In a second case cured by Schwencke, that of a man, 38, epileptic seven years, a pressive headache preceded the attacks, ascending from nape to forehead, then there was profuse salivation, head turned to left, eyes closed tongue in active motion in open mouth, trunk arched upward, slight spasms of right arm outward. After attack, dullness of head and feeling in body as if beaten. Cupr. first removed the fits and then the dullness of the head.

Cupr. has pains like knife-thrusts, worse on least motion, take away the breath, thinks he must die if they last. Speaks in a whisper. The thrusts go through to back from ensiform

cartilage from umbilicus. Restless tossing all night. Perfect stupor with jerking of muscles. Paralysis of isolated muscles.

Many unusual symptoms are produced including maliciousness and desire to injure. Screaming with cerebral or mental symptoms. Loquacious. Violent head pains worse over left eye. Brain seems paralyzed. Chlorosis from abuse of iron. Vomiting, hiccoughs and spasms better by drink of cold water. Over-sensitiveness of skin, especially in region of stomach and fourth and fifth dorsal vertebrae.

Boericke.

Cuprum sulphuricum

(sulphate of copper)

Pharmacy

Cupr-s. Sulphate of Copper. Cuprum Sulph. Trituration. Historical dose: Trituration and all potencies, Locally, Cupr-s. in 1-3 per cent solution in inoperable sarcoma.

History

Sulphate of Copper is a well-known emetic and caustic. J. D. Tyrrell mentions the case of a lady who could not use Cupr-s. for "stamping" fancywork, because it "made her face hurt and swell so she could scarcely see and her lips became everted, turned inside out, she said."

It is a well-known application in allopathic practice for stimulating flabby granulations and it has cured itching eruptions and manifestations of syphilis. Rest better pains.

Planets: Moon.

Homeopathic

Cuprum Sulph. causes forcible vomiting and much nausea. Burning at vertex. Paleness of face or jaundiced appearance, pale skin generally, a peculiar diarrhea, enlarged liver. Incessant, spasmodic cough, worse at night tongue and lips bluish.

Eyes, granular lids, catarrhal and purulent conjunctivitis.

Clinical

Alopecia. Conjunctivitis. Diarrhea. Dysentery. **Eyes**, granular lids. Scabies. Syphilis. Trachoma.

Compare

(1) Kali-bi. - cough and Merc.

Relations

Antidoted by: Milk, eggs, pure yellow prussiate of potash.

Curare

(arrow poison)

Pharmacy

Cur. Curare. Arrow-poison. Woorari. Curara. Woorara. Woorali. Hoorali. Oorari. N. O. Loganiaceae. Tincture. Historical dose: Tincture and all potencies, sixth to thirtieth potency.

History

An arrow poison used by South American Indians. Curare affects the muscles and brain. It is a muscular poison, causing paralysis of muscles without impairing the sensations and consciousness. Accounts differ as to its actual composition into which the juice of different species of Strychnos are said to enter or of Cocculus toxiciferous with serpent poison.

Others have said it is prepared from the venom of toads. In appearance it is something like the extract of licorice. Curare produces muscular paralysis, probably through its action on the nerve endings in the muscles without affecting either the muscle substance or the nerve substance and without impairing sensation and consciousness.

It is thus in many ways the opposite in its action of Nux-v., though it is said to have the juice of a Strychnos in its composition. It causes death by paralysis of the respiratory muscles.

Reflex action is diminished or abolished (opp. Nux-v.) and this is one great indication for its employment in homeopathic practice. Diabetes mellitus, 4c dilution (Dr. Barkhard).

Homeopathic

Muscular paralysis without impairing sensation or consciousness. Paralysis of respiratory muscles. Debility of the aged, (Bar-c.) and from loss of fluids. Catalepsy. Nervous debility. Trismus. Glycosuria with motor paralysis. Curare decreases the output of adrenalin. Vomiting of bile in cirrhosis of liver.

Paralysis, facial, mouth, threatening respiration. Reflex action is diminished or abolished. Discharges are fetid. Diabetes mellitus. Catalepsy. Leprosy. Sensation as if the brain were full of fluid. As of a heavy weight hung to the parts—Arms, legs etc. Many symptoms appear on right side.

It causes a sensation as if the brain were full of fluid. Piercing, sharp pains. Throbbing pains. Weakness, heaviness, numbness, numbness with tingling.

Clinical

Cancer. Catalepsy. Cirrhosis. Corns. Coughs. Debility. Diabetes. Dysmenorrhea. Dyspnea. Ear disorders. Eczema. Emphysema. Epilepsy. Facial paralysis. Faintness. Headache. Leprosy. Liver spots. Locomotor ataxia. Nervous debility. Neuralgia. Otitis. Ozaena. Paralysis. Ptosis. Rabies. Reflexes, weak. Scrofula disorders. Tetanus. Tuberculosis. Ulcerations. Uterus, disorders. Vaginitis. Whooping cough.

Constitutions

It is suited to scrofulous children, producing scrofulous eruptions on skin, eczema, especially of face and behind ears, also liver-spots, yellow-brown. **Planets:** Moon, Mars.

Modalities

Worse from motion. Worse from dampness, cold weather, cold wind. Worse by movement, walking, ascending. Worse dampness, cold air, cold weather, cold wind, change of weather. Worse 2 a. m. and 2 to 3 p.m.

Symptoms

MIND

Indecision, no longer wishes to think or act for herself. Inability to think or study, forgetful, stupid, sleepy, indolent. Excited, hurried feeling. Depressed, desire to be alone.

Abdomen

Weary ache from throat to left hip. Bowels feel sore and bruised. Pain in groin low down with heaviness in limbs while walking. Neuralgic pain in hypogastrium with pressure in vagina.

Back

Tired pain up and down spine. Stiffness in neck, head drawn back. Stiffness of muscles or right neck and shoulder. Dull, tired ache in shoulders and across back, numb. Chills running up back and all over body.

Chest

Sore to pressure or touch.

Ears

Otitis interna, driving crazy, purulent discharge. Noises, unbearable earache. Sharp pains start from ears, extending down to legs. Swelling of lobes of ear.

PAGE 565

Eyes

Sharp, stitching pains over right eye. Ptosis of right side. Heavy eyes, lids can hardly be kept open. **Eyes** haggard, sunken. Red, hot, sensitive to light. Feel as if full of sticks. Black spots before vision, especially worse from reading.

Face

Facial and mouth paralysis. Tongue and mouth drawn. Red face. Paralysis of muscles of expression. Aching right side of face.

Female

Dysmenorrhea. Menses too early. During menses, colic, headache and kidney pain. Leucorrhoea, thick, purulent offensive. Gripping in right ovary. Bearing-down, dragging, tired, in all pelvic organs. Ulcerations of os uteri, scirrhus. Aversion to sexual intercourse. Vaginitis. Leucorrhoea, thick, purulent, offensive, in clots.

Food

Thirst and great hunger with fever. Sudden hunger almost to faintness. Great thirst especially evening and night. Craves acids. Aversion to bread. Better after first mouthful of food.

Head

Head confused, great weight in vertex. Nervous headache. Sharp pains all over head.

Head drawn backward. Brain feels full of fluid.

Head beats like a hammer, with vomiting of bile. Rush of blood to head. Falling out of hair.

Heart

Precordial pain, anguish with palpitations and stinging pains in heart.

Kidneys

Clear and frequent urine. Digging, crampy pain in kidneys, dry mouth, great thirst. Sugar in urine, great emaciation, (acute diabetes). Urine copious, urgent, bladder feels distended.

Limbs

Paralysis of limbs, burning with heat and chills. Aching in all the limbs and body. Numbness and tingling. Arms weak, heavy. Cannot lift the fingers. Weakness of hands and fingers in pianists. Legs tremble, give way in walking. Debility, paralysis. Catalepsy. Favors development of corns. Reflexes lessened or abolished.

Lungs

Shortness of breath. Very distressing dyspnea. Short dry cough, provokes vomiting, followed by fainting. Threatened paralysis of the respiration on falling asleep. Dyspnea, stitching pains right side. Dyspnea, worse ascending. Short, hacking cough, dry with soreness of chest walls. Cough troublesome in morning. Cough, worse breathing cold air, laughing, moving, eating. Severe pains in lungs, especially left.

Mouth

Tongue and mouth drawn to right. Tongue coated. On waking tongue yellowish at base, papillae raised, light pink anteriorly, bitter or bloody taste, yellow-white. Mouth dry.

Nose

Nasal catarrh. Ozaena, fetid lumps of pus. Tubercles on nose, fetid lumps of pus.

Rectum

Diarrhea with constant urging, fetid, thin mush-like feces. Excessive pain in hemorrhoids. Extreme watery diarrhea.

Skin

Leprosy. Dirty-looking skin. Boils. Tubercles on nose. Blood oozes through. Itching. Itching with hunger. Eczema. Liver-spots.

Sleep

Drowsy, cannot keep awake. Nights restless, always desiring to put feet out of bed, especially towards morning.

Stomach

Chill after eating. Hiccough frequent and annoying. Nausea in morning after eating. Vomits green bile all night. Empty, gone feeling in stomach. Sharp pain in pit of stomach,

followed by nausea. Shooting in stomach. **Heart**burn, pain and Distention after eating ever so little.

Temperature

Body blue and yet fever. Chill, creeping up back without thirst. Heat worse at night and in open air. Sweat with every exertion. Sweat, cold and bloody, especially at nights.

Throat

Burning heat in throat with sensation of Distention.

Vertigo

Instant giddiness, falling in swoon while standing or walking. Dizzy when looking at near objects or at water.

PAGE 566

Comments

A cure of a pseudo-hypertrophic paralysis by the 200c has been recorded. A condition resembling catalepsy has been induced by it, immobility with fixed gaze on waking. Fetid odor characterizes many of the secretions and discharges.

Two cases of diabetes in middle-aged men have been cured by Burkhardt with Cur. 4c. It favors the formation of corns. Debility short of paralysis indicates it, debility of the aged and nervous debility from loss of fluids. Its relation to hydrophobia and tetanus is probably antipathic.

Compare

- (1) Cystisin - motor paralysis.
- (2) Con., Caust., Crot-h., Nux-v.
- (3) Aran. - fever worse in damp weather.
- (4) Ferr. - hammering pains in head.
- (5) Crot-h. - blows in region of cerebellum.
- (6) In yellow-brown spots on skin, Sep., Lyc., Nux-v., Sulph.

Relations

Antidote to: Strychnia and to the poison of rabies. In cases of poisoning artificial respiration must be resorted to. Bromine and Chlorine antidote its effects. If the poisoning is due to a punctured wound, rubbing in tobacco or salt will neutralize it. Compatible:

After Arn. (paralysis from injury) after Bell. (paralysis after nosebleed).

Follows well: in debility of the aged: Bar-c.

SOURCES

Cyclamen europaeum

(sow-bread)

Pharmacy

Cycl. *Cyclamen europaeum*. Sow-bread. N. O. Primulacae. Tincture of the root gathered in spring. Historical dose: Tincture and all potencies, third potency.

Herbal

Cyclamen has a traditional reputation as a remedy for disorders of the uterus and appendages. The later provings have demonstrated the correctness of this.

Homeopathic

Cyclamen is in many ways similar to *Pulsatilla* from which it differs mainly in having no relief from open air and in not having thirstlessness as so frequent an accompaniment of other conditions.

Cyclamen affects the digestive tract and female sexual organs. Large doses produce violent purging and vomiting, disturbed digestion with very salty saliva. Anemic and chlorotic conditions. Affections of uterus(**kidney dominated**)

. Sleepiness, morose and lassitude.(**blood deficiency**) Cough at night while asleep without waking, especially in children.(**while asleep liver storing blood but in night yin period blood deficiency creates cough**) (Cham., Nit-ac.) Gastro-intestinal and genito-urinary tracts affected inducing secondary anemia and various reflexes.

Clinical

Anemia. Bone, pain. Chlorosis. Coryza. Diplopia. Dyspepsia. Enteralgia. Eye disorders. Headaches. Heel, pain. Hiccoughs. Menstruation, disorders. Menopausal. Pregnancy. Prostatitis. Rheumatism. Strabismus. Thirstless. Urethritis. Vertigo. Weaning, complaints after. Writer's spasm.

Causations

Ill effects of inward grief (**lung involved**)and terror of conscience.

Constitutions

It is suited to the blonde leuco-phlegmatic subjects with chlorotic conditions, disinclined for labor and easily fatigued.(**kidney deficiency and spleen deficiency both creating blood deficiency**) Special senses enfeebled or their functions suspended. **Planets:** Venus, Moon.

Modalities

Better from moistening diseased parts and from bathing.(**blood moisten and warm the organs but here it is less blood**) Better during menstrual flow,(**liver and kidney yang active**) by moving about. Better rubbing parts in warm room(**warmth helps as blood warms,rubbing also create warmth**), lemonade, weeping,(**lung qi depression or disturbance gets cleared**) bathing the part. Better twinges in back. Worse cold,(**blood deficiency**) open air,(**lung qi disturbance**) evenings,(**yin deficiency**) sitting(**spleen qi deficiency**), fats(**phlegm heat**). Worse by rest(**that is remedy basic pattern is of excess and not deficiency**), better on walking about(**excess pattern**). Sitting worse menstrual flow. (**spleen qi has effect on liver yang or kidney**)Worse at night. Drawing shoulders forward aggravates. Worse drawing them backward. Worse standing(**kidney qi deficiency**) and cold water **kidney qi deficiency**. Worse from eating at night.

PAGE 567

Symptoms

MIND

Terrors of conscience. Self-reproaches. Sadness as if he had committed a bad act or not done his duty. Grieves over duty neglected. Depression with weeping desire to be alone. Dull, sleepy and morose. (lung qi, heart yang deficiency)

A joyous feeling alternating with irritability. (heart excess pattern alternates with liver excess) Silent weeping. The room seems too small. (heart yang deficiency) Hallucinations as if two persons were lying in her bed. Tearful and broods over imaginary grief. Thinks she is alone and persecuted.

Abdomen

Running in bowels as if something alive. (qi stagnation and irritation) Fullness and pressure qi stagnation due to hard substance Uneasiness in the abdomen with nausea. (qi stagnation and wind) Painful on the slightest touch (qi stagnation and wind). Sudden attacks of griping, with pinching (irritated qi and wind). Borborygmi in the abdomen, immediately after a meal.

Back

Excoriation (scratch or strip away) in the nape of the neck. (kidney qi and blood deficiency) Aching, with paralytic weakness. (kidney qi and blood deficiency, or traction in the nape of the neck and in the neck. Dull stitches in the region of the kidney. (kidney qi and blood deficiency, worse when drawing a long breath. (lung inhaled qi received by kidney but disturbing the kidney that is kidney yang disturbing water metabolism)

Breasts

Swelling of breast with milky secretion after menses. (after menses blood deficient in liver so liver yang hyperactive so swelling of breast and milk secretion due to liver wind) Air seems to stream from the nipples. (liver wind) Milk in virgin breast or non-pregnant women. (liver hyperactive yang or liver wind)

Ears

Itching in the ears with increased wax (wind heat and damp toxins). Drawing in the ears. Diminution of hearing, as if the ears were stopped. (damp or phlegm obstruction in ears and wind heat or liver fire)

Eyes

Disturbance of vision, (liver wind) associated with gastric disturbances (liver attacking spleen and stomach). Dim vision (liver blood deficiency) with headache (liver yang active), worse on waking with spots before eyes. Flickering of various colors. Hemiopia. Sees countless stars. Diplopia. Fluttering, glittering or black spots (liver fire and wind). Squint especially connected with menstrual irregularities (liver wind affecting menses and squint. liver course the qi in body). Convergent squint after convulsions, (liver wind) left eye drawn inwards. (liver wind)

Face

Pale, anemic (blood deficiency). Upper lip, as if numb or indurated. (stomach or spleen dampness)

Female

Menses changeable (liver qi stagnation whose nature and location changes), profuse, (kidney yang deficiency so yang yang qi not able to hold blood and not liver heat) black, membranous clotted too early, cold congealation of blood due to kidney yang deficiency, kidney relates to black, cold relates to black so blood stasis) with labor-like

pains from back to pubes. The flow is less when moving about. Dysmenorrhoea (due to blood stasis painful menses). Menstrual irregularities with megrim and blindness or fiery spots before eyes (liver fire or wind affecting menses and eyes simultaneously). Suppression of menses after excessive dancing or being over heated (excessive action or heat dries or uses liver blood or liver yin so for menses no blood so suppressed). Leucorrhoea (kidney yang deficiency and dampness) with retarded or scanty menses (kidney qi or liver blood deficiency). Hiccough during pregnancy (kidney qi active leads to liver qi stagnation). Post-partum hemorrhage with colicky bearing-down pains with relief after gush of blood. (kidney qi deficiency so haemorrhage with spleen deficiency so damp cold so bearing down colicky pain)

Food

Desire for lemonade inedible things. Craves sardines. Aversion to bread, butter, fat, beer. Disgust for meat (phlegm heat materials are disliked), especially pork. No thirst all day. Pork disagrees. Loss of appetite after taking beef tea or a cup of tea.

Head

Headaches in morning with flickering before eyes (yang becomes active in morning so assist in liver yang hyperactive so liver fire), sneezing with itching in ear (liver fire attacks lung so sneezing and liver wind so itching in ears). One-sided headache. Frequent sneezing with itching in ears. Brain as if wrapped up in a cloth (qi stagnation and blood congestion). Headaches with flickering before eyes (liver fire), better cold water. Pain in left temple. (liver fire moves left down to top) Prolonged migraine. (liver fire) As if brain wobbled about while walking, menses absent or scanty.

Heart

Frequent palpitations from suppressed menses. Pressure on the heart, as from congestion of blood. Sensible palpitations of the heart, stitches in the region of the heart (suppressed menses creates blood stasis which affects heart).

Kidneys

Urine profuse, watery and frequent (kidney yang deficiency so bladder doesn't steam urine so urine profuse, watery and frequent). Frequent desire to urinate with abundant emission of whitish urine. Shootings in the urethra (liver heat in liver channel), followed by a sudden discharge of a dark red urine. (liver fire or liver wind so sudden action)

Limbs

Shooting pains in the loins. (Pains in periosteum. Pains in parts where bones lie near the surface (spleen heat and blood stasis). Burning, sore heels, (spleen heat) better walking, (excess condition) worse sitting, standing. (due to spleen and kidney qi stagnation). Chilblains. Weakness of knees. (kidney qi deficiency) Cramp-like slow contractions of the right thumb and index finger, they have to be extended by force. Writer's spasms. (spasm due to spleen qi stagnation or deficiency as writers dissipate hand muscles qi that is spleen qi)

Lungs

Coughing without waking. (lung qi weak) Scraping and dryness in the pharynx, causing a suffocative cough. (blood deficiency in lungs so scraping and dryness)

Male

Prepuce and corona glandis feel sore after slight rubbing. (liver fire in liver channel gets disturb by rubbing so sore as it dries out yin) Stitches and pressure in prostate (liver fire)

with urging to stool and urination(liver fire as liver channel passes through urethra,prostate etc).

Mouth

Taste lost or salty, which is communicated to all food.(lost taste means stomach qi/blood/yin deficiency and salty means kidney domination) Food tastes over salty. Saliva salty. Tongue loaded with a white coating(undigested food stagnation in stomach). Dryness of the lips,(blood deficiency and not stomach heat so no thirst) without thirst. Fine stitches on the surface of the tongue. Burning on the tip of the tongue(heart fire or heat).

PAGE 568

Nose

Sneezing with itching in the ear. Loss of smell.(wind heat in lung channel or damp heat in spleen channel) Fluent coryza, with sneezing.(wind heat)

Rectum

Diarrhea after every cup of coffee.(coffee disturb heart yang so heart heat goes to small intestine so diarrhea) Pain about anus and perineum, as if a spot were suppurating, when walking or sitting.(damp heat due to spleen deficiency in kidney area Evacuations hard and frequent. Pressure in the rectum.(damp heat) Discharge of blood from the rectum.(damp heat and kidney qi deficiency) Drawing pressure in the anus.

Skin

Acne in young women.(phlegm heat) Pruritus(general itching whole body) better scratching and appearance of menses,(that is heart qi irritation due to blood stasis due to suppressed menses which gets released when menses starts worse at night in bed.(blood or yin deficiency) Gnawing itching in several parts of the skin.(wind and blood deficiency) Itching, in the evening in bed.

Sleep

Dreamy,(liver fire) frightful,(gallbladder deficiency) lascivious(liver yang excess not kidney yang). Great inclination to lie down, and to sleep.(blood and qi deficiency) Nightmares when falling to sleep.liver fire Unrefreshing sleep inter fused with terrible dreams.liver fire

Stomach

Salty taste, hiccough-like eructation Worse fat food. Satiety after a few mouthfuls, loathing and nausea from the least food afterwards. Hiccough, worse pregnancy with yawning.(yawning affects kidney qi) Nausea felt in throat. Vomiting of pregnancy.(kidney qi active induce vomiting by liver yang active)

Temperature

Chilly all over(general blood and qi deficiency), not better by covers. Offensive sweat.(lung heat) Attacks of chilliness in the morning or evening. During the evening, chill and great sensitiveness to cold air or to being uncovered. Febrile shivering and cold, followed by heat.(pathogen external enters at qi level as protective qi on surface is very low so chilly but in qi level they are fought by body so heat)

Throat

When reading aloud the voice is weak(lung qi weak). Dryness in the throat(lung heat). Sensation of painful constriction in the throat . Burning and scraping in throat.blood stagnation and lung heat Nausea in throat. The tonsils and palate are shriveled and white.(blood deficiency)

Vertigo

Vertigo, objects turn in circles or look pale, worse open air(vertigo means wind involved so open air affects but lung qi weak also so it should help in other symptoms), better in a room and sitting.(makes liver wind or heart wind fixed by dampness of spleen)

Comments

Debility torpidity of mind and body. Dullness of senses, flickering before the eyes, squint, especially in connection with menstrual irregularities or fevers after convulsions, convergent squint, left eye drawn inwards. Amblyopia, diplopia, hemiopia.

Many digestive disturbances, saliva has a salty taste, which is communicated to all food eaten. After eating but little, satiety, aversion to food with nausea in palate and thirst.

Desire for lemonade. Aversion to bread, butter, meat, fat, beer and ordinary food, craving for inedible things, for sardines. Frequent vomiting in morning.

Prostatic troubles with stitches and pressure, urging to stool and urination. Menstruation too early with some relief of melancholy mood and heaviness of feet.(menses not coming activates liver fire affects spleen so damp heat or phlegm so heaviness of feet) Scanty or suppressed menstruation with headache and vertigo.

During pregnancy: hiccough, loathing and nausea in mouth and throat, complaints after weaning. Pressing, drawing or tearing pains at parts where bones lie near surface.

Chilliness. Itching leaving a numb sensation(itch due to wind and numb due to dampness . Chilblains, itching and pricking.(wind and blood deficiency which gives pricking sensation) worse at night in bed. Eidherr of Vienna, has given the best account of this remedy.

Menstruation more copious, more frequent too early with severe abdominal pains. Accompanied with labor-like pains, flow is excessive, black and lumpy. Commencement of menses after protracted cessation.

Eidherr's clinical experience illustrates in a remarkable way Cyclamen's sphere of action. In one instance a higher potency of the same remedy antidoted this effect. He found the remedy especially suited to blonde leuco-phlegmatic subjects.

But one of the cured was a woman presumably not a blonde. It will be noticed. that the "Sleepiness, morose and lassitude," and also the vertigo noted by Hahnemann, are prominent in many of Eidherr's cases.

PAGE 569

J. K., 24, blonde, pale delicate skin, pale lips and gums, had menstruated normally until 22, when she got wet at a picnic just as menstruation was starting. It stopped at once and did not reappear until ten months later after vigorous use of all kinds of domestic remedies.

Now the periods were accompanied by terrible abdominal, labor-like pains, lasting eleven hours. Menses recurred every two or four months, always with the pains, starting from sacrum, extending along both sides of abdomen to pelvis.

They were periodical, every one, two or five minutes during which time there was no flow, the blood appearing after these attacks was somewhat watery.

Other symptoms were: Eyelids slightly edematous, pressing pain in forehead, vertigo frequently changing into syncope, chilliness of whole body, disturbed, unrefreshing sleep interspersed with terrible dreams, continued loathing for meat, longing for salt fish, frequent vomiting in morning. After partial relief from Puls., Cyclamen made a complete cure.

The ocular symptoms which developed were remarkable. The vertigo and headache were untouched by Puls., but quickly subsided under Cycl. 15x.

On their disappearance she saw fiery flames dancing before her eyes on awakening at night and in the morning she saw everything double. And she had the hallucination as if two persons lay in her bed and that the body of the other overlapped hers by half. Cycl. was discontinued and in two days her sight was normal.

Anna F., 20, blonde, menstruated since her tenth year. In seventeenth year suffered from chlorosis, ever since, menstruation regular, but lasting only one or two days in a moderate degree. Is trouble also at other times by vertigo and pressing pain in forehead and temples, which attacks are ameliorated by foot baths with ashes.

Appetite poor, little thirst, stool regular, sleeps too long, always sleepy is of dejected mood, morose. All movements, as well as speech, languid, palpitation.

Puls. made no change, Cycl. 3x quickly improved headache, vertigo and spirits. After three days sight became obscured and there was glimmering before eyes.

The following case of hemicrania was cured: Theresa F., 37. , has menstruated sparingly and irregularly, (often at two or three months' intervals). For four years suffered from violent headache affecting right side of head and face, coming every 8-14 days, spells lasting 12-36 hours. During menstruation the attacks were extra severe. Patient was emaciated, skin, gums and lips pale.

Right eye closed owing to cramps in eyelids, when forcibly opened a stream of hot tears gushed out, otherwise the eye was normal. Under Cycl. 3c the symptoms diminished, but there appeared "glittering sparks before the eyes" and these remained after all symptoms of headache had gone. Cycl. was given persistently, the periods became regular and rather copious and the headaches entirely ceased.

Another case (in a wet-nurse who had just weaned her baby) presented unceasing, violent, stitching pain in temporal region extending to vertex. Throbbing temporal arteries.

Bell. diminished the pain, but vertigo came on. Under Cycl. 3x headache and vertigo disappeared altogether, but the patient complained of her sight having become so weak that she did not dare to walk alone. This passed off when the medicine was discontinued and her headache did not recur.

Cycl. 15 x cured a boy of violent squinting. Six months before, he had a fall from a table, convulsion followed and after the second attack the squinting came on. Arnica was given and the convulsions did not recur, but the squinting remained. Cycl. 15x was given and after a few weeks the squint entirely disappeared. Wurmb cured a case of squint in a coachman with Cycl.

PAGE 570

Compare

(1) Puls., Ign., Ambr.

(2) Ferr. and Chin. resemble it in chlorosis.

(3) Crocus and Thuj. in sensation of something alive in abdomen.

(4) Am-m. - menses worse at night.

(5) Iris-v. and Kali-bi. (migraine with scintillations, headache worse as sight returns, Kali-bi.

(6) Coc-c. - leucorrhoea worse sitting better walking, Cycl. menses worse sitting better walking.

(7) Rhus-t. (enteralgia), Gels. and Seneg. (diplopia), Arn. (falls), Bar-c., Calc., Canth. (chilly and fever), Cocc.

(8) In speedy satiety, Lyc., Nux-v., Sep.

(9) In prostatitis and urethritis, Lith-c., Dig., Sel., Caust., Lyc., Apis in squint, Alum., sudden vanishing of sight with menses, Sep., Puls. (Puls. scanty, Cycl. profuse and dark).

(10) nausea in throat, Sep. Berb., pain in heels on standing. Desire for lemonade, Bell., Sabin.

Relations

Antidoted by: Camph., Coff., Puls. The modalities of Cycl. are in general opposite to those of Puls., the menstrual flow of Cycl. is more profuse while at rest with Puls. the opposite is the case.

Cynodon dactylon

(doorba)

Pharmacy

Cyn-d. Cynodon Dactylon. Grantha Doorba Bhargavi. Graminaceae order. Historical dose: Tincture and all potencies, 6x to 30c.

Herbal

The Cynodon Dactylon, popularly known in India as Doorba is a grass which grows throughout that country. The Sanskrit name for this plant is Grantha Doorba Bhargavi. Cynodon Dactylon flowers throughout the whole year. This is an elegant perennial plant, used in some of the religious ceremonies of the country.

The freshly extracted juice of the grass is useful for hematuria, vomiting and as an application for conjunctivitis. A decoction of the plant is used as a diuretic and can be useful for dropsy and anasarca. Chakradatta has mentioned it as being an excellent remedy for scabies and amenorrhea.

Jugal Kishore carried out a Homeopathic Proving on three provers, two men and one woman. The potencies used were the mother tincture, 6x and 200c. The stock of Cynodon Dactylon was supplied by the Hahnemann Publishing Co. of Calcutta. **Planets:** Venus.

Homeopathic

General weakness, more marked in the hands with difficulty in writing. General lassitude, laziness, aversion to work. The least physical effort causes pain all over. Mental work causes frontal headaches. Elective action on the gastro-intestinal passages and urinary system. Aversion to noise, but desires jolly company.

Flatulence and abdominal cramps. Stools irritating with acrid odor and noisy expulsion. Urgent need to go to stool. Urethral pain after urination. Pain in the upper or lower limbs, ameliorated by a tight bandage or by walking. Heat in the soles of the feet with the need to take the feet out from beneath the covers.

Clinical

Cholera. Diarrhea in the summer. Dysentery. Ulcerative colitis.

Modalities

Better from heat. Better from eating. Worse in the afternoon and evening. Worse from physical or mental exertion at the end of the day and in the evening. Worse predominantly on the right side.

Symptoms

MIND

Irritable, quarrelsome, flies into a rage. Angry without cause. Aversion to noise and does not want to be spoken to. Desire jolly company.

Abdomen

Flatulence and abdominal distention after 4 p.m. Abdominal cramp with an urge to go to stool. Heaviness around the umbilicus. Impression of a ball below and around the umbilicus. Cramping abdominal pains. Pain in the right hypochondrium, which disappears after resting.

Eyes

Eyelids stuck together in the morning. Conjunctiva are painfully sensitive. Swelling of the upper right eyelid, worse in the morning. Pain in the eyes in morning after a bath or washing the face.

PAGE 571

Food

Loss of appetite, which returns on eating.

Head

Headache after anger. Forehead hot and heavy. Pain on the right side of the head and in very localized areas of the body. Headache after mental exertion.

Kidneys

Urethral pain after urination with feeling of not having finished. Involuntary urination while sneezing. Frequent and copious urination.

Limbs

Feeling of great weakness in the forearms and hands. Aggravation from typewriting. Sudden, shooting pain in the back of the left forearm. Pain and restlessness in the legs when lying down at night. Better by rising from the bed or by tight bandaging. Pain in the upper part of the body, especially in the back. Sensation of heat in the soles of the feet, desire to put the feet outside the covers.

Mouth

Increased salivation with insipid taste. Loss of sense of taste. Dryness of the palate, cannot take sour or spicy food. Better by taking something cold. Red patch on the palate and small red granules in the pharynx.

Rectum

Stools, irritating, yellow and soft. Urgent need to go to stool when rising with a feeling of colic. Offensive, acrid stools with noisy expulsion. Urgent need to go to stool continues during the day. Much gas passed with stools. Stools semi-solid, then soft with irritating mucus. Stools hard, difficult to evacuate.

Sleep

Sleepiness after meals. Sleep heavy. Sleep disturbed by pains in the legs.

Stomach

Sensation of heaviness in the stomach after lunch.

Temperature

Feverish, needs to cover himself. Sensation of heat in tips of toes.

Compare

(1) Podo. - Diarrhea in the morning, fetid stools, expelled in a rush, tenesmus general weakness, rumbling and feeling of emptiness in the abdomen.

(2) Verat. - Copious diarrhea, abdominal colic, extreme weakness with cold sweating.

(3) Aloe - Abdominal distention, hot stomach, heavy with expulsion of burning irritating gases. Diarrhea after resting, urgent need to go to stool. Involuntary passing of stools when urinating or when expelling wind.

Cypripedium pubescens

(yellow lady's slipper)

Pharmacy

Cypr. Yellow Lady's Slipper. *Cypripedium pubescens*. N. O. Orchidaceae. Tincture and infusions of fresh root gathered in autumn. Historical dose: Tincture and all potencies, tincture to sixth potency. For Poison Oak, 5 drops of tincture per dose, also locally.

Herbal

Lady's Slipper has great repute as a "nervine" among eclectics and in domestic practice. It ranks with *Scutellaria* and *Valerian*. A strong infusion causes exhilaration followed by calmness and is much resorted to by women whose nerves are shattered by long illness **(heart yang excited which give the feeling of nerveous energy in body or excessive indulgence in green-tea or coffee, (Hale).**

Homeopathic

Cypr. is indicated in the brain-hyperesthesia of children who wake in the night lively and full of play. Ecstasy, **(heart yang excited so high nervous energy and excited nerves affecting brain)** preliminary to incipient brain disorder. Epilepsy from reflex irritation Trembling and twitching of limbs. **(irritated heart yang so heart wind so epilepsy so irritated and excited nerves)**

Nervousness in children from teething and intestinal troubles. **(nervous irritation or excitation that is heart qi irritation due to teething that is kidney yang activity and intestinal trouble means small intestine pathogenic substance irritate nerves whose impact goes to heart to disturb heart yang)** Debility after gout. **(small joints pain due to irritated heart yang that is nervous excitation and after that debility due to nervous qi dissipation)**

The skin symptoms correspond to those of poisoning by *Rhus-t.*, for which it has been found an efficient antidote.

PAGE 572

Clinical

Brain disorders. Chorea. Convulsions. Debility and sleeplessness. Delirium tremens. Ecstasy. Epilepsy. Mental despondency. Nervous debility. Neuralgia. Post-influenzal debility. *Rhus* poisoning. Sleeplessness. Spermatorrhea. Styes.

Constitutions

It is suited to **nervous disorders from mental over-excitement** or reflex nervous excitement to **nervous weakness after influenza**. **Planets:** Moon.

Symptoms

MIND

Irascibility and throws emotional fits. .(**heart and liver yang disturbed** Hysterical symptoms.(**heart and liver yang disturbed** Sleeplessness and agitation. .(**heart and liver yang disturbed** Indifference.

Eyes

Stye(an acute localized pyogenic infection of the glands of the eyelash follicle beginning with pain, redness and tenderness on the lid margin of the eye) on right lower lid.(it is due to wind heat or damp heat but since no spleen symptoms so it may be due to liver wind heat but heart fire goes upward from right down.)

Female

Amenorrhea with hysteria.(**blood stasis amenorrhea which affect heart yang /wind so hysteria**) Great nervous debility and despondency. Irritable vagina, hysterical symptoms, (**nerves irritation of vagina that is heart qi irritation**) sleeplessness and agitation.(**liver and heart yang excited**)

Head

Child cries out at night is wakeful and begins to laugh and play. Headaches of elderly people and during menopausal.(**headache due to emotional irritation of elderly and during menopause heart soul irritation**) Hydrocephaloid symptoms, result of long, exhausting diarrhea, sleeplessness(due to yin vacuity yang exuberance of heart). Brain hypersensitivity in young children(**heart qi irritated**) often the result of over stimulation of brain.

Male

Spermatorrhea(**yin deficiency with fire flaring**) with great nervous prostration and dejection of spirits.(**after sperm ejection nerves qi dissipated so nerves prostration and its impact on heart that is dejected**)

Sleep

Sleeplessness with desire to talk. A constant crowding of pleasant ideas with restlessness of body.(**heart yang irritated**) Ecstasy, children awaken in night from sleep, "wide-awake," unnaturally playful with no desire to go to sleep again.

Vertigo

Vertigo followed by heaviness and dragging of left foot.(**due to heart yang/wind and after vertigo heart yang/qi gets depressed and makes spleen qi deficient so dampness so left foot heavy and dragging due to coming in heart left channel.**)

Cytisus laburnum

(laburnum anagyroides)

Pharmacy

Cyt-I. Cystisus laburnum. Cystisus Aubour. Laburnum anagyroides. N. O. Leguminosae. Tincture or trituration of seeds. Tincture of fresh bark. The tincture is prepared from the essences of the flowers and young leaves. Historical dose: Tincture and all potencies, 6c to 30c.

History

Cystisus Laburnum or wild laburnum is a member of the leguminosae family. Cystisus Aubour is a shrub or small tree, growing naturally or cultivated as an ornamental plant with trifoliate leaves.

It has pale yellow flowers which hang in clusters with long pods and which are hairy when yellow. All parts of this well-known ornamental tree are poisonous. Our knowledge of it being derived chiefly from the accidental poisoning of children who have eaten the pea-like seeds and pods.

Especially the flowers and seeds, are very poisonous, owing to the presence of cytisin: this oxygenated, unsaturated alkaloid is toxic to the glands, which it first arouses and then paralyzes. It causes convulsions and can lead to death by asphyxia. The toxicity of cytisin is allied to that of nicotine.

Here is a typical case: W. G., et. 10, ate eight to ten seeds. Five or ten minutes after began to sweat, but soon became cold and shivering, skin pale, pulse scarcely perceptible, general collapse. Pupils dilated is drowsy and giddy, but in no pain.

Emetics and brandy were given, but after an hour of this there was no improvement. An enema of hot strong coffee was now given, the patient was wrapped in blankets and hot bottles applied. The collapse then gradually passed off.

The Homeopathic proving was done by Joseph Schier in 1900-1901 on sixteen provers and the low potencies and the mother tincture were used. J. Mezger has made a clinical re-proving with it. **Planets:** Moon.

Homeopathic

Cyt-I. acts on the central and sympathetic nervous system causing cramping spasmodic conditions. Nervous conditions of the spasmodic, cramping type.

Migraine. Nausea, pallor, cold sweating, vertigo. Dryness of the mouth tongue and throat. Face pale. Travel sickness, (air, sea and car). Epidemic cerebral and spinal meningitis. Sunstroke. Heatstroke. Cerebral shock. Hyperaesthesia of the peripheral nerves.

Clinical

Abdominal typhus. Angina pectoris. Convulsions. Cramps. **Eyes**, disorders. **Heart** anomalies. Heatstroke. Hydrocephalus. Hypertension. Meningitis. Migraines. Morning sickness. Motion sickness. Nausea. Raynaud's disease. Spasms. Sunstroke. Thyroid disorders. Typhoid. Vertigo. Vomiting of pregnancy. Writer's cramp. Influenza.

PAGE 573

Modalities

Better after passing wind. Better after going to stool. Worse from the cold. Worse in the afternoon. Worse in the evening. Worse predominantly on the left side.

Symptoms

MIND

Intense uneasiness, anguish. Depressive and irritable condition. Irritable mood. Oppression. Comatose condition. Sleepiness to the point of being in a stupor. Insomnia. Maniacal depressive conditions.

Abdomen

Chronic gastro-duodenitis. Spasmodic colon afflictions. Mesenteric irritation.

Back

Muscular cramps. Drawing pains starting at the nape of the neck, spreading towards the occiput.

Chest

Angina pectoris. Feeling of tightness in the chest.

Eyes

Pupils dilated.

Female

Dysmenorrhea. Menopausal complaints. Copious leucorrhea.

Head

Neuralgic pains in the head of a migraine type. Pulsating headaches.

Pressing frontal pain. Pricking pain in the left temple.

Heart

Hypertensive attack with state of collapse, pale, livid face and cold sweating. Palpitations with accelerated pulse. Arterial pulsation in all limbs. Hypertension. Rhythmic anomalies. Raynaud's disease.

Limbs

Weakness and numbness of the limbs. Sensation of breaking in all the limbs. Stiffness and drawing pains in the limbs. Muscular cramps.

Lungs

Whooping cough. Respiration rapid at first, then slower and difficult. Wheezing respiration.

Male

Strong erections.

Mouth

Dryness of the mouth tongue and back of the throat. Burning in the mouth and pharynx.

Nose

Nosebleeds.

Rectum

Diarrhea with painful abdominal colic intestinal rumbling and anal tenesmus. Cholera-type diarrhea.

Skin

Skin cold, cold sweating. Cyanosis. Pruritus. Vesicular eruption around the cheek.

Sleep

Insomnia with delirium. Worrying dreams.

Stomach

Nausea with vertigo and vomiting. Acrid dyspepsia. Gastric heaviness, burning pains in the stomach.

Temperature

Discomfort, accompanied by a feeling of coldness.

Throat

Feeling of constriction in the throat. Tickling sensation in the throat with the need to clear it.

Vertigo

Constant vertigo, even while lying, if she attempted to sit upright, she immediately fell back again. Vertigo and absent feeling.

Comments

In one case of Cyt-l. the head was rigidly thrown back. Head hot. Convulsions insensibility, drowsiness and mental indifference were leading features and muscular twitchings about the face were noted, Pupils dilated in two cases they were unequally dilated.

These patients were two boys poisoned by the root of an old tree, they had very strange waving motions of the arms and convulsive drawing up of the legs, first one leg then the other.

A boy who ate the green twigs of Cyt-l. was seized with vomiting, pain in the stomach and collapse, there was no diarrhea but tenesmus and erections.

After a few hours he passed 300 grams of grass-green urine after which he felt better. The urine soon after passing assumed a natural color.

PAGE 574

Compare

Damiana

(turnera aphrodisiaca)

Pharmacy

Dam. Turnera aphrodisiaca. Damiana Aphrodisiaca. N. O. Turneraceae. Tincture of fresh plant. Historical dose: Tincture and all potencies.

Herbal

Damiana is the local name of the herb Turn. aphr. It has long been a domestic medicine in Mexico, where it is used to "invigorate the system." This herbal remedy has the power of Damiana to dispel fatigue. Indians discovered that a decoction of it was a great invigorator after wearisome journeys.

They also found in it a remedy for the inability to exercise the reproductive functions in both sexes. Hale has collected from old-school sources much experience respecting this remedy, showing its power over the genito-urinary system. **Planets:** Venus.

Homeopathic

Douglass reported three cases of incontinence of urine: A man, age 63, for four years has had dribbling of urine day and night. Damiana 2x in water, four times a day, cured in two months.

Another use of Damiana is recorded in severe migraines. One or two doses given within an hour causes the headache to cease and induces sleep from which the patient awakens free from headache and with good appetite.

Among the cured cases are: injury to spine from a fall, sexual excess, syphilis or gonorrhoea in the men and amenorrhoea, dysmenorrhoea and leucorrhoea in the women.

Clinical

Amenorrhoea. Chronic fatigue. Dysmenorrhoea. Gonorrhoea. Headaches. Impotence. Incontinence. Leucorrhoea. Migraines. Prostate disorders. Sexual weakness. Spinal injury. Spermatorrhoea. Syphilis. Infertility. Urine incontinence.

Compare

Daphne indica

(spurge laurel)

Pharmacy

Daph. Daphne indica. Spurge Laurel. Daphne odora. Sweet-scented Spurge Laurel. N. O. Thymelaceae. Tincture of fresh bark. Historical dose: Tincture and all potencies, esp. the first to sixth potencies.

History

Daphne indica was proved by G. Bute. It is like its relative Daph. mezereon in producing disorders of muscles, bones and skin. Hence its relation to syphilis and the anti-syphilitic remedies Aur., Merc., Staph.

It is like Calad. in the craving for tobacco. The skin is clammy. Red rash in spots on legs in evening. Itching. Daphne oleoides is credited by Hering with relieving leprosy.

Planets: Saturn.

Homeopathic

Daphne acts on the tissues, muscles, bones and skin. Craving for tobacco. The prostate discharges are worse from tobacco. Burning in stomach. The gastric symptoms are worse from alcohol. Fetid breath, urine, sweat. Its pains are erratic and electric-like. Sudden,

lightning jerks in different parts of the body. Bruised pain. Exhaustion. Exostoses with stitching, pressing or dull pain, worse at night. Parts of the body feel separated, (Bapt.).

Clinical

Amaurosis. Amblyopia. Constipation. Coughs. Exhaustion. **Eyes** disorders. Exostosis. Fever. Gastralgia. Gonorrheal rheumatism. Gout. Halitosis. Leprosy. Mercurio-syphilis. Prostatorrhoea. Rheumatism. Splenitis. Sleeplessness. Tobacco, craving. Toothache.

Modalities

Worse from cold air, waning moon, evening in bed. Worse at night. Worse evening and night. Pains are worse from warmth of bed. Cold air aggravates wandering gout. Worse from touch and pressure. Lying down aggravates gouty pains, backache. Stooping or bending aggravates pains in spinal cord. Walking aggravates rheumatic pains in thighs.

PAGE 576

Symptoms

MIND

Despondent and sad. Agitated. Absent-minded and indecisive. Mental dejection. Timidity. Irritability. Over-excitement and trembling, during the pains. Absent minded and indecision. Exhaustion.

Abdomen

Shootings and pains in the region of the spleen. Arthritic pains which pass rapidly from the limbs to the abdomen. Pain in the abdomen, with shiverings.

Back

Pain in the nape of the neck with headache. Screwing pain from the ear to the shoulder. Sensation as though the cervical glands were much swollen. Sharp pain beneath left scapula. Burning itching in the back. Painful pulling along the spinal marrow, worse by stooping.

Ears

Buzzing in the ears. Roaring in ears.

Eyes

Scraping in the eyes. Sensation around the eyes and eyelids with dryness and heaviness of eyelids. Painful sensation as if the eyes were pushed outwards from the head. Violent pains in the eyeballs, in the evening, with great nervous excitement. Contraction of the pupils. Eyes inflamed, weak, dull, as if were swimming in tears. Weak sight, with confusion of the letters when reading. Diplopia. Pupils very much contracted.

Face

Heat and burning sensation in the cheeks, round the ears, and in the vertex, sometimes with constant inclination to yawn. Sensation of swelling, of stiffness and of tension in the temporo-maxillary joint, with burning smarting in the skin.

Food

Craving to smoke tobacco.

Head

Headache, provoked by all kinds of intellectual labor. Feels as if skull would burst, as if Head were separated from body. Heat in head, especially in vertex. Soft nodular swellings on bones about vertex, pain worse at night and touch.

Heart

Palpitations and starting of the heart, with inability to remain lying on the left side. Acute pains in the region of the heart with discouragement and trembling. Suffocating fits at night.

Kidneys

Frequent and abundant emission of urine. Frequent bedwetting at night. Urine turbid, thick, yellowish like rotten eggs. Fetid urine. Reddish sediment, which adheres to the side of the vessel. Pain, as from excoriation in the urethra, when making water. Urine, thick, turbid, yellow, foul like rotten eggs.

Limbs

Excessive itching on the arms and hands. Bone-ache, piercing pains in the bones and acute shooting pains in the fingers. Right toe swollen, painful. Pain shoots upward into abdomen and heart. Rheumatic pains in thighs and knees. Cold feeling on buttocks. Shooting pains, shift rapidly, worse cold air. Pains shift rapidly, upwards towards the abdomen and heart. Buttocks cold.

Lungs

The cough fatigues and hinders sleep. Bloody expectoration. Voice weak. Breath fetid. Expectoration thin, slimy, and copious. Cough, with vomiting, and yellowish frothy expectoration, mixed sometimes with streaks of blood.

Male

Prostatorrhea worse tobacco. Erection during toothache. Toothache after sex. Sweating of the scrotum. Discharge of prostatic fluid, after making water. Erections during the toothache.

Mouth

Tongue coated on one side only.

(Rhus-t.) Saliva, hot, foul smelling. Dryness of the tongue after sleep, as if it had been burned. Fetor of the tongue. Salivation, with toothache. Hot saliva.

Rectum

Stools scanty, bloody at end. Contraction of the abdomen, and constipation. Feces scanty and bloody towards the end.

Sleep

Entire inability to sleep, sometimes caused by aching in bones. Dreams with nightmare. Dreams of cats, black cats. Starting on falling to sleep with chilliness and clamminess.

Sleep

Sleepless from bone aching. Inclination to sleep with inability to accomplish it. Dreams of fire. Dreams of black cats with nightmares. Agitated, unrefreshing sleep. Starts with fright, on going to sleep, accompanied by shivering, with viscid sweat.

PAGE 577

Stomach

Heart

burn and sour vomiting. Vomiting with nausea, after breakfast. Sensation of fullness and ebullition in the precordial region. Aching in the stomach after drinking. Frequent cramps in the stomach. After each meal, burning pain and sensation of excoriation in the stomach, with frequent risings of flatus, the pains extend to left hypochondrium and to the back.

Teeth

Pulsation in the teeth and gums. Acute drawing pains in all the teeth. Toothache, with and without salivation. Toothache with erections. Toothache after sex. Toothache with fits of shivering, or disposition to perspire.

Temperature

Clammy sweat offensive. Fever, similar to typhus, with excessive shivering, followed by continued heat, by viscid sweat over the whole body, and complete loss of appetite.

Fever, with gastric and nervous suffering. Clammy sweat, of a putrid smell.

Comments

A peculiar symptom of Daphne is the tongue coated on one side only. Rhus-t. has the same, only the Rhus-t. coating is specified as white. Other symptoms are: Foul-smelling tongue. Ptyalism with hot saliva. Cold feeling on buttocks. Sudden stitch in region of spleen. Fetidity is a marked feature—breath, urine, sweat.

The pains are apt to be sudden. They wander suddenly from limbs. Ball of right great toe swollen and very painful, the pain suddenly shoots into the body to region of heart or some other part of body to abdomen. It is probable that a sensation of parts of the body being separated from one another is characteristic of Daphne.

Datura arborea

Pharmacy

Dat-a. Datura arborea. Brugmansia suaveolens. Brugmansia candida. N. O. Solanaceae. Tincture of the flowers. Historical dose: All potencies.

History

The odor of the flowers left in the room two days caused the many remarkable symptoms. The odor is also said to have caused spasms. The juice instilled into the eye causes amaurosis according to Froriep. **Planets:** Moon.

Homeopathic

Depletion of nervous circulation in medulla oblongata while handling and cutting the flowers. Confusion of ideas with nervous irritation back to cerebellum and a spinal irritation.

Sensation as if forehead were expanded and as if his ideas were floating outside his brain. Strange feeling of pleasant and easy comfort and as if he scarcely touched earth with his feet and had to gather ideas from afar. Sensation as if they were floating in the clouds. Involved in a most beautiful atmosphere, bright calm as the sunlight at noon.

Clinical

Brain disorders. Clairvoyance. Confusion. Spinal irritation. Vertigo.

Datura ferox

Pharmacy

Dat-f. Datura ferox. Chinese datura. N. O. Solanaceae. Trituration of seeds. Tincture of unripe fruit. Historical dose: All potencies.

History

Poisoning with this drug causes raving madness. **Planets:** Moon.

Homeopathic

A girl who ate half an unripe fruit manifested the following: Completely out of her mind in a quarter of an hour, dizzy, sleepy, slept with eyes open.

PAGE 578

If disturbed, sprang up raving and uttered unintelligible words, if one sang she began to dance in the Favanese fashion. This symptom may prove a keynote in certain cases of mental alienation. Dryness of mouth was also noted in this case, as with Bell. and other Solanaceae.

Clinical

Delirium. Mania.

SOURCES

Clarke.

Datura metel

Pharmacy

Dat-m. Datura metel. Indian Datura. N. O. Solanaceae. Trituration of seeds. Historical dose: All potencies.

History

Dat-m. causes a sleepy condition and later delirium and spasms. The soporose state may be absent. **Planets:** Moon.

Homeopathic

Delirium may be vociferous or merely garrulous. Patient usually manifests excessive timidity. Picks at real or imaginary objects. Performs ridiculous antics. Several movements appear due to perverted vision and inability to judge distances.

After the delirium, patient remembers nothing of what has occurred. Extreme dilatation of pupils. Flickering before eyes with sensitiveness to light. Pulse and temperature undergo extremes of exaltation and depression.

Clinical

Convulsions. Delirium. Epilepsy. Eye disorders. Mania. Timidity.

Compare

Desoxyribonucleic acidum

(d. n. a.)

Pharmacy

Deoxy-ribonucleic Acid. D.N. A. Historical dose: All potencies, 6x to 200c.

History

The proving on D. N. A., following the method indicated by Hahnemann was conducted from 1970 to 1972, by O. A. Julian.

Thirty people took part in this proving, four of whom were women, and all were doctors. The following potencies were used, by single blind method: 30c, 7c, 3x and placebo.

Homeopathic

The symptoms which follow are the result of that proving, incorporated with indications given by some Belgian homeopathic authors, who carried out some clinical research, using potencies of D. N. A.

General well being. Feels on top form in the morning. Needs to work, and to finish everything he undertakes during the day, does not want to be idle.

General hypersensitivity, with asthenia. Tendency to hyperthyroidism. Difficulty in assembling thoughts, poor powers of concentration, difficulty in working, then psychological improvement as soon as the body fatigue wears off.

Clinical

Allergies. Emaciation. Epilepsy. Fatigue. Hyperthyroidism. Insomnia. Premature senility.

Constitutions

Psoric and allergic constitutions. Cancerous condition. **Planets:** Moon.

Modalities

Better from rest, lying in the dark. Laterality left side. Aggravation from movement.

Symptoms

MIND

Hot-tempered, nervous disposition. Extremely irritable with general feeling of discomfort in the morning. Bad-tempered. Impossible for him to work, cannot concentrate. General feeling of uneasiness. Neurosis from anguish.

Personality disorders. Periods of dual personality. Narcissistic neurosis. Maniacal depressive psychosis. Mongolism. Physical and psychological slowness. Physical and mental backwardness. Lack of willpower. Mental slowness with after effects of poliomyelitis. General amnesia.

Abdomen

Pain in the epigastrium, Distention, not eased by food. Flatulence and rumbling. Disorders of the liver. Biliary sycosis. Disorders of the pancreas.

PAGE 579

Back

Pain in the left shoulder, in the acromion and the clavicular joints. Torticollis. Arthrosis of the neck and back. Intercostal neuralgia.

Blood

Peripheral circulatory complaints: hands cold during the day, hot in the evening. Leucopenia. Hemorrhage. Nightly acroparesthesia.

Eyes

Extreme ocular fatigue, difficulty in seeing things in the distance clearly. Persistent bilateral conjunctivitis. Bright spots before the eyes, which **disappear when closed**, appearing around 10.30 a.m. , and last for about an hour. Asthenopia. Myopia.

Conjunctivitis.

Female

Anal and vulvar pruritus.

Food

Increases the appetite. Hunger pangs between meals. Anorexia.

Head

Ophthalmic migraine. Neuritis and neuralgia of the brain. Headache and nausea after drinking a little wine. Pulsating headache over the whole head. Headache concomitant with need to go to stool, which does not provide relief.

Kidneys

Painful urination. Irregular diuresis, sometimes copious, with yellow urine, sometimes copious and pale. Urinates, especially about half an hour after meals. Oliguria.

Limbs

White spot on the left index finger. Arm very painful, aggravated by pressure. Nightly recurring cramps in the calves. Fractures repair slowly. Peri-arthritis of the scapula and humerus. Osteomyelitis. Arthrosis of hips and shoulders. Patches of sclerosis.

Male

Sexual mania. Diminution of libido. Hypertrophy of the prostate. Eczema of the scrotum.

Mouth

Gingivitis. Angina. Gums bleed when brushing the teeth. White coating over the whole tongue reaching even the edges. The white coating is not removed very easily by brushing. Burning sensation in mouth mucous membranes, with sensitive gums.

Nose

Frontal sinusitis.

Rectum

Tendency to constipation, with dry, dark stools. Anal eczema, with burning and oozing. Tendency to diarrhea after meals, with flatulence.

Skin

Reappearance of an eczematous dermatitis. Loss of hair accentuated. Inflammatory folliculitis of the thighs. Marginal and eczematous rash, with burning and oozing. Burns. Eczema. Psoriasis. Alopecia. Seborrhea.

Sleep

Insomnia. Twilight sleep. Sleep-walking. Erotic dreams at the end of the night. Sleep disturbed. In the evening, irresistible desire to sleep, once in bed, no longer wants to sleep. Dreams of dead bodies.

Stomach

Acid dyspepsia. Burning in the stomach and esophagus. Chilliness after meals, with a cold feeling between the shoulders. Feeling of heat on the face, all disappearing with movement.

Throat

Laryngitis. Splinter-like feeling in the throat in the morning on waking. Raw feeling in the throat. Feeling of a foreign body, especially on the left side, ameliorated by cold water and by swallowing.

Compare

Derris pinnata

Pharmacy

Der. Derris pinnata. N. O. Leguminosae. China. Tincture of plant. Historical dose: Tincture and all potencies.

History

Dr. X. Roussel is the authority for this plant and some of the symptoms are of a very peculiar nature. **Planets:** Mercury.

Homeopathic

"He walks as if stepping on down." "He is afraid of killing some one with a knife." Both kinds of tic douloureux are noted, painful and convulsive.

Sense of smell is exalted. "He perceives celestial odors," also "intolerable smells after frequent sneezing." Viscid urine and viscid saliva. Electric shocks and cramps.

PAGE 580

Clinical

Asthma. Blepharospasm. Diarrhea. Dysentery.

Eyes, inflammation.

Locomotor ataxia. Mania. Ozaena. Smell, affected. Tic douloureux.

Modalities

Heat helps toothache. Many symptoms including diarrhea, come on at night. Worse from touch.

Dichapetalum

Pharmacy

Dicha. Dichap. thunbergh. Dichapetalaceae or Chailletiaceae family. The flower inhabits tropical the regions. Historical dose: Tincture and all potencies, 3x to 30c.

History

Dicha. is a dicotyledonous family with super-ovarized dialypetals, growing as trees or shrubs with simple alternate leaves, flowers in clusters or corymbs. The fruit is a drupe with pendant seed, which has no albumen.

Dicha. was brought to Europe by Dr. Willmar-Schwabe of Germany. The symptomatology was established by G. Maring on a group of four women and three men, all doctors, using a double blind method. The following potencies were used 3x, 4x, 6x, 15x, 30x and placebo. **Planets:** Saturn.

Homeopathic

General fatigue of the body, despite a state of euphoria when working. A sudden lack of energy with fatigue and a feeling of hunger, ameliorated by food and spirits. Sullen mood. Inner trembling. Snuffles. Sensation of trembling inside the entire body.

Stiffness at the nape of the neck, back, loins and sacrum. Migraines. Cervical and brachial neuralgia. Occipital headaches. Vertigo, buzzing in the ears, visual and psychosomatic complaints. Radicular neuritis. Chronic infection of the mucous membranes. Lichen planus.

Clinical

Arthrosis. Cellulitis. Duodenal ulcer. Eczema. Hernia. Joint pain. Lichen planus. Migraines. Neuralgia. Rhinitis. Sinusitis. Tonsillitis.

Modalities

Better from fresh air. Better from resting. Better from menses. Better from eating. Aggravation from walking. Worse from standing. Worse on right side.

Symptoms

MIND

Sullen moods. Disinterested, must make an effort to work. Mental fatigue.

Abdomen

Rumbling and pinching feeling in the abdomen, ameliorated by eating and expelling wind. Passage through intestines accelerated with more frequent stools. Diaphragmatic hernia. Duodenal ulcer.

Back

Pain between the shoulders. Pain in the right shoulder, spreading towards the neck. Dorsal pain and stiffness like ankylosis. Severe pain and stiffness in the lumbar region, when seated or when walking. Pain in the lumbar region with drawing pains around the thighs. Drawing pains in the sacrum, ameliorated by urinating or expelling wind, worse when standing. Cellulitis of the nape of the neck.

Chest

A retro-sternal pain, worse when swallowing.

Female

Premature menses. Amelioration of rheumatic pains at the beginning of menses. Menses too frequent.

Food

Fatigue is ameliorated by food and spirits. Low blood sugar.

Head

Migraines. Pounding headache on all sides of the head, better by rest and fresh air.

Occipital headaches. Pain and stiffness at the nape of the neck. Diffuse dull head pain with numbness of the head.

Heart

Pain in the precordial region with palpitations, followed by ascending hot flushes.

Cardiac anguish with feeling of uneasiness and difficulty in falling asleep.

Limbs

Joint pain. Arthrosis. Fatigue and rheumatic pains in the limbs and legs feel like rubber.

Heaviness in the calves.

PAGE 581

Mouth

Dryness, formication and tension at the lips. Quick, short, drawing pains in the teeth of the lower jaw.

Nose

Itching of the nose and face. Feeling of having a cold with blocked nose.

Nose

Painful drawing sensation at the root of the nose, especially when the eyes converge to read. Sinusitis. Rhinitis.

Rectum

Bleeding hemorrhoids.

Skin

Lichen planus. Deep eczematic fissure on the palm of the hand, stretching along the 'lifeline,' with scaly eruption at the edges. Herpes-type eruptions, which itch, on the inner side of the left ankle with burning and scratching. Lichen-type eczema, in the cement workers and bakers.

Temperature

Shivering and sensation of cold, even when in a warm room. Rising heat, as if about to have a fever.

Throat

Tonsillitis. Painful pulling on the right tonsil. Feeling of a grating lump in the throat. Fit of laryngeal coughing. Aphonia, ameliorated after speaking for a long time. Swallowing painful on the right side of the throat. Dysphagia.

Compare

(1) Rhus-t. - Aching, stiffness, ameliorated by prolonged movement, vesicular eruptions, burning and itching.

(2) Tub. - Joint pains with stiffness, dragging, worse on waking and after meals.

(3) Zinc - Occipital pain with heavy feeling on the vertex or the root of the nose. Nose blocked, burning pains in the back, fidgety feet.

SOURCES

Julian.

Dictamnus albus

Pharmacy

Dict. Dictamnus albus. Fraxinella. Dictamnus fraxinella. N. O. Rutaceae. Tincture of whole plant. Historical dose: Tincture and all potencies.

History

Dictamnus acts on the female organs. Secretions are increased. Increased flow of urine. Frequent emission of copious offensive flatus. Sensation of a lump rising in the throat. Sensation of milk flowing into breasts. **Planets:** Venus, Moon.

Homeopathic

Profuse corrosive leucorrhea with tenesmus. Menses, early of black clots, preceded by blindness. Bearing down with bilious vomiting, worse standing.

Cramps from anterior thighs into the uterus before the menses. Sleepwalking. Dreams of piecing bodies of her children together.

Clinical

Constipation. Flatulence. Leucorrhea. Metrorrhagia.

Modalities

Worse from standing.

SOURCES

Clarke.

Digitalinum

Pharmacy

Digin. Digitalinum. An active principle (glucoside) of Digitalis purpurea. Trituration. Historical dose: Trituration and all potencies.

Herbal

According to Hale Digitalinum is indicated in cases of "overburdened heart where it is constantly laboring." Digin. is a poison of very great activity. It produces a profound effect on muscular tissue, both voluntary and involuntary, more especially on the heart. Irregular and intermittent action.

Digin. has cured the following case: Mrs. x had for over a year swelling of right hand and fingers, which she thought to be rheumatic. Digitalis has the symptoms, "swelling of right hand and fingers," and this would have been given but only Digitalin. was at hand.

This was given in 4x potency. After the second dose the swelling began to subside and in two or three days was completely gone. **Planets:** Sun, Mars.

Homeopathic

Digitalinum causes profound prostration, even to inability to move a muscle. Paralytic weakness, numbness, tremulousness of the limbs. Cold, clammy surface. Goose-flesh.

The heart is slowed or else its action is made rapid and feeble. Sensation as if the

Heart stood still. Digitalis has: Sensation as if the heart would stand still if he moved.

Asthma. Diarrhea. Emissions. Exophthalmus. Fainting. **Heart** disorders.

Palpitations. Spermatorrhea. Vertigo. Vision, hallucinations.

Modalities

Confusion of the head is better walking in open air. Symptoms are better after dinner. The heart pains are worse lying on left side. Many symptoms appear on waking in the morning. Chilliness and fever worse in afternoon and evening. Drinking causes nausea and vomiting. Pains in trunk worse during rest.

Comments

A sinking, faint sensation is felt at the epigastrium, nausea and vomiting of egg yolk matter, shivering, diarrhea, the stools not being noted characteristically white as are those of the plant. Sensitiveness of eyes to light and nose to odors. Disorders of vision and hearing are very numerous.

One prover noted "frontal headache, dazzlings, loss of appetite, sinking at epigastrium with intestinal flatulence, borborygmi, eructation. Slight abdominal pains, urine abundant, great fatigue, painful heat in evening but no thirst."

For a whole day pressure in supra orbital region towards frontal sinus and when walking a feeling as if the ground gave way under his feet.

Sexual weakness is shown in: "Deep sleep in which an emission occurs without waking him." "Sexual power diminished or quite abolished temporarily."

Compare

(1) Dam., Dig., Con., Grat., Tab., Gels., Sec.

SOURCES

Clarke.

Digitalis purpurea

(foxglove)

Pharmacy

Dig. Digitalis purpurea. Foxglove. N. O. Scrofulariaceae. Tincture from the leaves of the second year of the plant. Historical dose: Tincture and all potencies, third to thirtieth potency.

Herbal

The tincture made from the fresh plant in doses of 5 to 15 drops, was given when the cardiac stimulation is desired.

There are three main symptoms in the Digitalis pathogenesis which should be borne in mind: (1) Slow, weak, irregular and intermittent pulse. **heart yang deficient**

(2) Enlarged, sore, painful liver. **Qi and blood stagnation or damp heat accumulation**

(3) White, pasty stools. **dampness and due to no liver bile secretion or blood white stools**

Along with these is prostration from slight exertion. **heart yang deficient** The mental condition is: anxious, low-spirited, tearful, wants to be alone, **(lung heart deficiency)** tries to escape if others force themselves on her. Anxiety as if conscience is troubled.

Teste classes Dig. with Bryonia and Ignatia. The stomach symptoms are from portal engorgement. Dig. has nausea and vomiting, the mere sight or smell of food excites violent nausea with clean tongue. **(stomach qi irritated due to sight of food leads to nausea and vomiting but irritation is not due to stagnant or undigested food so clean tongue but due to heat**

Thirst for water(stomach heat), absence of fever,(protective qi less so not opposing pathogen so no fever and also heart qi less)the complaints may come either from excessive venery(kidney yang deficiency) or from high living. In elderly men there are: enlarged prostate(damp heat), impotence(downward flow of damp heat or impairment of spleen and heart or decline of vital gate yang or impairment of kidney or trapping of liver qi), lascivious thoughts.(kidney and liver yang hyperactive
Homeopathic

Digitalis is a **Heart** remedy. It also affects liver, lungs, stomach and genito-urinary organs. Digitalis should be considered in all diseases where the heart is chiefly involved with abnormally slow, irregular or intermittent pulse, along with indefinite and causeless symptoms.

The pulse is weak, irregular intermittent, abnormally slow and dropsy of external and internal parts.(fluid accumulation due to lung affected by insufficient/irregular blood supplied by heart for nourishment in the lung vessels so water coursing function gets disturbed) Weakness and dilation of the myocardium. Slow pulse in recumbent posture, (when lying heart qi and blood deficient and when sitting spleen-heart communication problems) irregular pulse but irregular and dicrotic on sitting up. Slow pulse after sexual abuse (heart depression due to abuse so slow pulse or at puberty.(heart qi less when kidney yang active)

Heart blockage with a very slow pulse.(heart blockage by damp heat)

Digitalis' greatest indication is in failure of compensation and especially when auricular fibrillation has set in. Auricular flutter and fibrillation especially when subsequent to rheumatic fever.(wind heat and blood deficiency so auricular flutter due to wind and due to heat fibrillation.this wind heat shifted from rheumatic fever to ears)

Symptoms of organic heart disease, such as great weakness and sinking of strength, (general poor nourishment of organs due to less blood) faintness,(due to damp heat or no sufficient qi in heart) coldness of skin and irregular respiration,(less blood supply so cold skin but no dryness –it may be due to general qi deficiency also so cold skin) cardiac irritability.(heart yin deficiency so heart yang may be active) Faint, as if dying. Bluish appearance of face.(blood deficiency on face)Cardiac muscular failure when systole is present.(when sending blood to vessels by contracting the contraction strength is not adequate and not retained sufficient due to heart yin deficiency which gives power to heart) Stimulates the heart's muscles increases force of systole increases length.

Eye troubles after tobacco(tobacco affects liver yang), jaundice from induration and hypertrophy of the Liver(damp heat accumulation in liver). Jaundice with heart disease. (heart and liver interaction pattern)

Prostration from slight exertion. Great weakness, can hardly talk, (lung qi is very weak) sinking of strength. Must walk about with precordial anxiety with urging to urinate. As of an electric shock going through the body. (spirit qi trying to maintain the overall qi strength in the body)

Great sensitiveness to cold air, cold weather, changes of weather, cold food, cold drinks, all of which aggravate. (cold aggravates due to qi and blood deficiency, change of weather affects there is not sufficient protective qi to handle the situation) Collapse. (collapse of qi) Dropsy with suppression of urine. (lung function of water coursing disturbed so due to lung qi deficiency urine is not thrown out and water accumulates in organs) Cyanosis. (blood not reaching)

Clinical

Amaurosis. Angina pectoris. Ascites. Asthma. Bright's disease. Cyanosis. Delirium

tremens. Dropsy. Fevers. Gonorrhoea. Headache. **Heart** disorders. Hydrocele. Hydrocephalus. Impotence. Jaundice. Lungs, congestion. Melancholy. Memory lost. Meningitis. Noises in head. Phimosis. Prostate, enlarged. Prostration. Ptyalism. Spermatorrhoea. Toothache. Urinary disorders. Vision, disorders.

Causations

Ill effects of high living, sexual abuse or excessive alcohol intake.

Constitutions

Nervous lymphatic constitutions (heart dominated phlegmatic type or damp heat type). Children with very pale complexions, (low blood circulation so yellow face) light hair, (not sufficient lung qi so minimal hairs) scrofulous. (phlegm heat that is phlegm accumulation) **Planets:** Sun, Jupiter, Venus.

Modalities

Better when stomach is empty. (due to not having sufficient stomach qi to digest) Better in open air from rest, (air is form of qi which supports, rest reduce qi use) cool air. Better lying flat on back, (back is yang so yang doesn't dissipate) sitting erect. (spleen function improves) Worse from exertion, lying on left side, (heart is in left and damp heat pattern so pressure in left) smell of food (stomach qi deficiency). Worse from cold, drinks, food, weather, heat. Worse sexual abuse or excess. (heart spirit depressed and kidney qi or yin deficiency) Worse when sitting erect after meals and music. Worse at night (yin deficiency) or on waking in the morning. (not sufficient yang) Worse from spirituous liquors. (heart gets disturbed which dissipate heart yang and also excite liver yang which further reduces liver yin) Motion aggravates most symptoms. (qi deficiency) Worse from

being raised up in bed. Worse from touch or pressure.(damp heat so pressure aggravates and also touch due to heat) Worse from music, sadness from music.(music depresses heart further so heart qi sinks as not sufficient qi to respond music positively)

Symptoms

MIND

Great anxiety(lung heart and kidney) like from troubled conscience. Anxious about the future.(kidney and heart) Despondency,(lung and heart) fearful. Sadness with sleeplessness from unhappy love from music.(lung and heart) Lascivious thoughts in old men with enlarged prostate.(kidney yin deficiency with kidney yang active and damp heat) Fearful.(kidney yin deficiency)

Feels as if he would fly to pieces. Fear of suffocation at night.(night lung yin less so fear kidney will not receive lung qi properly and so suffocation as lung qi will not be sufficient to exhale.) Wants to be alone. Dullness of senses.(due to qi deficiency or dampness) Every emotional shock strikes in epigastrium.(emotional shock makes qi stagnated affecting liver qi coursing function and epigastric area is near liver) Melancholia,(lung) dull lethargic (spleen deficiency and dampness)with slow Pulse.

Abdomen

Ascites. Pain in left side apparently in descending colon and under false ribs.(qi stagnation in large intestine in left side) Severe abdominal pains.(damp heat in abdomen) Tenderness of epigastrium(qi stagnation). Pulsation in the abdominal aorta and epigastric constriction.(small intestine may be epigastric area so qi stagnation here and in aorta heart tries to push more pressure to clear the way so pulsation) After a meal, pressure and inflation of the abdomen and of the stomach.

Back

Stiffness and tension of the muscles of the neck and of the nape of the neck.(small intestine channel goes through neck so damp heat in the channel so stiffness and tensionDrawing(pulling out) pains in the back and in the loins, as after a chill. Bruise-like pains in the loins on blowing the nose.

Breasts

Shuddering(shake,shiver,tremor) at the breasts.(liver qi deficiency and blood supply in breast so tremor in the breast)

Chest

Creeping all over skin, Angina Pectoris. **Heart-Yang on Verge of Collapse Deficiency of Heart and Kidney Yin** . Sensation of soreness.(**yin deficiency**) Pressure on the chest from keeping the body bent. Tension in the chest with necessity to breathe deeply.(**damp heat in chest area so tension and since kidney yin less so lung qi is not being received by kidney yin so has to inhale deeply**) Contractive pain in the chest,(**heart yang less so cold contraction**) when sitting with the body bent. Smarting in the chest. Sensation of weakness in the chest, proceeding from the stomach.(**stomach yin and qi vacuity so weakness felt upto chest**) Congestion in the chest.(**damp heat accumulation and blood congestion in chest**)

Ears

Hissing before the ears like boiling water with hardness of hearing.(**wind-hissing damp-blockage so hardness of hearing heat-biling water**) Veins distended on ears.(**damp heat**) Single stitches behind the ears. Otalgia with contractive pains in the ears. Swelling of the parotids and behind the ear.(**damp heat**)

Eyes

Yellowish, red. Dim vision irregular pupils.(**liver blood or yin less so liver yang overactive so dim vision due to liver fire or wind**) Diplopia. Both the eyes turned to left. Detachment of retina.**liver wind** Pupils irregular. Dark bodies like flies, before eyes(**liver wind**). Change in acuteness of perception of shades of green. Objects appear green and yellow.(**liver wind,yellow and green pertains to liver**) Mydriasis,(**liver fire**) lid margins red, **swollen, agglutinated** in morning.(**wind damp heat in morning**) Lachrymation worse in bright light or cold air. Eyelids blue.(**liver blood deficiency at eyelids**) **Veins distended on eyes**.(**damp heat or blood congestion**)

Face

Cyanosis.(**blood congestion and stasis with blood deficiency**) Blue color of the lips and eyelids **blood congestion and stasis with blood deficiency**). Veins distended on.(**blood congestion**) Dryness of the lips.(**heat in abdomen or stomach**) Paleness of the face.(**blood deficiency**) Cramp-like and drawing pains in the cheek-bones.

Eruptions(**heat**) with gnawing itching(**wind**) in the cheeks and in the chin. Pores of the face black and suppurating(**blood congestion and damp heat**). Bluish swelling of the lips. Eruptions on the lips.(**heat in stomach**)

PAGE 584

Female

Menopausal period, sudden flushes of heat followed by great debility,(**liver and kidney yin vacuity so liver yang hyperactive so flushes of heat but since it is vacuity heat it further dries yin so debility**) least motion causes palpitations.(**qi very less or blood**)

congestion so small motion has impact on heart) Labor-like pains in abdomen and back before menses.(before menses pain –blood stasis) Uterine hemorrhage.(**due to qi vacuity or blood stasis or kidney vacuity or damp heat**) Vicarious menses from the lungs. (Nymphomania.(liver and kidney yang hyperactive) Menorrhagia. Qi & yin dual vacuity pattern, Liver-kidney yin vacuity

Food

Much thirst, but little appetite.(**stomch qi less so no desire for food but stomach yin/blood less so no moistening so thirst**) Thirst for acid drinks.(**acid and bitter can excite stomach qi**) Drinks much and eats little. Desire for bitter things. Bitter taste of bread. Want of appetite, sometimes even with a clean tongue(**clean tongue means clear stomach**). Continuous thirst with dry lips(**stomach yin deficiency**).

Head

Frontal headache into nose after drinking cold drinks or eating ice creams.(**front headache due to stomch cold fixed in nose**) Heaviness of head with sensation as if it would fall backward.(**wind dampness in head** Face bluish(**blood congestion**). Confusion, (**wind damp heat**) fullness and noise in head.(**wind damp**) Cracking sounds during a nap. Bores head in the pillow, pulls the hair.(**wind**) Crashes in head, on dropping to sleep. Spastic hemicrania. Head falls back while sitting or walking.

Heart

Attacks of angina worse raising arms. The least movement causes violent palpitations. Sudden sensation as if Heart stood still. Sensation as if heart would cease beating, if he moves, must hold the breath and keep still. (Opposite of Gels.) (**there is very less qi to function for heart and if he moved it will stop he feels**) Palpitations with depression from grief. Frequent stitches in heart. Irregular Heart especially with mitral valve disease. Cardiac failure following fevers.(**after fever qi collapse due to fighting with pathogens so cardiac fails**) Heart tired after sprains(sprains uses qi). **Dilated heart.(damp heat)** **Hypertrophy with dilatation.(damp wind heat)** **Cardiac dropsy.(dampness heat in cardiac region)** Pericarditis,(inflammation of pericardium—damp heat) **copious serous exudation.(damp heat)**

Kidneys

Continued urging (bladder qi irritation so continued urge) in drops, dark, hot, burning with sharp cutting or throbbing pain at neck of bladder,(**damp wind heat in bladder**) as if a straw was being thrust Back and forth, worse at night.(**kidney yin deficient**) Suppressed. Ammoniacal and turbid.(**damp heat**) Full feeling after urination. (**damp or phlegm heat**) Urethritis(urethra inflammation-damp heat in liver channel), phimosis and strangury.

Constriction and burning, as if urethra was too small.(constriction due to kidney yin and yang deficiency so coldness and due to yin deficiency no proper nutrition) Brick-dust sediment. Urine, suppressed, difficult.(due to brick dust or contracted urethra or contracted kidney) Uremia, contracted kidneys.(kidney yin and yang deficiency)

Limbs

Coldness of hands and feet.(spleen qi deficiency and also low blood circulation) Nails blue.(blood stagnation) One hand hot the other cold. Muscular debility(spleen qi deficient). Numbness, heaviness or paralytic weakness worse left arm(dampness and spleen qi vacuity in muscles and low blood circulation). Fingers become numb easily and frequently(dampness and low blood circulation). Fingers swell at night.(dampness and spleen yin deficiency so affected in night) Swelling of the feet(dampness due to spleen qi deficient). Rheumatic pain in joints. Shining, white swelling of joints.(wind damp heat in joints) Sensation as if a red hot wire suddenly darted through legs, (Dudgeon).

Liver

Jaundice from induration and hypertrophy of the Liver. Jaundice with heart disease. Liver, enlarged, sore, hard painful.(wind heat so enlarged liver and wind heat and liver yin deficiency so hypertrophy of liver,phlegm heat may also be there due to hardness)

Lungs

Breathing irregular, difficult, deep sighing. Dyspnea, constant desire to breathe deeply.(kidney yin deficiency so lung qi not received properly)Breathing slow, worse talking, (lung qi deficiency) walking, drinking cold things(walking and cold consume qi). Lungs feel compressed.(lung yin and qi deficient so coldness so feel compressed) Great weakness in the chest lung qi deficiency. Cannot bear to talk. (Stan.) Chronic bronchitis, passive congestion of the lungs, giving bloody sputum due to failing myocardium. Cough causes pain in shoulders and arms or sore, raw feeling in the chest.(blood congestion so raw feeling and so cough give jerk to blood stagnated so its pressure reaches to shoulder etc so pain) Expectoration, sweetish like boiled starch, mixed with bloody mucus. (sweetish –spleen/stomach so spleen/stomach and lung involved)Hemoptysis with weak heart or from chronic bronchitis, before menses. Senile pneumonia.(cold pathogen attacks due to lung qi/yin deficient) Cannot expectorate without vomiting. (lung and stomach/liver involved) Suffocates when he drops to sleep, hence fear of suffocation at night. Cough from suppressed menses.(supressed menses increase liver yang or heat which attacks lungs so cough)

Male

Dropsical swelling of genitals. (Sulph.) Testicles swollen. Hydrocele (left), scrotum looks like a bladder filled with water. Bruise-like pain in testes with swelling. Gonorrhoea, balanitis with edema of prepuce.(damp heat accumulation) Profuse thick yellow white gonorrhoeal discharge.(profuse and thick and yellow-due to heat so damp heat) Desire

strongly excited, frequent erections and pollutions.(kidney and liver yang hyperactive)
Atonic nightly emissions after sex. Early morning erections. Amorous desire without ability.(kidney essence deficiency with kidney yang excess) As if something were running out in urethra after emission. Prostate enlarged, senile.(kidney deficiency and damp heat)

Mouth

Bitterness in the mouth.(heat pattern) Clammy taste.(damp pattern) Blue tongue and lips.(blood stagnation) Copious salivation. (From kidney deficiency,from spleen and stomach deficient cold)Tongue blue, clean with nausea and vomiting. Tongue thick flabby.(damp heat) Bitter taste. Sweetish taste with salivation after smoking tobacco. Veins distended on tongue.(blood congestion)

Nose

Coryza with hoarseness. Pain at the root of the nose after vomiting. Pain above the root of the nose.(stomach deficient cold so coryza and also pain at and above nose root,after vomiting stomach qi further reduces)

Perspiration

Perspiration generally at night, cold and clammy.(yin deficiency so night perspiration ,cold and clammy due qi deficient) Perspiration after the chill, no heat intervening (yin and qi deficient as qi doesn't fight with external pathogen)

Pulse

Pulse weak and quickened by least movement.(from movement heart wakes up to handle so pulse quickens) Pulse small, weak and excessively slow. Especially slow when at rest, every other beat intermits, but accelerated by the slightest movement. Pulse irregular intermitting. Pulse, slow, weak, irregular intermittent.

Rectum

White, chalk-like, ashy, pasty Stool. .dampness and due to no liver bile secretion or blood white stools Diarrhea during jaundice.(liver heat so diarrhea and jaundice)

Sensations

As if the heart would stand still if he moved, must hold the breath and keep still (Gels. has "must keep moving or the heart would stop.") As if the brain were loose, as if something fell forward in the head on stooping, as if the brain were made of fine glass and shattered at a blow.(qi hold the things so brain seems to be shattered and loose due to kidney essence that is brain marrow and ,heart qi and blood reaching is deficient As if something were running out of urethra, as of a weight attached to stomach(stomach qi

deficiency so stomach have bearing down and weight sensation), as if the internal parts were grown together. As if the lungs were constricted and tied up in bundles. As if heart stood still,(yang fuccion collapsed) as if heart had torn itself loose and were swaying to and fro by a thin thread.(heart spirit flowing due to deficient heart yin to bind) As if the stomach would sink into abdomen.(stomach qi and yin deficient so feels heavy and sinking)

Skin

Dry,(blood deficiency) arid heat of skin. Itching and jaundiced,(liver heat jaundice and liver wind itching). Blue distended veins on lids, ears, lips and tongue.(blood congestion) Erythema, deep red, worse on back like measles. Dropsical. Cold. Measly eruptions on back.(damp heat in yang area that is back) Gnawing itching, which changes, if the skin be not scratched into a burning and pricking(itching due to liver wind but if not scratched liver wind tend to liver fire then to liver heat so burning and [pricking due to less blood supply or congestion]. Desquamation of the skin. Bluish skin (cyanosis), particularly at the eyelids, lips tongue and nails.(blood congestion) Dropsy. Paleness of the skin.(less blood supply)

Sleep

Starts from Sleep in alarm that he is falling from a height in a dream.(qi sinking effect) Continuous sleepiness during the day (lethargy)(blood and spleen qi deficiency). Uneasy, unrefreshing sleep. Drowsiness in the day and somnolency interrupted by fits of convulsive vomiting. At night, half-asleep with agitation. Uneasy sleep at night on account of constant desire to urinate.(bladder qi irritation which has effect on heart so uneasy sleep as bladder is also a vital gate)

Stomach

Faintness and vomiting from motion. Faintness, great weakness in Stomach(stomach qi deficiency). Persistent nausea and vomiting with clean tongue, (Ipec.)(since stomach qi is not sufficient so it doesn't go down but up so continuous nausea.clean tongue so no indigested content in stomach but stomach qi is stagnated too so slight motion there is vomiting Deathly nausea, not better by vomiting. The mere sight or smell of food excites nausea. stomach qi deficiency). Nausea before and after urination. Gulping up of an acrid or tasteless fluid. Epigastric region tender. Neuralgic pain in Stomach(that is related to heart as heart control nerves). Stomach burning extending to esophagus. After cold water or ice-cream, sharp pain in forehead, extending to nose. Discomfort, after a small quantity of food.

Temperature

Sudden flushes of heat, followed by great nervous weakness, at menopausal period. Chilliness and shivering of the whole body. Cold clammy sweat. Chilliness with heat and redness of face.(chill due to qi and yin deficiency and heat due to liver yang Coldness in

the hands and in the feet (with cold perspiration). Heat of one hand and coldness of the other. Frequent and sudden flushes of heat, followed by weakness.

Vertigo

Vertigo, when walking or riding with trembling, (qi/blood deficiency) worse rising up from cardiac or hepatic disorders.

Comments

Asthmatic sufferings as from hydrothorax. Respiration is painfully restricted at night, when lying down or in the day, when walking or seated. In the morning, suffocating constriction of the chest, forcing the patient to rise up in the bed.

"Anxious and concentrated sadness with sleeplessness at night, owing to pains at the heart: for instance from unhappy love, especially in women of brown complexions, firm and obstinate dispositions. In such cases far preferable to Ignatia" (Teste).

PAGE 586

Malcolm Macfarlan reports Dig. having produced severe urethritis, phimosis and strangury. He has cured with it many cases of gonorrhoea.

Ballard cured a man of headache and dizziness originating probably in gonorrhoea suppressed several years before. He complained of feeling bad about the head after drinking and this keynote symptom was elicited: "after drinking cold water the pain would seat itself in the forehead and extend down the nose."

Delirium tremens in high livers, stomach and liver diseases with the mental state of the drug. Nausea worse from smell of food, not better by vomiting. The food eaten comes up by mouthfuls, cannot expectorate without vomiting.

Every shock like bad news strikes her in the epigastrium. Deathly sinking in the epigastrium. The use of Digitalis as a remedy for pneumonia in the old school is well known. It has proved a very dangerous remedy, but it has been used by homeopaths with very good effect in senile pneumonia.

Ross regards the indications as being: "Dry cough with mucous rales and no expectoration or only 'prune juice' expectoration, cyanosis, cold limbs, feeble intermittent pulse, deathly nausea or gone sensation at epigastrium."

Restlessness with a great nervous weakness. Lassitude, mental and bodily. Faintness. Convulsions with retraction of head, syncope and collapse. Terrible pain at root of nose after vomiting. Discharged blood coagulates slowly or not at all. Distended veins in eyes, ears, lips and tongue. Blue skin.

Compare

(1) Crat. - a true heart tonic.

(2) Adon., Kalm., Spig., Liatris, Serum ang.

(3) Nerium odorum - resembles in heart effects Digitalis, but also has an action like Stry. on spinal cord. Spasms appear more in upper part of body. Palpitations, weak heart will be strengthened by it. Lock-jaw.

(4) Digitoxinum. Nit-s-dulc. increases action of Dig.

(5) Convallaria - heart disease with vertigo and digestive disturbances.

Relations

Antidotes: Camph., China. Compatible: Bell., Bry., Cham., Lyc., Nux-v. Incompatible: China.

SOURCES

Boericke. Clarke. Phatak.

Digitoxinum

Pharmacy

Digox. Digitoxinum. Digitoxin. "Crystallized Digitaline" of Nativelle. Neither a glucoside, nor an alkaloid. Trituration. Historical dose: All potencies.

History

Digitoxinum is made from Digitalis dissolved in chloroform. The most active principle of Digitalis. **Planets:** Sun.

Homeopathic

Digox. has yellow vision very marked and distressing nausea, aggravated by champagne and aerated waters. Faintness, rapid loss of power. Prostration, limbs refuse their service, cannot rise from bed without assistance. Phlegmonous inflammation going on to suppuration.

Clinical

Phlegmon. Suppuration. Vision disordered. Vomiting.

Chest

Oppression and anxiety in chest, heart-beats and intermissions plainly felt.

Eyes

Weak sight. Features of friends seemed to swim and become indistinct. *All objects in room run together without any outlines*, could only distinguish some very dark or bright or large or small images in the field of vision. All objects, especially all bright ones, seemed in a slightly yellow light.

Face

Paleness and collapsed appearance of face.

Food

Aversion to every kind of food.

Limbs

Prostration, limbs refuse their service, cannot rise from bed without assistance. Phlegmonous inflammation going on to suppuration.

Pulse

Slow intermittent pulse. Pulse at first normal and regular, became later markedly slow intermittent, dicrotic and then tricrotic. Pulse very easily excited by the slightest excitement or physical exertion.

PAGE 587

Sleep

Not a moment's rest on account of distressing nausea and weakness. Restless sleep with partial sleep, which was interrupted by confused, anxious dreams and frightful fantasies.

Stomach

Faint feelings, nausea and discomfort. Carbonated waters and ordinary drinking water aggravated the nausea. Vomiting was violent, bilious-colored masses of mucus, accompanied, preceded and followed by retchings.

Vertigo

Faintness, rapid loss of power. Slight vertigo with nausea and faintness.

Comments

Digitox. has been proved by Kopfe, who took a single dose of 2 mg. at 10 a. m. It began to take effect in an hour, faintness, nausea and slight vertigo, which increased until he was obliged to hurry home at 1 o'clock to avoid vomiting in the street. But he was too weak to walk and had to take a carriage. He went to bed immediately and remained in bed three days and part of the fourth. The pulse had remained regular and at the usual rate, 80 to 84, but at 2 o'clock was 58 and intermitting.

Excessive nausea was constant and prevented sleep at night. Vomiting of dark greenish masses of mucus gave instant relief, which, however, only lasted a short time.

Then, the pulse went down to 42 intermitting after every two beats, the heart-beats and intermission being plainly felt in the chest. The limbs refused service in spite of the greatest exertion of will power.

Sight became weak, faces of friends were indistinguishable and he only knew them by their voices. Objects ran together without outlines, so that he could only distinguish some very dark or bright or large or small images in the field of vision. Therewith all objects, especially all bright ones, seemed in a slightly yellow light.

This yellow vision was very persistent, lasting eight days, it may prove a keynote for this preparation of Digitalis. The nausea continued and was aggravated by drinking champagne, aerated waters and ordinary water.

The second night was very restless with partial sleep interrupted four times in an hour by confused, anxious dreams and frightful fantasies. In the evening of third day he was able with effort to eat a little and did not vomit.

On the fourth day he was up a little and felt Better was able to eat a little meat and drink as much water as he wished. On the fifth day he was able to walk out a little, leaning on the arm of another.

During the three succeeding days the symptoms gradually disappeared. With sound sleep and extraordinary appetite, physical strength and normal vision returned. In some experiments made on dogs it was noted that subcutaneous injections were invariably followed with phlegmonous inflammation proceeding to suppuration.

Compare

(1) Dig. - worse from drinking is marked in both.

(2) Digitalinum, Cina and Santonine in yellow vision.

SOURCES

Clarke.

Dioscorea villosa

(wild yam)

Pharmacy

Dios. *Dioscorea villosa*. Wild Yam. N. O. Dioscoreaceae. Parts: Tincture of fresh root or trituration of resinoid, Dioscorein. Historical dose: Tincture and all potencies, tincture to third potency.

Herbal

Burt, who made a heroic proving of this remedy, says: "The grand sphere for the use of *Dioscorea* is among colic of the intestines and stomach, where the celiac and umbilical plexuses are in a state of great hyperesthesia, the pain and spasm being unbearable."

Dios. resembles *Coloc.* in colicky pains, but differs in the Conditions: while *Coloc.* has better bending double and worse by motion, Dios. has better by stretching out and by moving about. Pains are remittent and paroxysmal. It is one of the first remedies in whitlow and in gallbladder and kidney colic.

PAGE 588

Homeopathic

Dios. acts on the nerves, abdominal, sciatic and on spinal cord. Painful disorders of abdominal or pelvic viscera. Colic pain, better from bending Backwards. Persons of feeble digestive powers, tea-drinkers with much flatulence.

Dioscorea is a remedy for many kinds of pains and colics. Pains are unbearable, sharp, cutting, twisting, griping, grinding, that dart about or radiate to distant parts. Gallstone colic. Pains occur in paroxysms, suddenly cease in one part, then start in another part. Nervous shuddering from pain. Chorea with seminal emissions.

Dioscorea causes pain in the bowels, spasmodic, twisting, writhing, drawing, lancinating, pulsating, burning. Pains radiate upwards and downwards. Frequent sharp, darting pains from one part to another. Pains spread, especially from abdomen to distant parts.

Flatulence after meals in stomach or bowels, who from some excess in eating or from fasting or from some error in diet, as eating old cheese or uncooked fruit, pastry, etc., especially if they are great tea drinkers, may be suddenly seized with violent colic.

Clinical

Abdomen, pains. Acne. Angina pectoris. Bilioussness. Chorea. Colds. Colic pains. Constipation. Coughs. Cramps. Diarrhea. Dysentery. Dysmenorrhea. Dyspepsia. Dyspnea. Enteralgia. Felons. Flatulence, gas. Gallbladder disorders. Gallstone colic. Headaches. Hemorrhoids. Knee, pain. Legs, pain. Liver disorders. Lumbago. Mental disorders. Neuralgias. Paronychia. Parotiditis. Pregnancy, heartburn. Kidney stone colic. Rheumatism. Sciatica. Spinal irritation. Spleen, pains. Smell, disordered. Spermatorrhea. Stomach pain. Tea, effects. Toothache. Whitlow.

Causations

Ill effects of excessive tea drinking. Fasting. Masturbation.

Constitutions

Suited to persons of feeble digestive powers, old or young. **Planets:** Mars, Saturn.

Modalities

Better from stretching out or bending Back. Better standing erect, motion, better in open air. Better from hard pressure. Worse from tea, eating, evening and night. Worse from lying down and doubling up.

Symptoms

MIND

Feels cross, nervous and easily troubled.(**heart ,liver**) Feels depressed after seminal emissions.(**kidney and heart**) Calls things by wrong names.(**error in kidney heart communication and kidney data retrieval**)

Abdomen

Side, pains.(**liver involved**) Pains suddenly shift to different parts(**qi type of pain**), appear in remote localities, as fingers and toes(**pain due to stagnation**). Flatulence.(**liver wind**) Rumbling with emission of much flatus.(**liver wind**) Griping, cutting in hypogastric region with intermittent cutting in stomach and small intestines.(**liver wind affecting stomach and small intestine**) Colic,**heart channel accumulation & heat or heart/spleen**

accumulation & heat better walking about,(due to accumulation or excess condition) pains radiate from abdomen to back, chest, arms,(liver and stomach wind) worse bending forwards(bending forward gives pressure inside since it is excess condition so aggravation) and while lying(excess condition).

Back

Lameness in back,(worse stooping(bending forward worse as mentioned above). Dull pain in back of neck, stiff.(kidney yang deficiency and wind so vacuity cold damp –due to kidney qi less so dull pain) Back lame in morning.(kidney yang less so morning yang time vacuity damp cold so lameness) Severe backache.(wind damp cold) Itching over right scapula.(heart wind) Spinal hyperesthesia. Spinal cord feels bruised all the way up and down. Sharp pains in the back.

Chest

Chest pains radiate to both the arms. (qi and blood stagnation Pain along sternum and extending into arms. (qi and blood stagnation Angina pectoris(qi and blood stagnation so laboured breath and angina) with labored breathing and feeble action of the heart.

Ears

Pain worse blowing nose or coughing.(qi and blood stagnation in lung to ear channel) Nausea felt in ears. Small balls of wax fall out. Dull, pressing pains in front of both ears. (qi stagnation) Sharp pain in front and behind the ears.(blood stagnation)Itching in internal ears,(wind cold) worse right.(right is yang so it is yang deficiency that is vacuity cold)

Eyes

As of a round ball(damp cold or damp heat) or stick(wind) in the eyes. Hot air steaming out of them(heat wind). **Eyes** weak, sore and smarting.(wind heat) Agglutination of the lids mornings.(damp heat) Sharp pain from right eye to occiput.(Lachrymation(liver channel wind heat), hot tears, smarting, liver channel wind heat wants to keep lids closed.

Face

Full, grinding, drawing, digging or sharp darting pains at angle or left lower jaw.(tendons of jaw ruled by liver so liver wind heat) Spasmodic closing of jaws,(liver wind heat) biting tongue when neither eating nor drinking. Little pimples with black heads.(lung wind heat) Lips dry,(stomach heat) commissures sore.

PAGE 589

Female

Violent dysmenorrhea,(damp heat in lower jiao) pains radiate from the uterus.(wind heat) Dysmenorrhea, spasmodic uterine colic,(colic-- wind heat,spasm-wind and damp blockage so wind damp heat) pains suddenly fly to distant parts.(wind heat) After-pains.(qi and blood deficiency) False pains. Cramps in fingers and toes alternating with uterine pains.(wind heat in spleen/stomach alternating with kidney wind heat pattern,cramp—wind heat or wind fire)

Head

Dull pain in both the temples or as if squeezed in a vice better pressure(liver deficient yang that is deficient cold in liver channel,liver headache—temple and since yang deficient so better pressure) but worse afterwards. Head feels as if tied with a band.(damp heat) Sensation as if head were crushed down.(wind heat) Confused, Phlegm confounding the portals of the heart & heat harassing the heart spirit full head.(damp heat) Buzzing in head.(wind) Fullness in head speedily followed by spasmodic pains in abdomen.(wind damp heat that is wind heat pain in abdomen send dampness to head due to stomach/spleen qi going upward) Digging, cutting pain in the temples in occiput, over eyes(wind heat).

Heart

Angina pectoris, pain back of sternum into arms, labored breathing, Feeble action of Heart. Especially with flatulence and pain through chest and tightness across.(phlegm and qi stagnation so phlegm-tightness,and feeble action,qi stagnation so flatulence in abdomen or toxic heat invading lung and spleen) Sharp pain in region of heart,(toxic heat) arrests breathing,(toxic heat in lung) worse lying left side.(toxic heat in spleen so excess condition so worse pressure or lying left side)

Kidneys

Kidney colic, pain extending to testicles and the limbs.(wind heat in kidney) Writhing with crampy pains with passing of kidney stone.(wind damp heat) Spasmodic stricture of urethra(wind cold) with pain about navel better by pressure(pain about navel is small intestine so relief by pressure means heart qi is deficient), pressure on rectum, paroxysmal colic.(wind heat or wind cold)

Limbs

Aching and stiffness in joints.(internal wind in joints) Pain in left shoulder.(wind damp heat due to spleen going in heart region) Limbs feel weak especially knees after seminal emission.(spleen qi and kidney yin deficiency) Grinding in elbows.(yin deficiency in elbow so grinding) Felons in beginning, when pricking is first felt. Cramps in flexors of fingers and toes(spleen wind heat) . Numbness of left hand.(spleen dampness via heart) Paranitium, early stage, pain, pricking, sharp, agonizing. Paronychia. Sciatic pain (right)shoot down the thighs with burning or numbness worse motion,(wind heat or wind

damp and heat pattern are generally worse with movement) sitting up, (spleen affected so dampness increases) better standing on toes, lying still. Hamstring seems too short. (Cimex)

Liver

Sharp pains from Liver, (wind heat) shooting upward to right nipple. (wind heat)
Gallbladder colic, (wind heat) pain extending to the chest, back and arms. (wind heat)

Lungs

Tight feeling all along sternum. (toxic heat in lung) Chest does not seem to expand on breathing. (toxic heat in chest) Short-winded. Dyspnea from slight exertion. lung qi deficient

Hacking cough from irritation and tickling low down in the throat. (lung wind) Sharp cutting pain from left axilla to nipple and down side deep in lung. (lung wind heat) Cough pain in region of umbilicus and temples (lung qi cough jerk goes to small intestine that hear and temples that liver channel area), brown tongue, weak knees. (Dull, aching (lung qi deficient so vacuity cold pain) or sharp cutting pains in both lungs from front to back or vice versa. (lung wind heat)

Male

Relaxation and coldness of organs. (kidney yang deficiency) Seminal emission without erection (kidney yang deficiency), then weakness especially in the knees. (kidney yin and yang deficiency) Strong smelling sweat on scrotum and pubes. (liver wind heat) Erections lasting all night. (liver fire) Pains shoot into testicles from region of kidneys. (wind heat in kidneys) Diminished sexual desire. (kidney yang deficiency) Emission of semen during sleep. (kidney yang deficiency)

Mouth

Mouth dry and bitter in morning. (wind heat in stomach) Spasmodic closure of the jaw. Mouth dry, but full of sticky mucus, no thirst. (wind damp heat in stomach) Soreness of gums and roof of mouth. (yin deficient stomach so vacuity heat) (Saliva runs out while asleep. (yin deficient stomach so saliva runs out and during sleep wind heat increases in stomach)

Nose

Any bad smell remains in the nose for a long time. (dampness in lung which stores)

Pelvis

Drawing pains in sacrum: in sacroiliac joint. (kidney yin/yang deficiency)

Rectum

Frequent urgent desire for stool.(lung wind heat so urgent and frequent desire)
Hemorrhoids with darting pains to liver.(lung qi and large intestine deficiency or damp heat in large intestine but darting pains to liver so wind also involved so damp wind heat)
Hemorrhoids look like bunches of grapes or red cherries, protrude after stool with pain in anus. Hurried desire for stool. Diarrhea,(wind damp heat) worse in morning,(liver yang that is liver wind disturbed more in yang time) yellowish, followed by exhaustion,(liver yin become deficient due to liver fire excess) as if flatus and feces were hot.(liver fire).
Stools do not relieve the pain in abdomen. Darting from anus to liver.(kidney liver channel wind heat) Very offensive flatulence.(liver fire) Itching in the rectum.(wind)
Loose stools with much straining.(loose stools-spleen deficiency and much strain-lung qi deficiency) Stools slimy, dark-colored, bilious, very offensive, light mushy.(damp heat)
During pregnancy, alternate constipation and relaxation.

Sensations

As if top of head was lifted off. As if temples were in a vice. As if head tied with a band (also neck). As if sticks, etc. in eyes, as if hot air streamed out of them. As if tongue burnt.(stomach heat)As if a stone were in stomach.(phlegm heat in stomach)

In a small spot in abdomen sensation as if drawn forcibly upward and backward to spine.

PAGE 590

Skin

Little pimples with black heads. Panaritium, early when pains are sharp and agonizing or when pricking is felt, **nails brittle**.

Sleep

Vivid dreams.(liver or heart heat) Many symptoms are worse after sleep,(sleep increases heat) bitter mouth, pains in bowels, hard beating of heart. Restless after 2 a. m., must move, yet it hurts, he is so sore. First sleep late, wakes early.

