliche Fluxion nach Swan (German)
TR Flux continu selon Swan (French)
TR Flusso continuo di Swan (Italian)
 BT Potentization (English)

Sycosis

USE Sycotic miasm (English)

SYCOTIC MIASM

SN Acquired or inherited effects of gonorrhoea. Person suffering from excess (after Gaier, p.345).

TR Sykotisches Miasma (German)

TR Miasme sycotique (French)

TR Miasma sicotico (Italian)

UF Sycosis (English)

BT Miasms (English)

Symptom complex

USE Totality of symptoms (English)

SYMPTOM SHIFT

SN The phenomenon on which an existing symptom in the patient is displaced by another symptom (after EDH).

TR Symptomenverschiebung (German)

TR Changement de symptôme (French)

TR Cambiamento dei sintomi (Italian)

BT Pathogenesis (English)

RT Vicariation phenomenon (English)

Symptom totality

USE Totality of symptoms (English)

SYMPTOMATOLOGY

SN The study of symptoms and signs in homeopathic therapeutics (EDH).

TR Symptomatologie (German)

TR Symptomatologie (French)

TR Sintomatologia (Italian)

UF Semiology (English)

UF Semiotics (English)

BT Homeopathy (English)

NT Characteristic symptoms (English)

NT Modalities (English)

Symptoms of homeopathic proving

USE Proving symptoms (English)

Synergetic effects

USE Synergistic effects (English)

SYNERGISTIC EFFECTS

SN The combined effect of drugs that exceeds their individual effects in an organism (EDH).

TR Synergetische Wirkungen (German)

TR Effets synergiques (French)

TR Effetti sinergici (Italian)

UF Bürgi's principle (English)

UF Synergetic effects (English)

BT Drug relationships (English)

SYPHILITIC MIASM

SN Acquired or inherited effects of syphilis. Person suffering from destructive tendencies (after Gaier, p.345). Use syphilis only in case of the disease.

TR Syphilitisches Miasma (German)

TR Miasme syphilitique (French)

TR Miasma sifilitico (Italian)

UF Luetic miasm (English)

BT Miasms (English)

SYRUPS

SN Syrups are aqueous preparations characterised by a sweet taste and a viscous consistency. They may contain sucrose at a concentration of at least 45 per cent m/m. The sweet taste can also be obtained by using other polyols or sweetening agents (PhEur 5.6).

TR Sirup (German)

TR Sirops (French)

TR Sciroppi (Italian)

UF Linctuses (English)

BT Dosage forms (English)

SYSTEM ORGANIZATION THEORY

SN Theory of how a subset of objects of a totality do interact with each other in a way that leads to a joined action of this subset (Weingärtner, personal communication).

TR Systemorganisationstheorie (German)

TR Théorie de l'organisation des systèmes (French)

TR Teoria dell'organizzazione dei sistemi (Italian)

BT Models, theoretical (English)

SYSTEMATIC REVIEW

SN An article or book published after systematic examination of published material on a subject (after MeSH).

TR Systematischer Review (German)

TR Review systématique (French)

TR Revisione sistematica (Italian)

BT Clinical research (English)

Table of homotoxicosis

USE Six phases table (English)

TABLETS

SN Tablets are solid preparations each containing a single dose of one or more active substances and usually obtained by compressing uniform volumes of particles. Tablets are intended for oral administration (PhEur 5.6).

TR Tabletten (German)
TR Comprimés (French)
TR Compresse (Italian)
 BT Dosage forms (English)

Tautopathic drugs

USE Homeopathic drugs synthetic origin (English)

TAUTOPATHY

SN The use of a potentized preparation of a conventional drug that was itself the cause of the disorder (EDH).

TR Tautopathie (German)
TR Tautopathie (French)
TR Tautopatìa (Italian)
 BT Isopathy (English)
 RT Homeopathic drugs synthetic origin (English)

TEMPERATURE MODALITIES

SN The influence of temperature on the behavior of a symptom (EDH).