Stomach

Belching of large quantities of offensive gas, sour, bitter with hicCoughs.(liver wind and qi stagnation) Nausea.(stomach heat) Neuralgia of stomach.(nerve qi irritation pain of stomch that is heart connected) Faint, uneasy feeling at stomach.(stomch heat so faint feeling,qi irritation so uneasy feeling and nausea) Sinking at the pit of the stomach, (stomach qi sinking) heartburn.(heart heat) Sharp cramping pain in the pit of the stomach, stomach wind due to stomach qi irritation so cramps then belching, hiccough and passing flatus,(stomach wind) better standing erect. Gastrodynia. Burning in the stomach.(stomach heat).

Temperature

Sweats easily when chilly.(lung qi deficiency so qi does not control perspiration which is cold clammy or strong odor in genitals due to heat in the region) Sweat, cold, clammy or of strong odor, on genitals.

Throat

Irritation, burning and smarting in throat and fauces.(wind heat) Fauces rough, dry, frequent inclination to swallow,(throat qi stagnation -inclination to swallow and yin deficiency so rough,dry sore) but it causes nausea and shudderings.(nausea—qi stagnation,shuddering—wind cold where cold is qi deficiency cold that is vacuity cold) Belching gas, but throat so dry it prevents escape of gas. wind vacuity heat due to yin deficient Constricted feeling as from something tight about neck,(wind damp cold) makes breathing difficult. Itching in left tonsil. Stitches in tonsil up to ear.(wind and vacuity yin heat) Constricted feeling. Soreness and sharp aching pain in both parotid glands.(wind heat)

Tongue

Heavy brown coating on the tongue mornings.(stomach damp heat) Side of tongue sore as if burnt(liver fire). Tip of tongue sore.(heart heat) Tongue coated, no thirst.(damp heat in stomach) Bites the tongue, when not eating or drinking.

Vertigo

Vertigo and dizziness, goes to right while walking inclined to fall backward. Faintness worse sitting up in bed, numbness worse lying down. Vertigo from onanism.(vertigo from kidney yin deficiency) Vertigo with heat in head with sharp pains in forehead extending to ears.(forehead pains—stomach heat so vertigo due to stomach heat)

Comments

Hale considered as a characteristic: "A constant pain, aggravated at regular intervals by paroxysms of intense suffering." Any kind of colic or neuralgia with these characteristics may indicate Dios., which stands in the highest rank among stomach and abdominal remedies with important actions in many other spheres.

Great faintness at stomach. Morning diarrhea. Pains worse at meals, better moving about, cannot sit still. Seminal emissions (passive) with weakness of knees. According to Cushing's proving the primary effect of Dios. was to cause strong-smelling perspiration of the genitals, constant excitement with strong and frequent erections day and night, amorous dreams with emissions.

Afterwards came relaxed genitals, absence of desire and emissions without erections. In the female sphere it has frequently cured dysmenorrhea, uterine colic and after-pains, also gastric disorders during pregnancy and the menses.

J. B. Bell has pointed out how closely the throat symptoms of Dios. resemble the initial stage of a cold when it has attacked the fauces and before it has spread to the nose or chest.

PAGE 591

Diosma linearis

(buku)

Pharmacy

Diosm. Diosma linearis. Buku from Cape of Good Hope. Historical dose: Tincture and all potencies, tincture to third potency.

History

Clinically, this remedy should be useful in cerebral disorders with dullness or stupefaction. **Planets:** Moon, Saturn.

Homeopathic

Diosma linearis has been used in convulsive or epileptiform attacks and hysteria. Hepatitis, cirrhosis or liver atrophy. Also used in hematuria with ovarian or uterine lesions. In splenitis, where it could surpass Ceanothus.

Mental disorders in nervous or ascetic individuals, particularly where there is constant fear of death or erotic or maniacal attacks. Stomach pain. Gastro-enteritis. Sudden fright with trembling and weakness of the legs. (La Rota.)

Comments

Pathogenically it produces: Somnolence, nervous insomnia, night sweats. Erratic pains with bad humor, desire to weep or fear of sickness. Violent vertigo. Headache, chiefly frontal, radiating to the occiput.

Eyes brilliant with lachrymation or itching,

the conditions accompanied by a species of stupefaction with hardness of hearing or noises from aural pressure. Earthy face with disseminated rosaceous eruption. Nausea, fetid breath with sensation of emptiness.

Sensation of meteorism with stinging pains in the spleen. Painful sensation in the abdomen with pubic pressure the pressure of clothing becomes insupportable with emission of high-colored, bloody urine.

Frequent yellow diarrhea, worse at night. Menses abundant, anticipating, sometimes metrorrhagic in type, crampy pains on ingesting food. Sensation of heat or of cold in the hands with convulsive movements of the fingers. Weakness of the legs, aggravated by sitting down.

SOURCES

Boericke.

Diphtheria, pertussis, tetanus

(d.p. t. vaccine)

Pharmacy

Dpt. Diphtheria, pertussis, tetanus. D.P. T. Vaccine. Historical dose: All potencies, thirtieth, 200c or higher potency.

History

In addition to the DPT this vaccine contains formaldehyde, a mercury derivative and aluminum phosphate and all this incubated in animal entrails. DPT shots have been

linked to sudden infant death syndrome, brain damage, autism, blindness, epilepsy and death. Also, learning disabilities and hyperactivity in children. Therefore modern medicine sacrifices children for profit and to support their medieval beliefs in the vaccination theory.

Homeopathic

The DPT vaccine attacks and damages the immune and nervous systems. The victims become susceptible to colds, flus, earaches, sore throats, etc. Fevers, febrile convulsions, seizures, and diarrheas. Terrible screams, rigid body with head bent back, eyes open. High pitched inconsolable crying. Anorexia and weight loss. Respiratory distress, asthma, coughs, etc. Brain damage, comas, seizures and blindness.

Dyslexia, visual perception problems, auditory processing deficit, fine motor delay, and an attention span deficit. Learning disabilities. Cerebral palsy. Viral meningitis. Hemolytic anemia, yellow skin, colorless lips.

Insomnia and emaciation. Brief periods of sleep interrupted by long bouts of screaming. Persistent inconsolable crying continues for hours or days. High pitched piercing screaming. Cri encephalique is a thin high pitched eerie wailing sound. Strange high pitched cry. Profound prostration.

Clinical

Asthma. Attention deficit. Autism. Brain damage. Cerebral palsy. Colds. Colic. Coma. Convulsions. Coughs. Cri encephalique. Diabetes. Dyslexia. Emaciation. Epilepsy. Hemolytic anemia. Hives. Hyperactivity. Hypoglycemia. Infantile spasms. Influenza. Insomnia.

PAGE 592

Clinical

Learning disabilities. Meningitis, viral. Otitis media. Respiratory distress. Speech disorders. Thrombocytopenia. Tumors.

Causations

Vaccinations. Reactions to the D.P. T. Vaccine.

Constitutions

Delicate and sensitive children with a weak, damaged or undeveloped immune systems.

Planets: Mars, Moon, Mercury.

Modalities

Worse at night, during sleep. Worse after vaccinations.

Symptoms

MIND

Brain damaged children. Learning disabilities. Hyperactivity. Autism. Dyslexia, visual perception problems, auditory processing deficit. Passive, in a daze as if sleepwalking. Hallucinations. Screaming as if afraid of being dropped. Doesn't want to be held, rocked or fed. Screaming temper tantrums. Coma. Periods of unconsciousness.

Timid, nervous trembling fearful child. Runs around the house and hid as if was frightened to death. Sudden fear while playing with desire to be held.

A great feeling of anxiety and doom. Restless, hyperactive. Hyperactive to the point of being out of control. Explosive, out of control emotions. Unable to sit still for more than a few minutes, cries easily without warning. Cri encephalique.

Back

Would arch his back when crying, especially if being held.

Blood

Hypoglycemia. Hemolytic anemia. Thrombocytopenia.

Ears

Chronic ear infections. Auditory processing deficit. Deafness.

Eyes

Eye twitching. Visual perception problems. Hallucinations. Blindness.

Food

Anorexia and chronic weight loss. Pushes the food away. Hypoglycemia. Allergies to milk.

Head

Head bent back with a rigid body. Viral meningitis.

Limbs

Loss of muscle control. Flaccid paralysis. Hemiplegia. Hemiparesis. Paresis. Spasms of lower limbs.

Lungs

Respiratory distress. Dyspnea. Spasmodic coughs day and night. Prolonged coughing attacks. Croupy hard cough with vomiting, must sit up. The coughs are like a whooping cough. Pneumonia. Bronchial asthma.

Mouth

Speech disorders.

Nose

Nasal congestion. Allergies, worse spring and fall. Constant runny nose, clear discharge. Nosebleed.

Rectum

Chronic diarrhea is yellow, curdy, strange smelling, offensive, greenish and curdsh. Dark green, almost black diarrhea. Stool with clumps of mucus. Violent explosive gas every few minutes. Yellow stool.

Skin

Local reaction to injection, pain, redness. Hives. Red, purple, hot, swollen, walnut-size lump. Induration. Abscess. Swelling of face hands and feet.

Sleep

Waking at night with high pitched screaming. Excessive sleepiness. Deep stuporous sleep. unable to be awakened. Brief periods of sleep interrupted by long bouts of screaming.

Stomach

Projectile vomiting. Anorexia and chronic weight loss.

Temperature

Fever occurring rapidly. Fever with hallucinations. Fever with convulsions.

Throat

Sore throat.

Comments

Harris Coulter records some reactions to the D.P. T. vaccines in his book D.P. T. a shot in the dark: Child collapses with white or ashen skin, and death-like unconsciousness. She'd turn blue and didn't appear to be breathing. She'd start breathing on being shaken with white skin and blue or purple blue around the mouth going to death. Nonresponsive, limp, flaccid, with screaming eyes rolled back in his head.

Sitting, staring ahead with eyes dilated and mouth open, her lips were blue and her body stiff. The right side of her body would tremble and she'd occasionally make sucking sounds. Brief "generalized bending" or "jack knife" spasms with sudden forward dropping of the head with adduction and flexion of the arms.

PAGE 593

"After a short period of staring, dropping head to chest and falling asleep with eyes open, progressed to starring and sudden violent jerking of upper body forward". "Her hands would go straight up in the air, her feet would go straight out, she would clench her fists and hold her breath for 2 to 3 seconds, and then cry a high shrill cry." "Tremor of intensity" in the hands and feet.

"Opens eyes and mouth and utters a brief shout shortly after falling asleep" With or without fever. "Generally tonic-clonic, resistant to routine anticonvulsant therapy, and with poor intellectual prognosis". Difficult or impossible to control with medication. Chronic seizures. Grand mal, petit mal and localized.

Diphtherinum

(diphtheria nosode)

Pharmacy

Diph. Diphtheria Nosode. Diphtherinum. Trituration of diphtheric membrane. Dilutions of diphtheria toxin. Historical dose: All potencies, thirtieth, 200c or higher potency.

History

The potencies of this nosode are prepared either from the Diphtheria bacteria or membranes. These potencies have been very effective, not only in malignant diphtheria but in many cases of post diphtheria paralysis and kindred nervous disorders following the use of anti-toxin. Diphtherinum was made from the membrane from a case of malignant diphtheria, triturated with milk sugar to the 6c, then potentized by Swan.

Clarke writes the following: In diphtheria the malignancy is present from the start. The well-known features of the disease of which this nosode is a product must be the guide to its use. In all probability it will be found useful in the paralysis of diphtheria and other like kinds of spinal affection.

O. A. Julian has described his own researches and his clinical experiences as a practicing doctor in the village between 1935 - 1939, where he had to treat cases of diphtheria.

Homeopathic

Diphtherinum is useful as a prophylactic in Diphtheria and post-diphtheria complication like paralysis or when anti-diphtheria vaccination is used. Adapted to patients prone to catarrhal disorders of respiratory organs, scrofulous individuals.

Diphtheria, laryngeal diphtheria, post-diphtheria paralysis. Malignancy. Glands swollen tongue red, swollen, breath and discharge very offensive. Diphtheria membrane thick, dark. Nosebleed, profound prostration. Swallows without pain, but fluids are vomited or returned by the nose.

Patients with weak or exhausted vitality hence are extremely susceptible to the virus, when the attack from the onset tends to malignancy (Lac-c., Merc-cy.). Painless diphtheria, symptoms almost or entirely objective patient too weak, apathetic or too prostrated to complain, sopor or stupor, but easily aroused when spoken to (Bapt., Sulph.).

Relapsing diphtheria. Severe sore Throats, and inflamed tonsils. Internal trembling. Emaciation and chilliness. Tendency to colds and bronchitis, palpitations. Jerking in single muscles. Drawing in muscles then sudden snap. Catarrhal disorders of the respiratory passage. Offensive discharges. Carphology.

Clinical

Anorexia. Croup. Diphtheria. Diphtheria paralysis. Myelitis. Polyneuritis. Sore throat. Tachycardia. Tonsillitis.

PAGE 594

Constitutions

Especially adapted to the strumous diathesis, scrofulous, psoric or tubercular persons, prone to catarrhal disorders of throat and respiratory mucous membranes. **Planets:**

Mercury.

Modalities

Better from cold, drinking milk in sips. Better by heat, in bed. Worse from lying down. Worse by movement.

Symptoms

MIND

Patient is greatly prostrated, yet restless without any pain. Wants to be held. Sees imaginary objects. Carphology.

Abdomen

Pain in the epigastric region.

Eyes

Troubles of accommodation. Short sight. Sees visions.

Face

Flushed, center of cheeks purple. Pale.

Food

Anorexia.

Head

Moisture at the margin of hair.

Heart

Paleness with palpitations. Tachycardia. Hypotension, *adynamia*.

Limbs

Polyneuritis. Paresis of the lower limbs. Sensitive motor nerves of the lower limbs.

Lungs

Harsh cough, voice, lost. Dyspnea. Humid cough with bad smelling, fetid expectorations are persistent. Difficulty to expectorate, worse at night, especially in children and old persons.

Mouth

Tongue moist with red tip or dark red spot. Red papillae. Tongue, red and swollen.

Nose

Mucous coryza. Fanning of the alae nasi with snoring. Yellow thick nasal discharge. Nosebleed. Bad smelling, nasal crusts with fetid secretion. Nosebleed. Reflux of liquids by the nose or while vomiting.

Rectum

Constipation.

Skin

Dry, hot palms, they feel withered. Dry skin.

Sleep

Talks in sleep with open eyes.

Stomach

Faintness at, better sips of milk.

Temperature

Chilly, then hot. low temperature. Chilliness with palpitations, hypotension. Subfebrile state.

Throat

Throat is red, swollen. Big tonsils with false membranes. Obstinate tonsillitis. Dark. Thick gray membrane, on tonsil (left). Painless diphtheria.

Swallows without pain but fluids are vomited or returned through the nose. Relapsing diphtheria. Wants cold air down the throat or craves cold drinks.

Comments

Diphtherinum has made many brilliant cures of diphtheria and post-diphtheria disorders to its credit. Yet the empirical use of Von Behring's Antitoxin is a great advance on the former empirical methods of the profession and has proved a blessing to humanity.

The indications here given are chiefly clinical and are tentatively held until verified or disproved by provings.

Fluctuating temperature, very little pain, membrane in vertical folds on posterior wall of throat, when the membrane first appeared, spreading forward as far as border of the tonsils and also began to fade and disappear first from center of posterior pharynx.

Dark red swelling of tonsil and palatine arches, parotid and cervical glands greatly swollen, breath and discharges from throat, nose and mouth very offensive tongue swollen very red little coating.

Diphtheria membrane, thick, dark gray or brownish black, temperature low or subnormal, pulse weak and rapid, limbs cold and marked debility, patient lies in a semi-stupid conditions, eyes dull, besotted (Apis, Bapt.).

Nosebleeds or profound prostration from very onset of attack (Ail., Apis. Carb-ac.), collapse almost at very beginning (Crot., Merc-cy.), pulse weak, rapid and vital reaction very low.

Swallows without pain, but fluids are vomited or returned by the nose, breath horribly offensive. In post-diphtheria paralysis and spinal disorders following diphtheria many brilliant cures have been effected by the potencies.

Compare

(1) Diphtherotoxin - chronic bronchitis with rales. Cartier suggests it in the vago-paralytic forms of Bronchitis of the aged or in toxic bronchitis after grip.

(2) D.P. T. Vaccine.

PAGE 595

Dirca palustris

(leatherwood)

Pharmacy

Dirc. Dirca palustris. Leatherwood, Moosewood. Wicopy. N. O. Thymelaceae. Tincture of inner bark of branches. Historical dose: Tincture and all potencies.

History

Dirca belongs to the same family as Daphne Indica and Mezereum and is the only American member of the family. Dirca palustris has symptoms showing its relationship to the other two, but it has not been used extensively in practice. **Planets:** Moon.

Homeopathic

Dirca is a gastro-intestinal irritant inducing salivation, vomiting and purgation. Also, cerebral hyperemia, neuralgic pains with depression, palpitations and dyspnea.

Clinical

Colic. Constipation. Cough. Debility. Diarrhea. Dyspepsia. **Eyes** disorders. Flatulence.

Headache. **Heart** disorders. Neuralgia. Rheumatism.

Modalities

Colic is better by bending forward, headache better by pressure. Pains in the bowels are better by stool. Motion aggravates most symptoms, walking aggravates vertigo and pain in bowels.

Symptoms

MIND

Time seemed to pass slowly. Absent-minded.

Abdomen

Burning below umbilicus. Lancinations in the left hypochondrium with tympanites. Rumbling in bowels. Colic better bending forward and better by stool, but smarting in anus remains. Burning and uncomfortable sensation in bowels. Dull ache low down in pelvis, bearing down, not better by sitting or lying.

Back

Heavy pain across back and through loins in region of kidneys.

Bladder

Pain and soreness in region of bladder.

Eyes

Eyes sore and painful to touch. Sensation as if brows corrugated and as if brain were also drawn down. Lids heavy. Much photophobia and on waking and continuing all day, especially from gaslight.

Face

Face red, full and bloated in morning.

Female

Uterus seems too low and as if it would prolapse during stool. Menses two days too early, less copious and prolonged than usual.

Food

No thirst.

Head

Pains all through the head, extending down into spine. Headache in temples extending inwards, better by hard pressure. Headache, throbbing and beating, worse by coughing or moving. Scalp feels dry and tight.

Heart

Excitability of heart's action from least motion. Palpitations on going up slight elevation. Pulse suddenly becomes weak and irregular.

Limbs

Dull, neuralgic pain in both shoulders, cannot keep them still. Muscles of thighs sore and stiff. Neuralgic pains in legs.

Lungs

Cough worse morning. Raising sweetish-tasting mucus quite offensive. Great dyspnea from exertion from walking up a slight elevation. Sharp pain in right thorax running down into abdomen and up into left shoulder.

Mouth

Tongue coated smoothly and evenly white. Smooth, dirty, white coat. Sour taste.

Rectum

Throbbing, stitching pains in anus. Soreness and smarting, worse after stool. Tenesmus and straining. Diarrhea stools, sudden, gushing, watery, thin, yellowish fecal. Constipation, urgent desire, but passes only frothy mucus. Dry, sticky feces.

Sleep

Sleepy but unable to sleep. Dreams of dead bodies.

Stomach

Empty belchings. Uneasy feeling as if a lump or weight in stomach.

Throat

Stinging pains in larynx from without inwards, very sharp pricking pain and sensation of suffocation. Throat red, raw, acrid feeling, hurts to swallow food or liquids.

Vertigo

Vertigo on walking, seems as if he would fall to left.

PAGE 596

Comments

Dirca palustris produces much vital depression, neuralgic pains in the head, trunk and limbs, many of the pains proceeding from without inward. Digestion is disordered, there is weight at the stomach and a peculiar white tongue, the coating being moist.

Rumbling of flatulence, colic better by bending forward, diarrhea and tenesmus, later constipation. Oppression and pains in the chest, sweetish expectoration and excitability of the heart's action from the slightest motion. Hot and restless at night, cannot sleep, dreams of dead bodies.

Compare

(cowhage)

Pharmacy

Dol. *Dolichos pruriens*. Cowhage. *Mucuna pruriens*. Cow-itch. N. O. Leguminosae. Trituration or tincture of whole Podo. Historical dose: Tincture and all potencies, sixth potency, tincture, drop doses in hemorrhoids.

History

Kraft has recorded a striking cure with *Dolichos* 1, 200 c of a woman who had symptoms of jaundice, white stools and desperate itching, preventing sleep at night. There was in addition, enormous distention of abdomen with continuous rattling of gas, intolerance of anything tight round neck or body intense restlessness, unable to sit still a minute.

Homeopathic

The most characteristic symptoms of *Dolichos* are a general intense itching without eruption, worse by scratching. Itching of the skin without the appearance of a rash or swelling. A pain in the throat on right side below angle of jaw as if a splinter were embedded vertically in it.

A right-sided medicine with pronounced liver and skin symptoms. *Dolichos* corresponds to exalted nervous sensibility, as in dentition. Gums intensely sensitive, seem to itch. Senile pruritus. Hemorrhoidal diathesis.

Yellow spots all over. Itching excessively at night, jaundice. Neuralgia following herpes zoster. Cold water better itching but it burns the skin and causes trembling.

Clinical

Cough. Dentition. Gums, pain. Herpes zoster. Jaundice. Jaw, pain. Neuralgia. Pruritus. Sore throat.

Constitutions

Psoric and allergic constitutions. **Planets:** Jupiter.

Modalities

Worse at night, scratching, right side. Cold water burns on the itching skin. Colic from getting feet wet. Warmth aggravates itching at night.

Symptoms

Abdomen

Bloated, swollen abdomen with constipation. Colic from getting feet wet. Bloated Abdomen. Pains in spleen with gravel. Colic from getting feet wet. Pain in abdomen in right lumbar region. Bruised pain below umbilicus. Bruised pain left inguinal region.

Back

Pain over right carotid artery, as if a splinter was sticking there. Pain in muscles on right side of neck. Pain under left scapula continuing until herpes zoster broke out.

Chest

Pains through the apices of both lungs. Eruption appeared on left axilla, spreading in rings forward to sternum and back to spine with much burning and smarting. Herpes Zoster.

Ears

Pain in right ear. Sudden dart of pain in right ear, later in left.

Eyes

Eyes yellow. Pain in right eye. *Eruption on margin* of eyelids.

Face

Face yellow. Circumscribed redness of one cheek. Swelling of face, most of lips. Prickling itching of face. Pain in right maxilla.

Kidneys

Bedwetting with gravel. Small stones pass away. Ischuria with or without gravel.

PAGE 597

Limbs

Pain on the top of right shoulder. Aching pain in right arm and shoulder. Aching soreness in last phalanx of right middle finger. Pain at root of nail of right index finger. Dry, tettery eruptions on arms and legs, resembling herpes zoster.

Liver

Swelling of liver, pain goes through from left lobe. Liver problems with itching.

Lungs

Coughs on lying down at night with wheezing and dyspnea.

Male

Impotence.

Mouth

Strong taste of blood in mouth with cough. Pain in gums prevents sleep. Soreness and tenderness of gums, even in teething children. Dull aching in a carious tooth, right side. Gums irritated, wants them continually rubbed, dentition.

Pregnancy

Intolerable itching all over body in pregnant women, worse at night, preventing sleep, worse from scratching, no perceptible eruption on the skin.

Rectum

White stools. Hemorrhoids with burning sensation. Constipation during teething or pregnancy. Constipation with intense itching. White stools. Tenesmus with looseness of bowels. Pain in anus with stool. Worms. Thread worms and complaints therefrom. Constipation with liver complaint and itching.

Skin

Violent itching all over body without any visible eruption. Intense itching with no swelling or rash, worse across shoulders, also about elbows and knees and hairy parts. Yellow in spots, itching excessively at night. Herpes zoster. Skin burns at night in bed. Jaundice, skin yellow in spots or all over. Itching excessively at night.

Sleep

At night in bed burning in skin is intolerable. Night without sleep.

Stomach

Noisy movement of flatus in stomach. Flatulent eructation. Vomits bile.

Throat

Sudden sensation of a choking lump in throat. Pain in Throat, worse swallowing, below right angle of jaw, as if splinter were imbedded vertically. Slight fullness just behind posterior palatine arch. Roughness of throat.

Pain in right throat, a subdued, contraction sensation, went to left side.

Compare

- (1) Rhus-t. cured herpes zoster after failure of Rhus-t.
- (2) Fago., Bell. - dentition.
- (3) Arg-n., Hep., Nit-ac. - throat.
- (4) Cann-i. - time passes slowly. Ant-c. - tongue.
- (5) Lyc. - constipation and flatulence.
- (6) Bry., Puls., Abies-n. - weight at stomach.
- (7) Stann. - sweet expectoration.

Relations

Aconite antidotes it. and in "cases of dentition with fever Aconite should be given before Dolichos to prevent convulsions" (Hering). Dolichos follows Rhus-t. in herpes.

SOURCES

Boericke. Clarke. Phatak.

Doryphora decemlineata

(colorado potato-bug)

Pharmacy

Dor. Doryphora decemlineata. Colorado Potato-bug. Colorado Beetle. N. O. Coleoptera. Tincture prepared by covering the crushed live beetles with alcohol. Historical dose: Tincture and all potencies, sixth to thirtieth potency.

History

Doryphora in its general effects bears a strong resemblance to Cantharis. An extensive proving has been made and to this have been added the effects of poisoning from handling the insects and from inhaling the vapor when they have been burned or scalded.

Local application causes ulceration. The blood will not coagulate, blood globules disorganized, enormous swelling of whole body, swelling of feet with burning, elastic swelling of whole body which will not pit on pressure (suggesting its applicability in myxedema).

Of children who inhaled vapor from a kettle in which some beetles had been placed, one died and the other recovered after a serious illness resembling typhoid fever. **Planets:** Venus.

Homeopathic

The center of Doryphora's action seems to be in the urinary organs and hence its employment in gonorrhoea and gleet. Burning Sensations.

PAGE 598

Urethritis in children from local irritation and gleet. Great trembling in limbs. Prostration. Swelling of body.

Like Canth., Dory. produces burning in mouth, throat, gullet, stomach, abdomen, rectum and urinary passages, strangury with urethritis and itching. Burning and inflammation of glans penis.

Dory. has been successfully used in urethritis in young children, provoked by local irritation. Fainting, weakness, prostration, collapse with great trembling of limbs. A feeling of weight or heaviness is common. Prostration after typhoid and diphtheria has been cured. The weakness is worse by talking.

Clinical

Backache. Delirium. Diarrhoea. Diphtheria. Dysentery. Erysipelas, Fevers. Gastric disorders. Gleet. Gonorrhoea. Kidneys, disorders. Myxedema. Parotiditis. Spleen, pain. Typhoid. Ulcerations. Urethritis.

Modalities

Better in open air. Worse by motion, worse from smoking. Worse in warm room, pressure aggravates, (pain in kidneys).

Symptoms

MIND

Stupor with muttering and loud rumbling in bowels. Delirium, talkative, red, bloated face, protruding eyes. Irritability.

Abdomen

Pain in spleen. Rumbling in bowels (with stupor). Pain in bowels, worse by eating and drinking and by deep inspiration. Abdomen feels heavy, sore and tender, burning.

Back

Pain in lumbar region.

Chest

Soreness and oppression of chest with sore throat.

Eyes

Eyes red, *sore*, protruding, pupils much dilated, *sight much impaired*.

Face

Face bloated and red, giving appearance of a confirmed drunkard.

Food

Craving for something sour, symptoms worse by smoking. Loss of appetite, great thirst.

Kidneys

Difficult urination. Urethritis. Urethra inflamed with excruciating pain when urinating. Pain in back and loins.

Retention of urine. Dysuria with burning, stinging pain. Gonorrhoea.

Limbs

Severe trembling in limbs. Great trembling in right arm and leg.

Male

Itching and burning of glans penis, which is swollen and bluish red, urethra inflamed with severe pain, especially when urinating.

Mouth

Dark brown coating on tongue. Offensive taste. Violent heat in mouth, severe pain across kidneys, face red and bloated, constipation and retention of urine. Parotiditis.

Rectum

Morning diarrhea with pain in abdomen and burning in rectum. Bloody, slimy stools. Heaviness intense pain in rectum.

Skin

An abraded surface on the wrist of one engaged in picking the bugs became painful, a deep sloughing ulcer developed and the bones were laid bare.

Sleep

Tossing about all night. Sleepless until 12 am. Then restless sleep with terrifying dreams. While sleeping, wild dreams, screams as if in great distress.

Stomach

Nausea and vomiting, vomits dark, grumous acrid matter of dirty brown fluid with diarrhea.

Temperature

Skin alternately cold, clammy and hot with fever. Coldness of hands and feet. High fever during night, restless and sleepless. Violent fever 8 a. m. to 2 p.m.

Throat

Dry feeling in throat with desire to swallow. Throat raw and constricted. Burning in throat and down esophagus with stomachache and cough.

Relations

The local effect is Antidoted by: Earth, other antidotes are: Vinegar and other vegetable acids, Stram.

Compare

(1) Agar., Ail., Apis, Canth., Crot-h., Lach.

(2) The Solanaceae. generally, as the beetle partakes of the properties of the plants it infests.

(3) In non-coagulation of the blood, Hirudo.

SOURCES

Boericke. Clarke.

PAGE 599

Drosera rotundifolia

(sundew)

Pharmacy

Dros. *Drosera rotundifolia*. Round-leaved Sundew. N. O. Droseraceae. Tincture of active fresh plant. Historical dose: Tincture and all potencies, first to twelfth potency.

History

Teste, who places *Drosera* in his. *Zincum* group of medicines, mentions that it grows in damp prairies, along the border of marshes and is avoided by animals. Barrich states that when eaten by sheep it gives them a cough which is fatal to them.

Drosera was pointed out by Hahnemann as the principal remedy for whooping cough. It was recommended by German physicians of the eighteenth century as a panacea for hoarseness, chest disorders and even for tuberculosis.

Serrand of Paris maintains that *Drosera* has an important place in the prophylaxis of tubercle. He refers to the fact that sheep eating *Drosera* leaves acquire a nocturnal cough and die and that the pleura of cats to which *Drosera* had been administered were found studded with tubercles.

Dr. Serrand commends *Dros.* in cases of declared tuberculosis as well. He gives it in the low potencies.

Buchmann of Alvensleben agrees with Hahnemann that *Dros.* in high potency should not be often repeated. Buchmann had a bronchial catarrh which used to attack him every spring and fall, characterized by a violent tickling cough, which almost drove him to distraction at night

Buchmann cured himself with *Dros. Ix.* and tincture. A single dose as soon as the tickling in the larynx commenced sufficed to allay it at once and allowed him to rest and it was only repeated when the tickling returned.

Homeopathic

Drosera markedly affects the respiratory organs. The chief feature of the *Drosera* effects is a spasmodic cough resembling whooping cough.

In whooping cough, *Drosera* is one of the leading remedies, also in the spasmodic cough of tuberculosis. Spasmodic, catarrhal and hemorrhagic effects.

The characteristic cough is frequent spells of barking cough, worse evening and after midnight, patient holds his side. Vomits if he cannot get up phlegm, every effort to raise a little phlegm ends in retching and vomiting, there may be bloody stools.

Drosera raises the resistance against tuberculosis, it is a useful remedy for tuberculosis of the Lungs, larynx and bones of joints. Laryngeal tuberculosis is benefited by it.

Tuberculosis with vomiting of food from coughing with gastric irritation and profuse expectoration. Tubercular glands.

Constrictive pains in the throat, larynx, stomach etc. Pains about hip-joint. Sticking sharp pains. Convulsions, followed by hemoptysis and sleep. Hemorrhages of bright red blood from nose, mouth, stools etc.

Clinical

Amblyopia. Anxiety. Asthma. Bronchitis. Catarrhs. Colic. Coughs, Coxalgias. Delusions. Epilepsy. Fears. Hemorrhage. Headache. Laryngitis. Measles. Nausea. Sciatica. Tuberculosis. Vomiting. Whooping cough.

Constitutions

Tubercular constitution. **Planets:** Mercury, Moon.

Modalities

Better from pressure, open air. Worse towards evening and after midnight. Worse on lying down, warmth, on getting warm in bed. Worse talking, cold food, laughing. Worse after measles, singing, stooping. Worse vomiting, sour things, drinking, laughing. Worse by warmth, by warm drinks. Worse from acids.

Symptoms

MIND

Easily angered, a trifle makes him beside himself. **(liver problem)** Fears being alone **(liver problem and not kidney)** and is suspicious of his friends. Restlessness, which does not allow prolonged attention to the same object. **(Heart And Kidney Deficiency Kidney Deficiency with Hyperactive Liver Yang Heart And Spleen Qi Deficiency)**

Anxiety **(heart, liver kidney involved)** respecting the future. Anxiety, evenings in solitude with fear of ghosts. **(kidney)** Discouragement. **(gallbladder deficiency)**

The least thing puts the sufferer beside himself. Great mistrust. Delusions of persecution. Imagines he was being deceived by spiteful envious people. Inclination to drown oneself. **(kidney lung communication problem so suicidal tendency)** Pertinacity in executing resolutions.

PAGE 600

Abdomen

Colic after taking acids, sour foods. **(wind heat)** Pains in the hypochondria, **(liver wind heat) on coughing (lung qi jerk has impact on liver wind)** and on being touched, **(liver wind or qi irritation increases on touching)** (must press on them with the hand when he coughs. **(to avoid more irritation to liver yang/qi)**)

Back

Stiffness at the nape of the neck with pains during movement. **(wind heat in kidney area ans since it is excess pattern so movement affects)** Bruise-like pains in the back, **(wind heat in yang time as back is yang dominated and also morning)** particularly early in the morning.

Chest

Pains in the chest on coughing and on sneezing, he has to press his chest with the hand, **(qi stagnation in chest area and als i qi deficiency in chest area so pressure gives elief)** (Bry.) Constriction of chest, **(qi deficiency so cold pattern so constriction)** worse talking, **(lung qi deficiency)** singing. **(spleen qi deficiency)** Stitches below axilla. Stitching pains **(qi stagnation or wind heat/wind cold)** in chest when sneezing or coughing. Oppression of the chest, **(lung qi deficiency cold)** as if something stopped the voice on coughing or on speaking or, as if the breath could not be expelled **(lung qi deficiency)**. Tightness of the chest on coughing. **(qi stagnation or wind cold/wind heat)** Pains, like a subcutaneous ulceration in the sternum **(damp heat in chest)**, on pressing upon it **(excess condition)**. Black pores on the chest and shoulder. **(pores-wind excess heat--black)**

Ears

Shootings and squeezing in the ears, **(wind heat)** especially on swallowing. **(lung or throat qi has impact on it)** (Hardness of hearing **(wind heat)** with buzzing and roaring in the ears. **(wind)** Humming and drumming in the ears. **(wind)**

Eyes

Become prominent from coughing (wind heat with lung qi jerk has impact on it) during measles (toxic heat) in convulsions. (wind heat) Shooting in the eyes towards the outside, (wind heat) especially on stooping. Suspension of the sight (or confusion (wind heat in heart) and paleness of the letters while reading. (liver wind) As if gauze before the eyes. Presbyopia and weakness of the eyes. (liver blood or yin deficiency) Contraction of the pupils. (kidney qi depletion) Dazzling by candle-light and daylight. (liver yin deficiency do dazzled and not able to sustain and hold light)

Face

Paleness of the face (stomach qi less) with cheeks hollow (stomach qi less) and eyes sunken. (liver qi vacuity so not able to hold eyes in position or spleen/stomach qi deficient that is muscles or lids of eyes weak so sunken) Coldness of left half of face (left kidney yang deficiency) with stinging pains and dry heat of right half (liver heat with liver yin deficiency). Face hot with cold hands. (face hot-stomach heat with cold hand-spleen yang deficiency. if feet cold then kidney yang deficiency) Small pustules here and there on face (stomach heat) with fine stitching sensation (wind heat) worse when touched (wind heat).

Burning (heat) and pricking sensation (wind heat) in the skin of the cheeks, below the eyes. Lips cracked and constantly dry. (stomach wind heat) Pressure in the cheek-bones towards the outside, aggravated by pressure and contact. Black pores in the chin. (black lips due to qi/blood stagnation but pores relates to wind and black relates to heat also so black pores due to wind heat)

Female

Menses suppressed or retarded. (retarded--liver yin deficiency and wind heat—suppressed) Leucorrhea with labor-like pains. (phlegm heat in liver channel so leucorrhea due to dampness/phlegm and delays menses due to blockage) Leucorrhea with pains like those of childbirth, (phlegm heat in liver channel) spasmodic pains in the abdomen. (phlegm wind heat in abdomen)

Food

Aversion to pork and sour foods, (damp heat) which disagree. Aversion to and bad effects from acids. (damp heat) Insipidity of food. Bitter taste of food (due to heat) and especially of bread. Thirst in the morning. (yang tone liver wind or fire—stomach heat—so thirst)

Head

Pressive pains in the head, especially in the forehead (stomach damp heat) and in the cheek-bones, sometimes with nausea (stomach damp heat) and dizziness (liver wind). Pressing headache (temples) (liver-temples damp wind) with stupefaction (phlegm misting the mind or heat invaded pericardium) and nausea (morning), worse when stooping and from heat, better from motion (generally heat is worse with motion but dampness etc excess is better from motion due to excess condition) and in the cold air. (wind heat) Beating and hammering in the forehead from the inside outwards. (liver yang excess so liver wind/fire so stomach fire as yang has tendency to move towards outside) Pains, as of excoriation (rub away, scratch etc) in the scalp. (damp wind heat that is scratch includes pressing of something which may be due to dampness wind and if pain it may be due to heat so damp wind heat) and and Painful perplexity of the head, as after loud speaking.

Kidneys

Frequent (damp heat) want to make water with scanty emission (but frequent scanty denotes qi deficiency so may be kidney qi or bladder qi deficiency) often drop by

drop(**bladder damp heat**). Emission of urine at night.(**Brownish(heat, kidney..)** urine of a strong smell.(**bladder heat**) Watery inodorous urine(**bladder qi deficient**) with fetid stool(**heat**) of white mucus.(**spleen qi deficiency so cold damp**)

Limbs

All limbs feel lame.(**spleen yin deficiency**) Bed feels too hard.(**spleen yin deficient so dryness is sensitive to hardness**) Fingers contract spasmodically(**spleen wind**) with rigidity(**spleen yin deficiency and wind**) when grasping anything.(**yin vacuity in spleen so spleen vacuity fire or wind**) Writer's cramp.(**spleen wind**) Laming pain in right hip joint and thigh (**thigh-spleen so spleen yin deficient and joint is related to lung so lung yin deficient**)with pain in ankle,(**lung or kidney yin deficient**) must limp when walking. Pain in the long bones. Pain in humerus at night only. Paralytic pains in the coxo-femoral joint and thighs. Stiffness in joints of feet.(**lung and kidney yin deficient**)

Lungs

Whooping cough.(**lung and spleen qi deficiency, lung yin deficiency**) Spasmodic, dry irritative cough like whooping cough.(**lung yin/qi vacuity –vacuity lung heat or fire –lung wind**)The attacks follow each other very rapidly, can scarcely breathe. Cough and chokes. Cough worse singing, talking.(**lung and spleen qi deficiency, spleen is singing**) **Cough very deep(lung yin deficiency) and hoarse(yin vacuity heat)**, worse after midnight.(**yin deficiency**)

PAGE 601

Hemoptysis after convulsions. Yellow expectoration with bleeding from Nose and Mouth,(**lung vacuity heat so vacuity heat forces blood out from vessels and not due to lung qi deficiency as blood contained by spleen or heart qi**) retching. Harassing and titillating cough in children, not during the day, but commences as soon as the head touches the pillow at night(**lung yin deficiency**). Asthma when talking (**breathless due to lung qi deficiency**)with contraction of the throat(**lung qi deficient so vacuity cold so contraction as throat is basically requires yang energy to speak and swallow and yin function here is not predominant**) at every word uttered.

Mouth

Putrid taste.(**stomach heat**) Bleeding of the mouth.(**stomach fire**) Bloody saliva.(**stomach fire**) Toothache from hot drinks.(**stomach fire**) Shooting pains in teeth after taking hot drinks.(**stomach wind heat or fire**) **Small round painless swelling in middle of tongue**(middle part shows spleen/stomach so phlegm heat in stomach). Ulcers on tongue. (**damp heat stomach**) Ulceration of velum palate.

Nose

Sensitive to sour smells.(**due to lung vacuity heat and due to vacuity he is sensitive**) Painful sneezing. Bleeding at the nose in the evening.(**yin vacuity heat**) **Bleeding from coughing, stooping, on blowing the nose.**(**lung qi jerk excite vacuity heat**) Black pores on the nose(**wind and vacuity heat that is vacuity heat is black and normal heat is red**). Constant dryness of the nose.(**lung yin deficient and vacuity heat**) **Fluent coryza with sneezing.**(**lung qi deficiency so fluent coryza as qi not able to hold**)

Rectum

Frequent evacuations (**lung qi deficiency**)of bloody mucus (**spleen qi deficient so bloody mucus**)with cutting pains after the stool,(**lung qi deficiency that is pain after stool**) pain in abdomen and small of the back.

Skin

Violent itching while undressing, (lung wind due to vacuity fire affected by undressing while lung wind by normal fire will be affected by dressing) when scratching, the skin readily peels off. (lung yin and qi less so skin peels off) Itching better by rubbing or wiping with hand worse undressing. Black pores on chest and shoulder. (vacuity fire wind)

Sleep

Snoring during sleep and when lying on the back. (may be due to phlegm on nasal route or throat or larynx etc) Frequent starts with fright during sleep. (gallbladder deficiency)

Nocturnal waking, on the breaking out of perspiration (due to lung qi deficient perspiration but lung yin deficiency this happens in night then cannot sleep due to kidney yin deficiency which has character of light sleep, waking frequently). Frequent waking with perspiration or as if too wakeful. Sleep at noon and in the evening at sunset.

Stomach

Nausea after fatty foods. (damp heat) **Difficulty in swallowing solid foods.** (due to throat constriction due to vacuity cold) Bitter belching. (stagnated qi in belching and hiccup and in swallowing difficult) Frequent hiccough. (stagnated qi) Water-brash. **Vomiting at night and after dinner.** (stomach yin deficiency) Vomiting of bile in the morning. (Vomiting of blood. (liver fire attacking stomach so stomach heat) **Vomiting of slimy matter and of food during the cough.** (stomach yin deficient so stomach vacuity fire move upwards and cough excite stomach fire or wind) Shootings and beatings in the pit of the stomach. (stomach fire or wind) Clawing sensation in the pit of the stomach.

Temperature

Fever (vacuity fever of liver yin) with headache and convulsive cough, (vacuity lung fire wind) whooping cough. Intermittent fever with nausea and inclination to vomit and other gastric sufferings or with sore throat. Thirst in the morning during the hot stage of the fever and not during the cold stage. Is always too cold, even in bed. **Chilliness during the day, heat during the night.** (during day lung yang /qi deficiency and in night lung yin that is vacuity heat) Shivers when at rest better moving. (moving create heat otherwise generally cold nature) Face becomes hot (stomach yin deficiency) and hands become cold with shivering. (spleen and lung qi deficiency) **Warm perspiration at night.** (lung yin vacuity heat perspiration) especially after midnight and during the morning hours, mostly in the face. Measles. (damp heat)

Throat

Clergyman's sore Throat with rough, scraping, dry sensation deep in the fauces, (lung yin deficiency) voice hoarse, (vacuity heat) deep toneless, (lung yin deficiency) cracked, (yin deficiency) requires exertion to speak. (lung yin/qi deficiency) Hoarseness, laryngitis. (vacuity heat inflammation) Deep, hoarse voice, (lung yin deficiency) requires exertion to speak. Voice hollow toneless. (lung yin deficient so empty lung and voice) Difficulty in swallowing any solid food, as from contraction of the throat. Sensation of dryness in the throat. Sensation in the throat, as if crumbs of bread had been stopped in it. Hawking of yellowish or greenish mucus. Laryngeal tuberculosis (lung yin and qi deficiency with rapid emaciation. (yin deficiency)

Vertigo

Vertigo when walking in open air (lung vacuity fire or empty fire or empty wind affected by open that is empty air) with inclination to fall to the left side.

Comments

The indications calling for it in the premonitory stage are: pallor, weakness, loss of appetite, dry cough, emaciation. Three indications are: (1) Anemia and pallor of larynx. (2) vocal cords not sufficiently approximated from functional impairment of cricoarytenoid muscles.

(3) redness and swelling of mucous membrane covering and between the arytenoid cartilages.

Among the characteristics of Drosera are: Spasmodic and constricting pains in the abdomen, larynx, throat, chest, hypochondria. Crawling in larynx, feeling as if a soft substance were lodged in larynx, as a feather. Difficult swallowing of solids. Voice fails.

PAGE 602

Hemorrhages of bright red blood from nose, mouth (bloody saliva) with vomit with stool, expectoration.

Dros. has many pains about the hip-joints and has cured sciatica with the following characters: "Pressing pains, worse from pressure from stooping from lying on painful part, better after rising from bed."

Gnawing stinging pains in joints and long bones. Stitching pains in chest and all parts, lacerations in brain. Stitches from left loin into penis, itching stitches in glans.

Eruption like measles, prickling burning itching, worse undressing, better by scratching, bleeding, burning ulcers, cutting pains. Epileptic attacks⊗(liver wind) with rigidity(yin deficiency) with twitching of limbs after attack,(spleen wind) hemoptysis and sleep.

Compare

(1) Bell., Cor-r., Cupr., Hyos., Ip., Samb., Meph., Op., Coc-c.

(2) In inability to expectorate, Caust., Sep., Arn., Kali-c.

(3) Teste considers Meny. the closest analog.

(4) Fluoroform, 2 per cent. watery solution, 2 to 4 drops after paroxysms, considered specific for whooping cough.

(5) Ouabain from leaves of Carissa schimperi - arrow poison - respiratory spasm, whooping cough is cut short in first stage and reduced in frequency of attacks and hastens convalescence.

SOURCES

Boericke. Clarke. Phatak.

Duboisinum

Pharmacy

Dub. Duboisinum. Duboisia myoporoides. Corkwood Tree. N. O. Solanaceae.

Queensland. Tincture and solution of alkaloid prepared from extract of the leaves.

Historical dose: Tincture and all potencies.

History

Duboisia belongs to the same order as Belladonna and its alkaloid, Sulphate of Duboisia, has been used as a substitute of Atropine.

Its application to the eye has caused marked constitutional symptoms of fever, delirium, stupor and dry mouth. **Planets:** Sun, Moon.

Homeopathic

A symptom which may prove a keynote is " a red spot floating in the field of vision." Guided by this, C. H. Helfrich cured a case of hyperemia of optic nerve with Duboisin 3c. Dryness of mucous membranes is very characteristic. Cool feeling in the eyes. Sensation as if stepping on empty space. Feeling of largeness in eyes in tongue. Inability to stand with the eyes shut gives it a place in locomotor ataxia. It has also been proved.

Clinical

Delirium. Drowsiness.

Eyes: dilated pupils.

Locomotor ataxia. Mouth, dryness. Paralysis. Presbyopia. Throat, dryness. Vertigo. Vision, disorders.

Duboisinum + dubo-m. (old abbr.)

(corkwood tree)

Pharmacy

Dubo-m. Corkwood Elm. *Duboisia myoporoides*. Corkwood Tree. N. O. Solanaceae. Queensland. Tincture from the leaves. Historical dose: Tincture and all potencies, third to twelfth potency.

History

Duboisia acts chiefly on the nervous system, eyes, upper respiratory tract. Recommended in pharyngitis with black, stringy mucus. **Planets:** Moon, Sun.

Homeopathic

Duboisia dilates the pupil, dries the mouth, checks perspiration, causes headache and drowsiness. On the eye it acts more promptly than Atropia, much stronger as a mydriatic. Red spot floats in the field of vision. Sensation as if stepping on empty space. Scarlet fever and locomotor ataxia. Vertigo with pale Face, not gastric in origin. Palliative for exophthalmic goiter.

PAGE 603

Clinical

Delirium. Drowsiness. Eyes: dilated pupils. Locomotor ataxia. Mouth, dryness. Paralysis. Presbyopia. Throat, dryness. Vertigo. Vision, disorders.

Symptoms

MIND

Absent-minded incoherent. Silly and nonsensical. Memory impaired.

Eyes

Conjunctivitis, acute and chronic. Mydriasis. Paralysis of accommodation. Hyperemia of retina with weakness of accommodation, fundus red, **blood-vessels full** and tortuous, pupils dilated with dim vision. Pain over eye, between it and brow.

Head

Impossible to stand with eyes shut, tendency to fall backwards.

Limbs

Loss of power in limbs, staggers, feels as if he stepped on empty space. Trembling, numbness and weakness.

Lungs

Larynx dry, voice hoarse, phonation difficult. Dry cough with oppressed breathing.

Vertigo

Vertigo with pale Face, not gastric in origin.

Compare

Dulcamara

(woody nightshade)

Pharmacy

Dulc. Solanum dulcamara. Dulcamara. Woody Nightshade. Bitter-sweet. N. O. Solanaceae. Not to be confounded with "Deadly Nightshade," Belladonna, nor with "Climbing Bitter-sweet," Celastrus. Dulcamara tincture prepared from fresh green stems and leaves, gathered just before flowering. Historical dose: Tincture and all potencies, second to thirtieth potency.

History

Sensitiveness to cold and damp runs through the Solanaceae. and is marked in Bell. and Caps., but it is supreme in Dulc. This feature among others renders them all good antidotes to Mercurius. Bar-c. is the complement of Dulc. in "worse from cold weather, especially in scrofulous children."

Homeopathic

The leading indication for Dulcamara is found in its modality, worse from cold and damp. Any condition which has this feature may find its remedy in Dulc. Effects of lying on damp ground (e.g., paralysis), conditions which are worse in cold, damp weather or from changes from hot to cold weather.

Every cold settles in the eyes, throat or affects the bladder, respiration or bowels. Hot days and cold nights toward the close of summer are especially favorable to the action of Dulcamara. Effects of damp weather, colds after exposure to wet, especially diarrhea.

The rheumatic troubles induced by damp cold are aggravated by every cold change and somewhat relieved by moving about. Results from sitting on cold, damp ground. Icy coldness. One-sided spasms with speechlessness. Paralysis of single parts. Congestive headache with neuralgia and dry nose. Patients living or working in damp, cold basements. (Nat-s.)

Dropsy, anasarca. Exostoses. Enlarged glands. Adenitis, glands, swollen and indurated. Hemorrhages, blood watery or bright red. Stiffness, numbness, aching and soreness of muscles on every exposure to cold especially of back and loins.

Eruptions on hands, arms or face around the menstrual period. Paralytic effects of single parts, vocal cords tongue etc. Paralyzed parts icy cold. Tearing pains. Griping in bowels around the umbilicus in testes. One sided spasms with loss of speech.

PAGE 604

Clinical

Adenitis. Aphonia. Bladder disorders. Blepharophthalmia. Catarrh. Cholera. Colds. Crusta lactea. Diarrhea. Dropsy. Dysentery. Emaciation. Exostoses. Hemorrhage. Hay fever. Headache. Hemorrhoids. Herpes. Influenza. Irritation. Lichen. Lumbago. Measles. Meningitis. Mononucleosis. Muscle pain. Myelitis. Nettle-rash. Neuralgia. Ophthalmia. Paralyzes. Pemphigus. Rheumatism. Scarletina. Scrofula. Stammering. Stiff-neck. Thirst. Tibia, pains. Tongue disorders. Tonsillitis. Tumor. Typhoid. Urine, difficulty in passing incontinence. Warts. Whooping cough.

Causations

Damp with cold. Wading. Washing. Injuries. Checked eruptions. Checked perspiration. Complaints of workers in ice factory. Men who are exposed to constant change of temperature, air conditioning.

Constitutions

Phlegmatic torpid, scrofulous patients, who are restless and irritable and who take cold on damp changes, are especially suited for Dulc. **Planets:** Moon, Saturn.

Modalities

Better from moving, external warmth, dry weather. Worse from being chilled, while hot, sudden changes of temperature, cold wet, damp, rainy weather. Worse from cold drinks from ice-creams. Worse from damp ground, cellars, beds, cold to feet. Worse getting wet, using water. Worse from suppressed discharges, eruptions, sweat etc. Worse from autumn, night, hot days and cold nights. Worse at rest and better by motion.

Symptoms

MIND

Mental confusion,(**dampness mystifying brain**) cannot find the right word,(**recollection from memory poor that is kidney contnt not properly coming on heart or brain**) can't concentrate his thoughts.(**kidney stores so kidney yang deficiency**) Depression. (**heart,lung,kidney involved**) Scolds without being angry.(**damp cold in liver**) Rejects the things asked for. Easily becomes delirious with pain.(**delirious due to dampness blocking the heart and pain due to cold or heat.damp cold inside may become damp heat afr sufficient time**) Difficult speech.

Abdomen

Colic from cold.**spleen viscus vacuity cold that is damp cold** Bowels cold.(**damp cold**) Acts on umbilical region.(**small intestine area which absorb fluid and nutrient from chyle that is dampness dominated**) Cutting pain at navel(**cutting pain at small intestine which may be due to blood stasis (cutting/stabbing pain)**) followed by painful, green,(**due to heat or liver**) slimy(**qi or blood vacuity**) stools. Swelling of inguinal glands.(**dampness**) (Merc.) Eruptions or pain about the navel.(**eruption/pain-wind heat/wind cold or small intestinal heat so eruption and pain.**)

Back

Lumbar region and sacrum feel cold.(**kidney yang deficiency**) Stiff neck.(**wind cold**) **stomch channel also goes through neck and feet**. Pain in small of Back, as after long stooping.(**long stoopin—kidney yang dissipated so pain in back due to vacuity cold**)

Stiffness and lameness across neck and shoulders after getting cold and wet.(**dampcold across kidney area that is neck and shoulder(lung,kidney,heart area)**)

Breasts

Breasts, engorged(**dampness in stomach**) and sore(**dure to vacuity liver cold or heat**), delicate,(**dampness**) sensitive to cold.

Chest

Pain in left chest as if lung moved in waves.(**wind heat as left is yin so it is vacuity heat**) Great oppression of the chest,(**due to dampness cold or heat or wind clogging**) especially when breathing.(Dull shooting, as from blows in and upon the sides of the chest.(**dull-dampness,shooting pain may be due to heat that is vacuity heat or chest qi deficient that is vacuity cold**)

Ears

Earache with nausea,(stomach attacked by liver heat so nausea and earache due to liver heat) whole night, preventing sleep.(liver yin deficiency) Swelling of parotids after measles.(damp heat) Buzzing in ears.(liver wind or yin vacuity hyper yang) Earache, buzzing, stitches and swelling of parotids. Middle-ear catarrh((Merc. Dulc., Kali-m.)

Eyes

Every time he takes cold it settles in eyes.(cold is stored so damp cold) Thick, yellow discharge,(damp heat) granular lids(phlegm heat). Hayfever with a profuse, watery discharge,(heat pattern or qi/yang deficiency) worse in open air.(vacuity heat/fire/wind) (Aching when reading.(liver yang aggravation on reading) Ophthalmia from catching cold. Paralysis of upper lid.(spleen yang/yin deficiency) Twitching of eyelids in cold air. (wind cold wind is twitching))

Face

Cold sores on lips.(cold damp) Warts and eruptions on face.(liver wind heat attacks stomach area that is face so warts and eruptions or kidney essence/qi deficiency) Facial neuralgia,(heart qi deficiency) worse from the slightest exposure to cold.(heart qi less so cold affects on face.) Tearing in cheek extending to ear orbit and jaw,(wind heat)preceded by coldness of parts and attended by canine hunger(wind heat in stomach). Twitching of lips in cold air.(spleen wind cold) Humid eruption on cheeks and face generally.(damp heat in stomach) Thick, brown, yellow crusts on face.(damp heat in stomach)

Female

Suppression of menses from cold or dampness.(liver wind affected by damp cold) Menses watery.(liver damp cold) Rash appears on the skin before menses.(blood/qi stagnation and wind heat so before menses rash appears) Dysmenorrhea with blotches all over. Herpes on breasts(damp heat on liver channel or wind heat in liver channel) in nursing women. Menses,(liver and kidney) milk,(liver and stomach) lochia(kidney) suppressed by cold.(cold suppresses damp things like milk,menses,lochia) Breasts, engorged(dampness), hard(wind heat or wind cold), sore with absent menses(blood stasis due to cold in blood or blood deficiency or kidney yin and liver yin deficiency) or leucorrhoea.(damp heat or damp cold) Eruptions on skin after weaning. (weaning means milk is not given to child anylonger so dampness mixing with heat coming as eruption)

Food

Aversion to food.(phlegm heat in stomach) Great thirst for cold drinks.(damp heat in stomach)

Head

Ringworm of scalp.(wind damp heat as scalp is oily place) Scald Head, thick brown crusts,(damp heat) bleeding when scratched,(wind damp heat) causing hair to fall out.

(wind damp heat hair fall) Headache relieved by conversation. (Buzzing in head.(wind) Sensation as if a board were pressing against the forehead.(dampness gives pressing sensation so damp heat in stomach) Sensation as if hair stood on end. Occiput feels large, cold.(damp cold in kidney area/channel that is occiput)

Occipital pain ascending from nape of neck.(damp cold in kidney channel) Back part of head chilled, heavy, aching during cold weather.(damp cold kidney channel)

PAGE 605

Kidneys

Nephritis(edema from ankle down below) from cold.(damp cold in kidney or bladder that bladder/kidney yang deficiency so vacuity cold) Catarrh(damp heat) of bladder from taking cold. Bladder wall thickened.(damp heat) Must urinate when getting chilled. (coldness affects dampness that is urine and cold ness means bladder/kidney yang deficiency so no hold on urine) Frequent urination(heat,kidney yin/yang deficiency etc). Cystitis,(liver kidney deficiency) Strangury, painful urination.(cold damp or damp heat or blood stasis,stone etc) Retention of urine from cold or cold drinks.(cold damp retention of urine) Involuntary urination from paralysis of bladder.(bladder qi vacuity so urine not able to hold) Urine, cloudy,(damp cold) slimy or foul(damp heat). Urine has thick, mucous, purulent sediment.(damp heat) Ischuria from wading with bare feet in cold water.

Limbs

Exostosis on arms after suppressed scabies.(scabies-- Itching papule arise accompanied by inflamed lymph nodules so wind damp heat/cold suppression disturb spleen stomach and create exostosis on arm) Perspiration on palms of hands.(lung and spleen qi deficiency so damp wind cold or heat) Trembling of arm (right)(spleen yin deficiency so tembling due to weakness) with urinary difficulty.(Loss of lung qi spread and descent ,spleen yang deficiency,kidney yang deficiency,internal obstruction by damp heat,qi blockage and damp obstruction,kidney and liver yin deficiency.)Warts on hands and fingers. Rheumatic symptoms alternating with diarrhea or acute eruptions.(lung wind cold/heat alternating with spleen damp heat(diarrhea) or lung wind heat(eruption) Paralyzed limbs, (spleen yang deficiency) feet (stomach/spleen or kidney yang deficient so vacuity icy cold)icy cold. Swelling of calf of leg.(dampness due to spleen yang deficiency) Pain in shin-bones. Rheumatism alternates with diarrhea.

Lungs

Asthma with dyspnea.(lung obstructed by damp cold) Impending paralysis of lungs.(lung qi deficiency) Cough worse cold, wet weather with free expectoration.(damp cold-dampness free expectoration) tickling in larynx.(phlegm in larynx) Winter coughs, dry, teasing.(chronic cold converted in internal heat so dry cough) Cough after physical exertion.(physical exertion affects kidney yin which affects liver yang/wind which affect

lung heat/wind so cough, spasmodic, hoarse) Cough, hoarse, spasmodic. Whooping cough with excessive secretion of mucus. (liver wind damp heat) Loose, rattling cough, (damp wind) worse wet weather. Must cough a long time to expel phlegm. (phlegm heat) Cough, caused by tickling (wind damp) in the back of throat (in prolonged fits with much loose easy expectoration. (dampness))

Male

Enlarged testes (dampness) with griping pain (cold so damp cold). Impotence. (downward flow of damp heat) Herpes. (damp heat/cold)

Mouth

Cold-sores on lips. (damp cold in spleen/stomach) **Distorted, drawn to one side.** Tongue, swollen, hindering speech, (dampness) paralyzed (stomach qi deficiency that is cold-so damp cold) inarticulate or difficult speech. Dry, rough tongue, rough scraping in throat after taking cold in damp weather. Saliva, tenacious, ropy with toothache. (stomach fire so saliva tenacious and toothache)

Nose

Complete stoppage of nose. (phlegm or damp heat blockage or wind heat/wind cold here it is wind cold) Dry or profuse coryza. (lung/stomach heat so profuse dry coryza) Stuffs up in the cold rain. (cold damp affects stomach fire to go upwards) Aching pain. Summer colds with diarrhea. (pathogenic wind heat creates colds in lungs as deficient qi fights with pathogenic heat and gets dissipated so catches cold and spleen deficiency that is damp heat creates diarrhea as small intestine does not absorb fluid due to high heart heat) Least cold air stops the nose. (wind cold) Wants nose kept warm, least cold air stops the nose.

Nosebleed in place of menses. (menses suppressed disturbs liver yang so lung heat so nose bleed) Thick, yellow mucus, bloody crusts. (lung heat) Coryza of the newborn. (new born has excess yang so coryza due to wind heat)

Rectum

Bowels feel cold. Cutting pain at navel followed by painful, green, slimy stools. Diarrhea. Green, watery, slimy, bloody, mucus, especially in summer, when the weather suddenly becomes cold from damp. cold weather and repelled eruptions. Sour watery stools, (damp cold) worse night. (spleen yin deficiency) summer, damp cold weather.

Sensations

As of a board pressing against forehead, as if head were enlarged, (dampness) as if hair stood on end, as if fire were darting out of eyes, (liver fire) as if worms were crawling up and down in abdomen. (damp wind) biting in rectum as from salt, as if lung moved in waves, as if arms were of wood, (spleen cold damp) as of needles over whole body. (blood

dampness congealation due to cold) Crawling, tickling itching of various parts, tip of tongue.(wind)

Skin

Eczema of infants.(infants have high yang so damp heat) Rash in new born.(damp heat) Ringworm in the hair in children.(wind damp heat) Pruritus, worse in cold, wet weather. (wind damp cold pruritus)Herpes zoster, pemphigus. Swelling and indurated glands from cold.(damp cold) Eruptions, scaly, thick, crusty, moist, bleeding or herpetic,(wind damp heat) worse before menses.(qi/blood stagnation so due to qi stagnation wind is affected of livere channel)(Sensitive bleeding ulcers.(damp heat) Little boils.(damp heat) Urticaria, (damp heat) red spots, brought on by exposure or sour stomach.(stomach heat) Humid eruptions on face, genitals, hands etc.(damp heat) Warts, large, smooth, on face and palmar surface of hands.(spleen and stomach phlegm heat) Anasarca. Thick, brown-yellow crusts, bleeding when scratched. Small furuncles on places hurt.

Stomach

Nausea with desire for stool.(damp heat in stomach exciting lung heat so desire for stool) Shivering while vomiting.(lung qi so overall qi deficient so coldness shivering and belching/vomiting further reduces qi) Belchings with shuddering. Vomiting of white, tenacious mucus.(cold damp in stomach) Heartburn.(stomach heat upward to heart) Chilliness during vomiting.

Temperature

Dry burning heat all over.(cold damp chronic becomes internal dry heat in lungs) Icy coldness with pains. Coldness in different parts, icy(cold damp) of paralyzed parts(so paralysis caused by cold damp stagnation).(coldness have fixed location so stagnation of cold damp in different parts) Chill starts in the back,(kidney yang deficient chill on the back so warmth doesn't help,positive chill is helped by warmth) not better by warmth worse evening. Chill with urging in stool and urination.(damp cold affects large intestine and bladder qi so urge) Chilliness with thirst(internal fighting with pathogen so thirst as vital qi is consuming the yin but in outer qi is deficient or pulled internally so chilliness). Foul sweat.(heat in lungs)

Throat

Pressure as if uvula were too long. Tonsillitis from every cold change.(cold inflames tonsils that is cold in lung affects stomch heat so tonsils)

PAGE 606

Comments

Clarke once gave Dulc. 30c with complete relief to the pain in a case of sarcoma of the bones at the base of the skull in which there were stabbing pains in the front of the head and partial paralysis of the tongue. It was the latter symptom which determined the choice of the remedy.

In poisoning cases Dulc. produces: Hard, griping pains in bowels, unconsciousness, tetanic spasms, trismus, loud, rattling breathing, death. Paralyzes are numerous: paralysis of tongue of lungs of heart (pneumogastric paralysis).

Paralysis of the bladder. Rheumatic paralyzes. Paralyzed part feels icy cold. One-sided spasms. Convulsions beginning in face. Trembling, especially of right arm. It has cured: "Paralysis of vocal cords (aphonia) from sleeping over a damp cellar."

McLaren cured with a single dose the following case, which was the result of a wetting: Facial paralysis, following neuralgia, the eye having remained unclosed for eight months. Red rash with itching worse in damp weather. After a slight aggravation improvement began in two weeks and continued steadily.

Dulc. is a scrofulous remedy and has many scrofulous-looking eruptions: moist or dry, red, tettery eruptions, especially on face, furfuraceous, herpetic, urticaria, skin callous, warts, fleshy or large, smooth. Painless ulcers.

Dulc. 30c cured in two doses a rash like mosquito-stings appearing every month before the menses, worse when warm, compelled to sit where it is cold.

Dulc. corresponds to results of suppressed eruptions. Offensive sweat, effects of sudden cooling while sweating. Dropsical disorders. Catarrhal troubles. Dryness of mucous membranes strongly indicate it.

Dulc. causes diarrhea and a characteristic form is when there is vomiting with the stool. It causes a mucous-like sediment in the urine. It is particularly indicated when a mucopurulent urine is associated with general one-sided sensitiveness.

Especially of the abdomen. Skin eruptions are sensitive to touch, pressure better. Small furuncles appear on places hurt by concussion.

SOURCES

Boericke. Clarke. Phatak.

Bacillus dysenteriae (bach)

Pharmacy

Dys. Dysentery bacillus. Dysenteriae bacillus. A Bowel nosode. Historical dose: All potencies.

History

This is the nosode prepared from B. Dysenteriae. Dysentery Co., affects every tissue of the body and this nosode is quite suitable for many slow and insidious chronic states.

The Dys. Co. patients are typically the Argentum Nitricum type. They are full of fears and can be phobic. They have abdominal symptoms not of the sick bilious Morgan type, but symptoms are due to apprehension. They may suffer diarrhea or indigestion from eating sweets and fat which they are fond of.

The mental aberrations and nervous symptoms are distinct and frequently found in this age of stressful living. Those symptoms that precede and are associated with myocardial and circulatory disease.

PAGE 607

Patients have expressed that the least excitement exhaust them and brings on their worst symptoms. A constant symptom is "anxiety and excitement felt in the epigastrium" and in a great number of cases "nausea from excitement" and "diarrhea from excitement".

Excitement, anxiety or any agitation causes palpitations, flushing and perspiration and at times breathlessness and even pain in the heart region.

Homeopathic

The keynote for its use in nervous tension of a peculiar type and best described as "anticipatory." Since it is that sense of nervousness which a student might feel immediately before facing his examiner or a business man before attending an important engagement. They do not explode as the Proteus are wont to do. They have too much inhibition and insecurity to explode.

Dysentery Co. has been shown to have selective action on the pylorus causing spasm and retention of digested contents. Dilation of stomach. Indigestion pain for years with distention and discomfort. **Heart**-burn. Cyclical vomiting in children.

Involuntary movements, tics or twitching (like chorea) occur. There is instability of the capillary circulation, causing blushing, frontal headaches from excitement and claustrophobia. The skin may be dry, scaly and with circinate lesions.

Clinical

Anxiety. Blepharitis, Diarrhea. Duodenal ulcer. Dysmenorrhea. Colitis. Fibrositis. Flatus. Osteoporosis. Otorrhea. Rheumatism. Spondylitis. Tachycardia. Thyrotoxicosis.

Constitutions

The patient has a tense facial expression, not fearful but alert and ready to react. He is anxious, restless, fidgety, timid and uneasy among strangers, easily upset by criticism.
Planets: Moon.

Modalities

The general aggravation period is from 3 a.m. to 6 a.m. Patients feel the cold, chilly and want warmth, yet are easily heated up by the exertion and warm room. Desires air and space.

Modalities

Feels cold, chilly and rapidly perspire from excitement and mental exertion. Nausea and faintness in warm room, relieved by open air.

Symptoms

MIND

The Dysentery patients are in a highly strung state of mind and body and very sensitive to all impressions. They are easily excited and flustered. Lack of self confidence. Full of worries about little things with the anticipating fear of difficulties that might arise, (Arg-n.) Tense and nervous. Full of fEars. Shy, lacks confidence. Apprehensive and worried over trifles. Loses the train of ideas from interruption. Forgets what he was going to say. Forgets what she went for.

Abdomen

Distention and flatus. Colitis. Pain and tenderness over gall bladder.

Back

Fibrositis neck and shoulders. Rheumatism of neck and shoulders. Backache. Spondylitis.

Chest

Pain in chest on exertion. Pleurodynia. Tightness in lower ribs.

Ears

Otorrhea. Sudden swelling of ears-blue red thin scalding.

Eyes

Blepharitis, styes. Conjunctivitis with photophobia. Twitching of eyelids. Sensation of floating bodies, woolly spots before eyes. Yellow color vision.

Face

Both children and adults show a marked anemia, watery bluish pallor with puffiness of eyelids and cheeks. Veins frequently dilated and bluish lips that are apt to get dry and cracked. Neuralgia-supra and infra orbital. Twitching of muscles of face.

Female

Dysmenorrhea. Menses irregular. Throbbing pelvis and perineum. Infantile masturbation.

Food

Fond of sweets, salt, milk and fat.

Head

Headache frontal over the eyes or in vertex, brought on by excitement. Headaches often occurs at regular time periods of 7 to 14 day's cycle. Blinding Headaches with looseness of bowel. Migraines, more headache than vomiting. Fuzzy head. Scalp is painful to comb. Dry, scaly painful spots.

PAGE 608

Heart

Tachycardia, palpitations, extra systoles. Palpitations before important events. Anticipatory discomfort in the cardiac area. The heart rate is fast and may be irregular.

Limbs

Ankles painful. Arthritis and periostitis foot. Osteoporosis. Pain in knees.

Lungs

Shortness of breath. Bronchial catarrh. Pertussis like cough. Sputum blood stained.

Mouth

Bad taste. Tongue raw and burning. Lips are dry and cracked. Rheumatism of jaw.

Nose

Hay fever. Vasomotor rhinorrhea. Frequent coryza. Pain at the root of nose.

Rectum

Constipation and diarrhea. Loose morning diarrhea stools forcibly expelled and acrid burning. Diarrhea on excitement or worry. Looseness, frequent motions 5 or 6 per day. Hemorrhoids and anal fissures. Hemorrhoids come down when walking. There is weak expulsion of hard knotted stool with mucus. Throbbing rectum with sense of block or cork. Mucus with motion.

Sleep

Insomnia, late in falling asleep from crowding of thoughts and from excitement and from palpitations. Sudden shocks through the body on falling to sleep and awakening with fear and palpitation and breathlessness. Wakes at 2 or 3 a.m. with pain and discomfort epigastrium.

Stomach

Pain worse from eating. Chronic indigestion. Eructation, heart burn. Ptosis stomach, dilation, splashing. Emptiness between meals and emptiness and sometimes nausea in the

morning on awakening relieved by eating. **Heart** burn some hours after food. Acrid vomiting burning up throat, bilious vomiting. There is thirst and desire for cold drink, but stomach worse afterwards. Sinking emptiness during day with relief from rest and food. Pain as a rule relieved by lying down. Mental strain reacts on stomach and aggravates the stomach stasis. Excited feeling in stomach and aggravates the stasis.

Throat

Enlarged thyroid. Dry throat. Recurrent tonsillitis. Pharyngitis.

Urine

Urge to urination in tram or train.

Comments

The facial expression depicts the anxiety. Later the pallor and flabbiness tell their weakness and the lines are the record of the strain that life has become. Fear of the future is their bug bear. They carry a load that they need not carry and those likely to develop Dys. Co. symptoms are the hypersensitive souls that are burdened with over conscientiousness.

They are shy and lack initiative, feeble in effort, can not sustain a course, are easily deflected and have little power of concentration. "Feels miserable from the fear that she can not accomplish what she was to do" is the reason for the impatience and hurry that is so frequently seen in Dys. Co patients.

This leads to constant tension and they lose the power to relax and even in their recreation there is bustle and fever. The restless desire to go from place to place to go out and then when out to get back home again is a mental found in Tuberculin. It has several times occurred in patients and has been removed by Dys. Co.

Fear has come out in both children and Adults afraid in train, tram, bus and church, afraid in theater, lift office etc. Fear of the future, fear of dark, fear of thunder and storms. Fear of being alone. A patient expressed himself thus: "I desire to be left to myself, but have a fear of being alone."

Brain fatigue comes on. "Loses train of ideas from interruption." "Forgets what he was going to say." "Forgets what she went for."

Depression comes on from tiredness from the constant tension and from a sense of failing to accomplish and spirits are low, there is a desire to be left alone indulge in tears and consolation aggravates the weeping and brings out irritability.

They feel unsociable and have aversion to meeting strangers, not only because of the depression, but because of the strain that talking to people involves. Mental uneasiness in anticipation of some event, easily upset by criticism, mental uneasiness show itself by physical restlessness, can not keep still, fidgets, chorea movements of facial muscles or limbs. Nervous tension is the keynote, affecting the nervous system and triggered by anticipation.

The Dysentery child is of hypersensitive nature, which expresses itself as shyness or timidity. In the presence of strangers the whole attitude of the child expresses nerve tension felt within and you will observe the tenseness of the facial expression. Which is not altogether an expression of fear, but more of an expression of alertness, a tuning up of the nerve centers to the full pitch of expectancy to enable an immediate response to be made on the reception of the slightest external stimulus.

For example is you address the child or make a complimentary remark, there will appear almost immediately a hyperemia of the surface capillaries of the cheek-a blushing of the skin which is more noticeable because of the peculiar white background of the rest of the skin area.

Dys. Co., affects the venous circulation. Walls of veins get thin and veins dilated. There is a stasis of abdominal circulation and varicose veins of the leg are frequent. A very constant symptom is "bruises very early and bleeds easily".

Function disturbance of heart action, associated with nerve tension. This medicine has selective action on cardiac muscles. In the adult many symptoms of cardiac disorder. The characteristic mental tensions are present.

In the child the more typical symptom is that form of rheumatism commonly described as "growing pains" which so frequently are found associated with valvular heart disease.

The stomach symptoms are those associated with hypotonic stomach and conditions that lead to duodenal ulceration. Delayed digestion with pain relieved by eating. In Dysentery Co., limbs get cold and bluish and perspire.

Duodenal ulcer often calls for the use of this nosode, but there must always be present also evidence of nervous tension. This always precedes the physical symptom and which the patient feels and refers to his stomach and heart area.

This is in contrast to the type of duodenal ulcer found associated with the Bac. Proteus, where the nerve tension is insidious in action, unperceived by the patient and the physical condition. The ulcer tends to come on as a "crisis" without previous warning. In cases of ulcer it is frequently used with Lycopodium or Nux vomica.

Eruptions are dry and sluggish and come out slowly from the very weakness in the nature of the patient's reaction. Morgan is active producing rapid efflorescence with great heat and itch and discharge is usually watery and purulent. Dys. Co. is apt to scale and crust and when there is discharge it is gummy like Graphites.

Herpes face, neck, chest. Blisters between fingers. Scaly eruptions flexures. Dermatitis of hands and palms, dry, cracked and painful. Flat warts on hands. Psoriasis. Urticaria attacks. It produces dryness of skin, ribbed brittle nails, dandruff and dry brittle hair. Finger tips crack. The cracks and fissures are deeper with an indurated base.

Compare

(1) There is close relationship between Dysentery Co., Arg-n. and Ars.

(2) It is also related to Kalm., Nux-v. and Lycopodium also follow it well in gastric disorders.

(3) Proteus.

PAGE 610

Echinacea angustifolia

(purple cone-flower)

Pharmacy

Echi. Purple Cone-flower. Echinacea angustifolia. Echinacea rudbeckia. N. O. Composite, allied to Rudbeckia. Tincture of whole fresh plant. The whole plant including the root is pounded to a pulp and macerated in two parts by weight of alcohol. Historical dose: Tincture and all potencies, tincture, one to thirty drops. Locally, as a cleansing and anti-septic wash.

Herbal

Echinacea angustifolia is the Western species of Echin., not to be confounded with Echin. purpurea or Black Sampson, the Eastern species.

Echinacea angustifolia is a blood and immune tonic. This rather famous drug came to notice as "Meyers's Blood Purifier", the proprietor did not know the name of the drug

used and sent a whole plant of Professors King and Lloyd of Cincinnati, who identified it as *Echinacea angustifolia*.

"Bad or weak blood" so called, asthenia, adynamia and particularly a tendency to malignancy in acute and sub-acute disorders, seem to be special indicators for the use of *Echinacea*. Valuable as a local cleansing and anti-septic wash for wounds, (Calen.).

A great remedy, when boils progress to the stage where they appear about to point then stop and do not suppurate. *Echinacea* helps in carbuncles with similar symptoms, a bluish-red color and intense pain.

Echinacea is of great value in very fetid Ozaena. Beneficial in some cases of leucorrhoea with discharge bright yellow, as from a suppurating surface. Very serviceable in gangrene, where it may be classed with *Rhus-t.* and *Arsenicum*, perhaps ranking between them.

The trustworthy clinical findings may be stated in two words, anti-septic and alterative. From an article by Dr. H. W. Felled in the *Eclectic Medical Journal*, quotes the following indications concerning this remedy:

If any single statement were to be made concerning the virtues of *Echinacea* it would read something like this: "A corrector of the deprivation of the body fluids" and even this does not sufficiently cover the ground. Anti-septic, anti-fermentative and anti-zymotic. Tissue alterations as are exhibited in boils, carbuncles, abscesses or cellular glandular inflammations.

Echinacea angustifolia has long been used by herbalists in typhoid conditions, diphtheria, malignant scarlatina, carbuncles and boils. Also as a septic remedy in snake, animal or insect bites.

Homeopathic

Echinacea corrects blood and immune disorders, hence it is useful in all types of Blood poisonings. Acute auto-infection, septic conditions, bites of poisonous animals, Lymphangitis, gangrene or vaccinosis. Tendency to malignancy in acute and sub-acute disorders. Erysipelas and foul ulcers. Gangrene. Goiter with exophthalmic symptoms. Diarrhea in typhoid. Gonorrhoea. Boils. Vaccination ill effects.

Patient feels weak and tired and aching in muscles. Last stages of cancer to ease pain, (Ars.). Weakness is felt more in stomach, bowels in heart in knees with vertigo.

Snake bites, insect bites and stings generally. Venomous infection. Lymphatic inflammation, after crushing injuries. Foul discharges with emaciation and great debility. Cerebro-spinal meningitis. Post-partum infections. Hemorrhoids. Pustules.

In two provers there was found a diminution of red blood corpuscles after the proving. There is much chilliness (coldness of right leg) and sensitiveness to cold, worse from exposure to cold air.

Clinical

Abscess. Auto-infection. Appendicitis. Bites. Blood, disorders. Blood-poisoning. Boils. Carbuncles. Diphtheria. Enteric fever. Erysipelas. Fevers. Gangrene. Impetigo. Immune diseases. Lymphangitis. Poisoned wounds. Pyemia. Rheumatism. Rhus-poisoning. Scarletina. Septicemia. Snake-bites.

Sore throats. Struma. Syphilis. Typhoid. Ulcers. Vaccinations, effects. Wounds.

PAGE 611

Constitutions

Broken-down and weak constitutions. **Planets:** Mars, Saturn.

Modalities

Better from lying down, by rest. Pains come and go suddenly and are better by bending double. Worse from injury, operations, cold air. Worse after eating. Worse in evening. Worse after physical or mental exertion.

Symptoms

MIND

So nervous could not study. Slowness in every action speaks slowly, replies slowly, walks slowly. Confused feeling of the brain. Confused, depressed or crossed. Becomes angry when corrected, does not wish to be contradicted. Cannot exert mind. Does not wish to think or study. Felt depressed and much out of sorts. Angry when corrected, worse when contradicted.

Abdomen

Abdomen sensitive and tympanitic. Tender and distended. Pain in right hypochondrium. Full feeling with borborygmus. Pain about umbilicus, better by bending double. Sharp, cutting, pains coming and going suddenly.

Back

Chills up the back. Pain in back of neck. Pain in small of back over kidneys. Dull pain in small of back. Pain in lumbar region, worse from stooping.

Chest

Pain as of a lump in chest and under sternum. Pain in pectoral muscles. Full feeling in upper part of lungs. Pain in diaphragm. Pain in right lung. Sore feeling. Feeling of a lump under sternum. Sharp burning pain in sternum.

Ears

Shooting pain in right ear.

Eyes

Brows twitch. Feel hot on closing them. **Eyes** ache when reading. **Eyes** pain on looking at an object and will fill with tears, better by closing them. Sleepy sensation in eyes, but cannot sleep. Pains back of right eye. Lachrymation from cold air. Sharp pains in eyes and temples.

Face

Bluish. Paleness of face when head aches. Face flushed. Fine eruptions on forehead and cheeks. Neuralgic pain in left upper branch of fifth nerve. Vomiting with pale face.

Female

Mucus from vagina in evening. Puerperal septicemia. Discharges suppressed. Excoriating leucorrhea. Pain in right iliac region, which seems deep, lasting but a short time.

Food

Loss of appetite. Desire for cold water. Nausea, could not eat.

Head

Headaches with a peculiar periodical flushing of the face, even to the neck, dizziness and profound prostration. Sharp pain deep in brain, it seems too large. Throbbing through the temples. Hot burning forehead. Dullness in head with cross, irritable feeling.

Heart

Anxiety about the heart. Sense of fear about the heart. Increasing but variable pulse. Slight pain over heart. Stitching pain in left chest (apex of heart.). Rapid beating of heart.

Kidneys

Albuminous, scanty, frequent and involuntary. Desire for frequent urination. Involuntary urination "in spite of myself." Sense of heat while passing urine. Pain and burning on urination. Urine increased. Urine pale and copious. Urine scanty and dark in color.

Limbs

General weakness of limbs. Pain between shoulders, which extends to axilla and down the arms. Aching in Limbs and general lassitude. Sharp pain in left elbow. Cold hands. Pain in right thumb. Pain in wrists and fingers. Hands, are numb alternately or restless, on awakening. Chilliness in right leg. Left hip and knee pains. Pain in right leg. Cold feet.

Liver

As of a load in back part of the liver.

Lungs

Pain as of a lump under the sternum. Burning under the left scapula.

Male

Seminal emissions. Soreness in perineum. Pain across the perineum. Perineum seems stretched. Pain in right spermatic cord. Testicles drawn up and sore. Pain in meatus while urinating.

PAGE 612

Mouth

Biting tingling on lips. Aphthae, canker. Gums recede and bleed easily. Corners of mouth and lips crack. Tongue dry and swollen, sores, dirty brownish. White coating of tongue with red edges. Promotes the flow of saliva.

Dry sensation in back part of mouth. Burning peppery taste when taking remedy. Bad taste in the mouth in the morning. A metallic taste. Dryness of the mouth.

Nose

Stiffness of nostrils with mucus in sinuses and pharynx. Foul-smelling discharge, membranous formations protruding. Post-nasal catarrh with ulceration and fetor. Nose feels stuffed up. Right nostril raw, bleeding. Nostrils sore. Headache over eyes with sneezing.

Rectum

Blood flows after stools. Gripping pains followed by passing offensive flatus or a loose yellowish stool, which produced great exhaustion. Diarrhea following pain in stomach, going through bowels.

Skin

Recurring boils. Carbuncles. Irritations from insect bites and poisonous plants. Lymphatics enlarged. Old tibial ulcers. Gangrene. Intense itching and burning of skin on neck. Little papules on skin with redness, feeling like nettles. Skin dry. Small red pimples on neck and face.

Sleep

Drowsy, could not read. Drowsy condition with yawning. Dreams of difficulties, laborious or quarrelsome. General languor, sleepy. Sleep disturbed, wakes often. Sleep full of dreams. Dreams about exciting things all night. Dreams of dead relations.

Stomach

Nausea with chilliness. Nausea, better lying down. Sour belching and heartburn. Sour, bloody vomit like coffee grounds. Nausea with eructation of gas. Belching of taste less gas. Sour eructation, which caused burning of throat. Sense of something large and hard in stomach. Pain in stomach, going down through bowels, followed by diarrhea. Dull pain in stomach.

Teeth

Teeth sensitive to draft of air. Darting pains in the teeth, worse on right side. Neuralgic pains in superior and inferior maxilla. Dull aching of the teeth.

Temperature

Irregular, chills, rise of temperature and sweat. Chilliness with nausea. Cold flashes all over back. Chill in left occiput. Sweat on upper parts, on forehead. Malarial Fever. Temperature raised a degree with flushed face and fullness of head, accelerated full pulse. Sweat chiefly on upper part of body.

Throat

Irritation of larynx. Voice husky. Constant clearing of mucus from throat. Sore Throat. Frothy mucus, hawks from throat. Tonsils purple or black, gray exudation extending to posterior sinuses and air-passages. Ulcerated sore throat. Mucus in throat with raw sensation. Soreness of throat, worse on left side.

Tongue

Tongue, lips and fauces tingle with sense of fear about heart. (Acon.) Slight burning of tongue. Whitish coat of tongue with red edges. Tongue, numb, peppery taste.

Vertigo

Vertigo with weakness, dizziness and profound prostration. Vertigo when changing position of head.

Comments

A remarkable case of vaccination poisoning is recorded in a man, 45, cured mainly by Echin. in 20-drop doses. The symptoms were: vitality ebbed, he became so weak he could not sit up, hair fell out, an eruption of psoriasis appeared on limbs extending to body. The disease advanced rapidly, the nails fell off. Left iritis supervened and then keratitis of the right eye.

Under Kali-i. and phospho-albumen as a food, the hair ceased to fall off, but other symptoms became rapidly worse. Echin. was now given and slowly the disease was arrested, then gradual improvement and ultimate cure ensued.

The report does not mention if the sight of the left eye was recovered. Homeopaths have generally followed the eclectics in using substantial doses of the tincture, (5 to 40 drops).

PAGE 613

Fortunately we are now much better placed to understand Echin. thanks to an extensive proving undertaken by J. C. Fahnstock with additional symptoms contributed by T. C. Duncan. With one exception the provers were males.

The first symptom noticed was a biting, tingling sensation on the tongue, lips and fauces, (Acon.) with a sense of fear and pain about the heart. Febrile symptoms, full head, flushed face and accelerated pulse followed. Languor was experienced by many provers and neuralgic, sharp, darting, shifting pains.

Catarrh of the digestive and respiratory tracts. Gripping pains offensive flatus and loose yellowish stool. Drowsiness was a very marked feature.

Echinacea purpurea

(black sampson)

Pharmacy

Echi-p. Echinacea purpurea. Black Sampson. N. O. Composite. Eastern States of America. Tincture of fresh root. Historical dose: Tincture and all potencies.

Herbal

Echinacea purpurea is a popular remedy in the Eastern States, because it has been used in place of Echin. Ang. **Planets:** Mars, Saturn.

Homeopathic

Echinacea purpurea has probably a very similar action and the root causes the same pungent sensation on lips and tongue as the tincture of Echin. Ang. It well deserves a proving. The black root has been taken as a "signature" of the remedy in cases of low fevers where a black tongue was observed.

Clinical

Diphtheria. Putrid fevers.

SOURCES

Clarke.

Elaeis guineensis

Pharmacy

Elae. *Elaeis guineensis*. Aouara. Avoira. N. O. Palme, yields Palm Oil. Triturations of the fruit. Historical dose: Trituration and all potencies.

History

Elaeis guineensis was proved by Mure. Notable symptoms of leprosy and of scleroderma appear in the provings: anesthesia, swelling and hardening of skin. **Planets:** Saturn.

Homeopathic

Elaeis guineensis has produced aching, lancinations, burning, bruised and throbbing pains. Among other symptoms are: sensation as if a peg stuck in false ribs. Swelling of parts. The greatest number of symptoms appeared on the lower limbs and skin.

Clinical

Diarrhea, Elephantiasis arabum. Gastric disorders. Headache. Leprosy. Scleroderma. Sight, defective. Skin disorders. Sore throat.

Modalities

Better from rest. Worse from cold drinks. Worse from descending stairs, (colic). Worse from deep breathing, (lancinations).

Symptoms

MIND

Merry mood. Disobedient.

Abdomen

Colic after a cold drink. Pain with bruised sensation in abdomen.

Chest

Pain in middle of chest as if pricked by needles. Lancinations every five minutes in right chest.

Eyes

Swelling of eyes. Sight weak, confused vision by candle light. He makes letters much too large. Unable to look steadily at an object.

Kidneys

White urine.

Limbs

Swelling of left arm. Beating in left arm. Insensibility of head to fire-heat when approached to fire, but an hour after he feels it badly. Staggering gait. Weakness of legs. Swelling of right leg. Throbbing in calves. Hammering in tibia, nape of neck and right foot. Soreness of soles of feet when walking and when touched.

PAGE 614

Lungs

Breathing embarrassed. Pricking larynx on breathing. Cough with lancination in sides.

Mouth

Burning in tongue, has to stop eating. Bad odor from mouth.

Neck

Constrictive pains round neck as if from tight string. Throbbing in nape.

Rectum

Frequent diarrhea. Black stools.

Skin

Skin seems thicker. Swelling, roughness and itching of skin on left leg. Small vesicles appear on swollen right leg and left arm and on other parts without swelling. Itching all over, preventing sleep.

Stomach

Foul belchings. Vomiting of a cake immediately after eating it.

Throat

Lancinations in throat when swallowing, stinging when swallowing saliva.

Compare

Elaps corallinus

(coral snake)

Pharmacy

Elaps. *Elaps corallinus*. Brazilian Coral Snake. N. O. Elapidae. Poison pressed from the venom-sac of the living snake and triturated with sugar of milk. Historical dose: All potencies, sixth to thirtieth potency.

History

Elaps is distinguished by the pre-eminent blackness of its discharges and hemorrhages. Characteristic symptoms are: Fruit and cold drinks lie like ice on stomach and cause a cold feeling in chest. Sensation as if all the blood were collected in head. Black ear-wax.

E. V. Moffatt has found *Elaps* 6c almost a specific in chronic naso-pharyngeal catarrh with greenish crusts and subjective disagreeable odor.

Homeopathic

Like all other snake poisons, the poison of Coral snake disorganizes the blood, thereby producing black discharges especially hemorrhages. *Elaps* has very marked black discharges.

Cold things disagree. Nausea and vomiting. Desire for sweetened buttermilk. The prostrating diarrhea of tuberculosis. Acidity of stomach with faint feeling.

Sensation of internal coldness in chest, stomach worse after cold drinks. Adynamic sepsis. Spasms, then paralysis. Oscillatory movements. Right-sided paralysis. The right side feels weak insensible or even paralyzed. Must have oscillatory motion. Mucous membranes wrinkled. As of a heavy load or weight on the affected part. Twisting sensation.

Sudden pain in stomach. Spasm of esophagus, pharynx constricted, food and liquids suddenly arrested and then fall heavily into stomach. Spasms followed by paresis. Cold feeling in Stomach. Fruits and ice-water feel very cold. Ear, nose and throat symptoms

important. Sudden deafness at night with roaring and cracking in ear. Dreams of dead persons. Shuddering from least contradiction with pricking.

Clinical

Amaurosis. Axilla, itching. Cancer. Deafness. Ear disorders. Ear, wax. Hemorrhages. Headache. Hemiplegia. Knee, pain in. Metrorrhagia. Naso-pharyngitis. Nosebleed. Nose, stuffed. Ozaena. Pneumonia. Throat, ulcerated. Tuberculosis.

Constitutions

Rheumatic constitutions. **Planets:** Moon.

Modalities

Better from rest. Walking relieves nosebleed, pain in abdomen and chest. Worse eating fruit, cold drinks, food, air, dampness, wet weather. Worse from approach of storms in room touch, warmth of bed. Exertion aggravates. Worse at night. Warmth of the bed aggravates. Great sensitiveness to cold: draft, wind, wet weather aggravates. Touch aggravates.

Symptoms

MIND

Depressed, imagines he hears someone talking, dreads to be left alone. Fear of the rain. Horror of rain. Can speak, but cannot understand speech. Fears having a stroke. Fear, being left alone, causes chattering of the teeth and trembling.

Imagines he hears someone talking, dreads to be left alone. Angry about one's self, does not wish to be spoken to.

PAGE 615

Abdomen

Bowels feel twisted together in a knot. Stools of black frothy blood.

Back

Stiffness in the right side of neck. Lancinations in left side of neck. Lancinations in the whole spinal marrow from occiput to sacrum. Pressure between the shoulders. Coldness in back. Pain in the back with chilliness, cold feet and strangury.

Chest

Coldness in Chest after drinking. Hemorrhage from lungs black as ink and watery. Stitching pain in apex of right lung. Oppression of chest on going upstairs. Peeling off of skin from palms and fingers. Sensation of a sponge in esophagus.

Ears

Cerumen, ear-wax black and hard with difficult hearing or serous greenish discharge offensive. Buzzing noise. Illusions of hearing. Sudden attack of nightly deafness with roaring and crackling in ears, cracking in ears on swallowing. Intolerable itching in ear. Otorrhea offensive, watery with deafness.

Eyes

Aversion to light, *letters run together when reading*. Veil before eyes. Burning in lids. **Bloated around the eyes** in the morning. Large red fiery spots before eyes. Black rings before eyes (left).

Face

Red spots on face. Bloated. Dull yellowish color.

Female

Itching of vulva and vagina. Dysmenorrhea with a flow of black blood. Sensation as if something burst in the womb, then continuous stream of dark colored blood, better when urinating. Discharge of black blood between menses.

Food

Thirst. Desire for sweetened buttermilk.

Head

Rushes of blood to the head. Violent headache, extending from forehead to occiput, first one eye, then the other. Pain in ears. Vertigo with tendency to fall forward. Weight and pain in forehead. Fullness in head.

Kidneys

Urine red. Discharge of mucus from urethra.

Limbs

Arms weak. Arms and hands swollen bluish. Knee joints feel sprained. Pricking under the nails. Skin peeling off on palms and finger tips. Icy cold feet. Vesicular eruptions on feet.

Lungs

Air hunger. Coldness in chest after drinking. Stitches in apex of right lung. Cough with terrible pain through lungs. Worse right lung and expectoration of black blood. The lungs seem forcibly separated. Hemoptysis, black like ink and watery.

Nose

Nostrils stopped up. Chronic nasal catarrh with fetid odor and greenish crusts. Ozaena with a yellowish-green discharge. Mucous membrane wrinkled, nostrils plugged up with dry mucus. Pains from nose to ears on swallowing. Nosebleeds, black like ink after a blow. Pain at root of nose. Eruption about nose.

Skin

Glands and skin of axilla affected, itching with tetter. Tips of fingers peel off. Itching eruption in axilla.

Sleep

Dreams of business. Dreams of dead persons. Bites hand during sleep. Sleeplessness from sharp headache.

Stomach

Feels cold. Drinks and fruits feel like ice in stomach and causes coldness in chest. Sensation as if food turned like corkscrew on swallowing. Acidity after every mouthful.

Temperature

Cold perspiration all over. Skin hot, dry. Typhoid when ulcers have eaten into tissues and black blood is discharged.

Throat

Painful, difficult swallowing for solids and liquids. Paralysis of esophagus. Spasmodic contractions of esophagus and pharynx, food and liquids are suddenly arrested and then fall heavily into the stomach. Sensation of a sponge in esophagus. Thick, very offensive, dry, greenish-yellow crusts upon the posterior pharyngeal wall and extremely foul breath.

Vertigo

Fainting caused by stooping. Vertigo, falls forwards. Faints with vomiting or on stooping.

PAGE 616

Comments

Rumbling in ears as of thunder. Sensation in brain as if shaken. Sensation as if food turned like a corkscrew on swallowing, as if intestines were twisted by a cord and strung together in a knot.

Pains in the lungs (especially right) are very marked: Sensation within chest and at sternum, as if pleura were pulled off and the lungs violently drawn apart. Sensation as if a heavy load, iron bar or weight on parts. Fluids roll audibly into stomach. Periodicity is marked.

The glands and skin of axilla are affected. Clarke cured with Elaps. 200c a very old-standing case of irritating rash in axilla, (right) with recurrent suppuration of axillary glands.

Elaterium

(squirting cucumber)

Pharmacy

Elat. Elaterium officinarum. Squirting Cucumber. Ecballium elaterium. Momordica elaterium. N. O. Cucurbitaceae. Tincture of unripe fruit. Trituration of Elaterinum, Historical dose: Trituration and all potencies, third to thirtieth potency.

Herbal

The "signature" of Elat. is too obvious to be missed: Profuse watery stools, coming out with a gush, which is the main characteristic of the drug is plainly typified in the explosion by means of which the ripe fruit scatters its seeds.

It produces violent vomiting and purging with copious forceful watery, olive green, bilious or frothy evacuations.

Beriberi, also the scurvy disease, has been greatly helped by Elat. according to Cooper. Dull olive green discharges and frothy stools are also characteristic. Many cases of cholera, cholerae and infantile diarrhea are met by Elat., also the jaundice of the new-born with bilious stools.

The property of Elat. to cause draining of the tissues of their watery contents has been used to cause the absorption of dropsical fluids. Minute doses will often effect this.

Gaping and yawning are well marked and when present with fever before the chill or before the chill of cholera, Elat. is indicated. The yawning lasts all through the chill. Elat. promotes the opening of abscesses and boils. Effects of damp weather or standing on damp ground, worse by damp. **Planets:** Moon.

Homeopathic

Elaterium has been used with good effect in scurvy of which gushing diarrhea is a marked symptom. It is a valuable remedy for certain forms of dropsy, especially Beriberi. Much yawning and stretching.

Cholera conditions, urticaria. Infantile diarrhea. Jaundice of the new born with bilious stools, urine staining the diaper. Irresistible desire to wander from home to home. Chilliness with much yawning and stretching. Urticaria better rubbing.

Clinical

Abscesses. Beriberi. Bilious fever. Bladder disorders. Boils. Cholera. Colic. Cramps. Diarrhea. Dropsy. Dysentery. Erysipelas. Intermittent fever. Jaundice. Liver disorders. Measles. Nettle-rash. Neuralgias. Rheumatism. Sciatica. Scurvy. Vomiting. Yawning.

Causations

Effects of damp weather.

Modalities

Worse from damp weather, standing on damp ground.

Symptoms

MIND

Mental disorders coming on as a consequence of suppressed malaria. Irresistible desire to wander from home at night.

PAGE 617

Abdomen

Cutting, griping pains in the bowels. Dull pain in the epigastrium. Abdomen retracted. Feeling of stricture or oppression at the epigastrium. Dull pain in the right of hypochondrium. Rumbling of flatus in the course of the cecum and colon.

Back

Pains in the left sterno-mastoideus muscle, near its insertion into the sternum. Pains under the right shoulder blade. Sticking pains in the lumbar region. Aching pain in the region of the left kidney.

Chest

Sharp pains at the lower part of the sternum, passing through to the spine.

Ears

Sticking pain near the rim of the cartilage of left ear.

Eyes

Sticking, as of a splinter, in the inner canthus of left eye.

Food

Appetite. Loss of appetite.

Head

Confusion of the head, followed by headache. Violent headache with sensation of constriction of the temples and forehead. Dull pain. Pain in the temples.

Kidneys

Increased flow of limpid urine.

Limbs

Pain in limbs, darting into fingers and toes. Sharp pains in fingers and thumbs, knees toes and instep. Gouty pain in great toes. Pain extends down limbs, pain in hip-joints with diarrhea. Arthritic nodules. Shooting, also dull aching pains in the course of left sciatic nerve to the instep and toes.

Mouth

Tongue coated with a dirty-brown fur. Bitter taste in the mouth. Bitter taste, with salivation. Unpleasant smell to the breath.

Nose

Nosebleed.

Rectum

Bleeding of hemorrhoids. Some soreness of the anus. Discharges from the bowels of frothy water, coming out with a gush. Dull olive-green discharges. Stools are watery, copious, forceful. Squirting diarrhea, frothy, olive green with cutting in abdomen.

Sensations

As if a splinter in left eye, as if posterior sinuses and upper part of esophagus were enlarged.

Skin

Smarts, stings and burns. Dropsical. Urticaria from suppressed intermittent. Skin orange color.

Sleep

Incessant gaping. Yawning.

Stomach

Belching of gas. Pain in the pit of the stomach. Nausea and vomiting with great weakness. Gripping pains in bowels. Vomiting a dark brown fluid mixed with food.

Temperature

Chill comes on with much yawning and stretching, lasting all through chill. Chills and fever with spurting diarrhea. Perspiration relieves all the symptoms. If the intermittent fever is suppressed, urticaria break out all over the body.

Throat

Pain in the back of the throat, as if scalded. Scraping in the throat. A feeling as if the choana and upper part of the esophagus were enlarged.

Compare

(1) Crot-t., GAmbr.

(2) Bry. and Coloc. (sciatica), Verat. (neuralgia), Colch., Crot-t., Verat. - choleraic affections, Sec. - olive green diarrhea., Canth. - dysenteric diarrhea with painful urination.

(3) Apis, Hep., Ign., Rhus-t. - urticaria during intermittent fever.

SOURCES

Boericke. Clarke. Phatak.

Electricitas

(electricity)

Pharmacy

Elect. Electricity. Electricitas. Potencies are made from sugar of milk saturated with the current. Historical dose: Tincture and all potencies.

History

The effects of atmospheric electricity and static electricity. Caspari is the authority for the symptoms caused by electricity, but every one knows the powerful effect exercised on some persons by the approach of a thunderstorm and the influence of an electric current.

In those which have been electrified, shaking of the whole body, commencing in the maxillary bones, tingling in the parts electrified, violent burning. **Planets:** Moon.

Homeopathic

General relaxation of the powers, sometimes with moral depression and headache, relaxation to the nerves and muscles. Dreads approach of thunderstorms. Anxiety, nervous tremors, restlessness, palpitations, headaches. Heaviness of limbs, swelling of parts.

Heat in the whole body. Lassitude and stiffness of the limbs. Dragging sensations in all the limbs, as far as the ends of the fingers and toes, nocturnal shootings in parts which are paralyzed. St. Vitus' dance. Epileptic fits hastened and aggravated. Loss of the weight of the body, weakness of the parts shaken.

Clinical

Chorea. Headache. Hysteria. Paralysis. Rheumatism.

Symptoms

MIND

General depression after a meal. Depression and weariness, sometimes with giddiness or with drowsiness. Tears, sometimes with timidity. Sighs, sometimes with tears, the patient cries aloud.

Restlessness, anxiety and anguish, sometimes more particularly in the chest internal anguish, violent agitation, timidity. Fear on the approach of a storm. Ill-humor. Involuntary laughter. Furor. Loss of consciousness insensibility, foolish actions, haggard eyes. Errors in the appreciation of time, loss of memory.

Abdomen

Spasmodic tension and contraction in the abdomen. Aching in the abdomen. Colic. Cutting pains on the approach of a storm or else with diarrhea. Darting pains from left to right side. Shivering in the abdomen or else burning, sometimes with tension. Inflation of the abdomen, borborygmi in the abdomen, sometimes with fermentation.

Back

Difficulty in moving the neck. Tingling in a muscle shortened by suppuration. Darting pains in an enlarged gland of the neck. Tingling in the vertebral column. Furunculi on the

back and nape of the neck. Drawing pains across the shoulder-blades, as by a thread. Burning in the shoulder.

Chest

Constriction of the chest. Pains in the chest, sensation of coldness in the left side. Chest and shoulders feel like marble.

Ears

Pains in the ear. Drawing pains from the jaws to the ears. Lancinations in right ear, proceeding from the neck. Pulsations in the ear. Redness and heat of the ear. Swelling of the interior of the ear. Suppuration and a small pustule in the auditory duct. Vesicles full of acrid serum behind the ear. Augmented secretion of wax. Murmuring, sometimes with a sensation as if a flock of wool were before the ears.

Eyes

Aching in the eyes, as from dryness. Gnawing sensation in left eye or else violent drawing pains, extending to forehead. Sensation as if the eyes were much sunken. Sensation as if something were passing out of the eye. Redness of the vessels of the conjunctiva, as far as the cornea of the edges of left eyelid, at the exterior angle. Inflammation of the eyes. Swelling of edges of eyelids, at the external angle. Lachrymation, especially of right eye. Wandering and haggard looks. Contraction of pupils, which were abnormally dilated. Clouded vision. Everything appears pale. Blindness. Sight improved (curative symptom). Little black spots before right eye. Objects all appear yellow to the sight. A dark room appears to be illuminated.

Face

Color, bright red. Expression of alarm on the face. Increase of sweat on the face. Violent drawing pain above left eyebrow. Contraction of the muscles of the face, especially of the mouth. Swelling of the face. Scabby eruption on the face, on the arms and over the body. Large blisters on the cheeks. Lips cracked, the upper lip puffed out. Eruption about the mouth and on the chin.

Female

Copious menses, sometimes with pressure in the rectum. Blood of the menses, black and thick. Appearance of the menses (in the electric bath).

PAGE 619

Food

Increase of appetite. Great inclination to eat between meals. Thirst during febrile shivering.

Head

Pains in the head, sometimes drawing. Bruise-like pain in occiput. Crushing pressure in forehead, as from a stone. Shootings in right side of head or from vertex to the temple and right side of forehead, tearings in the occiput from the nape of the neck to the forehead. Painful cramps in the head. Disagreeable shaking, most frequently from behind. Violent pulsations (beatings) or else heat throughout the head.

Heart

Palpitations of the heart, sometimes especially at the approach of a storm or else with a disposition to fall in syncope. *Palpitations of the heart with fever or with headache* or else with restlessness and vivid redness of the face. Painful and rapid sharp pain proceeding from the heart across the chest.

Kidneys

Sensations as though the bladder were going to burst. Augmented secretion of urine. Very frequent emission of urine. Involuntary emission of urine. Urine in the morning, an orange-yellow during the day like water in which meat has been washed. Urine thick, deep-colored. Red like blood, abundantly charged with mucus. Discharge of blood with the urine. White sediment. Leucorrhœa, at first serous afterwards thick in pieces of the size of a hazel-nut.

Limbs

Pains in the limbs, grievous pains, pains in old wounds or in enfeebled bodies from a change of temperature. Stiffness of the limbs, paralysis of some of the limbs, especially of the inferior limbs. Trembling of the limbs, chiefly of those which have been shaken, general trembling. Springing up of the tendons. Convulsions of the limbs.

Lungs

Roughness of the larynx. Cough with much tickling in throat or else with pressure in forehead from within outwards. Short irritable cough. Spitting of blood. Feeble and faint respiration. Respiration arrested.

Dyspnea. Respiration accelerated. Asthma, sometimes lasting for life with palpitations of the heart and disposition to syncope, oppression of the chest.

Mouth

Increase of excoriation already existing in the interior of the mouth. Pain of excoriation and excoriation in the interior of right cheek. Great dryness of the mouth. Augmented secretion of saliva. Foam at the mouth. Sensitiveness of the tongue, at the point, which is also red. Papillae very prominent. Dry tongue, charged with a yellow coating. Swelling, thickness of the tongue. Vesicles on the tongue with excoriation pain. Dumbness inability to utter a sound. On the palate, vesicles with desquamation of the epidermis.

Nose

Tingling in the nose or else with pressure outwardly. Nosebleed. Loss of smell. Sneezing. Augmented secretion of nasal mucus. Discharge, on blowing the nose of a liquid like milk, aggravation of preexisting coryza.

Perspiration

Increased perspiration, excessive nocturnal sweat in gouty persons without mitigation, copious sweat during sleep with anxiety during a storm.

Rectum

Fruitless inclination. The stools are at first facilitated and afterwards restricted. Tenesmus and cutting pains. Violent pressure in the rectum (during the stools). Burning in the anus. Hemorrhoidal flux.

Skin

Itching or else tingling over the whole body (violent pains and swelling of one of the feet which had been frozen twelve years before). Eruption of small nodosities on the spots touched by the sparks, eruption like miliary or measles, white vesicles, itch-like eruption at the joints of carbuncles, which proceed to suppuration. The skin becomes black, wheals on the skin.

Sleep

Yawning and stretching, sometimes with shuddering over the whole body. Great drowsiness. Profound sleep. Sleeplessness, sometimes with tossing.

Sleeplessness for two months. Dreams confused and disquieting.

PAGE 620

Stomach

Fullness of the stomach after eating the least thing. Sour taste. **Heart** burn. Abundant accumulation of water in the mouth. Loathing. Nausea, sometimes after a meal

with a more abundant accumulation of saliva. Retching with inflammation of throat and cough. Vomiting and inflammation of the throat. Vomiting of blood.

Stool

Diarrhea with colic or else at the approach of a storm. During the diarrhea, retraction of the testicles. After the diarrhea, constriction in anus with dry stools. Stools frequent and liquid of a black, yellow and of a fetid smell. Diarrhea, sometimes entirely liquid, hot.

Teeth

Tearing pains in upper teeth, proceeding from the head. Pain as of subcutaneous ulceration in places once occupied by molar teeth. Quick dartings in a hollow molar tooth. Quick growth of the teeth in children. Drawings in the gums, proceeding from right ear.

Throat

Constant tickling in the throat. Pressure on swallowing. Difficult deglutition. Inflammation of the gullet.

Vertigo

Giddiness, especially on stooping. Confusion of head. Syncope and tendency to fall down.

Comments

Dr. Seward has related a number of cases in which the injudicious use of electric baths brought on tuberculosis. In another case the chest and arms became stiff and paralyzed. A young married woman, who had general and local (uterine) electric treatment, complained after it of feeling very heavy, as if she weighed a ton.

One patient after a bath, said his chest and shoulders "felt like marble." He became tubercular and died. The paralysis caused by electricity was in several cases quickly relieved by Morph. acet., both in the solution and in the potencies.

Ulmus procera

Elm

(bach flower remedy)

Pharmacy

Elm. *Ulmus procera*. Boil twigs and blossoms for half an hour, strain the water and use as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

Herbal

The remedy Elm belongs to Bach's group of Despondency and Despair, along with the remedies Crab Apple, Oak, Willow, Star of Bethlehem, Sweet Chestnut, Pine and Larch. These remedies deal with states of hardship of the oppressive, burdening kind. **Planets:** Moon.

Homeopathic

Tendency to exhaustion in mind, emotions and body, listlessness and lethargy. Unresolved, overwhelming conflicts and work loads can lead to the formation of chronic diseases. (White Chestnut).

Symptoms

MIND

Elm is also indicated for the mind busy at work on details, while not having an appropriate overview of the various tasks and not being able to plan the best approach to completing the job. One may get lost in details and feel that progress has not really been made. In the Elm state, the mind feels unable to rise above challenges or duties that are being presented or still lie ahead. One actually perceives the task as insurmountable while one feels weak and small in front of it.

Personal high expectations and a strong sense of duty. One views the tasks as one whole mass of overwhelming duty. Instead of concentrating on a step at a time and letting the rest be. "Duty" is another aspect of the Elm state.

PAGE 621

The tasks look somewhat threatening, intimidating, like a burdensome or dreaded duty. One experiences the emotions of being overwhelmed. Feelings of dread, anxiety, intimidation by the amount of duties.

Internal exhaustion and feelings of inadequacy. Dread in the face of enormous tasks. Disillusionment and despondency and despair. There can be feelings of sadness when one realizes that one's goals were unrealistic and not within one's reach.

SOURCES

Bach.

Emetinum

(alkaloid of ipecac)

Pharmacy

Emetin. Emetinum. Emetine is the principal alkaloid of Ipecac. In physiological doses must be carefully watched. Historical dose: Trituration and all potencies.

History

Emetin has been used for amoeboid dysentery. A powerful amoebicide, but is not a bactericide. A remedy in pyorrhea. Psoriasis. Emetin hydroch. 2x for diarrhea with colic pains and nausea. **Planets:** Moon.

Homeopathic

Specific for amebiasis of remarkable value in treatment of amoeboid dysentery. May produce hepatization of lungs, rapid heart action, tendency for the head to fall forward and lobar pneumonia.

Clinical

Amebiasis. Dysentery. Hemetemeses. Hemorrhages. Psoriasis. Pyorrhea.

Compare

(1) In hemetemesis and other hemorrhages, compare: Gelatin, which has a marked effect on the coagulability of the blood. Hypodermically or if by mouth, a 10 per cent. jelly, about 4 oz., three times a day.

SOURCES

Boericke.

Eosinum

(eosin)

Pharmacy

Eos. Eosinum. Eosin. Historical dose: Trituration and all potencies, second decimal, one per cent solution.

History

Proved in potencies by Dr. B.C. Woodbury. Eosin is a remedy for cancer, polyarthritis.
Planets: Saturn.

Homeopathic

Burning in various parts on skin. Shifting location after scratching which relieves.
Burning under finger nails and toe nails, on soles. Itching and redness of knee-caps.
Redness of palms. Redness, burning and numbness of tongue. Peculiar sensation of being very tall with tendency to vertigo.

Clinical

Arthritis. Cancer.

SOURCES

Boericke.

Ephedra vulgaris

Pharmacy

Ephe. Ephedra vulgaris. N. O. Gnetaceae. Tincture of branches and flowers. Ephedra has been proved in Russia by Dr. B. H. Mouravow. Historical dose: Tincture and all potencies.

Herbal

Ephedra produced symptoms when twenty drops of a strong alcoholic extract were taken five times a day, fifteen drops four times a day having been taken without apparent effect.

Planets: Mercury.

Homeopathic

General weakness from early morning great fatigue. Asthma. Extreme apathy was produced. stiff-neck and backward pulling of whole body on turning the head.

There was also starting of the eyes from the orbits as if pushed out. To Mouravow these symptoms suggested exophthalmic goiter. He also considered that the remedy acted on the ganglions of the sympathetic nerve and caused congestion of the spinal cord.

Clinical

Asthma. Exophthalmic goiter. Headache.

Symptoms

MIND

Extreme apathy and fatigue.

Abdomen

Dull pain in region of spleen.

(Cean.)

PAGE 622

Back

Stiffness of neck with exophthalmos. Stiffness of neck and backward pulling of all the body on turning head and a dull pain in region of spleen.

Eyes

Heavy eyes, starting from their orbits, as if pushed out, *pain in the eye*.

Head

Violent headache, nausea, general weakness, with a slow pulse. Left side hemicrania with numbness of entire left arm.

Heart

Abatement of the pulse, increases rapidity of action of heart. Strong heart-beat with weakening of pulse, respiration is accelerated.

Kidneys

From early morning great fatigue, retention of the urine (fourth day).

Limbs

Towards evening heaviness in all the limbs. Numbness of entire left arm with left-side hemicrania.

Sleep

Longing for sleep.

Compare

(1) Ferr., Iod., Lycopus v., Spong..

(2) Thyroid. - exophthalmos.

Epigea repens

(gravel weed)

Pharmacy

Epig. Epigaea repens. Gravel weed. Trailing Arbutus. N. O. Ericaceae. Tincture of fresh leaves. The fresh leaves are pounded to a pulp and macerated in two parts by weight of alcohol, Historical dose: Tincture and all potencies, tincture in 5 drop doses.

Herbal

The Gravel Root has long had some reputation in urinary difficulties and even in calculous disorders. The common appellation of "Gravel Root" shows that the popular belief points in the direction of its use.

Hale mentions Epigaea as having been a popular remedy in kidney stones throughout the United States ever since the settlement. It has been successful in removing dysuria and strangury as well as urinary tenesmus. **Planets:** Venus, Saturn.

Homeopathic

Chronic cystitis with dysuria, tenesmus after urination, mucus, pus and uric acid deposit, gravel, kidney stones. Fine sand in urine of a brown color. Burning in neck of bladder whilst urinating and tenesmus afterward. Pyelitis with incontinence of urine. Croaking noise and rumbling in bowels.

Hale once gave to a patient who had a bloody muco-purulent sediment in the urine with intense dysuria, ten drops of the tincture six times a day. A copious deposit of fine brown sand was observed and all symptoms were relieved.

Clinical

Bladder disorders. Stones, urinary. Cystitis. Dysuria. Gravel. Kidney, stones. Pyelitis. Strangury. Uric acid.

Compare

- (1) Mitch., Chim., Cann-i., Calc. ren., Urt-u., Uric acid.
- (2) Uva, Lyc. Pareira.

Epilobium palustre

(willow herb)

Pharmacy

Epil. Epilobium palustre. Willow herb. Epilobium linears. N. O. Historical dose: Tincture and all potencies.

History

Epil. p. was proved by Dr. J. S. Wright, a tincture of the root being used. **Planets:** Mercury.

Homeopathic

Symptoms of filling up of throat inability to swallow, fever and headache were produced. A boy poisoned with the flowers of Epil. hirsutum had strong epileptiform convulsions in rapid succession.

Clinical

Dysphagia. Fever. Larynx disorders. Ptyalism. Throat, sore.

Comments

Headache. Face red. Ptyalism. In morning, throat commenced filling up, at noon, could not swallow water, larynx sore to pressure, swollen on outside, with hard lumps on both sides of larynx. On an attempt to swallow water it would fly out of my nose. Can swallow liquids. Three loose stools. Urine red.

PAGE 623

Hard chill commenced at 11 a.m. , lasted an hour, high fever came on, with aching all over and severe headache, this lasted all night, could not sleep. Fever and headache passed off, but returned in the afternoon and evening more severe, lasted all night. High fever and headache all the time. Dull and sleepy, but could not sleep, the saliva would choke me.

Epiphegus virginiana

(beech-drop)

Pharmacy

Epiph. Epiphegus virginiana. Beech-drop. Cancer root. Orobanche. N. O. Orobanchaceae. Tincture of whole fresh plant in full flower. Historical dose: Tincture and all potencies, first to thirtieth potency.

History

The use of Epiphegus Virg. is confined to headaches of neurasthenic types, especially in women, brought on or made worse by any unusual exertion, shopping, nervous strain etc.

Grimmer reports: Skin cancers, headache of severe type brought on by exertion, relieved by a good sleep. A striking symptom is the constant desire to spit, saliva viscid. Symptoms travel right to left, worse working in the open air, rising up in bed, better from a good sleep, palpitations with weakness. **Planets:** Mercury.

Homeopathic

Epiphegus is a remedy for sick, neurasthenic and nervous headaches, especially in women, brought on or made worse by exertion, shopping, etc. Sub-involution of the uterus with painful menstruation and congestion. Tongue coated yellow, bitter taste. Drowsy after meals. Loose stools.

Languid feeling. Pressive pain, as if finger tips were pressing into the temples inwards or compressive pain going backwards worse until 4 p.m. then Better with spitting of viscid saliva and nausea. Neurasthenia.

Clinical

Cancer. Diarrhea. Gonorrhoea. Headaches. Palpitations. Salivation.

Causations

Physical or nervous over-strain. Any unusual exertion or excitement, as going on a visit or doing a day's shopping.

Modalities

Better from sleep. Worse from fatigue, nervous of shopping, eyestrain. Worse from working in open air.

Symptoms

MIND

Confusion of mind. Makes wrong letters or words in writing. Fears death from heart palpitations. Fears injury to her health from the drug.

Eyes

Smarting. *Could not read because the words seemed to be blurred.*

Head

Weekly sick headaches. Headaches preceded by hunger. Pressing pain in temples from without inwards, worse left side. viscid salivation, constant inclination to spit. Sick headache coming on when deviating from ordinary pursuits. Headaches from nerve tire caused by mental or physical exhaustion, preceded by hunger.

Heart

Palpitations which makes her feel very weak.

Limbs

Pain in left shoulder. Pain in left knee.

Mouth

Saliva viscid. Almost constant desire to spit. Sticky viscid taste in mouth. Bitter taste.

Rectum

Stool passed with difficulty though feces soft.

Stomach

Nausea.

Teeth

Tartar on teeth.

Compare

(1) Iris, Meli., Sang.

(2) Fagus - beech-nuts - headache and salivation, swelling on mouth, dread of water.

(3) It is allied to the Scrofulariaceae.

(4) Phos. - in better from sleep, Lach., Sulph. and Nat-m. have the opposite, worse from sleep in the most marked degree.

Boericke. Clarke. Grimmer.

Epihysterinum

Pharmacy

Epih. Epihysterinum. A nosode. Historical dose: All potencies.

PAGE 624

History

This is one of Dr. Burnett's nosodes. It was used by him in cases of hemorrhage in a patient suffering from fibrous tumor, possibly with malignant elements. **Planets:** Moon.

Homeopathic

Clarke has found Epih. of great value in controlling uterine hemorrhage, whether connected with fibrous growth or not. He has used it in the 30c and higher potencies, giving one or two doses weekly.

Clinical

Fibroids. Menorrhagia. Tumors. Uterine hemorrhage.

Compare

(1) The cancer nosodes, Carc.

(2) in the fibroid tumors and uterine hemorrhages, like Thlaspi b. p., Fraxin., Hydr. and its alkaloids.

SOURCES

Equisetum hyemale

(horse-tail)

Pharmacy

Equis. Equisetum hyemale. Scouring-rush. Horse-tail herb. N. O. Equisetaceae. A rush growing in damp soil in Europe and America. Tincture of fresh plant chopped and pounded to a pulp. Historical dose: Tincture and all potencies, tincture to sixth potency.

Herbal

A decoction, teaspoonful doses or the tincture in hot water is found useful to allay irritability of urinary tract, kidney stones, dysuria, also for pleuritis effusion and dropsy. Horsetail tea is widely known as a kidney tonic. Equisetum contains silica in appreciable quantity.

According to Grimmer this remedy has cured one case of uterine cancer. Equis. is a deep anti-sycotic and effects the urinary tract forcefully, causing severe cystitis. Equis. relieved loss of control over bladder and rectum in a case of general paralysis. Carcinoma uterus is said to have been cured by it. **Planets:** Venus, Saturn.

Homeopathic

The chief effects of Equisetum are found in the urinary organs. Equis. has severe dull pain which does not lessen after urination, irritation of the bladder, especially in women.

Pain in the Kidneys (especially right) in the bladder and urinary passages. Constant desire to urinate and passes large quantities of clear, light-colored Urine without relief. Frequent urging to urinate.

Aching, full, tender bladder, not better after urinating. Pain in bladder as from distention. Urinary retention and dysuria, especially in women during pregnancy and after confinement. Nocturnal bedwetting of children without causes except habit. Wets bed at night, when he dreams he always sees a crowd of people.

Constant desire to urinate and passes large quantities of clear, light colored Urine without relief. Pricking, burning, cutting pain in urethra while urinating. Cystitis. Dysuria. Dribbling urine in old women with involuntary stool. Much mucus in urine. Pain in sacroiliac joints.

Clinical

Bedwetting. Cystitis. Dropsy. General paralysis. Gleet. Gonorrhea. Gravel. Hematuria. Kidneys, weak. Polyuria. Urine, retention.

Modalities

Better in afternoon from lying down. Better continued motion. Worse right side, movement touch. Worse at close of urination, motion. Worse from pressure or contact. Worse moving, sitting down.

Symptoms

MIND

Very irritable and easily fatigued. (liver yang heperactive, spleen qi deficiency)

or bladder yin/qi deficiency also give irritation and also easy fatigue as it is also vital gate.

Abdomen

Distended feeling. (spleen qi deficiency so dampness accumulation) Dull, heavy pains (damp heat) in either side of lower abdomen and bladder (damp heat goes down to lower jivae) with frequent desire to urinate, (frequent desire due to excess damp and heat) (the desire to urinate, which is constant is not better by urinating. (phlegm heat in bladder) Severe pain (wind heat) in lower abdomen with passage of fetid flatus (wind stomch heat). Sharp pains (wind heat in liver area) on either side of hypogastrium, extending to middle line. (wind heat)

Back

Pains in back especially while sitting, (kidney and spleen qi/blood deficiency or stagnation due to phlegm obstruction) better lying on back (kidney qi deficiency so pressure helps) and walking (phlegm stagnation). Heavy sensation like a lump in right lumbar region. (damp heat or phlegm in right lumbar region)

Severe rheumatic pains in region of sacral-lumbar joint (wind-rheumatic damp-downward direction, heat—severe and outer side direction) and through left hip-joint extending down outer side of left leg, ending in front three inches above knee.

Breasts

Sharp stitch in left breast one inch to left and over nipple.(left is yin side so wind heat dueto liver that is liver heat attacking spleen-left side organ)

PAGE 625

Ears

Dull,(dampness or liver/kidney qi deficiency) transient pain and stiff feeling behind left mastoid.(wind heat) Confused feeling in ears.(wind) Confusion of sounds, confused noises, fearful rumbling.(wind dampness) so overall wind damp heat.

Eyes

Severe pain(liver-right organ heat) in roof of right orbit. Sharp pain(liver heat) in outer angle of right eye.

Face

Face flushed, feeling of heat.(liver heat) As if blood pressed into face.(damp heat) Heat and burning without redness.(damp heat as dampness may be not allowing to become red)

Head

Severe headache with intense pain in upper part of eyes or roof of orbit.(liver/stomach damp heat as stomach may be roof of orbit as it is part of forehead)(Headache with heat of face without redness.(stomach damp heat-face=stomach) Constrictive feeling across forehead.(constriction due to cold in the stomach or stomach qi deficiency) Sticking and darting pains changing locality.(qi stagnation pain changing locality) Constriction of whole scalp, as if drawn tightly over whole skull,(qi stagnation and damp cold as scalp is oily damp area) continual desire to wrinkle up forehead. Skin over frontal bone (stomach that is forehead)very tight with feeling of skin continuing to contract.(damp cold)

Heart

Sharp pain(wind cold) in region of heart worse by inspiration.(kidney yin not receiving inhaled lung qi properly as cold in heart region(deficient heart yang that is deficient heat affecting balance in the middle region with kidney yin cold)

Kidneys

Slight pain in right kidney, then in left, extending down left side of sacrum.(wind cold that is deficient kidney yang and wind) Deep pain in region of right kidney,(vacuity cold-deep pain in right kidney as right is yang so yang deficient area) extending to lower abdomen(damp cold –due to downward direction) with urgent desire to urinate(due to

damp or heat or kidney/bladder qi/yin deficient). Right lumbar region painful.(right lumbar region—kidney yang area painful due to vacuity cold) Profuse urination(damp,heat,qi/yin deficiency) with burning in urethra(kidney yin deficient/liver yang hyper that is vacuity heat due to kidney or yang heat due to liver) and sharp pain at root of penis.(liver heat) Involuntary urination(Kidney vacuity (a.k.a. vacuity cold of the lower origin, Spleen/lung qi vacuity,Liver channel damp heat) Severe, dull pain(damp heat) and feeling of fullness(dampness) in bladder, not relieved by urinating.(phlegm in bladder) Frequent urging(wind heat) with severe pain(heat) at the close of urination. Urgent desire to urinate with prickling and soreness of meatus from contact and pressure.(wind heat) Urine flows only drop by drop.(damp heat or kidney vacuity heat that kidney yin deficiency) Sharp, burning, cutting pain in urethra while urinating.(kidney vacuity heat pain) Pricking in urethra a short distance back from meatus.(wind heat in liver channel) Biting itching(wind heat) in meatus worse scratching.(wind increases) Bedwetting in children(Kidney yang deficiency,kidney yin deficiency,spleen qi weak and sinking,lung qi deficiency,liver channel damp heat) with dreams or night-mares(liver heat) when passing urine.

Obliged to rise several times at night to urinate.(liver channel damp heat) Incontinence in old women,(kidney qi/yin deficiency) also with involuntary stools.(spleen kidney yang deficiency or exuberant heat toxins or central qi fall)Retention and dysuria during pregnancy and after delivery.(kidney qi deficiency dysuria and retention due to vacuity cold) Albuminuria. Urine cloudy.(damp in bladder) Great excess of mucus on standing.(standing affects kidney so kidney doesn't warm spleen so spleen deficiency creates extra dampness) Bedwetting, nocturnal and diurnal.

Limbs

Pain in upper part of shoulders and in region of vertebra prominence.(spleen qi deficiency) worse by least motion or contact.(spleen qi deficient) Pain in right shoulder to middle of upper arm.(spleen/lung channel deficiency) Pain in left shoulder with shivering over body and great heat of head.(spleen deficiency with damp cold and heart heat to shoulder and head) Pain in right hip-joint and near knee-joint.(liver heat/kidney qi deficiency) Knees very weak on least exertion.(kidney yin deficiency) Dull, heavy pain under left patella.(dampness and qi vacuity pain) On awakening, sharp pain inner side of left knee,(cold pain but it is positive cold as it is sharp pain) better after moving about a short time.(excess condition and moving warm the part)

Male

Violent erections in the afternoon.(afternoon liver yang excess) Soreness of testicles and cords,(damp heat in liver channel) worse left.

Rectum

Smarting in anus (damp heat/cold)during and after stool.(kidney qi deficient so after stool problem) Stool with great flatulence.(liver qi stagnation that is liver wind) Stool

with aching in anus and feeling as if rectum would protrude,(spleen qi vacuity) followed by smarting in anus (damp heat/cold)and a feeling as if some feces still remained. (dampness) Sticking-like pains in anus (11 a. m.).(damp heat/cold)

Sleep

Very sleepy, eyelids heavy.(dampness heat in upper burner and eyelids—spleen so dampness) Sleep much disturbed by tiresome dreams of many persons, places and things.(liver heat or heart heat or stomach heat)

Stomach

Excessive hunger, appetite greatly increased throughout the proving.(stomach heat)

Temperature

Creeping chills beginning below and creeping up back.(kidney yang deficiency below and this chill goes up via yang kidney area to cover it fully)

Throat

Sharp sticking in throat.(damp heat or phlegm)

Comments

Pain in the kidneys, especially the right. Pain in the bladder and urinary passages. Pain in bladder as from distention. Constant desire to urinate and passes large quantities of clear, light-colored urine without relief.

Bedwetting. Wets bed at night, when he dreams he always sees a crowd of people. Retention and dysuria, especially in women during pregnancy and after confinement.

Equis. has severe dull pain which does not lessen after urination, irritation of the bladder, especially in women. Linaria has bedwetting with frequent painful urging to urinate, causing the patient to rise at night, (Farrington).

PAGE 626

Compare

(1) Apis, Berb., Hydrang., Ferr-p., Linaria, Chim.

(2) Cann-i., Puls..

(3) Canth. comes closest, there is less bleeding, tenesmus, scalding and fibrinous flakes than with Canth., but more mucus.

Erechthites hieracifolia

(fire-weed)

Pharmacy

Erech. Fire-weed. *Erechthites hieracifolia*. *Senecio hieracifolia*. N. O. Composite. Tincture of whole fresh plant. Historical dose: Tincture and all potencies, tincture, locally for Poison Oak.

Herbal

Belonging to the Composite and closely allied to *Erigeron* and the Groundsel family (*Senecio*), "Fire weed" so called because it grows abundantly in clearings which have been burnt out.

According to Hale, "Oil of Fire weed" is also extracted from *Erigeron* and is said by Alchemists to be identical with turpentine. All three cause active and passive hemorrhages, the former being the primary and the latter the secondary action.

Erech. is indicated in hemorrhages of bright red blood from nose, mouth, bowels, kidneys, uterus and lungs. These are attended with excitement of the circulation. It is also indicated in passive hemorrhages of dark fluid blood. Hale also commends it in gonorrhoea and orchitis. **Planets:** Moon.

Homeopathic

Erechthites has been used empirically in hemorrhages, especially metrorrhagia and as local application in skin affections, herpes, eczema, psoriasis and indolent ulcers. Hemorrhage from any part, especially lungs, always attended by excitement of the circulation. Nosebleed of bright blood. Flashes of heat and coldness. Scanty urine, edema of the limbs.

A short proving has shown an action over the circulatory apparatus, producing flushes of heat which suddenly give way to coldness. Another marked feature is increased appetite and also increased feeling of strength and desire for exercise.

Clinical

Diarrhea. Eczema. Gonorrhoea. Hemorrhages. Herpes. Metrorrhagia. Nausea. Nosebleeds. Psoriasis. Orchitis. Ulcers.

Symptoms

Back

Stitches on middle of back.

Female

Metrorrhagia. Premature and profuse menses.

Head

Giddiness with nausea. Dull frontal headache. Throbbing of temporal arteries with flushes of heat running across the back from one shoulder to the other. The sensation of heat suddenly gives way to that of coldness.

Kidneys

Increased flow of urine. Slight burning at meatus during urination.

Limbs

Cold feeling in back of legs. Legs feel stiff.

Male

Towards morning prolonged erections with dreams of nudity. Gonorrhoea with scanty discharges and great pain. Orchitis from suppressed discharge.

Rectum

Gripping followed by three copious discharges of semi-solid, yellow fecal matter.

Skin

Symptoms like rhus poisoning.

Sleep

Dreams of nudity and shame.

Stomach

Enormous appetite. Feeling in stomach as if it would be dissolved after drinking cold water. Belchings and heart-burn after eating warm bread and coffee (cured).

Throat

Sore throat, legs feel stiff and painful, aching across small of back.

Compare

(1) Rhus-t. Senec., Erigeron, Ham. Mill., Calc., Canth., Terebe., Puls., Clem.

SOURCES

Boericke. Clarke.

Ergotinum

Pharmacy

Ergot. Ergotinum. Ergotin. Alkaloid of *Secale cornutum*. Trituration. Historical dose: Trituration and all potencies, 6x to 9c.

PAGE 627

History

Ergotinum is the total extract of the ergot, *Claviceps Purpurea*, the ergot is the intermediary stage through which this mushroom passes in order to complete its development. *Claviceps Purpurea*, otherwise known as *Secale Cornutum* is widely used in homeopathic medicine. It has its own symptomatology which, however, does not prevent us from seeing the homeopathic usage of Ergotinum in the light of these new indications.

This Ascomycetes Pyrenomycetes is a parasite on the ears of rye, as well as on other grain such as wheat or oats and on other plants such as *Cypetaceae* and palm trees. The toxicity of ergot has been known for a long time, manifested by the medieval epidemics of Saint Anthony's Fire, due to the consumption of contaminated flour. Its oxytocic and abortive powers are also known.

The insoluble polypeptide alkaloids are stimulants of smooth tissues, especially uterine and vascular and affecting the sympathetic system, counteracting the effects of adrenalin. Ergotinine, extract of ergot of rye is used in allopathic medicine, as a constrictor of blood vessels to encourage hemostasis, as in uterine hemorrhages.

Ergotinum acts by causing contraction of the arterioles and its effect is produced most promptly when it is administered by subcutaneous injection. Its homeopathic use are in

the main identical with those of Sec., but Ergotin will sometimes succeed when Sec. fails.
Planets: Moon, Venus.

Homeopathic

Ergotin is best known by its physiological use as a hemostatic in uterine and pulmonary hemorrhages. Ergotinum is primarily a female remedy, for cases with a loss of consciousness. Functional complaints of the female genitalia. Bedwetting.

Certain form of alopecia or allergy. Nervous system disturbed, anxiety, menstrual complaints. Faintness.

Pre-menstrual migraines. Vulvar itching. Alopecia. Urticaria. Nerve attacks with sudden strokes, abrupt clouding of consciousness, both psychological and physical. Bedwetting in both sexes with no anatomical lesion or any urinary infection with an increase in the level of neurosis from anguish.

Clinical

Alopecia. Anal incontinence. Bedwetting. Dysmenorrhea. Faintness. Gangrene. Heart, paralysis. Hemorrhages. Menorrhagia. Miscarriage. Neurological disorders. Pre-menstrual migraines. Sphincters, paralysis. Urticaria.

Symptoms

MIND

Slowing down of mental processes. Attacks of faintness, general ill-defined discomforts, head feeling empty, misty vision, noise in the ears, vertigo, nausea, occasional vomiting. Anxious, hyper-emotive state. Chronic mental depression. Anxiety. Instability of the character. Depressive state, particularly before menstruation. Loss of consciousness.

Breasts

Pre-menstrual swelling of the breasts and abdomen.

Ears

Buzzing intermittent deafness. Buzzing in the ears.

Eyes

Visual complaints, such as mistiness, spots before the eyes, black or glinting spots across the field of vision. Visual complaints with *cloudy vision*, luminous spots, black patches.

Female

Painful menstruation with no clinically discernible lesion. Pre-menstrual syndrome. Painful menses. Dysmenorrhea with red, non clotting blood. Menorrhagia in young virgins from the beginning of menses in the young woman. Hyper functioning of the pituitary and ovaries. Vulvovaginal itching, congestion, redness, dryness of the mucous membranes. Bedwetting.

Head

Diffuse alopecia. Round patches of alopecia. Migraines. Habitual headaches. Headaches, migraines, occurring just before menstruation.

PAGE 628

Skin

Alopecia-type areas. Urticaria. Pruritus. Edema.

Sleep

Insomnia, especially in women.

Vertigo

Faintness.

Comments

Koeck of Munich, has recorded a case in point, Sec. like Phos., has "wide-open anus sensation" in its symptomatology. Koeck's patient had suffered from diarrhea since the Franco-German war and latterly had lost all power of retention. It was for this that the doctor was consulted. The rectum had lost all sensation, so that the patient had no warning and was never clean. The odor may be imagined.

Old school treatment had failed to relieve him. He was about to be pensioned by his employers and had thoughts of suicide. Sec. 3x ameliorated slightly, the 2x had the same result. "Remembering Kafka's advice to use the alkaloid when the indicated drug did not seem to act, he prescribed Ergotin 2x." After taking this for four days the patient regained control.

Demange records the case of a young lady suffering from typhoid fever and threatened with heart paralysis. Stimulating injections of ether and of rum and frictions completely

failed to rally her. Cyanosis increased rapidly and threatened the trunk. Fainting spells occurred in rapid succession, pulse filiform. Ergotin was then injected and the pulse rose and the symptoms of collapse disappeared. Most of the symptoms of this patient may be found under Secale.

Compare

(1) Sec. - Dysmenorrhea with blood clotting and black blood.

(2) Folliculinum - Pre-menstrual syndrome with swelling, headaches, hypermenorrhea.

(3) Thy. - Depressive condition, anxious with hyperthyroid tendency, trembling and pigmentation, especially of the eyelids.

(4) Ign. - Nervous, paradoxical instability, anguish with feeling of constriction in the throat and the epigastrium.

(5) Lil-t. - Complaints in the uterus and ovarian region, heaviness of the lower abdomen.

SOURCES

Boericke. Clarke. Julian.

Erigeron canadense

(fleabane)

Pharmacy

Erig. Erigeron canadensis. Leptilon canadense. Fleabane. N. O. Compositae. Tincture from the fresh plant when in bloom. Historical dose: Tincture and all potencies.

Herbal

The Indians use Erigeron as an application to wounds. It compares as a vulnerary with Arnica. Erigeron is chiefly known as a remedy for hemorrhages and congestions in pretty well all parts of the body. Its characteristic hemorrhages are bright red.

Erigeron has been proved by Burt and others. Wilmot Moore has given it with success in three cases of placenta previa. He gave the 1x trituration (of what part of the plant is not mentioned) on the tongue. **Planets:** Moon, Venus.

Homeopathic

Erigeron has been a hemorrhagic remedy especially when hemorrhages are profuse, bright red, gushing. Persistent hemorrhage from the bladder. Profuse bright-red Blood. Uterus Hemorrhage with painful urination.

Gonorrhoea and gleet have been cured by Erig. Pain in left ovary and hip. Chronic gonorrhoea with burning urination, continual dribbling. Dysentery with soreness and burning in the bladder. Tympanites. Congestions, burning. Hard aching.

The throat and genito-urinary organs are specifically affected. Sensation as if something had lodged in upper part of esophagus. Pains in umbilical region were very prominent. Feeling as if anus had been torn. Urination is painful or suppressed, sharp stinging pains in region of left kidney.

Clinical

Black eye. Bruises. Cough. Dysuria. Gleet. Gonorrhoea. Hematocele. Hemorrhages. Hemorrhoids. Placenta previa. Proctalgia. Spermatorrhea. Wounds.

Modalities

Rainy weather aggravates all symptoms. Worse from exertion. Worse left side. Rest aggravates, every movement aggravates flow, causes bloody lochia to return.

PAGE 629

Symptoms

MIND

Great despondency. Excessive fatigue in morning, all day with great depression, no ambition to move in afternoon and evening.

Abdomen

Abdomen distended. Frequent distress in umbilicus with hard, aching distress in whole dorsal region. Frequent dull pain in umbilical region with a feeling in anus as if it had been torn. Constant dull pain in right umbilicus, twice the pains were severe and cutting.

Back

Dull aching distress in whole dorsal region. Dull pains in lumbar and sacral regions. Severe sticking, stabbing pain in region of left kidney, passing to right kidney.

Bladder

Urination painful or suppressed. Dysuria of teething children, frequent desire, crying when urinating, urine profuse of very strong odor, external parts (female) inflamed or irritated with considerable mucous discharge.

Ears

Loud singing in right ear.

Eyes

Smarting, burning. Ecchymosis around from below. Smarting of eyes, all the afternoon and evening. **Slight agglutination of lids in morning.**

Face

Congested, red face.

Female

Miscarriage, because of exertion. Pregnant women with "weak uterus," a bloody discharge on slight exertion. Metorrhagia with violent irritation of rectum and bladder and prolapse uterus. Metorrhagia after miscarriage with diarrhea or dysentery after least motion. Uterine hemorrhage, bright-red flow, (Phos.) Leucorrhea with urinary irritation. Profuse leucorrhea. Bloody lochia returns after least motion, comes in gushes, between periods, Bleeding hemorrhoids, nosebleed instead of menses, (Bry.)

Head

Congestion of the head, red face, nose-bleed, febrile action. Awakened with dull headache, with aching distress in all the large joints.

Head

Dull frontal headache with smarting in eyes.

Heart

Palpitations.

Kidneys

Persistent hemorrhage from the bladder. Dysuria during dentition, crying when urinating. Aching in bladder. Retention of urine. Bladder, rectal tenesmus with metorrhagia.

Limbs

Aching dullness in all the joints and limbs. Hard aching in all the limbs.

Lungs

Cough, bloody expectoration. Incipient tuberculosis.

Male

Sticky sweat on genitals. Gonorrhoea and gleet. Blue, black spots on genitals. Pain in right lumbar region passing down to testicle.

Mouth

Bad taste in mouth.

Nose

Nosebleed of bright-red blood. Increased secretion of mucus all forenoon.

Nose

Nosebleed.

Rectum

Hemorrhages from the bowels. Anus feels torn. Hemorrhoids. Burning in the bowels and rectum, hard lumps of feces mixed with the discharges. Hemorrhoids, bleeding with a hard, lumpy stools, burning in the margin of anus, it feels as if torn. Rheumatic pains in abdominal muscles.

Skin

Ecchymosis.

Stomach

Burning in stomach and abdomen. Vomit or stool of pure blood. Violent retching and burning in the stomach with vomiting of blood. Belchings of air. Sharp cutting pains in epigastric region every few minutes followed by dull pains.

Stools

Stools small, streaked with blood. Mushy stools.

Throat

Increased secretion of mucus in nostrils all forenoon with a feeling of roughness of pharynx and sensation as if something had lodged in the upper part of the esophagus that caused frequent inclination to swallow. Rough feeling in pharynx in morning.

Eriodictyon californicum

(yerba santa)

Pharmacy

Erio. Eriodyct. californicum. Eriodyction glutinosum. Yerba santa. N. O.
Hydrophyllaceae. Tincture of whole plant. Historical dose: Tincture and all potencies, tincture in doses of 2 to 20 drops.

Herbal

Allen says "Eriodyction has a strong terebinthine taste and abounds in a resinous matter which sometimes exudes so copiously that in drying, the specimens stick firmly together and to the paper." Yerba Santa the holy plant is a popular expectorant remedy in Mexico and California. Asthma that is relieved by expectoration.

J. Perry Seward gave it with great success in two cases of cough remaining after influenza. G. M. Payne's proving brought out marked preference for the right lung. Foul mouth in the morning on rising. **Planets:** Mercury.

Homeopathic

Eriodyction is a remedy for asthmatic and bronchial disorders. It has been chiefly used in tubercular conditions, especially the bronchial tuberculosis with night-sweats and

emaciation. Tuberculosis as the result of frequent bronchial catarrhs. Wasting, night-sweats intolerance of food.

Asthmatic breathing with accumulation of mucus, the asthma being relieved when the mucus is cleared. Coryza and catarrh. Coughs after influenza. Whooping cough. Furthers absorption of effusion in pleural cavity. Appetite poor and impaired digestion.

Clinical

Asthma. Bronchitis. Catarrh. Influenza. Tuberculosis.

Modalities

Worse in afternoon. Nausea, worse on running. Symptoms come at intervals or on any sudden changes of position.

Ears

Pain in ears. Sharp pain in right ear at intervals or on suddenly changing position of head to right or left. Shooting pains after changing to just below external ear.

Head

Pressure outwards, worse occiput. Aching at base of cranium, 8 a. m. Sensation of pressure outwards on all sides of head, greatest at cerebellum upwards. Intense, dull, heavy pain in back of head and over eyes. Burning in occiput, heavy pain as if occiput was being pressed out.

Lungs

Wheezing. Asthma, coryza and mucous secretions. Chronic bronchitis, bronchial tuberculosis with profuse, easily raised bronchial secretion, giving relief. Wheezing voice, at 5 p.m. Dull pain in right lung, front.

Male

Sore, dragging in testicle, could not bear any pressure, better gentle support. Sore, dragging, tender feeling of testicles, worse left, Dreaded to move because of its tenderness. Slight fluttering at intervals at bottom of testicles.

Mouth

Foul mouth in morning. Burning in fauces.

Nose

Coryza with dizziness and sneezing. Catarrh, yellowish-green.

Stomach

Great appetite. Deathly sickness, worse by running.

Temperature

Slight fever, cheeks flushed and burning.

Throat

Burning sensation in fauces and throat.

Vertigo

Dizziness and a sense of intoxication.

Erodium cicutarium

(hemlock stork's bill)

Pharmacy

Erod. Erodium cicutarium. Hemlock Stork's Bill. N. O. Geraniaceae. Tincture of fresh plant. Historical dose: Tincture and all potencies. Decoction of half ounce of the herb to six ounces of water.

PAGE 631

History

Erodium is a popular hemostatic remedy in Russia and is especially used for metrorrhagia and menorrhagia. **Planets:** Moon.

Homeopathic

Komorowitch cured with it numbers of cases in which Ergot. and Hydrastis had failed. One was a case of cervical polyps. After three day's use of the decoction the polyps was found lying free in the vagina. Uterine hemorrhage with polyps, has controlled hemorrhage after Secale failed.

Clinical

Hemorrhages. Uterine polyps.

Compare

(1) Ger.

Eryngium aquaticum

(button snake-root)

Pharmacy

Ery-a. Eryngium aquaticum. Button Snake-root. N. O. Umbelliferae. Tincture of fresh root. Historical dose: Tincture and all potencies, tincture to third potency.

Herbal

Eryngium is a remedy for urinary disorders. The English Eryngo the E. maritimum is noted as an aphrodisiac and is very similar in appearance to the Eryngium aquaticum.

Ery-a. has a cough with a sense of constriction. Hale found it useful in epidemic influenza when there was raw smarting burning in throat and larynx with constant irritating cough and expectoration of yellow mucus. Loss of energy and nervous weakness. **Planets:** Venus.

Homeopathic

Eryngium acts on the mucous membranes, producing thick yellow mucous discharges from eyes, ears, nose, mouth, bowels, urethra and vagina. Hemorrhages from stomach and bowels. It is a vulnerary, antidoting the effect of blows. It causes headaches, expanding sensation in forehead, dull, dragging pain in occiput, neck and shoulders.

Seminal and prostate weakness. For spermatorrhea properly so called or emission of semen without erections.

Thick, yellow mucous discharges. Influenza. Sweat odor, like urine in evening. Strangury with nervous weakness.

Clinical

Anus, prolapse. Conjunctivitis. Constipation. Cough. Diarrhea. Dropsy. Gleet. Gonorrhoea. Hemorrhoids. Influenza. Laryngitis. Leucorrhoea. Kidney colic. Sclerotitis. Sexual weakness. Strabismus. Spermatorrhea. Urine incontinence. Wounds.

Modalities

Better from heat. Most symptoms occur on left side and extend or move from part to part. Motion aggravates all symptoms. Bending head forward aggravates head symptoms. Turning eyes causes pain in them. Worse from mental exertion.

Symptoms

MIND

Thoughts are confused, cannot concentrate them on any subject, the effort causes heavy full pain if persisted in.

Abdomen

Severe colicky or cramping pains in small intestines. Severe pain in left groin and testicle.

Ears

Bruised tearing pain, as if ears being torn off. Inflammation of Eustachian tube, left ear swollen in and out, tender to pressure, constant aching, bleeding readily, thick white, bloody, foul-smelling pus. Continued singing and ringing with creaking sound in left ear.

Eyes

Burning, sensitive to light. Effects of exposure to strong light: squinting, sclerotitis, watery or, purulent discharges. Purulent inflammation of left eye, purulent, sticking discharge causing gumming of lids, conjunctiva granular and rough. Muscles of eyes feel stiff, pain on moving them quickly.

Female

Leucorrhoea.

Head

Sharp, shooting pain over left eye, when sitting in stooping posture leaves eye, passes into neck and along muscles of shoulder and beneath scapula., shooting in coronary region and in right side of face from eyes to teeth in morning. Dull dragging pain in occiput, neck and shoulders, when less severe in head is worse in shoulder. Scalp sore, combing hair causes pain.

PAGE 632

Kidneys

Tenesmus of bladder and urethra. Difficult and frequent urination. Pain behind pubes. Spasmodic stricture. Kidney pain, colic, (Berb., Pareira, Calc.) Congestion of kidneys with dull pain in back, running down the ureters and limbs. Irritable bladder from enlarged prostate gland or from pressure of uterus. Frequent desire to urinate, stinging burning pain in urethra, behind glans during urination. Must urinate every five minutes, urine dropping away all the time and burning like fire.

Lungs

Short, hacking cough. Cough with sensation of constriction in throat. Oppression of chest, feeling of fullness inability to take a long breath. Cough with sense of constriction. Smarting in throat and larynx.

Male

Discharge of prostatic fluid from slight causes. Seminal emissions without erections with lassitude. (Dios., Phos-ac) Desire suppressed, then excited with lewd dreams and pollutions. Emissions without erections, day and night, followed by great lassitude after injury to testicles. Gonorrhoea with painful erections. Gleet.

Mouth

Thick, tenacious, disagreeable mucus in mouth.

Nose

Profuse thick yellow mucous discharge.

Stomach

Partial anorexia. Nausea followed by acrid belchings. Hollowness or emptiness in stomach with heavy dragging pain. Spitting of bright arterial blood, mixed with black clots with burning in epigastrium after a blow on the stomach. Burning in stomach or esophagus after taking the drug.

Stool

Mucous diarrhea of children. Constipation. Stools dark leaden color, dry and very hard, tenesmus at stool with a sensation of cutting as they pass through anus. Hemorrhoids and prolapsed anus.

Throat

Chronic laryngitis. Smarting raw pain along left side of throat, dry tongue. Intense redness, slight swelling without pain, profuse secretion of thick whitish mucus.

Vertigo

Vertigo with an expanding sensation in frontal region above eyes, worse stooping, causing dimness of sight.

Comments

The *Eryngium aquaticum* has two remarkable cures, reported by Dr. Parks.

(1) A married man injured his testicles by jumping upon a horse, this was followed by discharge of what considered semen for fifteen years during which time he was treated by allopaths and homeopaths. Dr. Parks exhibited a number of the usual remedies without permanent benefit.

He then gave a half grain dose, three times a day of the third decimal trituration of the '*Eryngium aquaticum*.' In five days the emissions were entirely suppressed and have not returned to this time (over two years ago). The emissions were without erections day or night and followed by great lassitude.

(2) A married man, not conscious of having sustained any injury, was troubled for eight to ten years with emissions at night with erections The semen also passed by day with urine. The loss of semen was followed by great lassitude and depression, continuing from twelve to forty-eight hours. There was also partial impotence. He had been treated allopathically.

Dr. Parks gave him Phos. acid for two weeks without material benefit. He then exhibited the *Eryngium aquaticum*, as above with the like excellent and prompt result.

J. Whitfield has cured three cases of kidney colic with stones, (two left side, the other not stated) with Ery-a.

W. K. Leonard reports the following case: A young Methodist minister, apparently healthy, was just over his twelfth attack of kidney colic. The attacks has recurred at intervals of two to four weeks and lasted from one to three days and they were so weakening as to keep him incapacitated in the intervals.

He had old-school treatment including Morphine and Quinine with no benefit. Ery-a. tincture, five drops three times a day, put an end to the trouble.

PAGE 633

The attacks had been attended with severe nervous chills and it was for these that the Quinine had been prescribed.

Boericke. Clarke.

Eryngium maritimum

(sea holly)

Pharmacy

Ery-m. Sea Holly. *Eryngium maritimum*. N. O. Umbelliferae. Tincture of whole plant including root. Historical dose: Tincture and all potencies.

Herbal

The maritime *Eryngium* is a beautiful plant growing on sand-hills by the sea with holly-like leaves of a pale blue color with metallic luster in general appearance much more resembling a thistle than an Umbelliferae.

Eryngium maritimum has been proved by one prover only, E. B. Ivatts, but the symptoms show considerable resemblance to those of Ery-a. **Planets:** Venus.

Homeopathic

Ery-m. has pains in the eyes, groins, larynx, nape of neck, sinking at epigastrium and weakness of the male sexual organs appear in both. But the Ery-m. has its symptoms more prominently on the right side. Circulation deadened or as if stagnated, still great determination of blood to surface.

Clinical

Cough. Debility. Fever. Herpes. Sexual weakness. Skin eruption.

Symptoms

MIND

Light and unusually cheerful, on awaking in the morning feeling so merry commences to sing in bed (usually heavy and drowsy).

Abdomen

All viscera seemed prostrated and as heavy as lead. Dull continuous pain in bowels. Pain in one spot in right groin.

Back

Pain at nape compelling the support of head on hand or against something. Occasional shooting pains under left scapula.

Eyes

Pain at back of right eye, left eye feeling weak. **Inclination to close eyes to shut out moving objects.**

Fever

Chills commencing at nape, going down shoulders and back. Chills predominate, little fever heat

Limbs

Veins of hands at back appear contracted and depressed so as to be hardly visible, though generally full and prominent. Sore pain in muscles inside right thigh just above knee.

Lungs

Occasional stomach cough during the day, sending a spasmodic pain to the head.
Occasional darting pains through lungs to back.

Male

Insensibility of corona glandis, absence of desire (secondary action), power of erection quite gone.

Skin

Patch of eruption half the size of palm of hand came out in cluster where pain had been the day previous like fine pin-heads, points feeling rough to fingers, died away next day leaving red areola.

Stomach

Loss of appetite. Sinking feeling at pit of stomach.

Throat

Voice low, larynx feels weak. Great dryness of throat, larynx and lips.

Urine

Increased flow of urine, very red, thick on standing.

Compare

(1) Phel., Con. and other Umbelliferae.

SOURCES

Boericke. Clarke.

Erythrinus

(red mullet fish)

Pharmacy

Eryth. Erythrinus. A kind of Red Mullet. South America. N. O. Erythrininae. Tincture of the fish. Historical dose: Tincture and all potencies.

History

Dr. Burnett is the authority for this medicine. He bases his use of it on an account of its effects on some sailors who ate the fish. They came out with a peculiar red rash which became chronic and which the doctors took for a form of syphilis. **Planets:** Mercury.

PAGE 634

Homeopathic

Dr. Burnett cured with it a case of pityriasis rubra appearing in a large patch on the chest and benefited other cases. He believes this form of skin affection to be a manifestation of syphilis in the second generation, the father of the patient he cured having had syphilis.

Clinical

Pityriasis rubra. Syphilis.

Relations

Aurum muriaticum is the complementary remedy.

SOURCES

Clarke.

Eschscholtzia californica

(california poppy)

Pharmacy

Esch. California Poppy. Eschscholtzia californica. Historical dose: Tincture and all potencies.

Herbal

A soporic herbal remedy which is harmless, (*Avena sativa*). Experiments showed it to act like morphine. This remedy has been used as a nerve sedative to help induce a peaceful sleep. **Planets:** Moon.

Homeopathic

Eschscholtzia causes general weakness torpor, accelerated respiration, complete paralysis of the limbs. Slowing of the circulation. Nervous and restless. Insomnia due to anxiety and worry.

Clinical

Insomnia. Paralysis.

SOURCES

Boericke.

Eserinum

(eserinum)

Pharmacy

Esin. Eserine. Eserinum Physostigminum. Physostigmine. The alkaloid of Physostigma venenosum, Calabar Bean. Trituration or solution. Historical dose: Trituration and all potencies, 6x.

History

Eserine is best known as used by oculists to procure contraction of the pupils in glaucoma. Eserine is the alkaloid of Physostigma, it slows action of heart and increases arterial tension.

Eserine contracts the pupils dilated by Atropine, but not those dilated by Gelsemium.

Planets: Sun.

Homeopathic

Eserine has ciliary spasm and spasmodic astigmatism due to irregular action of ciliary muscles. Blepharo-spasms with pupils contracted. Twitching of lids, soreness of eyeballs. Blurring of vision after using Eyes. Pains around eyes and head.

Clinical

Blepharospasm. Ciliary spasm. Glaucoma. Headache. Pupil, contracted. Salivation. Sweat, excessive.

Symptoms

Eyes

Contraction of pupils. Spasm of accommodation. Ciliary spasm. Pain and irritation of eyes on continued reading. Blepharospasm. Used locally to contract the pupil.

Face

Pale color.

Head

Violent headache with repeated vomiting.

Heart

After repeated vomiting signs of cardiac weakness increased. Pulse small and thready.

Mouth

Saliva, first increased, later arrested.

Perspiration

Face and upper part of the body covered with profuse perspiration.

Stomach

Vomited profusely and complained of headache. Repeated vomiting with signs of cardiac weakness.

Comments

A remark of Mittendorf that "spasm of the accommodation is also produced artificially by Eserine." led R. B. Leach to prescribe successfully the 6x trituration in cases of ciliary spasm and of astigmatism due to irregular action of the ciliary muscles. Eserine has also produced blepharospasm.

A solution of one grain to the drachm (mixed in mistake for a grain to the ounce) was instilled into the eye of a lady of 60 suffering from cataract. Sweating and lachrymation followed and, as these passed off in a quarter of an hour "clonic spasm of the eyelids" set in, "the upper lid falling down on the lower every few seconds."

Spasmodic feeling in lips and the same sensation under jaw of left side followed. Feeling of tremor and spasm without retinal movement, followed in an hour. Pupils contracted to small point.

PAGE 635

Compare

(1) Phys., Jab., Opium.

SOURCES

Boericke. Clarke.

Aether

(etherum)

Pharmacy

Ether. Ether. Aether. Ethyl oxide. Ethylic Ether, sometimes called Sulfuric Ether. Historical dose: All potencies.

History

Ether is the well-known anesthetic and the effects are those observed in patients under the action of its vapor, administered for the purpose of operation in habitual ether drinkers (of whom there are numbers in Ireland) and on some who have voluntarily experimented with the drug upon themselves.

Ether is closely allied to alcohol, it possesses very similar intoxicating properties, produces visions frequently pleasurable, hallucination and in some instances, a persistent maniacal condition.

Macerator reports the cure of a woman of 60, who had been confined to bed for weeks with severe neuralgia of the head, raised welts on the scalp like ridges accompanying the pain. Ether 200c cured quickly. **Planets:** Moon.

Homeopathic

Ether has convulsions, spasms and a cataleptic state. Bronchitis is a common after result of ether anesthesia and for this Belladonna has been observed to be the best antidote. Chilliness is complained of by many.

Clinical

Bronchitis. Catalepsy. Convulsions. Cough. Delirium tremens. Hiccough. Mania. Meningitis. Nausea. Vomiting.

Symptoms

MIND

Exhilaration, furious excitement, flushed face. Pleasant dreams of rapid flight through the air, gorgeous visions and unearthly music. Frightful dreams, fancied he heard the ringing of his own funeral bell. Low-spirited, fearful of some disease, desponding. Loss of consciousness.

Chest

Extreme coldness of the chest, wants it covered. Tightness, irritation and pain.

Ears

Sounds indistinct, seem far off, yet resound violently in the ears.

Eyes

Eyes suffused, lids closed, conjunctive injected. Pupils dilated. *Dim vision as if mist or thin cloud before eyes.*

Face

Face flushed.

Head

Meningitis. Temporal arteries enlarged, beat violently. Head drops to one side or is thrown back. Severe neuralgia of head with raised welts on scalp.

Heart

Excitement and invigoration of heart's action. Pulse full and bounding.

Limbs

Paralysis of lower limbs.

Lungs

Violent cough from stinging or heat in bronchia. Expectoration of blood. Breathing is quickened, stertorous. Congestion of lungs and brain.

Mouth

Mouth often open. Salivation, slight frothing at mouth. Pronunciation difficult and indistinct.

Stomach

Hiccough persistent. Nausea. Vomiting.

Vertigo

Dizziness, headache with partial blindness follow ether anesthesia.

SOURCES

Boericke. Clarke.

Eucalyptus globulus

(blue gum-tree)

Pharmacy

Eucal. Eucalyptus globulus. Blue Gum-tree. Fever-tree. N. O. Myrtaceae. Tincture of fresh leaves. Essential oil, Eucalyptol. Historical dose: Tincture and all potencies, tincture in one to 20 drop doses and lower potencies. Also, Oil of Eucalyptus in five-drop doses.

Herbal

Eucalyptus the gum-tree is a native of Australia. It was transplanted to marshy districts in mild climates on account of its capability of absorbing water and its alleged power of destroying malarial poisons. Eucal. has been familiar to everybody during the influenza epidemic as a prophylactic and disinfectant.

PAGE 636

Eucalyptus is a powerful anti-septic and disinfectant. The volatile oil possesses in common with other terpenes, the property of converting water in presence of air and

sunlight into hydrogen peroxide or to convert oxygen into ozone. This is the explanation usually given of its deodorizing and anti-septic properties. (Merrel.)

Used locally in catarrhal affections, especially when of a suppurating or putrid nature.

Planets: Moon, Mercury.

Homeopathic

Eucalyptus affects the mucous membranes, producing profuse catarrhal discharges, which are acrid and foul with aching, stiffness and weariness as from taking cold.

A remedy with marked effects on catarrhal processes, malaria and intestinal disturbance. Fevers of a relapsing character. Atonic dyspepsia, gastric and intestinal catarrh.

Eucalyptus produces remarkable bodily exhaustion, no desire for any motion, unable to do any real mental work, study, etc. Produces diuresis and increase of urea.

Hemorrhages internally and locally, (Ham.) Typhoid. Exhausted with toxemia and hemorrhage. A gastro-intestinal irritant with pain in stomach and upper intestines several hours after eating. Malaria. Sticking jerking pains at night. Rheumatism.

Influenza, it is said to be a preventive for influenza. Eucalyptus causes most of the ordinary influenza symptoms. It is therefore homeopathic to the disorder. It produces coryza, headache of a dull, congestive character, sore-throat.

Indigestion with excessive development of fetid gas and fever. Slow digestion is the characteristic. The fever may be of the relapsing or intermittent type. It has also proved useful in convalescence from intermittents. It produces odorous sweat.

Clinical

Aneurysm. Aortitis. Asthma. Bladder disorders. Bronchitis. Diarrhea. Dysentery. Dyspepsia. Dysuria. Fistulae. Gonorrhoea. Gout. Intermittent fever.

Kidney, disease. Quinine cachexia. Rheumatism. Spleen, affection. Strychnine poisoning. Syphilis. Tumor. Typhoid. Urethra, stricture. Urethral caruncle. Varicose ulcers. Worms.

Modalities

Worse periodically, night.

Symptoms

MIND

Mental exhilaration. Desire for exercise. Desire to move about.

Abdomen

Burning in epigastrium and umbilical regions. Sharp aching in the hypogastrium, worse after dinner. Gastrointestinal derangements with sleeplessness and restlessness. Condition of mucous membrane favoring worms. Flatulent distention.

Breasts

Swellings in different parts of body, one below nipple in right side, size of filbert with stabbing, darting pains.

Ears

Tinnitus.

Eyes

Eyes hot, burning, smarting, catarrhal and gonorrhoeal ophthalmia. Lids heavy.

Face

Flushed, congested face.

Female

Leucorrhoea, acrid, fetid. Ulcer around orifice of urethra. Vascular tumors of urethra.

Food

Increased appetite tormenting thirst.

Head

Dull and congestive headache. Migraine.

Heart

Painful palpitations. Palpitation of heart. Sudden flushing of face with much flatulence in women at menopause. Strong beating of abdominal aorta. Aneurysms pressing on vagus nerve.

Kidneys

Diuresis. Acute nephritis complication influenza. Hematuria. Suppurative inflammation of kidneys. Urethral caruncle. Urine contains pus and is deficient in urea. Burning and tenesmus. Bladder feels loss of expulsive force. Catarrh of Bladder. Spasmodic stricture, gonorrhoea. Urine has the odor of violets.

Limbs

Rheumatic pains, worse at night, walking or carrying anything. Stiff, weary sensation. Pricking sensation, followed by painful aching. Nodular swellings over metacarpal and metatarsal joints.

PAGE 637

Lungs

Moist asthma. Asthma with great dyspnea and palpitations. Breathing is quickened. Bronchial asthma. Bronchitis in elderly, feeble persons. Bronchorrhea. (Bals. Peru.) Fetid form of bronchitis, bronchial dilatation and emphysema. Irritative cough. Coughs of influenza. Profuse expectoration of offensive muco-pus. Expectoration is white, thick with frothy mucus. Whooping cough in rickety children.

Male

Increased sexual appetite. Sub-acute and chronic gonorrhoea. Recent chancres.

Mouth

Tongue pasty. Aphthae, mouth burns, feels full. Relaxed aphthous condition. Excessive secretion of saliva. Slightly burning taste extending into throat and esophagus with thirst.

Nose

Coryza, sore throat. Stuffed-up sensation, thin, watery coryza, nose does not stop running, tightness across bridge. Chronic catarrhal, purulent and fetid discharge. Ethmoid and frontal sinus involved. Tension across the nose.

Rectum

Acute diarrhoea, stools thin, watery, preceded by sharp pains. Aching pains in bowels with feeling of impending diarrhoea. Dysentery with rectal heat, tenesmus, hemorrhage.

Diarrhea, stools thin, watery, preceded by sharp pains. Typhoid diarrhea. As of a weight in bowels. Chronic diarrhea, mucous and bloody. Fetor of stools and flatus.

Sensations

Burning pains and sensations predominate, pricking, stabbing, sharp aching are common.

Skin

Glandular enlargements and nodular swelling over joints. Foul and indolent ulcers. Herpetic eruptions.

Stomach

Slow digestion. Much fetid gas. Beating and emptiness with pulsation in epigastric arteries. Spleen hard and contracted. Pain in epigastrium and upper abdomen ameliorated by food. Throbbing in stomach. Nausea and vomiting with chill. Malignant disease of stomach with vomiting of blood and sour fluid. Cancer.

Temperature

Fever with aching. Chill then nausea and vomiting. Continued and typhoid fevers. Scarlet fever (protective and curative). Vertigo in all stages of malarial fever. Discharges show a tendency to foulness, high temperature, accelerated but not strong pulse. Use the tincture.

Throat

Aphthous condition of mouth and throat with burning. Excessive secretions of saliva. Burns, feels full. Constant sensation of phlegm in throat. Enlarged, ulcerated tonsils and inflamed throat. (Use the tincture locally as a gargle.)

Vertigo

Vertigo during all stages of fever.

Comments

C. E. Fischer has cured with it many cases of dysentery. Certain vascular conditions come within its sphere: a distinct beating in stomach region, accompanying a sense of emptiness, one prover referred this to the abdominal aorta.

Vascular tumors of the female urethra have been cured by it, also glandular enlargements and nodular swellings over joints. It has cured a tumor, the size of a filbert with stabbing pains below left nipple. Eucal. has been largely used for bronchitis and bronchial asthma.

Dr. Arthur Dalzell relates two striking cases of bronchial asthma promptly relieved with five-drop doses of Oil of Eucalyptus given in a tablespoonful of water. The dose was given last thing at night. It also relieved the dyspnea in a case of mitral insufficiency. Periodicity is marked. Most pains occur at night. It has an intoxicating effect and produces desire for exercise.

Compare

(1) Eucalyptus tereticornis - menstrual cough and prostration.

(2) Eucalyptol - depresses temperature of healthy body more than Quinine, acts on kidneys like Ter., Anac., Hydr., Kali-s. Eucalyptus neutralizes ill effects of Stry.

(3) Angophora, Red Gum - dysentery, pains, tenesmus, better lying flat on face, obstinate constipation. Eucalyptus rostrata, Kino.

SOURCES

Boericke. Clarke.

PAGE 638

Eugenia jambos

(rose-apple)

Pharmacy

Eug. Eugenia jambosa. Jambosa vulgaris. Rose-apple. Eugenia vulgaris. Malabar Plum-tree. N. O. Myrtaceae. A tree native to the tropics, never without flower or fruit. Tincture of fresh seeds. Historical dose: Tincture and all potencies.

History

Eugenia like the Eucalyptus, produces a state of intoxication similar to alcohol. Eugenia makes the prover very talkative but indolent. **Planets:** Moon.

Homeopathic

Excitement soon changing to depression. Nausea, better from smoking. Acne rosacea. Acne, simple and indurated. Comedones. The pimples are painful for some distance around. Sufferings occur especially in the evening and at night. An old wound from a thrust became painful again. Rheumatic pain wanders from place to place with catarrh.

The most characteristic symptom of the proving is better after urination. Sudden great change in him after urination. Everything seems more beautiful and bright, sky and trees more joyous and clear, but after a quarter of an hour everything became gloomy again.

Clinical

Acne rosacea. Catarrhal fever. Catarrhs. Comedones. Constipation. Coryza. Cough. Diarrhea. Diplopia. Hernia. Hiccough. Impotence. Influenza. Otitis. Pimples. Throat, sore.

Symptoms

Abdomen

Drawing about navel. Inguinal hernia from a fall.

Eyes

Eyes look sleepy and drunken. Lachrymation with burning and gnawing pains. Burning pain in the eyes in the afternoon. Hot lachrymation. Suddenly biting in the eyes as from pepper. *Needle-like stitches in inner canthus right eye. Whirling* before right eye.

Face

Pimples on the face with painful sensibility of their circumferences.

Food

Appetite increased. Agreeable taste of tobacco, when smoking of food and of drink. Great thirst. Great desire to smoke tobacco, (Calad., Daph.)

Head

Headache as if a board were lying on right side. Talkative.

Kidneys

Deep-colored urine. After making water, shuddering or sudden increase of brightness and of light before the eyes.

Limbs

Nightly cramps in soles of feet. (Calc., Cupr., Zing) Fissures between toes. Skin recedes from the nails, forming pus. Hot hands. Cramp-like and paralytic pains in the tibia and in the heels.

Lungs

Moist cough without expectoration in the evening and at night. Expectoration of yellowish bloody mucus.

Male

Impotence. Emission of semen too slow or entirely wanting during sex. After sex, perspiration and thirst.

Mouth

Abundant accumulation of frothy and viscid saliva in the mouth, especially before a meal and when talking.

Rectum

Loose evacuation, followed by vomiting. Scanty evacuation of stool, the consistence of pap and sandy. Urging to stool and colic. Evacuations scanty, spurting and fetid with burning pain in the abdomen. Constipation. Scanty, hard stool after much pressing, followed by spasmodic closure of anus. Tenesmus.

Sensations

Headache as if a heavy board were lying on right side. As of cramp in orifice of stomach, as if a ten-pound weight were hanging on rectum and as if everything below would fall out.

Skin

Acne rosacea. Acne, simple and indurated. Comedones. Skin cracks about toes. Desquamation and suppuration of the skin round the nail of the thumb.

Sleep

Profound stupefying sleep, even at noon with confused dreams.

Stomach

Cramp in orifice of stomach, causing nausea. Nausea rising up from end of esophagus. Flatulence rumbling in bowels.

Temperature

Shiverings run over him after urination. Coldness, as if the body were naked. Perspiration in the morning with burning thirst. Hot hands. Fever, heat before midnight with little thirst and much sweat.

PAGE 639

Throat

At night, burning in eyes, violent thirst from dryness low down in throat, so that he did not feel the drink, which also did not better the dryness. Pain in small spot in region of left corner of hyoid bone. Inflamed throat (in catarrhal fever).

Comments

There are many symptoms relating to the eyes and vision: whirling in head while sitting, houses at a distance seem to turn bottom upwards. Darkness and double vision, on looking intently double vision disappears. Whirling before right eye as if it would become dark, eye becomes inflamed.

It seems as though fire came out of eyes and tears ran out in streams in evening and night. Worse by sun, causes eyes to fill with water. Worse by closing eyes, it makes the burning worse, prevents sleeping at night.

Pain in small of back and calves. Aching in sacrum and knees. Sticking pain in back as if something were sticking in spine, better by bending back. An old wound from a thrust became painful again. Rheumatic pain wanders from place to place with catarrh. Open air: much exhaustion, yawning while walking in morning. Cold water does not better burning in eyes. Skin disease is worse during menses.

Boericke. Clarke.

Euonyminum

Pharmacy

Euonin. Euonyminum. A concentrated extract, so-called active principle from the bark of *Euonymus Americana*, *E. atropurpurea* and other American species of *Euonymus*.
Historical dose: Tincture and all potencies.

History

Euonyminum is largely used by eclectics in cases of constipation indigestion and torpid liver. **Planets:** Jupiter.

Homeopathic

Euonyminum has not been proved, but Hale quotes the following account of its effects: "In very large doses, it proves a drastic cathartic, its operation being attended with a death-like nausea, excessive tormina and cold sweats. The dejections from the bowels are profuse, violent and accompanied by much flatus."

This clearly outlines the sphere of the remedy, which does not seem to differ much from that of the *Euonymus Europea*.

Clinical

Albuminuria. Bright's disease. Cholera. Diarrhea. Dropsy. Dysentery. Gallstones. Indigestion. Liver disorders.

Comments

Lutze records a case of albuminuria of pregnancy with dropsy cured with the 1x and also a case of albuminuria and dropsy in a young man of seventeen. This patient had eczema and was cured by Lutze with *Ars. 200c*. Later he got a chill from standing in the water fishing. He suffered from malaise and finally dropsy developed.

After a week of treatment the condition was as follows: Indifferent, drowsy, sleeping most of the day and night, sometimes with heavy breathing. Anasarca general, chiefly in face and limbs. Pulse full, slow, 50 to 60. Occasionally dull frontal or occipital headache, face sallow, sclerotics yellow, temperature 102 to 103. Urine scanty, 1,017 (later 1,009), containing large quantities of albumen, epithelial casts and granular debris, no bile or chlorides. Stool grayish. He had no pains or subjective symptoms.

There were all the evidences of a fully-developed case of acute Bright's disease. He was given *Euonymus* 1x, 2 grains in half a tumbler of water, a spoonful every hour. In three days there was evident improvement.

PAGE 640

The treatment was continued for a month, when he was nearly well, the cure being completed with Puls., Calc., Sulph. at long intervals.

Boericke. Clarke.

Euonymus atropurpurea

(wahoo, burning bush)

Pharmacy

Euon-a. Wahoo. *Euonymus atropurpurea*. Wahoo. Burning Bush. N. O. Celastraceae. Tincture of fresh bark and root. Historical dose: Tincture and all potencies.

Herbal

Euon. atro. like *Euonimin* and *Euon. europ.* is a favorite liver remedy among eclectics. It has not been proved, but clinical experience shows that its action is very like that of its botanical relatives.

Homeopathic

This remedy *Euonymus atropurpurea* affects the liver and the kidneys. Migraines. Producing headache, mental disturbances and much distress in hepatic and kidney region.

Passive congestion and torpor of liver, chronic catarrhal disorders of stomach and intestines. Weak heart. Chronic rheumatism and gout. Profuse stools, varying or of several colors. Albuminuria.

Clinical

Albuminuria. Biliary fever. Bilioussness. Cholera morbus. Gallstones. Levitation. Liver disorders. Vertigo.

Constitutions

Brunettes more easily affected. **Planets:** Jupiter, Venus, Saturn.

Modalities

Better from cool air, pressure. Worse from eating, evening.

Symptoms

MIND

Mental confusion, despondent, irritable, loss of memory, unable to recall familiar names.

Abdomen

Flatus and pain. Pain about umbilical region. Pain about navel.

Back

Crawling in back. Dull pain between shoulders and about kidney and splenic region, pain in lumbar region better lying down.

Head

Bilious headaches, pressure over brows: compressing eyes. Heavy frontal headache.

Sore, tired feeling, bruised feeling of scalp. Pain over right eye extending back through the head. Bilious headache, coated tongue, bad taste, constipation. Headache over eyebrows.

Kidneys

Urine scanty, high-colored, acidity increased, poured out rapidly.

Limbs

Aching in all joints, especially ankles. Feet feel swollen and tired.

Liver

Liver engorged. Gallstones.

Mouth

Dry, pasty taste.

Rectum

Anus very sore and burning. Constipation with hemorrhoids and severe backache. Diarrhea, stools variable and profuse, bloody.

Stomach

Thirsty. Feels full and uncomfortable.

Vertigo

Vertigo, obscure vision and gastric derangement, associated with albuminuria. Vertigo in forehead, as if drawn up and pitched forward.

Comments

A lady who tasted the juice of the bark related her experience to Hale:

"I felt immediately a sick weakening feeling all through the nervous system, dull, heavy pain through upper portion of head together with enlarged blurred feeling. I seemed so drawn up from the floor, that is seemed difficult to place my foot down when walking with sufficient firmness to stand up, a tipping over sensation when sitting and walking."

She also had a deathly sickness at stomach with perspiration and heat in face in alternation with chills in the back and back part of the arms. Some of the symptoms returned next day, but were dissipated by vinegar, which must be looked upon as its antidote.

Compare

(1) *Euonymus Europaea*. Spindle-tree - liver disorders, biliousness, lumbago, gastric derangements with albuminuria.

(2) Cutting pains in malar bones tongue, penis up to bladder, Podo.

(3) Am-pic., Chel., *Euonymin* 1x trituration. albuminuria.

SOURCES

Boericke. Clarke. Phatak.

PAGE 641

[Euonymus europaeus](#)

(spindle-tree)

Pharmacy

Euon. The Spindle-tree. *Euonymus europaea*. N. O. Celastraceae. Trituration of dried seeds. Tincture of fresh seeds. Historical dose: Trituration and all potencies.

Herbal

The Celastraceae to which order *Euonymus* belongs, are closely related to the Rhamnaceae which include the well-known purgative *Cascara sagrada*. **Planets:** Jupiter.

Homeopathic

Euonymus has been used successfully in cases of engorgement of the liver, biliousness, headache, coated tongue, bad taste, constipation. Passive constipation with hemorrhoids, also with severe pain in back like lumbago.

In diarrhea the stool is generally very profuse, variable in color. In gastric derangements with albuminuria, headache, weakness, vertigo and obscuration of sight. Liver disorders, biliousness, lumbago.

Clinical

Albuminuria. Backache. Bilious. Cholera. Collapse. Constipation. Convulsions. Diarrhea. Gallstones. Gastric derangements. Headache. Hemorrhoids. Liver disorders. Lumbago. Pustules. Vertigo.

Comments

A case of poisoning with the seeds of *Euon. eur.* Allen recalls the effects of *Euonyminum*:

"A man, forty-three took eighteen seeds one morning and as many the following evening. He was seized with frightful abdominal pain and profuse diarrhea, eventually bloody. He was not seen until the evening, when he was in a state of profound collapse with involuntary evacuations of blood and mucus. On lifting him up tetanic convulsions were induced which immediately preceded death."

Euon. eur. has been proved. Cutting, sticking and drawing pains predominate. The left side is more affected than the right. Cutting pains in the malar bones in the tongue. Cutting in the penis extends up to the bladder.

The pains compel lying down and are then relieved or reappear in other parts. Violent shivering chill over whole body. Pains in chest, head and abdomen are worse after eating. Tingling in the skin which provokes scratching is followed by a burning sensation. Eruption of small dry pustules.

Compare

Eupatorium aromaticum

(white snake-root)

Pharmacy

Eup-a. White Snake-root. Eupatorium aromaticum. Eupatorium urticifolium. Deerwort. Pool-root. N. O. Composite. Found in low woods from Massachusetts to Louisiana. Flowers are white and aromatic. Tincture of root. Historical dose: Tincture and all potencies, tincture, locally in sore mouth and sore nipples. Internally, tincture to third potency.

Herbal

Eupatorium aromaticum when chewed, produces in the mouth a warm, aromatic, pungent sensation and is regarded as a "warm, stimulating tonic."

Hale quotes herbal authorities as commending this plant in "aphthous stomatitis" in women and children. Also for burning in the stomach with "nursing sore mouth," before and after confinement. Locally it is useful as a wash for the mouth.

Eup-a. is a "nervine," like Scutellaria and Cypripedium for "restlessness and morbid watchfulness, morbid irritability of the nervous system, tremors, chorea and hysteria." Like Eup-pur. it has also been used for gravel and the Indians use it as a cure for ague.

In a case of sore mouth in a man, 57, recorded by P. S. Duff, Eup-a. caused soon "a general aggravation like a cold or catarrh, annoyed by pain in left shoulder, posterior scapular region, pulse 94 unnatural, tight in left bronchia, felt ill, dull and oppressed."

Planets: Moon.

Homeopathic

Eupatorium arom. is doubly indicated where nervous weakness and aphthous disease are combined. Nervous weakness, restlessness and morbid watchfulness. Hysteria and chorea. Low fevers with extreme restlessness. Aphthous disease. Sore nipples. Sore mouth in infants. Vomiting of bile, pain in stomach, headache and fever.

Clinical

Ague. Aphthae. Gravel. Neurasthenia.

Compare

(1) Lapsana communis - useful in sore nipples and hemorrhoids.

(2) Hyos., Passi., Hydrin-mur.

SOURCES

Boericke. Clarke. Phatak.

Eupatorium perfoliatum

(bone-set)

Pharmacy

Eup-per. Eupatorium perfoliatum. Bone-set. Thoroughwort. N. O. Composite. Tincture of whole plant. Historical dose: Tincture and all potencies, third potency.

Herbal

Eupatorium perfoliatum is an old-world herbal remedy. It has been recommended by Dioscorides for ill-conditioned ulcers, dysentery, stings of reptiles, chronic fevers and obstructed livers. Clarke found Eup-per. most useful in influenza.

Eup-per. is a boon in miasmatic districts, along rivers, marshes, **(damp places effective that is spleen and kidney involved)** etc. Known as "Boneset" from the prompt manner in which it relieves pain in limbs and muscles **(spleen involved)** that accompanies some forms of febrile disease like malaria and influenza.

Homeopathic

Eupatorium acts principally upon the gastro-hepatic organs and bronchial mucous membrane. The leading characteristic for its homeopathic use is the distressing bone-pains it causes, such as are found in connection with malarial fevers(**where spleen and kidney involved**) and influenza.(**kidney or spleen dominated**) Cachexia from old chronic, bilious intermittents.

All conditions where there is a great deal of bone pain(**kidney deficiency**). The leading characteristic is violent aching,(**excess condition**) bone breaking pains.

Influenza with great soreness(**excess condtion**) of muscles and bones. Muscles of chest, back and limbs feel bruised, sore aching(**spleen excess condtion**)

Sluggishness of all organs and functions.(**yin yang balance affected which is controlled by kidney liver combination but kidney dominated here over liver so yin overrides yang so sluggishness**) It affects the liver producing bilious effects.(**kidney affects liver bilious production as bilious is dampness heat**) Patient is restless,(**yang liver disturbed**) chilly and nauseated.(**yang liver or stomach qi disturbed**) Bone-pains, general soreness and fevers. Dengue fever.

Eup-per. has a marked periodicity.(**liver and spleen involved**) (Ars., China, Cedron.) There may be a changing periodicity: Chill morning one day, evening the next. Colds. Sluggishness of all organs and functions. Useful in old broken down constitutions of inebriate. Weakness.

Clinical

Anus, herpes. Back, pain. Bilious fever. Bones, pains. Cough. Dengue fever. Diarrhea. Fractures. Fever. Gout. Hiccough. Hoarseness. Indigestion. Influenza. Intermittent fever. Jaundice. Liver, pain. Measles. Mouth, cracks. Ophthalmia. Relapsing fever. Remittent fever. Rheumatism. Ringworm. Spotted fever. Syphilitic pains. Thirst. Wounds.

Causations

Ill effects of ice-house.(**damp cold**)

Constitutions

Worn-out constitutions from inebriety. **Planets:** Mars, Saturn.

Modalities

Better by conversation, by getting on hands and knees. Better from vomiting bile,(**damp heat stagnation in liver**) sweating,(**dampness stagnation in body**) lying on face.(**yin portion pressed that is front portion of body and since it is yin excess condition pressure**)

and warmth helps, face relates to stomach/spleen so may be damp cold so lying on face helps by giving warmth and pressure) Worse from cold air, periodically, 7 to 9 a.m. , third or fourth day. Lying on part. Coughing. (lung qi deficient) Smell or sight of food. (stomach qi deficient) Motion. (spleen qi deficiency)

Symptoms

MIND

Feels at night as if going out of his mind. (liver soul going out) Moaning, anxiety, (kidney, heart, lung) despondency. (heart, lung) Very restless, cannot keep still, though wishes to. (spleen deficiency, liver) Moans with aching pains.

Abdomen

Colicky pains (liver heat colic) in upper abdomen with headache (liver heat) and other pains. Abdomen full and tympanitic. (food stagnation in stomach and wind) Avoids tight clothing. (due to excess condition)

Back

Pain in back of neck (kidney yang deficiency) and between the shoulders. (kidney and lung qi deficiency) Intense (excess condition) backache, as if beaten, (blood stasis) pain ascends. Trembling in back during fever. Beating pain in nape and occiput, (blood congestion in kidney area) better after rising (blood stasis). Aching pain in the back, as from a bruise. (blood stasis) Trembling in back during fever. Weakness in small of back. (kidney qi deficient)

PAGE 643

Chest

Muscles of chest are sore. Raw, hot, sore chest and bronchi. (blood stagnation) Soreness in chest, worse from inspiration. (cold soreness as inspiration affects due to kidney not receiving qi properly so qi stagnant in lung so blood stagnation) Sharp pain through right chest on deep inspiration, (blood stagnation so sharp pain) feels at night as if going out of his mind, disturbed breathing frightens him. (lung-kidney communication problem)

Eyes

Painful soreness of eyeballs. (liver qi so blood stagnant) Great aversion to light. (qi stagnant in liver) Painful soreness of lids. (spleen qi/blood stagnant) Sore aching eyeballs with headache. (stagnant qi/blood liver and liver yang heat) Yellow eyes. (blood deficiency liver so vacuity heat so bile overflow the vessel)

Face

Sudden severe contraction of muscles of right cheek.(spleen and kidney cold wind as contraction-cold,muscles-spleen,cheek-kidney) Yellow.(blood deficiency)

Female

Itching of the mons veneries.(liver channel wind damp)

Food

Great thirst for cold water.(lung heat or lung dryness or stomach heat) Thirst for large draft of cold water before and during chill.(before and after kidney not receiving lung inhaled qi qi stagnates in lung which turns into heat or wind) Vomiting immediately after drinking (qi stagnation so vomiting immediately after drinking)and preceded by thirst. (lung qi stagnation so lung heat as above mentioned) Nausea with smell or sight of food. (stagnation of stomach qi) Craving for ice cream,(damp cold craving so in stomach it is dry heat) for acid drinks.(dry cold in stomach)

Head

Head pains alternating with gouty pains.(liver heat alternating with lung wind heat) Headache with soreness internally.(liver vacuity heat) Throbbing,(qi stagnation or liver yang rising) sore pain.(blood/qi stagnation) Occipital pain after lying down with sense of weight.(cold damp due to kidney) Sensation as of a metal cap on head.(qi stagnation in head) Top and back of head with pain and soreness of eyeballs.(kidney area cold damp pain with liver qi stagnation) Headaches better by vomiting of bile,(release of excess dampness from liver region so liver qi can move freely so headache better) by conversation.(lung qi stagnation gets cleared) Sick headaches every third and seventh day. (timely repeating symptoms due to liver involved) Lifts head with hands during headache. (headache due to liver damp heat so head feels heavy so lift up head) Headache and nausea every other morning, when awaking.(liver qi stagnation and liver yang rising goes alternately during yang time) Violent headache,(blood stasis or damp heat blockage in liver channel –it is excess condition and blockage because it comes before chills) comes on before the chill and lasts through all the stages and is worst during the sweat.

Heart

Pressure as if heart is in too small a space. Pain, soreness and heaviness behind sternum and in cardiac region,(damp heat) worse by least motion(heat) or turning body around.

Kidneys

Urine alternately profuse and scanty.(damp and heat)

Limbs

Aching pain in Back. Aching in Bones of Limbs with soreness of flesh.(kidney yang deficiency with spleen qi/blood stagnant) aching in arms and wrists. Bruised pain in calves.(spleen qi/blood stagnant) Dropsy of legs, feet and ankles.(dampness cold in kidney area) Painful gouty nodes,(phlegm heat in lung associated with liver yang or liver heat) associated with headache. Gouty soreness and inflamed nodosities of joints, (associated with headache.(lungphlegm heat with liver yang rising) Swelling of left great toe.

Liver

Liver region sore. Soreness in region of liver, on moving or coughing.(blood/qi stagnation so worse in moving and coughing)

Lungs

Hoarseness and cough with soreness in Chest,(qi and blood congestion in chest so hoarse due to blood congestion and cough due to qi/blood stagnation) must support it. Chronic loose cough,(lung qi deficient so lung cold damp that is loose cough) chest sore, worse at night.(lung yin deficient so vacuity heat,soreness may also be due to lung yin deficiency) Cough relieved by getting on hands and knees. Hectic cough from suppressed intermittent fever.(intermittent fever due to qi stagnation which if suppressed than qi irritated so lung fire/lung wind) Difficulty of breathing,(lung qi stagnation)attended with perspiration,(lung heat) anxious countenance,(lung qi stagnation) sleeplessness.(heart or lung qi irritation or stagnation) Inability to lie on the left side. Coryza with sneezing.(cold wind lung that is qi stagnation so sneezing with qi deficiency so cold or lung yin deficient so hot so coryza)

Male

Itching of the groin.(kidney qi stagnation or liver wind)

Mouth

Cracks in corners of mouth.(dry heat in stomach/spleen) Tongue yellow.(heart blood deficient) Tongue covered with white fur. Taste bitter.(stomach heat) . Paleness of the mucous membrane of the mouth.(liver heat and stomach heat or due to blood/qi stagnant further ahead blood deficiency so paleness) Soreness of the corners of the mouth.(qi/blood stagnant)

Nose

Coryza with sneezing with aching in every bone.(lung qi deficiency and stagnation due to kidney yin deficient so not receiving inhaled qi—aching in bone —kidney yin deficient)

Rectum

Stools, frequent, whitish, green, watery.(spleen damp heat –green watery while white stools,frequent-lung qi deficient or lung yin vacuity heat where heat makes things green or yellow) Cramps.(kidney qi stagnation) Constipated with sore liver.(blood/qi stagnation in liver and constipation due to blood stagnant heat)

Skin

Jaundice.(liver qi stagnation so liver heat so liver bile overflow)

Sleep

Stretching and yawning,(kidney qi stagnation-yawning) before chill, sleepiness(blood stasis or turbid phlegm in head) with difficult breathing.(qi lung stagnation) Has to lie with head high.(due to heaviness of phlegm or to reduce blood towards head) Headache on awaking.(on awaking blood increases on head which further increases blood congestion in head so headache)

Stomach

Great thirst for cold water,(lung dry heat or stomach yin deficiency that is vacuity heat) but after drinking shuddering (due to qi stagnation of lung)and vomiting of bile.(liver qi stagnation that is liver heat) Nausea from smell of food or cooking.(stomach qi stagnant) Indigestion from alcohol of old people.(old people-liver blood and kidney qi deficient so yang increases due to alcohol heat which further reduces liver yin so liver bile so indigestion) HicCoughs.(liver qi stagnant) Distressing pain in the stomach not better until all is vomited.(all food in the stomach stagnates qi so if all vomited then stomach qi is free) Tight clothing is oppressive.(qi stagnation so tight clothing further obstruct it) Vomiting and purging of bile of green liquid several quarts at a time. Vomiting preceded by thirst.(thirst that is heat in lung,stomach and liver but drinking creates vomit due to qi stagnation)

Stool

Constipation with catarrh.(lung qi stagnation in large intestine so constipation with blood stasis so catarrh that is inflammation and swelling of mucous membrane) Morning diarrhea.(lung heat due to qi stagnation so large intestine heat) Purging stools with smarting and heat in anus.(lung and large intestine damp heat so purge stool with kidney yin deficiency that is vacuity heat in anus)

PAGE 644

Temperature

Chill preceded by thirst with great soreness and aching of Bones. Chill between 7 and 9 a.m. Pain in the bones, as if broken. Pain all over, before the commencement of the chill.(qi stagnation and then qi deficiency all over) Burning heat. Sweat, relieves all the symptoms except the headache.(sweat reduces qi and fluid and toxins but headache here is due to liver blood deficiency or kidney yin deficiency which remains same) Sweat scanty.(lung heat sweating so scanty sweat)

Nausea, vomiting of bile at close of chill or hot stage, throbbing headache.(blood stagnant) Knows chill is coming on because he cannot drink enough. Thirst a long time before the chill, which continues during the chill and heat.(kidney and liver and lung yin deficiency so thirst is always there)At the conclusion of the chill, vomiting of bile or after every draft. The intermittent fever(due to qi stagnation) paroxysm(worms) generally commences in the morning. Coldness during nocturnal perspiration.(nocturnal perspiration due to kidney yin deficiency and after perspiration lung qi reduces so further cold increases) Great weakness and prostration during the fever.(lung and spleen yin further reduced so great weakness and prostration) Vomiting of bile at the close of the hot stage. Vomiting of bile after the chill. When there is perspiration it relieves all the symptoms except the headache.

Throat

Hoarseness worse morning.(blood stagnation) Soreness in trachea and bronchia.(qi stagnation)

Urine

Dark-colored,(heat) clear urine.(kidney yang qi deficient or cold) Dark-brown, scanty urine,(kidney yin vacuity heat) depositing a whitish, clay-like sediment.(turbid damp heat)

Vertigo

Vertigo, sensation of falling to left, worse lying on right side,(vertigo due to liver qi stagnation so worse on right side) better vomiting.(full vomiting frees qi) Early in morning whirling around in brain as if he had been whirled in cool screen: repeated after a short cessation.

Comments

Soreness will be found running throughout the proving: headaches with a soreness internally. Parietal protuberances sore with pain and soreness in eyeballs, cough with extreme soreness down trachea, soreness of chest, aching in limbs throughout the body.

A characteristic cough of Eup-per. has better by getting on hands and knees. W. P. Defriez reports a case in point: Every winter for several years the patient had been

annoyed by a dry, hacking cough with paroxysms lasting some time, only relieved by getting on hands and knees. Eup-per. cured.

The chills of Eup-per. begin in the small of the back with aching in the limbs as though every bone in the body were being broken, high fever with increased aching, followed by sweat scanty or profuse, sweat better all pains except headache, which is worse.

The liver is strongly affected by Eup-per., bilious vomiting and diarrhea, bilious sick-headaches, cough arising from irritation of liver. Catarrhal symptoms are prominent. Nocturnal loose cough. Hoarseness with aching soreness of trachea. Hoarse, rough cough with scraping in bronchia. Cough with soreness, compelling the patient to hold his chest with his hands.

Sleepiness and yawning. Sensation as if falling to left. Pain and extreme tenderness of left glutei muscles. Lying on back worse cough. Kneeling with face towards pillow better cough. Rising up better headache. Eating causes violent distressing pains which are only relieved by vomiting.

There is intense thirst, but drinking cold water causes shuddering and vomiting of bile. Chilliness predominates, wants to be covered, better in house, worse in open air.

Compare

(1) Bry., Sep., Nat-m., Chel.

(2) Nyctanthes arbor-tristis - bilious fever insatiable thirst, bitter vomiting at close of chill, also constipation of children.

SOURCES

Boericke. Clarke. Phatak.

Eupatorium purpureum

(gravel root)

Pharmacy

Eup-pur. Eupatorium purpureum. Gravel root. Queen of the Meadow. Joe Pye Weed. Trumpet Weed. N. O. Composite. Tincture of the root. Historical dose: Tincture and all potencies, first potency.

Herbal

The common name, "gravel root," indicates the traditional use of the drug and in the hands of eclectics it has done good work in cases of irritable bladder, diabetes insipidus, incontinence of urine and kidney stones.

Hale mentions that impotency has been cured in the male and infertility and uterine atony in the female. It is similar in action to Cimic. and Helonias here.

The fever symptoms of Eup. purpureum resemble those of Eup-per., but Eup-pur. has many more symptoms in the urinary and sexual regions.

PAGE 645

The general soreness is less marked with purpureum. Both have chills beginning in the back, those of purpureum (as also the pains) run upwards and with them there is much shaking and comparatively little coldness.

Eup-pur. has been well proved by a Mrs. Dresser and she experienced a feeling of homesickness even when living in her own house. Cystitis in pregnant women from riding over rough roads. Distressing dyspnea from dropsy. **Planets:** Venus.

Homeopathic

Bone pains, nausea and vomiting accompany fever. Sweat is slight. Restless tossing, moaning, unable to lie down. Excellent in kidney dropsy. Albuminuria, diabetes, strangury, irritable Bladder, enlarged prostate are a special field for this remedy. Chills and pains run upwards. Impotency and infertility.

The bone breaking pains and other fever symptoms are similar to Eup-per., but less pronounced, it has many more symptoms regarding the urinary and the sexual organs especially females. Homesickness.

Clinical

Albuminuria. Bedwetting. Stones. Cystitis. Diabetes. Dropsy. Gravel. Headache. Homesickness. Hysteria. Impotence. Indigestion. Intermittent fever. Kidney colic. Rheumatism. Sciatica. Strangury. Throat, sore. Urine, retention. Vomiting.

Modalities

Worse from motion. Worse changing position ever so little causes chilliness down back. Worse left side and there is sensation as if falling to left side, as with Eup-per.

Symptoms

MIND

Homesick, even though at home and amongst the family. Sighing. The mind is encompassed by various delusions. Great fear of sickness. Depressed and sleepy. Hysterical, low-spirited state.

Abdomen

Rumbling, rolling and twisting pain in bowels. Severe colic after voiding urine. Pain and soreness of abdomen, much worse left side. Hypogastric region swollen and hot.

Back

Weight and heaviness in back and loins. Cutting pain in neck running from left shoulder to occiput. Between shoulder-blades chilly feeling. Pains running upward from sacrum into kidneys from left side of back and hip. Distressing pain in lumbar region before chill.

Chest

Grating sensation in chest at every deep inspiration.

Ears

Illusions of hearing. Crackling worse on swallowing. Ears feel full.

Eyes

Staring. Red and swollen with headache. Lachrymation.

Face

Face flushed. Lips blue.

Female

Quick jerking pain in left ovary. Threatened miscarriages. Habitual miscarriage at third or fourth month. External genitals feel as though wet. Profuse leucorrhoea. Vulva feels as if wet. Sterility from ovarian atony. Tense cutting pain above left ovary. Leucorrhoea caused by exhaustion and chronic metritis. Numbness worse in groin. Inefficient labor-pains.

Food

Thirst before chill, none during with fever with dropsy. Desire for warm drinks.

Head

Sick headache beginning in morning, worse afternoon and evening, worse in cold air. Left sided headache with vertigo, as if falling to the left side. Pain from left shoulder to occiput.

Heart

Violent palpitation, fluttering in heart and throat. Pulse accelerated and full.

Kidneys

Deep, dull pain in kidneys. Diabetes insipidus. Dysuria. Bladder irritability in women. Cystitis in pregnant women on riding on rough roads. Burning in bladder and urethra on urinating. Insufficient flow, milky. Strangury. Hematuria. Constant desire, even after frequent urination, the bladder feels full. Urine smells sweet. Urinary stream smaller.

Limbs

Tired, weak uneasiness in limbs with numbness and gnawing pains. Rheumatic pains shifting from place to place, always from below upward.

Pains in arms and legs before chill during fever limbs cold. Neuralgia of right shoulder or right knee, passing over to left Soreness of bones, aching of limbs as if bones were broken. Pains come and go suddenly, very restless, but not better by motion.

PAGE 646

Lungs

Dyspnea with dropsy. Sighing every few minutes. Strong desire to inflate the lungs, which she continued to do from time to time without noticing particularly that she was doing so.

Male

Impotency from exhaustion or abuse.

Mouth

Tongue furred, brown along center. Tongue, prickling and stinging in tip, on back. Numbness of tongue. Saliva abundant.

Nose

Coryza, hoarseness, hacking cough, evening, cough with soreness and heat in bronchi.

Rectum

Bilious diarrhea. Pressure and weight on rectum.

Sleep

Yawning, gaping and sighing. Sleepy and depressed. Sleep restless and mind disturbed, frightful dreams.

Skin

Skin hot and dry with fever, hot to touch in face.

Stomach

Wants lemonade or cold drinks during chill. Much wind in stomach, belchings almost constant. Nausea at smell or sight of food or cooking. Great nausea but no vomiting with chill, vomiting with fever with sick headache. Gripping, crampy pain.

Temperature

Bone-pains. Fever with protracted with bone pains, nausea and vomiting, followed by slight sweat, mostly about forehead and head. No thirst during chill, but much frontal ache. Chill commences in Back. Violent shaking with comparatively little coldness.

Throat

Choking fullness, must swallow often. Burning, as if had swallowed some hot substance, most at back of throat. Worse Swallowing. Pain left side of throat, causing pain on swallowing, before chill. Fluttering in throat pit.

SOURCES

Boericke. Clarke. Phatak.

Euphorbia amygdaloides

(wood spurge)

Pharmacy

Euph-a. The Wood Spurge. Euph. amygdaloides. N. O. Euphorbiaceae. Tincture of plant. Historical dose: All potencies.

History

Euph-a. has the same general characteristics as the other Euphorbiums. Euphorbium produces irritation and burning sensations of the intestinal tract with vomiting and diarrhea and skin disorders. **Planets:** Moon.

Homeopathic

Euph-a. has dark brown, watery, mucous stools, sometimes mixed with solid feces. Sometimes offensive with blood, mostly in afternoon. If stool lasts two or three days there is prolapse returning very gradually, if replaced within half an hour the bowel generally prolapses again, if the diarrhea lasts longer external hemorrhoids appear, not returning with the prolapse.

Rheumatic pains come on when heated. Cold water relieves burning in back of throat, (burning, worse from cold water is Caps.). Symptoms go from right to left. Malaise, tired weak feeling during and after walking. Restlessness all night, turning about half awake and half asleep. Pain in antrum. Sense of taste blunted. Diarrhea, stools difficult with painful anal spasm.

Clinical

Antrum, pain. Anus, spasms, prolapse. Debility. Diarrhea. Dysentery. Hemorrhoids. Skin, eruptions. Smell, illusion. Spleen disorders. Throat, soreness.

Modalities

Better after eating. Many symptoms are worse evening, worse walking.

PAGE 647

Symptoms

Abdomen

Tightness in region of spleen. Stitch in region of spleen. Sensation as if a long worm writhing in region of transverse colon or duodenum. Throbbing in groins.

Liver

Severe stitches in liver, when walking up a hill.

Lungs

Hoarseness. Heat in chest, radiating from stomach. Feeling as if lungs remained partly inflated.

Rectum

Stool difficult from painful spasm of anus, which was continued after the evacuation. Slight prolapse after the stool. Offensive diarrhea stool, preceded by griping and followed by prolapse. Feeling or action of the liver, followed soon by griping and passing of offensive flatus, then offensive diarrhea after which the feeling of the liver passes off, followed by slight prolapse rendering sitting uneasy, going off gradually.

Sensations

Peculiar symptoms are: An illusion of smell, "odor of mice," and seething sensation in the head and thigh.

Stool

Feces small, lumpy, slimy with prolapse, though there had been no straining. Diarrhea returns at lengthened intervals. Dark brown, watery, mucous stool, sometimes mixed with solid feces, sometimes offensive.

Stomach

Nausea, worse moving about indoors, better sitting still, better by supper.

Clarke.

[Euphorbia corollata](#)

Pharmacy

Euph-c. Euphorbia corrolata. The Large Flowering Spurge. N. O. Euphorbiaceae. Tincture and triturations of the root. Historical dose: All potencies.