TR Temperaturmodalitäten (German)
TR Modalités de température (French)
TR Modalità di temperatura (Italian)
 BT Modalities (English)

TEMPERATURE SYMPTOMS

SN Feeling of temperature by the person.

TR Temperatursymptome (German)
TR Symptômes de température (French)
TR Sintomi di temperatura (Italian)
 BT General symptoms (English)

TERRAIN

SN The combination of a diversity of preconditions found in the individual that make him or her susceptible to illness. The "soil" in which the "seed" of the illness may be sown(after EDH and Gaier, p.543).

TR Terrain (German)
TR Terrain (French)
TR Terreno (Italian)
 BT Typology (English)

Therapeutic aggravations

USE Homeopathic aggravation (English)

THERMAL CONDUCTIVITY

SN The capacity of the body to transmit a flow of heat; it is the conductance per unit area of the body (Dorl 2000).

TR Wärmeleitfähigkeit (German)
TR Conductivité thermique (French)
TR Conducibilità termica (Italian)
 BT Physical research methods (English)

TIME MODALITIES

SN The influence of the time of day on the behavior of a symptom. Symptoms often show characteristic time pattern or diurnal variation (EDH).

TR Zeitmodalitäten (German)
TR Modalités horaires (French)
TR Modalità temporali (Italian)
 BT Modalities (English)
 NT Periodicity (English)

TIME SYMPTOMS

SN Effects of time factors on the person.

TR Zeitsymptome (German)
TR Symptômes horaires (French)
TR Sintomi temporali (Italian)
 BT General symptoms (English)

TISSUE AFFINITY

SN The tendency for a certain homeopathic drug to act on a particular type of body tissue (EDH).

TR Gewebeaffinität (German)
TR Affinité tissulaire (French)
TR Tropismo tessutale (Italian)
 UF Histiotropism (English)
 BT Drug affinity (English)

Tissue remedies

USE Biochemic drugs (English)

TOTAL CASE TAKING

SN Case taking covering the total presenting symptoms including pathological, general, and mental symptoms.

TR Vollständige Fallaufnahme (German)
TR Prise d'une observation totale (French)
TR Anamnesi completa del caso (Italian)
 BT Case taking (English)
 RT Totality of symptoms (English)

TOTALITY OF SYMPTOMS

SN The complete clinical picture of the patient during the illness comprising all the mental symptoms, general symptoms, and local symptoms and signs, and test findings if appropriate (IDH, p.215).

TR Totalität der Symptome (German)

TR Totalité des symptômes (French)

TR Totalità dei sintomi (Italian)

UF Symptom complex (English)

UF Symptom totality (English)

BT Case analysis (English)

RT Total case taking (English)

TOXICITY

SN Used for drugs and chemicals for experimental human and animal studies of their ill effects to determine safety levels (after MeSH).

TR Toxizität (German)

TR Toxicité (French)

TR Tossicità (Italian)

BT Pharmacodynamics (English)

RT Poisoning (English)

TRANSPIRATION SYMPTOMS

SN Sweating of various parts of the body.

TR Schweißsymptome (German)

TR Symptômes de transpiration (French)

TR Sintomi di traspirazione (Italian)

BT General symptoms (English)

Trituration

USE Homeopathic trituration (English)

Tuberculinic miasm

USE Tuberculinism (English)

TUBERCULINISM

SN Acquired or inherited effects of tuberculosis. Person suffering from exhaustion (after Gaier, p.345).

TR Tuberkulinismus (German)

TR Tuberculisme (French)

TR Tubercolinismo (Italian)

UF Pseudo-psoric miasm (English)

UF Tuberculinic miasm (English)

BT Diathesis (English)

TYOLOGY

SN The classification of human beings according to their physical and/or psychological characteristics that allows identification with a matching drug picture (after Vannier and Gaier, p.560).