Herbal

Euphorbia corrolata is a diaphoretic, expectorant and cathartic of the old school. It has gastro-enteric disturbance with deathly nausea. Euph-c. produces gastro-enteric disturbances like other Euphorbias, but with peculiarities especially in the sequence and character of the vomit.

Grimmer remarks: Euphorbia tends to particularly affect the gastrointestinal tract, copious vomiting, rice water stools, cold sweat, prostration, wants to die intermittent attacks. **Planets:** Moon.

Homeopathic

Euphorbia corrolata has (1) a deadly nausea.

(2) sudden and powerful vomiting of food in stomach.

(3) throws up large quantities of water mixed with mucus.

(4) then of clear fluid like rice-water.

(5) copious watery evacuations of the bowels.

These symptoms are accompanied by great anxiety, deadly prostration and cold sweat. Attacks that recur after short intermissions. Vomiting of food, water and mucus and copious evacuations. Feeling of clawing in stomach, cold sweat. (Verat. alb.)

Clinical

Cholera. Cholera infantum. Cholerine. Diarrhea. Gastritis. Sea-sickness. Vomiting.

SOURCES

Clarke. Grimmer.

Euphorbia cyparissias

(cypress spurge)

Pharmacy

Euph-cy. Cypress Spurge. Euphorbia cyparissias. N. O. Euphorbiaceae. Tincture of fresh plant. Historical dose: All potencies.

History

The effects of Euph-cy. have been observed on persons pulling the plants and getting the juice on hands and face. **Planets:** Mars.

Homeopathic

Euph-cy. acts as an intense irritant of the skin and produces at the same time a feeling of chilliness.

Clinical

Erysipelas. Miliaria. Vesicles.

SOURCES

Clarke.

PAGE 648

Euphorbia heterodoxa

Pharmacy

Euph-he. Alveloz. Euphorbia heterodoxa. N. O. Euphorbiaceae. A soft resin insoluble in alcohol or water. Trituration. Historical dose: All potencies.

History

The resin has been used allopathically as an external application in cases of cancer and has produced the most terrible pains. **Planets:** Moon, Mars.

Homeopathic

Euph-he. has been found to alleviate the burning pains of cancer, in homeopathic potencies. Burning pains of cancer is the keynote for its employment.

Compare

(1) Euphorbium.

SOURCES

Clarke.

Euphorbia hypericifolia

(large spotted spurge)

Pharmacy

Euph-hy. Large Spotted Spurge. Euphorbia hypericifolia. N. O. Euphorbiaceae. Tincture of whole plant. Historical dose: All potencies.

History

Dr. True took the infusion and tincture of Euph-hy. and obtained symptoms from both.

Planets: Moon.

Homeopathic

Euphorbia hypericifolia has headache in fore part of head, pain centering at crown with heat above the eyes and fullness and oppression at epigastrium, followed by languor and drowsiness. Constipation.

Clinical

Constipation. Headache.

SOURCES

Clarke.

Euphorbia ipecacuanhae

(ipecacuan spurge)

Pharmacy

Euph-ip. The Ipecacuan Spurge. Euphorbia ipecacuanhae. N. O. Euphorbiaceae. Trituration of the powdered root. Historical dose: All potencies.

History

Euph-ip. is a more active emetic than Ipecacuanha. **Planets:** Moon.

Homeopathic

Euph-ip. has long-continued vomiting with a sense of heat, vertigo indistinct vision and prostration. Gastritis. Vomiting.

SOURCES

Clarke. Grimmer.

Euphorbia lathyris

(gopher-plant)

Pharmacy

Euph-l. Euphorbia lathyris. Caper Spurge. N. O. Euphorbiaceae. The symptoms are the effects of poisoning by seeds. A tincture of the whole plant is made. Historical dose: All potencies, third to thirtieth potency.

History

The fresh milky juice is exceedingly acrid when applied to the skin and the fruit is highly purgative and poisonous. The juice causes redness, itching, pimples, sometimes gangrene. **Planets:** Moon, Saturn.

Homeopathic

The chief symptoms of E. lath. are, Retching and vomiting and bloody stools with brilliant eyes, flushed face, the abdomen is drawn inward. The whole body is stiff and icy cold. Uneasiness. The symptoms point to its use in erysipelas, poison oak, etc. Rheumatic pains during rest. Paralytic, weakness in joints.

Clinical

Cholera. Diarrhea. Dysentery.

Modalities

Better close room, sweet-oil application. Worse touch, cold air.

Symptoms

MIND

Delirium and hallucinations. Stupor, coma.

Eyes

Almost closed from edema of lids.

Face

At first ruddy glow on cheeks afterwards death-like pallor. Cold perspiration in beads on forehead. Red, puffed face and in spots suppurating. Erythema, beginning on face, gradually extending into the hair parts and then spreading over whole body, taking eight days to do so, eruption glossy, rough edematous with burning and smarting, aggravated by touch and cold air, ameliorated by close room and sweet-oil applications. Bran-like desquamation. Sensation of cobwebs. Stinging, smarting and burning of face when touched.

Heart

Weak and fluttering heart-action.

Kidneys

Copious flow of urine.

Lungs

Labored breathing. Breath cold, musty odor. Cough, first a hacking, as from inhalation of sulphur, later on, paroxysmal like whooping cough in regular paroxysms.

Cough ending in diarrhea and vomiting with sleepiness between each paroxysm.

PAGE 649

Male

Inflammation of scrotum, resulting in deep acrid ulcers with intense itching and burning, worse touching the parts from washing.

Mouth

Tongue coated, slimy, acrid taste. Breath cold, musty odor.

Nose

End of nose very much inflamed externally. Very sensitive and edematous mucous membranes with ulceration.

Pulse

120 beats, full, bounding, somewhat irregular.

Rectum

Drastic purgation from large doses, mild laxative condition from smaller doses, followed several weeks afterwards by obstinate constipation. Stools of white, transparent, gelatinous mucus, later mingled with blood.

Skin

Erythema, beginning on uncovered parts, on face and spreading over whole body, glossy, rough, edematous with burning and smarting. Fine bran-like desquamation following in the wake of the erythema. Eruption rough, scaly, smarting and burning, when scratched forms deep, ragged ulcers, skin where ulcerated remains red.

Sleep

Restlessness at night. Sleep disturbed, anxious dreams.

Stomach

Nausea and vomiting of copious clear water intermingled with white, gelatinous lumps.

Temperature

Body bathed in profuse perspiration, standing out like beads on forehead, later, cold, clammy perspiration on forehead. Temperature increased.

Relations

Antidoted by: Rhus-t. - skin symptoms. Verat. - vomiting, purging, cough and coma.

SOURCES

Clarke.

Euphorbia peplus

(petty spurge)

Pharmacy

Euph-pe. Euphorbia peplus. Petty Spurge. N. O. Euphorbiaceae. Effect of juice and local application of leaves. Historical dose: All potencies.

History

The application of the juice and leaves sets up intense and painful inflammation, erysipelatos, phlegmonous, pustular with intense burning pain. **Planets:** Mercury.

Homeopathic

In one of the cases observed, a body applied the juice of the stem to an inflamed gum. In another, a boy applied the leaves as a poultice to a black eye. Burnett produced a sore throat in himself by chewing the herb and he cured with the 3x a case of simple sore throat with swelling and painful swallowing.

Clinical

Ecthyma. Erysipelas. Sore throat.

SOURCES

Clarke.

Euphorbia pilulifera

Pharmacy

Euph-pi. Euphorbia pilulifera. N. O. Euphorbiaceae. Tincture. Historical dose: All potencies.

History

In the Medial Press of May 3, 1893, Dr. George Foy gives an account of this medicine. Gray in 1817 mentions it as a remedy for syphilis and for venomous bites. In the Universal Homeopathic Annual, Dr. Cartier gives this account:

"Euphorbia pilulifera has given excellent results in cases of acrid leucorrhea, aggravated by the least motion, especially useful for pale, delicate and sensitive women, (Facaranda).

In gonorrhoea, when there are intense pains at each urination, burning pains which oblige the patient to sit down or to keep quiet, violent desire to pass water, (Cannabis, Cantharis). Humid asthma with prostration and restlessness. Hemorrhages caused by sunstroke or traumatism." **Planets:** Venus.

PAGE 650

Homeopathic

None of the irritant effects common to most of the Euphorbias were produced, but a powerful action on the heart. First an alarmingly quick pulse and then a sudden chill.

It has been used by the old-school practitioners in asthma, hay asthma and bronchitis, chiefly in considerable doses. Cardiac dyspnea, hay fever and bronchitis. Urethritis with intense pain on urinating and much urging. Acrid leucorrhea, worse least movement.

Clinical

Asthma. Bronchitis. Dyspnea. Gonorrhoea. Hay fever. Leucorrhea. Sunstroke. Traumatism. Urethritis.

SOURCES

Clarke.

Euphorbia polycarpa

(golondrina)

Pharmacy

Euph-po. Golondrina. Euphorbia Polycarpa. Historical dose: All potencies.

History

An antidote to snake-poison. Its use also renders the body immune to the influence of the snake venom and thus as a prophylactic. **Planets:** Mars.

Clinical

Snake-bites.

Compare

(1) Cedron., The Euphorbias.

(2) Euphorbia prostata - Used by Indians as an infallible remedy against bites of poisonous insects and snakes, especially the rattle-snake.

(3) Plumeria celinus Tincture internally and locally every 15 minutes for snake poisoning, (Dr. Correa).

(4) Micania guacho, a Brazilian snake cure.

(5) Selaginella - Macerate in milk, locally and internally for bites of snakes and spiders. Iodium, tincture for rattle snake bites externally and one drop doses every 10 minutes.

(6) Gymnema sylvestre will abolish the taste of bitter things, sense of taste altered, powdered root for snake-bite, (7) Sisyrinchium - Ten to fifteen drop doses of tincture for rattlesnake bites.

Boericke. Clarke.

Euphorbium officinarum

(gum euphorbium)

Pharmacy

Euph. Gum Euphorbium. Euphorbium officinarum. Euphorbia resinifera.

The resinous exudation or juice of Euphorbia resinifera exported from Morocco. Euphorbia resinifera is a cactus-like plant of the Euphorbiaceae. Historical dose: All potencies, third to sixth potency.

History

Euph. is an irritant to the skin and mucous membranes. It irritates the mucous membranes and skin, causing much secretion with a sense of dryness. **Planets:** Saturn.

Homeopathic

Terrible burning pains. Pains of cancer. Internal burning in bones, at night. Burning pain in bones. Pains in limbs and paralytic weakness in the joints. Slow inflammations. Blisters. Gangrene of old persons. Decay, Paralytic weakness in joints. Everything appears larger than it really is.

Clinical

Bone, disease. Cancer. Cataract. Coccyx, pain. Cough. Crusta lactea. Erysipelas. **Eyes** inflammation. Gangrene. Hay fever. Headache. **Heart** burn. Influenza. Peritonitis. Sciatica. Syphilis Teeth disorders. Toothache. Ulcers. Vision, disorders. Warts. Writer's cramp.

Modalities

Better from application of oil, cold application, motion. Worse from sitting, rest, beginning of motion, mercury touch.

Symptoms

Abdomen

Sunken, spasmodic, flatulent colic. Feels hollow.

Back

Pain in coccyx worse on rising from sitting, worse after stool.

Eyes

Sees same person walking in front and behind him. Diplopia.

Face

Erysipelas. Yellow blisters. Burning in cheek, worse left. eyes inflamed and agglutinated in morning. Red swelling of cheeks. Nasal itching with mucous secretions from nasopharynx.

Head

Acute mania. Violent, pressive headache.

Limbs

Paralytic pains. Pain in hip-joint and coccyx.

PAGE 651

Lungs

Breathing oppressed as if chest were not wide enough. Spasmodic, dry cough, day and night with asthma. Violent, fluent coryza with burning and cough. Constant cough with stitches from pit of stomach to sides of chest. Croup, dry, hollow, cough. Warm feeling in chest, as if hot food had been swallowed.

Mouth

Teeth as if screwed together, brittle, crumbling, decay. Mouth feels coated with rancid grease. Profuse saliva, salty. Thirst for cold water. Burning like fire in abdomen and stomach.

Nose

Much abortive sneezing. Coryza with swelling. Acrid ozaena.

Rectum

Stools fermented, profuse, clayey.

Skin

Erysipelatous inflammation, especially of the cheek. Biting, stinging, red, swollen. Vesicular erysipelas. Vesicles filled with yellow lymph or liquid. Carbuncle, old torpid indolent ulcers with biting, sharp pain. Old torpid ulcer, pustules. Gangrene. (Echi., Sec.) As if thin cord lay under skin. Ulcerating carcinoma and epithelioma of the skin.

Stomach

Great hunger. Thirst for cold drinks. Waterbrash.

Temperature

High fever.

Compare

(1) Euphorbia marginata, Snow on the mountain - Honey from the flowers is poisonous, detected by the hot, acrid taste. The milky juice produces skin symptoms like Rhus-t.

(2) Psoralea - A Columbian plant - pains of cancer, ulcers. Leucorrhoea fetid., Pruritus. Uterine tumors.

(3) Croton, Jatropha.

(4) Colch., Elat., Ant-t., Verat.

(5) Euphorbiaceous plants Acal., Crot-t., Jatroph. c., Mancin., Mercurialis., Ricinus, Yucca fil.

Relations

Antidoted by: Camph., Op., large quantities of lemon juice. It antidotes: Ars., Nux-v. v. It follows: Graph., Lach., Puls., Sep., Sulph.

SOURCES

Euphrasia officinalis

(eyebright)

Pharmacy

Euphr. Euphrasia officinalis. Eyebright. N. O. Scrofulariaceae. Tincture of whole plant. Historical dose: Tincture and all potencies, third to 30c potency.

Herbal

Euphrasia as an eye medicine to the ancients and homeopathic experiments have fully confirmed its old-time reputation. The common name of 'Eyebright' gives the indication for the use of this remedy. According to Grauvogl, the "signature of a black spot in the corolla which looks like the eye's pupil, (**liver fire black spot**)" marked

Eye symptoms appear in great variety and the irritation extends to the skin around the eye and to the nose, producing nasal catarrh and disorders of the external nose. (**liver – lung patterns**) Hering mentions "flat cancer on right side of nose" as having come within its curative range.

Ames of Rockland, Ohio, has recorded the case of an old man of 79 to whom he gave Euphr. 3x for lachrymation and sneezing with the result that it relieved him in addition of a prostatic trouble (liver channel involved including kidney) he had for some years, compelling him to rise frequently in the night to urinate.

This led Ames to give Euphr. in other cases of prostatic trouble with good results. As an eye-lotion Euphr. has great value. I have seen corneal opacities removed by its prolonged use. **Planets:** Sun.

Homeopathic

Euphrasia officinalis manifests itself in inflaming the conjunctiva membrane especially, producing profuse lachrymation. (liver fire) Patient is better in open air. (liver wind in closed area that liver qi internal irritation turned into liver fire/wind) It affects the mucous membranes of Eyes, nose and chest, producing **acute** catarrh with free, acrid, watery secretions. (lung qi deficient so vacuity cold so free watery secretion)

Allergies (lung qi irritation) and Hay Fever. Tears are acrid (burning, acidic etc), nasal discharge is bland (watery, tasteless etc), worse evening. (evening is time when yang vanished and yin rising so vacuity liver heat due to yin deficiency in the liver and vacuity cold in lung) Hawking up of offensive mucus. Acrid pus. (liver vacuity heat) Among the noteworthy symptoms of Euphr. is "frequent yawning when walking in the open air." (lung-kidney pattern that is kidney yin less trying to receive open air qi by yawning)

PAGE 652

Clinical

Allergies. Anus, prolapse. Blepharitis. Cataract. Colds. Colic. Condylomata. Conjunctivitis. Cough. Eye disorders. Glandular swellings. Granular eyelids. Hay fever. Influenza. Iritis. Lachrymation. Lips, stiffness. Measles. Nasal catarrh. Nose, cancer. Parotiditis. Phlyctenule. Pimples. Ptosis. Prostate gland disorders. Scrofula. Staphyloma. Sycosis.

Modalities

Better from open air, (lung qi deficient) winking, wiping eyes. Better in bed or getting out of bed. Better from coffee in dark. Worse from sunlight, (liver yin deficient) wind, (liver wind affected) warmth, (liver fire) room. Worse in evening indoors, (liver wind or qi stagnated in small area) warmth, south winds. Worse from light. Lying down aggravates coryza, (so coryza here due to excess condition that is due to pathogenic cold so lying aggravates) better cough (liver vacuity heat attacking lung so it is deficiency pattern cough so lying helps). Cold air and wind causes lachrymation. Walking in open air causes

yawning. Worse after sleep.(after sleep blood again stores in liver so yin deficiency diminishes in liver so it should help not aggravate.not understood)

Symptoms

MIND

Taciturnity(untalkative) and repugnance to conversation,(lung and heart qi deficiency) abstraction(unattentive,absent mind etc) of the mind.(heart qi deficient)
Hypochondriacal(imagined ill health or health obsessed or neurotic etc) indifference. (obsessive thoughts pertains to spleen and indifference –heart qi deficient) Indolence. (lazy,lithargy etc so spleen qi deficient) Melancholy.(heart qi ,lung qi deficient)

Abdomen

Pinchings(pinching pain or tight pains are due to qi stagnation) in abdomen by short fits. Pressive(qi stagnation) squeezing(squeezing pains are due to blood stagnation) and burning across abdomen.(liver wind heat attacking stomach) Colic, alternately with disorders of eyes.(heat colic that is liver heat goes to eyes or to abdomen,colic may be due to cold and blood stagnation also)

Back

Cramp-like, pressive pains in back.(pressive pains are due to qi stagnation or sinking qi)

Chest

Stitches under the sternum during an inspiration.(qi stagnation in sternum so stiching pain during inspiration)

Ears

Otalgia with piercing pains(piercing or penetrating pain are due to blood stagnation) in the region of the tympanum.

Eyes

Conjunctivitis with measles or instead of the menses.(measles-wind heat and conjunctivities –wind heat,blood stagnation so no menses so liver internal fire generated so wind heat) Catarrhal conjunctivitis, discharge of acrid(burning) matter.(wind heat) The Eyes water all the time.(all the time is due to blood stagnation at liver channel)Acrid lachrymation, bland coryza. (Opposite: All-c.) Thick, acrid, yellow discharge from the eyes.(liver heat wind) (Merc. thin and acrid.) Profuse hot or acrid tEars worse open air, lying or coughing, leaving a varnish like mark. Burning and swelling of the lids.(damp heat in spleen) Pressive, cutting pains in the eyes.(qi stagnation in liver or eyes) Photophobia(liver qi stagnation) with

spasms of the lids.(wind heat in spleen) Frequent inclination to blink.(wind heat in spleen) Free discharge of acrid matter. Sticky mucus on cornea,(damp heat) must wink to remove it. Pressure in eyes.(due to qi stagnation in liver or eye) Little blister on cornea.(damp heat) Cataract with watery eyes.(cataract due to phlegm dampness obstruction so watery eyes otherwise cataract can be from wind heat,liver heat also) Opacities of cornea after injury.(opacity due to blood/qi stagnation in eyes) Rheumatic iritis.(iris belong to liver so liver and lung wind affecting) Ptosis. (Gels., Caust.) Chronic sore eyes.(blood stagnation in liver or eyes so soreness) Pain in the eye, alternating with pain in abdomen.(qi/blood stagnation pain in eye alternating with qi/blood stagnation pain in abdomen)

Face

Stiffness of left cheek of tongue.(heart qi stagnant) Upper lip stiff as if made of wood.(spleen qi stagnation) Redness of the face.(heat in stomach) Miliary eruption on the face with sensation of burning and redness, on wetting the face.(stomch damp heat so on wetting the face it aggravates) Shootings in the lower jaw and chin.(heat in the stomch so shooting pain)

Female

Menses painful, flow lasts only an hour or day, late, scanty, short.(liver blood stagnation) Amenorrhea with ophthalmia(liver blood stagnation in down flow and upflow of liver qi) and ulcer on right side of the nose.(wind heat on lung or liver) Stitching pains and itching when walking in open air.(wind cold or wind heat pains when lung qi stagnation gets affected in open air)

Head

Pressive headache with photophobia and heat,(qi stagnation) chiefly in the forehead(stomach qi stagnation and heat) with sensation as if the head would burst. Catarrhal Headache with profuse discharge from eyes and nose.(lung heat so catarrhal headache and profuse discharge and from eyes and nose) Shootings in the temples and in the forehead.(liver and stomach heat) Beating in the head, perceptible on the outside.(heart heat)

Kidneys

Frequent and copious emission of clear urine.(kidney qi deficiency so vacuity cold)

Limbs

Numbness in the arms and hands.(qi or phlegm or fluid stagnation that is spleen qi stagnation) Cramp-like pressive pains in the hands and the fingers.(qi stagnation due to pressive pain) Fits of (painless) swelling in the joints of the hand or of the fingers on moving them.(damp heat in the joints and heat or qi deficient symptom aggravates with movement) Cramp pain in the metacarpus. Torpor of the fingers. Shootings in the legs during repose.(damp heat in spleen as during repose means dampness gets settled)

Stitches in the hip and knee-joints when walking.(wind cold in lung and kidney) Tension, as from contraction of the tendons(liver qi stagnation so tension in tendons), Achilles tendon, on walking. Cracking in the outer ankle of left foot, when stepping.(wind or qi stagnant in outer ankle of left foot.)

Lungs

Difficulty of breathing,(lung qi stagnation) shortness of breath,(blood or qi stagnation in lung) even when seated. Cough with easy expectoration in day time only, less on lying down, at night. Frequent yawning when walking in open air. Cough with suspension of respiration.(qi stagnation acute with lung qi deficient) Cough in the morning with copious expectoration of mucus and fluent coryza.(lung damp and vacuity cold in yang time) Profuse, fluent coryza in morning with much cough and expectoration. Whooping cough only in day-time with profuse lachrymation.(qi deficiency and wind cold/heat lung so whooping cough and liver qi stagnation so liver heat so profuse lachrymation) Cough and much expectoration, less when lying down.

PAGE 653

Male

Spasmodic retraction of genitals(blood deficiency so retraction) with pressure above the pubic bone.(qi stagnation) Prostatitis.(damp heat in bladder or kidney yin deficiency that is vacuity heat) Nocturnal irritability of bladder,(kidney yin deficient so nocturnal vacuity heat irritability of bladder) dribbling urine.(kidney yin deficient so vacuity heat) Lancination and voluptuous itching in the glans and in the prepuce.(lancinating pain is due to blood repletion and wind damp heat in liver channel) Retraction and tingling of the testes.(tingling pain is due to blood deficiency so retraction also due to same) Condylomata and sycotic growths, itching, stinging with sore and burning pain when touched.(blood stagnation so stinging and sore and wind heat so burning and itching)

Mouth

Stammering and frequent interruptions in the speech.(qi stagnation in lungs) Speech difficult in consequence of a paralytic stiffness of the tongue and of the cheeks.(heart and kidney qi stagnation where tongue-heart,cheek-kidney) Sensation of clucking, which mounts into the throat. Shooting pains in lower teeth.(heat in kidney or stomach) Copious bleeding of gums.(stomach heat) Nausea and bitterness in the mouth after smoking.(stomach heat increase due to smoking)

Nose

Fluent coryza, by day, obstruction of the nose, at night.(day time lung cold or qi deficiency and in night lung heat that is lung yin deficiency) Profuse bland fluent coryza. Flat cancer on the right side of the nose. Purulent pimples(damp or phlegm heat binding

or blood stagnated pimples with heat) on the ale nasi. Nosebleed.(lung heat or blood stagnation) Excoriation and painful sensibility of the nostrils.(blood stagnation)

Rectum

Evacuations hard and scanty.(lung heat) Constipation.(large intestine heat) Pressive in anus while sitting with hemorrhoids.(blood stagnation pain in anus) Old flat condylomata at anus with severe burning, worse at night. Dysentery.(damp heat in intestine) Prolapse anus.(kidney qi deficiency)

Sensations

As if dust or sand in eyes,(blood stagnation in eye capillary) as if a hair hung over eyes, as if upper lip were made of wood,(qi and blood stagnation in stomach or lips) stiffness of left cheek of tongue.

Skin

Consequences of blows, bruises and contusions.(blood and qi stagnation) First stage of measles, eye symptoms marked. Condylomata, itching when walking, burning when touched.

Sleep

Yawning when walking in open air. Sleepy during day(blood congestion in brain area or heart area or qi deficiency). Frequent waking (as from fright) at and after 3 a. m.,(liver fire) lasting until 6 a. m., when he falls in a stupor from which he awakens with many complaints.Frightful dreams with frequent waking and starting with fright.(liver fire)

Stomach

Vomiting from hawking mucus. Nausea and bitterness after smoking. Risings with taste of food. Hiccough.(qi stagnation)

Temperature

Chilly and cold. Chilliness predominating.(lung qi deficient) Copious nocturnal sweat. (lung yin deficient vacuity heat) Sweat, mostly on chest, at night during sleep.(heart yin deficient) Chill in the forenoon.

Throat

Gags when clearing the throat in morning.

Comments

The catarrhal effect is prolonged into the chest, producing hoarseness(vacuity cold) and cough with profuse expectoration(vacuity cold).

"Vomiting from hawking mucus," and "vomiting breakfast on clearing throat of offensive phlegm,(night lung heat and stomach/liver heat vomit)" have been cured by Euphr. Cough after the disappearance of hemorrhoids.(blood congested hemorrhides shift in the form of cough) Colic, hemorrhoids and condylomata at anus. There is drowsiness without being able to sleep,(blood or phlegm congestion) frequent waking in the night as from fright.(liver fire)

Compare

Eupionum

(wood-tar)

Pharmacy

Eupi. Eupionum. On distilling wood tar a volatile oil is obtained, which separates into a lighter and heavier oil, the heavier oil is Kreosote, the lighter is Eupion. Historical dose: Tincture and all potencies, third potency.

History

Eupionum is a lighter volatile oil obtained from distillation of wood tar. The effects of Eupion., which was proved by Wahle in Rome, who also proved paraffin, bear a close resemblance to those of Kreosote, but are by no means identical with them. **Planets:** Mercury, Moon.

Homeopathic

Eupionum has a large number of the symptoms center in the female sexual organs. It has marked female symptoms with backache.

A remedy for uterine displacements. Pain in back, followed by a bland leucorrhea. Menses too early and copious, flow thin.

PAGE 654

Intense sweat from slightest exertion. Disgusting dreams. Sacrum pains as if broken, backache extends to pelvis better leaning against anything for support or bending backwards. Cramps in calves at night. A sense in the feet as if walking on needles. Sensation as if whole body were made of jelly.

Clinical

Amenorrhea. Cough. Cramps. Dreams. Glandular swellings. Groin, pains. Hemorrhages. Headache. Leucorrhea. Menorrhagia. Neuralgia. Nosebleed. Night-sweats. Pruritus. Toothache. Tuberculosis. Tumors. Vicarious menstruation.

Modalities

Bending forward ameliorates pain in abdomen. Bending backwards ameliorates backache. Rest ameliorates headache and pains in abdomen, aggravates other symptoms. Worse morning and night. Cough returning every winter. Blowing nose aggravates. Coughing and sneezing aggravates pains in abdomen. Hot drink aggravates toothache.

Symptoms

MIND

Cheerful, joyous disposition. Irritable, angers easily. Great weakness of memory.

Abdomen

Passing flatus better pains. Contracting pain and twisting better by bending over, day before menstruation. Cutting pains during menstruation, when the pains cease discharge

is always copious, blood red and very thin. In left anterior crest of ilium stitches when walking. Squeezing, pressing pain in left groin when quiet.

Back

Sacrum pains, as if broken. Severe backache, must lean against something for support. Pains extended into pelvis. Backache alternating with leucorrhoea. Backache during menses, better by leaning up against something. Pressive heaviness in lumbar vertebrae. Pains in back extend to pelvis, when she stoops she can hardly rise again, sacrum pains as if broken.

Breasts

Breasts increase in size with pressive pains in them, as if something painful were drawn through them with oppression. Stitches under right breast.

Chest

Heaviness, oppression, stitches and tickling in chest. Stitches and pressure in sternum.

Ears

Pressing in ears as if the wind was blown forcibly into them for a long time, the external parts being equally affected. Shooting and tearing in left ear, extending to external temporal region.

Eyes

Eyes weak as if she had cried. **Pressure above eyes as if the globes would be pushed out.** Burning, pressive pains in eye, **copious lachrymation.** Lachrymation worse in fresh air, better in room. Everything appears pale, as if a thin veil were before eyes.

Face

On lower portion of inner side of right cheek a hard nodule size of a pea. Upper lip fissured and painful as if raw. Lips and throat always dry, yet without thirst. Lips painful as if sore.

Female

Uterine displacements. Menses too early and copious, irritable. During menses, irritable and disinclined to talk, burning and stitches in chest and heart. Yellow leucorrhoea, staining the linen yellow with severe backache after menses, when pain in the back ceases, leucorrhoea gushes out. Burning in right ovary. Burning in right ovary. Gushing

leucorrhoea. Chronic tubal disease. Uterine flexions. Sore pain between labia during urination. Pruritus pudendi, labia swollen.

Head

Heat at vertex, stitches from vertex down limbs into abdomen and genitals. Sore painful spots on head. Painful pulsation in forehead.

Heart

Palpitations with slow pulse, believes her heart must be heard some distance away. Before menses appear severe palpitations, ceasing when the flow begins.

PAGE 655

Kidneys

Frequent inclination, scanty discharge, worse when standing than sitting. Frequent and copious, lemon color, chestnut brown before menses. Hot urine passed without pain.

Limbs

Cramps in the calves, worse at night. Lassitude with yawning sleepiness. Tearing in limbs and restlessness in legs preventing sleep. Hands go to sleep easily. Dislocation pains in joints of right hand. Heads of bones of fingers feel too large. Paralytic, dislocation pain in right knee. Stitches in either knee.

Lungs

Crawling in upper bronchi causing dry cough. Rough, scraping, metallic, dry cough. Hard, suffocating, dry cough with stitches in chest, returning every winter. Cough better by warm drinks, by sitting up on bed with breaking out of perspiration.

Mouth

Whole tongue red, covered with raised pimples like herring roe. Tip of tongue dry, back covered with thin dirty white coating. Anterior part of tongue rough like a grater. Insensible feeling in mouth as if scalded by fat. Pappy and sticky in mouth early in morning. Taste sour after eating, putrid.

Nose

Left nostril cracked and the crack bleeds. Sneezing, each time he blows his nose the sneezing reappears. Sneezing with fluent coryza in morning. Bleeding, blood thin and

fluid, when blowing nose. Menstrual flow intermits and bleeding from nose occurs. Soreness in upper nose on drawing air through nostrils in evening.

Rectum

Itching after natural stool. Ineffectual inclination and straining. Tenesmus, better when blood is passed, this weakens her. Three or four times daily, bloody stools. Hard, dry stools with great straining. Dark blood in painless stools. Constipation: stool every three or four days with great straining and prolapsed uterus.

Sensations

As if dislocation of joints, as if muscles torn from bones, as if skin and muscles were too short.

Soles of feet numb as if walking on needles, sticking in heels.

Skin

Nodule on left forearm. Itching biting in skin in genitals penetrating whole body, worse at night, better during motion.

Sleep

Yawning with chilliness and shivering. Sleepiness towards noon. Dreams of disgusting things of naked persons, anxious dreams of her child falling into the water. Frightful dreams, the same dream repeated. Dreams that she is pursued by oxen or falling into an abyss. Wakes bathed in perspiration.

Stomach

Belchings tasting of food. Vomiting of food. Vomit emanating from lower abdomen, dark green tasteless mucus. Bloating and sensation of fullness of stomach with internal chilliness in evening. Region of stomach feels internally sore and distended, pains under both short ribs.

Teeth

The teeth stick together when the jaws are closed. Teeth painful as if loose, gums swollen, scorbutic, worse by hot soup. Toothache like numbness in carious molars, coming on immediately on lying down, better on rising and moving about. Sensation as if gums swollen and teeth would drop out. Gums swollen. Painful jerking-tearing in gums.

Temperature

Chilliness with headache with stitching, better by warm drink. Dry heat towards noon. Sweat of foul odor on least exertion. Colliquative sweating on least exertion, when eating, all night. Copious night-sweat towards morning.

Throat

Sensation below larynx as if something was sticking there with short, dry, hacking cough. In morning much white bad-tasting mucus in throat, expectorated after slight paroxysms of coughing. Sensation of mucus in throat without being able to expectorate. Sensation of dryness of uvula.

Vertigo

Everything turns round on sitting up in bed.

PAGE 656

Comments

Menstruation is too early and too copious, the flow being thin and fluid. During the time there is great irritability, headache and chilliness, painless pulsation in the head, wobbling sensation in upper part of body, everything becomes dark to her.

Nosebleed occurs when menstrual flow intermits. Cutting in abdomen ceases when flow comes on. Yellow leucorrhoea follows, coloring linen yellow. Leucorrhoea with severe backache, has to lean against something to give relief, when the backache ceases the discharge gushes out.

Pulsations all over body while sitting quietly. Hemorrhages occur from nose and bowels. Sticking pains in head and other parts.

Weak eyes and obscured vision. Pressing in ears as if wind were blown in with force and for a long time. Teeth stick together when jaws are closed in morning sensation as if teeth were embedded in some soft matter. Tongue covered with raised nodules. Pain in inguinal region.

Many painful glandular swellings in groins. Spasmodic, periodic pain an inch up rectum. Palpitation with slow pulse. Nodules appear on inner side of right cheek, left side of neck and left forearm.

Cramps in the calves when accompanying uterine or chest complaints. Coldness of whole right side of the body. Colliquative perspiration. Perspires from least exertion, when eating, all night (with tuberculosis).

Compare

(1) Kreosote and the Carbons.

(2) Lach. - pain ceases when discharges appear.

Eysenhardtia polystachia

(orteaga)

Pharmacy

Eys. Orteaga. Eysenhardtia Polystachia. N. O. Anonaceae family. Central America.
Historical dose: Tincture and all potencies, 6x to 30c.

Herbal

A small tree, belonging to the Anonaceae family, found in Guatemala and the west of Texas. The Indians of Central America used it for kidney diseases. The mother tincture is prepared from the heart-wood of the trunk.

The symptomatology was established by Egee in 1932, on seven provers, using the 6x potency. **Planets:** Venus.

Homeopathic

Eysenhardtia has slow and difficult concentration. Dull aching in the head, localized especially on the forehead and above the eyes. Eyelids heavy. Throat dry. Urination frequent, late and scanty. Burning pain in the thighs. Sleepiness in the afternoon and evening. Neuralgia of the forehead and eyes. Kidney colic. Cystitis.

Clinical

Cystitis. Headache. Kidney colic. Neuralgia.

Modalities

Worse between 4 p.m. and 6 p.m. Worse in the evening.

SOURCES

Julian.

PAGE 657

Fabiana imbricata

(pichi pichi)

Pharmacy

Fab. *Fabiana imbricata*. Pichi-pichi. N. O. Solanaceae. A South American shrub cultivated in Southern California. Tincture. Fluid extract. Historical dose: Tincture and all potencies, ten to twenty drops of the tincture.

Herbal

Fabiana imbricata has been used as a terebrinthine diuretic. It has also tonic and cholagogue properties, used in the treatment of nasal catarrh, jaundice, dyspepsia. Also to increase the secretion of bile, (Albert Schneider). **Planets:** Venus.

Homeopathic

Fabiana imbricata is useful in the uric acid diathesis, cystitis, gonorrhea, prostatitis, dysuria. Gallstones and liver disorders. Bladder catarrh with suppurative prostatic conditions, post-gonorrheal urinary conditions. Bladder tenesmus and burning after urination. Excoriating urine and stones.

Clinical

Bladder weakness. Cystitis. Gallstones. Gonorrhea. Liver, affection. Prostate, disease.

SOURCES

Boericke. Clarke.

Fagopyrum esculentum

(buckwheat)

Pharmacy

Fago. Fagopyrum esculentum. Buckwheat. Polygonum Fagopyrum. N. O. Polygonaceae. Tincture of the whole mature plant. The fresh mature plant is pounded to a pulp and macerated in two parts by weight of alcohol. Historical dose: Tincture and all potencies, third potency and 30x.

Herbal

Fagopyrum, commonly known as Buckwheat, acts upon the skin and the digestive organs. Fagopyrum has had an extensive proving. Though there is little clinical experience with this herbal remedy on record, some features are sufficiently well marked to justify their being classed as characteristics.

One of the most marked symptoms is a visible pulsation of the carotids and other arteries. Offensiveness distinguishes many excretions.

Berridge has recorded two cases in which Fagopyrum was of service. In one it removed the following symptoms after aggravating the pain in the shoulder:

On waking, dull, bruised pain in top of left shoulder, rather posteriorly, extending up neck, worse on moving the part, going off after breakfast and returning later in the day, constipation, nausea a little before 11 a. m. afterwards dull pain in left temple, feeling of heat all over.

In the other case Fagopyrum permanently removed after a week's aggravation, sinking in the stomach about 6 or 7 p.m. and temporarily removed a chronic diarrhea about 6 or 7 a. m. The diarrhea was increased later and was met by Lach.

Hale mentions that there is a popular belief that indulgence in buckwheat cakes is a prolific cause of skin eruptions. He has found it curative in cases of eczema, erythema and intertrigo.

Homeopathic

With Fagopyrum itching is marked and is felt in different parts of the body, eyes, posterior sinuses, anus, deep in hands, legs etc. Pruritus senilis. Post-nasal catarrh, dry crusts, granular appearance of posterior sinuses with itching. Fluent coryza. Itching erythema. Visible pulsations of carotids and other arteries. Discharges are offensive. Pain in streaks.

Senile itching. There is intense an itching of the arms and legs, becoming worse toward evening. Blotches like flea-bites appear in many localities, sometimes all over the body, are sore to the touch and are multiplied by scratching.

These eruptions are persistent and the itching is intense. Blind boils may be developed and attain a large size. The itching of the Face is especially marked about the roots of the whiskers.

PAGE 658

Itching of the hands which is "deep in" is persistent and annoying, this condition being supposed to be the result of irritation of the coats of the arteries.

Clinical

Arteries, throbbing. Diarrhea. Eczema. **Eyes** disorders. Genitals offensive sweat.

Granular lids. Hands, sweat. Headache. **Heart** disorders. **Heart** burn. Intertrigo. Itching eruptions. Liver disorders. Mumps. Nausea. Nose, soreness of, crusts in. Ophthalmia. Palpitations. Pruritus pudendi. Rheumatism. Styes. Taste, altered. Throat, sore.

Constitutions

Weak constitutions. **Planets**: Jupiter, Saturn.

Modalities

Better cold water, coffee. Better cold applications, pressure. Ameliorations from motion in cold air and from sitting still in warm room. Worse in the afternoon. Worse from sunlight, scratching, motion. Aggravations occur after retiring, ascending stairs. Worse from deep inspiration, walking in bright sunlight, lying on right side, riding in cars. Worse when stooping or writing.

Symptoms

MIND

Depressed. Cross, irritable. Inability to study or remember. Exceedingly happy. Inability to fix attention.

Abdomen

Abdomen distended with flatulence, worse by pressure of clothes. Soreness in hypogastrium.

Back

Stiffness and bruised feeling in the muscles of the neck with sensation as if nape would not support the head.

Breasts

Breast less painful than usual before period.

Chest

Heavy feeling, bruised pains and stitches in chest. After retiring, severe sticking through breast from nipple backward, better by pressure. Sharp, stitch-like needle prick in right breast on inspiration. Twinges of pain up and down left breast, outer side.

Ears

Itching in and around ears. Heat, itching and neuralgic pains in external ears. Itching along Eustachian tubes.

Eyes

Eyes swollen, red, hot, itching, as if sand in eyes. Itching and smarting, swelling, heat and soreness.

Itching of the eyes. As if eyeballs were pushed out. Pain along lachrymal duct. Meibomian glands of left lower lid inflamed. Itching in the margins. Lachrymation, worse by reading. Aching deep in eyeballs.

Face

Face flushed. Soreness of left malar bone, also of temporal region. Lips dry and cracked, vertical crack on upper lip.

Female

Itching, better by cold water. Pruritus vulvae with yellow leucorrhea, worse rest. Leucorrhea staining yellow. Burning in right ovary. Pains in right ovary, on walking in afternoon.

Head

Itching of eyes and ears. Pains deep in head with upward pressure. Headaches with a tired neck, better bending backwards. Itching in and around eyes and ears. Head hot, better bending backward with tired neck. Occipital headache. Bursting pains. Cerebral hyperemia.

Heart

Pain around heart, better lying on back, extending to left shoulder and arm. Throbbing in all arteries after retiring. Palpitations with oppression. Pulse irregular intermittent, rapid. Light feeling in chest. Palpitation with oppression. Pulse irregular and intermittent.

Kidneys

Stitching pains in region of right kidney. Cutting in urethra. Difficulty in voiding last drops of urine, several drops pass after he thinks he has finished.

Limbs

Stiffness and bruised sensation in the muscles of the neck with sensation as if nape of neck could not support head. Pain in shoulder with pain along fingers. Itching deep in hands. Itching in arms and legs, worse towards evening. Feet numb and pricking. Streaking pains in arms and legs.

Liver

Pain in region of liver on stooping and a bruised, sore feeling at 10 a. m., worse lying on right side. Sharp sticking through liver from before backward.

Lungs

Breath very offensive. Touching the neck occasions a cough with a smarting sensation extending to the ear and throat, under lobe of right ear.

PAGE 659

Male

Profuse offensive sweat of genital organs.

Mouth

Soreness of teeth in closing them, worse by cold water. Gums sore and bleed easily. Swelling in roof of mouth. Bad taste in mouth in morning. Taste of ingesta after dinner with belchings.

Neck

Parotid and submaxillary glands swollen, sore and painful. Stiffness of neck and soreness of all neck muscles. Neck tired, as if unable to support head. Dull pain in back of neck, at base of occiput, better bending head backwards.

Nose

Itching in posterior sinuses. Post-nasal catarrh. Nose red and sore externally. Fluent coryza with sneezing, followed by dryness and crust formation. Septum deeply cracked. Crusts in nostrils.

Rectum

Itching in anus. Burning in rectum after stool, creeping, urging, tenesmus. Diarrhea with tenesmus, stools watery or pappy with flatulence, very offensive.

Skin

Eczema. Erythema. Intertrigo. Blind boils. Skin hot, swollen. Severe itching, better by bathing in cold water, worse scratching touch and retiring. Sore red blotches. Itching of knees and elbows and hairy portions. Itching of hands, deep within. Vesicular, pustular and phlegmonous dermatitis.

Sleep

Constant desire to yawn and stretch, 5 to 6 p.m. Restless night, wakes 5 a. m. and sleeps again, many dreams.

Stomach

Belchings of scalding, hot, acid, watery substance, better coffee. Drooling. Nausea persistent better eating. Uneasy, empty feeling in stomach. Bruised, sore feeling in stomach.

Temperature

Chills along back in afternoon. Heat and restlessness after retiring. Face, head and hands burn in afternoon. Hands and feet alternately hot and cold. Cold, clammy sweat at night, very profuse. Sweat of hands, though cold. Soles of feet moist, disagreeable odor in axilla.

Throat

Soreness and a feeling of excoriation, deep down pharynx. Uvula elongated tonsils swollen.

Thick mucus collects in throat on rising. Feeling as if a lump in esophagus, painful on swallowing. Tonsils swollen, badly-smelling cheesy mass coughed up. Throbbing of carotids.

Comments

Fagopyrum effects upon mental conditions are marked by depression of spirits, irritability, inability to study or to remember what has been read. Bringing to mind: Aconite, Bryonia, Chamomilla, Coffea, Colocynth, Ignatia, Lachesis, Mercury, Nux Vomica, Staphisagria, Stramonium and Veratrum.

Fagopyrum effects upon the head are deep-seated and persistent. There is vertigo, confusion, severs pain in many parts of head with upward pressure described as of a bursting character.

The pain may be in forehead, back of eyes through temporal region on either side, but always of a pressive or bursting nature. For congestive headaches it is as valuable as Belladonna, Glonoine, Nux vomica or Sepia.

In and about the eyes there is itching smarting, swelling, heat and soreness, the itching being especially marked and usually regarded as characteristic. The last named symptom is no less prominent in disorders of the ears, as has often been shown in the efficacy of buckwheat flour in frost-bites or erysipelas of those useful organs from time immemorial. Here the similarity to Agaricus will readily be recognized.

The nose does not escape. It is swollen, red inflamed and sore. There is at first fluent coryza with sneezing, followed by fullness, dryness and the formation of crusts. Nor is the burning absent which has been elsewhere noted. There is much soreness and somewhat persistent pain from even gentle pressure.

The face is pale or unevenly flushed with dark semicircles below the eyes. Later, the face becomes swollen, hot and dry, as though severely sunburned and the lips are cracked and sore. The mouth feels dry and hot and yet saliva is not wanting.

PAGE 660

There is soreness and swelling of roof of mouth and the tongue is red and fissured along its edges. The bad taste in the morning reminds us of Pulsatilla.

In the throat, there is soreness with pain just back of the isthmus of the fauces, a feeling of excoriation and soreness extending deep down in the pharynx. The uvula is elongated, the tonsils are swollen and red, there is a sensation of rawness in the throat strikingly reminding us of Phytolacca.

Externally, there is scarlet redness of the neck below the mastoid process, throbbing of the carotids, the neck feels tired, the head heavy and the parotid glands are swollen and painful. It is unnecessary to name the remedy having similar symptoms.

There is persistent morning nausea which should lead us to study this remedy in the vomiting of pregnancy. Contrary to Lycopodium and Nux moschata the appetite is improved by eating. The empty or "all-gone" feeling at the stomach is like that of Sepia.

In the abdomen there is fullness and pain but no rumbling. Discharges of flatus are frequent and annoying. The region of the liver is painful, tender and there is aggravation from pressure, compelling the patient to lie on the left side. The stools are pappy or watery, profuse offensive and followed by tenesmus.

On the male genital organ there is profuse perspiration of an offensive odor. The urine is scalding and pain extends from testicles to abdomen.

In females Fagopyrum acts with force upon the right ovary, producing pain of a bruised or burning character, noted particularly when walking. There is pruritus with slight yellow leucorrhea, the discharge being more noticed when at rest than when exercising. So far as known this latter symptom does not occur under the action of any other remedy.

In the chest we find a heavy, pulsating pain extending to all its parts.

This is persistent and is worse from a deep inspiration. Around the heart there are dull pains with oppression and occasional sharp pains passing through the heart. Pressure with the hand increases the oppression. The pulse is increased but is extremely variable.

On the muscular system the action of the remedy stands out in bold relief. There is stiffness and soreness of all the muscles of the neck with pain and a feeling as if the neck would hardly support the head. There are dull pains in small of back with stitching pains in the region of the kidneys. Pains with occasional sharp stitches extend from the arms to muscles of both sides of chest.

Rheumatic pains in the shoulders of a dull aching character. Stinging and burning pains extend the whole length of fingers, aggravated by motion. Streaking pains pass through arms and legs with sharp pains extending to feet. Pains extend from hips to small of back and these also frequently run down to the feet.

The sleepiness occurring early in the evening and characterized by stretching and yawning. It is not profound and when the mind is diverted the patient gets wide awake, but soon after relapses unless conversation is continued. In bed, sleep is disturbed by troublesome dreams and frequent waking.

Compare

- (1) Dolichos, Bov., Urtica.
- (2) Rhus-t. - better by motion, Senega - better bending head back.
- (3) Lyc. - hours of aggravation 3 to 6 p.m.
- (4) Puls., Polygonum.
- (5) Coffee relieves stomach symptoms.

Anshutz. Clarke.

Fagus sylvatica

(beech nuts)

Pharmacy

Fagu. Fagus sylvatica. Fagus farfara. Beech. N. O. Cupuliferae. Tincture or trituration of the nuts. The Beech nuts are pounded to a pulp and macerated in five parts by weight of alcohol. Historical dose: Tincture and all potencies.

PAGE 661

History

Our knowledge of this remedy is derived from the ill effects of eating the nuts, among which are dread of liquids and salivation. It is this which has suggested its use in hydrophobia or rabies.

John Bauhin says that the nuts will disorder the head like darnel, hogs grow stupid and drowsy by feeding on them. Ray and Mangetus say the same. **Planets:** Moon.

Homeopathic

In addition, trembling, convulsions with periodic spasms, stiffness and coldness have been observed, pointing to the same kind of nerve irritation as if caused the poison of rabies. Swelling of the mouth and headache were noted in one case. In some instances death has resulted from the effects of the nuts.

Clinical

Convulsions. Epilepsy. Headache. Hydrophobia. Rabies. Vertigo.

Comments

Dr. E. Berridge contributes the following concerning the action of Fagus sylvaticus or Beech nuts:

A boy aged 13 had eaten four days ago a large quantity of beech nuts. I found him in great pain, languid and terrified. Also, with apprehensions of present death. Pulse very

unequal, sometimes extremely quick, sometimes languid and intermittent, skin burning violently, mouth flowing with froth and saliva.

Intolerable thirst, entreating for drink, but so soon as any liquid was brought he seemed to shudder with equal horror, as if he had been eating unripe grapes. Soon after eating the nuts he had been seized with torpor, gloominess and dread of liquids. He had not been bitten by any rabid animal.

Next day, early in the morning, he was the same, but seemed to talk more in his wildness and perturbation of mind and his mouth flowed with foam more abundantly, the urine he had voided by night was red and fiery, depositing a copious turbid white sediment, resembling an emulsion of beech nuts, subsiding as deep as the breadth of the finger at the bottom of the vessel.

A few hours before he died he vomited a porraceous bile after which he died quietly.

Compare

(1) Epiphegus in headache and salivation, Epiphegus which grows on the beech and partakes of its properties.

SOURCES

Anshutz.

Fel tauri

(ox-gall)

Pharmacy

Fel. Fel tauri. Ox bile. Ox Gall. Bilis Bovina. N. O. Ruminantia. Impissated gall triturated with sugar of milk or lower dilutions may be made with water. Historical dose: Tincture and all potencies, lower trituration.

History

Ox gall is a remedy of very ancient use. It is used in the old-school mostly as a purgative, for preventing putrefactive changes in the intestines and for increasing peristalsis.

Fel. t. has been proved homeopathically by Buchner and has produced a few characteristic symptoms, disordered digestion, diarrhea, headache, pains in joints and cramps. It has removed a tendency to sleep after eating. Several symptoms were noticed in nape of neck. **Planets:** Jupiter.

Homeopathic

Fel tauri increases the duodenal secretion, emulsifies fats and increases the action of the intestines. Liquifies bile and acts as a purgative and cholagogue. Disordered digestion, diarrhea and neck pain.

Fel Tauri has constipation, chronic gastric and intestinal catarrh, cirrhosis of liver, diabetes. Nape of Neck pains. Obstruction of the gall ducts. Gallstones. Jaundice. Tendency to Sleep after eating. Much flatus, ascites.

Clinical

Asthma. Catarrh. Constipation. Diarrhea. Flatus. Gallstones. Headache. Indigestion. Jaundice. Rheumatism.

Symptoms

MIND

Peevish, irritable mood. Greatly inclined to all kinds of business, unpleasant impression did not affect him.

Abdomen

Violent peristaltic movements. Rumbblings and motions in abdomen.

PAGE 662

Back

Tension in nape.

Chest

Anxiety in chest. Constriction, on walking at 3 a. m. cannot sleep again for tightness of breath and cannot remain lying, it seems as though something in throat prevented free passage of the air, better by deep inspiration and sitting upright.

Food

Increased thirst.

Head

Confusion. Violent headache in morning, on pressure upon right temple, extending on to occiput and nape of neck.

Kidneys

Urging. Urine offensive.

Limbs

Some tearings in left shoulder-joint, extending up to nape of neck. Cramp in right toe.

Male

Scrotum itching and afterwards becomes moist.

Rectum

Stool thin with urging and sensation of warmth in anus. Stool thin, pasty, followed by pressing although with crumbling feces.

Stomach

Gurgling in stomach and epigastric region. Odorless and tasteless belchings, gurgling in stomach and epigastric region.

Sleep

Sound sleep in morning with some perspiration. Tendency to Sleep after eating. No inclination to sleep after eating, as he was accustomed to do.

Compare

(1) Merc-d.

(2) Cholest. in Gallstones.

(3) Calculobili - triturate Gallstones up to 10 to 12x.

SOURCES

Ferrum aceticum

(acetate of iron)

Pharmacy

Ferr-a. Ferrum aceticum. Aceticum of Iron. Historical dose: All potencies.

History

Especially adapted to thin, pale, weak children who grow rapidly and are easily exhausted. **Planets:** Venus, Mercury.

Homeopathic

Alkaline urine in acute diseases. Pain in right deltoid. Nosebleeds. Varicose veins of the feet. Copious expectoration of greenish pus, asthma.

Tuberculosis, constant cough, vomiting of food after eating, hemoptysis.

Clinical

Asthma. Cough. Hemoptysis. Nosebleed. Tuberculosis. Varicose veins.

Modalities

Worse sitting still, lying.

SOURCES

Boericke.

Ferrum arsenicosum

(arsenate of iron)

Pharmacy

Ferr-ar. Ferr. arsenicosum. Arseniate of Iron. Tri-ferric diarsenate. Trituration. Historical dose: All potencies, 3x trituration.

History

Hale was the first to use Ferr-ars., giving the 2x with a promptly curative result to an anemic girl who had been given Iron and Arsenic separately, under old-school treatment in vain.

P. C. Majumdar has put Ferr-ar. to excellent use in cases of enlarged liver and spleen with fever. When there is no fever Ferr-i. is better.

These are his indications for Ferr-ar.: Enlarged spleen with high fever of a continued type during fever the face is flushed and sweaty, but during the intermission the face is pale.

Planets: Mars.

Homeopathic

Ferr-ar. has enlarged liver and spleen with fever, undigested stool, albuminuria. Simple and pernicious anemia and chlorosis. Skin dry. Eczema, psoriasis, impetigo. Ferr-ar. has been used with benefit in cases of albuminuria.

Disinclination to work, even to leave his bed. Constipation, sometimes, colliquative diarrhea, the stools consisting of undigested matter and mucus, no thirst during any stage of the fever, heat intense and prolonged with slight burning of the whole body, emaciation and debility.

Clinical

Anemia. Bright's disease. Chlorosis. Liver, enlargement. Spleen, enlargement.

Comments

Majumdar reports these two cases: (1) A robust, healthy man, 25, went into a very malaria district of Bengal and had his first attack of fever.

PAGE 663

He was given large does of Quinine which suppressed the paroxysms for a time, but they continually recurred. After four years he returned home a changed man: pale, jaundiced, emaciated, abdomen filled with enlarged and indurated liver and spleen, slightly tender to pressure. These organs left no room for his food.

He had obstinate constipation, high fever generally appearing in afternoon, no chill or thirst, but copious sweat without much relief to fever. Ferr-ar. 6c, twice daily, made an improvement in three days. It was continued for a month and a half with occasional stoppages and in six months he was completely restored to health.

(2) A boy, 15, suffered from fever and enlarged spleen. The liver was not enlarged. Voracious appetite, but no digestion, undigested diarrhea stools., Continued fever, 102 to 104, burning of body. Some thirst. Great emaciation. Ferr-ar. 6c night and morning. He was cured perfectly in a year.

Compare

(1) Ferr-i., Ferr., Ars., Calc-a., Chin.

SOURCES

Clarke.

Ferrum bromatum

(bromide of iron)

Pharmacy

Ferr-br. Ferrum bromatum. Bromide of Iron. Trituration. Solution. Historical dose: All potencies.

History

Hale mentions this remedy as having been highly commended in cases of spermatorrhea with anemia, debility and depression. It has been since proved by Dr. Sarah. N. Smith of New York, who took the sixth dilution of Boericke and Tafel's make.

The symptoms which made the most impression on the prover were the "dead, numb " feeling of the scalp, the unconscious moaning after stool and the sticky, excoriating leucorrhœa. The heaviness and discomfort in the uterus was so severe that she declined to continue the proving as it interfered with her work. **Planets:** Mars, Venus.

Homeopathic

Ferrum bromatum produced in this order: Very distinct symptoms in the head and eyes, dry mouth and nose, relieved by coryza, a feeling that she might die, diarrhea burning in urethra when urinating, sticky, excoriating leucorrhœa, weight and discomfort in uterus.

Clinical

Headache. Leucorrhœa. Spermatorrhea. Uterus, prolapsed.

Compare

(1) Heavy eyes. Con., Caust., Gels.

(2) Smarting while urinating, Cann-s. - has burning while urinating and after.

SOURCES

Clarke.

Ferrum cyanatum

(cyanide of iron)

Pharmacy

Ferr-cy. Ferrum cyanatum. Cyanide of Iron. Historical dose: All potencies.

History

Neuroses with irritable weakness, hypersensitiveness, especially of a periodical character. Epilepsy, cardialgia with nausea and flatulence. Constipation, alternating with diarrhea, chorea). **Planets:** Mars, Moon.

Homeopathic

Constipation. Epilepsy.

SOURCES

Boericke.

Ferrum iodatum

(iodide of iron)

Pharmacy

Ferr-i. Ferrum iodatum. Iodide of Iron. Trituration of freshly prepared crystals. Solution. Historical dose: All potencies, third trituration.

History

The Iodide of Iron has had an independent proving. Ferrum iodatum corresponds more particularly to scrofulous affection, glandular enlargement and tumors.

Grimmer used Ferr-i. for breast tumors, cancer, exophthalmic goiter inflammation and enlargement of glands, symptoms and conditions based on the tubercular diathesis.

Berridge removed with Ferr-i. this train of symptoms: "Morning catarrh, hot and restless in bed, sweet smell of urine."

PAGE 664

Homeopathic

Ferr-i. has a symptom somewhat like the Ferrum symptom: "as if something rolled into throat and closed it like a valve." With Ferr-i. it is, "food seems to push up to throat as if it has not been swallowed." Sharp or cutting pains are noted in eyes, ears and root of nose to occiput. Sensation as if lying in a cramped position.

Ferrum iodatum has helped scrofulous affections, glandular enlargements and tumors. Crops of boils. Acute nephritis following eruptive diseases. Uterine displacements. Body emaciated. Anemia. Exophthalmic goiter following suppression of menses. Debility following drain upon vital forces. Impetigo of the cheek. Breast tumors, cancer and conditions based on the tubercular diathesis.

Clinical

Albuminuria. Alcohol, effects. Amenorrhea. Anemia. Breast, tumors. Bronchorrhea. Cancer. Catarrh. Coryza. Diabetes. Dyspepsia. Exophthalmic goiter. **Eyes**, scrofulous inflammation. Glands, enlargement. gonorrhoea. **Heart**burn. Kidneys, disorders. Leucorrhoea. Liver enlarged. Pneumonia. Scoliosis. Scrofula. Spleen, enlarged. Tuberculosis. Uterus, prolapsed. Writer's cramp.

Constitutions

Suited to scrofulous or mercurial diathesis to subjects of relaxed tissue (tuberculosis in the third stage, bronchorrhea, pneumonia). **Planets**: Mars, Moon.

Modalities

Better from open air. Worse from motion touch. Worse at night and in the morning. Warmth aggravates.

Symptoms

Abdomen

Fullness, even after a little food, stuffed feeling, as if she could not lean forward. As if a cord were drawn connecting the navel and anus.

Ears

Roaring.

Eyes

Exophthalmic goiter, after having suppressed the menses.

Female

Constant bearing down. On sitting, a feeling as if something pressed upward in vagina. Much bearing down. Retroversion and prolapse of uterus. Leucorrhoea like boiled starch.

Prolapsed uterus, difficult to retain the urine. Menses is absent with exophthalmic goiter. Menses suppressed or scanty. Itching and soreness of vulva and vagina.

Kidneys

Crawling sensation in urethra and Rectum. Urine dark. Urine, sweet smelling, dark colored, depositing thick white sediment. Sensation as if urine were stopped at fossa navicularis. Difficulty in retaining urine. Incontinence in anemic children.

Lungs

Coryza, discharge of mucus from nose, trachea and larynx. Pressure beneath sternum. Scrofulous swelling of nose. Chest feels oppressed. Hemoptysis.

Nose

Thick.

Rectum

Crawling in rectum.

Sensations

Peculiar symptoms in rectum and anus: As if anus were compressed, as if worms were in anus, as if something twisted round about in a circle, as if a cord were drawn connecting navel and anus, as if a screw were boring in anus.

Stomach

Food seems to push up in the throat, as if it had not been swallowed.

Throat

Sore, as if of a splinter, shooting in different directions. Hoarse.

Comments

P. C. Majumdar has used Ferrum iodatum with success in the cases of enlarged liver and spleen when unaccompanied by fever. When fever is present Fe-a. is the better remedy.

The leading symptoms are : "Feels as if she has eaten too much, a sort of upward pressure. Stuffed feeling in abdomen as if she could not lean forward, costiveness." These are very common symptoms in cases of enlarged spleen. "Sweet-smelling urine" appears to be a leading symptom of Ferr-i.

Ferrum magneticum

(loadstone)

Pharmacy

Ferr-ma. Loadstone. Ferrum magneticum. Sesquioxide of Iron. A black oxide of iron. Historical dose: All potencies, third potency.

History

Caspari is the authority for Ferr. magnet. Teste, who puts, Ferr-ma. in the Arnica group along with Ledum, Croton, Rhus-t. and Spig., has had some experience with it. Sycotic constitution. **Planets:** Moon.

Homeopathic

Ferr-ma. produces paralytic weaknesses like the other Iron preparations of which this is the most peculiar: After perspiring during a moderate walk, weakness and lassitude, which seem to proceed from the abdomen. As with Ferrum, there is worse during a meal, flatulency, grumblings, movements in abdomen with urgent diarrhea after a meal.

The abdominal sufferings are felt more on the left side. Very abundant and frequent emission of fetid wind. Many rectal and urinary symptoms are recorded. The appearance of warts may indicate that Ferr-ma. is related to the sycotic constitution. Marked symptoms in intestinal tract. Pain in nape of neck. Paralytic weakness. Small warts on hands.

Pains and itchings, some of which reappear at intervals of four weeks. Prickings, lacerations, tingling and itching in different parts. Paralytic weakness, difficulty of movement and relaxation of muscles. Excessive lassitude. Trembling in the legs and arms. Fatigue on taking the slightest exercise.

Clinical

Amaurosis. Diarrhea. Flatus. Ganglions. Paralysis. Rheumatism. Vision, disorders. Warts. Whitlow.

Symptoms

MIND

Indecision and long reflection before undertaking anything. Indolence, slowness of movement. Air of importance and self-sufficiency. Irrascibility.

Abdomen

Movements and grumbling in abdomen. Loose evacuations with much flatulency, especially left side with pullings in legs. Abundant and frequent emission of fetid flatus.

Chest

Tearing and lancination in the left side of the chest, when breathing. Sensation of emptiness in the chest.

Ears

Pullings in the ears and the pharynx during deglutition. Itching, wringing and cold lancinations in the auditory duct. Tingling in the ears.

Eyes

Darkness before the right eye, which causes it to wink. Pressive pain on the eyelid, which impedes the sight. Swelling of the lower lid, which makes the eye appear smaller. Pricking itching in the canthi. Painful sensibility of the lachrymal sac with profuse lachrymation.

Face

Face dejected with general heat, followed by redness of the face. Heat of the face. Itching and tingling in the face and on the lips. Eruptions on the forehead in the eyebrows, at the root of the nose, on the cheeks, the lips and the chin.

Head

Pulsative headache, by fits. Circumscribed headache in the morning, generally on right side. Headache on stooping, on moving the arms and on going up stairs. Itching in the scalp. Eruption of small painful on the scalp. Falling off of the hair.

Kidneys

Urine red and copious, which becomes the color of clay after having stood some time.

Limbs

Cramp-like or paralytic pullings or jerking pullings in the forearms and in the hands. Pain, as from dislocation in the wrist. Paralytic pulling in the right arm. Small warts on the back of the hands and on the wrist. Whitlow. Dryness and tension in the hands.

PAGE 666

Limbs

Acute lancination in the knee. Ganglion of the foot. Tingling and pricking in the heels. Starting in the soles of the feet. The little toe is painful.

Lungs

Frequent hawking of mucus. Dry cough after dinner, proceeding from an irritation in the trachea, as if one had swallowed dust.

Male

Itching and lancination in the scrotum and in the extremity of the glans. Increase of sexual desire with and without erection or absence of all sexual desire, yet without importance.

Mouth

Accumulation of water and saliva in the mouth. Itching sensation in the posterior part of the palate.

Neck

In the morning, pain in the nape of the neck, as if from having lain in an inconvenient position

Nose

Sneezing with stoppage of one nostril and catarrh.

Rectum

Urgent want to evacuate with expulsion of flatus only. On expelling the flatus there escapes a small liquid evacuation. Itching and shooting in the anus. Tingling and itching in the rectum.

Skin

Itching and tingling in different parts, especially in the evening, mitigated by scratching, but appearing in other parts. Red spots, sometimes of a bright red or bluish red, some disappear on being pressed. Small warts (on the hands).

Sleep

Violent and noisy yawnings with accumulation of water in the mouth. Drowsiness with prompt sleep on lying down or even when seated. Absurd dreams at night. Dreams immediately after lying down, waking with a start, coldness which causes trembling. Inclination to remain in bed in the morning. After rising, weakness in the knees.

Stomach

Flatulence during a meal, afterwards fatigue and burning pain in epigastrium, especially on breathing. Nausea. Abortive risings.

Teeth

Bleeding of the gums, when slightly pressed upon. Painful sensibility of the teeth during mastication.

Temperature

Shivering and cold in the side opposite to that on which the patient has lain. Heat, as if a catarrh were developing itself with lassitude and down-cast eyes. Internal heat with perspiration and slow pulse after washing the body. The pulse is slow and small. Perspiration on the slightest exercise. Sweat in the morning on the body and on the occiput. Sweat of an acid smell, as in measles.

Throat

Bitter and rancid taste in the pharynx, on hawking. Sensation as if mucus were adhering to the uvula. Lancinations in the throat. Pressure in the esophagus, as if too much had been swallowed at one time.

Comments

Ferr-ma. relieved (after Spig.) and old man suffering from chronic rheumatism of the nape of the neck with irritable disposition.

Also a case of compound capsular cataract in a gouty patient. A third patient had rheumatism of both thighs, coming on after violent exercise. This patient was treated in two attacks. In the first attack he received Arn. first and then Ferr-ma. In the second, Ferr-ma. was given at once and the effect was speedy and marked.

The fourth patient has a very unpleasant experience with the medicine. He suffered from a mercurial neurosis and was very sensitive to medicines. One of the symptoms which led to its being given was a painful contraction of the posterior cervical muscles, against which no remedy Teste had tried had produced any effect.

Ferr-ma., four globules in a tumbler of water, two tablespoonfuls every day, was the prescription. The first tablespoonful, which was taken in the morning, seemed to produce a sensible improvement. A quarter of an hour after the second dose, which was taken at 4 p.m. the sight became dim, a halo of fire, red and violet, was seen first in front of the right and afterwards in front of the left eye.

Soon after, this halo, which formed a circular zigzag-shaped line, became narrower and narrower.

Finally produced such a complete blindness, that the patient assured Teste he was unable to distinguish night from daylight. This lasted one hour and did not pass off entirely until after a meal.

Much more distressing phenomena followed towards 8 p.m. the pain in the nape, which first was seated on the left side, passed to the right invading the whole extent of the trapezoid muscle, where it became literally frightful.

"For two days and nights the patient, who was a brave and strong man and whom I had seen bear the most painful surgical operations without uttering a sound, suffered to such an extent that he uttered heart-rending cries."

Camph., Puls. and Bry failed to relieve, the first rather aggravated. Rhus-t. effected some relief. But it did not prevent the recurrence, for eight days in succession of the visual phenomena, though with less intensity than the first time, at irregular intervals, generally 6 or 7 a. m. and sometimes even at night in perfect darkness.

Boericke. Clarke.

Ferrum metallicum

(iron)

Pharmacy

Ferr. Ferrum metallicum. Iron. Including also symptoms of the acetate and the carbonate. Triturations of the pure metal and of the carbonate, solution of the acetate. Historical dose: All potencies, second to the sixth potency.

History

Ferrum is the Mars of the Alchemists is one of the prominent constituents of the animal body, being present in considerable quantity in the blood. It is present in many articles of daily food and when given in excess its first effect is to increase the amount of iron in the blood.

Ferr. stimulates the appetite, augment the heart's beats and the bodily vigor. The secondary effects, which ensue sooner or later if the administration of iron is continued, are those which give the indications for homeopathic prescribing. Hahnemann describes the effects of iron on persons who habitually drink chalybeate waters:

"In such localities there are few persons who can resist the noxious influence of the continued use of such waters and remain quite well, each being affected according to his peculiar nature. There we find more than anywhere else chronic disorders of great gravity and peculiar character, even when the regimen is otherwise faultless.

Weakness, almost amounting to paralysis of the whole body and of single parts. Some kinds of violent limb pains. Abdominal disorders of various sorts, vomiting of food by day or by night. Tubercular pulmonary ailments often with blood spitting, deficient vital warmth. Suppression of the menses, miscarriages, impotence in both sexes infertility. Jaundice and many other rare cachexias are common occurrences."

In the anemia of cancer and syphilis it is often of great service as an accessory and need not interfere with more specific remedies. But it is not suited to all cases of anemia and chlorosis or even to a majority of them.

Apart from its organopathic sphere, Ferrum has a strictly homeopathic use in anemias in which the highest potencies are curative. For excess of Iron will cause anemia and at times will aggravate it when present. The type of anemia caused by Iron and suited for its homeopathic use is commonly seen in young persons subject to irregular distributions of blood.

Anemia with weakness. The cheeks are flushed as if in blooming health, but in spite of bloom in appearances there is pallor of lips and mucous membranes, fatigue and breathlessness and any motion will set up the symptoms.

PAGE 668

Ferrum metallicum is adapted to young weakly persons, anemic and chlorotic with pseudo-plethora, who flush easily. Cold limbs, over-sensitiveness, worse after any active effort. Delicate girls, fearfully constipated with low spirits.

Ferrum is a remedy that should be given carefully in hemorrhagic tuberculosis, as it may aggravate. The acetate, iodide and phosphate are better than the metal in such cases, unless the similarity is very close.

Homeopathic

Ferrum metallicum affects the circulation, producing irregular distribution of blood, congestions, surgings of blood and pulsations. It relaxes the blood vessels causing hemorrhages which are bright or with small clots especially in rapidly growing youth or the veins dilate during neuralgia, menses or fever.

The chlorosis of Ferrum is worse in winter. Anemia of young persons with flushed cheeks but pale lips, delicate girls, constipated with low spirits. Irregular distribution of blood. Pseudo-plethora. Pallor of skin, mucous membranes, face, alternating with flushes. Muscles flabby and relaxed. Orgasms of blood to face, chest, head, lungs, etc. Weakness from mere speaking or walking though looking strong. Red faced old men.

Ferrum metallicum has dryness of mouth, vagina. Dropsy or paralysis after loss of vital fluids, hemorrhages etc. Rapid emaciation. **Nightly pains that compel motion of part.** Pressure, on chest, stomach etc. Cachexia. Cracking in joints. Softening of bones. Red parts become pale. Catalepsy. Goiter, exophthalmic from suppressed menses. Spleen, digestion and left deltoid are also affected.

Clinical

Anemia. Aphonia. Asthma. Biliousness. Catalepsy. Chlorosis. Chorea. Cough. Cramps, Debility. Diarrhea. Bedwetting. Fever intermittent. Goiter, exophthalmic. Gonorrhoea. Hemorrhages. Heart disorders. Hectic. Hydrocephalus. Kidneys disorders. Lienteria. Menstruation disorders. Neuralgia. Paralysis of viscera. Pregnancy, disorders. Rectum prolapsed. Rheumatism. Shoulder disorders. Spasms. Syphilis. Toothaches. Tuberculosis, (Ferr-ac.). Urine incontinence. Vertigo.

Constitutions

It is adapted to young, anemic, pseudo-plethoric persons, who though looking strong are so weak that they are unable even to speak or walk, want to lie down. **Planets:** Mars, Venus.

Modalities

" Better moving about slowly"(slow moving helps warm body without qi dissipation) is a keynote condition of many Ferrum cases. Better from gentle motion, slight bleeding. (Puls.) Better from leaning head on something after rising. Worse at night, midnight aggravation.(blood or yin deficiency) Worse emotions, anger, violent exertion.(qi and hence blood stagnation, exertion dissipates liver and kidney yin) Worse eating,(stomach qi less and liver qi and liver blood/yin less so poor or no digestive juices secretion so worse eating) drinking, eggs. Worse while sweating, loss of vital fluids.(reduces yin and qi which is already less due to blood deficiency) Worse while sitting still (warmth helps spleen which kidney yang and heart not able to give properly)after cold washing and overheating. Worse from heat and cold.(less yin and less qi so both aggravats) Worse sudden motion,(sudden motion takes blood from liver and disturb circulation of blood which is already poor) raising arms, tea.

Symptoms

MIND

Irritable mind and body.(liver yang exuberant due to less yin) Always in the right, sensitive and excitable,(yang heperactive) worse on least contradiction. Weeps and laughs immoderately.(lung yang,heart yang hyperactive) Nervous,(heart yang irritated) hysterical.(liver and heart yang hyperactive) Anxiety as after committing a crime.(heart and lung yang irritation) Despondent after menses.(after menses lung and heart senses further reduced yin and qi in the body)Irritability. slight noises unbearable.(heart qi irritation increases) Excited from slightest opposition.(liver qi irritation increases) Sanguine temperament. Brain-fag.(due to yin deficiency of kidney ,blood supply)

Abdomen

Hard, distended, sore, bruised when walking.(qi and blood stagnation in abdomen so sore bruised) Bowels feel sore to touch.

Back

Neck and shoulder painful.(kidney vacuity cold blood stagnation) Lumbago all night, (kidney vacuity cold blood stagnation) goes off on rising. Lumbago, better slow walking. (warming effect)

Blood

Anemia.(blood deficiency) Chlorosis. Blood disorders.(due to less haemoglobin and ferrum in blood) Hemorrhages.(due to blood congestion and qi deficiency)

Chest

Oppressed,(blood congestion) breathing difficult.(blood congestion or lung qi poor) Surging of blood to chest. Chest, oppressed, constricted(cold stagnation in chest) or flying stitches in the chest.(due to cold or blood stagnation in chest area capillaries)

Ears

Oversensitive to noise.(heart qi irritation) Noises in ears better leaning the head on table. (tinnitus due to less liver blood or blood stagnation which improves after head down) Ringing in the ears worse before menses.(blood or qi stagnation due to being before menses)

Eyes

At night can see in the dark, hysteria.(liver yang hyperactive) Watery,(tears due to liver yang avtive) dull red, photophobia,(liver blood less so liver qi gets irritated by light qi) letters run together.(no holding of liver yang by liver yin) Blind attacks.(due to blood deficiency in liver or liver yang excess) Puffy eyelids.(spleen dampness or less blood in eyelids) Pain over eyes (left).(heart blood stagnant in the region) Exophthalmic goiter after suppression of menses.(goiter due to blood congestion here or itr is due to wind cold

damp heat) Eyes cloudy,(due to damp or blood deficiency) dull with blue rings around them.(blood deficiency around eyes or liver blood and kidney deficiency) Eyes red with burning pain.Swelling and redness of the eyelids.(liver yang excess that is liver wind heat and spleen blood congestion or damp heat)

Face

Pale (blood deficiency)and flushes red from least pain, emotions or exertion.(blood distribution mechanism reacts with slight cause so blood at some place excess some place deficient etc) Florid(red faced rosy cheeked-due to more blood in the area), feels as if bloated.(spleen/stomach qi stagnation and deficiency) Lips pale.(spleen qi deficiency or less blood supply to lips) **Red parts become white, bloodless and puffy.**(blood deficiency) Neuralgia after cold washing and overheating, worse lying down, better sitting up.

Female

Women who are weak, delicate, chlorotic, yet have a fiery-red face.(false redness of face and weak due to blood deficient) Tendency to miscarriage.(due to qi and blood vacuity weakness otherwise it is due to Blood Heat & Vacuity,Predominant Spleen Vacuity,Predominant Kidney Vacuity.) Menses, pale, watery(as ferrum less so haemoglobin less so pale blood) too early too profuse (though liver blood deficient so menses should be late scanty etc but due to liver yang hyperactive or kidney qi deficient(watery) menses are early and profuse)and protracted intermit with labor like pains.(kidney qi deficiency) Menses remit a day or two and then return. Discharge of long pieces from uterus.(phlegm heat in uterus) Sensitive vagina.(qi stagnation in vagina) Vagina too dry(blood deficient so no moistening), pain as if raw or insensible during sex. (blood stagnation) Leucorrhea, milky, acrid, watery, at puberty.(damp cold –milky and watery,white color due to liver qi stagnation ,kidney damp or spleen cold too) Prolapse of vagina.(spleen and kidney qi deficiency) Itching of vulva.(wind)

Food

Aversion to meat to eggs to sour fruits,(averse phlehm heat or heat producing food) to accustomed tobacco, beer. Intolerance of eggs. Loathing of sour things. Desire for bread, raw tomatoes.(tomatoes increases blood) Voracious appetite or absolute loss of appetite. (either excess blood in stomach so high heat so high appetite or blood deficiency so no digestion and secretion of juices)

Head

Stinging headache.(blood stagnation) Ringing in ears before menses.(blood stagnation in liver channel so liver yang increase in liver channel to ear) Hammering, pulsating, (pulsating pain are due to cold stagnation) congestive headache,(due to cold) pain extends to teeth(stomach forehead cold headache goes to teeth) with cold limbs.(spleen and stomach deficient cold) Pain in Back of Head with roaring in neck.(kidney vacuity cold

headache) Sudden pain over left eye. Head hot, feet cold. Writing causes headache to reappear. Scalp painful. Must take down the hair. (scalp is kidney area so kidney blood deficient so vacuity heat in scalp so hair removal help to reduce heat)

Heart

Palpitation worse least motion, (blood stagnation so palpitation) better walking slowly of masturbators after loss of fluids. (fluid so blood deficiency) Sense of oppression. (qi stagnation) Anemic murmur. (blood deficiency) Heart suddenly bleeds into the Blood vessels and as suddenly draws a reflux, leaving pallor of surface. (sudden change of circulatory distribution by heart) Pulse full, but soft and yielding, also, small and weak. Throbbing in all blood vessels. (cold blood congestion in all blood vessels-throbbing pain is due to cold stagnation)

Kidneys

Albuminuria. Chronic nephritis. Involuntary urination, especially during day only, (kidney qi deficiency and heart qi insufficient so kidney so heart mind does not have control over urination) when standing (kidney qi reduces further) from sudden movement, (heart and liver qi gets stagnant and excited) walking in children. (spleen qi and yin reduces) Copious urination with, nervousness. (kidney qi deficiency and heart qi insufficiency) Urine hot (bladder qi stagnant so internal heat) with menorrhagia. Tickling in urethra extending to bladder. (qi stagnation in liver channel –tickling)

Limbs

Dropsy after loss of vital fluids. (fluid congestions after loss of blood semen etc as fluid replaces and fill up the vital fluid vacuity places)) Cracking in joints. (qi stagnation or wind in lungs) Rheumatism of the shoulder. (qi stagnation or wind) Irresistible desire to bend the arm with intense pain. Sudden cramps (cold stagnant are for cramps so cold stagnation so blood congealation) or tearing pains (blood congealation) in the limbs (spleen area), when writing, hands tremble better when writing fast. Swollen hands and feet. (blood deficiency in spleen and heart and kidney) Pain in hip-joint, tibia, soles and heel. (blood deficient so bones not nourished so pain) Heels pain worse lying on back. (kidney yin vacuity so vacuity heat so worse lying on back that is warmth in yang area) Contraction of limbs. (cold congestion in spleen area)

Lungs

Cough dry, spasmodic. (qi stagnation and heat) Voice, hoarse (qi stagnation and phlegm heat) or changeable. (qi stagnation) Dry tickling cough (qi stagnation and phlegm heat) worse moving, (qi deficient and heat also worse moving) better lying down. (qi deficient) Spitting of blood of masturbators in tuberculosis. (masturbation consumes liver blood so liver yang or heat attacks lung so due to already lung qi/yin deficient and no holding of blood in blood vessels and vacuity heat due to lung there is blood spitting) Dyspnea better walking slowly and talking. (qi deficiency and qi stagnation) Cough with pain in the

occiput.(lung qi stagnant cough with kidney qi/blood stagnant in occiput) Breath hot.
(lung vacuity heat) Neglected pleuropneumonia, absorbs exudation. Hemoptysis, (Mill.)
With the cough pain in occiput.

Male

Emissions, nightly with backache after over-exertion.(yin deficiency so vacuity heat
kidney so emissions in night and backache due to over exertion means kidney yang
deficiency)

Mouth

Pain in Teeth, relieved by icy-cold water.(stomach heat) Taste of blood (stomach heat)or
of rotten eggs. Mouth dry,(stomach heat) food seems too dry.(less blood supply and
moisture in stomach)

Nose

Nosebleed in anemic patients,(blood vacuity heat nosebleed) alternating with
hemoptysis. Mucous membranes relaxed, boggy, anemic, pale.(less blood supply so poor
toning and nutrition)

Rectum

Diarrhea, painless, worse while eating.(not absorbing of fluid by intestines due to poor
blood supply and nutrition so painless diarrhea,while eating blood supply gets diverted to
stomach for digestion) Nightly, gushing and spluttering of undigested food,(stomach yin
deficiency so stomach vacuity heat vomiting at night) alternating with constipation,
(stomach vacuity heat constipation) worse if nervous(heart qi irritation or heat so
disturbed circulation) or tired.(spleen qi deficiency) Stools, hard difficult,(stomach
vacuity heat) followed by backache(kidney vacuity cold) or cramps in rectum,(kidney
vacuity cold) prolapse rectum.(kidney and spleen qi deficiency) Itching of anus due to
ascarides or worms in children.(stomach,intestine qi irritation due to worms so itching at
anus-kidney area) Stools are undigested.(spleen/stomach qi deficiency) Summer
diarrhea.

Skin

Pale.Flushes easily, pits on pressure.(blood surge easily due to impact on heart and blood
deficient filled by fluid so spots have pits on pressure) Black or dark violet spots.(blood
stagnation)

Sleep

Falls asleep from debility,(blood deficiency sleep) while sewing, sitting and studying. (sewing,sitting-spleen blood,studying-heart blood deficient) Sleepless.(due to heart qi irritation)

Stomach

Stomach won't tolerate any food, causes distention and pressure.(food accumulation without digestion due to stomach qi and yin deficiency) Nausea and vomiting after eating.(stomach qi and yin deficient) Vomiting after midnight.(stomach yin deficient) Attempts to eat bring on diarrhea.(attempt to eat disturb stagnant stomach qi which reacts by vacuity heat and diarrhea) Spits up Food by the Mouthful,(Phos.) Belchings of food after eating without nausea.(without nausea bcoz food not digested due to stomach qi/yin deficiency and same is vomited due to stomach vacuity heat) Vomiting, easy without nausea, immediately after eating after midnight during pregnancy. Vomits after eggs. Heat and burning in stomach(vacuity heat or qi stagnant heat). Soreness of abdominal walls. (qi/blood stagnant so soreness) Flatulent dyspepsia.(qi stagnation so flatulence and stomach qi/yin deficient so dyspepsia so blood deficient flatulent and dyspepsia)

PAGE 670

Temperature

General coldness of limbs,(spleen qi deficient and less blood supply)head and face hot. Chill with red face and thirst.(blood and qi deficiency so chill ,thirst due to lung or stomach vacuity heat) Heat with distended veins.(cold blood stagnation in veins which after time become heat due to qi stagnation too) Chill at 4 a.m. Heat in palms and soles. (blood vacuity heat) Profuse,debilitating sweat, clammy, yellow, cold, acrid.(lung vacuity heat so sweat profuse,yellow clammy acrid which reduces lung qi further so sweat may be cold too due to deficient cold)

Throat

As if something rolling in the throat and closing it like a valve.(qi stagnation in throat or lung-hysteria) Exophthalmic goiter. Sensation as of a lump (left side) worse swallowing empty only.

Vertigo

Vertigo on suddenly rising,(sudden circulation disturbance vertigo) when crossing a bridge over water.(blood circulation related vertigo) Vertigo as if balancing to and fro, as when on water. Vertigo on seeing flowing water. (blood circulation related vertigo) Vertigo during headache.(blood congestive headache and vertigo)

Comments

The digestive disorders set up by Iron are marked and peculiar and among them is constipation and intolerance of eggs. The occurrence of this symptom in a patient about forty-five, who had repeated attacks of joint rheumatism, led Kunkel to cure his case after he had been dosed for three weeks with salicylate of soda by the allopaths.

The only other distinctive feature was constant worse of pain after midnight.

The obvious advantages derived in many cases of anemia from the use of Iron in its crude forms has led to very grave abuses in old-school practice. That Iron is what may be called a "nutritive" remedy in certain defective blood conditions, having an organopathic relation to the blood.

Mucous membranes abnormally pale. Feet swell. The irregular distribution of blood in chlorotics recalls a set of symptoms which indicate Ferrum. Hemorrhages of many kinds from over-fullness of blood-vessels from vasomotor paralysis or else from delicacy of the vessels themselves. Throbbing pains, the blood-vessels all over the body throb violently. Feet swell.

Neuralgia, which is brought on by washing in cold water, especially after being over-heated. Hammering headache.

It is one of the best remedies for over-dosing with quinine and hence the favorite old-school combination of "Quinine and Iron" is so far a wise one. Cramps are well marked in the pathogenesis, irritability of the bladder causing incontinence of urine when standing, irritability of the bowels, causing diarrhea while eating.

This symptom is peculiar to Ferrum, the diarrhea coming on when the patient begins to eat. Many remedies have it immediately after eating. Worse from eating eggs. There is also gastralgia, heavy pressure in region of stomach, a feeling as if something rolled into the throat and closed it like a valve, frequent spells of nausea, periodic vomiting.

The liver and spleen are affected. Walls of abdomen are sore. Pain in os, on lying down, feeling of dryness in vagina. Rheumatic symptoms, especially of left shoulder and deltoid. Paralytic weakness. Restlessness. Tremor. (tremor due to deficiency of bone marrow due to less blood supply)

Boericke.

Ferrum pernitricum

(pernitrate of iron)

Pharmacy

Ferr-fern. Ferr. pernitricum. Pernitrate of Iron. Dilutions of the Ferri Pernitratris Liquor of B. P. Historical dose: All potencies.

History

Ferr-fern. has been used by old school practitioners with good effect in the diarrheas of India in lienteria, the diarrhea of tuberculosis, diarrhea in feeble and nervous females, also in scrofulous children with enlarged glands and obstinate ophthalmia. **Planets:** Mercury.

Homeopathic

Though there are no provings of the remedy it is plain that these are specific effects. Cooper, who has given much attention to the Iron preparations, give as a characteristic, "Cough with florid complexion." In cases presenting marked features of Ferrum and Nit-ac., Ferr-fern. should render good service.

Clinical

Diarrhea. Eyes, affection. Glands disorders. Lienteria.

SOURCES

Clarke.

Ferrum phosphoricum

(phosphate of iron)

Pharmacy

Ferr-p-h. Ferric Phosphate. Ferrum phosphoricum. Ferroso-ferric phosphate. White Phosphate of Iron, (Schussler's). This is said to be a true ferric phosphate as contrasted with the ordinary phosphate of iron, which is a ferrous-hydric phosphate. Historical dose: All potencies, third to twelfth potency.

History

Our chief knowledge of Ferr-p. is from Schÿssler's work and the clinical experience of those who have used it on his indications. But it has also been proved under Dr. John left Moffat.

In Schÿssler's therapy Ferr-p. takes the place filled by Acon., Bell., Gels., Verat-v., Arnica and other remedies which correspond to disturbed states of circulation, irritation and relaxation of tissue.

In the early stages of febrile conditions, it stands midway between sthenic activity of Aconite and Bell and the asthenic sluggishness and torpidity of Gels. The typical Ferr-p. subject is not full blooded and robust, but nervous, sensitive, anemic with the false plethora and easy flushing of Ferrum. Prostration marked, face more active than Gels. The superficial redness never assumes the dusky hue of Gels. Pulse soft and flowing, no anxious restlessness of Acon.

Nimier and Parenteau have cured several cases of right-supra-orbital neuralgia with morning aggravation with Ferr-p. 6x. The morning aggravation appears to be the distinctive indication.

Nash says the hemorrhages are bright red, but occur, not in the plethoric subjects of Acon., but rather in pale, anemic subjects liable to sudden local congestions. Cooper cured with Ferr-p. a case of tuberculosis in a patient "of the transparent-skin type, the hemoglobin shining through."

Iron will cure: The first stage of all inflammations. Hemorrhages caused by hyperemia. Fresh wounds, contusions, sprains, etc., as it removes the hyperemia. Pains.

Schÿssler says: "The pains which correspond to iron are increased by motion, but relieved by cold in the muscle-cells iron is found in the form of a phosphate, we should therefore in therapeutics use Ferrum phosphoricum."

PAGE 672

Homeopathic

Ferr-p. affects the venous circulation causing passive congestions and hemorrhages due to hyperemia, so the discharges are blood streaked or meat-water like. First stage of all inflammatory disorders. Susceptibility to chest troubles. Bronchitis of young children.

In pale, anemic subjects with violent local congestions. Ferr-p. increases hemoglobin. Hemorrhages, bright from any orifice. Anemia. Emaciation. Takes cold easily. Inflammation of the soft parts. Bruised soreness, chest, shoulders, muscles. Burning rawness. Great prostration, could hardly move about.

Ferr-p. also retains the leading features of the other Iron preparations: anemia, hemorrhages and disorders of the veins. Inflammation induration and enlargement of blood-vessels, great physical and mental lassitude indisposed to physical exertion, nervousness, prostration, rheumatic paralysis.

It is a very useful remedy in acute exacerbation of tuberculosis, rheumatism. Acute inflammatory rheumatism. The right shoulder is affected as in Ferr-m. The right-sidedness of Ferr-p. is as, marked as that of the other Ferrum preparations.

Clinical

Anemia. Anus, prolapse. Bladder, paralysis. Bronchitis. Colic. Colds. Coughs. Croup. Cystitis. Debility. Delirium tremens. Diabetes. Diarrhea. Dyspepsia. Dysentery. Ear disorders. Erysipelas. Fevers. Frost-bite. Gastritis. Gonorrhoea.

Hematemesis. Hemoptysis. Hemorrhages. Heart, palpitations. Inflammation. Injuries. Iron, poisoning. Fevers. Kidneys, Bright's disease. Measles Mumps. Nevus. Neuralgias. Nosebleeds. Pleurisy. Pneumonia. Raynaud's disease. Rheumatism. Sprains. Styes. Tarsal cysts. Throat, sore. Tuberculosis. Urinary incontinence. Veins, varicose. Vomiting. Whooping cough.

Causations

Ill effects of checked sweat,(checked sweat increase fluid content in blood and reduce haemoglobin and stagnate lung qi) blood loss,(blood deficient) mechanical injuries. (blood congestion and qi stagnation)

Constitutions

Ferr-p. is suitable to nervous, sensitive, anemic persons.(heart yang irritated,blood deficient person,lung qi irritated-sensitive) Ferr-p. is suited to the leuco-phlegmatic temperament to young persons with varicose veins. Sanguine constitutions. Corresponds to Grauvogl's oxygenoid constitution. The inflammatory,(qi/blood congestion) febrile, emaciating,(qi and blood vacuity) wasting tuberculosis.(qi and blood vacuity) **Planets:** Mars, Moon.

Modalities

Better cold applications,(blood and qi deficient) bleeding,(bleeding here reduces qi irritation due to blood congestion) lying down.(qi deficient) Worse at night(blood and yin vacuity) and 4 to 6 a.m.touch, jar, motion,(excess condition or otherwise generally heat conditions are worse from motion) right side,(yin side problems) motion, noise,(heart qi irritation) jar, cold air touch,(lung qi deficient) checked sweat.(lung qi stagnation) Worse cold drinks and sour food, meat,(stomach heat) herring, coffee,(herat qi irritated) cake.

Symptoms

MIND

Very talkative, hilarious and excited(**heart qi hyperactive**) Keeps quiet. Anger(**liver yang active**) and apathy. Transient mania from cerebral irritation.(**heart qi irritated**) Indifferent to pleasurable things.(**heart qi disturbed**) Averse to company.(**heart qi disturbed**) Fear of going into a crowd.(**liver qi irritated or stagnant**)

Abdomen

First stage of peritonitis.(**first qi stagnant then blood congestion in the area then swelling due to oozing of fluid-first stage**) Distended intolerance of clothes.(**qi stagnation**)

Back

Crick in neck and back.(**qi stagnation**) Stiff neck.(**qi stagnation**)

Blood

Anemia.(**blood deficient**) Iron poisoning. Blood disorders.(**blood affected due to less haemoglobin which attracts oxygen**) Hemorrhages.(**due to congestion of qi and blood**) Chlorosis.

Chest

Chest heavy,sore or congested.(**blood congestion due to qi heart congestion**) Pleurisy, (**fluid accumulateion due to heart qi stagnation as qi leads to fluid**) stitching pain worse coughing and deep breathing.(**qi stagnant pain so cough and deep breathing both has impact on qi**)

Ears

Acute otitis,(**liver qi stagnation then blood then swelling-acute that is due to excess condition**) when Bell. fails, prevents suppuration.(**due to suplying more oxygen to blood which prevents suppuration**) First stage of otitis. Throbbing.(**cold stagnation**) Membrana tympani red and bulging.(**qi stagnation**) Deafness from colds,(**qi stagnation**) worse during menses.(**liver qi active which affects stagnant qi in ear**) Noises, tinnitus worse lying.(**liver qi stagnation,worse lying as lying further stagnates the qi but if qi is deficient then lying helps**)

Eyes

Red inflamed with burning sensation.(**liver wind heat**) Feeling of a tiny particle in upper eyelid.(**blood stagnation in tiny vessels**) Encysted tumors of the eyelids.(**spleen stomach phlegm heat or blood stasis and heat**) **Eyes suffused, cannot see on stooping**. Feeling as of sand under lids.(**blood stasis in capillaries**) Hyperemia(**means blood congestion at one place**) of optic disc and retina *with blurred vision*.

Face

Pales and reddens alternately.(qi stagnation in stomach changes so blood congestion accordingly changes so sometime face red sometimes pale due to less blood) Flushed, cheeks sore and hot. Florid complexion. Facial neuralgia,(heart qi irritation) worse shaking head and stooping. Hot cheeks with toothache.(stomach heat)

Female

Menses every three weeks(blood congestion in ren and mo channel and liver yang hyperactive) with bearing-down sensation(spleen qi vacuity) and pain on top of head. (kidney yin deficiency) Vagina dry and hot.(kidney vacuity heat) Pain during sex. Vaginismus.

Food

Desire for stimulants, sour things.(qi deficient system so to energise it require heat things) Aversion to meat and milk.(phlegm heat aggravates) Chill while eating at table.(qi stagnation in stomach so while eating it reacts by chill.In qi deficient stomach will be cold) Worse by eating.(excess condition that is there may be phlegm or blood stagnation etc in stomach)Worse from meat, herring,coffee,cake.Worse from tea.

PAGE 673

Head

Throbbing headache with sensitive scalp.(cold stagnation that is qi deficient stagnation type and then blood congestive headache due to kidney qi deficient.throbbing –due to blood congestion) Headache better cold applications. Rush of blood to head. Soreness to touch,(blood stagnation)cold, noise, jar. Headache, shooting,(shooting headache are due to wind which is produced due to qi stagnation first then heat then wind) aching from vertex down over the sides of the head with earache,(wind) better nosebleed,(blood congestion relief) cold application.(wind heat) Ill effects of heat of sun.(heat affecting qi stagnation in head) Head often feels as if pushed forward while walking with vertigo. Empty sensation in the head during menses.(kidney yin vacuity headache during menses)

Heart

First stage of cardiac diseases.(first stage of heart qi stagnation and irritation symptoms) Palpitations,(blood stagnation)pulse rapid. Pulse, short, quick, full, soft flowing Pulse.

Kidneys

Incontinence.(kidney,bladder qi deficient) Polyuria. Diurnal bedwetting,(kidney yin vacuity heat) better lying down.(deficiency so better lying) Irritation at neck of bladder.

(qi stagnation in bladder) Urine spurts with every cough.(qi stagnation in bladder gets affected by qi stagnant cough at lung) Urinates after every drink.(qi stagnation in bladder so every drink affects it) Urine retained in children during fever.(damp heat blockage in bladder so it is during fever otherwise urine retention due to bladder/lung qi deficiency too)

Limbs

Rheumatic pain in shoulder,pains extend to chest and wrist.(spleen qi stagnation and lung wind) Rheumatism attacking one joint after another, worse slightest motion.(lung and spleen qi stagnation worse motion due to wind heat) Sore bruised pain in shoulders extending to chest and wrist.(qi stagnation pain so sore and bruised) Wrists ache with loss of power to grasp.(spleen yang deficiency so loss of power to grasp and aching due to vacuity cold) Palms hot in children.Jerking in limbs.(spleen qi stagnation so wind) Sprains of the elbows.(qi and blood stagnation from sprain or vice versa) Hands swollen and painful.(spleen qi stagnant so qi stagnation swelling and pain and not damp swelling) Whitlow. Palms hot.

Lungs

Congestions of lungs.(blood congestion) Hemoptysis. Short painful, tickling and hacking tormenting, spasmodic cough,(lung qi stagnation-tickling,hacking,spasmodic) worse morning and evening.(they are qi changes times so lung reacts to qi changes) Croup. Hard, dry cough with sore chest.(qi stagnation in chest,qi stagnant heat so dry,phlegm dried so hard) Hoarseness.(phlegm,qi and fluid stagnation) Hemoptysis of pure Blood in pneumonia after concussion or fall. (Mill.) Coughs, better at night.(lung qi stagnant heat gets cool in night and no problem of lung yin deficiency)

Mouth

Mouth hot, fauces red inflamed. Toothache better cold.(stomach heat)

Nose

Common colds.(lung qi deficient) First stage of colds in the head.(qi stagnant deficient cold but after time stagnant qi produce heat when irritated) Predisposition to colds and sore throats.(lung qi deficiency and qi and blood congestion in throat due to vacuity cold) Nosebleeds, bright red blood in children,(qi congestion heat produce bleeding) (Phos.). Controls soreness and bleeding after operations.(after operation qi gets stagnant and irritated in the area)

Rectum

Chronic diarrhea.(poor nutrition of large and small intestine due to less oxygen in blood so they don't have power to suck the water and also stomach heat so chronic) Stools of bloody water or yellow water, undigested.(may be due to stomach heat so bloody or

yellow and undigested due to intestine not functioning properly and spleen qi deficient so poor muscle tone of intestine) Hemorrhoids.(spleen deficiency or blood stasis.other patterns are intestinal wind,dry intestine with chronic constipation,damp heat etc) First stage of dysentery with much blood in discharges.(blood due to vacuity heat of stomach and spleen qi deficient) Summer diarrhea.(heat diarrhea)

Skin

Flushed. Bruises. Measles.(wind heat) Acne.(wind heat or phlegm heat or blood stagnant in capillary)

Sleep

Drowsiness.(blood congestion in head) Restless and sleepless.(heart qi irritated) Anxious dreams.(heart qi irritated) Night sweats of anemia.(yin/blood deficiency night sweats)

Stomach

Vomiting of undigested Food, green matter.(stomach heat due to stomach qi stagnation so vomiting green or blood due to blood stagnation or heat)Vomiting of bright red blood. Sour belchings.(stagnant qi and stomach heat)

Temperature

All the catarrhal and inflammatory fevers,(due to qi stagnation and blood stagnation heat) first stage. Fevers of unknown origin.(due to oxygen or heart qi irritation) Fevers, continued infectious,(blood stasis so continuous fever and infectious due to less oxygen in blood and toxicity in blood due to stasis or other) pneumonia intermittent,(qi stagnation so intermittent pneumonia fever) measles,(wind heat) hemorrhagic.(due to blood stagnation or qi stagnant heat) Chill with desire to stretch,(chill shrink the vessels etc so desire to stretch) at 1 p.m. Heat with sweaty hands.

Throat

Sore throat with colds.(blood/qi stagnant and lung qi deficient as in first stage) Laryngitis with hoarseness of singers.(qi/blood stagnation in larynx with qi deficiency) Ulcerated sore throat.(damp heat ulcer with blood/qi congestion in throat or lung) Tonsils red and swollen.(stomach blood congestion or heat) Eustachian tubes inflamed.(stomach or lung heat due to qi stagnation or blood congestion) Sore throat of singers.(qi /blood stagnation) After operations on throat and nose to control bleeding and relieve soreness. (qi/blood stagnation) First stage of diphtheria. Ranula in vascular, sanguine constitutions. Pain worse empty swallowing.

Comments

"Painless irritability of tissue" is Cooper's keynote as exemplified in diurnal bedwetting. Schÿssler's own account of Ferr-p., taken from the final edition of his work, translated by left H. Tafel is as follows:

"Iron and its salts possess the property of attracting oxygen. The iron contained in the blood corpuscles takes up the inhaled oxygen, thereby supplying with it all the tissues of the organism. The sulphur contained in the blood corpuscles and in other cells in the form of sulphate of potash, assists in transferring oxygen to all the cells containing iron and the sulphate of potash. "

(1) When the molecules of iron contained in the muscle-cells have suffered a disturbance in their motion through some foreign irritation, then the cells affected grow flaccid.

If this affection takes place in the annular tissues of the blood-vessels, these are dilated and as a consequence the blood contained in them is augmented. Such a state is called hyperemia from irritation, such a hyperemia forms the first stage of inflammation.

PAGE 674

But when the cells affected have been brought back to the normal state by the therapeutic effect of iron (Phosphate of Iron) then the cells are enabled to cast off the causative agents of this hyperemia. Which are then received by the lymphatics in order that they may be eliminated from the organism.

(2) When the muscular cells of the intestinal villi have lost molecules of iron, then these villi become unable to perform their functions: diarrhea ensues.

(3) When the muscular cells of the intestinal walls have lost molecules or iron, then the peristaltic motion of the intestinal canal is retarded, resulting in an inertia with respect to the evacuation of the feces.

Schÿssler generally used the 12x trituration. As an instance of hyperemia of a low order may be mentioned a case of Raynaud's disease of the fingers and toes in which amputation seemed inevitable. Halbert effected a complete cure with Ferr-p. 6x trituration.

According to Cooper Ferr-p. antidoted "violent dysuria, night and day," caused by Stront-br. Pains go from below upward. Great emaciation. Takes cold easily. Results of checked perspiration on a warm summer day (peritonitis):

Compare

(1) Oxygenoid constitution.

(2) Acon., Chin., Ars, Graph., Petr.

(3) Ferrum Pyrophosph.. - congestion of brain and headache following great loss of blood, tarsal cysts.

(4) Gels. - more flowing pulse, Caust. and Puls. - cough with spurting of urine.

(5) Kali-m. - croup, pneumonia, palpitations, typhus, Kali-p. - colic, threatened gangrene.

(6) Calc-s. - hip-joint disease, Calc-p. - chlorosis, hemorrhoids, Calc-f. - hemorrhoids, Nat-s. - diabetes, Ant-t. - capillary bronchitis.

Ferrum picricum

(picrate of iron)

Pharmacy

Ferr-pic. Ferrum picricum. Picrate of iron. Trituration. Tincture. Historical dose: All potencies, second and third trituration.

History

Ferrum picricum considered a great remedy to complete the action of other medicines. The symptom that calls for it is the failure of the function of an organ under exertion. Acts best in plethoric people with sensitive livers. Burnett has cured with it rheumatic arthritis in a dark-haired subject.

This is an unproved medicine, but Dr. Cooper, has given the leading indications for its use and these are so clear that it has taken a definite position in the Materia Medica. It has cured many cases of warts and corns.

Dr. Cooper has reported a case of lupoid warts cured by it. Dr. Cooper was led to give Ferr-pic. in cases of warts by a symptom produced in a patient (to whom he was giving it for deafness), "sensation as if a wart were growing on the thumb." He considers it specially indicated for warts on the hand, when they are multiple. Cooper has observed that warts, especially old pedunculated warts, frequently accompany chronic deafness.

Homeopathic

Ferrum picricum is a liver medicine and is particularly suited to persons with dark hair and eyes and bilious-looking patients. A dirty appearance about the joints indicates it, the stain being due to bile pigments. The voice fails after public speaking.

Ferr-pic. is a very useful remedy for senile hypertrophy of the prostate gland with frequent urination at night with full feeling and pressure in rectum. Smarting at neck of the bladder and penis. Retention of urine. Warts and epithelial growths, corns with yellowish discoloration. Nosebleeds. Chronic deafness and tinnitus due to gout. Meatus dry. Pseudo-leukemia.

PAGE 675

Clinical

Albuminuria. Corns, Deafness. Ears, diseases. Fatigue. Jaundice. Liver, disorders. Lupoid warts. Lupus. Nosebleed. Prostate, diseases. Rheumatic arthritis. Rodent ulcer. Tinnitus. Voice, loss. Warts.

Causations

Overwork, exertion. Fatigue, overpowering effects of fatigue.

Constitutions

Ferr-pic. dark-haired, plethoric people. **Planets:** Jupiter.

Modalities

Worse from fatigue is a leading indication.

Symptoms

Back

Pain in right side of neck and down right arm.

Ears

Deafness before menses. Crackling in ears and low-pitched voice. Vascular deafness. Dental neuralgia, radiating towards ears and eyes. Humming in ears as from telegraph wires. Tinnitus.

Face

Lupoid wart on face.

Head

Giddiness with disturbance of cerebral circulation, pain in occiput inability to walk.

Kidneys

Pain along entire urethra. Frequent urination at night with full feeling. Retention of urine. Smarting at Neck of Bladder and penis, (Barosma)

Limbs

Pain in right side of neck and down right arm. Locomotor ataxia, ocular stage. Hands covered with warts.

Liver

Liver sensitive, some jaundice.

Male

Prostate gland enlarged.

Rectum

Constipation. Pressure in the Rectum.

Skin

Warts, multiple, pedunculated. Corns. Jaundice. Dirty looking skin about joints. Sensation as if a wart were growing on thumb.

Sleep

Restless sleep with unpleasant (often erotic) dreams.

Stomach

Indigestion, furred tongue, headache after meals, especially in bilious, dark-haired persons.

Comments

Referring to the effects of fatigue, Cooper describes it as the failure of an organ under exertion which would not ordinarily strain it. Ne.g. , failure of the voice in public

speakers. The condition of the ear in the deafness which calls for Ferr-pic. is one of "diffused vasculitis."

Pic-ac. is also of use in the effect fatigue, but in this case it is unusual fatigue that sets up the noises, etc. and the deafness is nervous deafness and unconnected with changes in the blood-vessels to which Ferr-pic. is homeopathic.

P. C. Majumdar cured a student, suffering from anemia and malarious fever off and on for a year, who had these symptoms among other: Impaired hearing of both ears, buzzing, hissing, vertigo indigestion, headache and tired feeling after bodily or mental exertion.

He considers Ferr-pic, suited to the results of malarious fever, sexual excesses and loss of blood.

Puller has cured with it a case of albuminuria. Ferr-pic. is apt to aggravate if given too low. Dr. Mende considers Ferr-pic. almost specific in nosebleed. It has a specific action in the prostate gland. Dudley Wright has confirmed Cooper's observation here, it will frequently control senile prostate hypertrophy.

Compare

(1) Pic-ac., Nit-ac., Thuja. Am-pic., Calc-pic.

(2) the Ferrum preparations.

SOURCES

Ferrum sulphuricum

(sulphate of iron)

Pharmacy

Ferr-s. Ferrum sulphuricum. Sulphate of Iron. Ferrous Sulphate. Iron or Green Vitriol. Copperas. Trituration of the pure crystals. Historical dose: All potencies.

History

Ferr-s. has the leading features of the other Ferrums, but many of the Sulphur characters appear in the modalities especially, there is worse from warmth or warm room (toothache), better from cold air or from ice (toothache) or from fresh air. It is like Sulph. also in acidity and belchings of food in particles. **Planets:** Saturn.

Homeopathic

Watery and painless stools, menorrhagia, pressing, throbbing between periods with rush of blood to head. Basedow's disease. Weakness.

PAGE 676

Pain in gallbladder, toothache, acidity, eructation of food in mouthfuls. Passive hemorrhages. Pain in gallbladder. Pallor or flushing. Sensation as if all the blood were rushing into head and face. Sensation of fermentation or purring in stomach.

Feeling of general heat and disposition to sweat with sensation in skin of back as if he wore a stout woolen shirt. Muscular pains or contractions. Local atony, disposition to congestions, nettle rash, aphthae, eczema with sluggish liver.

Clinical

Aphthae. Bulimia. Cardialgia. Chorea. Constipation. Diarrhea. Eczema. Gallbladder, pain in. Gastritis. Gonorrhoea. Hemorrhages. Headache. Helminthiasis. Menorrhagia. Nettle rash. Scrofula. Spasms. Toothache.

Compare

(1) Phos. - regurgitation of food in particles.

(2) Cina - worms.

(3) Bapt. - pain in region of gallbladder.

SOURCES

Ferrum tartaricum

Pharmacy

Ferr-t. Ferrum tartaricum. Historical dose: All potencies.

History

Ferrum tartaricum has heart pain, heat sensation at cardiac orifice of stomach. **Planets:** Mars, Sun.

SOURCES

Boericke.

Ferula glauca

Pharmacy

Ferul. Ferula glauca. Bounafa. Ferula Neapolitana. N. O. Umbelliferae. Tincture of plant. Historical dose: Tincture and all potencies.

History

Ferula has been proved. It has helped cases of aphthae and diarrhea. Hemorrhoids, nymphomania, pruritus vulvae. Slow digestion. **Planets:** Moon.

Homeopathic

Heat and burning are produced in most parts and sensations of coldness in others. Stiffness and constriction were also prominent. Violent sexual excitement in women. A cough was complained of, worse in damp or cold weather.

Compare

(1) Other Umbelliferae tongue as if burnt, Sang.

SOURCES

Boericke. Clarke. Phatak.

Ficus religiosa

(ashwathya)

Pharmacy

Fic. Ficus religiosa. Ashwathya. Pakur. N. O. Moraceae. India. Tincture of juice of fresh leaves mixed with equal parts of alcohol. Historical dose: Tincture and all potencies, first potency and higher.

Herbal

This East Indian herb causes and cures hemorrhages of many kinds. We owe this remedy to Dr. Sarat Chandra Ghose of Midnapore, who made the first proving and thereby discovered its power to cause and cure hemorrhages of many kinds.

Ghose relates some striking cases cured with the remedy in cases of dysentery, hematemesis, hemorrhage of typhoid, bleeding hemorrhoids and nosebleed. **Planets:** Moon.

Homeopathic

Vomiting of a bright red blood. Hemorrhages. Hematemesis, menorrhagia, hemoptysis, etc. Bloody urine. Very satisfactory in controlling menorrhagia.

Very weak and restless. Profuse discharge of bright red blood, bearing-down pains in lower abdomen. Headache, very weak and restless, sight dim, burning at the top of the head.

Symptoms

MIND

Quiet and disinclined to move. Sad and melancholy.

Abdomen

Bearing-down pains in lower part of abdomen.

Eyes

Sight dim.

Face

Face became yellow.

Female

Menorrhagia, bright red blood, bearing-down pains in lower abdomen.

Head

Melancholic-quiet, burning at vertex, vertigo and slight headache.

Kidneys

Frequent desire to urinate. Urine contains much blood.

Lungs

Difficult breathing, cough with vomiting of blood, pulse very weak.

Nose

Nosebleed.

PAGE 677

Rectum

Dysentery with menorrhagia. Dysentery, blood bright red.

Stomach

Nausea, vomiting of bright red blood, pain and sick feeling in stomach.

Comments

The provers were Dr. Ghose himself, his wife and a dog. The dog, which was perfectly strong and healthy, received 40 drops of the tincture one morning. No result followed that day and dose was repeated next morning and the animal commenced and continued to vomit blood of a bright red color.

It kept very quiet and was unwilling to move. After three doses of five drops of the tincture given in quick succession, the vomiting ceased. It is remarkable that the same treatment (minute doses of the same remedy) was effectual in arresting the effects of the drug in the other two provings.

Mrs. G. took the tincture in 20-drop doses repeatedly throughout two days. On the third day dysentery and menorrhagia set in simultaneously. The blood was bright red.

Other symptoms were: Headache, very weak and restless, sight dim, burning at the top of the head. The face became yellowish, breathing difficult. She became sad and melancholy. With the profuse discharge of bright red blood there were bearing-down pains in lower abdomen.

Dr. G. took 40 drops in one dose. The result was: Frequent desire to pass water, which gradually became bloody and contained much blood. Then inclination to cough, causing him to spit blood. Slight headache, giddiness and nausea. Sight dim. Very weak and restless. The tincture was taken three drops every two hours and after the third dose the symptoms vanished.

Compare

(1) Acalypha, Ip., Arn. Mill., Phos., Hirudo, Cact., Ferr. Thlaspi.

SOURCES

Boericke. Clarke.

Filix mas

(male fern)

Pharmacy

Fil. Filix mas. Aspidium filix-mas. Male Fern. N. O. Filices. Tincture of fresh root or fresh root grated.

Maceration of fresh root. Historical dose: Tincture and all potencies, First to third potency. For the expulsion of tapeworm, a full dose of 1/2 to 1 dram of the Oleoresin, fasting.

Herbal

The male fern has been recognized as a vermifuge from the time of Galen and Dioscorides credits it with the power of causing infertility and abortion. A remedy for worm symptoms, especially with constipation.

A fragmentary proving in Allen's Appendix records a case in which 15 to 20 drops of the tincture given three times a day to a woman suffering from bloated abdomen with more or less pain caused diminution of the bloating, but also: Severe prolapse of vagina, pain and tenesmus of bladder with copious and frequent emission of urine with intense pain.

Filix was then discontinued and then Chimaphila relieved. The symptoms did not return afterwards, except after much walking and standing. Hering says the best time to give the drug for expulsion of tapeworm is in the summer when the fresh root can be obtained. If an ounce of the grated root is given in the forenoon, usually the tapeworm comes away in the afternoon. **Planets:** Moon.

Homeopathic

Among the leading symptoms are: Pale face with blue rings round eyes, gnawing, boring pains in abdomen, worse after sweet things. Blindness has been caused in a number of cases from atrophy of the optic nerve.

Tapeworms. Soporific conditions. Torpid inflammations of lymphatic glands. Pulmonary tuberculosis in young patients, no fever with limited, ulcerated lesions.

Clinical

Abdomen, bloated. Abortion. Blindness. Infertility. Tapeworm. Worms.

Symptoms

Abdomen

Bloated. Gnawing and boring in bowels, worse eating sweet things. Diarrhea and vomiting. Worm colic with itching of nose, pale face, blue rings around eyes. Painless hiccough.

Great pain in abdomen with diarrhea and constant vomiting.

PAGE 678

Eyes

Blindness, monocular amblyopia. Blindness, first mydriasis and amaurosis with normal fundus, eight days later, atrophy of optic nerve. Immobility of pupil.

Face

Pale face, blue rings round eyes.

Female

Menstruation stimulated. Prolapse of vagina with pains and tenesmus of bladder and copious frequent emission of urine with internal pains (relieved by Chim.). Abortion.

Sterility.

Nose

Itching of nose.

Rectum

Ineffectual urging to stool. Pappy stools. Violent vomiting and diarrhea. Worm symptoms with constipation. Worm colic.

Sleep

Soporific condition.

Stomach

Nausea. Sick after taking food.

Temperature

Violent rigor, fever, great pain in abdomen with diarrhea and constant vomiting.

Comments

C. S. Spencer records this effect from taking capsules each containing ten minims of the oil of male fern for tapeworm: "A feeling of nausea, abdomen became painfully distended with colicky pains. Menses returned after only one week's absence and continued profusely for three weeks. Very sick after taking her food. The worm was got rid of and the capsules stopped when these symptoms passed away."

Teste has used it successfully in a case of violent dyspnea without cough with stitches in region of heart and obscure symptoms of pericarditis. The patient was a young lady of lymphatico-nervous temperament and was much weakened by long sickness.

Compare

(1) *Aspidium alhamanticum*. Panna - 3 doses, 2 grams each, all in half hour, fasting in a glass of milk. Tasteless and will remove tapeworm.

(2) Cina, Gran., Kousso.

SOURCES

Boericke. Clarke.

Flavus

Pharmacy

Flav. Flavus Bacillus. Neisseria family. Historical dose: All potencies, 6c to 30c.

History

Flavus is a bacterium called *Neisseria Phringis Flava*, belonging to the *Neisseria* family of the *Micrococcales* order. These microbes are in the shape of shells arranged in pairs

like coffee beans. They are Gram-positive. Neisseria Flava is an aerobic saprophyte found in the upper respiratory passages.

Flavus is not considered to be pathogenic. Nevertheless, it was isolated from the cerebrospinal fluid of several children suffering from meningitis. It owes its name to the formation of a yellow pigment in the middle of the culture colony. There is no existing Homeopathic symptomatology for this remedy. Sevaus has undertaken a clinical proving.

Homeopathic

Flav. shows signs of irritation in the eyes, nose and pharynx which can lead to spasmodic rhinitis. Sensation of a lump in the throat. Headaches. Thyroid problems. Periorbital headaches, localized on the right side. (Sang.) Slight localized trembling, particularly in the fingers. Intoxication.

Pain at the level of the frontal and maxillary sinuses. Discharge from the eyes and nose. Has a cold regularly, coughs and expectorates. Feeling like feathers in the throat like Kali-bi. Feeling of gravel in the larynx after speaking for a long time.

Constitutions

Psoric, sycotic and tubercular constitutions. **Planets:** Moon.

Modalities

Better in the autumn. Better in the spring. Better from hot baths. Worse from cold. Worse from heat. Worse in the morning on waking. Worse at night. Worse after drinking wine. Worse on the left side.

Symptoms

MIND

Low morale, exaggerates difficulties. Sensitive to others emotions and being contradicted.

Back

Arthrosis of the cervical column with cracking. Pain in the back, spreading to both arms. Neck pains. Cervical-brachial neuralgia.

PAGE 679

Ears

Frequent attacks of otitis. Pain in the right ear. Recurring otitis.

Eyes

Per-orbital headache, localized on the right side. Eye fatigue. **Eyes** swollen in the morning, on waking, eyelids heavy. **Eyes** red in the evening, when tired.

Conjunctivitis.

Female

Hot flushes, worse at night. Menses irregular too early of varying quantities with pale blood. Menses late with pre-menstrual syndrome. Loss of blood at ovulation.

Dysmenorrhea. Endometriosis. Menses too frequent.

Food

Complaints aggravated by wine. (Zinc, Nux-v.).

Head

Periorbital headaches, localized on the right side. (Sang.).

Heart

Palpitations at night with feeling of fever, worse after drinking wine.

Limbs

Slight localized trembling, particularly in the fingers. Pain in the joints with cracking situated at the knees, wrists, shoulders and fingers. Pain in the left arm. Pain in the left hip. Arthrosis, rheumatic arthritis. Sciatica.

Lungs

Coughing in the morning for 1 hour, on waking. Dyspnea, worse at night, worse around 2 a.m. , with waking and suffocation.

Mouth

Arthritis of the jaw with loose teeth.

Nose

Nose dry with dry scabs. Bleeding from the nose in the morning on waking. Nasal discharge of greenish pus like Kali-bi. Nasal congestion at night: one nostril becomes blocked. Sneezes easily. Spasmodic coryza. Sinusitis.

Skin

Perspiration from the palms. Ecchymosis occurring regularly from the slightest shock. Dry eczema of the palms. Ecchymosis.

Stomach

Digestion bad. Digestive complaints after moist food. Frequent nausea after meals.

Throat

Red sore throat. Sore throat after having had wet feet. Dysphagia. Tickling sensation in the right side of the larynx. Frequent loss of voice. Dry cough, aggravated in the morning.

Throat dry with slight discomfort at night. Throat inflamed. Feeling that the hard palate is touching the tongue.

Compare

(1) Kali-bi. - Coryza and sinusitis with sensation of blocked nose and tickling in the nostrils. Thick yellow or greenish discharge, viscous or running, forming greenish elastic lumps, sticky, which leave the mucous membranes raw and burning.

(2) Zinc - Also shows aggravation from wine, but the depressive condition is infinitely more accentuated. General weakness. Cannot keep his legs still.

SOURCES

Julian.

Flor de piedra

Pharmacy

Flor-p. Flor de Piedra. Lophophytum Leandri. Balanophoraceae family. South America. Historical dose: Tincture and all potencies, 3x to 30c.

Herbal

Flor de Piedra grows in the tropical forests of Argentina, Paraguay and Brazil. This plant is used by the natives for stomach and liver disturbances. In Pio Carrera's book on Brazilian phototherapy, rickets and epilepsy are also indicated.

W. Schwabe brought back the plant from Brazil and in collaboration with others, he carried out a proving on sixteen provers, on February 21, 1964. (Ten women and six men). The potencies used were 6x, 4x, 3x, 2x. J. R. Reside undertook another proving in 1966-67. Finally, Juliette Fourmon has undertaken an extremely thorough clinical proving.

Homeopathic

Sudden tiredness, especially in the morning. General nausea. Emaciation from the pituitary or the thyroid gland. Neuro-endocrine complaints, congestion of the thyroid with vago-sympathetic disharmony.

Headache, vertigo, constriction of the neck, morning fatigue. Distention and spasmodic diarrhea.

PAGE 680

Pain in the heart and liver. Cardiac complication of hyperthyroidism. Pituitary diabetes. Congestion of the thyroid. Feeling of tightness around the neck.

Clinical

Cholecystitis. Colic. Colitis. Diabetes. Dysthyroidism. Exophthalmus. Goiter. Hyperthyroidism. Hypothyroidism.

Constitutions

They are tubercular, nervous, phosphoric or phospho-fluoric types. **Planets:** Moon.

Modalities

Better from open air, heat. Worse in the evening from exertion.

Symptoms

MIND

Increase in general activity, mentally alert, clear-headed, bright, then slow, woolly, depressed.

Abdomen

Wakes at 2 a.m. with abdominal pains, ameliorated by going to stool. Heavy, full feeling and abdominal distention. Cannot bear the pressure of underclothes. Pressure in the right iliac region.

Back

Pain in the right shoulder on lifting the right arm.

Blood

Disorders of the basal metabolism. Hypo-cholesterolemia.

Chest

Right subcostal pain. Feeling of oppression in the thorax, rather more to the right than the left side. Thoracic pain, worse by movement and deep respiration.

Ears

Pruritus of the auditory canal.

Eyes

Stye on the lower right eyelid. Diminution in visual activity. **Eyes** blood-shot. Orbital pain of a pressing type, when reading.

Female

Menses infrequent. Menses abundant, but late by five days. Greenish vaginal discharge.

Food

Extreme thirst.

Head

Left frontal and headache. Left temporal headache, ameliorated in the open air. Headache increased in the evening. Headaches, as though the brain would burst with visual disturbances and zigzags at the edge of the field of vision.

Heart

Palpitations.

Kidneys

Abundant urine.

Limbs

Painful drawing feeling in the left arm with formication in the left hand. Painful drawing and pricking feeling in the left arm, elbow and hand. Heaviness in the legs. Feet cold.

Sharp, cutting pain in the left knee, worse when walking. Drawing pain in the right thigh down to the calf and heel. Right foot slightly edematous and sensitive to pressure.

Lungs

Irritating, dry, hacking cough.

Mouth

Mouth dry with difficulty in swallowing. Diminution in sense of taste. Ulcers in the

mouth and on the lips and tongue. **Heart**burn.

Nose

Dryness in the nose. Fits of sneezing.

Rectum

Tendency to diarrhea with grayish or pale yellow stools.

Skin

Generalized pruritus, but particularly the ears, scalp, arms and face, abdomen and anal region. Marks on the thighs and lower limbs. Perspiration.

Sleep

Sleep disturbed, fiery, hot feeling in bed.

Stomach

Acrid dyspepsia. Nausea and epigastric discomfort.

Temperature

Profuse sweating and hot flushes.

Throat

Throat dry, empty swallowing to clear the throat. Feeling of a lump in the back of the throat. Stabbing pain in the throat, worse during the morning.

Vertigo

Vertigo and tendency to fall to the left.

Comments

Freiwald reports favorable results in thyroid infections, using the potencies 3x and 6x and in infections of the liver and bladder, using 4x and 6x.

Juliette Fourmon reports some clinical successes in goiter cases, hyperthyroidism. Also in a case of bilateral degenerative labyrinthitis. M. Tetau has made a general review of thyroid disorders and their homeopathic and biotherapeutic treatment, noting the value of *Lophophytum Leandri*.

Compare

(1) Iodum - Anxious, cannot stay still, emaciation, hoarseness, diarrhea. Precordial anxiety with palpitation at the slightest exertion.

(2) Hedera Helix.

(3) Nat-m. - Emaciation of the upper part of the body, headache, dryness of the mouth and fissure on the middle of the lower lip. Abnormal desire for salt.

PAGE 681

Compare

(4) Tuberculinum - Asthenia, emaciation, erratic pains, constant need to move, diarrhea in the morning, sweating at the least physical or mental effort.

SOURCES

Julian.

Fluoricum acidum

(hydrofluoric acid)

Pharmacy

Fl-ac. Fluoricum acidum. Hydrofluoric acid. H. F. Made by distilling pure fluor spar, (Calcium fluoride) in a state of fine powder with sulfuric acid. Solution. Historical dose: All potencies, sixth to thirtieth potency.

History

Fl-ac. acts on the lower tissues of the body much like Silica, which it follows and precedes well. It is useful after the abuse of Silica. The modalities of the two are different, Fl-ac. having better from cold applications. It acts on the bones, especially the long bones, causing decay and necrosis and favors the expulsion of the necrosed part. Fistulae, rectal, dental and lachrymal come within its sphere. Old scars, scars become redder and itch. Small red spots here and there, worse by warmth, better in cool place. Red blotches on body which tend to desquamate. Nails grow rapidly. Teeth are deficient in enamel, black, rough, unsightly-looking. Increased sensitiveness of vision and hearing.

Homeopathic

Destructiveness is the keynote of this acid. Fl-ac. produces slow deeply destructive effects, decay of long Bones, ulcerations, bedsores, varicose veins. Acts especially upon lower tissues and indicated in deep, destructive processes, bedsores, ulcerations, varicose veins and ulcers.

Especially adapted to chronic diseases with syphilitic and mercurial history. Glabella region bloated.

Patient is compelled to move about energetically. Complaints of old age or the prematurely aged with weak, distended blood vessels. Hob-nailed liver of the alcoholics.

Early decay of Teeth. Old cases of nightly fevers, coming on periodically. Goiter. Always feels too hot, wants to bathe in cold water. Tissues are puffy indurated and fistulous. Discharges are thin, foul, acrid or salty, causing itching. Edema. Felon. Nevi.

Secondary syphilis. Numbness of the part not lain on in brain diseases, spinal disorders. Calcareous degeneration. Nevus, flat. Suffering, if the call for evacuation is not immediately attended to. Dropsy with numbness or without.

Clinical

Abscesses. Alcoholism. Alopecia. Bedsores. Birthmarks. Bone disorders. Brain, atrophy.

Coccyx, pain. Dropsies. Edema. **Eyes** disorders. Fistula. Gleet. Goiter. Gonorrhea. Hair, loss. Headaches. Hemorrhoids. Hydrocele. Liver induration. Locomotor ataxia. Nose inflammation. Nymphomania. Otorrhea. Peritonitis. Perspiration. Pityriasis. Satyriasis. Scars. Spleen, pains. Strokes. Suppuration. Syphilis. Teeth, defective. Toothache. Tongue, ulceration. Ulcers. Varicose veins. Veins, diseased. Whitlow.

Constitutions

It is suitable to complaints of old age or prematurely aged. Suited to the weakly constitutions, sallow skin, emaciation. Pale, miserable, cachectic, flabby and broken down patients. Dropsy of Limbs in old, feeble constitutions. **Planets**: Saturn.

Modalities

Better cold,(**heat nature**) while walking from cool bathing, rapid motion,(**yin vacuity heat so yang excess so motion helps**) sort sleep, bending head back, eating.(**deficient condition**) Worse warmth, heat of room, alcohol, red wine, sour foods.(**heat things aggravate**) Worse night,(**yin vacuity**) morning, warm drinks.

Symptoms

MIND

Impulse to walk fast, necessity to be always on the move.(**restless due to yang excess**) Aversion to his own family, to those loved best.(**heart yin deficient so indifferent or averse**) Becomes interested and converses pleasantly with strangers.(**heart yang**) Inability to realize responsibility.(**heart yin deficient**) Depression of mind.(**lung and heart depressed due to yin vacuity**) Stands on the street looking at women as they pass by, so great is his lust.(**kidney yang excess and yin deficient**) Sits silently, does not utter a single word, nor answers when questioned.(**heart yin deficient**)

PAGE 682

Abdomen

Ascites from hepatic disorders induration, enlargement and portal congestion.(**damp heat in liver**) Flatus and belchings.(**liver qi stagnation due to damp heat so flatus and belching**) Sensation of emptiness at the region of navel (**small intestine vacuity that is heart yin vacuity**)with a desire to draw a deep breath better bandaging.

Breasts

Nipples sore, cracked.(**liver yin deficient and heat**)

Chest

Oppression in chest,(**qi stagnation**) difficult breathing,(**qi stagnation**) great dyspnea, better bending backwards.(**bending backward stretches the body and yang excess likes stretching**) Hydrothorax.

Ears

Deafness better bending head back.(**deafness due to liver fire rising. other causes are wind heat, rise of phlegm fire, stagnation of qi and blood. yang excess so bending back helps**)

Eyes

Sensation as of a cold wind blowing through the eyes.(sensations are due to lung so cold wind in lung) Lachrymal fistula.(fistula due to vacuity heat,damp heat,toxic heat invasion so lachrymal means damp heat in liver channel) Violent itching of

inner canthus.(**inner canthus belong to heart so violent itching means heart wind heat**) As if something in the eyes, that could not be rubbed off, must wink. *Left eye smaller than right.*(*heart wind affecting so affecting left side*)

Face

Heat in face, wants to wash it in cold water. Pale.(**stomach or heart heat**)

Female

Menses too early, copious, frequent too long.(**kidney yang deficient –frequent and copious,early-heat in blood or qi deficient**) Metrorrhagia (**kidney does not close the “gate” properly causing irregular uterine bleeding so kidney yang deficiency with lung qi deficiency**)with **difficulty of breathing**. Feels distressed if the flow is slightly delayed. (**Yang deficiency (Kidney) – can’t warm organs – impairs production of blood – deficient Chong so delay so distressed**) Ulceration of uterus and os.(**toxic damp heat**) Copious and excoriating leucorrhea.(**toxic damp heat**) **Nymphomania.**(**kidney or liver yang excess**)

Food

Desire for pungent,(**lung and large intestine**) spicy,(**lung and large intestine**) highly seasoned food. Craves cold water, hungry.(**lung vacuity or stomach heat**) Warm drinks produce diarrhea.(**warm drink increase heat in stomach so stomach heat diarrhea**) Averse to coffee,(**heart fire excited**) wants fancy dishes.(**lung**)

Head

Stunning headache, better urinating. Pressure on sides of head from within outward.(**liver yang active-sides of the head and within outside**) Pressure in occiput.(**kidney yang excess**) **Pain along the sutures. Puffy glabella.** Decay of ossicles and mastoid with copious discharge,(**liver or heart toxic damp heat**) worse warmth. (Sil., worse cold.) Exostosis.(**bone enlargement-kidney yang excess**) Decay of skin.(**damp heat in lung**) Alopecia.(**blood vacuity and wind dryness due to insufficiency of kidney yin or Deficiency of Liver and Kidney Yin,Insufficiency of Heart-Blood,Qi Stagnation and Blood Stasis**) Falling out of hair after fevers.(**qi and blood stasis so after fever**) Brittle hair.(**Liver And Kidney Deficiency, Spleen and Kidney Yang Deficiency, damp heat**)

Kidneys

In dropsy, produces frequent and free discharge with great relief.(**water accumulation relieved by kidney yang excess action**) **Upward drawing in the urethra.** Urine, scanty, dark.(**excess kidney yang so heat or bladder heat**) Increases urine in dropsy.(**water accumulation released by kidney yang**)

Limbs

Dropsy of limbs in old feeble constitutions.(**spleen deficiency dampness accumulation due to lung qi deficient so water coursing and distribution is uneven,kidney controls water metabolism but require descending lung function,old and feeble—kidney yin deficient**) **Felon. As of a splinter under the nail.** Nails distorted,(**liver fire or wind**) crumble, grow rapidly.(**liver fire or wind**) Inflammation of joints of fingers.(**lung heat as lung may represent joint and also other big joints liver may also be involved due to tendons**) **Feeling of hair on back of fingers.** Constant redness of the hands especially the palms.(**it is due to Heat in the spleen and stomach and wind due to blood heat**)

Decay and necrosis,especially of long bones.(**kidney yin/blood deficiency or blood stagnation with damp heat,blood heat with stagnation**) Coccyx, pain.(**kidney yin deficient**) Ulcer over tibia.(**damp heat and kidney blood/yin deficient or stagnant**) Hot

sweaty palms.(spleen damp heat) Soreness between toes.(kidney yin deficient or damp heat or liver blood dryness) Corns sore.(phlegm heat)

Liver

Soreness over liver.(liver blood dryness) Hepatic disorders with ascites.

Lungs

Difficulty of breathing with or alternating with metrorrhagia.(kidney does not close the "gate" properly causing irregular uterine bleeding so kidney yang deficiency with lung qi deficiency) Great dyspnea, better bending backwards. .(bending backward stretches the body and yang excess likes stretching)

Male

Burning in urethra.(liver channel heat) Increased sexual desire in old men.(liver and kidney yang excess with kidney yin less) Enjoyment excessive.(heart yang active)

Violent erections at night.(liver blood vacuity heat at night) Oily pungent(lung) smelling sweat on genitals.(severe kidney and lung yang deficiency or yang collapse—oily near death) Swollen scrotum.(kidney yang excess so swollen or liver channel yang heat or damp heat) Varicocele.

Mouth

Teeth, decay rapidly, worse at roots,(liver/stomch fire,roots worse that is kidney yin deficiency) feel warm.(kidney yin vacuity heat) Thin enamel.(kidney yin deficiency) Late dentition.(kidney yin deficiency) Dental fistula with persistent bloody, salty discharge. (kidney yin deficient so fistula with blood stagnation so persistency,kidney-salty)

Syphilitic ulceration of throat, which is very sensitive to cold.(wind heat in throat may be due to stomach fire) Teeth feel warm.(kidney yin vacuity heat) Affects teeth and bones of upper jaw. Tongue, fissured in all directions,(stomach or heart yin deficiency) painful when talking. Ulcer on and under tongue.(stomach heat or heart fire)

Nose

Fluent coryza during sleep.(lung vacuity heat that is lung yin deficiency) Sneezing with salivation.(lung qi stagnant with spleen qi deficiency or kidney vacuity heat) Chronic nasal catarrh(lung vacuity heat) with ulceration of the septum(kidney yin vacuity heat), nose obstructed and dull heavy pain in forehead.(phlegm heat in lungs and stomach)

Rectum

Bilious diarrhea with aversion to coffee.(liver fire with heart yang active) Itching and burning at anus.(wind heat due to vacuity kidney heat and excess kidney yang so wind) Warm drinks and salmon produce diarrhea.(warm increases fire in stomach or liver)

Sensations

Peculiar symptoms are: Increased ability to exercise his muscles without fatigue.(excess spleen yang so no fatigue) Fl-ac is less affected by excessive heat in summer or cold in winter.(excess yang so protective qi on body so less affected by heat/cold) Sensation as of a cold wind blowing under lids, even in warm room, as of air passing down from shoulder-joint to fingers. Numbness of limbs even when not lain on.

Skin

Dry, harsh, itching or cracked skin.(lung yin deficiency that is vacuity heat and wind) Varicose veins. Nevi. Keloids. Scars,(qi stagnation/blood stasis)surrounded by pimples, , (qi stagnation/blood stasis) become red around the edges. Bedsores,(lung yin deficiency vacuity heat with blood/qi stagnation) worse warmth. Ulcers, red edges and vesicles. Itching of scars.(qi stagnation wind heat so itching) Itching especially of the orifices and

in spots,(qi stagnation so wind heat) worse warmth. Feels as if hot vapor were emitted from all the pores.(wind heat) Syphilitic rupia. Nails grow rapidly.(liver yang excess) Periosteal abscess. Profuse and sour offensive perspiration.(liver heat or liver yang excess perspiration) Syphilitic tubercles. Atony of capillary and venous system.(heart and lung yin deficiency) Tissues bloated.(yang excess or qi/blood/damp stagnation)

Sleep

Sensation as if sleeping on side not lain on.

Stomach

Heaviness and weight in stomach.(phlegm heat in stomach) Heat in stomach before meals.(blood stasis so it is before meals) Sour or stale belchings.(stomach heat) Gnawing hunger(gnawing –blood stasis) is always eating which temporarily relieves. Biliious vomiting on slightest errors in diet.(liver yang excess reacts immediately with wrong diet)Stomach symptoms better tight clothes.(qi stagnation)

Temperature

Nightly fevers coming on periodically.(qi stagnation-periodic and yin vacuity heat fevers-night) Ebullitions of heat with pain in bones.(kidney yang excess so heat and pain in bones) Acrid, eroding sweat, excites itching.(lung wind heat,eroding means blood stagnation or toxic heat) One sided sweat (left).(yang excess so left side,left body is yang) Sweat on hands and feet.(spleen and kidney yang excess) Sweat on diseased part. (diseased part that means is due to yang excess so yang excess heat sweat)

Comments

According to Guernsey Fl-ac. affects the right ear, left teeth, left hypochondrium, left side of abdomen, right side and nape of neck, right side of back. T. F. Allen has recorded an experience showing the applicability of Fl-ac. in whitlow.

According to Mc Lachlan, the left hand is affected rather than the right and the pus tends to point on the dorsum of the finger.

Better from cold washing distinguishes it from Silica. Fl-ac. is also distinguished from Sil. by the general better from walking in the open air. "A constant, irresistible desire to walk in the open air, its does not fatigue," is characteristics of Fl-ac. Hunger predominates. Symptoms seem to go from below upward.(yang excess)

Compare

- (1) Thiosin. - action on scar tissues, adhesions, strictures, tumors. Calc-f., Sil.
- (2) Coca - fatigue, Coffea - toothache.
- (3) Cit-ac. and Sep. - aversion to one's family.
- (4) Ox-ac. - diarrhea worse from coffee.
- (5) Rhus-t. and Ruta - Coccyx, pain.
- (6) Sil. - fistula, onychia, bone diseases, Coccyx, pain.
- (7) Brom., Iod., Spong. and Kali-c. - goiter.
- (8) Staph. - teeth.

Relations

Complementary: Sil. Compatible: after Ars. in ascites from gin-drinker's liver after Kali-c. in hip disease after Ph-ac. in diabetes. Followed well by: Sulph., Nit-ac.

SOURCES

Boericke. Clarke. Phatak.

Folliculinum

(ovarian follicle)

Pharmacy

Foll. Ovarian Follicle. Folliculinum. Trituration. Historical dose: All potencies.

History

A female remedy, affecting primarily the female hormonal system. Folliculin in a homeopathic dilution could be indicated in pre-menstrual syndrome, as well as for all the functional symptoms present in a patient.

Folliculin in low potencies of 3x and 4c is an arouser to be given in cases of amenorrhea and insufficient menstruation. In 7c, it is a regulator. In 9c, it is a restrainer and a dose should be given either towards the tenth day of the cycle, when the pains predominate on the 14th day or 5 days before the beginning of menstruation, when the discomforts are predominant before the arrival of menses. **Planets:** Moon, Venus.

Homeopathic

Worse before menses. Pre-menstrual syndrome. Pre-menstrual migraines. Weight gain without excessive eating, worse before menses or during ovulation. Frequent ecchymosis, bruises very easily. Acne on the face and seborrhea of the nostrils.

Hypersensitive to heat, noise and contact. Congestive headaches, either with redness of the face or the opposite with pallor, but still with the sensation of chilliness at the limbs.

Clinical

Cystitis. Headaches. Mastitis. Migraines. Pre-menstrual syndrome.

Modalities

Ameliorated after the third day of menses with movement. Better fresh air. Folliculin shows aggravation before menses. Worse during ovulation from heat and from resting.

Worse before menses.

PAGE 684

Symptoms

MIND

Alternation of excitability and depression, worse before menses. Extreme instability with anguish, worse at nightfall. Sexual hyper-excitability. Fixed ideas of a sexual nature.

Irritable and sensitive before the menses.

Abdomen

Abdominal meteorism, worse three or four days before menses. Liver swollen, soft and hypertrophic.

Back

Lumbar pains, worse during ovulation. Backache before menses.

Bladder

Recurring cystitis in women.

Breasts

Breasts enormous, swollen, cannot bear being constricted or touched. The pain is ameliorated or disappears with menses. Congestive mastitis.

Female

Vulvar pruritus, worse before menses. Small losses of blood during ovulation. Menses prolonged, blood bright red with clotting. Menses painful for the first few days. Yellow or

brownish discharge, sometimes blood streaked, between menses, especially during ovulation. Uterus is fibrous with metrorrhagia. Congestion, pre-menstrual pains.

Heart

Tachycardia. Palpitations with faintness. Sensation of constriction around the heart with feeling of a bar in the precordial region, spreading to the left arm.

Lungs

Need for fresh air. Takes large breaths of air and sighs deeply. Fitful cough, worse when in company with sensation of constriction around the heart.

Nose

Coryza with headache and profuse discharge. Hay fever.

Rectum

Feeling of heaviness in the rectum. Chronic constipation, sometimes alternation of constipation and diarrhea.

Skin

Acne on the face and seborrhea of the nostrils. Dry eczema, worse during ovulation, before menses. Dry eruption at the limbs of the fingers with splitting and chapping of the skin. Alopecia in women. Swelling with edema of the conjunctiva tissue.

Stomach

Indigestion. Nausea with vomiting. Pre-menstrual pain in the right hypochondrium.

Throat

Swallowing of liquids very painful. Cannot bear pressure on the pharynx.

Relations

(1) The closest remedy is Lach. Like this remedy, it has: Alternating excitability and depression, extreme sensitivity to contact, amelioration by menstrual flow. But, unlike Lachesis, we do not find: Laterality or aggravation from sleep, but, on the contrary, aggravation during ovulation.

(2) Sepia, Lac-c., Puls., Kali-c.

SOURCES

Julian.

Formalinum

(formalinum)

Pharmacy

Formal. Formaldehyde. Formalinum. Aqueous Solution (35 per cent) of Formaldehyde Gas. Historical dose: Tincture and all potencies, as vapor in hot water in respiratory affections, 1 per cent. spray, otherwise 3x potency.

History

Formalinum is a powerful disinfectant and deodorant, a potent poison. Prevents growth and kills almost any pathogenic micro-organism. It seems to have the peculiar property of eating into malignant tumors, leaving the surrounding healthy tissue uncharred and unchanged.

A plug of cotton wool soaked in a 20 per cent. solution of Formaldehyde and applied for a few hours, will produce a necrotic slough, which must be scraped away before the next application, otherwise it hardens. **Planets:** Mercury.

Homeopathic

Formalin in hot water as vapor most valuable therapeutic agent in whooping cough, tuberculosis in catarrhal disorders of upper air-passages.

Clinical

Laryngismus stridulus. Tuberculosis. Whooping cough.

Symptoms

MIND

Anxiety. Dullness of mind. Forgetfulness. Unconscious.

Head

Coryza, eyes water, Vertigo.

PAGE 685

Kidneys

Anuria, albuminous urine.

Lungs

Dyspnea. Laryngismus stridulus. Whooping cough.

Mouth

Ptyalism, thick saliva, loss of taste.

Rectum

Intense urging to stool, watery stools.

Skin

Puckers skin like leather, wrinkles, scales off. Eczema in neighborhood of wound. Damp sweat most marked on right upper extremity.

Stomach

Food feels as if it were a ball in stomach. Burning in mouth and stomach.

Temperature

Chills in forenoon, followed by long fever. Bones ache during whole paroxysm. During fever forgets where he was.

Compare

(1) Ammonium formaldehyde, known commercially as Cystogen. Dose, five to seven grains two to four times daily, dissolved in hot water after meals. Prevents the decomposition of urine in the bladder, kidneys and ureters. Turbid urine rendered clear and non-irritating, phosphatic deposits dissolved and growth of pyogenic bacteria arrested.

(2) Also, Urotropin - A diuretic and solvent of uric acid concretions, relieves cystitis associated with putrefaction. Three grains well diluted. When administered it invariably appears in the cerebro-spinal fluid and therefore advised in threatened meningeal infection.

Relations

Antidote: Ammonia water.

SOURCES

Boericke.

Formicium acidum

Pharmacy

Form-ac. Formic acidum. Formic Acid. Historical dose: Tincture and all potencies.

History

The place of Formic acid in medicine and chemistry is a great and growing one. In the form of tincture of ants *Formica rufa*, it has a distinct place in homeopathic practice. *Apis* and other insects contain Formic acid, also *Urtica* and many other plants.

Formic acid is known to the homeopathic *Materia Medica* only in the preparation of *Formica*, a tincture being made of the insects, which contains the acid. Formic Acid in small doses increases muscular strength and resistance to fatigue. Feels stronger and more fit in ordinary walking.

In prescribing it for varicose veins, polyps, catarrh, Clarke orders an ounce or two of a solution of Formic acid to the proportion of one part of the acid to eleven of distilled water. Of this one teaspoonful is taken in a tablespoonful of water after food once or twice daily. **Planets:** Mars, Saturn.

Homeopathic

Chronic muscle pain. Failing vision. Muscular pains and soreness. Gout and joint rheumatism, which appear suddenly. Pains usually worse on right side, motion and better from pressure. Tremors. Marked diuretic effect, greater elimination of products of disassimilation, particularly urea.

Chronic arthritis in connection with gouty diathesis. Chronic arthritis following an attack of acute rheumatic fever shows also remarkable results although often pains of a neuralgic character persisting in certain spots are very stubborn.

Clinical

Arthritis. Gout.

Comments

Mr. R. Wallace Ellison of Richmond, sent three letters to Anshutz. About two years and nine months ago I added to my daily diet from one to two grains of Formic Acid with the result that it has produced the following results in my body:

Polyps and fibrous matter absorbed from my nose. Nose tongue, lips and some other parts greatly reduced in thickness. Chronic catarrh of nose, throat and intestines practically cured. Stiff joints throughout the whole body have become loose. Short sight diminished by fifty percent. **Eyes** have changed in color from light slate gray to a darker shade.

PAGE 686

Varicose veins in left leg and others at base of neck now of no consequence. Facial and bodily appearance so altered that even my mother is puzzled and I can meet and converse with people who formerly knew me very intimately without my identity being discovered.

I have also tried its effects upon a sickly and scabby pony and found it quickly restored the animal to health as well as giving it a beautiful, healthy crop of hair. Anyone who cares can produce this result in the case of an old pony.

I hasten to add what I would have mentioned before, that the quantity taken during the last two years was not much over 1 grains daily. I found that 2 grs. daily was too much for regular use, though it served the purpose. If my theory be correct, perhaps 1 grains

daily would be the proper thing and best to be taken in the form of honey, raw juice of sugar cane, etc.

When I first commenced I used to drink about a pint of water with it, but now I just put the teaspoonful of acid into a very small quantity of water and drink it. It has a pleasant, "fruity" sort of taste. I add a little citric acid and sugar to it and I believe this improves the effect.

Chronic arthritis of traumatic nature can be cured by formic acid. In the latter case Formic acid 6x showed quicker and better results than 12x or 30x which are indicated in the previous cases. In general the disappearance of the stiffness of the joint is the first sign of improvement. Then the pain and swelling cease gradually in 1-6 months time.

In the Homeopathic world of April, 1902, Dr. Dudgeon gave an account of the work of Dr. Edward Krull of Gustrow, who was led to think of Formic acid as a remedy from its constant occurrence in the internal organs and soft parts of the body.

He found it constantly present in the sweat of healthy persons, but very much diminished in or entirely absent from the sweat of persons affected with tuberculosis.

He thought to supply the defect in tubercular subjects by introducing it into the system in material doses. But he found no benefit when he gave considerable doses by the mouth.

So he had recourse to hypodermic injections of the watery solution. After two years of experiments he found to his surprise that the more dilute his injections were the more powerful the effects and he ended by giving injections of a dilution which corresponds to our 3c or 4c and waiting five or six months before repeating the injection.

"He treated in this way with success," I am quoting Dudgeon, "external and internal tuberculosis, chronic nephritis and malignant tumors. It was necessary for the success of the treatment that the nutrition of the body should be well maintained. In cachectic states the treatment is not indicated. It will be remembered that Hering mentions the case of an anemic woman who died from the effects of an ant-vapor bath."

"The general effects which were observed in all the cases treated by Krull's method were: Immediate increase of nutrition, the appetite improved, the weight increased, all this without any material change in the diet.

In all the patients during the first months, sometimes every two or three days, sometimes at an interval of weeks, there occurred slight transient attacks of pain in the abdomen, on the right and left of the umbilicus, sometimes accompanied by urging to stool. If several copious fecal evacuations occurred, this had no bad effect on the patient, they seemed to have a critical character. After the injection the menses came on earlier and were more copious, all diseased organs and parts showed greater activity."

In the first and second stages of tuberculosis cure is the rule. In the third stage the treatment only does harm, rapidly diminishing the strength.

PAGE 687

The action is most remarkable in lupus. During the first days after the injection the effected part commences to grow vividly red, rises up somewhat and discharges moderately and is the seat of shooting pains occasionally. Curative action usually begins in the third week.

"In carcinoma of the breast and stomach, the tumor first increases in size and becomes very sensitive and the skin over it feels warmer. The shorter the term the tumor has existed and the stronger the constitution, the sooner does reaction occur and the consequent cure of the disease."

In the concluding words of Dudgeon's article. "Tuberculosis, chronic nephritis and carcinoma are not diseases in which we can claim a great amount of success. So where other remedies fail or cannot be discovered we may take Solomon's advice and "Go to the ant!"

SOURCES

Anshutz. Boericke. Clarke.

Formica rufa

(red ants)

Pharmacy

Form. Formica rufa. Red Ants. Myrmexine. N. O. Hymenoptera. Tincture from crushed live ants. Contains formic acid. Historical dose: Tincture and all potencies, sixth to thirtieth potency.

History

Hering gives as an indication for Formic acid: " Burning pain, burning from washing, renewed burning from cold washing." **Planets:** Mars, Saturn.

Homeopathic

Formica rufa causes many rheumatic and gouty pains, the pains appear suddenly and dart from place to place: left, then right,, then left. The spinal cord is affected, paralyzes and spasms occurring. Formica rufa is an arthritic remedy with sudden rheumatic or gouty pains.

Chronic gout and stiffness in joints. Pains are worse from motion, better pressure. It affects spine, liver, kidneys and right side. Acute outbursts of gouty poisons, especially when assuming the neuralgic forms.

Formica has a marked influence on the formation of polyps. Tuberculosis, cancer and lupus, chronic nephritis. Complaints from overlifting. Apoplectic diseases. Gout and joint rheumatism. Atrophy of wounds. Takes cold easily. Carcinoma. Checked foot sweat, chorea from. Clammy skin, disagreeable sweat during night, sweat without relief.

Clinical

Arthritis. Brain disorders. Bruises. Chorea. Cough, Diarrhea. Dislocations. Dropsies. **Eyes** disorders. Facial paralysis. Foot-sweat, checked. Gout. Hair, loss. Headaches. Nodes. Over-lifting, complaints from. Paralysis. Rheumatism. Sight disorders. Spinal disorders. Spleen, pain. Stroke. Tapeworm. Throat, sore.

Causations

Complaints from over-lifting. Checked foot-sweat. Wounds. Great liability to take cold, consequences of cold and wet, cold bathing, damp weather.

Modalities

Better warmth, pressure, rubbing. Better by combing hair. Better after midnight. Worse motion, before snow-storms. Worse cold and cold washing, dampness. Worse from sitting.

Symptoms

MIND

Exhilarated after pain. Forgetful in the evening. Indisposed, morose, fearful,

apprehensive. Exhilarated after pain in vertex abated. **MIND** unusually excited.

Remarkable and unexpected activity of mind during the day with absence of usual dullness and sleepiness.

Abdomen

Flatulence. Drawing pain around navel before stools. Dull pain in region of spleen.

Hardening of mesenteric glands.

Back

Soreness in neck and up into head. Severe pain left side of neck while chewing. Severe pain across sacrum and dorsum of each hand. Affection of spinal cord.

Breasts

Violent penetrating pain in region of right nipple. Lack of milk with nursing women.

Chests

Pleuritic pains.

PAGE 688

Ears

Cracking in ear with headache. Polyps. Ringing and buzzing. Parts around ear feel swollen. Ringing buzzing in ears. Cracking in left ear with headache. Deafness. External sensitiveness of right ear and temple.

Eyes

Pain in the eyes on waking, better washing. Rheumatic iritis. Dim sight. Flickering before eyes. Pterygium. Macule and ulcers on cornea. Rheumatic ophthalmia. Spasmodic twitching of upper eyelid.

Face

Entire left side of face and cheek feel as if paralyzed.

Female

Ovarian cysts containing water or blood. Menses scanty and pale with bearing-down pain in back. Menses appear eight days too soon.

Head

Brain feels too heavy and large. Headache better after combing hair. As if bubbles bursting in forehead. Vertigo. Headache with cracking in left ear.

Heart

Uneasy pain in region of heart. Fluttering palpitations.

Kidneys

Bloody, albuminous with much urging. Quantity of urine increased, urates. Paralysis of bladder. Urine like saffron, bright yellow, no sediment, passed frequently.

Limbs

Rheumatic pains, stiff and contracted joints. Rheumatism comes on with suddenness and restlessness. Muscles feel strained and torn from their attachment. Pain in hips. Weakness of lower Limbs. Paraplegia. Hands numb. Hard nodes around joints in and out. Stiffness and contraction of joints. Itching in armpits in morning.

Lungs

Nervous asthma. Cough mostly at night. Hoarseness with dry, sore throat with aching in forehead and constrictive pain in chest, pleuritic pains. Violent attacks of cough with vomiting, day and night.

Male

Seminal emissions, weakness. "Slothful to venery." Long-lasting erections after urinating in morning. Scanty ejaculation with incomplete erection.

Mouth

Water tastes sweetish.

Neck

Pain in neck when chewing, especially on closing jaws.

Nose

Nasal polyps. Coryza and stopped up feeling. Coryza and stopped-up feeling in nose.

Rectum

Light, foaming stools. Pain in bowels before stool with shuddering chilliness.

Constriction in the anus. Drawing pain around navel before stool. In the morning, difficult passages of small quantities of flatus afterwards diarrhea-like urging in the rectum.

Skin

Nettle-rash. Hives in flat plaques. Red, itching and burning. Wounds that atrophy. Nodes around joints. Profuse sweat without relief.

Sleep

All night dry throat, woke her out of sleep. Disagreeable sweat during night, awoke with clammy skin. Could get to sleep if she could get the right position. Wakes early and feels she has had sufficient sleep. On awaking: headache, vomiting with headache, pain in eyes, stitches in ears.

Stomach

Constant pressure at the cardiac end of the stomach and a burning pain there. Nausea with headache and vomiting of a yellowish bitter mucus. Pains shifts from stomach to vertex. Gas cannot be passed.

Temperature

Profuse sweat without relief.

Throat

Hoarseness with sore throat. Pain in neck when hawking or gargling. Sore throat in morning with much mucus. Sore throat worse left side.

Vertigo

Vertigo, all things seem to move to and fro and reeling of body, pain in left supra-orbital region when going to bed with dizziness, blackness before eyes, better by sitting down.

Comments

Sensation as if brain too heavy and large. Sensation as if a bubble burst in forehead. It is of use "in all kinds of apoplectic diseases. It strengthens the brain" (Hering). Cooper has given the 3x with success in cases of weakness of lower limbs.

PAGE 689

J. W. Thomson reports the case of a gentleman., aged 84, who had severe neuralgic pains between posterior of right ear and center of occiput. From this he apparently recovered. Eighteen months later he returned with a steady, sore and burning pain in same region, swollen and tender around, but especially behind, right ear.

He could only sleep in one comfortable position, which he could not describe, but only knew when he found it and he must be covered up warmly behind right ear and between that and occiput and neck. All on the right side. Better from taking right hand and rubbing gently behind right ear. Sweat afforded no relief, the whole head seemed to sympathize with the distress, he had dribbling of urine.

Formica rufa was given, six doses, one before each meal. On the second day towards evening, he felt Worse and on the third day there were twinges and spasms of severe pain in addition to the sore pain which he had before experienced. These gradually got better and on the fourth day even the soreness was much better.

The main thing, however, was that he felt mentally better said his mind and head felt stronger and from feeling depressed he had become cheerful and life did not seem the burden it had for some time past.

Fragaria vesca

(wood-strawberry)

Pharmacy

Frag. *Fragaria vesca*. Wood-strawberry. N. O. Rosacea. Tincture of the ripe fruit.

Infusion of the root. Historical dose: Tincture and all potencies.

History

It is well known that many persons are unable to eat strawberries and the poisonous effects resulting from them on those who are sensitive to their action have been utilized in homeopathy.

An infusion of the root is used for drying up the breasts in women who wish to wean their children, it diminishes the size of the breasts and dries up the milk.

In ancient medicine, *Fragaria vesca* was used in decoctions of leaves, root or fruit ripe or unripe or combinations of these. *Fragaria vesca* is commended by W. Salmon as a wash for sore-mouth, as a hemostatic arresting the menses and stopping "bloody-flux," swelling of the spleen, many forms of skin eruption and for "clearing the complexion."

Lippe mentions: "Tapeworm. Pain in chilblains in hot weather." In two instances Clarke has known the indulgence in strawberries to revive symptoms of gonorrhoea in men who thought themselves cured. A number of cases of sprue or pilosis have been cured by a diet of strawberries ad libitum. **Planets:** Moon.

Homeopathic

The well-known "strawberry tongue" is an indication for its use. Dr. Burnett gives it as "pippy tongue." Faintness, suffocation like a stroke, convulsions and death have resulted, general anasarca and especially swollen tongue. Profuse viscid sweat.

Clinical

Anasarca. Bilioussness. Chilblains. Convulsions. Erysipelas. Faintness. Gonorrhoea. Sprue. Strokes. Tapeworm. Tongue, strawberry, swollen. Urticaria. Weaning.

Franciscea uniflora

(brazilian manaca root)

Pharmacy

Franc. Franciscaea uniflora. Manaca. Brazilian Manaca root. N. O. Scrophulariaceae. Allied to Brunfelsia. Tincture of fresh root. An alkaloid, Franciscein is also used.

PAGE 690

Historical dose: Tincture and all potencies, tincture or Fluid Extract 10 to 40 minims.

Herbal

Franciscea uniflora is a Brazilian remedy of great local repute as an anti-syphilitic and anti-rheumatic. It is called "vegetable mercury." In large doses it is a poison, causing violent purgation and emesis.

Many cases of acute, sub-acute and chronic cases of rheumatism have been reported cured with the tincture, also pericarditis complicating rheumatism. **Planets:** Saturn.

Homeopathic

Hansen gives these symptoms as characteristic: Intense headache like a band around the head, pain in occiput, neck and spine, lancinating, sticking. Terrible aching all over with great heat, followed by profuse sweat, which better all symptoms.

Chronic stiffness of the muscles. Gonorrhoeal rheumatism. Syphilis and rheumatism, great heat over body, much aching, better sweat. Pain in back of head and spine, band-like feeling around head. Pericarditis with rheumatism. Rheumatic pains in feet and lower part of legs.

Clinical

Headache. Pericarditis. Rheumatism. Syphilis.

Franzensbad aqua

Pharmacy

Franz. Franzensbad aqua. The alkaline-saline springs of Franzensbad, near Eger in Bohemia. Franzens-quelle, Salz-quelle, Wiesen-quelle. Historical dose: Tincture and all potencies.

History

The Franzensbad waters are resorted to for their tonic effect, especially in chronic derangement of the digestion, obstinate constipation.

Inertia of the lower bowel, anemia following passive hemorrhages, chlorosis and nervous disturbances caused by debility.

The waters of each of the three springs, Franzens-quelle, Salz-quelle and Wiesen-quelle, have been proved by Dr. Watzke.

Sodium sulphate is by far the most predominant ingredient in each, the chloride and carbonate of soda coming next. The waters are also highly charged with carbonic acid gas. **Planets:** Moon.

Homeopathic

A great sense of weakness, physical and mental, was produced by all. With Franzensbad aqua there was increased sensitiveness to the cold. Contractive sensations. Contractive pain in whole forehead, sensation of contraction of skin of forehead between eyebrows.

Many symptoms of disordered stomach and bowels occurred and some peculiar symptoms in the penis and generative organs, Sensitiveness of the surface generally.

Clinical

Chlorosis. Constipation. Debility. Diarrhea. Dyspepsia. Nervous derangement.

Fraxinus americana

(white ash)

Pharmacy

Frax. Fraxinus americana. White Ash. N. O. Oleaceae. Tincture of the bark. Historical dose: Tincture and all potencies, ten to fifteen drops of tincture, three times a day.

History

Fraxinus americana is an uterine tonic, for nervous females. It is apt to be a useful remedy for all types of uterine displacements and fibroids. Fraxinus has had a fragmentary proving, but the chief clinical authority for its use is Dr. Burnett, who regards it as a uterine tonic in all heavy states of the uterus with prolapse, bearing-down and relaxed ligaments.

Burnett calls it "the medicinal pessary." Clarke has repeatedly verified these indications. It is an organ remedy of the first rank. **Planets:** Moon, Venus.

PAGE 691

Homeopathic

Fraxinus americana is also indicated in uterine tumors, especially fibroids with bearing-down sensations. Enlargement of the uterus. Fibrous growths, subinvolution and

prolapse. Uterine fibroids with bearing-down sensations. Fever sores on lips. Cramps in feet. Cold creeping and hot flashes. Infantile eczema.

Clinical

Eczema. Fibroids. Uterus, affections, prolapse. Uterus tumors.

Modalities

Worse injury, sprains, lifting.

Symptoms

MIND

Depression with nervous restlessness and anxiety. Must talk.

Abdomen

Heavy bearing-down pain, extending to the thighs or falling out sensation with fibroids.

Tenderness in left inguinal region.

Female

Fibroids with bearing-down sensation, cramping in feet, worse in afternoon and night.

Uterus is enlarged, heavy and prolapsed. Dysmenorrhea. Profuse leucorrhoea. Watery, non-irritating leucorrhoea. Profuse menses. Subinvolution. Sensitive left ovary.

Head

Hot spot or dryness on vertex. Throbbing pain in occiput. Depression with nervous restlessness, anxiety.

Limbs

Cramps in feet after midnight.

Skin

Infantile eczema.

Temperature

Cold creeping and hot flushes.

Fraxinus excelsior

(european ash)

Pharmacy

Frax-e. Fraxinus excelsior. European Ash. N. O. Oleaceae. The fresh leaves are pounded to a pulp and macerated with two parts by weight of alcohol. Historical dose: Tincture and all potencies.

History

Ash-leaves were highly recommended by the medical alchemist Dr. Rademacher and have been quite extensively used in Germany on his suggestion.

In the Union Medical for Nov. 27, 1852, two French physicians, Drs. Pouget and Peyraud, detailed several case of gout and rheumatism cured by an infusion of ash-leaves in boiling water. Dr. Peyraud himself was one of those relieved.

A commercial traveler, who had been gouty for twenty years and had saturated himself with the syrup of Boubee and other vaunted specifics, consulted Dr. Pouget. At this time he was almost constant prisoner in his room successive attacks.

After eleven days' use of the infusion, he was able to walk two kilometers (one and a quarter English miles) in fifteen days he resumed his journeys and was able to travel without suffering, by diligence from Bordeaux to Quimper. **Planets:** Saturn.

Homeopathic

Several cases of painful gout and rheumatism have been cured, some of them acute and others chronic. Joint rheumatism in numerous instances, was also benefited by the infusion of ash-leaves.

Clinical

Gout. Rheumatism.

Comments

Anshutz writes: In 1842, Dr. Peyraud had his first attack of gout, which was severe and lasted for twenty-five days. During the three following years the attacks increased in frequency and severity.

Having derived little benefit from the remedial means which he had resorted to, he listened to the suggestion of one of his patients and inhabitant of the department of Dordogne in France, who advised him to try an infusion of ash-leaves.

PAGE 692

Informing him, at the same time, that his forefathers had been cured by this prescription and that many of the country people got rid of 'their pains' by employing it.

Dr. Peyraud took the infusion of ash-leaves and from 1845 to 1849 had no fit of gout. He then had an attack, which yielded in five days to the infusion of ash-leaves, used under the observation of Dr. Pouget.

These circumstances recalled to the recollection of Dr. Pouget was this: that when he was a physician at Soreze in 1824, the peasants of that place had spoken to him of the great power which an infusion of ash-leaves had in driving away pains. He afterwards discovered that it had been used forty years ago as a gout specific by the peasants of Auvergne.

Fucus vesiculosus

(sea kelp)

Pharmacy

Fuc. *Fucus vesiculosus*. Kelp-ware. Sea-wrack. Bladder-wrack. Sea-kelp. N. O. Algae. Tincture and trituration of the dried plant. The fresh algae gathered in May or June are pounded to a pulp and macerated in two parts by weight of alcohol. Historical dose: Trituration, tincture and all potencies, tincture, five to sixty drops three times a day before meals.

Herbal

In the American Eclectic Dispensatory, John King states: *Fucus vesiculosus*, sea wrack or bladder-wrack, has a peculiar odor and a nauseous saline taste. The charcoal of this plant has long had the reputation of the deobstruent and been given in goiter and scrofulous swelling.

The dose is a teaspoonful of the tincture twice or three times daily in a well-developed case. Half a teaspoonful twice a day will answer in recent cases. Smaller doses seem not to produce any effect.

The medicine is very unpleasant to the taste, but causes no disturbance after it has been taken. It ought to be taken, each dose in about ounces of water and preferably between meals. **Planets:** Jupiter.

Homeopathic

Fucus is a tissue remedy of great power and must be compared with Iodine of which it contains a large proportion. The rapidity of digestion is increased and flatulency diminished. Goiter has been cured with it in teaspoonful doses of the tincture given two or three times a day.

A remedy for obesity and non-toxic goiter, also exophthalmic. Digestion is furthered and flatulence diminished. Obstinate constipation, forehead feels as if compressed by an iron ring. Thyroid enlargement in obese subjects. Very weak and restless.

Clinical

Dyspepsia. Goiter. Obesity.

Symptoms

Abdomen

Flatulency diminished and then disappears. Bearing-down pains in lower part of abdomen.

Eyes

Sight dim.

Face

Face became yellow.

Female

Menorrhagia, bright red blood, bearing-down pains in lower abdomen.

Head

Intolerable headache, forehead felt as if compressed by an iron ring. Nausea, vertigo, and slight headache. Headache with hemorrhages. Burning at vertex.

Kidneys

Frequent desire to urinate. Urine contains much blood.

PAGE 693

Lungs

Sense of suffocation, especially during menses. Difficulty of breathing. Inclination to cough, causing him to spit blood.

Nose

Nosebleed.

Rectum

Obstinate chronic constipation. Dysentery with menorrhagia. Dysentery, blood bright red.

Stomach

Vomiting of bright red blood.

Comments

Anshutz writes: The following letter, by Dr. J. Herbert Knapp to the Homeopathic Recorder, was published in 1896: After treating many cases of exophthalmic goiter, I have come to the conclusion that I have found a specific for that disease in *Fucus vesiculosus*, (sea-wrack). I might record one case.

Mrs. Mary B., age 24 years, German, came into my clinic at the Brooklyn E. D. Homeopathic Dispensary to be treated for swelling of the neck of several years duration. I gave her the tincture of *Fucus ves.*, thirty drops three times a day. The treatment began December 1, 1895 and patient was discharged cured, on October 2, 1896. Would be pleased to hear from any others who have had any experience with *Fucus vesiculosus*.

So far as I now remember, this is the only hint I ever receive which led me to try in goiter. At the same time, I do not feel sure of this. I had met in some medical journal a statement respecting the relation of this drug to goiter, which fact led me to look it up in the "Eclectic Dispensary."

But if so, I cannot recall the authority At all events, I was led to try the remedy in a pronounced case of goiter with such goods results that I have never since given any other remedy for that disease.

Either in the exophthalmic or in the uncomplicated form. What is more, I have never known it to fail to cure when the patient was under thirty years of age. After that time of life or about that period, it seems to be no longer efficacious.

I have now used it on more than twenty-four cases with the same unvarying result and never with any other result-that is, no unpleasant consequences have ever accompanied or followed its use.

I published this fact in the medical investigator after I had used it in a few case and again announced it in the Chicago Homeopathic Medical Society still later and again have

frequently repeated it with growing confidence and of greater numbers of cases in medical societies in colleges and in private conversation with physicians.

And yet the fact is so utterly unknown that your journal published Dr. Knapp's inquiry respecting it, which shows how easily a good thing may be forgotten. Also how readily a genuine specific may be superseded by a host of abortive procedures right under the eyes of the profession. It is most probable that more real good remedies have been forgotten or cast aside in medicine.

Respecting this *Fucus vesiculosus* and its use in goiter, I would like to add a few words. The drug is of variable quality. If one specimen fails to give satisfaction it ought to be discarded and another tried. The pharmacist must be importuned to make special efforts to give us an article that is not inert, but contains all the activity that belongs to the drug.

Time is required for effecting a cure. This varies according to the age and size of the goiter. Three months may suffice for a small goiter of one year's growth. Six months may be required for one twice as large and of longer standing. A year and a half is the longest period during which I have had to continue the medicine. But during all that time the goiter was manifestly diminishing.

Bacillus gaertner (bach)

(bowel nosode)

Pharmacy

Gaert. Gaertner Bacillus. A bowel nosode of Bach. Historical dose: All potencies, 30c and 200c.

History

This organism was first isolated from a case of food poisoning and when identified by Gaertner was given the title B. Enteritidis, the bacillus of the intestine.

The keynote of Gaertner Co. is nutrition and this nosode might suitably be named as the "the children nosode. In the clinical picture all the nutritional disorders common to the child. Marked emaciation may be taken as an indication for the use of this nosode.

"Gaertner in 30c potency may be used in extensive suppuration with intestinal disorders in small-pox." (Ghosh) E. Paterson thinks that where Chamomilla fails in teething troubles Gaertner may help. Defective digestion of fat as of Pulsatilla has a worthy trial of this remedy.

"In all varieties of neurasthenia, I know of no single remedy to compare with the Gaertner nosode." (Wheeler)

Homeopathic

Gaertner has its greatest action on digestive tract. Children fed on artificial food have poor digestion. The inability to digest fat, celiac disease, ketosis intestinal infantilism are disease complex found under the "provings" of this nosode.

This remedy is valuable in malnutrition, either from lack of adequate diet or failure to metabolize, e.g. in steatorrhea, celiac disease or following gastric operations and in some cases of colitis. It used to be of value in marasmic children and may well have a place in underdeveloped countries and among refugees with in adequate diets.

Emaciation in malignant disease and in the elderly is a further indication.

The children are hypersensitive to all impressions, physical and psychical with fear of the dark and being alone. They have active brains, although poorly nourished bodies and poor muscular development. Children are restless wandering about looking at things, but

their attention is not held. Gaertner is pessimistic, lack of confidence. Eye symptoms, Urticaria.

Clinical

Eye, disorders. Urticaria. Thread worms.

Constitutions

Fair hair, blue eyes, freckles, Pale thin. Long black eyelashes. **Planets:** Jupiter, Saturn.

Symptoms

MIND

Pessimistic. Lack of confidence. Fear of heights. Fear of the dark and being alone.

Restless. Hypersensitive to all impressions. Mental uneasiness.

Abdomen

Chronic gastro-enteritis, tabes mesenterica.

Back

Pain in hip and back (severe).

Chest

Bronchial colds. Nocturnal cough.

Ears

"For cases of children who get a discharging ear every time they cut a tooth, give one dose of Gaertner 30, followed the next day by the dose of Silica 30c and repeat the Gaertner as soon as there is any sign of a further out break of this ear discharge." (Beta)

Eyes

White sclerotics. Styes.

PAGE 696

Female

Profuse offensive leucorrhoea. Pruritis vulvae.

Food

Desires: oatmeal, cheese, eggs, milk pudding, sugar and sweets. Averse: bread, butter, butcher meat, fish.

Kidneys

Blood and mucus with urine. Burning in urethra.

Limbs

Fibrositis. Shoulder rheumatism, worse at night. Rheumatism hands and feet. Chilblains hands in winter. Bites nails. Sciatica. Pes planus. Soles of feet covered with blisters.

Blisters, itch and are worse at night.

Male

Hydrocele.

Mouth

Salivation. Herpes. Dry scaly eruption. Teeth black. Deep fissures in tongue.

Nose

Polyps. Catarrh.

Rectum

Itching of anus. Worms, threadworms, (Cina). Blood and mucus in stool. Diarrhea offensive, attacks every few weeks. Constipation.

Skin

Urticaria, heat spots. Boils arms and legs. Eruption-back, head and neck. Circinate eruption sternum. Perspiration, worse at night.

Sleep

Wants light in room. Wants company, won't sleep alone, wants beside mother. Late in falling to sleep. Sleep walking. Not afraid of dark or alone. Restless sleep, night terrors.

Stomach

Pain in stomach. Vomits everything, worse after sweets. Headache and vomiting. Acidosis attacks. Dilated stomach.

Comments

It is helpful to make a comparison and to remember the Dysentery Co. child whose nervous tension expressed itself by an uneasiness of the muscular system.

Although fidgety and uneasy, the shyness of his temperament would prevent him from leaving his chair while you are taking the preliminary notes in your consulting room. The Gaertner child has mental uneasiness. He must know the reason for everything you do and for what purpose you use this or that article lying on your desk or somewhere in the room.

Furthermore, he will proceed to make close inspection of it, but you will notice that his attention is not held long on any subject. (Griggs)

Galega officinalis

(goat's rue)

Pharmacy

Galeg. Galega officinalis. Goat's Rue. N. O. Leguminose. Aqueous extract infusion or Tincture of whole fresh plant. Historical dose: Tincture and all potencies.

Herbal

Galega, as its name implies, has an ancient reputation as a milk-gland stimulant. The Galege are nearly related to Glycyrrhiza, the well-known source of liquorice. Carron de la Carriere tested its action on the milk glands of nursing women.

PAGE 697

He found it rapidly increased the quantity and quality of the milk and increased the woman's appetite.

Dorretta gave Galega in liquid extract of the leaves, for a common form of backache, which he located in the kidneys, though it is unaccompanied by any sign of kidney disease. **Planets:** Moon.

Homeopathic

The remedy is an excellent tonic in cases of anemia and impaired nutrition. Backache and debility. Increases the quantity and quality of the milk in nursing women, it also improves the appetite.

Clinical

Anemia. Backache. Breast-feeding, disorders. Debility. Kidney ache. Malnutrition.

Galium aparine

(goose grass)

Pharmacy

Gali. Galium aparine. Goose grass. Cleavers. N. O. Galiaceae, considered by some a sub-order of Rubiaceae. Tincture and infusion of fresh plant. Extract. Poultices. Historical dose: Tincture and all potencies, fluid extract, half-dram doses in cup of water or milk, three times a day.

Herbal

Galium has had no proving, but it is a popular remedy for cancer given internally and used externally and also for scrofulous swellings and ulcers. It is further used as a diuretic and as a solvent for gravel and stone.

Galium has cured a case of nodulated tumor of the tongue diagnosed to be cancer and a case of psoriasis of the left hand has been reported cured. Substantial doses were given in each case and in the later poultices of the herb were used as well.

Grimmer says this remedy has cured a case of nodulated tumor of the tongue. **Planets:** Venus, Saturn.

Homeopathic

Galium acts on the urinary organs is a diuretic and of use in dropsies, gravel and kidney stones. Dysuria and cystitis. It has power of suspending or modifying cancerous action.

Galium has clinical confirmation of its use in cancerous ulcers and nodulated tumors of the tongue. Inveterate skin disorders and scurvy. Favors healthy granulations on ulcerated surfaces.

Clinical

Bladder, irritability. Calculus. Cancer. Gravel. Psoriasis. Ulcers.

SOURCES

Boericke. Clarke.

Gallicum acidum

(gallicum acidum)

Pharmacy

Gal-ac. Gallicum acidum. Gallic Acid. Trituration. Historical dose: Trituration and all potencies, first trituration and pure acid 2 to 5 grain doses.

History

Gallic acid is the well-known astringent, derivative of Tannic acid, obtained from galls or oak-apples. It is used in old-school practice as a local application to arrest hemorrhages. Gall-ac. is used in popular practice to check excessive menstruation.

A case is recorded in which the application of an ointment containing Gallic acid or the insertion of a tannin suppository for hemorrhoids, it caused an attack resembling hay asthma with an eruption of urticaria. The experience was repeated several times before the cause was found out.

This is sufficient to show that Gall-ac. is truly homeopathic to pulmonary cases in which it has been largely used by the old school as well as the new. In pulmonary hemorrhage and in excessive expectoration and the night-sweats of tuberculosis it has been found of especial service.

Marcy of New York, has recorded the case of a young lady who had a cavity in the left lung with purulent expectoration, night-sweats, evening fever, pulse 130.

Under the prolonged use of Gall-ac. 1x she recovered her normal health except that the left lung remained dull and she had great shortness of breath on the slightest exertion. Her flesh, strength and general appearance were as when she was in perfect health. **Planets:** Moon, Mercury.

Homeopathic

Bayles says Gall-ac. rapidly checks secretions, give general tone to the stomach increases appetite and removes constipation.

Heart burn. **Passive hemorrhages** when pulse is feeble **and capillaries relaxed**, cold skin. Hematuria. Hemophilia.

Gall-ac. should be remembered as a remedy in tuberculosis. Prominent symptoms in the proving are: Weakness with irritability. Excessive dryness of mouth and throat. Sense of contraction of anus. Jerking of limbs. Itching of skin.

Clinical

Asthma. Constipation. Debility. Delirium. **Heart**burn. Hematuria. Hemophilia.
Hemorrhages. Kidneys pain. Tuberculosis. Urticaria.

Symptoms

MIND

Wild delirium at night, very restless, jumps out of bed, sweats. Afraid to be alone. Rude and abuses every one.

Head

Pain in back of head and neck. Thick, stringy discharge from nose, photophobia with burning of lids.

Kidneys

Kidneys painful, distress along ureters into bladder. Dull heavy pain in bladder, directly over pubis. Urine loaded with thick, cream-colored mucus. Hematuria.

Lungs

Pain in lungs, Pulmonary hemorrhage, excessive expectoration. Much mucus in throat in the morning. Dry at night.

Rectum

Copious stool, anus feels constricted. Faint feeling after stool. Chronic mucous discharges.

Galphimia glauca

Pharmacy

Galph. Galphimia glauca. Malpighiaceae family. Grows in Mexico. The mother tincture is prepared from the dried leaves and flowers. Historical dose: Tincture and all potencies, 3x to 30x.

Herbal

Galphimia Glauca is a wild plant, belonging to the Malpighiaceae family and growing in Mexico. There is no existing Homeopathic proving. The plant was used in clinical experimentation by a group of German doctors from 1964 to 1966, using the following potencies: 3x, 4x, 6x, 12x, for a whole variety of allergic infections.

Homeopathic

Galphimia Glauca has allergic vasomotor afflictions of the nose. Sneezing. Bronchial asthma. Skin allergies: urticaria, herpetic dermatitis, allergic eczema, mycotic eczema. Recurring herpes of the lips or genitalia.

Hypersecretion from the nasal and ocular mucous membranes. Edema of the eyelids. Vesicular, papular eruptions. Shooting pains in the stomach. Hypersensitivity to

weather changes. Hay fever. Sudamina. Neurodermatitis. Gastritis or gastric complaints.

Clinical

Allergies. Dermatitis. Eczema. Edema. Gastritis. Hay fever. Herpes. Mycosis. Neurodermatitis. Urticaria.

Constitutions

Allergic types of people with hay fever, asthma, sensitive skin. **Planets:** Mercury.

Galvanismus

(galvanism)

Pharmacy

Galvanism. Potencies are made by triturating sugar of milk which has been subjected to the influence of either electric pole. Historical dose: All potencies,

History

Farrington gives "benumbed feeling at the back of the head in brain-fag, the positive pole being applied to the cervical region, the negative to the vertex." **Planets:** Moon.

PAGE 699

Homeopathic

The most prominent symptoms are muscular contractions, shuddering, shivering, cold-water sensation on skin or else burning. Disorders of sight and hearing with confusion of the head and headache. There is also putrid smell before nose. Many sensations appear in the tongue and there is salivation. Menses copious.

Clinical

Asthma. Brain-fag. Diarrhea. Epilepsy. Fevers. Headache. Hemorrhoids, Hydrocephalus.

Paralysis. Rheumatism. Salivation. Tetanus. Tongue disorders. Toothache. Vision, illusions.

Gambogia

(gummi gutti)

Pharmacy

Gamb. Gambogia. Gummi gutti. Garcinia morella. Gamboge. N. O. Guttifere. Garcinia morella, native to China. Tincture of the resinous gum obtained from the tree.

Historical dose: Tincture and all potencies, third to thirtieth potency.

History

Gamboge painted on the chest in lung tuberculosis is considered by Abrams a specific and incipient diarrhea cases are symptomatically cured in several weeks. **Planets:** Mercury.

Homeopathic

The chief reputation of Gamboge among homeopaths is as a remedy for diarrhea. It produces a diarrhea very similar to Cro-t. The action of this medicine affects stomach and bowels. Burnings in different organs are prominent. Body feels sore all over. Stool is expelled all at once after considerable urging and is followed by a feeling of great relief. Profuse watery diarrhea, particularly with elderly people. Stool preceded by excessive cutting about navel. Stools are yellow, the color of the remedy. Also, green, bloody, lenteric. Burning in anus after stool, anus sore and excoriated.

Clinical

Anus disorders. Backache. Blows, effects. Coccyx, pain. Colic. Diarrhea. **Eyes** inflammation. Lienteria. Throat, sore. Typhlitis.

Modalities

Better by motion. Cough better sitting up. Better in open air after stools. Worse towards evening and at night.

Symptoms

MIND

Cheerful and talkative. Irritable.

Abdomen

Tenderness in epigastrium. Pain and distention of abdomen from flatulence after stool. Rumbling and rolling. Ileo-cecal region sensitive to pressure.

Back

Pain in coccyx.

Eyes

Burning in eyes, itching of eyelids, he rubs them, lids stick together with sneezing.

Head

Heavy with inertia and drowsiness. Itching and burning in eyes, lids stick together with sneezing.

Kidneys

Urine smells like onions.

Liver

Burning in liver.

Mouth

Feeling of coldness at the edge of teeth. Burning, smarting and dryness of tongue and throat.

Nose

Violent chronic sneezing in daytime only.

Rectum

Tenesmus after Stool with burning in anus. Pinching, gurgling in bowels, then sudden yellow or green, thin Stools coming out in prolonged gushes with burning at anus.

Diarrhea with sudden and forcible ejection of bilious stools. Profuse, watery diarrhea in hot weather, particularly old people. Dysentery with pain in sacral region.

Stomach

Pain in the stomach after food. Vomiting and purging with fainting. Great irritability of the stomach, burning, smarting and dryness of the tongue and throat.

Comments

Frightful vomiting and purging with fainting. But this action by no means exhausts the range of Gamb. It has a number of symptoms in the eyes and throat and also rheumatic symptoms. Pain in small of back, as if bruised or sprained. Pain in sacrum, resulting from a blow, was cured in one case.

PAGE 700

Like many other yellow, bile-like herbs, Gambr. acts markedly on the liver. Burning in the liver. Burning pains are prominent. General soreness over the body. Gnawing pains in coccyx. There is periodicity in the symptoms.

Compare

- (1) Crot-t., Aloes, Podo., Puls. - cough better sitting up, better open air.
- (2) Apocy. - stool expelled all one, but Gambr. has cutting before and better after stool.
- (3) Crot-t. has stool in one gush, but Gambr. is not worse from least food or drink like Crot.

Gastein aqua

(hot springs)

Pharmacy

Gast. Gastein aqua. The hot springs of Wildbad Gasterin. Dilutions. Historical dose: Tincture and all potencies.

History

The hot springs of Wildbad Gasterin in Salzburg, Austria, contain Sodium Sulphate predominantly, but also Silicic Acid, Potassium Sulphate and Carbonate, Lithium Chloride, Magnesium Carbonate, Ferrum Carbonate, Aluminium Phosphate and traces of Calcium Fluoride, Strontium, Arsenicum, Titanic Acid, Rubidium, Cesium, also free Carbonic Acid. Lapis albus is a kind of gneiss found in the spring. It is a Silicofluoride of Calcium.

The effects of the baths are thus described by Constantin James: General unpleasant sensation. Instead of expanding (as would be expected in a warm bath) the skin is drawn up upon itself as if by a tight astringent. There is slight dyspnea, the abdominal walls draw together, the testicles rise to the inguinal rings.

Soon an unusual warmth, accompanied by shocks and tremors, spreads throughout all the limbs. The pulse becomes hard and vibrating, the face becomes suffused, there is humming in the ears.

It is now time to leave the bath to stay longer is attended with danger. Then after the seventh to the fourteenth bath the thermal influence tends to concentrate itself entirely on the nervous system.

Thus it seems to the patient that an increase of vitality spreads through his whole being, he feels more active than before, the longest walks cause hardly any fatigue and that is promptly repaired by sleep. **Planets:** Saturn.

Homeopathic

Among individual symptoms noted are diminished secretions. Activity of all the veins, excitement of the circulation. Weakness and weariness with dragging sensation in the abdomen, as if it were too heavy. Exhaustion and inclination to sleep.

Takes cold very easily, which was caused then cured. Pulsation in the body, especially in the arms with jumping in them. Contractive sensations predominate. Scar tissues and callosities are affected.

Clinical

Amenorrhoea. Callosities. Colds. Constipation. Debility. Diarrhoea. Dysmenorrhoea. Gout. Hemorrhoids. Paralysis. Rheumatism. Scars. Sexual weakness. Stones. Strokes. Typhilitis. Varicose ulcers.

Modalities

Worse before a storm.

Comments

Sensation of indescribable mental and physical comfort runs through all the tissues during the bath. The baths show an influence which is predominant in the sexual system.

The baths affect phlegmatic patients in an increase of force and tone, causing the disappearance of involuntary losses of semen. In irritable temperaments it will provoke erotic dreams and unwonted excitement like cantharides in such cases the waters are aphrodisiac.

PAGE 701

Gaultheria procumbens

(wintergreen)

Pharmacy

Gaul. Wintergreen. *Gaultheria procumbens*. N. O. Ericaceae. Tincture of fresh leaves, oil obtained from the leaves. Historical dose: Tincture and all potencies, tincture and lower potencies. Give five drops of 1x of Oil.

Herbal

An evergreen trailing vine found in cool, damp woods. The oil contains methyl salicylate and is one of the sources of Salicin.

Several cases of poisoning with the oil have been recorded in which symptoms of acute gastritis appeared. Prolonged vomiting, set up afresh by the least thing taken, as a cup of water, severe pain in epigastrium. Slow, laborious breathing insensibility and hot skin. Inhalation of Ammonia around the patients from stupor.

B. F. Lang has related his experience with material does in ciliary neuralgia, facial neuralgia, gastric, ovarian, uterine and menstrual neuralgias, sciatica and inflammatory rheumatism. **Planets:** Saturn, Venus.

Homeopathic

Inflammatory arthritis, rheumatism, pleurodynia, sciatica and other neuralgias, come within the scope of this remedy. Cystic and prostatic irritation, undue sexual excitement and kidney inflammation.

Clinical

Cystitis. Gastritis. Neuralgia. Pleurodynia. Rheumatism. Sciatica.

Symptoms

Abdomen

Very severe pain in epigastrium and inferior part of the hypochondria, greatly worse by pressure of finger.

Chest

Pleurodynia with pain in anterior mediastinum.

Ears

Marked dullness of hearing.

Food

Inordinate, uncontrollable appetite for food, notwithstanding irritability of stomach, everything taken, even cold water is immediately rejected.

Head

Neuralgia of head and face.

Skin

Smarting and burning. Intense erythema, worse cold bathing, better olive oil and cool air blowing on part.

Stomach

Acute gastritis, severe pain in epigastrium, Prolonged vomiting. Uncontrollable appetite, notwithstanding irritable stomach. Stomach pain from nervous depression.

Tongue

Tongue dry, smooth and slightly swollen, speech rather indistinct from the swelling.

Comments

Anshutz writes: This paper was contributed to the Homeopathic Recorder, 1984, by Dr. Banerjee. and F. Lang from York, Nebraska on the action of Gaultheria:

My attention was first called to its use about ten years ago southern Ohio, where I received most pleasing results in the treatment of inflammatory rheumatism.

Afterwards to complaints in form of neuralgia.

While I am not a champion of any specific, I want to say that this drug has given me the quickest and most satisfactory results of any remedy in the Materia Medica. If there is anything that a person wants relief from quick and now, it is from these excruciating pains.

Often was I called to treat some obstinate cases of ciliary neuralgia or facial or in fact nearly every form of neuralgia and found my skill taxed to its utmost to bring out the balm. Did I find it in the homeopathic indicated remedy? I trust so, but not in any Materia Medica. I don't say but what I got some results from them, but I found it in

this a "helper", it came to my relief immediately and to the great comfort of the patient.

In severest cases of neuralgia of the head and face it would do its work quick and well. Equally well has it served me in very severe cases of neuralgia of stomach and bowels, while for the past few years it has done faithful work in ovarian and uterine neuralgia following or preceding difficult menstruation. I have many a dear friend today whose relief from suffering was found in this remedy. I am satisfied that it should be given a prominent place in our *Materia Medica*.

Lest this article should become tedious, I will cite a few cases.

PAGE 702

Mr. A., traveling man from Chicago, a few years ago called on me for temporary relief of a severe case of ciliary neuralgia. He had suffered for many years with it, every spring especially and that he had consulted great numbers of physicians of Chicago, Milwaukee and Cincinnati. He said, "had taken bushels of drugs, both old and new school," with only temporary relief.

So he expected nothing more, as he was told he must wear it out. I told him I thought I could give him relief. I furnished him one-half ounce of *Gaultheria* with directions to take, did not see him again for two years.

When he came into my office one day and greeted me by saying I was the only man that could ever give him any permanent relief from his sufferings, that he never had any return after first day taking medicine.

Miss B., dressmaker, came to me suffering terribly with facial neuralgia and greeted me similar to No. 1, that she expected nothing but temporary relief, as she had been afflicted for a long time. Gave her two (2) drachms of oil of Wintergreen told her to take one dose immediately and another in two hours if the pain did not quiet down.

She was careful to ask if it was an opiate, as she objected to that. I assured her it was not, saw her next day, said that pain disappeared and had not returned. I was acquainted with the lady for three and one-half years and she only had one return of the disease, which the same remedy relieved immediately.

Many cases more could I cite in which it never has failed me.

Another case: Mrs. G., I was called to relieve a severe case of neuralgia of stomach and bowels this last summer, who had been under the care of two of my worthy competitors. They had exhausted their pill case and for about three weeks the poor woman had suffered everything but death itself.

After diagnosing the case I put her on this remedy and in two hours she was relieved.

After two days was able to be about and cured shortly by no other remedy than it.

I want to say you will find a true friend in this remedy in all forms of neuralgia and only give a few suggestions now, but if it should be necessary could give scores to prove its value. I mentioned in the beginning that it had been of great value in inflammatory rheumatism.

A word as to the best way of giving the drug. I have found that the dose should never be less than five drops and if pain is severe fifteen drops repeated in half hour afterwards two hours apart. For adult it may be necessary to give twenty drops at first. It always should be dropped on sugar and taken.

One suggestion: I would like to have it put in a tablet of about two to five drops pure oil, as I think it could be taken more satisfactorily. While the crude oil is very pleasant to

take at first, yet, on account of its strong odor, will nauseate after awhile if not removed from room.

I am confident that if you make this into a tablet and place it among your remedies you would have a weapon that you could place into the hands of doctors of untold value in these troubles.

Compare

- (1) Bry., Rhus-t., Salol., Nat-salicyl., Kalmia, Ledum. Spirea.
- (2) Gaultheria contains Arbutin. Salicyl. acid.
- (3) Methylum salicylicum - an artificial Gaultheria oil for rheumatism, especially when the salicylates cannot be used. Itching and epididymitis, locally.
- (4) after Canth. in burns.

Gelsemium sempervirens

(yellow jasmine)

Pharmacy

Gels. Yellow Jasmine. Gelsemium sempervirens. Gelsemium lucidum. Yellow Jessamine. G. Nitidum. Bignonia sempervirens. N. O. Loganiaceae. Tincture of the bark of the root. Historical dose: All potencies, first to thirtieth potency.

PAGE 703

History

Gelsemium, which belongs to the same order of plants as Nux vomica and Curare is not only one of the most important additions to the Materia Medica for whose introduction we are mainly indebted to Hale but it is also in the first rank of importance among the vegetable poisons.

Like its botanical relatives, Gels. is a great paralyzer. It produces a general state of paresis, mental and bodily. The mind is sluggish, **(phlegm misting the mind)** the whole muscular system is relaxed, **(spleen qi too weak)** the limbs feel so heavy he can hardly move then. **(phlegm or dampness accumulation in limbs)** This condition exists in the cases of typhoid.

The lassitude is similar to the Mur-ac. patient. Functional paralysis **(yang stagnation as yang denotes the function)** of all descriptions. There is the lassitude, but the patient does not express it. The same parietic condition is shown in the eyelids, causing ptosis in the eye muscles, and diplopia. In the esophagus, it causes the loss of the ability swallowing. **(yang deficiency at throat)** In the anus, it causes diarrhea from depressing emotions or bad news. **(yang stagnation so heat and diarrhea)**

Erskine White cured an infant born in convulsions three weeks after its mother had been terribly frightened by seeing her little brother nearly burnt to death.

The only guiding symptoms was "the child's chin quivered incessantly." In thirty seconds after the dose the quivering ceased in three minutes the convulsions were at an end.

White had to ride twelve miles over mountains to reach the patient after receiving the summons, so the convulsions must have lasted a considerable time.

Post-diphtheria paralysis, debility after seminal discharges, **(kidney yin deficiency)** great prostration from irritability of seminal vesicles. **(kidney yang dissipation due to toxic pathogen in seminal vesicle or yang irritation)** The mental prostration is typified in

"anxiety,"(liver qi irritation and then prostration due to dissipation of qi) as before an examination, stage-fright. The effects of bad news, anger, grief when accompanied by trembling and fatigue.(all these stagnates qi and when qi irritates then trembling and after qi dissipation fatigue)

Homeopathic

Gelsemium centers its action upon the muscles and motor nerves. In muscles it causes overpowering aching,(due to spleen qi irritation) tiredness,(then qi/yin dissipation) heaviness,(dampness accumulation) weakness(qi/blood deficiency due to damp obstruction) and soreness(qi/blood stagnation), especially felt in the muscles of the limbs. General prostration.(spleen/lung qi dissipation) Dizziness,(phlegm dampness blockage), drowsiness, dullness and trembling(yang stagnation). Complete relaxation and prostration.(yang vacuity) Apathetic and dull.(yang vacuity) Slow pulse, tired feeling,(yang dissipated) mental apathy.(heart yang vacuity) Stage-fright.(yang irritated)

Gelsemium's action upon the nervous system, causes various degrees of motor paralysis. Sensitive to a falling barometer, cold and dampness brings on many complaints.(due to yang vacuity) Influenza with malaise. Never well since influenza.(lung qi irritated and lung yang damaged) Measles.(wind heat that is lung qi irritation so lung wind and heat)

Paralysis of various groups of muscles about the eyes, throat, chest, larynx, sphincter, limbs, etc.(yang vacuity in the spleen and muscles) Muscular weakness.(spleen qi deficient) Post-diphtheria paralysis.(diphtheria dissipates yang then throat paralysis) Lack of muscular co-ordination.(spleen blood poor to heart so heart yang overactive due to blood less so coordination poor) General depression from heat of sun.(heat of sun makes heart qi irritated then dissipated so depression) Children have the fear of falling,(kidney qi irritation and then deficiency) they grab nurse or crib, (Bor.) Sluggish circulation. Pellagra.

Drug overdose.(liver yang irritated then dissipated) Nervous disorders of cigarmakers. (heart qi irritated) Measles. Post-diphtheria paralysis. Parkinson's disease.(continuous irritation of spleen qi and then deficiency) Alternate pelvic organ symptoms with head symptoms. Coma(yang collapse) and strokes. Drug overdose.

Affection of motor nerves (heart yang irritation and then yang dissipation brings paralysis)produce all types of functional paralysis of eyes, throat larynx, anus, bladder etc. Tremors or twitchings of single muscles, face, chin tongue etc.(spleen qi stagnation of single muscles so tremor or twitching) Circulation becomes sluggish(heart yang depressed so sluggish circulation) causing arterial or venous congestion with sense of fullness and heaviness in different organs, heart, liver etc. (blood stagnation in heart,liver etc)

Catarrh of mucous membranes with watery discharges. Complete relaxation and prostration. General state of paresis, bodily and mental. Wants to lie down quietly, half reclined, wants to be held.

PAGE 704

Incoordination of muscles, which do not obey the will.(kidney or heart not able to control spleen state) Chorea of pregnancy. Convulsions(qi stagnations) and hysterical. (qi stagnation) Nervous disorders from tobacco.(tobacco irritates heart yang) Body feels light in nervous hysterical subjects.

Clinical

Amaurosis. Anterior crural neuralgia. Anxiety. Aphonia. Astigmatism. Bilious fever. Brain disorders. Cerebrospinal meningitis. Chills. Choroiditis. Chronic fatigue. Colds. Constipation. Convulsions, Deafness. Dengue fever. Diarrhea. Diphtheria Drug overdose. Dupuytren's contraction. Dysentery. Dysmenorrhea. Emotional, upsets. Epilepsy. Esophagus, stricture. **Eyes**, disorders. Fever. Fright. Gonorrhoea. Hay fever. Headache. Heat, effects. Heart, disorders. Hysteria Influenza. Intermittent fever. Jaundice. Labor. Liver, disorders. Locomotor ataxia. Measles. Meningitis. Menstruation, disorders. Metrorrhagia. Multiple sclerosis. Muscle pain. Neuralgias. Nystagmus. Paralysis. Parkinson's disease. Paraplegia. Pregnancy toxemia. Ptosis. Puerperal convulsions. Remittent fever. Retina, disorders. Rheumatism. Salpingitis. Sexual excesses. Sleep, disordered. Spasms. Sun-headaches. Sunstroke. Teething. Tic-douloureux. Tobacco, effects. Tongue disorders. Toothache. Tremors. Uterus disorders. Vertigo. Viral infections. Voice, loss. Writers' cramp.

Causations

Ill effects of fright, fear, depressing emotions, anger, bad news, unpleasant surprise. Traumatic shock.(all of then stagnats qi) Depressing emotions. Fright. Anger. Bad news. Sun. Heat. Damp weather,(increase sluggishness and stagnation of qi by phlegm or dampness) warm or cold. Alcohol.(irritates liver yang) Drugs.(irritates liver yang) Masturbation.(irritates kidney yang)

Constitutions

Gels. is adapted to children and young people to persons of a nervous, hysterical temperament. Suitable to irritable, sensitive, excitable people. Nervous, weak constitutions. **Planets**: Moon, Mercury.

Modalities

Better from profuse urination,(there is blockage qi due to dampness in the body too) sweating,(damp blockage of qi) shaking,(qi stagnation releases) alcoholic drinks, (excite collapsing livere yang) stimulants,(excite collapsing yang) mental efforts. (excite mental yang) Better open air,(qi increase collapsing or dissipated yang) bending forwards,(yin dominated that is yang vacuity) continued motion afternoon, (blood stasis so continued motion helps and afternoon when yang is high so it helps due to yang vacuity)) reclining with head held high. Worse emotion or excitement, anxiety, shocks ordeals. Worse from bad news tobacco-smoking, motion, surprise. Worse damp weather, humid weather, spring, foggy. Worse heat of sun, at 10 a.m., summer, periodically,(qi stagnation) before a thunderstorm(qi disturbance or shock), dentition.(kidney yang irritation) Worse when thinking of his ailments.(spleen and heart qi gets irritated)

Symptoms

MIND

Weak, tired, delicate, timid(gallbladder deficient) excitable, easy to anger persons,(liver deficiency) children and adolescents. Dazed. Apathetic. Apathy regarding his illness. Desire to be quiet to be left alone.(heart qi deficiency) Mental dullness, dizzy, drowsy and droopy.(heart qi deficient,phlegm heat blockage,blood stagnation) Answers

slowly.(phlegm dampness misting the mind) Absolute lack of fear. Stage fright. Emotional excitement, fear, etc., lead to bodily ailments. Bad effects from fright, fear, exciting news.(yang irritative or exciting dissipates yang) Dread of falling of ordeals, death, pain.(continuous mental and physical irritation due to fear or pain etc) Fear of doctors and dentists. Effects of grief, cannot cry, broods over her loss.(lung qi irritated or stagnant due to not released cry or continuous brooding) Delirious on falling to sleep. Child starts and grasps the nurse and screams as if afraid of falling.(yang vacuity so afraid falling) (Bor.) Confusion, acts as if crazy.(blood stasis,heat in pericardium etc) Wants to throw himself from a height.(yang is height or above or up so yang vacuity means falling down) Cataleptic immobility(yang vacuity) with dilated pupils, closed eyes but conscious.

Abdomen

Periodic colic (liver heat colic)with diarrhea,(liver heat). yellow discharges.(liver heat) Acute catarrhal enteritis during damp weather.(damp heat in intestine with heat prominent so acute) Gnawing pain in the transverse colon.(blood stasis) Sudden spasmodic pains in upper part of abdomen,(blood deficiency or cold congealation of blood) compelling him to cry, leaving a sensation of contraction.(yang vacuity cold) Sensation of soreness in abdominal walls.(blood or yin vacuity in abdomen) Tenderness in right iliac region during typhus. Rumbling in abdomen with discharge of wind above and below.(borborygmus-spleen and kidney yang vacuity.others are central qi insufficiency,large intestine damp heat,cold dampness obstructing the centre,liver spleen disharmony,food stagnation,water rheum collecting internally)

Back

Chilliness up and the down Back.(kidney yang vacuity,back is yang) Dull, heavy pain up and down in spine,(kidney yang deficiency(dull) pain with dampness(heavy)better walking(excess condition) with occipital pains.(kidney yang deficiency). Complete relaxation of the whole muscular system.(spleen yang vacuity) Languor, muscles feel bruised.(yang vacuity) Every little exertion causes fatigue.(yang vacuity)

Pain in neck, especially upper sternocleido muscles.(kidney yang deficient-actually neck is in urinary bladder and gallbladder,large and small intestine,sanjiao channel route) Pains under scapula.(scapulae-small intestine chanel so heart yang deficiency) Dull aching in lumbar and sacral region,(kidney yang vacuity) passing upward. Pain in muscles of back, hips and lower limbs, mostly deep-seated.(spleen yin deficient pain as it is deep seated) Neck feels bruised, unable to hold the head.(kidney yang deficient so bruised and spleen yang vacuity so unable to hold head)

Chest

As of a lump behind the chest.(qi stagnation) Dry cough with sore chest (yin vacuity cough)and fluent coryza.(lung vacuity heat) Burning in larynx and chest, when coughing.(vacuity heat)

Ears

Impaired hearing from cold.(cold congealation of blood in liver channel to ears) Sudden loss of hearing for a short time, rushing and roaring in ears.(wind heat in liver channel,sudden-heat) Catarrhal deafness (phlegm heat blockage)with pain from throat into middle ear.(phlegm heat so radiating) Deafness and loss of speech from quinine. Earache from cold.(excess so pathogenic cold blood congealation) Ear pain while swallowing.

Eyes

Heavy drooping eyelids.(spleen dampness and yang deficiency) Ptosis, can hardly open eyes. Double vision, when looking sideways during pregnancy.(yin/blood deficiency in liver so liver yang excess so double vision) Disturbed muscular apparatus.(liver yang irritated) Blurring and discomfort in eyes even after accurately adjusted glasses.(liver yang irritation so blurring) Vision blurred, smoky,(liver fire) (Cycl., Phos.) Dim-sighted,(liver yin deficient) pupils dilated (vacuity heat or liver yang excess)and insensible to light. Orbital neuralgia(stomach and heart channel-orbits so yang deficiency in heart) with contraction and twitching of muscles.(spleen yang deficient cold and qi stagnation-twitch) Bruised pain back of the orbits.(yin deficiency in orbits) One pupil dilated, the other contracted. Serous inflammations. Deep inflammations with haziness of vitreous. Albuminuric retinitis. Detached retina,(liver qi vacuity) glaucoma(liver yang vacuity) and descemetitis. Hysterical amblyopia. Blind spells.(liver blood deficient or liver yang deficient) Affections of vision before migraine.(liver yang vacuity so cold stagnation so migraine) Retinitis. Detached retina from injury or myopia. Glaucoma. Eyes, red sore aching(liver yin deficiency or blood deficiency), suffused.

Face

Hot, heavy, flushed,(heart yang excited with dampness) besotted-looking. (Bapt., Op.) Neuralgia of face.(dissipation of heart yang so neuralgia) Dusky hue of face with vertigo and dim vision.(heart yang diminished so dusky face,liver yang deficiency so dim vision and vertigo) Facial muscles contracted, especially around the mouth.(stomach vacuity cold stagnation of blood) Chin quivers. Lower jaw dropped.(lower teeth are in large intestine channels so lower jaws muscles –spleen yang vacuity) Lower jaw wags sideways.(spleen wind cold) Paralysis.(spleen yang vacuity paralysis of jaw)

Female

Rigid os. False labor-pains, pains pass up back. Threatened miscarriage from sudden depressing emotions.(liver qi stagnation and wind) Uterus heavy sore, feels as if squeezed(liver qi/blood stagnant so heavy sore etc), (anti-flexion).
Dysmenorrhea with scanty flow,(blood stagnation) menses retarded,(blood stasis) pain extends to back and hips.(blood stasis) Labor pains go up, backward or down the thighs. Deep yellow leucorrhea(damp heat in lower jiao with kidney yang vacuity) with aching across lower part of the back. As of a wave from uterus to throat with choking feeling,(qi stagnation in uterus and throat) impedes labor.(qi stagnation) Nervous chills, first stage of labor.(heart and kidney qi irritation and then deficient chills) Vaginismus. Sex difficult from contraction of the vaginal muscles.(kidney and spleen vacuity cold) Twitching of muscles of the whole body with drowsiness,(qi stagnation in spleen,blood stasis in heart-drowsiness) before puerperal convulsions.(heart qi stagnation) Severe after pains.(cold stagnation or blood congealation or excess type pain) Sensation as if uterus were squeezed.(blood stagnation in uterus) (Cham., Nux-v., Ust.) Epileptiform convulsions at menstrual period or from suppressed menses, (Oean.)(liver yang and heat high in menstrual period so epilepsy from liver excess fire or wind or suppressed menses irritates liver wind so convulsions)

Food

Usually thirstless, but thirst with sweat. Little appetite but can take food or drink. No thirst with the fever. (stomach damp heat so heat gives fever and dampness-no thirst)

Head

Band-feeling around and occipital headache. (qi stagnation and kidney qi deficient) Dull, heavy ache with heaviness of eyelids, (cold congealation of blood so heaviness and heavy ache) bruised sensation, (qi/blood stagnation) better compression (qi vacuity) and lying with head high. (blood congestion in head) Pain in temple, extending into ear (liver yang excess or heat so extending to other places) and wing of nose, chin. Headache with muscular soreness of neck and shoulders. (large intestine headache with spleen damp heat in large intestine channel that is neck and shoulder and head) Headache preceded by blindness, (liver wind or heat headache and blindness) better profuse urination. (heat is reduced when water is thrown out so the liver qi stagnation and irritation may be due to damp heat too) Scalp sore to touch. (scalp is oily that is damp heat) Delirious on falling asleep. Wants to have head raised on pillow. Meningitis, congestive stage, pain at the back of head and dilated pupils. Swollen feeling in head. (dampness accumulation due to qi stagnation in head)

Heart

Sore. A feeling as if it were necessary to keep in motion or else Heart's action would cease. (heart yang vacuity) **Slow pulse**. (Dig., Kalm., Apoc. can.) Palpitation, (heart yang deficiency) pulse **soft**, weak, **full and flowing**. Pulse slow when quiet, but greatly accelerated on motion. Pulse slow, soft, weak, full and flowing. Weak, slow Pulse of old age. (heart yin and yang deficient) Pain in heart on rising from seat. (blood stagnation)

Kidneys

Partial paralysis of bladder, flow intermittent. (qi and blood stagnation in bladder and bladder yin deficient so less nourishment of kidney or bladder) (Clem.) Retention. (qi/blood/phlegm stagnant) Dysuria. Profuse, clear, watery with chilliness (kidney yang deficiency so vacuity cold) and tremulousness, better headache. (damp cold reduction improves headache) Incontinence from excitement (kidney or heart yang excited so incontinence) from paralysis of sphincter. (spleen yang vacuity so incontinence) Alternate dysuria and bedwetting. Flow intermittent. Constant urination, (lung or bladder blood stasis so constant irritation and urination) hysterical.

PAGE 706

Limbs

Loss of power of muscular control. (heart yang is not able to control muscles due to heart yang vacuity) Excessive trembling and weakness of all the limbs. (heart and spleen yang vacuity) Hard aching in humerus (right). Hands, hot dry numb especially palms. (spleen yang excess or irritated so hot dry numb) Wants hands in cool water. (spleen yang excess) Cramps in muscles of the forearm. (spleen cold or yang deficiency-cramps) Professional neurosis. Writer's cramp. (spleen yang deficient or cold) Heavy lower limbs. (blood stagnation or dampness in spleen) Knees weak (kidney yin deficient) worse descending (vacuity heat so worse descending) tottering gait, cannot direct his legs. (heart not able to direct so heart yang disturbed otherwise liver gives direction) Coldness of wrists and hands. (spleen yang deficient) Feeling of partial

luxation of patella when walking. Fatigue after slight exercise.(spleen yang deficient)

Liver

Passive congestion of liver.(blood congestion) Gripping in the gall bladder.

Lungs

Tiresome, slow breathing. Slowness of breathing with great prostration.(lung yang deficiency) Oppression about chest.(lung yang deficient) Dry cough with sore chest and fluent coryza. Aphonia, acute bronchitis, respiration quickened, spasmodic disorders of lungs and diaphragm.(vacuity cold stagnant blood and qi so spasmodic) Spasms of glottis,(previous explanation) long crowing inspiration,(to store maximum heaven qi possible in kidney as yang is less in body) sudden and forcible expiration. (qi/blood stagnant in lung so sudden force to expirate it)

Male

Genitals cold, relaxed.(kidney/liver yang vacuity) (Ph-ac.) Sexual power exhausted, (kidney yang vacuity) slightest caress causes an emission.(kidney yang vacuity) Spermatorrhea without erections.(liver yang/blood vacuity so no erection and kidney qi deficient life gate open bcoz kidney qi not able to control so spermatorrhea) Scrotum continually sweating.(liver channel blood stasis so continually sweating) Gonorrhea, in first stage, discharge scanty, tendency to corrode, little pain, but much heat,(damp heat with toxic heat excess so discharges scanty and corrosive) smarting at meatus. Dragging pain in testes.(kidney yang vacuity) Profuse warm sweat on scrotum.(blood stasis warm sweat)

Mouth

Putrid taste and breath. (putrid-kidney related so kidney saliva is putrid and lung breath putrid ...) Speech thick, as if drunk, he can hardly speak. Saliva yellow as from blood.(stomach heat saliva) Tongue numb(heart qi stagnant) and trembles while protruding.(heart qi weakness) Thick yellow coating on tongue.(stomach heat with food stagnation or damp heat) Muscles of mouth seem contracted.

Nose

Itching and tickling in soft palate and naso-pharynx.(lung wind or qi stagnation) Acute coryza with dull headache and fever.(lung yin deficiency so vacuity heat coryza so acute and fever and since it is deficient pattern so it is dull lung type headache) Coryza with thin acrid watery discharge.(vacuity heat coryza and dischrge,may be due to being vacuity it is watery) Stuffed. Sneezing,(qi stagnation or yang rising to fight with external pathogen) fullness at root of nose.(blood stagnation) Swelling of turbinates. Sensation as if hot water flowing from the nostrils.(vacuity heat coryza) Summer cold.(vacyuity heat pathogenic catching of cold) Sneezing, early morning. (early morning-yang rising) Dryness of nasal fosse.(lung vacuity heat)

Rectum

Stool painless or involuntary. (heart yang deficient so involuntary stool so rectum gates are open without awareness of heart that is kidney heart communication problem so painless stool as nothing blocking etc) Diarrhea, painless in nervous persons after sudden emotions as grief, fright, bad news, anticipation of an unusual ordeal.(painless diarrhea as heart irritation due to emotions and so small intestine doesn't absorb fluid so diarrhea) (Arg-n., Ph-ac.) Copious yellow stools. Stools, cream colored, tea-green. (yellow and green-heat and copius-dampness so damp heat in large intestine)

Paralysis of the anal sphincter.(spleen and kidney yang vacuity) Prolapse(spleen yang vacuity) or rectal pains after labor.(kidney vacuity cold pain)

Sensations

Lightness of head of body.(blood/yin vacuity)Sensation as if the head were enlarged, (qi/blood/phlegm stagnation) as if there were a tape round the head,(qi stagnation) as if the skin were contracted in the middle of the forehead.(vacuity cold in stomach or lung) Sensation as if a lump were in esophagus,(qi stagnation in lung or stomach) load in stomach,(blood/phlegm stagnation in stomach) as if stomach were quite gone, as if the uterus were squeezed by a hand.(blood stagnation) Sensation as if he would die, as if the blood ceased to circulate,(blood /qi stagnation) as if the heart would stop unless he kept moving.(qi stagnation in heart) Sensation as if a knife were thrust through from occiput to forehead.(kidney to stomach communication in wind or shooting pain manner) Sensation as if eyes were jumping out of head.(excess liver yang or internal wind are forcing eyes out,internal wind –jumping pain) Sensation as if a lump were in throat which could not be swallowed.(qi stagnation)

Skin

Hot dry, moist, yellow, itching, measles-like eruption.(lung wind heat eruptions) Erysipelas. Measles, (wind heat)catarrhal symptoms, aids in bringing out eruption. (irritates lung yang so helps bringing out eruption) Livid spots. Scarlet fever(wind heat) with stupor(wind heat in head) and flushed face.(heart heat)

Sleep

Drowsiness with influenza.(lung qi irritation by influenza and then dissipation so drowsiness) Heavy stupid sleep.(blood stagnation sleep) Sleepiness of students. (spleen/heart qi vacuity sleep) Cannot get fully to sleep.(heart or liver qi irritation) Starts on falling to sleep.(liver yang irritation) Delirious on falling asleep. Insomnia from exhaustion.(yin exhausted so yin vacuity insomnia) Sleepless from irritation, (liver yang excitation)(Coff.) Sleeplessness from mental excitement,(heart yang excitement) thinking(spleen qi irritation) or tobacco.(heart qi irritation) Yawning. (kidney related)

Stomach

Feeling of emptiness or weakness in the stomach or bowels.(stomach yin vacuity) Cramps in stomach,(stomach yang deficiency or cold stagnation)worse riding or sitting erect.(yang deficient have trouble in stretching or being straight) Hiccough, worse evening.(qi stagnation,worse yang diminished in evening so yang vacuity further aggravats)

Temperature

Influenza with much muscular soreness,(lung qi irritation and deficiency with spleen qi stagnation soreness) great prostration and headache.(yang vacuity and yang vacuity headache) Chill with aching and languor, mixed with heat or alternating with heat. (yang deficiency then yin deficient alternate) Chills up and down Back.(kidney yang deficient) Cold hands and feet.(spleen vacuity cold) Nervous chills.(heart vacuity cold) Heat and sweat stages, long and exhausting.(long irritation of yang reducing yin or throwing yin) Heat with drowsiness.(heart heat)

Temperature

Thirst absent with trembling. Wants to be held, because he shakes so.(yang irritation shaking or nervous) Cold sweat.(lung vacuity cold) Bilious remittent, malarial,(liver

related being periodic) typhoid, (damp heat and yang deficient) cerebro-spinal fevers. (kidney vacuity heat due to having less marrow) Measles. (wind heat) Nervous, shuddering, chill, preceded by visual disturbances. (vision problem due to heart qi irritation and deficiency) Pulse slow, full, soft, compressible. Fever with a stupor, (lung heat stupor) dizziness, faintness, thirstless, prostrated.

PAGE 707

Throat

Aphonia and sore throat during menses. (aphonia due to liver heat and sore throat) Throat feels rough, burning. (liver heat) Hoarseness during menses in hysteria (qi stagnation and damp heat) or after depressing emotions. (qi stagnant hoarseness) Pain in sterno-cleido-mastoid, back of parotid. Tonsils swollen. (lung heat) Post-diphtheria paralysis. Tonsillitis, (lung or stomach heat) shooting pain into ears. (wind in liver channel as wind--shooting) Feeling of a lump in Throat that cannot be swallowed. Aphonia. Swallowing causes pain in ear (throat and ear qi stagnation), (Hep., Nux-v.) Difficult swallowing. (qi stagnation) Pain from Throat to ear. Paralytic dysphagia, especially worse from warm food.

Vertigo

Vertigo spreads from occiput, as if drunk with visual symptoms. (kidney vacuity heat vertigo, heat—spreading) Dizzy on rising. (liver yang rising dizziness with blurred vision) Dizziness and blurred vision. Staggering as if intoxicated when trying to move, (heart qi disturb so incoordination due to less conscious control) worse from smoking. (heat increases heart yang irritation) Light headed (yin vacuity) and dizzy, (liver yang rising) worse by sudden movement of the head (sudden movement increases qi stagnation and heat, sudden-heat) and walking, (spleen qi /yin reduces) Giddiness as if intoxicated, as if he should fall down. (liver yang rising-giddiness and heart yin less so less consciousness) Giddiness with loss of sight, (liver wind for both) chilliness, accelerated pulse, dullness of vision, (liver blood deficient) double vision. (liver wind).

Comments

The Gels. features of the headaches are accompanied by blurring of the sight and relieved by a copious discharge of watery urine from a parietic condition of the kidneys. Conversely there may be a desire to urinate during the night and if the call is not immediately responded to a violent headache supervenes.

Alcoholic stimulants relieve all the complaints where Gels. is useful. Hysterical dysphagia or aphonia after emotions. Measles and eruptive disorders with drowsy state suffused face and even convulsions. Convulsions and no less marked in Gels. then paralyzes. Tremors is a keynote of the remedy.

J. H. Nankivell drank two ounces of tincture of Gels. instead of a glass of sherry. He walked a few feet with assistance and in another minute his legs were paralyzed. He dragged himself to the bedside with his arms, but they were unable to help him to bed into which he had to be lifted.

As long as he lay quiet there was no trouble, but on the least exertion there were excessive tremors. Vomiting occurred during the next twenty-four hours. Temperature rose to 101.5 F. Heart's action very violent and intermittent.

All the muscles of the eyes were affected, but of voluntary muscles those of the right side suffered most. Prolonged conversation involved paralysis of upper lip. There was

somnolence, absence of mental excitement and good appetite. The effects passed away in the order of occurrence from below upwards, but after the arms had recovered, vision was not perfect for twenty-four hours.

A patient of Clarke once took a drachm of the tincture for a headache. On going out he could not tell which side of the street he was on. He was near St. Paul's Cathedral and saw two cathedrals instead of one.

Gels. in the potencies is a great neuralgic remedy. The paralysis of the tongue recalls another condition, trembling of the tongue, which is one indication for Gels. in typhoid in which it is a leading remedy. The tongue is only thinly coated and has not the dark streak of the Bapt. tongue.

The Gels. face is flushed crimson, but not quite as besotted as that of Bapt. There is excessive weakness and trembling, but the consciousness is not so clouded. In coryza and hay fever Gels. has an important place. Early morning sneezing and streaming colds are a strong indication.

The characteristic headache of Gels. begins in the occiput and spreads over the whole head, settling down over eyes. Dizziness and dim vision and dizziness rising up from occiput and spreading over whole head with depression from heat of summer.

Headache with stiff neck, worse morning, better urinating, preceded by blur before eyes, drowsiness with headache, difficulty in keeping eyes open, dull headache over eyes to vertex and occiput with irregular action of eye muscles. Neurotic symptoms in cigar-makers, impotence, palpitations.

PAGE 708

Many symptoms occur in connection with the sexual organs, male and female.

Dysmenorrhea, epileptiform convulsions at menstrual period, rigid os in labor, chill, beginning in hands or feet and running up back. There is aggravation both before during and after menses. Itching of skin, eruption like measles.

The stools of Gels., whether loose or constipated, are mostly yellow like the flower. The color comes out also in the color of the tongue and bilious symptoms generally. Wants to lie down and rest. Wants to be held, that he may not shake. Motion worse most symptoms, better muscular pains, better heart. Rising from seat causes pain in heart. Shaking head better heaviness of head. Lifting arms causes trembling of hands. Playing piano causes tired sensation in arms.

J. G. Blackley pointed out the suitability of Gels. to writer's cramp and professional paralyzes. Clarke relieved with it cases of Dupuytren's contraction. Great distress and apprehensive feeling at approach of a thunderstorm. Heat of sun or summer worse. Hot applications better pain back of head. Must be covered in all stages of the paroxysm.

Complaints from sudden change from hot or dry to damp air. Catarrh occurring in warm, moist, relaxing weather. Worse damp weather, cold, damp atmosphere, better cold, open air, worse from fog. Cold drinks are vomited immediately, warm or spirituous drinks can be swallowed." Better from stimulants" is a very general characteristic.

Compare

- (1) Bell - labor, Caul., Caust. - complaints of women, Cocc., Con., Curare - paralysis.
- (2) Ferr-p. - fever, Phos. - effect of thunderstorms, Ol-an., Verat. - headache, Borax - sense of falling.

- (3) Bry. - typhoid, dreads movement, Gels. because he is so weak, Bry. because movement worse pains.
(4) Hyper. worse from fog. Ign. - gastric disorders of cigarmakers, Baptisa, Ip., Acon., Cimic., Mag-p. - Gels. contains some Mag-p.
(5) Culex - vertigo on blowing the nose with fullness of the ears.

Relations

Antidotes: Atrop, Chin., Coff., Dig., Nux-m. Coffea, Dig. Alcoholic stimulants relieve all complaints where Gels. is useful. In cases of poisoning, artificial respiration and faradization of respiratory muscles. Foy found Nitro-glycerine a perfect antidote in one case. Jephson antidoted his case with Strychnine. It antidotes: Mag-p. It antagonizes: Atrop., Op. Compatible: Bap. (in typhoid influenza), Ip. (in dumb ague).

Genista tinctoria

(dyer's weed)

Pharmacy

Genist. Genista tinctoria. Dyer's Weed. N. O. Leguminose. Dyer's Weed contains scopolamine. Tincture of whole plant. Historical dose: Tincture and all potencies.

History

Genista was proved by E. B. Cushing. It has been used for frontal headaches and vertigo, worse motion, better open air and eating. Dry throat, awakes with waterbrash. Itching eruption on elbows, knees and ankles. Promotes diuresis in dropsical conditions.

Planets: Moon.

Homeopathic

Genista's principal effects are: Sharp piercing pains in the head and ear. Brain feels loose and sensitive. Sensitive feeling in brain, eye and throat. Urgent desire for stool, which is expelled suddenly. A peculiar eruption of dark red confluent spots.

Clinical

Diarrhea. Earache. Headache.

Modalities

Worse from rising, turning quickly, shaking head, walking. In the night, water-brash. Better in the open air in cool rooms, by eating (headache).

Compare

(1) Brain feels loose, Cic-v., Nat-s., Bar-c., Rhus-t.

SOURCES

PAGE 709

Gentiana amarella

(bach flower remedy)

Pharmacy

Genitiana amarella. Genitian. Flowers are picked, floated on to a bowl of water and left standing in the sun for several hours. The strained water is used as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

Herbal

The remedy Gentian, together with Cerato, Scleranthus, Gorse, Hornbeam and Wild Oat, belongs to the group of For Those who Suffer Uncertainty, as classified by Bach.

These remedies help those suffering from doubts and uncertainty in the daily affairs of their lives. **Planets:** Moon.

Homeopathic

Lack of physical stamina may be common. This remedy helps to accelerate healing in a patient plagued by doubts and discouragement about the slow process of cure.

Symptoms

MIND

The Gentian mind is easily discouraged. Weakened capacity for perseverance and lack of courage to give one's all to a task or challenge. There is lack of inner stamina and faith. One may feel disheartened and ready to give up, as soon as hindrances arise.

In the Gentian state, the easily stimulated doubting and discouragement weaken enjoyment of life and personal self-assurance. Belief in one's capacities wavers.

Willpower is lacking.

Lack of faith in oneself and the tendency to give up. The mind has the tendency to exaggerate, by viewing small setbacks with discouragement. Lack of interest with withdrawal from challenges and from involvement in the world. Sadness or depression often accompany this state. In the Gentian state, one also does not feel grounded or centered enough.

SOURCES

Bach.

Gentiana cruciata

(cross-leaved gentian)

Pharmacy

Gent-c. Gentiana cruciata. Cross-leaved Gentian. Kreutz-Enzian. N. O. Gentianaceae.

Tincture of root. Historical dose: Tincture and all potencies, first to third potency.

Herbal

The Treasury of Botany states "Gent. cruciata has been invested with imaginary virtues, because its leaves grow in the form of a cross, it has been recommended in hydrophobia." Its virtues are not all imaginary and its reputation as a remedy for hydrophobia is partly justified in the provings. **Planets:** Moon.

Comments

The proving of Gent. cruc. developed a number of striking symptoms in the throat and digestive tract. Movings about in stomach and abdomen. Pressure in the stomach as if a stone was in it with inclination to vomit. All the symptoms of right inguinal hernia occurred in one prover.

A peculiar sense of anxiety, faintness, uneasiness. One prover felt as if all the nerves were tense, so that walking was difficult. Creeping over the body as from fleas in the evening.

Homeopathic

Gentiana Crucjata has throat and stomach symptoms. Dysphagia, vertigo with headache, pressing inward sensation in eyes, constricted throat and head and abdomen.

Distention, fullness and tightness in abdomen. Creeping over body as from fleas.

Clinical

Belching. Diarrhea. Dyspepsia. Dysphagia. Hernia. Hoarseness. Stiff neck. Stomach, affection. Throat, sore.

Modalities

Better from warm soup. Better from drinking fresh water. Better in open air. Worse after eating.

Symptoms

MIND

Weeping mood with disinclination to talk. Very peculiar anxiety and acceleration and difficulty of breathing, swelling of the temporal veins and feeling of pressure in the temporal region, on reading, print seemed indistinct and as if covered with a veil.

PAGE 710

Abdomen

Sensitive, griping, sore sensation in umbilical region, worse after dinner, better sitting and lying, worse standing, walking and after smoking, obliging him to bend forward, therewith umbilicus seemed to be drawn inward. Distention, fullness, tightness and constriction. Dragging in right inguinal region with feeling of protrusion, very sensitive.

Back

Drawing and jerking along right side of neck, extending to shoulder. Drawing in cervical muscles, extending to ears, worse by turning head, an uneasiness so that he could not remain long in one position. Repeated drawings in cervical muscles. Tension in lumber region.

Eyes

Sensation as though eyes were **lying deep in orbit**, *piercing* inward sensation in right eye. Print indistinct as if covered with a veil.

Female

Menstruation three days earlier than usual during which there was a headache as if head too full with feeling of distention in the skull, better during rest and worse by motion, preventing sleep for a long time.

Food

Appetite increased or lost.

Head

Sensitiveness of whole head and whole brain after dinner, worse by violent motion of head. Swelling of temporal veins and feeling of pressure in temporal region. Sudden stitch through left temple. Distressing tension and at times transient jerking in region

of vertex, tension soon became a very acute constant pressure, worse by exerting eyes or constant thought.

Limbs

Distressing drawing in right shoulder lasting several minutes. Cramp-like pains in soles of feet.

Mouth

Two aphthous ulcers on margin of lower lip on either side of frenum. Flow of saliva increased.

Rectum

Movings about in intestines with slight headache, followed by copious pasty evacuation. Constant violent urging, followed by watery evacuations. Pasty diarrhea and stools without the usual itching in anus.

Stomach

Acid belchings, watery vomiting. Great nausea with inclination to lie down. Vomiting with some difficulty, a small quantity of mucus of an acid odor intensely bitter, leaving a scraping and rawness in throat. Burning, fullness, pressure in stomach. Pressure in stomach as if a stone were in it with inclination to vomit. Sensation of pressing inward in pit of stomach.

Throat

Hoarseness, voice gave out in middle of speech. Frequent attacks of hoarseness and sensitiveness of the throat. Slight redness and distressing sensation of constriction within the throat, swallowing is very difficult. Rawness and scrapings, causing frequent hawking with constriction when swallowing. Intermittent, deep redness of fauces. Stitches in tonsils.

Vertigo

Confusion and whirling.

Compare

- (1) Gent lut., Lyc. - better from warm drink.
- (2) Bry., Puls.
- (3) Abies-n., - pressure in stomach as from a stone.
- (4) Kali-bi. - tenacious mucus in throat.
- (5) Gent-q.
- (6) Hydr., Nux-v.
- (7) Epipheg. - thick saliva.

Gentiana lutea

(yellow gentian)

Pharmacy

Gent-l. *Gentiana lutea*. Yellow Gentian. N. O. Gentianaceae. Tincture of root. Historical dose: Tincture and all potencies, first to third potency.

Herbal

The Yellow Gentian is the source of the well-known "tonic" of allopathic practice. It has thus some claim to be a "positive tonic," as it may cause increased appetite in the healthy. **Planets:** Jupiter, Moon.

PAGE 711

Homeopathic

In the *Gentiana lutea* provings the chief symptoms were in the alimentary sphere. Among them, ravenous hunger, as well as a diminished appetite. Stomach symptoms marked.

Aching in the eyes and throat. Dry. Thick saliva.

Gentiana lutea has dry mouth, bitter or earthy taste, nausea, vomiting, colic. Diarrhea with yellow stools, rheumatic pains, sensations of constriction are marked and common. Weakness, dull feeling, morose mood, febrile conditions.

Clinical

Anorexia. Bilioussness. Colic. Debility. Diarrhea. Dyspepsia. Fever. Gout. Headache. Stomach, disorders. Throat, constriction.

Modalities

The symptoms are worse in the afternoon after eating, on motion.

Symptoms

MIND

Dull feeling of whole body and morose mood. General dejection.

Abdomen

Inflation and tension of stomach and abdomen. (Poth.) Colic, umbilical region sensitive to touch. Flatulence.

Back

Pain in the back and bowels, much worse by motion, better by sitting. Sensation of a cord or pressure and weight round the loins.

Chest

Oppression of the chest, fullness in the chest, sometimes with pressure and difficulty of respiration. Pressure on left side near the throat.

Eyes

Pressure in eyeballs. Frequent aching in the eyes. Redness of the conjunctiva.

Obscuration of the sight for some moments, so that objects immediately before the eyes cannot be distinguished, could not see the person with whom he was talking for a few moments.

Head

Frontal headache, better eating and open air. Brain feels loose, head tender.

Limbs

Rheumatic tension and dragging in the right hand with inflammatory redness of two articulations of the fingers, spasmodic symptoms and pain of the part during movement.

Mouth

Dryness of the month and throat, saliva thicker than usual. Taste intensely bitter.

Swelling, fine sticking in throat, mostly in posterior portion of plate. Earthy taste.

Nose

Irritation in nose, as in coryza, followed by a watery discharge.

Rectum

Urgent inflation to evacuate, sometimes sudden with abundant stools, followed by painful sensitiveness of the abdomen, pressure on the anus while wanting to go to stool. Dragging towards anus with tenesmus. Sudden urging with copious evacuation.

Sleep

Yawning. Inclination to sleep without power to go to sleep. Sleep impeded by colic, which obliges the patient to turn in bed, sometimes on one side and sometimes on the other. Uneasy sleep disturbed by abdominal symptoms and fever.

Stomach

Acid risings, ravenous hunger, nausea, weight and aching in stomach.

Stool

Stool soft, yellow, preceded by colicky pains, which become so severe after the stool that they force the patient to bend double. Soft stools, immediately after rising. Bilious diarrhea in afternoon.

Temperature

Febrile shuddering, as from electric shocks, followed by lassitude, depression and tension in the limbs. Increase of natural heat over head, cheeks and whole body. Heat originating in the lumbar vertebrae. Pulse accelerated.

Throat

Hoarseness of the voice. Frequent hawking of mucus which is difficult to loose. Rawness in throat. Roughness of the throat.

Vertigo

The vertigo is worse from rising or motion, better in the open air.

Compare

(1) Gent-q.

(2) Gent. l., Hydr., Nux-v., Epipheg. - thick saliva.

Boericke. Clarke.

Gentiana quinquefolia

(five flowered gentian)

Pharmacy

Gent-q. Five-flowered Gentian. *Gentiana quinquefolia*. Gall of the Earth. N. O.

Gentianaceae. Decoction of the herb. Tincture of fresh plant in flower (September, October). Historical dose: Tincture and all potencies.

PAGE 712

Herbal

Gentiana quinquefolia has a great popular reputation in Ohio and other parts of the United States as an anti-periodic and tonic. It is a valuable tonic for old cases of dyspepsia and torpid liver.

Yelvington of Susquehanna, who says he learned its value from a tribe of Indians. He says it has succeeded in obstinate intermittents where Quinine and other anti-periodics had failed. He used the decoction of the herb. A fluid extract or the saturated tincture is a better form for administration in fever.

Dr. Yelvington also used it in cases of infantile fever and cholera infantum. "As a tonic in enfeebled patients and in chronic diseases," he says, "it is a remedy par excellence,

appearing to exert an action over organs of nutrition and assimilation, as well as being a stimulant to the excretory organs." **Planets:** Jupiter, Saturn.

Homeopathic

Gentiana quinquefolia is a pleasant bitter and appears to be like the other *Gentians*, a positive tonic.

Clinical

Anorexia. Cholera infantum. Dyspepsia. Intermittent fever. Weakness.

SOURCES

Boericke. Clarke.

Geranium maculatum

(crane's-bill)

Pharmacy

Ger. *Geranium maculatum*. Wild Cranesbill. N. O. Geraniaceae. Tincture and triturations of root. Infusion of the plant. Historical dose: Tincture and all potencies, tincture to third potency.

Herbal

Geranium maculatum in the herbal tinctures and lower potencies it has been used successfully in cases of hemorrhage from various parts: nose, stomach, lungs.

Under the use of the drug the blood in hemorrhages becomes darker, clots more easily and is much less in quantity. The root contains both tannic and gallic acids. It has also been used for chronic diarrhea and for leucorrhea. Locally in ulcers, it will destroy the pyogenic membrane. **Planets:** Moon.

Homeopathic

There are two fragmentary provings of *Geran. mac.* one made with root preparations, one with infusion of the plant.

The chief symptoms observed have been diplopia and other disorders of vision and constant and ineffectual desire for stool. Migraines, habitual sick headaches. Profuse, hemorrhages, pulmonary and from different organs. Vomiting of blood. Ulceration of Stomach. Atonic and foul ulcers. Summer complaint.

Clinical

Diarrhea. Diplopia. Dysentery. Headaches. Hemorrhages. Leucorrhea. Migraines. Stool ineffectual urging to. Throat, sore.

Symptoms

Eyes

Ptosis and dilated pupils. Fullness in the eyes. Ptosis and dilated pupils. Great difficulty in walking with eyes open, though he could walk with them closed. Fullness of the eyes.

Female

Menses too profuse. Post-partum hemorrhage. Sore nipples. (Eup. arom)

Head

Giddiness with diplopia, better closing eyes. Sick headache. Slight pain in occiput, low down.

Mouth

Pharyngitis. Tip of tongue dry and burning.

Rectum

Constant desire to go to stool with inability to pass anything for some time. Chronic diarrhea with offensive mucus. Constipation.

Stomach

Tendency to ulceration and passive hemorrhage. Lessens the vomiting in gastric ulcers. Catarrhal gastritis with profuse secretion.

Compare

(1) Geran. - Constant hawking and spitting in elderly people.

(2) Erodium - a popular hemostatic in Russia and especially used for metrorrhagia and menorrhagia.

(3) Hydrastinin, Cinch., Sabin.

(4) Ham., Hydr., Hematoxylin., Rat., Fic., Erodium.

SOURCES

PAGE 713

Gettysburg aqua

Pharmacy

Get. Gettysburg aqua. The Salt of a Mineral Spring at Gettysburg, Pa., U. S. A.

Trituration. Historical dose: Trituration and all potencies, lower triturations. Also thirtieth potency. Evaporated and residuum triturated to 6x.

History

Magnesium sulphate is the predominant ingredient of Gettysburg aqua but the water contains many salts of alkalis and earths with a number of metals. Lithium is contained in it. Its action is very like that of Silica, which it contains.

Gettysburg aqua is indicated in decay of vertebrae or hip, ulceration of joints, when the discharge excoriates. Scrofulous children. **Planets:** Saturn.

Homeopathic

Gettysburg aqua is of use in sub-acute and chronic rheumatism. Sensation of rigidity.

Ligaments rigid. Worse stiffness of muscles on moving. Cannot remain long in one position. Stiffness of muscles on moving. Pain in ligaments relieved by rest.

Stringy mucus from throat and posterior sinuses. Rawness. Neck muscles rigid. Joints weak. Cannot lift things. Sub-acute gouty state. White coated tongue. High colored urine with red sandy sediment.

Clinical

Bone disorders. Hip disease. Potts' disease. Scrofula. Ulcers.

Modalities

Better rest. Worse from moving, especially in lumbar region and joints of hips, shoulders and wrists. pain not perceived when quiet. Worse in the morning.

Compare

- (1) Lyc., Phos. Rhus-t.
(2) Puls., but modalities differ.

SOURCES

Boericke. Clarke.

Geum rivale

(water avens)

Pharmacy

Geum. Geum rivale. Water Avens. N. O. Rosacea. Tincture of the plant in flower.

Historical dose: Tincture and all potencies.

History

Hering is the authority for this medicine. Severe jerking pains from deep in the abdomen to end of urethra, disorders of bladder with pains in penis. Relaxed mucous membranes with excessive and depraved secretions. Worse eating, imperfect digestion and assimilation. **Planets:** Venus.

Homeopathic

Tearing, jerking pains, which instantly unfit him for everything, seem to shoot from deep within the abdomen, below the umbilicus to the end of the urethra. They are like electric shocks, excessively severe and always occur twice in succession. As soon as he eats anything they return, then he is obliged to lie down.

Clinical

Bladder disorders. Penis, pains.

SOURCES

Clarke.

Ginkgo biloba

Pharmacy

Gink-b. Ginkgo biloba. Galisburin Adiantifolia is a tree belonging to the Taxaceae family in the Conifer group. The mother tincture is prepared from the fresh leaves gathered in spring. Historical dose: Tincture and all potencies, 3x to 30c.

Herbal

Ginkgo Biloba is indicated for the circulatory system and the brain. It is a famous brain tonic that improves the cerebral blood flow. Ginkgo helps treat and prevent problems with memory, senility and mental dullness.

The Homeopathic proving was carried out in 1933, by E. A. Maury with the mother tincture, on seven provers (five men and two women) and with the 6th potency, on two male provers. **Planets:** Mercury, Moon.

Homeopathic

Mental weakness. Poor concentration. Irrational fear and volubility. Influenza condition at an early stage. General numbness and shivering. Pain above the left orbital nerve.

PAGE 714

Burning pain in the pharynx and stomach. Urinary complaints. Vesicular, itching eruption.

Clinical

Absent-minded. Asthma. Alzheimer's disease. Attention weak. Concentration, poor.

Dyslexia. Influenza. Memory, weak. Mental weakness. Mumps. Laryngitis. Senility. Tonsillitis.

Modalities

Better from the heat, rest. Worse from cold, walking. Worse from drinking, looking up and to the right. Worse around 2 a.m. to 3 a.m. Worse right side.

Symptoms

MIND

Mentally weak and exhausted. Poor concentration. Dullness of mind. Loss of memory and inability to solve mental tasks. Absent-minded and forgetful. Senility and Alzheimer's disease. Sensation of mental fatigue. (Sil.) Mental work is an effort to carry out.

Irrational fears with rapid speech. Nebulous condition with the impression of unreality. Needs to criticize others and himself. Suppressed anger with desire to tear up something. (Staph.)

Abdomen

Abdomen tense and swollen. Colic, followed by diarrhea-like stools. Intestinal diseases caused by worms. Pain in the region of the bladder and loins.

Back

Pains at the nape of the neck, at the tips of the scapulae.

Ears

Buzzing noises.

Eyes

Eyeballs painful, especially on looking up and to the right. Sensation of impaired vision **with a veil in front of the eyes**. Ophthalmic migraine.

Female

Premature menses. Pre-menstrual lumbar pains. Leucorrhea.

Head

Frontal headache. Orbital neuralgia. Heaviness in the frontal region. Pain above the left orbital nerve. Vertigo. Sweating on the nape of the neck.

Limbs

General cramps and writer's cramp. Clenching of the right hand with trembling. Legs feel like jelly, feet feel icy.

Lungs

Difficult expectoration of thick sputum. Dyspnea. Laryngitis. Laryngeal irritation with cough. Asthma.

Male

Urethral discharge of yellowish pus. Diminished sex drive.

Mouth

Dry. Tongue yellow towards the root. Swallowing difficult with scraping sensation in the pharynx.

Rectum

Diarrhea-like stools. Worms. Sensation of heat in the anus.

Skin

Transient Small-pox like eruption. Vesicular, burning, itching eruption. Eczema.

Sleep

Sleep heavy with nightmares. Dreams of corpses. Insomnia between 2 a.m. and 3 a.m.

Stomach

Sensation of emptiness in the stomach. Heaviness and burning in the stomach.

Dyspepsia.

Throat

Pharyngitis. Congestion of the parotid glands. Rising pain along the line of the lower maxilla. Prickling pains in the left tonsil with need to clear the throat regularly.

Compare

(1) Rhus-t. - general aching with constant need to move. Vesicular, burning, itching eruptions.

Ginseng quinquefolium

(wild ginseng)

Pharmacy

Gins. Ginseng. Wild Ginseng. Panax quinquefolia. Aralia quinquefolia. Schinseng. N. O. araliaceae. Trituration and tincture of the root. Historical dose: Trituration, tincture and all potencies, tincture to third potency.

Herbal

The symptoms of the Chinese and the American Ginseng are taken together, as the two are probably identical. The root is forked like that of the mandrake. The name Ginseng is said to signify "the resemblance of a man" or man's thigh. Fabulous prices per pound are given for it in China.

The wild Ginseng of Siberia is said to be the best. The natives along the Ussuri river use it boiled for headaches, colds, fevers, stomach pains. In America it is a domestic remedy for the after-pains of labor.

The shape of the root might indicate an action on the pelvis and lower limbs and J. H. Henry says it acts on the lower part of the spinal marrow is indicated by:

PAGE 715

"Bruised pains in small of back and thighs (on rising from bed) and great languor with paralytic, rheumatic pains in lower limbs, arthritic swelling of the foot, which had been exerted a long time, violent pain in big toe."

Henry also mentions "Nightly digging in right lower limb from hip to big toe, cramp, pains from right hip to toes, lancinating, tearing in right tarsal joint." He considers it specific in lumbago, sciatica and chronic rheumatism with frequent desire to urinate and sexual excitement. **Planets:** Saturn, Venus.

Homeopathic

Lembke and others have proved it. It is an aromatic stimulant and removes feelings of fatigue, imparting a joyous sense of vigor and elasticity to the limbs, especially the

upper limbs and clearness of mind. The opposite condition of malaise is also produced. Yawning and drowsiness. Drowsiness with headache. Feeling of extreme heat and intense coldness, longing to expose the body to cool air.

Ginseng is said to be a stimulant to the secretory glands, especially salivary. Acts on the lower part of the spinal cord. Lumbago, sciatica and rheumatism. Paralytic weakness. Hiccough. Skin symptoms, itching pimples on neck and chest.

The right side of the body is most affected. There is pain in right side of hypogastrium, extending into groin. Dry mouth tongue and lips. The respiratory organs are affected. Mouth and throat are sensitive to the ordinary air of room.

Clinical

Appendicitis. Borborygmi. Debility. Flatus. Headaches. Lumbago. Rheumatism. Sciatica. Sexual excitement.

Modalities

better at dinner. Worse in open air and from talking. Worse at night. Worse bending or turning, descending stairs, sitting.

Symptoms

MIND

MIND

Mood quiet and contented with good courage. generally calm, but impatient impulses, fear or accidents. Thinking is difficult. Memory weak. Disposition to weep, anxious about the future.

Abdomen

Tense, painful, rumbling. Pain in right side. Loud gurgling in ileo-cecal region. Perityphlitis. Dull borborgmi in the abdomen, tension and feeling of inflation, emission of wind, uneasiness and yawning.

Back

Stiffness in back. Pressure in dorsal vertebrae. Coldness in back and spine. Frequent cracking in upper cervical vertebrae on moving head. Heaviness and stiffness in nape. Drawings in neck muscles. Weight in nape of neck with contusive pain along back of sacrum. Pulsation in vessels of right side of neck. Painful lassitude along back with bruised feeling down to and in sacrum. Deep lancinations around loins, between the shoulder-blades, extending to right shoulder.

Chest

Aching and oppression in the chest with great difficulty of respiration. Oppression of the chest with anxiety and lancinations in pit of stomach and in lumbar region.

Prostration of strength and lassitude in the limbs.

Eyes

Pressure on the eyes. Great difficulty in opening the eyelids, which are heavy and painful, itching of the eyelids. Biting and itching in margins of lids. Unpleasant sensation of coldness on surface of eyeball. *Pupils alternately large and small*. Vision indistinct. Sensation of fatigue when exposed to the light. ***Objects appear double*** when looked at fixedly in reading, the characters become confused.

Face

Alternation of redness and paleness. Burning erythematous redness on right cheek, ala nasi, chin, Lips red, dry, rough, thick, cracked and bleeding, especially the lower lip. Drawing in jaws and bones of face.

Head

Head seems at times enlarged and to sway to one side. Pressure in longitudinal sinuses. Drawing pains. Painful sensitiveness of the head. One-sided head pain. Lancinations from right side of the forehead as far as the orbit with heaviness of the eyelids. Sudden shock in occiput, followed by pains, as of a bruise.

PAGE 716

Heart

Severe pain, cutting, dagger-like lancinations and stitches in precordia. Some violent beats while sitting and followed by sensation of floundering of heart with rapid, small indistinct pulse. Pulse very irregular.

Kidneys

Sticking and voluptuous twitching in navicular fossa. Pruritus and burning in urethra with frequent urging to urinate. Yellowish lemon-colored urine, depositing a red sediment.

Limbs

Hands feel swollen. Violent burning heat in tips of fingers. Skin feels tight. Contraction. Bruised pain in small of back and thighs, nightly digging in right lower limb to toes. Eruption on upper inner thighs. Stiff, contracted joints. Much cracking in joints on moving. Heaviness of lower limbs. Bruised pain in limbs alternating in different parts.

Lungs

Voice rough and hoarse. Dry cough in paroxysms. Short anxious respiration or slow and deep with exertion. Frequent deep inspiration and tightness of chest as if he could not get enough air, better while walking. Contractive pain across lower thorax.

Male

Rheumatic pains after frequent emissions. Weakness of genital organs. Voluptuous tickling at end of urethra. Sexual excitement. Pressure in testicles. Nocturnal erections without pollutions. Painful erections while sitting at engrossing business. Pressure in testicles.

Mouth

Tongue red and smarting with thirst. Tongue white, dry with large glistening papilla. Mouth, lips and teeth very dry, voice rough and scraping. Swallowing of saliva, very difficult on account of dryness. Green saliva.

Rectum

Evacuation difficult. Hard stool, which is not emitted without efforts, followed by burning in the anus. Sticking in rectum. Tenesmus and lancinations. Thin stools preceded by short violent pain, extending from within the pelvis to the thighs, as though one must sink to the ground. Liquid stools in the evening, preceded by colic.

Skin

Itching pimples on the skin of the neck and of the chest. Itching below right foot.

Sleep

Dreams vivid, lascivious of which the recollection remains, always after taking the remedy. Much yawning and drowsiness. Awakens with difficulty or else with a start.

Stomach

Pressure on the stomach. Oppression and pressure of clothing intolerable. Painful drawings in the stomach, as from hunger. Swelling and pulsation of the stomach. Inclination to vomit. Contractive pain in the stomach with anguish, difficulty of respiration. Drawing pains in the stomach and lacerations in right side, which stop respiration.

Temperature

Coldness, numbness, trembling of hands, fingers white. Chilliness through the back extending into arms. Coldness in back extending into bones of back, cold hands, blue nails.

Throat

Tonsillitis, just like Bell., but in dark-complexioned people.

Vertigo

Vertigo, cloudiness, confusion, giddiness and heaviness of the head. Vertigo on going down winding stairs. While standing, the ground seems to waver. Vertigo with gray spots before eyes, semi-lateral headache, occipital, difficult opening of eyelids, objects appear double.

Compare

- (1) Aral., Coca.
- (2) Hedera - depression and skin irritation antidoted by Gunpowder.
- (3) In "Drowsiness with headache" Brucea, Herac., Gels., Nat-s.
- (4) Nux-m. and Sulph. in dry lips, Bry.

SOURCES

Boericke. Clarke.

PAGE 717

Glonoinum

(nitro-glycerine)

Pharmacy

Glon. Glonoinum. Nitro-glycerine. Spirits Glycerinus Nitrate. Dilutions with alcohol.

Historical dose: All potencies, sixth to thirtieth potency.

History

The "signature" of this potent explosive may be said to be "bursting" and "expansion."

Nitro-glycerine is an explosive substance, therefore its action is quick and violent with a tempestuous remedy.

Hering says "Nitro-glycerine was discovered by Sobrero in 1847, but none could be obtained for physiological experiment until Morris Davis after long and laborious trials, under direction of Hering, succeeded in producing the substance in sufficient quantities for proving."

The keynote of the action of Glon. is the tendency to sudden congestion and violent irregularities of the circulation. It acts very quickly and very violently. Great vertigo on assuming an upright posture from rising up in bed, rising from a seat, etc. Heat in the head, throbbing headache.

Guernsey says that Glon. is suited to troubles of the head in type-setters and in men who work under a gas-light steadily, so that the heat falls on the head. Bad results from sunstroke, can't bear any heat about the head, can't walk in the sun, must walk in the shade or carry an umbrella, can't bear heat from a stove.

The conditions calling for it are small, wiry pulse, pallor, arterial spasm, anemia of brain, Collapse, feeble heart, syncope, dirotic pulse, vertigo, -the opposite of those indicating a homeopathic dosage.

Often thus used to lower the arterial tension in chronic interstitial nephritis.

Homeopathic

Glonoinum acts upon the circulation where it causes violent pulsations, ebullitions and irregular congestions. Blood rushes upwards. Great lassitude, no inclination to work, extreme irritability, easily excited by the slightest opposition, ending in congestive head symptoms. Itching all over body with later acne and furuncle formation, also bulimia.

Congestive Headaches, hyperemia of the brain from excess of heat or cold. Bursting and expansion Sensations. Excellent for the intercranial, menopausal disturbances or due to menstrual suppression. Children get sick when sitting before an open fire.

Surging of Blood to Head and **Heart** Sudden and violent irregularities of the circulation. Violent convulsions, associated with cerebral congestion. Sensation of pulsation throughout body. pulsating pains. Cannot recognize localities. Sciatica in atheromatous subjects with cold shriveled limb, seasickness.

General pulsations with numbness. Pains that come long after injuries. Convulsions, epileptiform from cerebral congestion or suppressed menses. Burning in small areas or single parts. Menopausal disturbances. Clothing seems tight. Old scars break out again. Sunstroke. Strokes. Working under electric or gas light. Eclampsia. Seasickness. Walks in shade or with an umbrella.

Clinical

Angina pectoris. Aphasia. Brain, congestion. Bright's disease. Colic. Convulsions. Epilepsy. Fright. Goiter. Headaches. Heart, disorders. Hypertension. Mania. Meningitis. Menses, suppression. Neuralgia. Nosebleed. Palpitations. Paralysis. Rheumatism. Sciatica. Sea-sickness. Snow-headache. Strokes. Sun-headaches. Sunstroke. Toothache. Trauma.

Causations

Ill effects of sun-heat, bright snow, fire-heat, fear or fright, jarring injuries.

PAGE 718

Constitutions

Suited to: Florid, plethoric, sensitive women, nervous, sanguine, readily affected persons. **Planets:** Mars, Sun.

Modalities

Better from open air, elevating head. Better cold things, cold application. Worse stooping, stimulants, lying down from 6 a.m. to noon, left side. Worse in sun, exposure to sun-rays, open fire. Worse heat on Head, sun. Worse overheated, hot weather. Worse motion. jarring, shaking, bending head back injury, Worse from

suppressed menses, fruits, weight of a hat. Worse wine, gas-light, cutting hair,
peaches.

Symptoms

MIND

Frantic with pain, attempts to run away or jump out of a window.(**severe and acute pain so excess condition**) Confused, bewildered.(**extreme fire or wind condition**) Loses himself in well-known localities.(**heart yang related excess**) Shudders and weeps during intermissions of pain.(**extreme pain**) Fears she has been poisoned.(**death like feeling of pain that is severe and acute**) Shock,(**sudden attacks of problem or pain so shocked**) sudden attacks of terror,dares not go out into the street.(**sudden attacks**) Recognizes nobody,(**in sudden and acute condition consciousness lockup in severe problem**) repulses her husband and children.(**wants to handle the situation in war footing without distraction**) Disinclined to speak. Very irritable.(**liver fire or small disturbance he cannot tolerate**) Loses senses,(**extreme condition so loose his senses**) sinks down unconscious.(**if it becomes unbearable and more than his capacity then unconscious**).

Abdomen

Colic,(**wind or fire colic**) cutting pain(**severe blood stasis**) principally below the navel, wakening one in the morning,(**at the time of yang rising**) before and after loose stools. (**before stool-lung qi rising to push out,after stool-blood stagnation**)) Gall-stone colic. (**phlegm heat or stone blockage colic**) Rumbling in lower part of the abdomen, (**accumulation of phlegm or damp fire**) principally when lying on left side.(**spleen excess that is spleen heat so spleen is in left ,excess condition so pressure aggravates**)

Back

Burning heat between the shoulder-blades.(**lung heat-large intestine channel goes through shoulder**) Pain in the whole spinal column or heat and chilliness.(**wind has changing qualities so wind in spinal column**)

Breasts

Throbbing pain(**cold stagnation pain**) begins in left breast, darts suddenly to head worse motion.(**suddenly-excess condition,darts to head—wind**) so cold stagnation create internal fire which shoots as wind)

Chest

Chest feels screwed together.(**cold stagnation in chest**) Constriction of the chest.(**cold stagnation**) Constriction and oppression of the chest.(**cold stagnation**) Oppression of the chest alternating with headache.(**cold stagnation headache**) Congestions to the chest(**cold stagnant blood congealation**).

Ears

Throbbing,(**cold stagnation**) each beat of heart is heard in ears,(**pulsing pain also is cold stagnation**) full feeling.(**blood congealation**) Sharp shooting behind ears.(**shooting pain-blood stagnation**) Mastoiditis. Deafness,(**qi stagnation and blood stasis other causes are ,wind heat,liver fire,phlegm fire**) paralysis of auditory nerve.(**blood stagnation in auditory nerve so paralysis**) Sensation of fullness in and around the ears. (**blood stagnation**) Ears sensitive to jarring. Throbbing,(**cold stagnation**) piercing(**blood stagnation**) from within outward in right ear.(**right is yin,cold dominated**)

Ringling, singing or cracking in the ears.(cold stagnation and blood congealation)
Ringling in the ears, audible pulse.(audible pulse—cold stagnation)

Eyes

Red, lower eyeballs or lids.(liver heat) **Eyes** protrude, look wild, upturned or rolled outwards and upwards in convulsions.(liver wind) Lids stick to ball. Blind spells.

(liver wind) **Eyes** sunken, dry. Black specks, sparks, flashes, before the eyes.(liver fire) Letters appear smaller. Sees everything half light and half dark.

Face

Veins of temples swollen.(liver heat) Dusky face. Face bluish. Flushed, hot(heart blood stasis so bluish,liver/heart heat-flushed and hot). Pain at the root of the nose.(root generally referes kidney) Chin feels too long. Pain in malar bones, ending in headache.(kidney related pain and headache) Lower lip feels swollen or numb.(spleen damp heat) Jaws clenched in sunstroke.(spleen wind heat in jaws muscle) Face ache. (heart fire or heat)

Female

Menopausal flushing.(kidney vacuity heat and liver fire flushing) Headaches after profuse menses.(blood vacuity heat or liver fire headache or kidney qi vacuity cold haedache) Sudden cessation of menses(cold stagnation or blood congealation) with congestion to head.(blood stagnation) Eclampsia. Menses delayed(blood congealation) or sudden cessation with congestion to head. Menstruation is suppressed.(blood stagnation) During menstruation congestion of blood to head and chest,(during menses there is liver heat but cold congestion blood congestion in head or heart) headache, fainting.(blood congestion and liver heat) At menopause, flushes of heat. During pregnancy, headache, congestions of blood to the head and chest.(kidney yang deficiency or cold congestion or blood congealation during pregnancy including head and chest) Eclampsia, unconscious,(blood stagnation) face bright-red, puffed,(blood congestion) pulse full, hard, urine copious and albuminous.

Food

Appetite lost.(phlegm stagnation or spleen dampness accumulation etc) Wants cold water, also from dry parched feeling. Increased desire to smoke.(wants wind heat) Wine worse all symptoms.(damp heat worse)

Head

Cerebral congestion.(blood congestion) Throbbing (cold stagnation)and bursting headache.(high heat headache) Sun Headaches increases and decreases with the sun. (heat headache) Sunstroke, heat on head. Waves of terrible, pounding, Headache. (pounding—cold stagnation blood congealation) Cracking, snapping, shocks, explosions or soreness deep in brain.Head heavy, but cannot lay it on pillow(blood congealation). Headache before during after or in place of menses.(blood related headache) Shocks in head, synchronous with pulse.(pulsing—cold stagnation) Headache better from sleep.(in sleep there is less blood in head) Holds the head tightly.(cold stagnation blood congealation) Head feels large,as if skull were too small for brain.(blood congealation) As if standing on the head with expanding and contracting sensation. As if blood were surging back and forth. Threatened strokes. (wind strokes due to blood stasis which happens during night) Meningitis.

Heart

Fluttering.(blood congestion) Palpitations with dyspnea.(blood congestion) Violent palpitations, throbbing carotids.(cold stagnation ,blood congealing) Heart seems full, quivers.(blood congealing,cold stagnation) Laborious action.(cold stagnation,congealed blood) Cannot go uphill. Pulsations in the whole body to the finger tips.(pulsing—cold stagnation blood congealation) Purring noise at the region of the heart. Cardiac pain radiates to all parts.(radiating—heat symptom) Full tense pulse. Venous pulse. Boiling sensation in the region.(blood heat) Any exertion brings on rush of blood to heart and fainting spells.(blood coming to heart is venous,yin,cold etc charecteristics so exertion or vacuity cold or pathogenic cold immediately activates venous system so blood rushes to heart.right side is yin side)

Kidneys

Profuse pale, albuminous urine, more frequent at night.(kidney vacuity cold urine) Increased secretion of pale (albuminous) urine, has to rise frequently during the night. Tubal nephritis with headache, brought on by walking in sun, numbness in arms and hands alternating with intense tingling.(blood deficiency or dampness alternates with qi stagnation)

Limbs

Itching all over, worse limbs.(all over itching refers to heart so heart wind with spleen damp heat) Pain in left biceps.(spleen yang deficient,yang is left) Drawing pain in all limbs.Backache.(kidney yang deficient)Trembling hands.(spleen yin deficient) Knees give way.(kidney yin deficient) Thighs and knees weak and knock together during headache.(spleen and kidney yin deficient headache) Unsteady gait.(spleen yin deficient or yang excess –unsteady) Fingers and toes spread apart during convulsions.(spread apart or strtch indicates yang excess so convulsion due to excess or overactive spleen yang) Sciatica better flexing legs on abdomen.(it is just like concave pose so opposite of stretching so sciatica due to less yin or blood or blood congealation in channels)

Lungs

Heavy labored breathing.(blood congealation) As of a load on chest. Desire to take a long, deep inspiration.(long deep inspiration helps dilute the blood due to kidney involvement or cold stagnation does not allow long deep breath) Sighing.(qi stagnation) Numbness moves upwards in chest and down left arm.(blood congealation in heart and goes to left arm) Oppression of chest alternating with headache.(blood congestion chest oppression and headache)

Mouth

Pulsating toothache.(blood congealation cold stagnation) Throbbing pain(cold stagnation) in teeth, teeth feel elongated.(phlegm stagnation) Saliva increased, (stomch heat - thick saliva), thick in a.m. Froth at mouth. Taste: bitter with nausea, (bitter-heart so nausea due to small intestine blood or qi stagnation) aromatic, sweet, (spleen/stomach related) warm, leaves a fatty taste.(phlegm in stomach). Lower lip feels swollen.

Neck

Tightness around the neck.(kidney qi stagnation around neck) The neck feels weak and tired, cannot support the head.(spleen/stomach qi deficiency) Stiffness of the neck,(qi

stagnation or blood congealation) clothing seems to be too tight.(blood congestion)
On the neck sensation of fullness,(blood congestion) tension, pulsation.(cold stagnant
blood congealation)

Nose

Nosebleeds on going out into the heat of the sun,(lung heat) face flushed, hot, red.(heart
heat) Pain at root of nose.(kidney qi deficient) The headache extends into the nose.
(kidney qi deficient headache)

Pains

Bursting, throbbing, pulsative,(cold stagnation) tearing, piercing, stabbing, gnawing.
(blood stasis) Sensation of fullness.(blood stasis)

Perspiration

Perspiration principally in the face(heart heat or blood stagnation) after
sleeping. Perspiration on forehead.(stomach heat) Profuse sweat, mostly on face and
chest.(heart heat or blood stagnation) Perspiration relieves the nausea.(small intestine
blood stagnation improves due to heart area perspiration so nausea improves)

Rectum

Constipation with itching,(large intestine wind heat o constipation due to heat or lung qi
deficient so not able t push and itching due to wind) painful hemorrhoids(large
intestine and lung qi deficiency) with pinching (pinching is qi stagnation pain) in
abdomen before and after stool. Diarrhea, copious black, lumpy stools.(lumpy and
black—blood stasis so diarrhea due to blood stasis) Diarrhea with sudden stoppage of
menses.(blood stasis diarrhea) Morning diarrhea with sharp burning with rumbling.
(phlegm heat ,sharp-blood stasis) After eating peaches diarrhea evening and night.

Sensations

Sensation as if chin feels too long.(phlegm accumulation) Brain as if expanding,(blood
congestion and heat) as if moving in waves, as if hanging with head downwards, as if
something were pumped into vertex,(vertex-liver,so liver blood pumped into vertex)
as if everything were crowded out at forehead. Sensation as if warm water were
running upwards from nape of neck, as if the neck were influenza by a hand.
Sensation as if some one were pulling eyes from within outward.(pulling-qi
stagnation so liver yang stagnation) Noise in left ear as if it came from heart.(heart
yang irritation due to heat creates noise in the left ear)_As if heart would rise to
throat.(heart yang too much excited)

Skin

Itching all over, the limbs.(spleen and heart wind or yang irritation) Old scars break out
again.(old scars having cold stagnation and blood congealation breaks out again due
to heart fire)

Sleep

Awakes with fear of having a stroke.(heat stroke due to cold stagnation) Yawning with
the headache,(kidney qi deficiency headache-kidney-yawning) congestion of blood to
the head.(blood stasis) Sleepiness early in the evening.(congestion of blood so yin
rising time sleepiness) He is difficult to waken.(blood stasis sleep) Weakness as from
loss of sleep.

Stomach

Nausea and vomiting in brain-congestions or during sunstroke.(heart and head blood
congestion nausea and vomiting) Faint, gnawing and empty feeling at pit of stomach.

(yin/blood vacuity so empty feeling, gnawing due to blood stagnation so fainting due to blood vacuity/congestion of stomach) Stomach pain in anemic patients with feeble circulation. (stomach pain due to blood deficiency) Horrible faint feeling at the pit of stomach with throbbing. (throbbing-cold stagnation blood congealation so faint feeling due to this) Rumbling in hypogastrium, worse lying on left side. (phlegm heat in liver, worse excess condition and yang side) Abnormal hunger. (high stomach heat)

Teeth

Throbbing pain in all the teeth. (cold stagnation blood congealation teeth pain) Pulsating toothache with headache. (cold stagnation blood congealation) Stabbing pains in gums (blood stasis gums pain) right side passing to left without ceasing in right, (spreading so heat with blood stasis) worse from hot, better from cold applications.

PAGE 720

Temperature

Heat with hot sweat. (heart and lung heat) Pulse accelerated. (heat) irregular intermitting, (heart qi stagnation) full and hard, (blood congealation) small and rapid. (blood stasis) Chill after getting heated. (release of cold stagnations after heat) alternates with sweat with vomiting. (cold stagnations release from body via sweat and vomiting) head as if screwed up intermittent fever. (liver qi stagnation and heat) Heat in face. (heart heat) ascending from pit of stomach to head. (stomach heat the channel to head) Warmth general. (heart heat) flushes of heat, waves of heat upward. (heart and liver heat or yang active)

Throat

Throat feels full. (blood stasis) Collars must be opened. (due to blood stasis) Chokes and swells up under ear. The soft palate feels contracted and dry. (cold stagnation so blood congealation so no moistness by blood so dry) Itching of the soft palate and throat. (qi stagnation or lung/stomach wind) In the throat tickling. (qi stagnation) heat, soreness. (blood/qi stagnation) Sensation as if the throat were swelling. (blood congestion)

Tongue

Tongue, heavy, cannot protrude straight. (tongue heavy due to blood congestion in heart) conversation difficult with confused ideas. (heart yang disturbed) Tongue numb, (qi/phlegm stagnation) as if burnt (heat), prickling. (blood stagnation) stinging. Tongue feels swollen and raw (swollen and raw—blood stagnation) with spasmodic twitchings. (qi stagnation-twitch) Tongue is milk-white without coating. (heart blood cold congealation so white due to cold) coated heavily at back. (cold stagnation in large intestine area) Tongue swollen with pricking in it. (blood stagnation) the tongue smarts.

Vertigo

Mental confusion with dizziness. (heart yang disturbance plus heat type dizziness and confusion) Vertigo on assuming upright position. (upright position activates yang so activated yang vertigo with deficiency of yin) Vertigo, worse from stooping (yin deficiency) or moving head in open air. Giddiness when the head is moved.

Comments

Bursting and throbbing headaches. Sensations of expanding in the head and elsewhere. Throbbing of carotids, violent action of heart, rush of blood to head. Flushes of heat rising from chest to head, then throbbing pain in head. (Bell.)

The great sensitiveness to the least motion, which is a very marked feature of the Glon.
Headaches, cause the patient to carry his head very carefully in order to avoid any motion. (Bry.)

The headache is in the whole head and every part: forehead, vertex, occiput. Many pains appear in occiput and base of brain, gnawing in occiput, sore pain, pressure, sever pain in occiput, extending to eyes and temples, sensation as if something were moving in nerves from back of neck upward to head. The eyes may be fixed or protrude, aversion to bright light, black spots before sight.

Menopausal disturbances. Face is flushed or pale. Fainting, sudden unconsciousness, convulsions, especially during labor. Nausea and vomiting of cerebral origin. Violent, stabbing, neuralgic pains, so violent as to make patient frantic, he wants to escape to jump out of window. Bad effects of fear, horrible apprehension, fear of being poisoned.

A characteristic mental condition is loss of sense of location: "well-known streets seem strange to him."

The characteristic neuralgias of Glon. are accompanied with much throbbing and are often worse at night, preventing sleep. Supra-orbital neuralgia, pulsating, retinal congestion from exposure to strong light. Facial neuralgia, extending through head. Cardiac neuralgia (angina pectoris) with radiating pains.

Bad effects of having hair cut of exposure to sun or fire heat. All summer, headache worse every day with the sun. Worse from wine. **Pains from within outward from front to back.** Bad effect of too much riding or driving, sea-sickness, worse from jarring. Pressure better headache. Cannot bear weight of hair, clothing seems too tight.

Compare

PAGE 721

Glycerinum

(glycerinum)

Pharmacy

Glyc. Glycerine. Glycerinum. Historical dose: Tincture and all potencies, thirtieth and higher potencies. Pure glycerine in teaspoonful doses, 3 times a day with lemon juice for pernicious anemia.

History

Glycerine is a liquid obtained by the decomposition of vegetable or animal fats or fixed oils, containing not less than 95 per cent of absolute glycerol, a triatomic alcohol existing in fats and fixed oils in combination with the fatty acids.

Potentized Glycerine seems to act deeply and long, building up tissue, hence of great use in marasmus, debility, mental and physical, diabetes, etc. It disturbs nutrition in its primary action and, secondarily, seems to improve the general state of nutrition. (Dr. Wm. B. Griggs.) **Planets:** Jupiter.

Homeopathic

Glycerine has proved itself to be a tissue builder and is of undoubted value in marasmus. It seems to affect most of the organs and tissues of the body. General sense of exhaustion.

Glycerine has proved of value in diabetes, influenza, pneumonia, neurasthenia, many forms of gastro-intestinal disease, various types of senile debility, acute catarrhal conditions of the mucous membrane of the naso-pharynx and nephritis in the aged.

Glycerine seems to have a remarkable effect on balancing the general metabolism.

Headache with a sense of fullness in the head and throbbing, aggravated by motion.

Dullness of the mind, a sense of mental and physical weakness, restless sleep and dreaming, much physical languor, almost to a state of utter prostration. Loss of appetite, constipation, profuse urination with traces of sugar. Catarrh of the naso-pharynx.

Clinical

Diabetes. Pernicious anemia.

Symptoms

Chest

Hacking cough with sense of weakness. Chest seems full. Influenza pneumonia.

Female

Profuse, long-lasting flow with bearing down heaviness in uterus.

Head

Feels full, throbs, mentally confused. Severe headache two days before menstruation.

Occiput feels full.

Kidneys

Profuse and frequent urination. Increased specific gravity and sugar. Diabetes.

Limbs

Rheumatic pains of a remittent type. Feet painful and hot, feel enlarged.

Nose

Stopped up, sneezing, irritating coryza. Sensation of crawling on mucous membrane.

Post-nasal dripping.

Stomach

Fermentation, burning in stomach and esophagus.

Comments

Anshutz reports these cases: (1) The patient, a homeopathic physician in Philadelphia, aged 61 years. Refused insurance on account of albumen casts and sugar in urine, has been under his own care for months.

He developed a severe infection on neck, six inches in diameter, a carbuncle was operated on by Dr. Herbert S. Leopold very successfully. Extreme nervousness, profuse urination with a specific gravity of 1.030. Sugar, etc. in urine examined by a Philadelphia chemist, extreme debility, prostration, etc. Glycerine in 30c and 200c eliminated sugar and albumin in three months and patient gained fifteen pounds.

(2) Mr. S., baker, age 66 years. Diabetes for years, weakness, dyspnea, headache, urine with sugar, acetone, great debility. No albumin or casts. He was placed on strict diet and given Sulphur, Phosphoric acid, Uranium nit., Arsenicum, Syzygium jamb. and potentized blood. Glycerine was then given with the result that the urine cleared up, a good appetite developed and after a period of two years sexual vigor returned.

(3) C. H. a baby two years old, Drs. Yeager and Macfarlan assisting. Influenza pneumonia. Profuse coryza and dyspnea. Consolidation in both lungs, weakness and debility after twelve days. Glycerine 200c was given and a complete recovery ensued with improvement at once.

Gnaphalium polycephalum

(cud-weed, old balsam)

Pharmacy

Gnaph. Cud-weed. Old Balsam. Gnaphalium polycephalum. Sweet-scented Everlasting Flower. N. O. Composite. Tincture of fresh plant. Historical dose: Tincture and all potencies, third to thirtieth potency.

Herbal

Dr. W. McGeorge tells us that among the natives Gnaph. has a reputation for colds, fevers and night-sweats. The last was caused in one of the provers. It cured one case of "chills," and the periodicity appears in the intermittent neuralgia of the upper jaws.

Gnaph. has been used mainly in disorders of the sciatic nerve. But it has also an action on the abdominal organs, causing vomiting, colic and diarrhea, thus comparing with Colocynth. in both spheres. **Planets:** Mercury.

Homeopathic

Gnaphalium is mainly used in the disorders of the sciatic nerve, though it has some useful abdominal and female symptoms. A remedy of great benefit in sciatica, when pain is associated with numbness. Rheumatism and morning diarrhea. Polyuria.

Intense sciatic pain, alternating with or followed by numbness, worse lying down, motion, stepping, better by flexing the limbs on abdomen, by sitting in a chair.

Lumbago with numbness of part and weight and heaviness in pelvis. Anterior crural neuralgia. Pain in joints as if they lacked oil.
Offensive diarrhea with colic, worse morning. Weight and heaviness in pelvis.
Dysmenorrhea with scanty menses and very painful the first day.

Clinical

Anterior crural neuralgia. Cholera. Cholera infantum. Colic. Diarrhea. Dysmenorrhea.
Gout. Lumbago. Night-sweats. Prostate gland. Rheumatism. Sciatica.

Modalities

Better from flexing limbs, sitting in a chair. Worse from walking, lying, cold damp.

Symptoms

MIND

Very irritable for two or three days after the diarrhea.

Abdomen

Colic, pain in various parts of the abdomen. Cecum is sensitive. Borborygmus with emission of much flatus.

Back

Chronic backache in lumbar region, better resting on back. Lumbago with numbness in lower part of back and weight in pelvis.

Face

Intermittent pains of superior maxillary of both sides. Dull, heavy, bloated appearance.
Neuralgic pain of an intermittent from in both upper maxillary bones.

Female

Dysmenorrhea with scanty and painful menses. Sensation of weight in pelvis. Sensation of fullness in pelvis.

Kidneys

Pains in kidneys with frequent slight pain in prostate gland. Sensation of pain and fullness in bladder, even when just emptied.

Limbs

Cramps in calves of legs and feet when in bed. Rheumatic pain in ankle joints and legs. Intense pain along the sciatic nerve, numbness alternates with pain. Feeling of weakness, as if incapable of raising the slightest weight. Rheumatic pains in elbows and shoulders. Frequent pains in calves and feet. Gouty pains in big toes. Better drawing limbs up, flexing thigh on abdomen. Gouty concretions. Anterior crural neuralgia. (Staph.) Pain in joints as if they lacked oil. Chronic muscular rheumatism of back and neck.

Male

Irritation of prostate gland. Increased sexual passion.

Mouth

Flat, sweetish, sickening taste. Tongue covered with long white fur, better by thorough washing with cold water. Mouth feels parched and tastes badly.

Rectum

First stage of cholera infantum, vomiting and purging. Rumbling in bowels with stool before breakfast. Looseness of bowels with passage of pale-colored feces. Diarrhea

discharge in morning and during day with irritable temper, pains in bowels in children.

Dark-colored, liquid offensive stool in morning afterwards pain in bowels all day.

PAGE 723

Stomach

Vomiting and purging like cholera morbus in the night and all next day. Flatus, windy belchings, nausea and hiccough.

Vertigo

Giddy, especially after rising from recumbent position.

Comments

The special indication for Gnaph. use in sciatica and lumbago is: Numbness alternating with the pain. The diarrhea is watery and offensive, occurs in the morning and is repeated during the day. There is rumbling in the bowels, colicky pains and the patient is cross and irritable, urine is scanty, appetite and taste are lost. There is also sexual excitement in male provers, pain and irritation in the prostate gland.

A very important observation made by McGeorge is on the value of Gnaph. in dysmenorrhea. "Weight and fullness in the pelvis" are the only symptoms noted in the proving bearing directly on the malady. "Dysmenorrhea when the menses are scanty and very painful the first day" is the clinical indication.

McGeorge cured a very aggravated case of sciatica (left) in a man, resulting from a strain. The leg was cramped and drawn up, worse in cold and damp weather.

I have cured a number of cases in which there was alternation of numbness with the pain.

Dr. George Shelton has recorded two cases.

(1) A clergyman, 27, had sharp cutting pains, starting from inner side right thigh, just below Poupart's ligament, extending down course of anterior crural nerve to a point about its lower third.

The pains were paroxysmal, came on when walking, occasionally when lying down, had one or two attacks in the pulpit. In several instances the pain had extended down the right cord into the testicle and caused him to draw up the leg, flexing the thigh on the abdomen.

This condition was also present in Dr. McGeorge's case and may possibly be a keynote.

A few doses of Gnaph. 1c cured him completely.

(2) The second case occurred in a widow, 68, who had severe pains in outer side of right thigh for six years during part of which time she had been confined to bed. The pains were paroxysmal, cutting, tearing, extending down the course of the sciatic nerve. Attacks worse at night and more frequent, causing her to roll about the bed and cry out with the pain.

All the resources of allopathy had been in vain. Rhus-t., Coloc., Sulph., gave no help. Bell. relieved slightly. Gnaph. 1c wrought gradual improvement and in eight weeks the cure was complete.

Clarke's cases were cured with Gnaph. 30c. One was in a very gouty man, the alternation of numbness with pain being present. Sciatic pain in worse on lying down, by motion, by stepping, better when sitting in a chair, better drawing up the limb. Headache better by washing in cold water. Fur on tongue removed by thorough washing with cold water.

Ulex europaeus

Gorse

(bach flower remedy)

Pharmacy

Gorse. *Ulex europaeus*. Flowers from the bush are placed in a bowl of water and allowed to stand in the sun for several hours. The strained water is used as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

Herbal

This remedy belongs to Bach's group of For Those who Suffer Uncertainty, together with the remedies Cerato, Scleranthus, Gentian, Hornbeam and Wild Oat.

PAGE 724

These remedies help those suffering from states of doubt, hopelessness, uncertainty and lack of clarity of purpose in their daily affairs. **Planets:** Moon.

Homeopathic

In cases of true hopelessness, such as terminal illness, Gorse will help to raise spirits.

Lowered vitality and sinking of strength. The Gorse state is not confined to sickness, but can be experienced during various situations of life, in business and family life.

Whenever a situation seems hopeless and one resigns to it. It is a state of lowered health, dangerous for those in sickness, the vital force itself is losing its incentive to live and fight on.

Symptoms

MIND

In the Gorse state, the mind cannot perceive a way out of a difficult situation. All desire to give oneself to new ideas and hopes is gone. It is a state of deep-hopelessness, (Aur.). One accepts one's lot, succumbing to adverse forces.

Although one may appear calm, there is also underlying sadness and a sense of misfortune and suffering. There comes the cessation of hopes. Denial and recurring disappointment. Although there is certainty that all hopes are lost, uncertainty still remains in regard to what exactly lies ahead.

Gossypium herbaceum

(cotton-plant)

Pharmacy

Goss. Gossyp. herbaceum. Cotton-plant. N. O. Malvaceae. Tincture of fresh inner root bark, chopped and pounded to a pulp. Historical dose: Tincture and all potencies, tincture to sixth potency.

History

Gossyp. has been mainly used in affection of the female generative organs. It has been taken in the form of the extract stimulate the uterus and ovaries. The symptoms of the external organs are strongly marked and the ovaries are the seat of pains which come and go and in the uterus are bearing-down pains.

"Intermittent pains in the ovaries" is characteristic.

The morning nausea and salivation indicate the remedy for morning sickness of pregnancy. **Planets:** Moon.

Homeopathic

In herbal practice Gossypium was used as a powerful emmenagogue. In homeopathy it corresponds to many reflex conditions dependent upon disturbed uterine function and pregnancy. Tall, anemic patients with nervous chills.

Nausea with flow of saliva and inclination to vomit in the morning, before breakfast with sensitive uterine region. Sensitive stomach with much gas. Vomits on motion or raising up. Hyperemesis.

Gossypium will relieve tardy menses, especially with sensation that the flow is about to start and yet does not do so. Intermittent pain in ovaries, extending towards uterus. Uterine torpor, sterility from. Sensitive womb. Menses, late, scanty, watery. Subinvolution. Fibroids. Tumors in breast with swelling of axillary glands. Pain in neck.

Sympathetic symptoms of stomach, heart, bowels and nervous system arising from disturbance of uterine functions. The pains are of a stinging, drawing, tearing and sometimes of a burning character. Pains extend from one place to another, jumping from one place to another. Pains generally move from above downward.

Clinical

Amenorrhoea. Dysmenorrhoea. Labia, abscess. Miscarriage. Ovaries, pains in. Pregnancy, vomiting. Infertility. Tumor. Uterus, bearing down in.

Modalities

Worse from motion. Pains are generally worse by motion, better by rest.

Symptoms

Back

Pain in back.

Breasts

Tumor of the breast with swelling of axillary glands.

Eyes

Drawing pain over eyes with stinging pain in pupils.

Female

Labia swollen and itching. Intermittent pain in ovaries. Retained placenta. Morning sickness with sensitive uterine region. Suppressed menstruation. Menses too watery.

Backache, weight and dragging in pelvis. Uterine sub-involution and fibroids with gastric pain and debility.

PAGE 725

Food

Anorexia with uneasy, depressed feeling at scrobiculum cordis at time of menses.

Head

Pain in cervical region with tendency for head to draw backward with nervousness. Pain, first burning, then stinging, extending from both temporal bones to middle of frontal bone.

Kidneys

Frequent desire to urinate with burning pains.

Limbs

Heavy feeling in both hands, better hanging them down, worse in warmth of bed.

Nose

Nostrils swollen and inflamed.

Sleep

Caused her to sleep a great part of the time.

Stomach

Nausea with accumulation of saliva in mouth inclination to vomit before breakfast.
Rotating pain in pit of stomach.

Throat

Tonsils swollen, right worse.

Granatum

(pomegranate root bark)

Pharmacy

Gran. The Pomegranate. Granatum pomegranate. Punica granatum. N. O. Granatee.

Homeopathic provings were made with a tincture or trituration of bark of root.

Historical dose: Trituration, tincture and all potencies, first to third potency.

Herbal

Pomegranate is a well-known vermifuge especially used for the expulsion of tinea. For this a decoction of the rind of the fruit is used in the following manner. An alkaloid, Pelletierine, discovered by Bertrand Pelletier is obtained from the rind of the fruit.

After a mild purge the previous night in the morning 30 grams of Sulphate of Pelletierine is administered in a solution containing 50 grams of Tannic acid. This is followed by a glass of water in ten minutes and a brisk purge in half an hour. **Planets:** Moon.

Homeopathic

Granatum is used as a vermifuge for the expulsion of tapeworm. Salivation with nausea and vertigo. Spasm of the glottis.

The provings bring out many symptoms of helminthiasis as: Pale blue rings round eyes. Itching, crawling tickling of nose. Ravenous hunger, craving for sour or juicy things, fruit, coffee. Loss of appetite. Nausea, fermenting in abdomen, griping, dragging in

inguinal region as if hernia would protrude. Itching and tickling in anus frequently during the day. Emaciation. Convulsive movements.
Among the general symptoms are: Great weariness and exhaustion, scarcely able to keep upright. Trembling. Discomfort and nausea. Itching of the skin of various places, face and body, as if pimples would break out. Biting and itching in palms of hands.
Yawning. Great sensitiveness. Swelling of navel, Protrusions in inguinal rings.

Clinical

Ascarides. Gastralgia. Hernia. Jaw cracking, Tapeworm. Toothache.

Modalities

Better after dinner. Pain in abdomen is better after drinking cold water.

Symptoms

MIND

Quarrelsome humor. Melancholy, gloomy temper. Great sensitiveness and impressibility.

Stupefaction and intellectual embarrassment. Irritability and arrogance.

Hypochondriacal scruples. Dejection and discouragement.

Abdomen

Pain in stomach and abdomen, worse about umbilicus (Cocc., Nux-m., Plum.) ineffectual urging. Dragging in vaginal region, as if hernia would protrude. Swelling resembling umbilical hernia.

Chest

Oppressed with sighing. Pain between shoulders, even clothing is oppressive.

PAGE 726

Eyes

Sunken eyes, pupils dilated, weak sight.

Food

Ravenous hunger, craving for sour or juicy things, fruit, coffee. Loss of appetite. Great thirst for water.

Head

Feels empty. Stupefying pain and painful heaviness in the head, forehead. Pressure on the forehead and the occiput acute drawing pains chiefly on right side of head shooting in forehead.

Limbs

Pain around shoulders, as if heavy load had been carried. Pain in all finger-joints.

Tearing pain in knee-joint. Convulsive movements.

Rectum

Burning, itching in the anus, on the buttocks and perineum, scrotum and the thighs.

Diarrhea with frequent stools. Evacuation of fecal matter and mucus. Pressure in rectum afterwards. Burning heat in rectum. Prolapsed rectum during the stool.

Shooting pains in anus and rectum.

Skin

Itching in the palms. Sensation as if pimples would break out. Jaundiced complexion.

Stomach

Constant hunger. Poor digestion. Loses flesh. Vomiting at night.

Vertigo

Vertigo during intellectual labor or in the morning on rising. Vertigo very persistent.

Sometimes with obscuration of the eyes or with nausea and aching in the stomach.

Compare

(1) Pelletierine - one of its constituents - an anthelmintic, especially for tapeworm.

Granitum murvey

Pharmacy

Grani. Granite. Murvey Granite from near Barna, Co. Galway, Ireland. Within granite there are three radioactive elements. Potassium 3-4% by weight gamma rays.

Uranium 1-10 ppm alpha, ' and gamma rays. Thorium 10-50 ppm alpha, ' and gamma rays. Triturations. Historical dose: All potencies, low and high potencies.

History

Granite was first used as a medicine by ancient Egyptian physicians and it is mentioned in many of the medical scrolls. It has recently been proved in England by Nuala Eising. Connemara Granite of Ireland has one of the highest levels of radioactivity of the granites found in Britain and Ireland.

The pink granite has a particularly high level of radioactivity. Granite in Ireland is considered responsible for a higher rate of cancer and Down's syndrome in that country.

Eising obtained a sample of Granite by breaking through a rock, taking a piece from the center which was untouched by human hand. This was sent to the Galen Pharmacy and had it potentised to the 30c potency. This 30c was used by the provers.

The first word that virtually all the provers used was weakness. The weakness of Granite was at times a profound exhaustion, unable to move. Hard to get oneself out of bed. Drags oneself around the place, having to lie down, sleep often. At other times they experienced general weakness with no inclination to do anything, which at times felt pleasurable and "laid back".

They had occasional bursts of energy which would not last for long, or they had bursts of nervous high energy. This was combined with a profound introversion and withdrawal from everything and everyone. **Planets:** Saturn, Moon.

Homeopathic

The physical symptoms are many, delirious fevers or milder, recurring fevers, all with profuse sweating. Extreme exhaustion and weakness. The genital areas of both sexes were affected with sexual energy lost or diminished. The menstrual cycle and menstruation were disturbed. Pain and discomfort in genital areas generally.

Some provers developed yellowness of the skin. There was a marked effect on the liver and digestive system, with and nausea. Headaches were frontal and temples mainly, pressured and bruised, sore constantly throughout the proving, others recurring.

PAGE 727

All the limbs felt heavy and painful, or with rheumatic type pains.

Clinical

Chronic fatigue. Constipation. Dandruff. Diarrhea. Fevers. Flatulence. Headache.
Influenza. Nausea. Rheumatism. Weakness.

Modalities

Better lying down. Alcoholic drinks ameliorated most of the symptoms. Worse from cold, even when hot. Worse from tobacco, particularly the weakness and nausea.

Symptoms

MIND

Apathy and weakness. Extremely introverted, detached and indifferent. Spaced out all day and very giddy. Concentration was gone and very forgetful. Indifference to everything and everyone except their own being and feelings.

Felt extremely lonely. A Deep feeling of sadness and worthlessness. Cried a lot and just wanted to lie down all the time. Self-pity. Life was very painful. Feels incredibly vulnerable. Feelings of self-doubt. Poor self-confidence.

Great fear for no apparent reason. Restlessness. Fear or panic attacks. Claustrophobia. Making decisions was a great effort. Forgetting where he left things. Memory was bad. Feelings of anticipation. Uneasy feelings as if something were about to happen or as if she had something to do and couldn't remember what.

Insolent and rude. Introversion with arrogance. Believes that others are trivial or petty. Aversion to company, to socializing. Contempt for others. Blunt or rude and felt no care for the hurting on others. Suspicious of motives of others. Outbursts of anger. Irritability or anger at being invaded or disturbed by others. Easily startled by sudden noises.

Abdomen

Dull heavy pain in her lower abdomen. Pain, has to bend double. The pains radiated down thighs. Dragging ache in lower abdomen. Tension in the solar plexus. Spluttery and full of gas with cramps in abdomen.

Back

Aching, dull, heavy pain in the lower back. Pain in kidney region. Neck felt tense and painful.

Breasts

Breasts sore and swollen.

Ears

Ear infections. Pressure and popping in ears. Intense pressure in her ears affecting her hearing. Ears itchy inside and a thick discharge followed. Eruption like a cold sore appeared on the left ear lobe, scabby, pus, itching. Ears felt like they were stuffed with cotton wool. Hearing was bad. Voices and sounds seemed distant.

Eyes

Burning sensation and pressure behind her eyes. **Eyes** were stinging, burning and watering. Eyelids felt heavy all day. *Short-sighted.*

Face

Pale. Face looks strained. Frowns a lot.

Female

Menstrual cycle and menstruation disturbed with pain and discomfort. Menses with severe pain in lower abdomen and lower back. Sexual urge diminished or lost. Sharp pain in right ovary.

Food

Appetite lost with nausea. Hungry but couldn't find any food that interested her. Nibbling at food all the time out of boredom. Craving for sweets. Thirsty most of the time.

Head

Frontal pressure. In the morning had a frontal headache. Dandruff. Scalp scaly, itching with hair falling out, (Cured during proving). Head was very hot and his scalp and forehead were very itchy. Headache as if a tight band. Temples felt bruised and sore. Headache in the morning.

Kidneys

Sharp, stabbing pains over kidneys. Pressure on her bladder. Aching pain in back over kidneys. Frequent urination.

Limbs

Rheumatic type pains. Sore bruised type in left shoulder, over left kidney and in left hip. Arms were very heavy, had no power in them, lifting things was very difficult. Limbs were sore and achy. Rheumatic pains in his right arm and left thigh at night.

Lungs

Cough, like she was clearing her throat all the time. Short, phlegmy cough.

Male

Sexual energy lost or diminished.

PAGE 728

Nose

Sense of smell acute.

Rectum

Constipation and diarrhea. Diarrhea a chalky colored, had to go to the toilet frequently. Diarrhea in the morning. Diarrhea with pains like pre-menstrual pains in her lower abdomen.

Skin

Pimples on neck and back. Skin generally was itchy, as was the scalp. Eruptions, red patches of dry skin intensely itching and burning. Must scratch, scratching brings up little lumps. Very yellowish skin.

Sleep

Confused on waking. Very exhausted on awakening in morning. Unrefreshed sleep. Dreams about grandparents and past situations. Dreams that elderly relatives were dying. Dreamed all night about her mother. Very aggressive dreams, she was beating up people. Dreams about being in a war. Violent dreams of being raped. Horrible dreams about dead babies.

Stomach

Nausea with lost of appetite.

Temperature

Fever with sweat. Hot and feverish and was sweating on palms and back. Sweating a lot in bed.

Throat

Throat was sore and raw. Tickling in throat causing a cough.

Vertigo

Felt giddy and exhausted.

Comments

Most of the provers mentioned an occasional desire for the company of one close friend, where no social effort was necessary. A desire to just be with someone without having to talk or interact. This desire for company was most marked during anxiety. Fear or panic attacks are also a marked feature of Granite. Anxiety rising suddenly without apparent cause. Restlessness, have to keep moving. Looking for distractions.

Trembling all over, hands trembling.

Another symptom was that they were easily startled by sudden noises or while driving.

Red patches on skin, dry itching with aggravations from dairy products. one prover had this symptom for years. Cured during the proving and has not returned since.

Dairy products causes no problems now.

He had to stop smoking because it aggravated the weakness and nausea (in normally heavy smokers).

During the proving the eruptions disappeared first. The inner ear infection progressed back, stage by stage, to the original state, with pressure and popping and then disappeared altogether. Also, five of the provers produced the pressure and popping in the ears. Skin and scalp symptoms were produced by other provers.

Six provers mentioned afterwards that they had become more assertive after the proving than they were before. Three female provers cut their hair immediately following the proving. One explained that she had always worn her hair long, half covering her face, because of her shyness. Drinking alcohol made her "wild" and "bold" and very happy.

Case (1) Male. He moved to Galway two years earlier and was having recurring panic attacks since. He was very introverted, with profound feelings of loneliness and isolation. He was prone to outbursts of anger. Granite 200c cured.

Case (2) Female. Suffering severe headaches, pain from her eyes. She had been diagnosed as near-sighted and needed glasses. Along with this she was tired all the time and had difficulty getting out of bed in the morning. She had to drag herself out of bed. She was introverted with a lot of strong feelings of hatred and jealousy. She also mentioned that she liked trying to provoke her passive husband into fighting.

Granite 200c cured. She has had her eyes tested again since the remedy and her sight became perfect.

Graphites

(black lead)

Pharmacy

Graph. Graphites naturalis. Black Lead. Plumbago. Trituration of prepared Black Lead from finest English drawing-pencils. A modification of carbon. Historical dose: Trituration and all potencies, sixth to thirtieth potency. Locally as a cerate in sore nipples.

History

Graphites like all the carbons, this remedy is an anti-psoric of great power. It is a mineral carbon in which there is a small percentage of iron. The first idea of using this substance as a drug is due to S. Weinhold, who was led to it by seeing workmen in a mirror-factory use it as a local application for tetter. Ruggieri followed him, using it both internally and locally.

Graph. being one of the forms of Carbon, it is therefore related to Carbo ani. and Carbo veg. and as it contains a small percentage of iron, it is also related to Ferrum. Graph. causes slight weakness, at first then a weak, relaxed, condition, anemia, chlorosis. The typical Graphites patient is "fat, chilly and costive." Lymphatic glands are swollen. Like the skin, the mucous membranes are cracked and fissured and have scanty secretions.

Hufeland relates the cure of a lady, 41, by the internal and external use of Graph. of an acne rosacea which had defied all other modes of treatment. Teste classes Graph. in Pulsatilla group with Silica., Calc., Hepar and Phos. It affects the nutrition in a peculiar way, it is a remedy for those persons who have a tendency to put on unhealthy fat or for those who begin to emaciate.

Homeopathic

Graphites is especially active in patients who are rather stout of fair complexion with tendency to skin disorders and constipation. Fat, chilly and costive with delayed menstrual history. Take cold easily. Cancerous diathesis in old scars.

Graphites produces thickening and induration of skin, glands, tarsi, nail, scars. Thick crusts are formed on the skin. Tendency to callosities.

It has a tendency to produce excoriations, cracks or fissures, at muco-cutaneous junction of eyes, nostrils, mouth, anus, nipples, fingertips, folds of skin. Aids absorption of scar tissue. (Thiosin.)

Anemia with redness of face. Tendency to obesity. Swollen genitals. Gushing leucorrhoea. Cancer of pylorus. Duodenal ulcer. Eradicates tendency to erysipelas. Infiltrations. Discharges are, thin, foul, scanty and acrid. Sourness of taste, belchings, stools, urine, blood about teeth etc.

Hemorrhages are watery. Emanation of suffering parts. Sensation of burning, numbness and deadness. Pains go to parts not lain on. General sense of uneasiness, tremulousness, which elicits groans. Sudden sinking of strength. Frequently feels faint with partial loss of senses.

Alternate digestive and skin symptoms. Supersensitive to cold. Cold, which aggravates bone pains, coryza and stomach. Paralysis or sensation of paralysis. Contractions of muscles. Cramps and burning in different places. Tendency to grow cystic tumors, wens. Dropsy, Edema.

Gastro-intestinal disorders alternating with acne and erythema of face, herpetic lesions or scrofulous hypochondriasis. Excoriations between toes. Syphilitic and "constitutional" ulcers. Recrudescence of scars. Cracks and fissures. Offensive discharges and secretions. Sweat: stains yellow, sour offensive.

Clinical

(A MIX OF QI AND BLOOD STAGNATION FEELING=PHLEGM STAGNATION)

Acne. Amenorrhea. Anus disorders. Blepharitis. Breasts indurated, cancer. Cancer. Catarrh. Chaps. Chlorosis Colic. Constipation. Deafness. Dropsy. Dysmenorrhea. Ears disorders. Eczema. Erysipelas. Lips, cracked. Liver indurated. Menstruation, disorders. Leucorrhea. Nails, disorders. Noises in head. Nose, disorders. Nosebleed. Obesity. Ovarian tumors.

PAGE 730

Paralysis. Parotiditis. Pityriasis. Priapism. Pruritus vagina. Psoriasis. Ptosis. Rectum disorders. Rhus poisoning. Scars, old. Scrofula. Seminal emission. Skin disorders. Smell, disorders. Stomach, cramps. Stomach, pain. Sycotic diathesis. Syphilis. Trichinosis. Tumors. Ulcers. Urine disordered. Uterus, cancer. Vaccination, effects. Wens. Whooping cough. Worms.

Causations

Ill effects of grief,(lung) fear,(kidney) overlifting.(kidney) Surgery.(in surgery whole body shocked so root is affected –root=kidney)

Constitutions

Graphites is suited to persons who have a tendency to put on unhealthy fat.(phlegm accumulation) Defective animal heat from defective oxygenation,(anemic so less oxygen in the body so cold) always cold indoors or out. Chlorotics. Affections of glands, skin and mucous membranes, especially at orifices. Syphilitic and "constitutional" ulcers.(damp heat) The patient is usually fat, relaxed, chilly and costive.(damp cold) **Planets:** Saturn, Jupiter.

Modalities

Better in the dark from wrapping up. Better from open air after walking in,(qi increases) hot drinks, especially milk,(hot damp suits) eating,(deficiency pattern) belchings touch.Worse from cold,drafts. light during and after menses,(during-heat period in body so it helps,after menses—fluid in the body diminishes so vacuity heat ,here anemia symptoms not active) motion,(overall qi deficiency) suppression of eruptions of secretions,(not sufficient yang to throw out eruptions) empty swallowing,(qi gets trapped in lung or stomach phlegm increase qi stagnation) fats,(phlegm heat) hot drinks. Worse from warmth of bed, night,(yin time so yin dominated body aggravates) wet feet,(damp feet affects kidney hence water metabolism) scratching.(here it irritates further the stagnant or trapped qi so it aggravates)

Symptoms

MIND

Sad,(heart and lung) fearsome,(kidney) irresolute,(gall bladder) hesitates at trifles.(gall bladder) Feels miserable and unhappy.(lung,heart) Weeps without cause.(lung) Music makes her weep.(heart,lung) Great tendency to start.(liver) Impulse to groan.(kidney) Timid.(gallbladder) Dread of work.(spleen or kidney) Unable to decide.(gall bladder) Fidgety while sitting at work. Apprehensive, despondency(lung) indecision.

Cataleptic conditions, consciousness but without power to move or speak. (heart yang is sufficient but spleen and lung yang is weak) Forgetful, makes mistakes in speaking and writing. Child impudent, teasing, laughing at reprimands. Thinks of nothing, but death. (yin domination so tend to become matter) Remembers all the events of youth, (long term memory ok so heart kidney commn is ok) recent events are forgotten. (heart yang deficient or maybe heart spleen communication problem)) Fatigue from scientific labor. (spleen deficiency to excessive thinking)

Abdomen

Flatulence. (qi stagnation) Cannot bear tight clothes around the waist. (qi stagnation) Abdomen distended, as from incarcerated flatus. (qi stagnation) Nauseous feeling in abdomen. (qi stagnation) Cramp like pain in abdomen (cold in abdomen) with deficient secretion of urine, (vacuity kidney heat) at night. (yin vacuity) Intestinal torpor. Pain as if intestines were torn. Inguinal region sensitive, swollen. (qi stagnation) Pain of gas opposite the side on which he lies. (qi stagnation or wind heat) Very fetid gas preceded by colic. (wind heat colic)

Back

Spinal pains. (yang kidney deficient) Pain in small of back with great weakness. (kidney yang deficient) Pain in the nape of neck and shoulders worse looking up (kidney yang deficient) and stooping the head. Sacral pains with crawling. (kidney yang deficient and wind) Numbness of sacrum, down the legs. (vacuity cold stagnation) Pain in the lumbar region as if vertebrae were broken.

Breasts

Induration of breasts and ovaries. (damp heat) Breasts swollen and hard. (damp heat) Cancer of breasts from old scars, remaining after mammary abscess. (damp heat) Nipples, sore, cracked and blistered. (damp heat)

Chest

Constriction of chest, as if too narrow. (cold stagnation) Feels as if about to suffocate when falling asleep, (suffocating-blood congestion, falling asleep increase yin so yin excess that is dampness cold congestion) jumps out of bed, takes hold of something and must eat something. (yin vacuity) worse after midnight. (yin vacuity) Cramps in the chest. (cold stagnant) Pain in middle of chest with cough, scraping and soreness.

Ears

Moisture and eruptions, (damp heat) fissures in and behind the ear. (stagnated yin vacuity dry heat) Cracking in ears when eating. Hardness of hearing. (damp or phlegm stagnation) Hears better in noise. Tinnitus. (damp blocking in liver or kidney channel) Hissing in the ears. (same as previous) Detonation in ear like report of a gun. Dryness of inner ear. (yin deficient dry heat) Thin, white scaly membrane covering the eardrum. (cold damp) Briny otorrhea. As of hard body behind ear. (cold damp or phlegm stagnation) Feel stuffed at full moon. (yin disturbance at full moon) As if air inside. (qi stuffed) as if filled with water. (dampness stuffed so at full moon dampness and qi stagnation) Snapping after every eructation.

Eyes

Shuns daylight. Photophobia. (liver yin/blood deficient). Ophthalmia with intolerance of artificial light. Eyelids, red and swollen. (spleen damp heat) Eyelids, heavy and falling. (spleen dampness) Blepharitis. Dryness of the lids. (dry yin vacuity heat in spleen) Eczema of lids, (damp heat-eczema) fissured. (damp heat or dry heat or blood

vacuity and heat) Sore or cracked outer canthi.(damp heat) Ingrown lashes. Recurrent keratitis. Eyelids fissured with eczema. Phlyctenae. Hot tears.(damp heat) Cystic tumors on eyelids.(phlegm heat in spleen) Sight vanishes during menses.(during menses no sufficient liver blood available for eyes due to already blood deficiency)Letters appear double, when writing, seem together when reading.

PAGE 731

Face

Pale, bloated, haggard, flushed.(heart qi and blood stagnation) Feels as if cobwebs were on it.(qi/blood stagnation in heart and capillary vessels to face) Acne before the menses.(blood stagnation acne as before menses indicates blood stagnation) Itching pimples.(damp heat pimples and itching) Lips cracked and sore.(spleen damp heat) Moist eczema around the mouth, chin and nose.(damp heat) Barber's Itch. Facial paralysis(spleen/stomach qi vacuity or cold vacuity) with distortion of muscles(blood congealation in capillaries vessls to face muscles) and difficult speech.(lung and stomach yin vacuity paralysis) Formication on lips during menses. Painful nodules on the lower jaw.(phlegm heat in large intestine channel as lower teeths-large intestine channel) Falling of hair from chin. Erysipelas, burning and stinging.(Erysipelas due to Wind-Heat-Fire, Erysipelas due to Gelled Fire in Liver Meridian, Erysipelas due to Dampness-Heat-Fire, Erysipelas due to Heat Poisons at Nutritive Level)

Female

Great aversion to sex.(kidney yang deficient) Menses, late, scanty, pale, irregular, painful.(liver blood deficient and pain may be due to blood stagnation) Swelling and hardness of ovary (left) worse after menses.(damp and kidney vacuity heat or kidney yin deficiency which is worse after menses due to kidney qi/yin deficiency) Induration of ovaries, uterus and breasts.(damp and kidney vacuity heat induration upto breast) Hoarseness,(Wind cold invasion,wind heat invasion,yin vacuity of lung and kidney,qi vacuity of lung and spleen,qi stagnation,blood stasis and phlegm congealation.) coryza,(vacuity heat coryza) cough,(yin vacuity cough) morning sickness (yang rising due to yin vacuity)and sweats,(yin vacuity heat) swelling of feet or headache during menses.(during menses heat rises so swelling of feet due to heat rising and headache due to heat rising)Leucorrhea,pale, thin, profuse, excoriating in gushes(damp heat in lower jiao) with weakness in back(kidney yin/qi deficient), worse before(blood stagnation) and after menses.(qi/yin deficient) Leucorrhea in place of menses.(damp heat leucorrhea) Pain in the uterus when reaching high with arms.(spleen yang deficient as reachinh high with arms activates spleen yang so uterus pain due to spleen yang deficiency) Retro-version of uterus, heaviness in hypogastrium with cutting pain down thighs,(cutting pain-blood stagnation so blood stagnation heaviness and pain) uterus feels coming out through vagina.(spleen and kidney qi deficiency so prolapse) Vagina, dry, hot or cold.(dry heat or dry cold) Eczematous eruptions around the vulva.(damp heat)

Food

Aversion to meat, fish, cooked food,(phlegm foods) salt,(kidney) sweets.(stomach) Sweets nauseate. Hot drinks disagree.(stomach damp heat) Excessive hunger or no appetite,(stomach damp heat so heat excess so hunger and damp excess so no hunger) worse when hungry.(vacuity heat further dries the yin)

Head

Rush of blood to head with flushed face(heart and head blood vacuity so blood rushes to it that is liver qi coursing move to head and face or heart) also with nose bleed(lung heat) and distention and flatulence.(qi stagnation) Headache in morning on waking,(liver yang rising headache) mostly on one side with inclination to vomit.(liver yang attacks stomach so vomit) Headache with nausea during menses.(liver heat headache with nausea of stomach heat attacked by liver) Heavy weight or dull pressure at the occiput.(blood congestion so heavy weight or qi stagnation-dull pressure)as if head is drawn back. Sensation of cobweb on forehead.(qi stagnation in heart-face or stomach)Skin of forehead as if drawn into folds.(qi stagnation-pulling) Brain feels numb.(numb—qi stagnation) Rheumatic pains on one side of head,(one side so either it will be cold or damp rheumatism) extending to teeth and neck.(spreading so heat so wind damp heat rheumatism) Burning on vertex.(liver vacuity heat as vertex—liver channel). Pressive pain or burning spot on vertex.(liver yang rising pain) Humid, itching eruption on hairy scalp,(damp heat) emitting a fetid odor.(heat excess in damp heat) Hair, matted, brittle (kidney yin deficiency) or falling hair(lung yin deficiency), worse vertex and sides.(liver fire attacks lung) Milk crusts. Eczema capitis, scabs sore to touch. Bald spots.(Yin blood vacuity,qi and blood vacuity,wind due to blood heat,blood stasis.)

Heart

As of an electric shock from heart to neck.(heart qi or blood stagnation as small intestine channel goes through neck)Strong pulsations in the whole body.(heart blood stagnation) Palpitation of heart with anxiety with nosebleeds.(blood stagnation so palpitation,nose bleed,anxiety-qi/blood stagnates) Cold feeling in precordium. Pulse slows during day, fast in the morning

Kidneys

Urine, sour smelling, turbid, stream slender.(liver damp heat urine) Pain in sacrum or os coccyx while urinating.(bladder or kidney qi dissipates while urinating so already deficient kidney qi so pain) Stricture of urethra.(liver yin vacuity heat inflammation in urthra so stricture or from less liver blood supply so cold)

Limbs

Burnings, cramps, jerking.(heat,cold,wind or qi stagnation) Burning pressure beneath the arm pit.(heart or lung heat) Arms and legs go to sleep.(blood stagnation or blood qi/deficiency) Hands or feet either hot or cold.(spleen yin deficiency or yang deficiency active) Edema of legs.(spleen deficiency dampness accumulation in lower jiao) Paralyzed feeling in the limbs.(phlegm /blood /qi stagnation in spleen) Nails, brittle and crumbling.(liver dry wind heat) Nails deformed, painful, sore, thick and crippled.(liver wind heat) Nails, thick, rough ingrown.(liver heat) Horny callosities on hands with cracks. Pain in thumb joint as if sprained. Cannot stretch enough.(yang deficiency) Excoriation of thighs while walking.(blood stagnation or damp heat congestion) Cracks and fissures in tips of fingers.(dry heat or damp heat with yin deficiency) Bunions worse fire heat, better pressure. Burning in soles and heels.(kidney yin vacuity heat) Feet cold, wet.(spleen qi deficiency dampness) and Foul excoriating sweat worse evening.(damp heat) Acrid, foot sweat,(kidney yin vacuity heat) chafes the toes. Stiffness and contraction of toes.(kidney vacuity cold and kidney yin deficiency with poor blood supply)

Lungs

Spasmodic asthma,(phlegm/blood stagnation so spasms and asthma) suffocative attacks wakes from sleep,(suffocation—due to blood congestion) must eat something. Dry troublesome cough with sweat on face.(heart heat cough) Lachrymation worse taking deep breath.(kidney yin deficiency so deep breath disturb kidney yang which disturb liver yin already less so lachrymation affects)

Male

Herpetic eruption on organs.(kidney yin vacuity heat) Sexual debility with increased desire.(kidney yin vacuity with liver yang hyperactive) Averse to sex.(kidney yang deficient) Ejaculation too early or failing during sex.(kidney yang deficient) Hydrocele. (kidney yang deficient so water accumulation) Priapism. Lack of sexual enjoyment.(heart yang deficient) Cramps in calves during sex.(kidney vacuity cold stagnation) Impotence from excessive indulgence or masturbation.(kidney yin deficiency)

Mouth

Rotten odor from mouth.(kidney odor) Angles of the mouth ulcerated.(damp heat) Taste, sour like rotten eggs.(sour/rotten so liver/kidney heat) Breath smells like urine.(kidney yang not properly metabolising bladder urine to send up clear water so urine smell) Dots of thick white fur on tongue. Burning blisters on tongue,(damp heat in heart) salivation.(kidney or stomach salivation) Easy bleeding and swelling of the gums. (stomach heat) Sour, foul odor from the mouth.(stomach heat) Blood from teeth,(stomach heat) tastes sour. Salivation, at night.(salivation due to yin deficiency vacuity heat in stomach) Teeth on edge.

PAGE 732

Nose

Eczema of nose.(dap heat in lung/heart) Dryness with loss of smell.(dry vacuity heat with lung yin deficiency) Nosebleed with rush of blood to the head, worse before menses.(due to blood stagnation) Colds at menses.(lung qi dissipation in menses which is already deficient so cold) Smell acute, cannot bear the smell of flowers.(lung qi irritated so smell acute) Stuffed coryza.(cold stagnation/blood or phlegm stagnation coryza) Scabs and fissures in the nostrils.(damp or phlegm heat with heat excess and yin deficient) Sneezing on opening the eyes.(open eyes means liver yang active so liver yang stagnant sneezing) Coryza from cold.(lung cold coryza) Painful internally. Chronic catarrh. (phlegm heat) Sore on blowing it is painful internally.(damp heat) Discharge offensive especially during menses.(lung/liver heat) Excoriated.(type of discharge might be controlled by kidney so excoriating means kidney yin vacuity heat with toxic dampness)

Rectum

Fissures of anus,(dry heat with kidney yin deficient or blood deficient) cutting pain during stool,(blood stagnation) followed by constriction and aching for hours.(vacuity cold and qi/blood stagnation -aching) Fissures bleed and ulcerate.(dry heat so bleed due to excess heat and ulcerate due to damp heat) Constipation, large, difficult, knotty stools united by mucus threads.(phlegm heat in large intestine) Chronic diarrhea.(phlegm heat diarrhea) brownish, liquid, undigested offensive.(spleen/stomach qi deficiency so undigested and damp heat) Stools, large, difficult, slimy coated or loose, brown, lienteric and very foul.(damp heat in large intestine) Lump of stool, conjoined with threads of mucus. .(damp heat in large intestine) Diarrhea from slightest indiscretion in eating. (spleen/stomach qi deficient) Stools with masses of mucus. Stools are slender, pasty. (dampness) Prolapse of rectum.(kidney and spleen qi deficiency) Burning hemorrhoids,

(congestion of blood/phlegm with heat) pain on sitting down or on taking a wide step. Anus and pudenda, smarting, itching, sore, before menses. (blood stasis and wind or damp heat due to itching) Smarting, sore pain in anus on wiping it. (blood stasis) Tapeworms. (qi irritation so wind) Varicose veins of the rectum. (blood congestion in varicose)

Sensations

As if skin of forehead was drawn into folds. (qi stagnation stomach) As if a skin were before ear. As if a hard body as large as an egg were behind ear. (phlegm stagnation) As of a cobweb over the face. (blood/qi stagnation in network channels) As of a lump in stomach with beating as of two hammers. (phlegm/blood congestion, hammer pain may be due to blood congestion) As if intestines were torn, croaking as of a frog in abdomen. As if everything would be torn to pieces during menstruation. (yang rising or excited during menses so tearing pain may be due to excess yang/qi stagnation)

Skin

Eczema. Dry, rough, irritable, that breaks easily and exudes a gluey moisture, (damp heat eczema) worse in folds (qi stagnant areas so damp stagnates) and slow to heal. (dampness blocks healing qi and blood) Old scars ulcerate. (damp heat ulcers) Burning in old scars. (heat lung) Old scars with indurated base and margins with burning. (damp heat)

Eruptions worse from heat. (heat eruptions) Pimples and acne. (phlegm heat or blood stagnation heat) Moist, crusty eruptions, oozing out a sticky exudation. (damp heat eruptions with heat excess so crusts) Rawness in bends of limbs, groins, neck, behind ears. (phlegm heat) Unhealthy Skin, every little injury suppurates. (damp heat) Ulcers discharging a glutinous fluid, thin and sticky. (damp heat) Swelling and induration of the glands. (damp heat in lungs) Gouty nodosities. (phlegm wind heat) Cracks in nipples, mouth, between toes, anus. (vacuity heat with yin deficiency or blood) Phlegmonous erysipelas of face, burning and stinging pain (phlegm wind heat). Swelling of feet. (due to heat or dampness or blood congestion) Wens. Chronic Poison Oak. Wandering or recurrent erysipelas. (wind type or qi stagnant erisepelas)

Sleep

Excessively tired and sleepy. (spleen yang deficiency) Sleeplessness until midnight. Sleepy during day. (sleepy due to heart yang deficiency and not due to liver yang rising as day is yang) Horrible dreams. (liver fire) Does not feel fresh in the morning. (liver blood vacuity so no deep sleep as yang is floating)

Stomach

Pressure in stomach. (qi/blood/phlegm stagnation) Sour or foul belchings. (heat stomach) Burning in stomach, causing hunger. (stomach heat) Better from eating or hot drinks especially milk. (stomach heat is vacuity heat so better eating) Better lying down. (vacuity heat so deficiency pattern) Morning sickness during menses. (yang or heat rising) Vomiting of sour of food. (liver heat attacks stomach) Constrictive pain in Stomach. (stomach vacuity cold so stomach qi deficiency so better hot drink) Recurrent stomach pain with vomiting of food immediately after eating. (recurrent pain—qi stagnation so food vomited immediately) stomach worse by cold. (vacuity cold that is qi deficient) Cancer of pylorus. Vomiting and purging and icy cold sweat with headache. (vacuity heat sweating and headache, vomiting and purging due to qi stagnation)

Temperature

Sweats often on front of the body only. (yin side sweating so vacuity heat sweating) Sweat offensive, sour, stains yellow (vacuity heat forces sweat out) and cold. Entire

inability to sweat. Recurrent periodical fever. (liver qi stagnation and vacuity heat) Chill in the evening (yang closing time so lung yang vacuity so chill) worse eating (yang further dissipates or no yang to digest) better open air (to increase qi) and drinking water. (increase yin) Wants covers in all stages of fever.

Throat

Chronic sore throat. (phlegm/blood stagnation and heat-chronic) Chronic hoarseness with skin disorders. (.(phlegm/blood stagnation and heat-chronic) Tonsils enlarged. (blood/phlegm congestion) Nodulated goiter. (blood/phlegm congestion) Choking, on swallowing from goiter. (blood/phlegm congestion) As of a lump in throat (blood/phlegm congestion) worse empty swallowing (qi gets stagnated), urging to swallow from constant spasms. (blood/phlegm congestion so spasm to make path for qi to swallow) As if food would not go down from spasms. (qi stagnation) Voice lacks control better using it. Hoarseness as soon as he starts singing. (spleen –singing so spleen qi deficiency so damp accumulation in throat) No control on modulation of voice better if continues to talk. (lung phlegm or blood congestion or qi deficiency so no control on voice but using it make path for qi flow)

Vertigo

Vertigo worse looking upwards, reading or sewing. (liver yin deficiency vertigo as all three use eyes which consumes liver blood)

PAGE 733

Comments

Hahnemann was quick to perceive that Graph. Was much more than a mere remedy for skin disorders. Like that other great skin remedy, sulphur, Graph. proved to be a leading anti-psoric. Hahnemann's provings and observations defined its powers over skin disorders.

The skin of Graphites is rough, hard and dry. Eczematous and herpetic eruptions predominate. Eruption on occiput exuding gluey humor, eczema of ear, moist eczema round anus. Pimples, acne. Wens.

Graphites' special characteristic is: "Eruptions oozing out a thick, honey-like fluid." Wherever such eruptions are found Graph. is in all probability the remedy. Clarke cured many cases, notably some occurring on the occiput and behind the ears. It is no less frequently a remedy for the results of repelled eruptions of the kind.

Nash records such a case: A child had been "relieved" of an eczema capitis under old-school treatment, whereupon, entero-colitis set in and became so alarming that it was pronounced "tuberculosis of the bowels."

Nash when called in found the child greatly emaciated with little or no appetite, very restless, passing "stools of brown fluid mixed with undigested substances and of an intolerably fetid odor." Graph. 6,000 c cured promptly.

Irregularities in the distribution of the blood occur, pallor of skin and mucous membranes. The circulation is at first excited, then follows loss of energy and consequent venous hyperemia. Fainting readily occurs with great anxiety, motion is impaired and the tissues relaxed, but paralysis is not complete.

A marked characteristic of Graphites is a rush of blood to head with flushed face.

Clarke cured two very severe cases of nosebleed in elderly people where this symptoms was present. In one case there has been flushing of head and neck for many months

previous to the attack and flushing preceded and accompanied each occurrence of the bleeding.

In the other case the patient said the precursory flush seemed to come up from his toes. He had his nostrils plugged without avail, Graphites in a high potency, cured promptly in both instances.

The Graphites condition is not sensitive and herein it differs from Hep., which, has extreme sensitiveness of affected parts. The tone of mind is sad. There is a very characteristic symptoms in reference to the hearing: "hardness of hearing better when riding in a carriage."

Goullon cured two notable cases of cramps in the stomach with "improvement of the cramps by eating." There was also clean tongue. Milk agree well, especially hot milk. In one case roast meat agreed, but not boiled meat and, still less, potatoes. In the morning there was a fishy taste, disappearing later in the day.

Graphites causes suffocative spells which arouse the patient from sleep, he must jump out of bed, worse after midnight, (Lach., worse after sleep). There is a diarrhea of thin offensive, partly digested stools. Constipation is more common, the stools being in lumps coated with mucus and with mucous shreds.

In the female the breasts are affected. Pain under left breast at menstrual period often waking patient in the night. Hysterical melancholia with occipital headache. Leucorrhea profuse in gushes, excoriating. Scanty menses form a keynote indication when found with other complaints, as headache, skin-affection, etc. Moist itching excoriation around anus and fissures.

The male sexual organs are affected as well as the female: Uncontrollable sexual excitement with violent erections, Priapism. Clarke had frequently seen this condition produced in patients taking Graph. for other things and have frequently relieved priapism with Graph. Impotence.

The senses are abnormally acute: music causes weeping, cannot tolerate the smell of flowers. Weak, exhaustion of whole body. Spasms, contractions of muscles, twitching of eyelids.

PAGE 734

Cataleptic condition. Sensitiveness of internal parts, numbness in various parts, drawing pain in whole body.

Bathing after measles causes paralysis of face. Getting feet wet causes delayed menses. Attacks occur during summer and autumn. Ears feel stuffed at the full moon. Suffering parts emaciated. Overlifting easily. Hemorrhages.

When giving Graph. internally in cases of anal eruption, the external use of an ointment made with a drachm of the 3x trituration to an ounce of Cetacean ointment is of great service. Hirsh or Prague, has also used Graph. locally in cases of disease of the nails with very good results.

Gratiola officinalis

(hedge hyssop)

Pharmacy

Grat. *Gratiola officinalis*. Hedge Hyssop. Herb of Grace. N. O. Scrophulariaceae. Grows in moist places.

Tincture of fresh plant before flowering. Historical dose: Tincture and all potencies, second to third potency.

Herbal

Gratiola "the Herb of Grace" is one of the most important members of the great Scrophularian group: Dig., Euphr., Tab., Scroph. and should be carefully studied with these. Cooper has used it with great success in a case of gouty acidity with great constipation and in the constipation of cancer. He regards it as "the vegetable antacid." It is said to have formed the basis for a once famous nostrum for gout, "Eau M^zdicinale."

Symptoms of a fully developed, rapid attack of Asiatic cholera are produced. A large proportion of the effects of *Gratiola* are expended on the gastro-intestinal tract. It is an inodorous plant of bitter taste and very poisonous, causing violent colic, bloody stools, enteritis, jaundice.

Teste considers *Gratiola* the Cham. of chronic diseases. The diarrhea is yellowish, gushing, watery, as though rushing from a hydrant. There is also vomiting of yellowish fluid. Summer diarrhea from excessive drinking of water whether cold or hot. Soreness, burning or irritation of anus follows the stools.

Teste, saw four cases of nymphomania in females to whom herb doctors had given injections of a decoction of freshly gathered *Gratiola*. Burnett considers it specific in female masturbation and nymphomania. **Planets:** Moon, Venus.

Homeopathic

Though *Gratiola officinalis* acts especially on the gastro-intestinal tract, it has some mental and sexual symptoms also. It especially useful in females. Nux-v. like symptoms in females are often met by *Gratiola*. Chronic catarrhal conditions, leucorrhea and gonorrhoea. Obstinate ulcers.

Indications are: Constant sinking but cannot eat, bitter taste. The affection of the solar plexus is very marked. Cramps beginning at pit of stomach and pains radiating therefrom.

Anxiety, gnawing, empty feeling, rolling about in epigastric region. Urine is diminished, reddish, turbid.

Mental effects from overweening pride. Nervous prostration. Neuralgia due to abuse of coffee. Paralytic pains and feeling of coldness especially in the abdomen are marked symptoms. Cerebral disorders without fever. Trembling in limbs, convulsions, cramps, excitement and disordered condition of the sexual powers.

Clinical

Brain disorders. Cholera. Coccyx, pain. Colic. Constipation. Cramps, Diarrhea. Dropsy. Eye disorders. Gout. Headaches. Hemorrhoids. Hydrocephalus. Hysteria. Mania. Masturbation. Mesenteric glands. Nausea. Neuralgias. Nymphomania. Palpitations. Rheumatic pain. Stomach pains. Tetanus. Vision, disordered.

Causations

Coffee causes neuralgia.

Modalities

Better from open air, rest. Worse from eating, drinking too much water hot or cold. Worse from summer, abuse of coffee, dinner. Worse motion. Worse in warm room.

Symptoms

MIND

Peevishness, ill-humor, irresolute, hysterical. It is useful in mental troubles from overweening pride. Weak will. Ill humor, tired of life, want of perseverance.

Apprehensive about the future. Hysteria. Nymphomania. Hypochondriasis.

Abdomen

Shooting pains in the abdomen. Inflation of the abdomen. Rumbling with nausea, eructation and vertigo. Flatulent and pressive colic with nausea and disagreeable risings. Feeling of coldness in abdomen, lasting half an hour.

Back

Pain in coccyx after stool. Neck as if seized by hands.

Breasts

Darting pain in breasts. Shootings in right breast, worse on rising during menses.

Chest

Heat in the chest, then the head and hands with redness of the face. Pressure on the chest. Shootings in the chest on breathing. Pimples on the chest, which burn after having been scratched.

Eyes

Dry, burn. Myopia. **All objects seem white, even green trees.**

Face

Burning heat and redness of the face. Tingling, burning in malar bones. Sensation of tension in the face, it feels swollen. Swelling of upper lip. Tearing on one side of face. Painful crack in left side of chin.

Female

Irritable condition of sexual organs with congestions. Menses too profuse, premature and too long. Nymphomania. Leucorrhea, persistent. Tendency to masturbation.

Food

Hunger after a meal with feeling of emptiness. Craves nothing but bread. Worse during and after eating, vertigo during and after a meal.

Head

Sick headache. Rush of Blood with vanishing of sight. Tightness in forehead with wrinkles in skin. Sensation as if brain was contracting and head became smaller.

Heart

Palpitations after stools with oppression of the chest. Pulse small intermittent.

Kidneys

Diminished secretion of urine. Scanty and reddish urine, which becomes turbid on standing with cloudy sediment. Burning in the urethra during and after urination.

Limbs

Limb gives way with sciatic pain. Rheumatic pains in the shoulders, arms, fingers, particularly in elbow and wrist-joint. Itching in the palm of the hand.

Lungs

Dry cough, excited by a sensation of roughness in the chest in the morning or at night. Nocturnal cough with pain as from excoriation in trachea, oppression of the chest and shivering.

Male

Painful rigidity of the penis after seminal emission, nightly. Stitches in left spermatic cord, ascending through the abdomen up to the chest. Drawing pain in glans.

Mouth

Nocturnal tearing or piercing in the molars. Sensation of cold in the teeth. Accumulation of much saliva in the mouth. Mouth bitter or clammy. Tongue rough, covered with mucus. Fetid breath in the morning after waking.

PAGE 736

Nose

Frequent sneezing. Stoppage of the nose. Smarting, itching in left nostril. Pressure at upper part of nose.

Rectum

Diarrhea, green, frothy water, followed by anal burning, forcibly evacuated without pain. Summer diarrhea from drinking of excess of water. Hemorrhoids with hypochondriasis. Rectum constricted. Constipation with gouty acidity.

Sensations

As if brain contracted, as if head grew smaller, as if brain would fall forward, as if sand in eyes, as if throat contracted, as if a stone rolling from side to side in stomach.

Skin

Itching with burning after scratching. Running and corrosive eruptions, which resemble scabies.

Sleep

Insomnia.

Stomach

Dyspepsia with much distention of the stomach. Emptiness after eating. Cramps and colic after supper and during night with swelling of abdomen and constipation.

Dysphagia for liquids. As of a cold water or loose heavy load in stomach.

Temperature

Tendency to chilliness. Chilliness in a warm room during sleep after an evacuation with the hair standing on end. Heat ascending to the face with redness and increased external warmth. Constant vaporous exhalation from the body.

Throat

Pressure in throat, as from thick mucus. Accumulation of mucus in throat. Pain in throat obliging one to swallow constantly. Stinging in throat. Tingling, roughness and scraping in throat. Phlegm in throat with inability to throw it off.

Vertigo

Vertigo during and after meals, hunger and feeling of emptiness after meals.

Comments

Two excellent cures with Gratiola have been recorded by C. W. Sonnenschmidt.

(1) Mrs. C., 53, attacked in June with diarrhea, yellow, watery, frothy stools gushing out with force. Severe cutting pains in abdomen, rumbling of flatulence.

Occasional nausea and vomiting. Coloc. and Ip. failed to relieve. Then on close inquiry it was elicited that "a cold feeling in the abdomen" had been a feature throughout. Grat. off. 3c, cured promptly.

(2) A three-weeks' old infant was attacked with diarrhea and colic. There were two or three stools in quick succession and then an interval of an hour or two. Stools, green or yellow watery, frothy, expelled suddenly. Nausea and vomiting.

Severe pain before stools, relieved afterwards, for a short time. Cham., Coloc., and Verat. failed, then Grat. rapidly cured. It also removed in this case "redness around anus and on the side an abrasion of half an inch in extent, which caused some oozing of blood."

E. E. Case cured a woman, age 50 of hemorrhoids with the following symptoms: Constipation, difficult stools. External hemorrhoids from any exertion and after stool. Biting, stinging tension in tumors. During stool, a sensation as if the rectal membrane was torn. After stool, all the nerve of the pelvis seem in a high state of tension, the flesh on the perineum feels as if torn from the bone. Sleepless before midnight, peevish, melancholy. Grat. 200c cured.

The left side is more affected than the right. The head and eye symptoms are of the first importance. Rush of blood to head with vanishing of sight is a keynote. Heat ascending to face with redness and increased external warmth. A number of pains are experienced in the coccyx. Chilly, shuddering on entering a warm room. Constant vaporous emanations from body.

Boericke. Clarke. Phatak.

Grindelia robusta

(rosin-wood)

Pharmacy

Grin. Grindelia robusta. Grindelia squarrosa. Rosin-wood. N. O. Composite. A tincture is made of the leaves and unexpanded flowers. Bundy's proving of G. squarrosa was made with a tincture of the dried plant. Historical dose: Tincture and all potencies, tincture in 1 to 15 drop doses, lower potencies.

Herbal

The Grindelia are a genus of asteroid composites growing on the Pacific coast and inland on the mountains. The terminal heads of yellow flowers and the leaves are usually covered with a viscid balsamic secretion from which they have been called "gum plants."

Following Hering, Clarke has not thought it necessary to separate the two Grindelias which have been used in homeopathy, but, as far as possible. Several species have been used in cases of asthma, bronchitis, Rhus-poisoning and heart and skin disorders.

Gatchell found a lotion of Grindelia robusta tincture, (one part to ten of water) a sovereign application in itching or painful erythematous eruptions. It is also useful for bites and stings of insects. Both Grindelia robusta and Grindelia squarrosa have been used for the symptoms here recorded. There is practically no difference in their action, although the G. Squarrosa is credited with more spleen symptoms. **Planets:** Saturn.

Homeopathic

Grindelia robusta produces paresis of the pneumo-gastric nerve interfering with respiration and producing profuse secretion in bronchial tubes. Dull pains and fullness in left hypochondrium, chronic malaria, gastric pains associated with spleen congestion. Induces paralysis, beginning in limbs.

Its action is shown on the heart first quickening, then retarding it. Acts on the cardio-pulmonary distribution of the pneumo gastric in dry catarrh (Ant-t. in muco-purulent).

Produces a paresis of the pneumo-gastric interfering with respiration. Smothering after falling asleep. Asthmatic conditions, chronic bronchitis. Bronchorrhea with tough mucus, difficult to detach. Raises the blood pressure. Nausea and retching of gastric ulcer. Sugar in urine

An effective antidote to Rhus-poisoning, locally and internally, also for burns, blisters, vaginal catarrh and herpes zoster. Hyperchlorhydria when attended with asthmatic and other neurotic symptoms. Hyperemia of gastric mucous membrane with difficult respiration.

Rattling breathing. Suffocation on falling to sleep or on awakening. Bronchorrhea with tenacious, whitish expectoration. Cannot breathe when lying down. Asthma and emphysema with dilated heart. Cutting sore pain in the region of spleen extending to hips. Spleen enlarged. Cheyne-Stokes respiration.

Clinical

Asthma. Bites. Bronchitis. Cheyne-Stokes breathing. Conjunctivitis. Emphysema.

Erythema. **Eyes**, pains. Glaucoma. Heat disorders. Iritis. Itching. Liver, pain. Pruritus vulvae. Pruritus vagina. Rhus-poisoning. Spleen, pain. Ulcers.

Modalities

Sitting position in bed on account of difficulty of breathing. Worse from falling to sleep, motion in the dark.

Symptoms

Abdomen

Unbearable pain in region of liver and spleen, so severe he cannot lie still a moment. Soreness like that of acute rheumatism.

Eyes

Conjunctiva injected. Pain in eyeballs, running back to brain, worse moving eyes. Pupils dilated. Purulent ophthalmia and iritis. Pain in left eye and right knee-joint like rheumatism. Iritis, traumatic, or arising from cold or a metastasis of rheumatism.

Face

Burning in chin.

PAGE 738

Female

Pruritus of vagina and vulva, whether from leucorrhoea or aphthae or of venous origin.

Head

Terrible fullness in head, as though he had taken ten or more grains of quinine.

Heart

Weak heart and respiration.

Limbs

Legs greatly swollen, especially about ankle-joint. Large ulcers over tibia. Severe pain can hardly get about. Chronic ulceration of leg.

Lungs

Acts on the pulmonary circulation. Wheezing and oppression in bronchitis patients. Asthma with a profuse tenacious expectoration, which relieves. Stops breathing when falling asleep, wakes with a start and gasps for breath. Must sit up to breathe. Cannot breathe when lying down. Whooping cough with profuse mucous secretion. (Cocc.) Rales are disseminated with foamy mucus, very difficult to detach. Bronchorrhoea with tough, whitish, mucous expectoration. Sibilant rales. Cannot breathe lying down. Cheyne-Stokes respiration.

Skin

Bites of insects, flea-bites. Itching and burning. Poison oak, (locally as a wash). Rash like roseola with severe burning and itching. Vesicular and papular eruptions. Herpes zoster. Ulcers with swollen, purplish skin.

Spleen

Cutting pain in region of spleen, extending to hips. Spleen enlarged. (Cean., Card-m.)

Comments

Grindelia is indicated in chronic bronchial asthma and spasmodic bronchial cough, when they are attended with profuse, tenacious expectoration, which gives relief. The breath stops when the patient goes to sleep and awakes with a start, gasping for breath. It is useful in irregular heart action and in hay fever when associated with difficult breathing.

It is used locally and internally as an antidote for Rhus toxicodendron skin rashes. Gatchell recommends external application of a lotion of Grindelia robusta one in ten of water. This he considered as a good remedy for itching and painful erythematous eruptions.

One writer obtained excellent results from "Grindelia" in a number of cases of asthma and emphysema with dilated heart. H. W. Foster reported the cure of a case of asthma with *G. robusta* which shows that Dr. Bundy's proving of *G. squarrosa* is good for both remedies.

Dr. Foster's patient was awakened by asthmatic attacks, the room seeming too small. After getting quiet, just as he would commence to lose himself in sleep he would suddenly awaken again because he seemed to have forgotten to breathe. *Grindelia* 30c relieved at once. It removed aversion to darkness in one patient, who wanted a light in the room all night. Symptoms are worse by movement, worse in the dark, worse on falling asleep.

The only proving is by Dr. T. H. Bundy, who took a teaspoonful of a tincture of the dried plant of *G. squarrosa* and in half an hour followed it by another with the result that he produced some intensely severe pains in head and eyes (left then right) and symptoms in liver, spleen, nervous system and lungs and altogether passed "the most terrible night of his life."

The proving is remarkable for the number of peculiar symptoms induced. First there was "fullness in head as after a heavy dose of quinine." Then intense pain in left eye and right knee-joint exactly like acute rheumatism. The knee pain lasted only half an hour and then the third teaspoonful was taken.

The eye-pain became most agonizing, the pupil became widely dilated. It was two hours before the right eye became affected and then the misery was doubled. At this time unbearable pain in whole of liver and spleen came on.

PAGE 739

So severe, it was impossible to lie still a movement with intense soreness of the region like that of acute rheumatism.

The eye pains were in the balls of the eyes running directly back into brain, much worse by movement.

There was a kind of paralysis of the vagus nerve. On falling asleep the respiratory movement would cease and would not be resumed until he waked up from the resulting suffocation.

In the clinical experiences recorded it is the *Grindelia robusta* which is chiefly mentioned, though sometimes it is not specified which.

Guaco

(climbing hemp weed)

Pharmacy

Gua. Guaco. Mikania guaco. Climbing Hemp Weed. N. O. Composite. Tropical America. Tincture or decoction of leaves. Historical dose: Tincture and all potencies, third to sixth potency.

Herbal

Mikania guaco is a climbing composite of Tropical America. Guaco has a local repute as a remedy for the bites of serpents, for hydrophobia, cholera and cancer. In the homeopathic provings rice-water stools occurred and difficulty of swallowing as in hydrophobia.

One proving also showed an action on the bladder and urinary organs, producing excess of phosphates.

A lady who took a decoction for four moths steadily, was obliged to discontinue because it produced:

Copious, corrosive, putrid leucorrhoea, causing great debility, tanning the inside of the thighs and staining linen yellow.

She felt as if fire was running out of her. Terrible itching and smarting. Another prover had severe spinal and occipital pains, paresis of tongue and difficult deglutition. Burning and tearing in soles. Pain as if beaten. Pains extend to other parts, mostly from above downwards. **Planets:** Mars.

Homeopathic

Guaco acts on nervous system and female organs. Bulbar paralysis. Syphilis. Deafness tongue heavy and difficult to move. Spinal irritation. Spinal symptoms most marked and verified. Beer drinkers threatened with strokes. Diarrhea and dysentery with aching in sacrum and loins. Cholera. Cancer.

Clinical

Bulbar paralysis. Cancer. Cholera. Deafness. Diarrhea. Hydrophobia. Leucorrhoea. Paralysis. Phosphaturia. Rheumatism. Spine disorders. Strokes. Tongue, paralysis.

Causations

Antidote to bites of scorpions and snakes, (Golondrina).

Modalities

Worse from motion, bending. Worse at night.

Symptoms

Abdomen

Pain and rumbling in bowels followed by watery stools.

Back

Pain between scapulae, extending to forearm. Burning in nape of shoulders. Pain along spine, worse bending. Weariness through hips and lumbar region.

Ears

Deafness.

Female

Leucorrhoea copious, corroding, putrid, debilitating. Itching and smarting at night, as if fire were running out of parts.

Head

Headache, red face. Heaviness and difficulty in moving tongue.

Kidneys

Unusual flow of urine with excess of phosphates, pain over region of bladder and weight and weariness through hips and loins.

Limbs

Pain in deltoid, shoulders, elbows, arms and fingers. Pain about hip-joint. Legs heavy. Pain in ankle-joints and soles. Paralysis of lower Limbs.

Mouth

Tongue heavy, difficult to move.

Throat

Larynx and trachea constricted, difficult deglutition.

Guajacum officinale

(resin of lignum vite)

Pharmacy

Guai. (Guaj.) Guaiacum officinale. Resin of Lignum Vitae. Gum guaiacum. N. O. Zygophyllaceae. The gum-resin of Lignum sanctum or Lignum vite, a large tree growing in W. Indies. Tincture of the gum-resin. Historical dose: Tincture and all potencies, tincture to sixth potency.

History

Guaiacum, which is one of Hahnemann's anti-psorics is best known as a remedy in gout and rheumatism and as a diuretic, but latterly it has also taken a place in old-school therapeutics as a remedy for tuberculosis.

Guaiacum was first recommended by Brinton in the Lancet in 1857 for quinsy, was given in full doses and produced a crisis of sweat and profuse urination. Ozanam gave it in the 1c, 2c and 3c dilutions and found that he got the curative effects without crisis, which was an unnecessary effect of the drug. Guai., says Ozanam, seems to combine the properties of Bell., Apis and Bar-c.

Homeopathic provings have developed and defined the sphere of its utility in all these respects and many more. It acts on mucous membranes, muscles, joints and bones and causes contraction of tendons with resulting deformity. Gouty nodosities on joints.

Verwey treated a woman, who for several years had a frequently recurring gouty inflammation of the knees. After Chin. 30c had failed to relieve, Guai. 30c was given without obvious benefit. Guai. 1c was then given and after a few hours the swelling broke and the pains quickly subsided.

A short time after, the same patient accidentally injured the same knee. Under Guai. 1c the swelling soon broke and the pain was relieved. But an abscess formed at the same time on the upper thigh.

The pain became unbearable and the patient's husband "begged for more of the drops that had twice before made the swelling break." It was again given and in six hours the abscess evacuated.

On two later occasions Dr. Verwey saw Guai. act in the same way on scrofulous and gouty abscesses. This is probably analogous to its action in quinsy. **Planets:** Saturn.

Homeopathic

Guai. chief action is on fibrous tissue. It is especially adapted to the arthritic diathesis, rheumatism and tonsillitis. Guai. is very valuable in acute rheumatism. Sensitiveness and aggravation from local heat. Secondary syphilis. Contraction of limbs, stiffness and immobility. Feeling that he must stretch.

Tonsillitis with rheumatism. Muscles seem too short or feel sore. Short tendons. Unclean odor from whole body. Promotes suppuration of abscesses. Free foul, secretions, expectoration, sweat, etc. Hastens suppuration in abscesses. Burning heat in affected part. Muscles and tendons are contracted resulting in painful, rigidity and swelling of the joints. Gnawing or sticking pains in chest.

There is a desire for apples which helps the gastric symptoms and aversion to milk and food generally. Contractions between scapulae, palms etc., causing distortions and immobility. Growing pains. Nodes. Clothes feel damp. Pains often end in stitch especially head. Bones become spongy or suppurate. Progressive emaciation.

PAGE 741

Feeling that he must yawn, stretch with uneasy feeling in the whole body. Exostosis.

Clinical

Abscess. Amenorrhea. Aneurysm. Bones disorders. Bronchitis. Decay. Cholera infantum. Constipation. Contraction. Cough. Diarrhea. Diphtheria. Dysmenorrhea. Earache. Emaciation. Fever. Gout. Growing-pains. Headache. Hernia. Membranous dysmenorrhea. Mercury, effects. Neuralgia. Osteomalacia. Otitis. Ovaries inflammation. Pleurisy. Rheumatism. Sciatica. Stomach disorders. Syphilis. Throat disorders. Tonsillitis. Toothaches. Torticollis. Tuberculosis. Vomiting.

Modalities

Better external pressure, apples, yawning and stretching from cold, locally. Worse from heat, touch, motion, exertion, rapid growth, mercury, puberty. Worse from cold, wet weather from 6 p.m. to 4 a.m.

Symptoms

MIND

The mental state is one of weakness: weak memory and disinclination to labor. Sad and depressed. Forgetful, thoughtless, staring. Forgetful especially for names. Slow to comprehend. Strong desire to criticize and despise everything. Indolent, obstinate, fretful.

Abdomen

Distention, flatulent. Intestinal fermentation. Much wind in bowels. Sensation of constriction or stoppage in epigastrium, causing cough, dyspnea.

Back

Pain from head to neck. Aching in nape. Stiff Neck and sore shoulders. Stitches between scapulae to occiput. Contractive pain between scapulae. One-sided stiffness of back from neck to sacrum.

Breasts

Cold crawling over breasts. Shuddering in breasts with goosebumps.

Chest

Pleuritic stitches. Chest pains in articulations of ribs with shortness of breathing until expectoration sets in. Pain in the chest while riding in the open air, better pressure and walking, worse sitting and standing.

Ears

Aching in left ear.

Eyes

Eyeballs seem too big to be covered by the eyelids. Hard pimples around the eyes. Exophthalmos. Pupils dilated. Eyelids appear too short. Pimples around eyes.

Face

Neuralgia of the left side of the face daily from 6 p.m. to 4 a.m. Face like an old person.

Female

Ovaritis in the rheumatism with irregular menstruation and dysmenorrhea and irritable bladder.

Food

Aversion to milk to all food, could not eat anything. Desire from apples and other fruits. Desire for apples, which relieves the gastric symptoms.

Head

Gouty and rheumatic pain in Head and Face, extending to Neck. Tearing pain in skull, worse cold, wet weather. Head feels swollen and blood-vessels distended. Pains often end in a stitch, especially in head. Brain feels loose. Headache better walking, pressure, worse sitting, standing.

Kidneys

Continuous urging even after urination. Sharp stitches while or after urination. Constant desire.

Limbs

Arthritis deformans. Rheumatic pain in shoulders, arms and hands. Growing pains. (Calc-p.) Pricking in buttocks, as if sitting on needles. Sciatica and lumbago. Gouty tearing with contractions. Immovable stiffness. Ankle pain extending up the leg, causing lameness. Joints swollen, painful and intolerant of pressure, can bear no heat. Stinging pain in the limbs. Arthritic lancinations followed by contraction of limbs. A feeling of heat in the affected limbs. Hamstrings short.

Lungs

Feels suffocated. Dry, tight cough. Fetid breath after coughing. Pleuritic stitches worse deep breathing. Recurrent pleurisy. Stitching in apex of (left) lung. Tuberculosis.

Male

Seminal emissions without dreams. Discharge from urethra.

Mouth

Tongue furred.

Rectum

Cholera infantum, face like an old person, emaciation. Diarrhea.

Sleep

Yawns and stretches for relief of general ill feeling. Frequent waking from sleep, as if from falling.

Stomach

Thick white fur on tongue. Burning in stomach. Vomits a mass of watery mucus, then exhaustion. Stomach disorders return in summer. Constricted epigastric region.

PAGE 742

Temperature

Sweat profuse on single parts, face etc. Night sweats. Fever with chill in the evening. Burning of body. Hot palms. Burning fever with hot face and dry cough.

Throat

Dry, burning, swollen, stitches toward ear. Acute tonsillitis. Syphilitic sore throat. Dry, burning, painful to touch, acute tonsillitis. Sharp stitches towards the ear on swallowing, cannot swallow without a drink, recurrent tonsillitis, then rheumatism. Rheumatic sore throat with weak throat muscles.

Comments

In cases indicating Guai. the affected parts are very sensitive to touch and there is worse from heat. Rheumatism in syphilitic and mercurial patients.

Acute tonsillitis, simple or rheumatic. Syphilitic sore throat. "Burning in the throat" is the keynote symptom of most cases of sore throat. It has the erythematous or inflammatory angina with bright redness of Bell., the edema of Apis and the phlegmon with tendency to suppuration of tonsils of Bar-c. and Apis.

The growing pain of children are relieved by it. The secretions of Guaiac. are very offensive. Burning sensations in mouth, throat and stomach, stitches in chest going from front to back or from below upward in region of apex, worse from motion and from deep inspiration: "Sharp pain about mid-day under right breast to shoulder" was removed in a case of mine by Guaiac.

Sharp stitches in brain. Sensation as if the brain were loose. Neuralgia of left side of head and face, extending to neck. External headache with sensation as if blood-vessels were over-filled, extending to face and neck. Tearing pains in skull.

Swelling and sensation of swelling in eyes and nose. **Eyes** feel protruded.

Houghton cured with Guaiac. 3x a case of gouty inflammation of the meatus of the ear and tympanum after failure with Ferr-p. Concomitant rheumatic lameness and soreness led him to Guaiac.

Heat, swelling and blotchiness of face. Prosopalgia every day from 6 p.m. to 4 a.m. Toothache when biting jaws together. "Violent hunger afternoon and evening" shows its relation to the "sinking" sensations of Sulphur and the anti-psorics.

Flatulence is marked. There is nausea from sensation of phlegm in throat. "Every morning vomits a mass of watery phlegm with great exertion, followed by great exhaustion."

There is morning diarrhea with skin dry and chilliness. In cholera infantum the face is like that of an old person. In constipation the stool is hard, dry, crumbling and very offensive.

Some marked symptoms appear in the urinary organs: Continuous urging even after urination with profuse fetid urine. Stitches in neck of bladder after ineffectual pressure to urinate. Cutting while urinating. Chilly crawls over breasts.

There are many symptoms in the respiratory sphere. Violent, spasmodic inflammatory disorders of windpipe and larynx with palpitation preventing motion or calling for help, feels suffocating. Cough dry or with copious bloody or purulent expectoration of very offensive odor.

Contractive pain between scapula. Chilliness in back. Yawning and stretching better general ill-feeling. The least motion worse. After a cold, has violent pains in limbs. Clothes feel damp. On walking in open air has perspiration on head. Cannot bear heat with pains in limbs. Periodicity is marked. Stomach illness returns every summer.

Guarana

(brazilian coca)

Pharmacy

Guar. Guarana. Paullinia sorbilis. Brazilian Coca. N. O. Sapindaceae. Alcoholic solution of dried paste made from seeds. Historical dose: Tincture and all potencies, fifteen to sixty grains of the powder.

Herbal

Guarana is a climbing shrub of Brazil, the seeds of which contain caffeine and are used by the natives for making a stimulating beverage. **Planets:** Mercury.

Homeopathic

Guarana's is used in conditions of nervous exhaustion, sick headache in those who have abused tea and coffee. The headache being followed by vomiting and excited by any error in diet or depression of mind.

Throbbing, congestive headache after excessive use of liquor. Persistent twitching of eyelids is one of its indications. Diarrhea. The large percentage of Caffeine may explain its uses as a remedy for certain forms of sick headache.

Restlessness, nervousness, weariness. Neuralgia. Reduced vital powers, grief, depression of spirits, loss of appetite. Debility after prostrating diseases. Paralysis. Chlorosis.

Clinical

Alcohol. Cholera infantum. Coffee. Diarrhea. Eyelids, twitching. Headache. Insomnia. Spasms. Urticaria. Tuberculosis.

Causations

Ill effects of alcohol or coffee.

Symptoms

MIND

Intellectual excitement. Mental hyperesthesia. Excitement, and extravagant behavior. Grief. Depression of spirits.

Bladder

Spasm of bladder.

Eyes

Persistent twitching of eyelids.

Head

Sick headache in persons who have used tea and coffee in excess. Throbbing, congestive headache after excessive use of alcohol.

Rectum

Cholera infantum. Stools profuse, bloody, bright green, flakes intermixed, odorless.

Diarrhea of tuberculosis. Profuse, green, odorless mucous stools.

Skin

Chloasma on temples and arms. Urticaria. (Dulc., Apis, Chloral.). Prurigo.

Sleep

Uncontrollable sleepiness and heaviness of head with flushed face after eating.

Compare

(1) Agar. - Twitching of eyelids.

(2) Ign., Nux-v.

(3) in sick headache, Coff., Coca., Thea.

Guarea trichiloides

(ballwood)

Pharmacy

Guare. Guarea trichiloides. Ballwood. Red-wood. N. O. Meliacee. Tincture and trituration of bark. Historical dose: Tincture and all potencies.

Herbal

Petroz is the authority for this remedy, which produces a number of symptoms in the eyes and cases of chemosis and pterygium have been reported cured with it. R. K. Ghosh cured a number of cases of both. He found a lotion of Guarea tincture of great assistance.

Planets: Sun.

Homeopathic

Eye symptoms have been verified. Chemosis and pterygium have been cured with it.

Lupus of an ochre-red color. The eye symptoms alternate with diminished hearing.

A number of symptoms were experienced in the umbilicus and inguinal rings. Flow of blood between menses.

On the skin there were liver-spots and an eruption with burning vesicles. Aromatic-smelling sweat.

PAGE 744

Sensations of constriction are common. Sudden shocks of whole body. Bruised pains. Sweat when eating or after.

Steatoma, hot swelling, swelling of affected parts. Suppuration of glands. Pains in periosteum. In the head there is a sensation as if the brain were falling forward and a sensation as of a blow on the head leaving numbness and diminished thinking power.

Clinical

Asthma. Bones disorders. Chemosis. Dysphagia. **Eyes** disorders. Hernia. Intermittent fever. Liver-spots. Lupus. Pterygium. Ptosis. Strokes. Tongue disorders. Tonsils, swollen. Vertigo. Whooping cough.

Modalities

Better hot drinks and wrapping warmly. Acids and cold water aggravates. Bone pains worse at night. Sleepy in open air.

Symptoms

MIND

Anxiety. Fear of losing reason.

Abdomen

Hardness at umbilicus. Abdomen distended with lancination in groins and inguinal ring. Bruised pain externally.

Chest

Sensation of hollowness and dilatation of chest.

Ears

Swelling of periosteum behind ears. Sensation in ears as of a peg of a worm, pushing-out feeling. Roaring in ears.

Eyes

Conjunctiva inflamed, swollen. Tearing pain in eyeballs, tension, forced-out feeling. Objects appear gray, upside down. Eye symptoms alternate with diminished hearing.

Face

Suppurating swellings on face. Swelling of upper lip.

Female

Labor pains suppressed. Lochia is scanty. Leucorrhoea after menses, fetid. Flow of blood between menstrual periods. Itching of pudenda.

Food

Canine hunger in evening, speedy satiety. Aversion to milk, fish and hot, greasy, cooked food.

Head

Sensation as if brain were falling forwards, as from a blow on head.

Limbs

Jactitation of limbs. Cracking in joints. Nightly pains in bones. Bruised pain in bones.

Caries.

Lungs

Cough with sweat, pain and tightness of chest, larynx irritated. Cough dry barking, violent deep-seated. Breathing, sobbing, difficult during chill. Respiratory symptoms worse from putting hand to throat.

Mouth

Mouth smells of cheese. Taste, sweet. Food tastes insipid.

Nose

Coryza with hardened secretion with heat. Nose stuffed ineffectual desire to sneeze, constriction at root of nose.

Rectum

Constriction of anus and rectum. Urging to stool. Constipation.

Skin

Yellow spots on temples. Liver-spots on arms. Eruptions behind ears. Herpes. Itching. Lupus of ochre-red color.

Sleep

Sleepy in open air. Dreams, anxious, melancholy, full of strife.

Stomach

Sour belchings with tension and pressure at stomach. Inclination to vomit during fever. Vomiting, sour, green. Constriction in stomach, bruised.

Temperature

Coldness followed by heat with sweat. Heat of upper part of body, coldness of bones. Sweat chiefly during and after eating. Sweat aromatic.

Throat

Tonsils swollen. Esophagus has raw pain, sensation of contraction and burning heat. Swallowing difficult.

Tongue

Tongue coated during the fever. Tongue coated grayish yellow, swollen, paralyzed, bleeding. Tongue feels cold and dry. Lancinations in tongue.

Compare

(1) Bov. - flow of blood between menses.

(2) Crot-h. - as if had a blow on the head. Anac. - peg in ear. Gels - vertigo, ptosis. Aza., Apis - chemosis, asthma millari. Arn. - injuries. Phos. - steatoma. Ign. - nerves. Merc. and Sil. - Bone-pains, suppuration.

Guatteria gaumeri

Pharmacy

Guat. *Guatteria gaumeria*. Anonaceae family. Tincture from the dried bark of the plant, which is a tree belonging to the Anonaceae family. Grows in Central and Southern America. Historical dose: Tincture and all potencies, 3x to 30c.

History

Described in 1790 by J. B. Guatteria and in 1906 by G. F. Gaumer. The symptomatology was established by Castro on seventeen adults of both sexes, using 3x and 6x in 1944.

These are grounds for thinking that *Guatteria gaumeria* will take one of the first places among the homeotherapeutic remedies for liver conditions, alongside the new remedy, Chlorpromazine.

Homeopathic

Guatteria gaumeria is a remedy which acts on the liver and gallbladder, the kidney and pancreas. Digestive complaints with liver and biliary manifestation. Predominantly on the right side: Lungs, scapulae, shoulders, kidneys.

Clinical

Anorexia. Belching. Jaundice. Gallbladder, disorders. Gallstones. Hematuria. Hepatitis. Leucorrhoea. Liver, disorders. Pneumonia.

Constitutions

Allergic, psoric or sycotic types constitutions. **Planets:** Jupiter, Venus.

Modalities

Better from rest. Better from food, if administered in small, repeated quantities. Worse in a warm room. Worse from movement. Worse after meals. Worse on right side.

Symptoms

MIND

Irresolute, has a weak memory, sad. Obsessional ideas.

Abdomen

Epigastric pain, spreading towards the right hypochondrium, the right kidney and the base of the right lung. Abdominal distention, ameliorated by belching.

Eyes

Conjunctival jaundice with photophobia, myosis and itching, ameliorated by rubbing.

Female

Excoriating white leucorrhoeal discharge.

Food

Extreme thirst. Anorexia, nausea, aggravated by hot foods. Aggravated by condiments and sweets.

Head

Occipital, pain aggravated in a warm room and by lying down. Frontal pulsating headache.

Heart

Palpitations and tachycardia, worse after eating.

Kidneys

Hematuria, urine thick with muddy deposits of calcium oxalate. Urinary density increased. Urinary urea diminished.

Limbs

Pain and joint aching, especially of the fingers, knees and shoulders, predominantly on the right with stiffness.

Liver

Congestion of the liver. Liver deficiency. Jaundice from hepatitis or gallstones. Gallstones. Inflammation of the gallbladder.

Lungs

Lung infections on the right side, bronchitis. Viral pneumonia. Dry cough with blockage in the base of the right lung, linked with congestion of the liver, aggravated by lying on the right side. The cough is painful and accompanied by palpitations and tachycardia, worse after eating.

Mouth

Tongue dirty, yellow, furred, especially at the root. Breath bad, mouth tastes bitter. Excessive, thick salivation.

Rectum

Diarrhea with cramping colic or constipation, followed by burning and tenesmus after stools passed. Stools bright green or bright yellow, hard or liquid, mucous with a nauseating odor.

Skin

Skin dirty, especially on the face, discolored, pigmented with brown spots on the forehead and cheeks. Brownish stains on the arms and backs of the hands. Perspiration stains underwear yellow. Eruptions with itching, yellowness, aggravated by eating, ameliorated by prolonged rest. Vesicular tension disorders.

Stomach

Acrid dyspepsia. Bilious yellow and green vomiting, aggravated by hot food. Aggravation from movement. Burning in the esophagus and stomach, aggravated by condiments and sweets.

Vertigo

Vertigo with headaches, heavy head.

PAGE 746

Compare

(1) Chel. - Same side and located on the right, stools golden yellow.

(2) Chin. - Extreme abdominal distentions, aggravation from loss of fluids, diarrhea.

(3) Lyc. - Melancholy, irritable, dyspepsia, hepatic disorders, aggravated from 4 p.m. to 8 p.m.

(4) Lac-c. - Perspiration stains the underwear yellow, symptoms move from right to left.

SOURCES

Julian.

Gunpowder

(black gunpowder)

Pharmacy

Gunp. Gunpowder. Carbon-Sulphur-Kali-Nitricum. Black Gunpowder. Historical dose: Trituration and all potencies,

History

Dr. Clarke, refers to the old fashioned gunpowder that was in use before the era of high explosives and smokeless powder. Blood poisoning," is a keynote of the first order. The Norfolk shepherds who rub gunpowder on the wounds of sheep made in sheep-shearing and who take it to cure or prevent ill effects from handling sheep suffering from "foot-rot," were guided by a sure inspiration.

Black Gunpowder is a mixture and not a chemical compound. But for all that, it is a unit and can be used as such in medicine. As it contains three potent remedies, two of them polycrests, there is little wonder at its medicinal powers.

Gunpowder is for wounds that refuse to heal or accidents from bad food or bad water. Gonorrhoea and syphilis. Gunpowder is a very good homeopathic remedy for acute infections, boils, abscesses and bites. An anti-septic for bites and gunshot wounds. Blood disorders in general.

Nitre with sulphur and charcoal forms gunpowder. A teaspoonful of this in hot water was a favorite remedy for gonorrhoea among the soldiers in the days when black powder was used. In the lower triturations gunpowder has cured ascarides in adults.

The London Police Force also know it as a boil remedy. "Get six-penny worth of gunpowder from an oil store and take as much as would lie on a sixpence night and morning for four days and then leave it off for the same time and resume if necessary" is one prescription which has reached me for recurrent boils from the "Force."

Canon Roland Upcher has related the experiences of Norfolk and Suffolk shepherds, who sprinkle gunpowder on their bread and cheese to cure and prevent infection when handling sheep affected with "rot."

Canon Upcher has recently published cases of skin eruption mistaken for scabies by medical men, but actually produced by handling ivy and quickly cured with Gunp. 3x.

Planets: Mars, Saturn.

Homeopathic

Gunpowder has abscesses, boils and carbuncles. Blood-poisoning. Septic suppurations. Blood-poisoning from pyorrhoea alveolaris, under its curative sphere. Protective against wound infection. Osteomyelitis. Antidote to Ivy and Primula rash. Herpes facialis, crops of boils. Carbuncles. Gonorrhoea.

In some country districts a decoction of gunpowder is given to children for worms, lumbrici chiefly and with much success. In some experiments made by Clarke with Gunpowder 2x, severe herpes facialis involving right eyebrow and right side of nose was developed.

Clinical

Abscesses. Acne. Bites. Blood-poisoning. Boils. Carbuncles. Cuts, poisoned. Gunshot. Herpes. Ivy (Hedera) poisoning. Osteomyelitis. Tonsillitis. Vaccinosis. Worms. Wounds.

Causations

Bites. Blood-poisoning. Gonorrhoea. Herpes zoster. Vaccinations. Worms. Wounds.

Comments

Gunpowder was published first in the Homeopathic World, London in 1914 by Clarke. The value of gunpowder as a remedy for all kinds of blood-poisoning, and as sepsis from septic wounds, ptomaine poisoning, poisoning from meats that have been unsuccessfully tinned.

PAGE 747

Also various kinds of preventative inoculations, are likely to be rife among our soldiers, it is well that they should have the benefit of a remedy as potent as it is appropriate.

Clarke has confirmed the proving by curing shingles with Gunpowder. He heard of a case of lumbrici cured with an infusion of Gunpowder told by the patient, which happened some sixty years ago.

(1) A lady who had a very sensitive skin, was bitten by a gnat on the foot, resulting in swelling inflammation and suppuration. There was a ring of inflammation round the bite, constantly spreading and detaching the epidermis as it spread. After the failure of several remedies, Gunpowder 3x rapidly cured.

(2) A gentleman had a bad cut with a knife on the left index finger. The wound refused to heal. An inflammatory ring stripped off the epidermis and spread more and more. Lachesis and other remedies failed to make any impression. Gunpowder 3x rapidly cured.

(3) A lady was very severely poisoned by sewer-gas. There followed swelling of the right arm and axillary glands of the right side. When she consulted me, three months after the accident the right arm was almost fixed at the elbow-joint with swelling. It threatened suppuration above and below. The axillary glands were as large as a hen's egg.

Gunpowder 3x gradually resolved the trouble and though the cure was interrupted by an attack of measles, the motility of the arm was fully restored.

Canon Upcher finds that occasional doses of Hepar highly increase its effects.

Gymnema sylvestre

Pharmacy

Gymne. *Gymnema sylvestre*. N. O. Asclepiadaceae. Tincture of leaves. Historical dose: Tincture and all potencies.

History

This plant, which grows in the Deccan peninsula, Assam and some parts of Africa is woody climber with long, slender branches. The powdered root has a reputation among the natives as a remedy for snake-bite.

Gymnema sylvestre, a single symptom observed from chewing one or two leaves, which had a bitter, astringent and slightly acid taste. Immediately after chewing them the sense of taste for sugar was lost and also the taste for bitters, the effect lasting some hours.

Everything else could be tasted, as the ginger in gingerbread but not the sweet. Quinine tasted like chalk. **Planets:** Mars.

Homeopathic

Gymnema sylvestre will abolish the taste of bitter things, sense of taste altered, powdered root for snake-bite. Sore throat, dark livid redness of fauces and erysipelalous swelling of face are most marked. Headache, throbbing in forehead and temples and over eyes with bluish-white coating of Tongue. Burning in eyes. Desire for heat and quiet.

Clinical

Hives. Snake-bite. Taste, altered.

SOURCES

Boericke. Clarke.

Gymnocladus canadensis

(american coffee-tree)

Pharmacy

Gymno. Gymnocladus canadensis. American Coffee-tree. Chicot. N. O. Leguminose. Tincture of fresh pulp of the pods. Historical dose: Tincture and all potencies, lower potencies.

History

Epidemic fevers of typhoid character have been cured by it. The most peculiar symptom of the Gymnocl. proving is a bluish-white coating of the tongue.

Guided by this symptom, C. T. Bingham cured a man of headache following influenza "a constant severe pain in front part of head, especially under eye-brows and upper part of nose."

PAGE 748

It had lasted over two weeks, never ceasing and at times intolerable. Bones of eye-sockets sore to touch. Tongue was covered all over with bluish-white coat, does not enjoy food is very weak. Gym. 2x cured. **Planets:** Mercury.

Homeopathic

Gymnocladus causes numbness and blueness especially of the tongue. Sore throat, dark livid redness of fauces and erysipelalous swelling of face are most marked. Hives. Desire for heat and quiet. Headache, throbbing in forehead and temples and over eyes with bluish-white coating of Tongue. Burning in eyes.

Full, tight headache appears in the proving with sensation as if the eyes were pushed forward. The fullness takes actual shape in "erysipelalous swelling of face and head, hot face, it feels swollen is compelled to rub the eyes." Full sensations and burning pains are very common.

Clinical

Erysipelas. Fever. Headache. Spleen, pain in. Throat, sore. Tongue, blue. Toothache. Whitlow.

Modalities

Better from rest, leaning against something. Better from rubbing eyes. Worse from cold, walking. Aversion to motion, easily fatigued. Walking aggravates. Worse from cold, cold drinks and cold drafts.

Symptoms

MIND

Forgets everything. Slow grasp, cannot think, comprehend or study.

Abdomen

Pain in left side as if spleen were swollen. Soreness and tenderness of abdomen. Stitches in bowels and umbilical region.

Bladder

Pressure on bladder and frequent desire to urinate, urine passed in small stream.

Chest

Pressure on chest and sternum.

Eyes

As if were pushed forward, wants to rub them. Pain under brows into the nose.

Face

Crawling as of flies over the face. Erysipelatous swelling.

Head

Tight feeling, as if bound.

Limbs

Violent pain in left forearm in radius, as if bones were crushed and broken. Pulsation in left index finger as if paronychia were forming.

Male

Itching of gland and prepuce

Mouth

Great sensibility of teeth. Teeth sensitive to cold air. Toothache from slightest cold air or drink.

Lungs

Tickling with dry hard, racking cough. Tickling in throat in morning causing cough increasing through day.

Stomach

Hot, sour belchings. Burning spot in stomach.

Stool

Constipation with ineffectual desire. Aching fullness in rectum after stool.

Throat

Sore throat, dark livid redness of fauces and tonsils. Smarting in larynx. Sore, dark livid redness of fauces and tonsils. Sticking pain. Mucus in throat and hawking.

Tongue

Bluish, white Tongue.

Comments

There are a number of fever symptoms Desire for heat, wants to be near the fire. Cold chills and pains in bowels. Perspiration in axillary regions and palms. Violent pain in left forearm as if the bones were crushed. Toothache from slightest cold air or drink.

PAGE 749

Haematoxylon campechianum

(logwood tree)

Pharmacy

Haem. Haematoxylum campechianum. Logwood tree. N. O. Leguminose. Central America. Tincture of the heart-wood. Historical dose: Tincture and all potencies, third potency.

History

Logwood is the well-known dye of commerce. The tincture was proved by Jouve in 1939 and some very distinctive symptoms were produced. **Planets:** Sun.

Homeopathic

General uneasiness with anxiety arising from the stomach and colic. Constriction appears in many parts, culminating in the stomach and abdomen. There is much general sensitiveness. Painful sensibility of the limbs with lassitude.

In colic the chest symptoms are very like many cases of angina pectoris. Sensation as if a bar lay across Chest. Weak digestion accompanies and complicates most other conditions. Chilliness predominates, but the symptoms are better in open air.

Clinical

Angina Pectoris. Colic. Diarrhea. Dysmenorrhea. **Eyes**, disorders. Headache. Indigestion. Ptosis. Throat, sore.

Modalities

Worse at night, on stooping. Worse by pressure, by touch.

Symptoms

MIND

Ill-humor, sadness, melancholy, vexation. Inclination to repose, desire to weep. Difficulty when reflecting and expressing one's ideas. Anxiety arising from the stomach.

Abdomen

Borborygmi. Colic and diarrhea in morning. Tension and digging in the abdomen. Colic with painful sensibility of the abdomen to the touch inflation. After the colic, general cold with burning heat in the palms of the hands. Tympanitic distention of the abdomen and rising of air. Pain in the abdomen with yawning inclination to vomit and stretch.

Back

Pain and chilliness between the shoulders.

Chest

Angina pectoris. Sensation as if a bar lay transversely across Chest from region of heart to right side with acute pain in left upper portion of chest. Constriction, extending from the chest to the epigastrium with smarting and burning pain increased by the touch.

Ears

Violent pain in right ear, extending to throat, throat feels contracted with burning pain during swallowing.

Eyes

Heaviness of the eyelids, which compels them to close. Heaviness in the eyes. Mist before the eyes, on reading, the letters vanish. **Eyes** downcast and surrounded by a livid circle. Painful pressure on the eyes with sensation of constriction. Redness of the conjunctiva. Redness of the eyes with blue margins. Sensation as if sand were introduced into the eyes. Pupils contracted and sight confused. Amelioration of the symptoms of the sight in the open air.

Face

Face pale, dejected and changed, face discomposed. Pain in face.

Female

Pain in hypogastrium, attended with slimy, whitish leucorrhoea. Weak feeling with painful bearing down sensation at menstrual period. Colic, as if the menses were going to appear with slimy, whitish discharge from the vagina.

Head

Head heavy, painful. Feels constricted, heavy, hot. Constriction in the forehead and in the occiput with burning heat in the head. Headache at night, as from indigestion with swelling of the stomach and abdomen, anxiety inclination to vomit, sour risings of food. Headache in the forehead with inclination to vomit on stooping. Pain in left forehead, spreading over face and affecting left teeth.

Heart

Convulsive pain in heart region with oppression. Great soreness in the region of the heart with anguish, redoubled throbbing, small pulse, burning in the hands and shivering of the body. *Palpitations of the heart with diminished perspiration* of the feet.

Kidneys

Urine red, scanty and burning.

PAGE 750

Limbs

The limbs are painful and languid. Pain in left shoulder, as if inflamed. Suppression of the habitual sweat of the feet.

Rectum

Borborygmi, colic and diarrhea in morning.

Skin

Dry skin.

Sleep

Irresistible drowsiness. Frequent yawning.

Stomach

Inclination to vomit, sour risings of food. Painful digging from abdomen to throat, causing pain in region of heart with oppression. Colic, tympanitis. Borborygmi and diarrhea. Swollen, painful. Painful swelling in the stomach with pressure at the epigastrium and risings of flatus.

Temperature

Chilliness predominates, shuddering, goose-flesh.

Throat

Lower jaw with stinging in teeth and cheek. Sore throat with difficulty of swallowing sensation of contraction inclination to swallow, salivation and smarting. Sensation of a foreign substance in the throat with yawning and stretching.

Vertigo

Vertigo, so as to occasion falling and dullness of ideas.

Comments

This is very characteristic of all the symptoms of Hem.: Sensation as if a bar lay transversely across from region of heart to right side with acute pain in left upper portion of chest. This bar sensation has been frequently removed by Hem. and in a case of herpes zoster with agonizing pain as if a bar lay across the chest, arresting the breathing, Hem. did good service.

Hall aqua

Pharmacy

Hall. Hall aqua. The salt springs of Hall in upper Austria. Dilutions. Historical dose: Tincture and all potencies.

History

The salt springs of Hall contains chlorides, iodides, and bromides.

Also, carbonates of the alkalies and alkaline earths and iron, but by far the largest ingredient is chloride of sodium. Provings have been made of this water, many of them on patients suffering from goiter. **Planets:** Moon.

Homeopathic

In the provings many marked symptoms appeared in the breast glands. Great weakness and exhausting night-sweats were produced and all the symptoms of cold in the head and chest.

A number of symptoms occur after sleep and some of them wake the prover in the night. One prover had a sensation as if her stomach would fall out and as if her breasts would fall off. In many cases the pains are transient, acute and return after a short interval.

Clinical

Anemia. Breast, disorders. Exophthalmus. Glands, enlarged. Goiter.

Compare

(1) Nat-m., Silica marina - stitches shooting out of nipple.

SOURCES

Clarke.

Haloperidolum

Pharmacy

Halo. Haloperidol. An allopathic drug. Halo. is a butyrophenon. Historical dose: All potencies, 3x to 30c.

History

The present symptomatology is the result of the examination of the toxicology records and of the iatrogenic effects of Haloperidol. More particularly, it is the result of a proving following the Homeopathic method.

This is the work of O. A. Julian, who used Haloperidol in 30c, 7c and 3x and placebo, following the usual methods with twenty-eight collaborators in 1974-75. Out of twenty-eight provers, there were six women and most of the provers were also doctors or students of medicine.

PAGE 751

Homeopathic

Instability of the mind and body. Weariness, fidgets in the lower limbs, buzzing in the ears, dizzy feeling on rising. Physiological slowness. Sensation of constant stress, difficult to overcome by using his will. Dawdles. Mumbles.

Loss of notion of time. Frequent forgetfulness of everyday tasks. Sensation of unreality. 'I am far from myself and others.' Feeling of cut legs and strong need to sleep. In the morning, acute sensation of being 'outside myself,' does not know what he is doing and everything is gradually erased.

Then, sensation of constricted throat of chest being in a vice, respiration difficult, thorax painful, legs 'give way.' Like in a fog, confuses everything: beings and facts, things and time. Desires to stay lying down and do nothing.

Great waves of pessimism for no reason. Difficulty in concentration on any matter requiring reflection. The most elementary thought processes require a great effort. Talkative, especially in the evening after 9 p.m. with need to relate stories, excited, tendency to philosophical speculation in the more incommunicative person.

Constant need to move when in bed, resulting from sensation of formication in all the joints of the body. Disturbances of synthetic processes of the mind. Impression of disintegration of personality, especially after 9 p.m. Hyper salivation: desires salty foods, nausea in the morning, empty urging and constipation. Tachycardia: respiratory rhythm disorders. General sweating.

Clinical

Allergies. Catatonia. Neurosis. Pseudo-bulbar syndrome. Parkinson's disease. Sclerosis. Schizophrenia.

Constitutions

Allergic, cancerous conditions with psychopathic tendency. **Planets:** Moon.

Modalities

Better from closing the eyes. Better from hot water. Better from walking in company. Better from salty food. Worse in the morning.

Symptoms

MIND

Depression. Anxious, restless. Neurosis from anguish. Very talkative. Depersonalization of the self. Fixed facial expression. Forgetfulness and loss of sense of time. Impression of being behind a cloud. Extreme difficulty in concentrating and in intellectual thought.

Catatonia with attitudes, gestures, words, all strange and stereotyped. Schizophrenia and schizophrenic conditions. Euphoric state in the evening. Feeling of living 'outside of myself,' and returns to himself a few hours later. Pessimism.

Abdomen

Rumbling and belching.

Back

Stiffness at the nape of the neck, trembling, shaky walk.

Ears

Earache in the left ear.

Eyes

Conjunctivitis. Cataract at first. Vision **misty. Deep**, burning sensation in the eyes, rising to the surface with tingling in the eyelids. Burning sensation in the eyes, appearing **slowly, gradually between** 11 a.m. and noon.

Face

Face expressionless. Fixed gaze.

Female

Disturbed libido.

Food

Hypoglycemia. Desires salty foods. Better from salty food. Loss of appetite especially at midday.

Head

Headache in the morning, localized at the frontal region.

Heart

Tachycardia. Faintness and syncope. Hypotension. Rapid pulse. Circulatory complaints: formication of the ankle, knee, wrist, elbow, scapular and humeral regions.

Kidneys

Retention in the bladder. Urinary and fecal incontinence. Dysuria.

Limbs

Raynaud's syndrome. Hands hot, fingertips freezing. Pains in the bones: left metatarsal bone, wrists, elbows, knees. Cramps in the calves. Arthralgia. Muscle pain. Pains in the wrists and right thumb. Pain in the right elbow with appearance of a few red spots.

Painful cramps in the afternoon in both thighs.

Lungs

Asthmatic wheezing. Irregular respiration, either rapid and superficial or short inhalation following very slow exhalation followed by an arrest of pulmonary ventilation for a few seconds.

Male

Total impotence in the male. Diminished libido. Disturbed libido.

PAGE 752

Mouth

Excessive salivation. Bad breath in the morning and after each meal.

Perspiration

Profuse perspiration. Sweating from the hands, more intense between 1 p.m. and 3 p.m. Fairly intense sweating from the whole body. Hands and axilla extreme wet. Palms of hands very hot, despite the fingertips being frozen. Sweating from the palms, more intense around 3 p.m.

Rectum

Frequent desire to go to stool, then expelling nothing. Persistent constipation, slightly ameliorated by eating prunes. Anal pruritus, lasting for four days. Spasmodic constipation.

Skin

Skin yellowish. Abnormal hair growth. The skin tends to turn yellow, complexion very blotchy. Face is yellowish with extremely pink cheeks. Hyperhidrosis. Dermatitis in brown patches on the legs.

Sleep

Insomnia. Sleep disturbed. Frequent desire to sleep. Rises with feeling of not having slept enough, even after a good night's sleep. Difficult to 'get started' in the morning. Fear of cancer type dreams. Sleeps better on the stomach. Sleepy during the day.

Stomach

Acrid dyspepsia. Nausea in the morning or during the day. Nausea, vomiting, digestive discomfort. Still feels sick two hours after taking the remedy. Quickly satisfied.

Temperature

Fever and chilliness. Overheated.

Throat

Constricted throat.

Vertigo

Dizzy feeling on rising. Vertigo with stumbling gait. Dizzy sensation with visual fog, when standing up after lying.

Comments

One female prover stopped the proving for three days, on resuming (she was taking a 7C), she immediately found herself in the same state in a fog, everything seemed erased, could not retain even two sentences when reading. Feels 'dead,' with headache.

Proliferation of hair at the eyebrows, appearance of a few hairs around the navel.

Appearance of two hairs on the lower part of the chin. Generalized contractions. Muscular stiffness and contracture. Difficulty in moving, grimacing and protrusion of the tongue. Very severe spasms of the ocular rotary muscles. Hysterical stitch.

Tachycardia. Raynaud's syndrome. Faintness and syncope. Hypotension. Rapid pulse. Circulatory complaints: formication of the ankle, knee, wrist, elbow, scapular and humeral regions. Ameliorated by stretching out the hands perpendicularly to the axis of the body and by bending the legs. Sleeps lying on stomach.

Headaches in the morning. Short headaches, for about 1 hour, localized in the frontal region, at about 8.30 a.m. and recurring, for three quarters of an hour.

Headaches behind the right eye, better by closing eyes and lasting only a few seconds. Heaviness of the head, starting at the nape of the neck and spreading to the occiput and rising to the top of the head. Ameliorated by lying down, closing the eyes and placing the hands over the eyes.

Paraesthesia. Extreme sensitivity to touch. Extreme trembling, stumbling gait. Constant restlessness of the lower limbs, cannot stay sitting or lying down. Permanently strolls

about. Fleeting torticollis when stretching. Painful contractions of the abdominal, brachial and lumbar muscles.

Compare

(1) Anhal. - Hyperesthesia of the cortex, thalamus and organs, visual hallucinations, loss of contact with surroundings, accommodation difficult and perception disorders.

(2) Chlorpromazine - Melancholy, difficulty in concentrating, loss of memory, had to make great effort for intellectual work, trembles, hypertonia, stiffness.

(3) Agar. - Vertigo in the morning, clumsy hand movements, frontal headache, spreading to the nose with pains as if pricked by icy needles, head moves constantly, spasmodic jerking in the limbs.

PAGE 753

SOURCES

Julian.

Hamamelis virginiana

(witch-hazel)

Pharmacy

Ham. Hamamelis virginiana. Witch-hazel. Hamamelis macrophylla. Hamamelis dioica. N. O. Hamamelidaceae. A shrub growing in all parts of U. S. in damp woods or along streams, flowers in autumn, flowers yellow, the seeds ripen the year following. Tincture of fresh bark of twigs and root. A resinoid, Hamamelin is also prepared. Historical dose: Tincture and all potencies, tincture to sixth potency. Distilled extract locally.

Herbal

The deep red color of the tincture of Hamamelis may be taken as the signature of its therapeutic action. No remedy has a wider sphere of usefulness in cases of hemorrhage and disordered blood-vessels. It has also a decided relation to the effects of mechanical injuries including burns of the first degree and as a local application it takes rank with Arnica and Calendula in the homeopathic Materia Medica.

Hering, who learned its properties from Mr. Pond of "Pond's Extract" fame (Pond was a patient of Hering's), made the first provings and introduced the remedy into homeopathy. He defines its position as being between Acon. and Arn. "Pond's Extract" is an aqueous distillate prepared from the leaves. A number of interesting superstitions are associated with the shrub and shoots of it are used as "divining rods" for discovering water and metals.

Hale has given a very full account of the remedy. Phlebitis and varicose veins, hemorrhoids, venous hemorrhages. These are the conditions likely to require Ham. The local application of Ham. to a sprained knee has been known to set up inflammation in the veins of the part and the provers who had varicose veins experienced in them increased sensitiveness and unusual sensations and a number were cured.

Homeopathic

The principle action of this remedy is on the veins especially of rectum, genitals, limbs and throat, producing venous congestion, varicose veins, hemorrhoids and hemorrhages. It is also a valuable remedy for open painful wounds and burns of the first degree as a local application.

Acts upon the coats of the veins causing relaxation with consequent engorgement. Venous congestion, hemorrhages, varicose veins and hemorrhoids. Passive venous

hemorrhages from any part. Veins, painful, varicose, sore, cutting, swollen inflamed. Painful, hard, knotty.

In hemorrhoids there is much bleeding and marked soreness of the part, the back feels as if it would break, (Aesc. hip. has little or no bleeding). Tense bursting feeling in hemorrhoids, joints or lower limbs.

The hemorrhages of Ham. causes great exhaustion, out of proportion to the amount of loss. Hemorrhages, capillary, dark, fluid, relieves or causes undue weakness.

Ham. produces a bruised soreness of the affected part from which blood flows in blood vessels in abdomen etc.

Great value in open, painful wounds with weakness from loss of blood. Relieves the pain after operations, (Calen.). After operations, supercedes the use of morphine. Prickling, stinging pain in veins, muscles, skin.

Clinical

Ankles, weak. Black-eye. Bruises. Burns. Cancer. Chilblains. Enteric fever. Gastric ulcers. Hematemesis. Hematocele. Hematuria. Hemorrhages. Hemorrhoids. Leucorrhoea. Menstruation, disorders, Miscarriage, threatened. Nipples, sore. Noises, head. Nosebleeds. Orchitis. Ovaries, disorders. Phimosis.

Phlegmasia alba dolens. Purpura. Rheumatism. Scurvy. Small-pox. Tuberculosis. Ulcers. Uterus disorders. Vagina. spasm. Varicocele. Varicose ulcers. Varicose veins. Wounds.

Causations

Burns. Injuries.

PAGE 754

Constitutions

Venous constitutions. **Planets:** Venus, Moon, Mars.

Modalities

Worse from injuries, bruises, pressure. **(blood and qi stagnation)** Worse warm, moist air, open, humid, cold, jar touch during day, (pains). Worse in open air. Motion and exertion in general aggravates. Worse in rainy weather.

Symptoms

MIND

Forgetful. No desire to study or work. **(spleen and kidney qi deficient)** Irritable. **(liver/heart involved)** Hemorrhages with tranquil mind. **(heart yang is ok so no forcing of hemorrhages or pressure so hemorrhage then is mechanical and passive)** Wants "the respect due to me" shown. **(shen depression as he does not have respect himself and so shen depressed)** Feels unappreciated. **(shen is depressed so wants appreciation to come up)** Depressed in mind, **(heart qi depressed)** also after emissions with regretful mind. **(poor control of impulse/emission by heart is regretted so heart qi/shen not sufficient to control)**

Abdomen

Flatulence. **(qi stagnation)** Varicose veins of abdomen. **(blood stagnation in veins)** Cramps in stomach and transverse colon two hours after a hearty dinner. **(after 2 hours food reaches to large intestine and cramps due to large intestine qi deficiency that is vacuity cold stagnation)** Burning in the epigastrium and umbilicus. **(small intestine and liver**

gallbladder heat) Pain all round lower abdomen. (all round pain means no fixed place so qi stagnation)

Back

Sore pain down cervical vertebrae. (blood stagnation) Breaking backache. (blood congestion in lumbar) Painful scapulae. (heat in small intestine channel) Dull ache about kidneys. (kidney qi stagnation or deficiency aching) Severe pain in lumbar and hypogastric region, extending down legs. (severe pain-blood stagnation, cold stagnation or blood congealation in kidney and liver channel/area) Rheumatism of scapula. (heart or small intestine fire or wind) Chilliness in back and hips, extending down legs. (cold stagnation blood congealation pain in kidney)

Breasts

Sore nipples, bleeding. (blood stasis)

Chest

Chest feels sore and constricted. (cold stagnation or blood congealation) Stitches in lower part of lungs. (may be due to cold stagnation or blood congealation) Sensations of constriction across chest worse by a long or deep breath (cold stagnation or blood congealation). Dull aching pain constantly in muscles of left chest. (qi stagnant aching pain spleen/heart) worse using arms afternoon and evening.

Ears

Deafness in right ear, passes off by noon. (blood cold stagnation which passes off by noon due to increase heat and yng so cold congealation lessened,) Bleeding at right ear, (right ear bcoz yin side and blood congealation or cold is yin) also nose-bleed, which clears her head, relieving her. (head blood congestion nose bleed) Buzzing, ringing in ears. (cold blood stagnation in liver or ear channels)

Eyes

Traumatic effects. (qi and blood stagnation) Black-eye. (blood stagnation) Iritis, conjunctivitis. (blood stagnation) Blood shot eyes. (blood stagnation) Sore pain in the eyes. (blood stagnation) Hastens absorption of intra-ocular hemorrhage. Painful weakness. (blood stagnation) Eyes feel forced out, better pressure of finger. (blood stagnation) Sore pain in eyes, eyes painful under slight pressure. (blood stagnation) Eyes inflamed, vessels greatly injected, caused by a foreign substance. (blood stagnation) Also after operations intense soreness. (qi and blood stagnation)

Face

Burning in right cheek. (kidney yin deficient so vacuity heat, cheek-kidney) Occasional shooting pains (vacuity kidney fire or wind, kidney -bones) along right superior maxillary to malar bone. Muscles feel sore and stiff. (spleen/stomach wind heat) Lips are dry, sore, cracked. (spleen/stomach yin vacuity fire)

Female

Vicarious menstruation. (toxic heat menses) Menses dark, profuse with soreness in Abdomen. (blood congestion so dark profuse) Jolting brings on menses. Uterine hemorrhage, bearing-down pain in back. (bearing down – kidney qi deficiency or blood/phlegm congestion, hemorrhage—blood stagnation uterus or kidney channel) Bleeding, midway between menstrual periods, (midway time blood gets accumulated in liver) only in daytime. (bleeding due to kidney yang deficiency as daytime is yang) Inter-menstrual pain. (blood accumulation and congestion) Ovarian congestion (blood stagnation) and neuralgia, feel very sore. (blood stagnation) Ovaritis after a blow (blood

stagnation) or after abortion with soreness over the whole abdomen.(blood and qi stagnation in whole area of abdomen,no fixed location so qi stagnation) Milk-leg. During pregnancy, legs become painful, can neither stand or walk.(due to blood stagnation or congestion in the lower area) Leucorrhoea, bloody with soreness of vagina.(damp heat with blood stagnation) Vagina very tender, sore.(qi stagnation so tender and sore) Vulva itches.(qi stagnation or wind) Vaginismus.

Food

Thirst.(stomach heat) Averse to water, makes him sick to think of it.(damp/phlegm) Nausea from pork. No appetite for breakfast,(stomach time that is breakfast time phlegm heat so no appetite due to phlegm stagnation and thirst due to heat) considerable thirst, better by small quantities of water. Appetite good. Very thirsty in afternoon and evening, throat dry. Averse to water, makes him sick to think of it.

Head

Feeling as of a bolt from temple to temple.Numbness over frontal bone.(stomach/kidney blood deficiency or qi/phlegm stagnation--numb) Hammering headache, worse left temple.(liver qi stagnation left side yang) Stupid feeling in head. Headache after emission.(kidney yin vacuity heat headache) Stupor.(blood congestion) headache, crowding fullness in head and neck, also in forehead.(blood congestion) Fullness of head, followed by a nosebleed.(blood stagnation and congestion) Bursting headache on waking.(yang rising headache with blood congestion) Dullness and fullness.(phlegm congestion so dull ness and fullness or qi stagnation dull and blood congestion fullness etc) Headache after an emission. Hammering over left eye, as if he would go out of his mind.(liver qi stagnation left side yang)

Heart

Palpitations.(blood stagnation) Pricking pain in region of heart and superficial veins of both arms.(blood stagnation) Pulse accelerated, full.

Kidneys

Hematuria(blood stasis) with increased desire for urination.(increased desire of urine due to blood stagnation in bladder or kidney) Hematuria, passive congestion of the kidneys, (veins have passive congestion as they don't have force of blood opposite artery) dull pain in kidney region.(kidney qi stagnation) Dull ache about kidneys.(kidney qi stagnation) Urine clear copious.(kidney vacuity cold) Scanty high-colored urine. Irritation of the urethra(liver yang hyper or qi stagnation or liver wind), followed by a discharge and ardor urine.

Limbs

Great lassitude and weariness of the limbs and elsewhere.(spleen qi weakness) Tired feeling in arms and legs.(spleen qi deficient) Varicose veins.(blood congestion/stagnation or vessels heart qi is less so poor toning of vessels so blood congestion) Varicose ulcers with bloody bases.(blood congestion ulcers) Milk-leg, hemorrhoids and sore nipples after confinement.(lower veins pressed so blood congestion in confinement or pregnancy so haemorrhoids and sore nipples due to liver blood stagnation in the channel)Very sore muscles and joints.(spleen channels blood stagnation) Neuralgia of internal saphenous nerve. Tense, bursting feeling in limbs and joints.(blood stagnation) Rheumatism with great soreness of the muscles.(spleen channel blood stagnation and lung channel qi stagnation or wind)

Lungs

Hemoptysis, tickling cough with Taste of blood.(qi and blood stagnation,tickle-qi stagnation) When lying, felt a smothering sensation. Tickling cough, taste of blood on awaking. Dry cough, sever stinging in the uvula, as if it would break.(blood stagnation-stinging and severe,lung yin deficiency so dry cough) Expectorations thick, yellowish or greenish gray,tasting putrid.(liver heat attacking lung,liver-yellow green,damp heat-putrid)

Male

Pain in spermatic cord, running into testes.(blood stagnation or kidney yin vacuity heat pain) Orchitis intense soreness and swelling. Orchitis, worse touch. Testicles enlarged, hot and painful.(damp heat or blood congestion) Epididymitis. Varicocele. Emission at night without being aware of it.(kidney yin vacuity heat and kidney heart communication broken) Hematocele. Severe neuralgic pains in testicles.(neuralgic means nerves—heart related so nerve paths qi runs so heart blood stagnation leads to severe heat which reaches to testicles and enlarged due to blood congestion or dampness heat) Pain running down the spermatic cords into the testes. Profuse cold sweat on scrotum,(profuse cold sweat—kidney yang collapse)capillary stasis.(blood stasis)

Mouth

Burns of tongue and lips.(heart and stomach fire) Passive hemorrhage from gums after tooth extraction with soreness of the gums.(blood stagnation in veins with no speed) Tongue feels burnt. Blisters on sides of tongue,(liver fire) canker spots near the tip.(heart fire) Metallic taste (lung effect on stomach)tongue coated white.(lung effect or food congestion in stomach) Bloody taste.(blood stagnation in stomach or heart)

Nose

Over sensitive smell.(lung qi stagnation) Bad smell from the nose.(blood/damp heat/phlegm stagnation) Nosebleeds,(blood stagnation in lung or liver channel) flow passive non-coagulable with tightness at the bridge of the nose.(veins blood stagnation) Profuse nosebleed, idiopathic or vicarious. Nosebleeds with hemiplegia in old men. The nosebleed clears her head and affords great relief.(head blood congestion) Sneezing spells, watery, excoriating, burning discharge.(blood stagnation so blood vacuity heat so excoriating,burning and may be watery and sneezing) Nose feels stopped up.(blood stagnant)

Rectum

Anus feels sore and raw.(blood stagnation) Hemorrhoids, bleeding profusely with soreness.(blood stagnation and heat) Pulsation in rectum.(pulsation—blood stasis) Large quantities of tar-like blood in stools.(tar-like—blood stagnant) Bloody dysentery. (dysentery due to blood stasis) Stools: costive, hard, coated with mucus.(large intestine phlegm that is mucus and hard—heat so phlegm heat or damp heat)Large quantities of a tar-like blood (typhoid). Itching at the anus.(liver/ kidney qi stagnation or wind or damp heat—itching)

Skin

Burns.(lung fire) Ecchymosis. Bruises,(blood stagnation) traumatic inflammations,(qi stagnation) (Arn.) Bluish chilblains.(blood congealation due to cold) Phlebitis. Purpura. Varicose veins and ulcers, very sore. Varicose ulcers with bloody bases.

Sleep

Restlessness at night.(blood or yin disturbance that is blood stagnation) Uneasy, restless morning sleep. Emissions of semen during sleep.

Stomach

Blisters on side.(spleen stomach accumulation and liver heat) Pain and heaviness at the back of stomach.(damp heat on yang side) Vomiting of black blood.(blood stagnation-black) Throbbing(cold stagnation so blood congealation) and pain in stomach. Belchings after a meal,taste of the food.(no digestion in stomach due to cold stagnation so taste of food and liver heat belching) Nausea,(stomach qi stagnation) headache in frontal bone(stomach qi stagnant headache) on awaking.(yang time) Nausea and inclination to vomit after a meal.(liver heat attacking stomach soo vomit ,stomach qi stagnation by undigested food) Hematemesis, blood black. Violent throbbing in stomach.(throbbing-cold stagnation,but violent pain due to blood stasis or congealation) Cramp in stomach after eating.(cold stagnation)

Teeth

Sharp, sharp along the molar teeth, extending to the malar bone, also in temporal region. (blood stasis-sharp pain so blood stasis in stomach or other channels reaching to teeth) Teeth ache, can scarcely sleep, yet not decayed.(stomach/large intestine channels heat but sufficient yin/blood in stomach and large intestine or teeth area so not decayed) Pains worse in warm room.(heat in channels) Gums sore, painful, swollen, bleed easily (stomach heat –painful but if not painful then stomach vacuity heat) dark fluid.(blood stagnation and soreness) Passive venous hemorrhage after extraction of teeth.(blood stagnation)

Temperature

Chilly on going to bed, dreaded an attack of fever. Cold creeps in the open air, chills run up the legs, head stopped up, dull pain over orbit.(qi stagnation over orbit) Chilliness over back and hips.(kidney yang and spleen yang deficiency that is damp cold) extending down the limbs. Fever at night,(yin deficient vacuity fever) hands hot,(spleen yin vacuity) burning in the eyelids on closing them.(spleen yin vacuity) Sweats freely at night after lying down.(lung yin vacuity heat and vacuity so lying down helps)

Throat

Hoarse on arising, awoke hoarse.(qi hence phlegm/blood congestion when yang time) **Sore with distended veins.**(blood congestion in throat) Stinging, breaking pain in uvula, while coughing.(blood stagnation-stinging,breaking pain may be) Mucous membrane distended and bluish,(toxic blood stagnation)varicosis of throat.(, (toxic blood stagnation) Severe stinging in uvula.(blood stasis-severe) Sore throat worse right side,(yin side so blood stagnant) right tonsil more swollen,(blood stasis-yin side) reddened. Sore throat in those predisposed to fullness of the veins,(blood congestion) **worse in warm, moist air. (since blood is congested and blood warms and moistened and air or qi is carrier of blood so air ,moist,warmth aggravates)** Hawks considerably.

Vertigo

Swimming sensation on rising.(yinaffected so swimming sensation in yang time) **Vertigo when stooping.**(stooping is also yin) Nausea(qi stagnation) and vertigo (qi stagnant vertigo)with desire to lie down.(qi deficiency type and dull nature)

Comments

In congestion inflammation and bleeding of hemorrhoidal vessels, Ham. has a great range of action and like that other great pile remedy Aesculus hip., it has also a marked

action in the throat. Ham. is called for in cases of "varicose angina," the veins of the pharynx are large and blue.

PAGE 756

The hemorrhages in which Ham. is indicated are mostly dark. They may occur from any orifice. Dysentery when the amount of blood is unusually large, dark, small clots or patches through the mucus. Metrorrhagia, menorrhagia, vicarious menstruation and hemorrhages between the periods are met by it.

In this connection a case recorded by Dr. Ward is noteworthy. He cured a case of inter-menstrual pain. Allen mentions in the provings an inter-menstrual flow and Dr. Ward acutely observes that if his patient has had the flow, the soreness so distinctly felt might not have been realized.

"Intense soreness" is one of the notes of Hamamelis. The part from which the flow of blood proceeds feels sore and bruised. This distinguished it from Chin. in passive hemorrhages. (slow speed of haemorrhage means less pushing power of heart and this circulation power is dependant on spleen and heart where spleen gives qi to heart to pump including own heart power and spleen gives nutrition or clear fluid to heart which is reddened by heart to convert into blood .kidney essence is also added in the blood as additional) It is a leading indication for it in cases of orchitis and ovarian disorders and also in phlebitis and varicose veins.

There is taste of blood in the mouth. The headache of Ham. is chiefly in the temples, throbbing, hammering, especially over left eye. There is also a tired, aching, feeling in the back and lower limbs. Many rheumatic symptoms occur and with them always the characteristic soreness.

Hughes gave Ham. to a young lady suffering from daily nosebleed and throbbing headache. The first dose was followed by a flushing of the face and most distressing throbbing-aching and sense of fullness in the head.

The second dose brought back all the symptoms in the head and feeling as if it would burst. Some days later the 3x was given and again the dilatation of the cerebral vessels occurred, through the symptoms were not so severe.

The scapular pain bears on the experience of Dr. Koech, who cured with Ham. many cases of scapular rheumatism. He regards it as a specific in disorders of the last five cervical nerves. There is a good deal of thirst in the Ham. pathogenesis and Bree says it will relieve the excessive thirst that most patients with heart troubles complain. Takes cold easily from every exposure, but especially to warm, moist air. Toothache worse in warm room, worse from touch.

Erica vulgaris

Heather

(bach flower remedy)

Pharmacy

Heather. *Calluna vulgaris*. The flowering stems are placed in a bowl of water and allowed to sit in the sun for several hours. The water is strained and used as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

Herbal

The remedy Heather, together with Water Violet and Impatiens, belongs to Bach's group of Loneliness. These remedies help those suffering from inner loneliness as a result of being too centered within their own selves and losing the connection with others.

Planets: Moon.

PAGE 757

Homeopathic

In the Heather state one can appear overbearing and agitated in demeanor. Factitious and sleep disorders, centering around feigning or unconscious production of sickness with concurrent urge to talk about symptoms, can occur. Sleep-like disorders (see Chicory, Chestnut Bud) or obsessively fixated ideas (White Chestnut).

Symptoms

MIND

There exists a self-centered view of life and one holds the assumption that one deserves sympathy and regard. The mind is stuck on personal affairs and attaches much importance to experienced hardships and dilemmas.

There is great inner urging to share through words, talking is an important characteristic of the Heather state. Inner pressure of loneliness and self-related worry needs to be expressed, the craving for attention and sympathy needs to be stilled.

Should words alone do not have the desired effect, other attention getting behavior is added to this dynamic, either consciously or unconsciously. Such as feigning a sickness, hypochondriasis (Chicory, Mimulus).

In case of injustice received or if one was undermined in one's honest efforts, there is an even greater need to find sympathetic listeners who give support. Talkative over seemingly unimportant details. When the talking serves to gain attention, feel special and show self-pity.

SOURCES

Bach.

Hecla lava

(volcanic ash)

Pharmacy

Hecla. Hecla lava. Lava Heclae. Volcanic ash from Mount Hecla in Iceland. The finer ash falling in distant localities. Trituration. Historical dose: Trituration and all potencies, lower triturations.

History

When traveling in Iceland, Garth Wilkinson noticed that the sheep in the vicinity of Hecla. had immense bony growths on the jaws.

Another effect noticed was the drying up of the milk both in sheep and cows. The finer ash which fell on pastures at a distance, was the most deleterious, the gross ash near the mountain was inert. The ash of this volcano contain Silica, Alumina, Lime, Magnesia with some Oxide of Iron.

Garth Wilkinson adds to the above that he has used Hecla. with excellent effect in toothache, gum abscess, swellings about the jaws and in difficult dentition.

Clinical experience has shown the power of Hecla. to arrest many forms of bone disease including osteosarcoma, scrofulous and syphilitic osteitis and exostoses. The swellings amenable to it are painful and sensitive to touch, worse from touch and pressure. **Planets:** Saturn.

Homeopathic

Hecla lava affects mostly the bones of the head, jaws, teeth and legs. In the five or six cases of osteosarcoma, exostosis and osteitis, it arrested the development and prevented recurrence.

Hecla lava has a marked action upon the jaw Bones. It is of great use in exostosis, gum abscess, toothaches, difficult teething. Nodosities, decay of bone, etc. Bone necrosis. Necrosis and sinus after mastoid operation. Facial neuralgia from decayed teeth and after extraction.

The glands are affected almost as much as the bones: induration and infiltration of cervical glands, studding the neck like a row of pearls. The right side has been more predominantly affected. Tumors in general. White swellings. Whitlow and gumboils. Syphilis.

Clinical

Antrum of Highmore, tumor. Bones disorders. Breast tumors. Dentition, difficult. Exostoses. Glands disorders. Jaw, tumors. Milk, deficient. Neuralgia. Osteitis deformans. Osteomalacia. Osteosarcoma. Periostitis. Rickets. Syphilis. Teeth, decay. Toothache. Tumors. White swelling. Whitlow.

Causations

Injury to bone.

Symptoms

Back

Induration and infiltration of the glands, studding neck like a row of pearls. Neck glands are enlarged and indurated.

PAGE 758

Breasts

Dried up, no milk.

Chest

Muscle pain, especially of intercostal muscles.

Face

Facial neuralgia from decayed Teeth and after extraction. Polyps, commencing in antrum of Highmore. Tumor, deforming face, forcing eyeball upward, obstructing nostrils, extending downward into the mouth, impeding breathing and chewing, nosebleed, headache.

Head

Chronic headache. Headache from injury of dental nerves.

Jaws

Violent pain in upper jaw. Abscess or enlargement of bone remaining after tooth extraction. Enlargement of maxillary bone. Painful to touch: upper jaw, swelling under right alae nasi sensitive. Slight pressure: right cuspid of upper jaw sensitive. From injury to jaw: had enlargement of maxillary bone.

Limbs

Severe continuous pain in lower limbs. Hip disease. Exostoses of tibia, severe continuous pain incapacitating from work.

Mouth

Neuralgia from decayed tooth in cavity from which tooth has been extracted. Abscess of gums. Difficult dentition in scrofulous and rickety children. Pain in wound, where tooth has been extracted.

Nose

Destructive, syphilitic ulceration of nasal bones.

Teeth

Toothaches, especially of teeth that are very sensitive to pressure with swelling about jaws. Difficult teething.

Vertigo

Vertigo everything goes up, down and sidewise.

Compare

(1) Calc., Merc. Phos., Sil. Still., Sulph., Kali-i., Symph. Ruta.

(2) Conchiolinum - diaphysis of bone affected, parts extremely sensitive to touch.

(3) Amphisbena - great affinity for the jaw bones, worse by air and dampness.

(4) Slag, - great itching of parts.

Hedeoma pulegioides

(pennyroyal)

Pharmacy

Hedeo. Pennyroyal. Hedeoma pulegioides. N. O. Labiate. Tincture of whole fresh plant. Historical dose: Tincture and all potencies, first potency.

Herbal

Hedeoma puleg., the common English Pennyroyal, the German Poley, the Arabic Alnam the ancient Greek Glachon. The British "Pennyroyal" is Mentha pulegium, also a Labiate. Hedeoma belongs to that large class of mints and common herbs, that have been cast aside by the medical profession as worthless.

Hedeoma is one of the oldest remedies known, a common household herb long before the time of Hippocrates. Hippocrates and the ancient physicians used it as a tea for increasing the flow of urine, as a specific for stone in the kidney and as a uterine stimulant.

For centuries pennyroyal has been considered a uterine tonic and the popular belief is that it is a very valuable agent for producing abortion, but the results show that miscarriage is only induced in weak cachectic women. Both the American and the British Pennsylvanians have a popular reputation as "female regulators," which is by no means undeserved. **Planets:** Venus.

Homeopathic

Female symptoms are most marked often associated with nervous disturbances. Bearing-down pains were most marked, worse by any movement and accompanied by almost paralytic weakness of the legs.

Nervous symptoms were very prominent, jerkings and twitchings. Weak, faint, better lying down inability to sit up. Red sand in urine. Pain along ureter. Flatulent colic. Pains in abdomen worse after eating or drinking. Worse by touch and pressure. Antidotes effects of Poison-oak. (Grind.)

Clinical

Amenorrhoea. Dysmenorrhoea. Gastritis. Flatulent colic. Leucorrhoea. Nausea and vomiting. Poison-oak. Vertigo.

Symptoms

Abdomen

Distended, sore and sensitive. Flatulent colic.

PAGE 759

Female

Bearing-down pains with much backache, worse least movement. Leucorrhoea with itching and burning. Ovaries congested and painful, bearing-down spasmodic contractions.

Head

Dull, heavy feeling in morning. Sore pain, as from a cut. Weak, faint, better lying down.

Kidneys

Frequent urging, cutting pains. Pain along left ureter. Dragging pain from kidney to bladder. Dull burning pain over left kidney. Burning irritation at neck of bladder causing frequent intense desire to urinate and inability to retain urine for more than a few minutes, better urinating.

Limbs

Pain in thumb joint. Pain, coldness and paretic conditions. Twitchings jerkings, soreness. Achilles tendon painful, as if sprained and swollen, walking painful.

Stomach

Gastritis. Everything taken into Stomach causes pain. Tongue coated thin white. Nausea.
Comments

Anshutz writes: Hedeoma contains three bodies peculiar to the plant, three different oils, also formic and acetic acid and likewise ischeptoic acid. There are on record seven cases of poisoning. Two provings have been made by myself. Several of the poisoning cases are very meagre and of little value.

One teaspoonful of the oil, three drachms of the essence, seems to be almost a fatal dose in one case only was abortion produced and that from one ounce of the oil, followed by collapse and death.

The leading symptoms of the cases of poisoning are briefly: Vertigo. Dimness of vision. Dilated pupils. Nausea and vomiting. Persistent severe bearing-down pains from the upper part of the sacrum and the region of the kidney to the uterus like true labor pains. Frequent painful, scanty, burning urination. Small, rapid pulse. Nervous weakness. Cold clammy limbs.

A case reported by Dr. Toothaker is by far the best. The bearing-down labor-like pains and the scanty, painful urination lasted for many days and was very severe.

(1) Clarke has prescribed this remedy in two cases. One a lady of gouty, rheumatic tendency, who had dragging burning pains in the left ureter going to the bladder and was passing quantities of "red sand." The pain lasted for ten days. Hedeoma 1c, on discs, was given, one disc every two hours. Complete relief was obtained after two doses.

(2) A man of 60, very fond of champagne, was bothered by constant burning irritation at the neck of the bladder, which caused frequent intense desire to urinate and an inability to retain his urine for more than a few minutes. He always had marked relief on urinating. Urine retained in the bladder increased this irritation at the neck of the bladder and also caused an uneasy pain in the right testicle.

These symptoms had been more or less persistent for months and the attacks always lasted days at a time. Complete relief was obtained after one or two doses of Hedeoma 1c. He is never without a bottle of the remedy in his pocket.

Hedera helix

(common Ivy)

Pharmacy

Hed. Hedera helix. Ground Ivy. Common Ivy. Glechoma hederacea. N. O. araliaceae.
Tincture of young shoots. Historical dose: Tincture and all potencies, 3x to 30c.

Herbal

Hedera Helix or Ivy is a shrub which grows all over Europe. It is a creeper, which fixes itself by clinging roots. The leaves are cadiform at the base and more separated in the higher parts of the plant. The fruit is bluish-black in color, equal to a pea in size.

PAGE 760

Historical uses are: (a) The Wood: coughs, anti-spasmodic. (b) The Leaf: internal use, emmenagogue, external use, topical as anti-neuralgic. (c) The Fruit: intoxication, digestive and nervous complaints, delirium, convulsions.

The mother tincture is used for coughs and is prepared from the flowering twigs. The symptomatology was established by Mezger in 1932 on seventeen people, using the following potencies: 1x, 6x, 15x, for a period of twelve weeks. Easily tired, ameliorated by fresh air or noticeable increase in physical ability.

Our knowledge of the therapeutic properties of Ivy we owe to Dr. Cooper, whose experience has shown it to have a relation to ricket and rickety conditions. In cases of rhinorrhea cerebro-spinalis, *Hedera helix* must be thought. *Hedera helix* has been used for "clearing the sight" and Cooper says it has cured cases of cataract.

Homeopathic

Hedera helix has hemorrhoids with rectal irritation and bleeding. Diarrhea. Anus feels raw and sore. Cough with laryngeal and tracheal irritation. Glandula sub-mentalis inflamed.

General improvement in fresh air, but extreme sensibility to catching cold and to chills. Morbid hunger, gastric cramps. Joint pains and circulatory complaints, especially in the middle of the night. Menses reduced, vesicular eruption on the face and body.

Swelling of the thyroid glands. Cardiac palpitations. Extreme anxiety with the feeling of constriction of the throat. Delirium and chronic convulsions. Chronic hydrocephalus, rhinorrhea, cerebro-spinalis. Cataract. Acts on blood vessels, menorrhagia. Symptoms start on the left side and spread towards the right.

Clinical

Cataract. Hydrocephalus, chronic. Rhinorrhea. Rickets.

Constitutions

Tubercular conditions, especially in phosphoric types. **Planets:** Saturn.

Modalities

Better from fresh air and cold baths. Better room movement, friction, massage. Better in the afternoon and evening. Worse in the middle of the night, 3 a.m.

Symptoms

MIND

Lives constantly in a state of unrest and worry. Anxiety, which grows all the more as he feels incapable of mastering it. All the psychological symptoms improve in fresh air.

Anxiety. Insomnia.

Abdomen

Pancreatitis.

Ears

Pain and buzzing.

Eyes

Feeling of sand in the eyelids. Muscae volitantes.

Female

Menses late, shorter and less copious. Pre-menstrual leucorrhoea. Acrid, scorching discharge. Pain in the Fallopian tubes and left ovary. Feels better during menses.

Amenorrhoea in young girls. Infrequent menses. Sclera-cystic ovaritis, especially on the left side. Genital tuberculosis.

Food

Lack of appetite or strong hunger pangs.

Head

Catarrhal inflammation of the frontal sinuses with headache. Headache, especially in the left side of the forehead and nape of the neck. Neuralgic pains in the head, ameliorated by fresh air.

Heart

Angina pectoris. Needle-like pains in the precordial region. Palpitations and anguish **with swelling of the thyroid gland**. Myocarditis. Arterial sclerosis. Rhythmic anomaly, accompanied by tachycardia. Thyrotoxic tachycardia. Paroxysmal tachycardia.

Extrasystole or paroxysmal tachycardia in a young subject with a normal heart.

Kidneys

Frequent, abundant urination.

Limbs

Pain in the arms, legs, back and sacral region. Sometimes ameliorated, sometimes aggravated, by movement. Muscular rheumatism. Joint rheumatism. Tubercular inflammatory dislocating rheumatism. Arthrosis deformans. Nocturnal paraesthesia pains in the arms. Raynaud's syndrome.

Liver

Inflammation of the gallbladder. Gallstones. Pain in the region of the gallbladder. Cirrhosis of the liver with cardiac decompensation.

PAGE 761

Lungs

Irritated cough with grayish or yellow sputum. Bronchial asthma in children.

Emphysema. Whooping-cough.

Mouth

Toothache from hot and cold. Dental neuralgia. Transparent vesicles on the lips and on inside of cheeks in a group, circumscribed by a red ring.

Nose

Hay fever. Acute and chronic rhinitis. Sinusitis (frontal, ethmoidal). Rhinitis and pharyngitis. Nasal discharge, worse in a warm room. Pain in the ethmoid and frontal sinuses. Chronic tracheitis, caused by a lesion in the nasal mucous membrane.

Rectum

Stools copious, either diarrhea or constipation.

Skin

Pruritus. Eruption of small pustules on the skin of the face and body. Prurigo. Urticaria.

Labial and genital herpes.

Sleep

Wakes around 3 a.m. , falls asleep again after eating a little.

Stomach

Nausea, gastric heaviness, stomach cramps. Gastritis. Stomach and duodenal ulcers. Pain on empty stomach, ameliorated by eating.

Temperature

Peripheral circulatory complaints: feet and hands icy, red. Shivering and nausea in the evening until 4 a.m. Shivering and chilliness with bouts of perspiration and palpitations.

Throat

Hoarseness and inflammation of the larynx. Chronic tracheitis. Pain on swallowing, around the tonsils and throat. Cough with a cold and inflammation of the pharynx, aggravated by heat and by speaking.

Vertigo

Vertigo on bending down and from rapid movement of the head.

Comments

One published case is that of a girl of twenty, whom he cured of chronic hydrocephalus with a single dose, once repeated after eighteen months on a threatened return of the symptoms. The circumference of the patient's head, when she was brought to Cooper, was 27.5 inches, rendering her an object of wonder and ridicule and reacting on her disposition and nervous state.

The condition had existed from childhood and was apparently growing much worse. There were two large edematous swellings on the nape of the neck, one on either side and immediately below the occiput, evidently the result of intra-hydrocephalic pressure.

One drop of Hed. h. tincture was placed on her tongue. Next morning clear fluid began dripping from the nostrils, a "cerebrospinal rhinorrhea" in face.

This continued three weeks, between twenty and thirty pocket-handkerchiefs being used in a day. Simultaneously the swellings began to diminish and had completely disappeared when the discharge ceased.

Thirteen months later, when being measured for a hat, it was found that the size of the head was reduced to 25 inches and no longer occasioned remark.

When, later on, some symptoms of brain pressure seemed to threaten a second dose of Hedera helix completely dispelled them. The disposition of the patient was completely changed from being nervous, unhappy and diffident, she became lively, cheerful and active.

Compare

(1) Aral-r., Gins., Sil., Nat-m.

(2) Iodum - is the remedy, whose symptomatology is very similar. Iodum shows more emaciation inflammation and hardening of the lymphatic glands. Ovarian pain on the right and menses more abundant.

(3) Calc-f. - Fear that his way of life will collapse. Pains aggravated by humid or cold weather. Menses copious. Hardening of the breasts, ovary or uterus.

(4) Nat-m. - Depressed and sad, prefers solitude. Emaciation. Fissure in the middle of the lower lip. Chronic, periodic headaches with strong pulsating, as though the head would burst. Dryness of the mouth with extreme thirst.

SOURCES

Clarke. Julian.

PAGE 762

Hedysarum ildefonsianum

(brazilian burdock)

Pharmacy

Hedy. Brazilian Burdock. Hedysarum ildefonsianum. Hedysarum desmodium. Barba de Roy. Carapicho. N. O. Leguminose. Historical dose: Tincture and all potencies.

Herbal

This plant is named by Mure, who gives an account of it in his book and describes it thus: The brownish ligneous stem of this plant is about three feet high, it is ramose, pubescent, especially above.

Leaves alternate, pinnate, trifoliate, folioles oval and slightly tormentose, on a hairy, bi stipulate petiole. The flowers, which are small and seated on filiform unifloral peduncles, form loose, terminal spikes. Fruit oval, hairy, on bent peduncles and attaching itself very intimately to clothes and to hairy skin of animals. **Planets:** Sun, Venus.

Homeopathic

The chief effect of Hedysarum was inflammation of the penis and of the eyes, which should indicate it in some cases of gonorrhoeal ophthalmia.

Clinical

Gonorrhoea. Ophthalmia. Penis inflammation.

SOURCES

Clarke.

Helianthus annuus

(sunflower)

Pharmacy

Helia. Helianthus annuus. Sunflower. N. O. Composite. Tincture of mature flower-heads. Tincture of ripe seeds. Historical dose: Tincture and all potencies.

Herbal

Dr. Cessoles proved the expressed juice of the flowers, some observations have also been made on the effects of eating the seeds. In some parts of America the Indians use the seeds as an article of food. Hansen says it equals Arnica and Calendula, also yellow-flowered composites, as an application to wounds.

Burnett regards Helianthus as a great spleen remedy. Helianthus tuberosus is the Jerusalem artichoke. Many persons who cannot eat these on account of the excessive flatulence they produce. **Planets:** Sun, Saturn.

Homeopathic

The Sunflower is a spleen remedy, (Cean.) Chronic cases of intermittent fever. Spleen disorders. Coryza, catarrh, nasal hemorrhage and thick scabs in nose. Rheumatic pain in left knee. Vomiting, black stools, congestion and dryness of mouth and pharynx, redness and heat of skin. Marked effects on stomach with nausea and vomiting. Stools black. (Lept.) Dry mouth.

In the provers there were marked effects on stomach, nausea and vomiting. In one hemorrhoids appeared, the stools were black and soft and with them there was an emission of semen and later the stools were hard and black and occurred every other day. The skin was affected also.

Clinical

Colds. Constipation. Coryza. Hemorrhoids. Nasal obstruction. Nausea. Nosebleed. Spleen disorders. Throat, sore. Urticaria. Vomiting. Wounds.

Modalities

Better after vomiting. Symptoms aggravated by heat and relieved by vomiting. Skin in worse by external warmth.

Symptoms

Abdomen

Spleen enlarged and painful.

Eyes

Slight redness on margin of left upper lid with smarting in inner canthus. **Eyes** suffused. *Weakness* of the eyes.

Face

Anxious countenance. Face deeply flushed.

Food

Thirst, nausea.

Head

Headache.

Limbs

Rheumatic pain in left knee on descending stairs.

Lungs

Cough in forenoon with gelatinous expectoration streaked with blood. Breath rather difficult and hurried.

Mouth

Sticking in upper back teeth. Tongue and fauces very red and inclined to dryness.

Unusually hot taste when eating. Difficulty in articulation.

Rectum

Hemorrhoids. Stools: soft, black with emission of semen, hard, black every second day.

Skin

Skin generally of scarlet redness and very hot. Groups of red pimples inner side of knee with slight itching. Many urticaria-like pimples. Small red tetter to right of navel.

Tingling of skin.

PAGE 763

Stomach

Vomiting, produced apparently by too powerful a dose of the medicine, this recurred frequently, though in slight degree, when Helian. was taken for an ordinary cold.

Symptoms increased in severity until she vomited freely when she felt rather better.

Throat

Voice hoarse. Stiffness and dryness of the throat. Sensation of glowing in the throat and stomach immediately. Severe burning in fauces, esophagus and epigastrium.

Compare

(1) Lept. - black stools.

(2) Arn., Calen., Hyper. - wounds.

(3) Cean. - spleen.

SOURCES

Boericke. Clarke.

Heliotropium peruvianum

(heliotrophe)

Pharmacy

Helio. Heliotropium peruvianum. Heliotrope. Cherry pie. N. O. Boraginaceae. Tincture of whole fresh plant when in flower. Historical dose: Tincture and all potencies.

Herbal

Cooper has used this remedy clinically and considers hoarseness and "thick voice" a great indication. He has cured with in clergyman's sore throat. Heliotrope has been slightly proved. **Planets:** Mercury.

Homeopathic

Heliotropium has an action in uterine displacement, leucorrhea, backache. There is a bearing down from heavy, water-logged condition of uterus. Symptoms of pressure and tension were produced in many parts: pressure on the sternum impeding breathing, pressure on the head, on mons veneries, pain as if beaten in leg muscles.

Clinical

Clergyman's sore throat. Dysmenorrhea, membranous. Hoarseness. Leucorrhea. Uterus, misplacement.

Modalities

The head symptoms were better on walking in the open air. Other symptoms were worse after resting, worse on inspiration.

Symptoms

Chest

Pressure and oppression of external parts of chest, without affecting breathing.

Eyes

Feeling of tension in left inner canthus extending down into nasal bone. As if a swelling were there. *Eye seems drawn together and smaller.*

Female

Membranous dysmenorrhea. Leucorrhea. Pressure on mons veneries only when sitting. Uterine displacements with backache, especially if subject to loss of voice.

Head

Headache in forehead like a pressure and drawing pressing pain, better walking in open air.

Limbs

Pain, as if beaten above ankle, extending up the muscles, even when sitting. Itching on tibia, with sensations as if there was an eruption.

Stomach

Pressure in pit of stomach, worse on inspiration. Epigastric region is sore to touch, most violent after eating and in evening.

Throat

Voice thick, clergyman's sore throat.

Comments

The effect of Helio. given by Cooper to a lady who had been advised by several surgeons to have various organs either braced up surgically or removed, was described by her as having made her "feel just as if braced up" six hours after taking the dose. Helio. is especially indicated if there is also a tendency to loss of voice. It has also cured membranous dysmenorrhea.

Compare

(1) Borax - membranous dysmenorrhea..

(2) Symphytum - bruised pain in leg.

SOURCES

Clarke.

Helix tosta

(toasted snail)

Pharmacy

Helix. Helix tosta. Toasted snail. N. O. Helicide. Trituration. Historical dose: Trituration and all potencies.

History

Snails have a traditional for curing tuberculosis and homeopaths have put the remedy to the test by potentizing it.

PAGE 764

W. H. Leonard reports two cases cured with Helix t. 100,000c. **Planets:** Mercury, Moon.

Homeopathic

Dyspnea. Hemoptysis. Hemorrhage. Tuberculosis.

Comments

(1) A gentleman had frequent hemoptysis. Continuous hoarseness with a dry tickling cough, worse at night, preventing sleep. Dyspnea, worse from ascending stairs. He had already had all the usual remedies.

Helix 100,000c., three powders given. There was no more hemorrhage. A few weeks later a return was feared and a few more doses were given. Four months later the patient was greatly improved in health and remained well.

(2) A lady of tubercular diathesis developed the disease after confinement. Several well-indicated remedies failed to check its progress. At length hemorrhage set in. Helix was given as in the other case with prompt effect.

Hemorrhage ceased, cough and expectoration had gradually improved and in eight months the patient was well and remained so.

SOURCES

Clarke.

Helleborus foetidus

(bear's foot)

Pharmacy

Hell-f. Helleborus fetidus. Bear's foot. N. O. Ranunculaceae. Tincture of the root.

Historical dose: Tincture and all potencies.

History

The effects of Helleborus fetidus have been observed on several persons. **Planets:**
Saturn.

Homeopathic

Helleborus fetidus is a violent narcotic-acrid poison and in fatal poisoning cases death has taken place in convulsions. The vision is disordered, choleraic symptoms occur, skin, hair and nails exfoliate. The anxiety is better after vomiting. In the pathogenesis of Hell. fet. is a symptom: "profuse discharge from ulcerated surfaces."

Clinical

Cholera. Hair, loss. Nails, brittle. Scarlatina. Skin, peeling. Stiff-neck.

Compare

(1) Verat. - copious liquid stools.

(2) Hell., Hell-v., Colch.

SOURCES

Clarke.

Helleborus niger

(snow-rose)

Pharmacy

Hell. Helleborus niger. Black Hellebore. Snow-rose. Christmas rose. N. O.

Ranunculaceae. Tincture of dry powdered root. Juice of fresh root mixed with equal parts of alcohol. "Black" hellebore receives its name from the external color of its root, the root of Verat. is extremely white. Historical dose: All potencies, tincture to third potency.

History

Black Hellebore was one of the drugs used to produce the "Helleborism of the ancients," a subject of Hahnemann's famous writings. Commonly it is known as Christmas Rose or black hellebore.

If the abbreviation 'Hell.' and the adjective black is remembered, many of its typical symptoms will be understood.

Cooper, who has studied the Hellebores very closely, says that they produce the "sinking sensation" more intensely than any other drugs. The Winter Aconite (Eranthis hyemalis), a close ally of Hell. n., "acts on the solar plexus and works upwards, causing dyspnea."

He quotes from Flora Historica an interesting account of how French prisoners of war at Norman-cross were suffering from an epidemic of night-blindness, (nyctalopia), when for lack of snuff they took to using powdered Black Hellebore with the result that they were cured of their blindness in a few days.

Hahnemann says: "I conclude from various observations that one of the first effects of Black Hellebore is a kind of stupor, a dullness of the sensorium commune, a condition where with sight unimpaired, nothing is seen very fully and the patient does not pay any attention to anything.

The hearing is perfectly sound, but nothing is heard distinctly. With perfectly constituted gustatory organs, everything seems to have lost its taste. Where the mind is often or always without ideas. Where the past is forgotten or little remembered. where nothing gives one any pleasure. Where one's sleep is very light and a really sound, refreshing

sleep is not to be had and where one desires to work without having the necessary strength or attention required for it. **Planets:** Moon, Mercury.

Homeopathic

Helleborus niger produces a state of sensorial depression. It is a remedy for low states of vitality and serious diseases, when everything around the patient looks dark. Patient's face, lips, hands etc. become dark, nostrils sooty, hence it is a dark and dusky remedy. It affects the mind and the brain, senses become blunt and responses are sluggish, sees, hears, tastes imperfectly.

PAGE 765

Muscles do not obey the will, hence staggers, drops things etc. Mania of a melancholy type. Sees, hears, tastes imperfectly. General muscular weakness, which may go on to complete paralysis, accompanied by dropsical effusions. Sinking sensation. State of effusion in hydrocephalus. Characteristic aggravation from 4 to 8 p.m.(4-8 pm:bladder kidney heart involved) (Lyc.)

Muscular weakness ending in complete paralysis. Convulsions and twitching of muscles, automatic acts, automatic motion of one arm and leg. Onset of the disease is gradual (gradual onset denotes deficiency pattern)with progressive weakness. Lies on back with knees drawn up or with legs spread apart. Dropsical swellings.

Epilepsy with consciousness, followed by deep sleep. Convulsions with extreme coldness in nursing children. Noise arrests the paroxysms of convulsions. Feeble and delicate. One side is paralyzed, other keeps up automatic motions. Serous effusions. Parts usually red turn white.

Clinical

Albuminuria. Amenorrhea. Apathy. Aphthae. Brain disorders. Cholera. Coma. Concussion. Convulsions. Cystitis. Depression. Diarrhea. Dropsical swellings. Dullness. Epilepsy. Fevers. Headaches. Head injury. Hernia. Home-sickness. Hydrocele. Hydrocephalus. Kidneys, congestion. Melancholy. Meningitis. Night-blindness. Post-partum convulsions. Scarletina. Strokes. Stupor. Tetanus. Typhoid fever. Ulcers. Wounds.

Causations

Ill effects of checked exanthemata, blows, disappointed love.

Modalities

Better in warm air,(needs blood and oxygen in the blood as blood warmth the body) by wrapping up.(to warm the organs) Better from when thinking of it or when mind is diverted.(attention gives relief that means not enough energy of heart and kidney to focus and attentive) Breathing easier when lying down.(lung qi deficient) Worse from cold air, puberty,(kidney yin insufficient) dentition,(kidney yin deficiency) suppressions, (suppression of water related kidney ailments probably) exertion.(kidney yang deficiency) Worse from motion.(qi deficiency) Worse from evening until morning.(entire yin time aggravation) Worse from uncovering.(needs warmth) Worse 4 to 8 p.m. (lidney,bladder and heart time)touch. Worse from stooping.(yin –stooping) .

Symptoms

MIND

Dull,(spleen qi deficiency –thinking and also spleen qi gives qi to heart for blood push) stupid,(spleen deficiency) slow of perception or apathetic.(perception –heart so slow of perception means heart qi less or heart power which includes spleen is less) Inattention. (heart spleen and kidney involved as kidney yin fix ground and focus the yang of heart in the middle jiao so kidney heart communication problem) Slow in answering.(not able to retrieve data speedly from kidney) Gloomy.(heart depressed,lung depressed) Thoughtless staring.(kidney stored contents not coming to heart that is consciousness) Dismal, despair, blank.(no content in heart that is kidney content not coming to heart) Complete unconsciousness.(kidney represents memory and unconscious so kidney overpowered heart or heart yang collapse) Envious seeing others happy. Hysterical mania from self accusation.(depressed nature of mania due to low self image or shen so depressed heart) Involuntary sighing.(involuntary means less conscious control that is heart and sigh is qi stagnation)Irritable, worse consolation, does not want to be disturbed.(heart disturbed – irritable-due to low shen or self image so consolation aggravates) Would not eat or speak(shen disturbed may be due to rejection of partner so low self image etc). Fixed ideas.(spleen problem) Melancholy during puberty.(depressed heart due to kidney deficiency) Things look new.(as no memoery-kidney collection) Picks at lips and clothes. Believes she is doing wrong,(feels responsible herself so low self image) thinks she is going to die on a certain day, just sits and says nothing, does nothing. Idiocy after a stroke.

Abdomen

Gurgling as if bowels were full of water.(spleen qi deficiency so dampness accumulation in bowels) Distended. Swollen, painful to touch.(dampness accumulation so qi stagnates so painful to touch)Inflation of the epigastrium (dampness clloection)with pain of ulceration(heat) and impeded respiration.(damp blocking the lungs) Pinchings in the abdomen.(pinch—qi stagnation) Rumbling and borborygmi in the abdomen.(dampness collection) Severe hard pressure on middle of os pubis.

Back

Gnawing(blood stagnation) and obtuse lancinations(lancinating-blood stagnation) of the spine. Pain, as from a bruise,(blood stagnation) between the shoulder-blades.

Breasts

Pain under left nipple,(yang side so qi stagnation) pains all over her,(all over –qi stagnant pain) forced her menses on, had to get up at night to pass water.(yin time so damp accumulation)

PAGE 766

Chest

Constriction of the throat, nose and chest.(lung cold) Heat in the chest.(heart heat)

Ears

Shootings(wind) in the ears,day and night with searching piercing.(pierce-blood stagnation)

Eyes

Eyeballs turn upwards, squinting, vacant look.(liver wind,heart vacant) Pupils dilated. **Eyes** wide open, sunken.(liver wind) Stupid staring or tired look.(heart vacant as above) Night blindness.(yin time so liver blood vacuity liver fire) Photophobia without inflammation.

Face

Pale, sunken,(heart qi depressed) edematous,(heart disease) red hot or cold.(heart heat or cold) Wrinkled.(poor supply of blood to face.) Neuralgia on left side,(yang side heart qi deficiency or stagnation) parts so tender he cannot chew(heart qi stagnation). Cold sweat.(heart and lung vacuity cold sweating) Constant chewing motion of the lower jaw,(large intestine channel blood stagnation,blood stagnation-constant) hangs open(large intestine qi stagnation). Cold sweat on.

Female

Suppression of the menses.(kidney yang deficiency) Amenorrhea(kidney yin excess from heart yang depressed) from disappointed love, from damp feet and getting wet through.(dampness accumulation in lower jiao) Uterine dropsy with piercing pain in limbs.(kidney area dampness with spleen blood stagnation) Puerperal convulsions, arrested by sudden noise.(qi stagnation in the heart so heart wind –convulsion and noise goes to heart so noise affects) Pains all over her body forces her menses on.(all over-qi stagnation excite blood stagnant in liver so menstruation starts or excite heart fire which opens the gates)

Food

Aversion to vegetables,(dampness aversion)meat(phlegm),sauerkraut. Greedily swallows the cold water, then bites the spoon, while unconsciousness, with Hydrocephalus.(dampness accumulation in head and heart qi vacuity so unconscious)Children nurse greedily. Thirst absent in most complaints or thirst with disgust for drinks.(damp or damp heat) Speedy satiety with repugnance as to rest of meal.(phlegm in stomach) Dislike to food, especially meat, green vegetables and sauerkraut.

Head

In concussion of the brain from blow on the head after Arnica has failed.(qi stagnation due to blood stagnation) Rolls the Head constantly with moaning in hydrocephalus.(qi stagnation due to damp accumulation) Bores into pillow for relief in meningitis.(boring—blood stagnation meningitis) Strikes the head.(blood stagnation in head) Forehead wrinkled in folds in brain disorders.(qi stagnation in stomach in brain disorder) Cold sweat. Stupefying headache,(blood stagnant headache) worse stooping.(yin type) Shooting pains, causing sudden screams.(shooting-wind,sudden-heat,excess condition) Dull pain in occiput with sensation of water swashing inside.(kidney qi deficiency with spleen damp accumulation) Headache ends in vomiting.(liver channel qi blockage due to damp so when damp goes out through vomit headache subsides) Electric shock passes through brain before spasms.

Heart

Palpitations.(depressed heart) Anxiousness about heart which prevents him resting anywhere.(heart qi irritation) Pulse, small, slow, almost imperceptible. **Slow**, small, **soft** pulse.(depressed heart qi)

Kidneys

Nephritis. Uremia. Dropsy.(water collection due to lung weakness) Suppressed, scanty, dark, coffee-grounds sediment.(coffee color-blood stagnation and coffee—heart related and heat) Urine with dark flakes or sediment,(urine with blood stagnant clots) retained, bladder over-distended during pregnancy.(bladder qi/damp or blood stagnation) Bladder overdistended. Frequent urging to urinate with scanty discharge.(bladder qi deficient so frequent urge with internal bladder heat so scanty urine) Child cannot urinate.(bladder

heat) Scanty urine with sediment like coffee grounds. Feeble stream. Deep-colored urine.
(heat) A large quantity of pale, watery urine is emitted.(damp cold in bladder)

Limbs

Limbs heavy and painful.(damp heat accumulation) Stretching of limbs.(spleen yang deficient so stretches as stratching is yang) Automatic motion of one arm and leg except when asleep.(heart yang deficient so no control on limbs as yang is motion and stops when yin condition that is sleep) Thumb drawn into palm.(yin condition or heart depressed) (Cupr.) Legs drawn up with every attempt to change the position.(damp in legs so to counter it excess effort to draw up legs as conscious is bit less in heart) Edema of legs.(dampness accumulation) Vesicular eruption(heart heat-spleen channel) between fingers and toes. Contractive pain in the loins.(cold in loins) Shiverings, alternating with shooting pains in the limbs.(wind cold alternating of wind effect or cold effect in the spleen)

Lungs

Suffocating constriction in the throat and nose.(cold damp or blood congealation cold stagnation) Sighing respiration.(lung qi stagnant) Accelerated or deep and slow respiration.(yang type or yin type respiration) Chest constricted, gasps for breath.(cold stagnation) Hydrothorax. Cough, dry worse at night,(lung yin vacuity) **smoking(lung heat increase)** or suddenly appears while smoking.(lung heat cough) Breathes easier lying down.(lung qi deficiency breathlessness) Short, dry cough.

Male

Hydrocele from suppressed eruption, on either side.(suppressed eruption is lung qi stagnant so hydrocele or water accumulation is due to kidney yin stagnation) or Suppression of sexual desire with flaccidity of the genital parts.(liver qi suppressed or depressed so liver yang deficient in liver channel so flaccid)

Mouth

Lips dry and cracked.(stomach yin deficient) Meaningless picking of lips.(spleen qi irritation) Chewing motion.(stomach qi irritation or blood stasis) Greedily swallows cold water, though unconscious.(heart yang collapse or heart fire so unconscious so needs water) Child nurses greedily with disgust for food. Horrible smell from Mouth.(kidney a---putrid,stomach heat) Tongue red and dry.(heart yin deficient) Tongue, numb, trembling(heart qi stagnant so numb and tremble) or covered with yellow ulcers.(stomach or heart heat) Ptyalism(stomach heat or heart heat push fluid out) with sore corners (heat)of the mouth. aphthous, lienteria. Bitter taste(heart-stomach) in the throat worse eating.(phlegm/food stagnation) Falling of lower jaw.

Neck

Neck rigid, (Meningitis).(blood stagnation) Stiffness and painful sensibility of the neck and the nape of the neck during movement.(blood stagnation so during movement sensibility or otherwise phlegm stagnation) Swelling of the glands of the neck. (stomach,kidney yin vacuity ,small or large intestine channel heat)

PAGE 767

Nose

Dirty, dry nostrils.(phlegm heat) Nostrils, sooty, dilated.(phlegm heat) Rubs nose.(to clear the phlegm) Smell diminished.(phlegm heat obstruction) Nose pointed.

Rectum

Stools, loose, watery or of white jelly like mucus involuntary. (large intestine dampness with heart yang deficiency so involuntary) Ascites. Stools like frog-spawn. Diarrhea with pain in the abdomen and nausea. (spleen vacuity heat diarrhea, stomach qi stagnant nausea and pain) Watery and frequent evacuations. (lung qi/large intestine qi deficiency or large intestine damp heat) After an evacuation, burning hot smarting at the anus. (blood stagnation in anus so smarting) Feeling as if intestines had no power to evacuate feces during soft stool. (lung qi, large intestine qi deficiency) Involuntary stools. Hemorrhoids. (blood congestion)

Skin

Pale, dropsical, itching. (heart circulation slow so pale and water accumulation, wind or damp heat for itching.) Anasarca. Livid spots on skin. Sudden, watery, swelling of skin. (lung qi deficiency or qi stagnation so depuration and distribution of water disturb so accumulate in places) Falling off of hair and nails. (lung yin deficient, liver yin deficient) Angio-neurotic edema. Military eruptions. General desquamation of the skin.

Sleep

Sudden screams in sleep. Stuporous, cannot be fully aroused. (heart qi and shen depressed) Sleeps with shrieks and starts. (starts—liver, sleep—heart and liver) Muscles twitch during sleep. (liver and spleen qi stagnation—twitch) Cri encephalique. Cannot be fully aroused. (heart yang depressed)

Sleep

Sleepiness with eyes half open and pupils turned upwards. (semiconscious so eyes half open, pupil—kidney turning upwards means vacuity heat/fire or wind) Confused, anxious dreams. (heart qi disturbance) the remembrance of which is not retained. (kidney-heart communication problem) Tossing in the bed.

Stomach

Nausea, sometimes with excessive hunger. (stomach heat with qi stagnation) Vomiting of greenish-black substance with colic. (liver qi stagnant pushing up blood stagnant substances) Anorexia with brain complaints. Intense burning, which extends to esophagus during pregnancy. (kidney yin deficiency increase liver yang/fire which attacks stomach—esophagus) Nausea rising up from pit of stomach. (yin vacuity heat as deep or pit is yin) Heaviness, fullness of the stomach. (phlegm stagnation) Burning and scraping in the stomach. (phlegm heat or blood stasis)

Teeth

Grinds the teeth. (kidney qi irritation or worms) Toothache at night with shooting and tearing pains. (blood stagnation and wind pain in stomach or large intestine channel) worse by cold and heat.

Temperature

Coldness of the body and especially of the limbs. (yang deficiency and spleen qi deficient) Chill spreads from arms. Goose bumps. Chill with fever, sweat and aversion to uncover. (fever at middle level causing sweat so further qi dissipation on surface so chilly so sweat cold) Cold sweat. Chilliness predominates during the day with heat of the face and drowsiness. (heart heat so drowsiness at yang time but lung/spleen qi deficient so chilliness) Nocturnal sweat towards the morning. (yin deficiency sweat) Heat followed by chill with colic. (protective qi heat then pathogen goes in interior or protective qi looses so chill) Cold, at times clammy perspiration. (yang collapse perspiration)

Throat

Bitter taste in the throat,(heart related) worse by eating.(excess condition) Scraping feeling on back of palate.(may be scraping -blood congestion)Tiresome dryness on palate and cutting and scraping pain on moving the parts in swallowing.(cutting—blood stasis) Aching, sore throat on swallowing, feels excoriated.(aching-qi/blood/cold stagnation,excoriated—blood stasis)

Comments

Teste groups Hell. n. in the Chamomilla class with Gratiola and Viola tric., all of which cause "a joint derangement of the cerebral functions and even of the whole nervous system, a painful increase of the sentient action, followed by a considerable depression of the vital forces and a certain disorder of the mental faculties."

He cured with Hell. n. a case of epilepsy in a little girl five weeks old after the failure of Cham. Cham. was given to the nurse, Hell. n. directly to the patient.

From a purely nervous derangement of this kind, the action of Hell. n. goes on to actual inflammatory states of the brain and its meninges. The drowsiness is a leading keynote of the conditions of meningitis and fever to which the drug is homeopathic.

Such a condition is found when effusion has taken place from the inflamed membranes and here the ancient reputation of Hell. n. in dropsical conditions is confirmed.

The forehead is wrinkled, there are automatic movements of one arm and leg, while the other is paralyzed, the head rolls from side of side with screams, greedy drinking of water, chewing motion of jaws, urine scanty or entirely suppressed, sometimes with sediment like coffee grounds.

This condition of urine is an indication for Hell. n. in many states and a sign of the favorable action of the remedy is, as Nash points out, an increase in the amount of flow. In post-scarlatinal dropsy with these indications it is of great service. It has cured concussion of the brain resulting from a blow on the head after Arn. had failed.

PAGE 768

In this case one pupil was larger than the other, the patient was drowsy, answered questions slowly, one leg dragged on walking. In fever there is sooty appearance of nostrils, dry, yellow tongue with red edges, breath horribly offensive, drinks roll audibly into stomach, fever worse 4 to 8 p.m. , face pale, almost cold, pulse faint, imperceptible, picks clothes and lips.

Among the dropsies cured may be mentioned hydrocele from suppressed eruptions. The old use of Hell. as an application to ulcers seems to have depended on its property of draining the tissues. In the pathogenesis of Hell. fet. is a symptom bearing on this: "profuse discharge from ulcerated surface."

Cooper has cured ulcers with dropsical conditions with Hell. n. and Hell-v. given internally. The headaches of Hell. n. are stupefying, sensation as though contents of head were bulging at forehead and eyes, shocks pass through the brain like electricity, boring and shaking in forehead and occiput, bruised pain, heat in brain. Pains in occiput and nape of neck.

Clarke frequently cured with Hell. n., also headache which the patient can only describe as a "stupid headache."

There is vomiting and purging as with the other Hellebores, the vomit is apt to be green and the stools jelly-like. There pulse is slow and feeble, the respiration is slow and the temperature low. Torpidity and apathy run through the remedy. In this it approaches Opium. A stroke followed by idiocy.

Compare

(1) Threatening effusion, Tub., Apis, Zinc., Op., Chin., Cic., Iodof.

(2) Hell. fetidus - Acts especially on spleen (Cean.), also rectum and sciatic nerve.

Splenic pains extend to scapula, neck and head, worse left side and evening, chronic ague cake, hypertrophied uterus, glandular enlargements, hair and nails falling off, skin peeling.

Helleborus orientalis

Pharmacy

Hell-o. Helleborus orientalis. N. O. Ranunculacee. Tincture of root. Historical dose: All potencies.

History

This was proved by V. Schroff on Lederer and produced symptoms like those of the other Hellebores. **Planets:** Mercury.

Homeopathic

These are peculiar with Hell-o.: Accumulation of water in the mouth with clean tongue. Bad taste with clean tongue. Prostration, exhaustion and disinclination to work, burning in stomach, diarrhea. The symptoms were better by coffee.

Clinical

Apathy. Diarrhea. Exhaustion. Indigestion. Salivation.

SOURCES

Clarke.

Helleborus viridis

(green hellebore)

Pharmacy

Hell-v. Helleborus viridis. Green Hellebore. N. O. Ranunculacee. Tincture of root of young shoots. Historical dose: All potencies.

History

Hell-v. was also proved by Schroff. Cooper has cured with it ulcers of the leg, near the ankle after the failure of Hell. n.

Also a case of epilepsy in a child, the concomitant symptoms being: Head sweats before the fit, diarrhea for four days, sleepy. **Planets:** Moon.

Homeopathic

Helleborus viridis produced roaring in the ears, itching in the nose and prickling of the tongue, diarrhea of liquid stools, a condition of sopor.

Clinical

Colic. Diarrhea. Epilepsy. Sore throat. Ulcers.

SOURCES

Clarke.

Heloderma-h. + -s. (old abbr.)

(gila monster)

Pharmacy

Helo. Heloderma suspectum. Gila Monster. N. O. Heloderma of the Lacertilia.

Trituration of sugar of milk saturated with the venom. Solution of the venom in alcohol.

Historical dose: All potencies, thirtieth potency.

PAGE 769

History

The first notice of the remedy is from Dr. Charles D. Belden, who supplied Boericke and Tafel with a living specimen and also poison obtained by himself. The Gila monster is a native of Arizona, New Mexico and Texas. It is smaller than the Mexican variety and is called, by Cope, Heloderma suspectum. It is the only lizard whose character is not above reproach. Heloderma from its skin being studded with nail or tubercle-like heads.

"An ugly, disagreeable-looking creature, the head long and blunt, eyes black and bead-like, tail half the length of the body, thick-set and club-like. The entire body cased in a thinly coated armor, marked curiously with yellow and black."

Heloderma horridum, the "Crust lizard," which is also called "Gila monster," is a Mexican lizard and is generally regarded as harmless. At any rate it is agreed that there is one lizard that is poisonous and that lizard is a Heloderma and our remedy is the poison obtained therefrom.

Heloderma is sluggish and slow of movement when kept in the dark, but may develop great activity when brought into the sunlight. It is most tenacious of life, the only vulnerable part seems to be at the junction of the head with the spine, a blow on which will kill it.

Of the bite of the reptile Belden says this animal does not bite frequently, but when it does it is understood that the result is a benumbing paralysis similar to Parkinson's disease or to locomotor ataxia. There is no tetanic phase. **Planets:** Moon.

Homeopathic

Heloderma is indicated in many forms of disease characterized by great coldness, "an arctic" coldness. Cold waves from occiput to feet or ascending. The most peculiar symptom of this poison is the intense icy coldness, as if frozen from within outwards. Breath tongue cold, cold feeling in lung and chest, coldness across scapula, burning in spine. Cold creeping ring around the body.

The most unusual action of the venom is noted upon the eyes of the mouse. The eyeball becomes more prominent and the cornea shows opacities. The exophthalmus is due to the pressure of the blood behind the eyeball (Boyd).

Heloderma causes benumbing paralysis like paralysis agitans and locomotor ataxia. The result of the bite is a benumbing paralysis like paralysis agitans or locomotor ataxia. There is no tetanic phase, a condition almost reverse in objective symptoms to Hydrocy. acid or Strychnia.

Steps high and puts down heel hard, sensation as if walking on a sponge or as if with swollen feet. Turns to right when walking. Stitch pains going from left to right. Weak, giddy, making it difficult to stand.

Unable to balance himself. In addition patient staggers while walking. Movement does not increase the pain. Throbbing all over body. Bone pains.

Clinical

Brain, affected. Cerebrospinal meningitis. Coldness. Headache. **Heart** failure.

Locomotor ataxia. Neuralgia. Numbness. Paralysis. Paralysis agitans.

Modalities

Better from stretching, warmth. Worse when thinking of her ailments, cheered by company. Worse from exposure to cold air. Worse in stormy weather. Worse when lying in bed at night. Worse from cold with desire for warmth. Worse after sleep, at night.

Symptoms

MIND

Forgetfulness. Melancholy with weeping. Depressed, feels blue. No inclination for exertion in any way. Difficulty in remembering the spelling of simple words. Very depressed.

Abdomen

Sensation of constriction about the whole abdomen. Sharp shooting pain in bowels, more on left side. Pain across pubic bones, extending down into left testicle. Stitching pains in bowels. Throbbing in bowels. Rumbling in bowels.

Back

Coldness across scapulae. Burning along spine. Stiff neck, aching in bones of neck. Painfulness of upper neck. Chill in back from base of brain downwards. Pain in back, pain in lumbar muscles awakening him.

PAGE 770

Chest

Cold feeling in lungs and in heart. Sharp stitch through right nipple to inside of the right arms. Cold feeling in right lungs.

Ears

Pressure behind left ear, pressure in ear from within outward. Copious flow of wax. Ears dry and scurfy.

Eyes

Itching of eyelids, lachrymation. Weight of eyelids, hard to keep open.

Face

Cold crawling feeling, as if facial muscles were tight. Sensation of heat. Flushes of heat. Cold, crawling feeling from temple down right cheek. As if pricked with points of ice. As if facial muscles were drawn tight over bones. Stiffness of jaw.

Female

Burning and dryness of the vagina.

Food

Dislikes sweet things and worse from taking them.

Head

Cold band around Head. Cold pressure within the skull. Eyelids heavy. Pain beginning in right ear, extending round back of head to left ear.

Heart

Palpitations and dyspnea from slight exertion. Cold feeling in heart. **Slow labored thumping of heart.** Pressure at heart. Tingling around heart. Trembling and coldness around heart. Oppression around heart. Sticking pains, shooting from left to right. Stitches in heart. Soreness in heat, more under left nipple.

Kidneys

Aching in right kidney, stitch pain in right kidney. Bladder irritable, frequent urging to pass urine. Tenderness in urethra with sensation of discharge. Urine not as free as usual, muddy. Intermittent flow. Urine is greenish-yellow, fetid like decaying fruit. Burning in the urethra during and after urination.

Limbs

Tingling, creeping sensation on the legs as if from insects. Leg is insensible to an electric battery. Leg is wasting away, skin very dry and inelastic. Ankle turn easily when trying to walk. Numbness of the arms from the hands to the elbows. Stretching relieves pains in muscles and limbs. Numbness and trembling. Cyanosis of hands. Coldness. Sensation as if walking on sponge and as if feet were swollen. Staggering gait. Cock's gait. When walking, lifts feet higher than usual and puts down heel hard. Feet cold as ice or burn.

Lungs

Slight, hacking cough with pain in the left scapulae. Fullness in chest, requiring an effort to inflate the lungs. Oppressed for breath from least exertion.

Male

Cold penis and testicle with gluey discharge. Pain and enlargement of left testicle.

Mouth

Breath cold. Tongue dry and cracked in the morning. Tongue cold, tender and dry. Very thirsty. Swallowing difficult. Dryness of lips. Soreness.

Nerves

Startled easily, Trembling. Tired feeling, very weak and nervous. Intense aching in bones and all parts of body. Trembling of left side, hands shaky. Trembling can be controlled by effort of will.

Nose

Left nostril sore, ulcerated. Dry, itching scurfs in nostrils. Severe attack of sneezing. Fluent discharge.

Pulse

Full and jerky.

Rectum

Constipation from torpor of the rectum. Hemorrhoids and itching of the anus. Loose, copious stool, lumpy, preceded by stitches in abdomen. Stool loose, mushy with considerable flatus. Stool soft, dark, difficult to expel. Hemorrhoids swollen itch and bleed.

Skin

Yellow skin. Itching of skin as from insects.

Sleep

Drowsiness, but inability to sleep. Restless sleep, awakens at 3 a.m. Awakened from sleep by jerking in head, trembling of limbs, pain in lumbar muscles.

Stomach

Empty belchings, especially before breakfast. Empty, gone sensation in the stomach. Acid burning in stomach.

PAGE 771

Temperature

Internal coldness, as if frozen to death. Temperature subnormal. (Camph.) Cold spots. Cold rings around body. Cold waves. (Abies-c., Acon.). Arctic coldness. Internal coldness. Severe chill ran down back. Cold rings around body. Cold waves ascend from feet or downward from base of brain.

Throat

Swallowing difficult. Dryness, parched sensation. Tingling. Soreness, tenderness to touch. Stinging, sore feeling in right tonsil.

Vertigo

Sensation as if would fall to right side.

Comments

The venom is alkaline in reaction. Numbers of cases of bites are on record. A dog bitten in the nose "uttered fearful howls and when after great difficulty, he was released, had symptoms like 'blind staggers,' began turning around in a circle and died in twenty minutes."

A young miner bitten in the leg, though in robust health at the time, at once began to lose flesh, became melancholy and died in a few months like one in rapid tuberculosis. Helod. has the reputation of being fatal to drinkers and to affect the temperate less severely.

This, says Belden is borne out somewhat by the recovery of Mr. Vail of Tucson, a man of temperate habits after a bite and the death after lingering several months of a man bitten whilst drunk. This lingering nature of the action of the poison is markedly different from the snake poisons, which generally kill quickly if at all.

An Indian woman bitten in the leg, survived, but the leg shriveled and she became a semi-idiot, though she lived over thirty years after. The writer of an article quoted by the Recorder from the New York Sun relating her case, thus describes the effect:

"Where the person survives an hour or two after the bite, the agony is described as awful to witness. The poison goes through the human system with rapidity and causes unspeakable pain and excruciating agony from head to foot.

Though paralyzed, every muscle, bone, sinew and nerve is keenly alive to intense pain. The sufferer's head seems as if it would split open. Very few persons bitten can speak after the first fifteen minutes, but unconsciousness seldom comes until a few minutes before death."

Mr. Vail says his suffering was intense, the pain proceeding from the wounded part to the head and back. Immediately after receiving the wound, which was on his index finger, both wrist and finger were tightly bandaged. Two hours later the wound was cleansed and dressed and the bandages reapplied. For three days those intense pains would shoot toward the head and spine on loosening the bandages in the least degree.

After three months the only perceptible result was a swollen tongue which seemed then unwilling to resume its proper size. The treatment he received was profuse sweating by

administration of Jaborandi. This much was known when Dr. Robert Boocock, made his proving which has given the remedy a definite place in the homeopathic Materia Medica.

The first experience was with a solution of the 6x trituration, one drachm in four ounces of alcohol. Of this he took three or four drops. He was seized with an internal coldness from the heart as if being frozen to death internally and had no way of warming himself. "Coldness from within outward." The coldness of this remedy is more intense than that of any other. "Arctic coldness," the prover called it.

The coldness was at times followed by sensations of heat and burning. Dr. Boocock's observation of the cold sensations of Helod. was confirmed by a young clerk in the employment of Messrs. Boericke and Tafel, who took six doses of Helod. 6c out of bravado.

The second night he awoke and the impression that he was under the influence of Helod. flashed on his mind. He felt a cold sensation creeping down his body and legs and was in a very cold clammy sweat.

PAGE 772

This lasted all the rest of the night and he could get no more sleep. It began to pass off by morning and he felt no more of it.

The constricting sensations of the serpent venoms were produced by Helod., also the numbness and darting pains and the sensitiveness to external pressure. Many of the symptoms came on in the night waking the prover from sleep (like the "worse from sleep" of Lach.).

The tremors, spongy feeling of feet on walking, pains in back and limbs, bear out Belden's commendation of Helod. in locomotor ataxia and Parkinson's disease. Dr. Boocock gave great relief with the medicine in a case of Parkinson's disease.

E. E. Case effected great improvement in a case of locomotor ataxia in an auburn-haired woman, 55. She had the classical symptoms of the complaint and "tingling, creeping sensations in legs as if from insects. She was worse lying in bed at night, worse from exposure from touch.

Arms numb. Legs insensible to battery. Tongue dry and cracked. Swallowing difficult." Under Helod. 900c and later, 45,000 c after the appearance of an eruption, she recovered a fair degree of health and usefulness.

C. E. Johnson reported to Dr. Boocock the relief of a woman who had many of the symptoms of the proving (and had been pronounced incurable), complaining especially of the intense coldness. She received Helod. 200c and the coldness disappeared almost completely.

Boocock cured a case of "blue hands," remaining long after diphtheria paralysis and he restored two patients apparently moribund. In one case the breathing was slow, "tongue cold and slate-colored, breath cold."

The other case was that of a woman, 65. In the act of dressing, strength suddenly left her, mouth fell open tongue and breath cold and she was apparently dying and felt so. There was intense pain at the back of the head. Helod. 200c was given, as in the other case and she made a good recovery.

The weakness Dr. Boocock experienced in the proving he compared to that of Gels., only Gels. did not dry up the mouth and secretions as Helod. did.

Compare

(1) Lacerta - skin eruptions. Vesicles under tongue. Increased mental acumen. Difficult swallowing. Constant accumulation of saliva in the mouth. nausea, Violent pressure in stomach. Camph., Lach.

(2) Croc-h., Camph. - coldness.

(3) Arg-n., Alumina - locomotor ataxia.

(4) Ant-t. and Merc. - Parkinson's disease, Gels., Con., Lyssin.

Helonias dioica

(unicorn-root)

Pharmacy

Helon. Helonias dioica. Unicorn-root. False Unicorn. Devil's Bit. Blazing Star. N. O. Melanthacee. Tincture of the root. Triturations of the resinoid Helonin. Historical dose: Trituration, tincture and all potencies, tincture to sixth potency.

Herbal

Helonias like Aletris to which it is a botanical ally and with which it has been often confounded (both have been called "Unicorn plant," or "Unicorn root," "Star Grass," and "Blazing Grass or "Blazing Star" is a uterine remedy of great power.

Helonias has an extensive range of action, as its provings show, but the organ predominantly affected is the uterus. It has been called with justice a "uterine tonic," and one of the keynote indications for its use is a "consciousness of the womb," and relaxation of the uterine ligaments, misplacements and prolapse have been removed by Helon.

PAGE 773

Homeopathic

Helonias dioica is a remedy for females, who are exhausted by frequent pregnancies, abortions, enervated by indolence and luxury or over domestic work and who always complain of tired backache and tired feeling. Women with prolapse from uterine atony or for those worn out with hard work, tired, sleepless with strained muscles that burn and ache.

Sensation of weakness, dragging and in the sacrum and pelvis with great languor and prostration, are excellent indications for this remedy. There is a sensitiveness expressed as a consciousness of a womb. Tired, backaches in females.

The weakness shows itself also in a tendency to prolapse and other malposition of the womb. The menses are often suppressed and the kidneys congested. It seems as if the monthly congestion instead of venting itself as it should through the uterine vessels, had extended to the kidneys. With it all, there is a profound melancholia.

Patient must be doing something to engage the mind. Diabetes mellitus and insipidus. Constant aching and tenderness over kidneys. Muscles, heavy, sore, aching, burning. Constant aching and tenderness over the kidneys. Diabetes insipidus and mellitus.

Anemia. Uterine reflexes. Dropsy after uterine hemorrhage.

Clinical

Albuminuria. Amenorrhea. Anemia. Atony, uterus. Backaches. Breast disorders. Chlorosis. Cramps. Debility. Depression. Diabetes. Dysmenorrhea. Impotence. Kidney, pains. Leucorrhoea. Lochia prolonged. Menopausal disorders. Menorrhagia. Metrorrhagia. Pruritus vulva. Rheumatism. Splenalgia. Infertility. Uterus disorders.

Constitutions

It is specially suited to nervously run-down females, easily fatigued by any work, who complain of a tired backache, a tired feeling extending into the limbs. Some of this passes off after commencing to work. **Planets:** Venus, Moon.

Modalities

Better from if busy, diversion, holding abdomen. Worse from fatigue, stooping. Worse motion touch. Worse pregnancy, pressure of clothes. Touch aggravates cannot bear the least pressure of the dress on breasts, nipples, kidneys, etc.

Symptoms

MIND

The mental symptoms of Helon. are very marked and the extreme depression, gloom and irritability of this case are characteristic of the remedy. One of the provers had a preliminary feeling of wellness before being plunged into a mental hell. Profound melancholy. Irritable, cannot endure the least contradiction. Conversation unpleasant. Desires to be left alone. Patient is better when kept busy with mind engaged, when doing something. Consciousness of a womb. Extremely gloomy. Finds faults with everyone.

Abdomen

Burning in the lower third of abdomen. Pain in left side, as if in spleen, which feels as if distended, causing a dull ache. Colic-like pains in hypogastric region off and on all day.

Motion and rumbling in abdomen, as if diarrhea would come on, cramps in the stomach.

Back

Pain and weight in Back, tired and weak. Aching between scapulae. Aching and burning across the lumbar region, can trace outlines of Kidneys by constant burning. Boring pain in lumbar region, extending down legs. Great languor, better exercising. Weakness, weight and dragging down in sacrum, down to buttocks.

Breasts

Breasts swollen, nipples painful and tender, worse pressure of clothes.

Chest

Chest sensitive to the air. Chest squeezed as if. Aching, as if the front of chest had been compressed in a vice.

Face

Pale, earthy. Sallow, having an expression of suffering.

Female

Backache after miscarriage, (Kali-c.) Dragging in sacral region with prolapse, especially after a miscarriage. Pruritus vulvae. Weight and soreness in womb, conscious of womb. Heavy dragging in pelvis. Uterus, heavy, sore, tender, ulcerated or prolapsed or other malpositions. Menses too frequent too profuse. Menses, suppressed, kidneys congested. Loss of sexual desire and power with or without sterility. Parts hot, red, swollen, burn and itch terribly. Vulva, aphthous inflamed. Foul, lumpy or curdled leucorrhoea. Albuminuria during pregnancy. Debility attending the menopause. Hemorrhage from atony of dark foul blood.

PAGE 774

Food

Loss of appetite, belchings, fullness, cramp and painful congestion of the stomach. Appetite poor, food tasteless, "bilious", sleepy during the day.

Head

Burning sensation on top. Headache, better mental exertion. Heat or upward pressure in vertex, as if skull were too full.

Heart

Palpitations.

Kidneys

Burning sensation at the kidneys. Constant aching, extreme tenderness of kidneys. Dull ache and heat in region of the kidneys instead of menses. Nephritis of pregnancy with obstinate vomiting.

Kidneys

Involuntary discharge of urine after the bladder feels empty. Urine, profuse, clear, albuminous, saccharine, phosphatic. Diabetes mellitus and insipidus. Burning scalding when urinating, desire frequent and urging. Strangury.

Limbs

Sore pain in outer side of thighs. Sensation as if cool wind streamed up calves. Feet feel numb, when sitting. Severe pains in right hip-joint, worse during motion.

Male

Sexual desire and power increased. Erections unusually strong and frequent. Impotence.

Mouth

Salivation of pregnant women and teething children. Aphthae during pregnancy. Bitter taste in early a.m.

Rectum

Stool loose, yellow in the morning, lumps of feces in the evening.

Skin

Pale, earthy, sallow. Epidermis of the labia peels off thin, transparent exfoliation.

Sleep

Drowsy, heavy. Sleepy during the day.

Stomach

Cramp-like pain in the stomach. Burning in stomach, burning and aching in spine, belchings. Irritable stomach with general dropsy.

Temperature

Feels hot when tired. Chills, seemingly radiating from solar plexus all over body, caused by motion of arms. Flushes of heat pass over him with every movement while in a room.

Comments

Marvin A. Custis reports a case: "Mrs. L, 28, has two children, both living. Has prolapse of uterus, ulceration of cervix, dark offensive leucorrhoea. Her system is worn out and her expression one of great distress. Irritable, finds fault with every one and cannot bear contradiction. Restless, wants to move around, as she feels better when mind and body are employed."

There was severe backache and a sore and heavy feeling in the womb in fact, as she said, she was always "conscious of her womb."

Helon. 30c every three hours for two days and then every night, was prescribed with a warm water injection night and morning. At the end of three weeks the leucorrhoea had almost ceased, the womb was in the first position and she "forgets that she has such an organ."

This looks rather like the Rhus-t.: "Worse on commencing to work, better after working a little," but it is not the same, for in the case of Rhus-t. the relief comes from a limbering up of stiff joints. The backache is in the lumbar region, just over the kidneys or else in the sacrum.

The kidneys themselves, especially the right, are the seat of pain and then the urine is generally scanty. S. A. Jones found Helonin turned an alkaline urine acid increased the amount of urea increased the amount of urine secreted. He considers this to be the result of a condition of debility, venous paresis, the result of previous arterial tonic contraction.

Helon. produces irritation in mucous membranes, sore mouth, irritable stomach, burning and scalding when urinating, but the most intense effect is produced in the vaginal mucous membrane.

PAGE 775

L. L. Danforth treated Mrs. W., who had intense pruritus, vulvar and vaginal, for several weeks: "She could tear the flesh out" it was so intense. There was vulvovaginitis, the labia and adjoining skin being red and swollen and covered with thin, white, curdy deposits. Further examination showed, pouring from a congested cervix, a thin albuminous leucorrhoea, evidently the cause of the pruritus.

It coagulated on the vagina, forming small curds covering the mucous membrane of vagina and vulva. Helon. tincture on tablets speedily relieved.

The relation of the remedy to the menopausal period is indicated in the provings by alternate sensations of heat and cold. Burning sensations are common.

A patient to whom I gave it in the 6c had "burning-sinking at the epigastrium" half an hour after each dose.

Compare

(1) Alet., Lil-t, Puls., Senec., Stann.

(2) Agrimonia - painful kidneys, indigestion and menstrual difficulties, Bronchorrhea and catarrh of bladder. Cough with profuse expectoration attended with expulsion of urine. Tincture 1 to 10 drops.

SOURCES

Boericke. Clarke. Phatak.

Hepar sulphur

(calcium sulphide)

Pharmacy

Hep. Hepar sulphuris calcareum. The Calcarea sulphurata Hahnemanni. An impure Sulphide of Calcium prepared by burning in a crucible the white interior of oyster shells with pure flowers of sulphur. Trituration. Historical dose: Trituration and all potencies, first to 200c.

History

"Liver of Sulphur" is a name which was given by the old alchemists to several sulphur compounds whose color was supposed to resemble that of liver. Before Hahnemann's

time Hepar sulphuris calcareum, Sulfuret of lime, was used as an external remedy for itch, rheumatism, gout, goiter and scrofulous swellings.

In pellagra material doses were used. The higher potencies may abort the suppuration, the lower promote it. If it is necessary to hasten it, give 2x. Hepar 1x will often start secretions and profuse drainage in stuffy colds.

In 1794 Hahnemann proposed to use it internally to arrest mercurial salivation. A few years later it was tried for asthma and pulmonary tuberculosis. That this was a happy inspiration Hahnemann's provings and clinical experience has thoroughly borne out.

The Hepar sulph. of Hahnemann is not identical with ordinary sulfuret of lime, being prepared with oyster shells instead of ordinary lime in a special way.

Neither is it identical in composition or properties with Calcium sulphate, the Gypsum of Schÿssler. Being a chemical combination of Calcareo carb. and Sulph. It has some of the properties of both, but is very different from either and though it is useful to compare them, Hepar must be studied as a separate entity.

P. Foster distinguishes between Hepar sulph., Calc-sulph. and Kali-sulph. in their action on tissues. Kali-s. acts on the epidermis, Hepar on lymphatic glandular system, skin and respiratory mucous membrane, Calc-s. acts much as Hep., only more deeply. Hep. acts on abscesses before they open, Calc-s. after.

Foster cured a lady with Calc-s., high of "several large ulcers in the gluteal region 3 inches in diameter and 3/4 inches deep, exposing the bone." The pain ceased immediately and the cure was completed in two months.

Homeopathic

Hepar sulph. acts on mucous membranes, causing catarrhal process with a tendency to hemorrhage and ulceration.

PAGE 776

The catarrh may be in throat, stomach, uterus, urethra, which is characterized by thick, yellow, acrid, ropy discharge, mucus is found in the stools in the urine, hawks up mucus, hence it can be called a mucus remedy.

Great sensitiveness to all impressions. Sweating patient pulling blanket around him. Locally, it has special affinity to the respiratory mucous membrane, producing croupy, catarrhal inflammation, profuse secretion, also easy perspiration. After abuse of Mercury. Infected sinus with pus forming.

The tendency to suppuration is most marked and has been a strong guiding symptom in practice. The lesions spread by the formation of small papules around the side of the old lesions. Chilliness, hypersensitiveness, splinter-like pains, craving for sour and strong things are very characteristic.

Feeling as if wind were blowing on some part. The side of the body on which he lies at night becomes gradually insufferably painful, he must turn. Syphilis after gross medication.

Clinical

Abscess. Amaurosis. Angina pectoris. Asthma. Axilla, abscess. Beard, eruptions. Blepharitis. Boils. Breast disorders. Bronchitis. Bubo. Burns. Carbuncle. Decay. Chilblains. Chlorosis. Colds. Constipation. Cornea, ulceration, opacity. Cough. Croup. Diaphragmitis. Diarrhea. Ear infections, polyps. Eczema. Emphysema. Erysipelas. Eyes

disorders. Glandular swellings. Headache. Hectic fever. Hemoptysis. Hemorrhoids. Herpes. Hip-joint disease. Hoarseness. Jaundice. Joints disorders. Laryngitis. Leucorrhea. Lips, swollen. Liver disorders. Lungs, disorders. Lupus. Marasmus. Menorrhagia. Mouth, sore. Nipples, sore. Ovaries disorders. Pleurisy. Pneumonia. Pregnancy. Pylorus disorders. Quinsy. Rheumatism. Scarletina. Scrofula. Skin disorders. Spinal irritation. Styes. Suppuration. Syphilis. Tenesmus. Throat, sore. Tuberculosis. Urticaria. Wens. Whitlow. Whooping cough

Causations

Cold, dry winds.(cold dry excite damp heat in the body) Injuries. Abuse of Mercury. Suppressed eruptions.(eruptions of nature of damp heat or dry cold)

Constitutions

Slow torpid (**dampness constitution**) constitutions with lax tissue(**damp constitution**) and light hair, great sensitiveness to slightest contact of ulcers, eruptions and parts affected. (being damp heat sensitive, catches and easily stores the toxicity being touched by toxic/pathogen etc like ulcers which give them flourishing ground in damp heat) It is suited to the psoric, scrofulous, (**phlegm heat dominated**) diathesis. Debilitated subjects. (**dampness —spleen qi deficient**) Tendency to suppurations. (**liver heat attacking spleen**) Cross children. (**liver heat**) Torpid, lymphatic constitutions, (**phlegm**) persons with light hair and complexion, slow to act (**phlegm constitution**), muscles soft and flabby. (**phlegm dampness**) **Planets**: Mercury, Saturn.

Modalities

Better in damp weather. (**yin deficient or dryness in the body**) Better from wrapping (**liver tendency is to spread and enlarge so wrapping controls**) head up (**yang gets controlled that is yang hyper**) from warmth. (**that is inner cold**) Better from pressure (**deficiency of yin qi etc or cold**) after eating. (**yin deficiency**) Worse inhaling air, (**kidney lung communication problem**) cold air, dry winds, (**inner cold and dryness and since it is air so qi related so qi vacuity coldness**) slightest draught, open air. (**qi is stagnant and close**) Worse from mercury touch, lying on painful side. (**excess condition so cold damp /phlegm/blood etc stagnation**) Worse slight bleeding, washing. Worse touch, (**qi stagnation**) motion. (**qi deficiency**) Worse in the night, (**yin deficient**) on awakening, (**on yang rising**) when blowing the nose. (**qi stagnation**) Worse from single parts of the body getting cold. (**cold accumulation in parts**)

Symptoms

MIND

Dejected and sad. Depression, (**lung**) sure of death (**lung-kidney**) and desires it. (**heart**) Forgetful. (**heart-kidney and spleen**) Anguish in the evening and night with thoughts of suicide. (**yin deficient, lung kidney**) The slightest cause irritates him. (**liver yang floating**) Ferocious. (**liver and heart**) Hasty speech. (**impatient—heart**)

Abdomen

Distended, tense, chronic abdominal disorders. (**chronic-phlegm, phlegm stagnation**) Pain in the groins as if sprained. (**sprain—trapping of stagnant qi in local area**) Atrophy {, (**Heat in the Lungs injuring Yin fluids (Full type), Invasion of Damp-Heat (Full type), Invasion of Cold-Dampness (Full type), Stomach and Spleen deficiency (Empty type), Spleen and Heart collapse (Empty type), Liver and Kidney deficiency (Empty type), Blood stasis in**

the channels (Full-Empty type))} cancer of liver.(Spleen Deficiency Leading To Kidney Deficiency, Yang Deficiency with: Deficiency (ie fatigue), Dampness (ie teeth marks) Blood Stagnation (purple tongue), Toxins)

Back

Neuralgia of neck. Dull dragging heavy pain across lumbar region,(phlegm dampness in kidney region) uses arms to raise himself from a seat.

Breasts

Pain in right breast on sneezing. (liver and lung qi stagnation) Cancer of breast, nipples, retracted, sore, cracked in nursing women.(sore-blood stagnation,cracked-yin deficient or due to toxic heat-sore and cracked)

Ears

Otitis media(- Otitis - itchy pain with discharge, red, swelling, narrowing of ear canal.) painful, (Cham.)(Damp Heat and Toxic heat otherwise- Liver and Kidney Deficiency if less painful) Ears are sensitive to touch, wind.(qi stagnation due to damp) Discharge of fetid pus from the ears.(toxic heat or damp heat) Scurfs on and behind the ears. Whizzing and throbbing in ears(cold stagnation) with hardness of hearing. (cold stagnation) Roaring.(phlegm fire) Deafness from eustachian catarrh after scarlet fever.(catarrh-damp heat,scarlet fever-damp heat or wind heat so wind heat or damp heat blockage deafness) Pustules in auditory canal and auricle.(wind heat) Mastoiditis.

Eyes

Purulent conjunctivitis with chemosis.(damp heat) **profuse discharge**.(damp heat) great sensitiveness to touch and air.(qi stagnation) Corneal ulcers.(damp heat) Iritis with pus in anterior chamber.(damp heat) **Eyes** and lids red and inflamed.(heat) Pain in the eyes, as if pulled back into the head.(pulling pain—qi stagnation) Boring pain in upper bones of the orbits.(blood stasis—boring pain) Eyeballs sore to touch.(blood stagnation) Vision obscured by reading, field reduced one-half. Bright circles before eyes. Objects appear red **and too large**.(liver heat) Hypopion. Ophthalmia, thick mucous discharge. (damp heat so thick mucous) Yellow.(heat)

PAGE 777

Face

Yellowish complexion,(phlegm blockage) sunken.(yin deficient) Cancer on lips. {(Spleen Deficiency Leading To Kidney Deficiency, Yang Deficiency with: Deficiency (ie fatigue), Dampness (ie teeth marks) Blood Stagnation (purple tongue), Toxins)} Middle of lower lip cracked.(damp heat or yin deficient or toxic heat) Vesicular erysipelas with pricking in parts.(pricking is blood stasis) Neuralgia of right side, extending in streak into temple, ear, ale and lip.(yin side,extending to location—heat,nerves-heart so heart yin deficiency so yin vacuity heat) Pains in bones of face, especially when being touched.(kidney/heart qi stagnation) Ulcers in corners of mouth. (stomach damp heat) Shooting in jaw on opening mouth.(wind heat in liver as tendons of jaw controlled by liver)

Female

Menorrhagia and metrorrhagia with fibroids. Menses late and scanty.(liver blood deficient or stagnant) Pruritis vulvae (qi stagnation or damp heat itching)with profuse leucorrhea(heat-profuse and dampness) with sexual excitement.(kidney/liver yang hyper active or damp and toxic heat irritation) Thick, acrid, yellow, ropy leucorrhea.(damp heat)

leucorrhoea) Smells like old cheese. (Sanic.) Vagina sore during sex, bleeding after. (blood congestion) Itching of pudenda and nipples, worse during menses. (toxic heat in liver blood ,during menses-heat) Abscesses of labia with great sensitiveness. (toxic heat in liver blood going to labia in liver channel) Profuse perspiration at the menopause. {menopause----(Deficiency of Kidney-Yin, Kidney-Yang ,Disharmony between Heart and Kidney,Hyperactive Liver-Yang due to Deficiency of Kidney and Liver Yin,Deficiency of Kidney and Spleen Yang,Deficiency of Kidney-Yin and Kidney-Yang, (Tilia, Jab.)}so (hyperactive liver yang and deficient liver and kidney yin) Erosion of cervix. (toxic damp heat) Removes the tendency to habitual adherent placenta. (adherent-phlegm which is sticky) Hot, watery, discharge from uterus. (kidney yin vacuity so vacuity heat damp discharge that is damp heat with excess dampness,kidney may define type /quality of discharge)

Food

Longing for acids, wine and strong-tasting food. (liver yang or heat stimulating things desired) Aversion to fat food. (phlegm food worse)

Head

Eczema on forehead along the line of hair worse after washing. (stomach damp heat worse washing due to dampness,eczema:Dampness-Heat Type,Wind-Heat Type,Wind-Dryness Type with Blood Insufficiency) Boring pain in the right temple (blood stagnation-boring pain,may be due to toxic heat too)and in root of nose every morning. (yang rising time) Scalp sensitive and sore. (blood stagnation or may be due to toxic heat) Humid scald-head itching and burning. (damp heat on scalp) Cold sweat on head.

Heart

Palpitations **from a slowly progressing weakness.** (slow progressing—deficiency or dampness involved so spleen/kidney deficiency or damp blockage)

Kidneys

Bladder difficulties of elderly men. (bladder or kidney yin deficiency) (Phos., Sulph., Cop.) Voided slowly without force-drops vertically, bladder weak. (damp heat or phlegm blockage,bladder weak due to kidney yin deficient) Seems as if some urine always remained. Mucus in urine. (damp ness) Greasy pellicle on urine. Gleety discharge, thick, yellow. (damp/phlegm heat) Putrid odor of urine. (heat)

Limbs

Finger-joints swollen,(spleen damp accumulation or spleen heat or spleen damp heat) tendency to easy dislocation. Nail of great toe painful on slight pressure.

Liver

Jaundice. (liver damp heat) Hepatitis, hepatic abscess. (damp heat) Stitching in region of liver when walking, coughing, breathing or touching it. (qi stagnation may be due to damp/blood) (Bry., Merc.) Cutting pain from liver to right scapula (blood stagnant pain) worse lying on back or right side. (yin side due to blood stagnation)

Lungs

Bronchitis of old exhausted people. (damp heat bronchitis in spleen and kidney qi dissipated(exhaustion) with kidney yin deficiency-old,) Loose cough (damp), bloody or thick, yellow tenacious sputum, raises much mucus. (damp heat) Breathing difficult worse lying on left side. (lung qi stagnant so worse on yang side) Loses voice and coughs when exposed to dry, cold wind. (opposite to damp heat ie dry cold wind) Cough troublesome

when walking.(qi stagnation cough) Dry, hoarse cough.(dry cold cough) Cough excited, whenever any part of the body gets cold or uncovered or from eating anything cold. (worse from dry cold) Croup with loose, rattling cough, worse in morning.(damp heat croup worse on yang rising time) Choking cough.(cold) Rattling, croaking cough, suffocative attacks,(blood stagnation or phlegm stagnation) has to rise up and bend head backwards.(to facilitate yang distribution otherwise yang blockage so cold) Anxious, (lung /heart) wheezing,(qi stagnation due to phlegm/blood), moist breathing,(dampness in lung) asthma worse in dry cold air,(dry cold asthma) better in damp.

Male

Herpes,(one or more clusters of small vesicles filled with clear fluid on a slightly raised inflamed base.)sensitive, bleed easily(damp heat) . Obstinate gonorrhea "does not get well."(toxic damp heat in lower jiao) Figwarts of offensive odor. Humid soreness on genitals and between scrotum and thigh.(damp and soreness may be due to heat) Excitement and emission without amorous fancies.(excitement and emission due to damp heat irritation) Itching of glans, frenum and scrotum.(damp heat itching) Suppurating inguinal glands.(damp heat) Ulcers externally on prepuce similar to chancre. (Nit-ac.) (ulcers-damp heat)

Mouth

Ptyalism.(stomach damp heat so damp increase saliva and heat push out) Gums and mouth painful to touch and bleed readily.(stomach wind heat) Tongue, white, yellow, dirty, swollen, large, tabby, slimy with imprints of teeth,(damp so white yellow swollen etc and imprints is dampness)feels as if scalded. Stomatitis of nursing mothers or weakly children. Taste, bitter.(bitter—heart,taste –stomach) Aphthae. Bleeding painful (wind heat)cancerous growth on hard palate.(Blood Stagnation (purple tongue), Toxic heat,phlegm heat)

Nose

Hay Fever. Sinusitis after coryza.(coryza—damp turns into sinusitis that is damp heat) Post nasal dripping. Sore, bleeds, bloody crusts.(lung blood stagnation) Soreness of nostrils with catarrhal troubles.(blood stasis and phlegm heat) Offensive discharge, smells like old cheese.(phlegm heat) Air feels cold in nose.(wind heat) Sneezes every time he goes into a cold, dry wind with running from nose,(dry cold affects then damp heat) later, thick offensive discharge. Stopped up every time he goes out into cold air. Ozaena.

Rectum

Clay-colored and soft.(dampness and clay colour due to heat or blood stasis) Loss of power to expel even a soft stool.(lung or large intestine qi vacuity) Sour, white, undigested, fetid.(spleen/stomach qi deficient so undigested food turns into sour and with time fetid due to internal heat) Hemorrhoids,even slight bleeding exhausts.(blood stagnation so slight bleeding exhausts heart/spleen already weak energy) Lumpy stools, coated or mixed with mucus.(damp heat) Obstinate constipation of pregnancy after purgatives.(purgatives clear intestine and create vacuity cold and dryness so cold dry constipation) and Raw smarting in the rectum during stools, remaining long afterwards. (raw—blood stasis,smarting –blood stasis may be)

Skin

Acne in youth suppurate with prickly pain.(phlegm heat with blood stagnation) bleed easily. Unhealthy Skin, every little injury suppurates,(damp heat) (Psor., Sil.) Constant offensive exhalation from the body.(damp heat in the body and lung) Great sensitiveness

to slightest touch. (qi stagnation) Chapped skin with deep cracks on hands and feet. (dry cold at blood level) Abscesses, (damp heat) suppurating glands are very sensitive. (damp heat and qi stagnation) Papules (blood/phlegm) prone to suppurate (heat) and extend. (Chronic and recurring urticaria. (wind-Heat, wind Cold, Dampness-Heat in Stomach and Intestines, Deficiency of Qi and Blood, chronic due to deficiency or phlegm) Angio-neurotic edema. Cold-sores, very sensitive. (qi and cold stagnation) Cannot bear to be uncovered, wants to be wrapped up warmly. (internal vacuity cold) Sticking or pricking in afflicted parts. (stick—phlegm, prick—blood stagnation) Small-pox. Ringworm. (flourish in damp heat) Ulcers with bloody suppuration. (damp heat with blood stagnation) smelling like old cheese. Ulcers very sensitive to contact, burning, stinging, easily bleeding. (damp heat with blood stasis) Ulcers, cancerous. Atonic ulcers, following removal of tumors. (A tumor is essentially 4 things: deficiency, Blood Stasis, Phlegm, & toxicity so atonic ulcer due to above reasons) Putrid ulcers. (toxic heat) surrounded by little pimples. (phlegm heat)

Stomach

Weak digestion. (spleen/stomach qi deficiency or dry cold in the stomach) Frequent belchings without taste or smell. (stomach qi stagnation with dry cold so no taste -dry) Distention of stomach, compelling one to loosen the clothing. (food or qi stagnation) Burning in stomach. (heat in stomach) Heaviness and pressure in stomach after a slight meal. (food stagnation) Gone feeling in stomach (stomach yin vacuity) with loathing of food or as of a sharp lump in stomach. (food stagnation hence qi stagnation) Ulcers and Cancer. Painful epigastric tumors with pulsations. (cold stagnation so pulsation in stomach or epigastric area) Apt to vomit all food. (qi stagnation due to food in stomach as food not digested due to dry cold stagnation) retaining only milk or water, mixed. (dampness helps) Cannot eat bread or vegetables.

Temperature

Chilly in open air or from slightest draught. Dry heat at night. (yin deficiency) Profuse sweat, sour, sticky offensive. (damp heat sweating) Heat alternating with chill. (damp heat so damp excess-chill, heat excess-hot) Sweats day and night without relief. (continuous sweating -blood stagnation)

Throat

Follicular pharyngitis. Hawks up some yellow tenacious mucus. (phlegm heat in lungs) When swallowing, sensation as if a plug. (phlegm/qi stagnation in stomach/lung) Sensation of a splinter in Throat. Quinsy with impending suppuration. Stitches in throat extending to the ear when swallowing. (qi stagnation) Hawking up of mucus. Hoarseness with loss of voice. (lung qi and blood stagnation due to phlegm)

Vertigo

Vertigo and headache, when shaking the head (dampness heat qi stagnation in head so shaking or riding affects qi and phlegm so vertigo and headache) or riding.

Comments

The one feature which more than any other characteristic Hepar cases is over-sensitiveness. It runs throughout the remedy. "Any trouble occurring on the skin where there is a great sensitiveness to the slightest touch, patient can't bear to have even the clothes touch the part or have it touched in any way. Exanthema like nettle-rash, sore to the slightest touch. Skin hard to heal, inflammation, sensitive soreness of skin." That is Guernsey's definition of this feature as it affects the skin and touch.

But the sensitiveness is not confined to touch. There is excessive sensitiveness to the air, patient can't bear the least draft and if a hand accidentally gets outside the bed-clothes it brings on an aggravation.

Sensitiveness to noise to odors. Irritable and angry, feels inclined to kill any one who offends him. Teste, who says he has removed these symptoms with Hepar.

Another instance of the sensitiveness of Hepar is in relation to pain: the slightest pain causes fainting. There is also irritable heart. (heart qi is too weak and stagnant so very sensitive and fainting, irritable etc) The sensitiveness to cold air is more to the dry cold air of Acon. and Bry.

Hepar's croup is accompanied with rather loose cough with wheezing and rattling. Cough as if mucus would come up but it does not. The time of the Hepar croup is early morning, (Acon. in evening). The least breath of cold air worse the cough or any uncovering.

Another feature of Hepar is the sensation of a splinter or fish-bone in the throat. (cold stagnation in the throat—fish bone pain) In quinsy with throbbing pain, where suppuration is imminent, Hepar is indicated. Throbbing, stabbing pains with general rigor are characteristic. (cold stagnation with blood stasis) The relation of Hepar to the suppuration process is very marked. It meets the hectic condition generally and the process locally. Clarke once cured with Hep. 6c a case of axillary abscess with a large collection of pus. The whole was absorbed without breaking. Calc-s. is suited to quinsy after it breaks, Hep. before.

PAGE 779

In this connection it may be well to speak of the relation of Hep. to Mercurius. In a case of eczema pudendi in a young girl, 11, three months after puberty, the parts red and itching, Merc. was given and the whole body became covered with the rash.

Hep. was then given and removed all immediately. "Sweats day and night without relief."

It antidotes the sensitiveness of Merc. to atmospheric conditions. In the old days of mercurialization one of the chief things to be avoided by a patient under the "course" was exposure to chill.

Hepar has this same sensitiveness to chill and liability to take cold from every exposure. Coryza, nose swollen and sore to the touch, especially inside the ale.

Inflammations of respiratory organs, bowels and kidneys and the skin. Boring at root of nose with catarrhal symptoms or headaches. Croup inflammations of throat. The ulceration of the skin in peculiar. Smelling like old cheese is characteristic of Hep. ulcers and discharges.

The itching of Hep. is noteworthy, it occurs in connection with jaundice. It has cured cases of pruritus especially when of mercurial origin. In the respiratory organs there are suffocative attacks of breathing (in croup the child chokes in its coughing spells and there is much rattling).

Hep. meets many cases of asthma and whooping cough. Respiration with mucous rattle, expiration in the morning, none in the evening, cough with expectoration during the day, none in the night (in croup no expectoration at night but only in the daytime with the suffocative coughing spells, low, weak voice, (Guernsey).

There is a semi-paralytic condition of the rectum and bladder somewhat like that of Alumina. The stools are passed with great difficulty even when clay-like and soft. Fetid

stools with a sour body-smell in children. Sour stools are also very marked in diarrhea and this may be noted along with the desire of Hep. for acid things.

Urination is impeded, obliged to wait awhile before the urine passes and then it flows slowly for many days. Never able to finish urinating, it seems as if some urine always remains behind in bladder. Urine drops vertically down. The urine is very acid. There are complaints during urination and after.

Nocturnal emissions. Escape of prostatic fluid at any time and at stool. Affections of the sexual organs occurring on the right side. Hepar is one of the great anti-psorics.

There is marked periodicity in Hepar: Everyday, every four weeks, (attack of paralysis). Every four months, (scabby eruptions on head). Every winter come the whitlows. Spring and autumn, bilious attacks.(liver and spleen dominated)

In Hahnemann's article "Medicine of Experience" he speaks of the itch-like eruptions caused by Hep. and its corrective properties in wool-workers' itch. The bends of the elbows and popliteal spaces are affected by Hep. in eye disorders patient likes to have them covered lightly.

The following case was cured by Hep. after Sulph. and Calc. had failed. Pustular ophthalmia of left eye, better keeping eye closely covered with some soft fabric, worse mornings, better by day advanced. Pimples surround affected eye.

PAGE 780

Hepatica triloba

(liver-wort)

Pharmacy

Hepat. Hepatica triloba. Liver-wort. N. O. Ranunculaceae. Tincture of full-grown leaves.

Historical dose: Tincture and all potencies, second potency.

Herbal

Hepatica is an ancient remedy which received its name from a fancied resemblance of its leaves to the shape of the liver. All our definite knowledge of its began with an experiment made by Dr. D. G. Kimball, who chewed the leaves every day for a chronic irritation of the throat and lungs.

A few symptoms were produced and the symptoms he complained of were removed, notably: tickling irritation in throat and sensation about epiglottis as of particles of food remaining. Accumulation of viscid, tenacious phlegm with frequent hawking.

Lungs became much stronger and digestion more perfect. **Planets:** Jupiter, Mercury.

Homeopathic

Hepat. is a liver and lung remedy. Pharyngeal catarrh with profuse, serous sputa and hoarseness. Tickling and irritation of the throat. Scraping and rough sensation. Induces free and easy expectoration. Viscid, thick, tenacious phlegm causes continued hawking. Soreness at the nostrils. Sensation about epiglottis as if particles of Food remained. Sputa sweet, profuse, creamy.

Clinical

Bronchitis. Catarrh. Dyspepsia. Nosebleed. Throat, sore.
Symptoms

Eyes

Eyes somewhat sensitive to light. Itching and smarting eyes. slightly agglutinated in morning.

Lungs

Bronchitis with circumscribed pneumonia, sputa bloody and purulent, sputa profuse, yellow, creamy and exceedingly sweet, some pain and constriction of right chest, an exceedingly annoying irritation of the fauces. Free and easy expectoration.

Nose

Bloody mucus frequently blown from left nostril for three or four days in succession. Soreness of end of nose at entrance of nostrils.

Stomach

Digestion more perfect.

Throat

Rough scraping, irritative and tickling sensation in throat and fauces. Pharyngeal catarrh with profuse serous expectoration and hoarseness. Irritation of fauces, tickling, itching, scraping, almost constant, worse by eating or inhalation of dust.

Comments

Hale, experiencing an attack of circumscribed pneumonia with bloody expectoration or else, profuse, yellow, creamy, exceedingly sweet. Some pain and constriction in right chest, tickling in fauces worse by eating or from inhalation of dust. Hale chewed the dry leaves and in a few days was well.

Wegge of Copenhagen confirms its value in pharyngeal catarrh with profuse serous sputa and hoarseness.

Heracleum sphondylium

(hogweed)

Pharmacy

Hera. Hogweed. Heracleum sphondylium. Branca ursina. N. O. Umbelliferae. Tincture of whole plant. Historical dose: Tincture and all potencies, third potency.

History

Herac. was found to exercise a pronounced action on the digestion, producing hunger with inability to eat, nausea, vomiting, colic, diarrhea and pain in the spleen. It also affected the sexual organs and the skin. **Planets:** Moon.

Homeopathic

A characteristic is "Headache with drowsiness, worse on moving in open air, better tying up the head with a cloth." Exhaustion indolence and weakness were complained. Recommended as a spinal stimulant in epilepsy with flatulency, gouty and skin symptoms.

Clinical

Debility. Dyspepsia. Gout. Headaches. Migraines. Seborrhoea capitis. Skin disorders. Spleen, pain.

Symptoms

Abdomen

Abdominal and splenic pain.

Food

Hungry but unable to eat.

PAGE 781

Head

Migraines. Sick headaches. Headaches with drowsiness, worse moving in open air, better tying up head with cloth. Much Perspiration on Head and violent itching. Seborrhoea capitis.

Stomach

Pain with inclination to vomit. Bitter risings and taste.

Compare

Hippomanes

(horse meconium)

Pharmacy

Hipp. Hippomanes. A Meconium Deposit out of the amniotic fluid taken from the Colt. Trituration of the dried substance taken from the tongue of a newly-born filly. Historical dose: All potencies, sixth to thirtieth potency.

History

The old famous Aphrodisiac of the Greek authors. Hering says it is normally white, usually dark olive green, soft, glutinous mucous substance of a urinous odor, which floats in the allantois fluid or is attached of the allantois membrane of the mare or cow, chiefly during the last months of pregnancy. **Planets:** Moon.

Homeopathic

A few characteristics of Hipp. have been made out. These are a peculiar icy coldness in stomach. Violent pain in wrists. Paralysis of wrist in morning in bed. Weakness of hands

and fingers so that he cannot hold anything. A case of chorea was cured on these last symptoms.

There is a weakness, restlessness, melancholy. The headache is better lying on painful side, worse walking in sun. Chilliness, better from being covered. A peculiar sensation is as if the head would fall forward on walking, as of a plug in the throat, as if a swelling retarded the flow of the urine. There is desire to lie down, but no relief on doing so.

Clinical

Chills. Chorea. Headaches. Melancholy. Prostatitis. Rheumatism. Twitching. Wrist, paralysis.

Symptoms

MIND

Melancholy, a young man sits in the corner and does not want to have anything to do with the world. Restlessness, must move from place to place.

Chest

Stitches in left side of chest.

Eyes

The light of the candle looks blue. **Stitches in eyes.** Painfulness of eyes when moving them with headache.

Face

Involuntary twitching of under lip.

Female

Menstruation too early.

Food

Desire for acids and aversion to sweet things.

Head

Sensation of lightness in head. Pressive pain in temples. Violent headache. Headache better when lying on painful side, worse when walking in sun. The head feels so heavy that it falls forward if he raises himself. The hair becomes nearly dry, falling off of hair.

Kidneys

Frequent discharge of watery urine. Urine discharge in a small stream with straining, it feels as if a swelling retarded it, prostatitis. Drawing pain from anus through urethra.

Limbs

Violent pain in wrist. Paralysis of wrists. Sprained sensation in wrist. Great weakness of hands and fingers. Weakness in joints of feet, knee and soles. Chorea. Much weakness after growing too fast. Heaviness in limbs.

Lungs

Cough, barking during sleep.

Male

Sexual desire increased. Prostatitis. Drawing pain in testicles.

Mouth

Bitter taste in mouth. Tongue coated white with redness of tip. Increased secretion of saliva with headache or sore throat.

Nose

Sensation of coldness when drawing the air in. Bleeding of nose in morning.

Rectum

Soft stool with vomiting, discharge of prostatic fluid after urination. Spasmodic contraction of anal sphincter. Hard stool in balls.

Skin

Itching as from flannel on skin, worse on chest and between shoulders.

PAGE 782

Stomach

Icy coldness in stomach. Nausea in a draft of air. Sensation of emptiness in stomach and head.

Temperature

Chill, beginning in back. Chill, better being warmly covered in bed. Heat in evening with dull headache.

Throat

Larynx feels, raw, as if air were too cold. Tickling in throat when breathing. Painfulness of left tonsil. Sensation of plug in throat, left side.

Compare

(1) Caust.

(2) Anac. - plug sensation.

Relations

Antidoted by: Coffee. Caust. relieved the paralysis of wrist.

SOURCES

Boericke. Clarke. Grimmer.

Hippozaeninum

(glanders nosode)

Pharmacy

Hippoza. Hippozaeninum. Glanderinum Malleinum. Farcin. The nosode of glanders or farcy. Triturations of sugar of milk saturated with the virus. Historical dose: All potencies.

History

Hippoza. is a powerful nosode introduced by Dr. Garth Wilkinson. The disease is called "Glanders" when the catarrhal symptoms are pronounced, "Farcy," when these are not noticeable, the skin being chiefly affected with deposits in the lungs. Homeopathic preparations of both have been made.

Of recent years Mallein, a toxin prepared from glanders, has taken an important place in veterinary practice of the old school as a test injection for deciding whether a horse suspected of glanders actually has the disease or not. If the horse reacts it is concluded there is glanders. In a number of cases in which animals have reacted to the first injections, repetition of the test has failed to elicit reaction, thus proving that Mallein is curative as well as diagnostic.

The nosode has been used by homeopaths, at the suggestion of Garth Wilkinson, on the phenomena of the disease as guides. It has been used in a large number of cases involving low forms of suppuration and catarrh.

Malignant ulcerations and swellings, abscesses and enlarged glands and also in conditions similar in kind, but less in severity. **Planets:** Moon, Saturn.

Homeopathic

Hippoz. covers the symptoms which suggest tuberculosis, cancer, syphilis, etc. It promises useful service in the treatment of ozaena, scrofulous swellings. Pyemia, erysipelas. Chronic rhinitis, bloody secretion.

Weakness, fatigue, general discomfort, they give up their business. General prostration with considerable emaciation. Numerous ecchymoses in internal organs inflammation of lymphatic vessels and swelling of glands, phlegmasia alba dolens.

Clinical

Abscesses. Bed-sores. Boils. Bronchitis. Cancer. Carbuncles. Decay. Catarrh, chronic. Cold, chronic. Diphtheria. Elephantiasis. Erysipelas. Glanders. Glands inflamed. Hip-disease. Liver, enlarged. Lupus. Nasal cartilages, ulceration. Edema. Ozaena. Parotiditis. Phlegmasia alba dolens. Phlegmon. Plague. Pustules. Putrid fever. Pyemia. Scrofula. Small-pox, confluent. Syphilis. Tuberculosis. Ulcers. Whooping cough.

Symptoms

Abdomen

Gastro-intestinal catarrh indigestion, constipation in later stage, diarrhea. Spleen enlarged, filled with blood, softened and liquefied of a grayish or dark color, wedge-shaped abscess in spleen. Inguinal glands swollen.

Ears

Tinkling sounds in ears. Hoarse and deafness. Inflammation of parotid gland.

Eyes

Full of tears or slime. Pupils dilated with collapse. *Papules* on choroid coat of eye.

Face

Maxillary gland swollen like a distinct ball of sausage, firmly attached to the maxilla, uneven, rugged, mostly painless, burning at times. Submaxillary and sublingual glands swollen and painful at times, abscesses are formed which open externally.

Female

Slimy discharge from vagina. Uterine phlebitis. Miscarriage.

Food

Loss of appetite. Thirst excessive, especially with diarrhea.

PAGE 783

Head

Fainting turns with headache. Inflammation of membranes of brain. Purulent collections between bones of skull and dura matter. Scattered abscesses in brain substance. Tubercles may appear in periosteum of skull in dura matter in plexus choroides. A diffused myelitis malleolus, attributable to infiltration. Bones of skull and face (frontal most) decayed. Hair loses its glisten.

Kidneys

Tubercles and abscesses in kidneys. Albumen in urine, also leucine and tyrosine.

Limbs

Obscure pain in limbs, most in muscles and joints. With sore finger, swelling of arm. Phlegmonous and erysipelatous with pustules and ulcers. Hip-disease. Psoas and lumbar abscesses. Old bad legs ulcers. Anasarca of lower limbs.

Liver

Liver greatly enlarged often showing signs of fatty degeneration. Hepatitis with gangrenous and ulcerative inflammation of gall-ducts.

Lungs

Papules and ulcerations in frontal sinuses, pharynx, larynx and trachea. Bronchitis: in the worst forms, especially in elderly persons, where suffocation from excessive secretion is imminent. Noisy breathing, loud snoring respiration before fatal termination, breath fetid. Cough and obstructed respiration, resulting from scar contraction of mucous membrane of nose and larynx, had lasted eleven years, patient presented picture of decided cachexia. Whooping-cough. Patients cough severely and expectorate profusely, sputa usually bearing a strong resemblance to the discharge from the nostrils. Tubercles, size of millet seed to a pea of a gray, yellowish or reddish color. In tuberculosis, diminishes expectoration and recurring aggravations and checks liability to catarrhal disorders. Lung disease of cattle (F.).

Male

Tubercles and abscesses: of glans penis of testicles in kidneys.

Mouth

Gums show a tendency to bleed. Gums covered with a black, sooty deposit. Act of speaking difficult. Tongue dry, thickly covered with a black, sooty deposit. Ulcers appear in mouth. Buccal passages filled with tenacious lymph and mucus. Odor of breath putrid. Scrofulous swelling of left parotid gland in a child.

Nose

Cartilages of nose become exposed and decayed. Decay of nasal bones. Tendency to catarrhal affection. Swelling and redness of nose and adjacent parts with severe pain. Obstinate catarrh. Nose and mouth ulcerated. Discharge often one-sided, albuminous tough, viscous, discolored, gray, greenish.

Nose

Bloody and offensive, acrid, corroding discharge. Chronic Ozaena.

Pulse

Pulse very frequent and small in volume, 110 to 120. Some cases retarded.

Rectum

Colliquative diarrhea with a general cachexia and exhaustion precede the fatal termination. Constipation.

Skin

Erythema, erysipelatos. Abscesses, pustules and ulcer are spread so extensively over surface of body that hardly any part remains free. Malignant erysipelas, particularly if attended by large formations of pus and destruction of parts. Confluent small-pox. Ulcers have no disposition to heal, livid appearance.

Sleep

Insomnia and great restlessness. Nocturnal delirium.

Temperature

Frequent chilliness. Chills and fever in cases of abscesses and ulcers. Skin becomes cool with collapse. Fever when a series of abscesses follow in rapid succession. Putrid fever. Plague. May be tried in scarlatina, where odor of breath is putrid, mouth filled with tenacious lymph and mucus tonsils greatly swollen.

Throat

Hoarseness from the altered condition of larynx. Ulcerations upon velum of palate. Swollen tonsils closing posterior channels. Upon mucous membrane of pharynx ecchymoses, redness, swelling, eruptions and foul ulcers.

PAGE 784

Comments

Clarke had used Hippoz. with excellent effects in cases of inveterate nasal catarrh and of glandular enlargement. The nasal affection may go on to ozaena, ulceration of nasal cartilages and bones. Glanders in the horse affects the lungs no less than the upper respiratory tract, causing coughs and disseminated ulcerations and deposits throughout the lungs.

Hippoz. has cured papules and ulcerations in frontal sinuses, pharynx, larynx and trachea, hoarseness, old cases of bronchitis, especially in old persons where suffocation from excessive secretion seemed imminent.

Bronchial asthma. Whooping cough. A cough commencing at Christmas and lasting until June has been cured by it.

Compare

- (1) Bacil., Syph., Variol.
- (2) The serpent poisons.
- (3) Aur., Cadm-s., Kali-bi., Hep., Psor.

SOURCES

Boericke. Clarke.

Hippuricum acidum

Pharmacy

Hip-ac. Hippuricum acidum. Hippuric acid. Historical dose: All potencies, 3x to 30c.

History

Hippuric acid is present in urine. Very rarely as an amorphous and crystalline deposit. The proving was carried out in 1952-53 by Dr. W. B. Griggs on seven men and three women over a period of forty-five days using potencies from 1x to 6x. **Planets:** Saturn.

Homeopathic

Hippuricum acidum's chief action is on the external tissues of the eyes and naso-pharynx, joint surfaces, liver and mucous membranes. Right side especially affected, general muscular soreness. Rheumatic and poisoned subjects. Weak exhausted types. General tenderness.

Allergic mesenchymatic with arthritic tendencies. Severe headache on the right side, aggravated by heat and ameliorated in the open air. Pain in the liver with bouts of nausea and a jaundiced complexion.

Nasal secretion viscous, yellow evil-smelling. Inflammation of the throat with a dry cough, especially at night. Muscular and joint pains in the shoulders, back, lower limbs. Hyper-productivity of the ovarian follicles. Eruption of pimples on back, chest, legs. Arthritic and tubercular conditions in elderly patients.

Clinical

Arthritic pains. Backaches. Cirrhosis. Diphtheria. Gastritis. Jaundice. Laryngitis. Pimples. Vincent's angina.

Modalities

Better in the open air. Better with pressure. Worse in a warm room or in the heat. Worse with movement. Worse late afternoon and at night.

Symptoms

MIND

Concealed anxiety. Irritability.

Abdomen

Pain and heaviness in the liver. Entero-colitis. Abscess beneath the diaphragm. Infectious epidemic jaundice. Cirrhosis. Acute cholecystitis.

Back

Lumbar aching, especially at the end of the day. Backache extending down hips.

Breasts

Breasts painful during menses.

Chest

Pain on the right side of the chest when coughing.

Ears

Buzzing in the ears.

Eyes

Eyelids inflamed and swollen. Visual and emotional complaints. Jaundiced, yellow conjunctiva. Edema of the eyelids. Painful inflammation, especially of the lower lid, on the right side. Dacryocystitis. Blepharitis. **Chemosis**.

Female

Menstruation prolonged yet scanty. Menstrual flow for three weeks with complete relief of muscular and joint pains. Menorrhagia. Premenstrual syndrome. Hyper-productivity of the ovarian follicle.

Head

Pain over right eye, dull, constant, worse in warm room. Migraine. Dull aching, aggravated in warm room, ameliorated by fresh air. Occipital headaches, vertigo.

Kidneys

Hot, pungent urine, smelling strongly.

PAGE 785

Limbs

Pain in shoulders and limbs and sore swollen joints. Pain in middle of thigh posteriorly shooting down right leg. Tired, grating sensation in the joints.

Lungs

Cough dry, irregular, gasping, worse at the end of the day. Dry right-sided pleurisy.

Mouth

Offensive breath.

Nose

Sensation of a blocked nose. Swelling over lower ethmoid bone. Secretion thick, viscous, yellow, evil-smelling. Acute rhinitis. Adenoids. Nasal polyps. Sinusitis.

Rectum

Diarrhea with watery, fetid stools.

Skin

Itching, burning. Papules looking like goose flesh on chest. Yellow coloring of the skin. Eruption of spots and pimples. Tingling, shuddering and burning sensations. Eruptions of pimples on the back, chest and legs. Erythema.

Stomach

Acrid belching. Feeling of a lump in the pit of the stomach. Acid rising. Lump in pit of stomach. Soreness and pressure over liver. Nausea, vomiting, hepatic pains, especially when pressure is applied.

Throat

Acute laryngitis. Dry throat. Pain and difficulty in swallowing. Sore, raw, dry, foul odor, gummy exudate, thickness and infiltration of all tissues around throat. Eructation with a lump in the throat. Exudation thick and membranous around the tonsils and the back of the throat. Gangrenous inflammation of throat.

Compare

(1) Benzoic acid seems to be an analog. Benz-ac. - A uremic type with brown, strong urine, whitish, fetid diarrhea, joint pains especially in the big toe and Achilles' tendon.

(2) Merc-cy. - Infectious, weak conditions. Diphtheria. Inflammation of the anus and rectum. Bad breath and cervical inflammation.

(3) Guai. - Red, burning tonsillitis. Pleurodynia with a dry cough. Diarrhea resembling that of cholera. Joint pains.

(4) Rhus-t. - Erythematous and vesicular rash. Muscular and joint pains, worse during rest, ameliorated by a change of position or by continued movement.

SOURCES

Boericke. Clarke. Julian.

Hirudo medicinalis

(leech)

Pharmacy

Hir. Hirudo Medicinalis. Sanguisuga officinalis. The Leech. N. O. Hirudinea. Tincture of the animal. Historical dose: All potencies, 6x to 30c.

History

Burnett was the first to use Sanguisuga or Hirudo Medicinalis as a homeopathic remedy for hemorrhages. Dangerous hemorrhages have frequently followed the application of leeches and it has been ascertained that the leech does not merely bite, it poisons the bitten part in such a way as to render the blood in it watery.

Burnett had a case of persistent bleeding from the rectum, the blood being watery and all the usual hemorrhagic remedies having failed to arrest it, Burnett thought that Hirudo Medicinalis might prove a similar remedy. He had a tincture made and attenuated, gave the 5c potency and made a brilliant cure.

To make Hir., macerate the end of a leech's head for twenty minutes in a mixture of sand and a physiological serum. Centrifuge the liquid and a green liquid residue is obtained, which is dried after the addition of thymol. The substance thus obtained forms the stock for the preparation of the potencies. W. Schwabe of Stuttgart, who prepared this stock, called it 'Hirudin.'

The symptomatology was established by members of the International Homeopathic League, following the Congress in Amsterdam in 1961-62. Members of the British, American and Chilean leagues participated in the proving. The group from London,

whose report was made by Reside, was made up of eighteen people, nine of whom were men and nine women.

PAGE 786

Homeopathic

Hirudo Medicinalis causes one to feel very lively and energetic, then exhausted suddenly, shivers, feels depressed. The condition alternates between well being and depression. Throbbing frontal or occipital headache. Tendency to bleed. Bleeds easily from all the orifices. Irregular heart-beat and congestion of the veins.

Gastro-intestinal malfunctioning with nausea, vertigo, diarrhea or constipation, (stools streaked with bright red blood).

Menses irregular and burning leucorrhea. Syphilitic hemiplegia and paraplegia.

Progressive lacunar cerebral sclerosis. Myelitis, tabes. Transverse myelitis, preceded by intermittent claudication.

Clinical

Aerophagy. Angina. Anal, bleeding. Aneurysms. Cervicitis. Colic. Conjunctivitis.

Hemoptysis. Hemorrhages. Hepatitis. Jaundice. Leucorrhea. Ovarian cysts.

Thrombophlebitis.

Constitutions

Allergic and psoric constitutions. Syphilitic. Hemophilic types. This remedy is directed particularly, but not exclusively to phosphoric syphilitic and neuro-biliary types.

Tendency to bleed. **Planets:** Moon.

Modalities

Better from sitting from coughing. Worse after defecation. Worse left side, but not exclusively.

Symptoms

MIND

Lively spirit, alert, animated with sense of well being. Condition alternates with lack of energy, sleepiness and tires easily. Depressed, sad, sluggish. Weary with a heavy head and difficulty in concentrating. Irritable, angry or tearful. Fear of falling backwards when looking up.

Abdomen

Alcoholic hepatitis. Colic with nausea and diarrhea around 10 a.m. Acute pain in the epigastric region and hypochondrium. Wakes at 2 a.m. from abdominal colic, worse after defecation. Severs abdominal distention. Aerophagy: accumulation of air in the colon.

Blood

Jaundice caused by destruction of red corpuscles. Disease due to a change in the quality of blood platelets, prothrombin deficiency, thrombocyte dystrophy and capillary weakness. Skin and mucous purpura. Thrombophlebitis.

Chest

Angina pectoris.

Ears

Outer ear hot. Left ear red and burning. Boil in the auditory canal.

Eyes

Red, painful, photophobia. Difficulty in focusing. Nervous twitching of the lower eyelid. Conjunctivitis.

Face

Neuralgic pains on the left or right of the face.

Female

Left-sided ovarian pain like being stabbed. Brownish leucorrhoea two days before menses. Menses: too early or late, heavy or light, painful or less painful than usual. Feeling in the pelvis as if menses would come on two weeks before due. Pre-cancerous condition of the neck and body of the uterus. Cervicitis. Endometriosis. Incoordination of the hypophysis, thalamus and ovary. Ovarian cysts.

Food

Thirst for cold drinks in large quantities. Indigestion from fatty foods with consequent anorexia.

Head

Heavy, pulsating head with dizziness. Head hot and heavy with pulsations going from the occiput towards the forehead. Headache at the vertex, accompanied by nausea. Pulsating frontal and occipital headache, especially in the evening. Feeling as though the head were in a vice. Wakes during the night from a constrictive headache located around the occiput.

Heart

Extra systolic rhythm anomaly. Irregular heartbeats when lying down. **Heart** irregular **with dull, diffuse pain** in the precordial region when going to bed. Pain in the region of the heart when sitting, when bent forwards, ameliorated by sitting up straight. Rheumatic endocarditis. Aneurysm of the aorta. Syphilitic aortitis.

Limbs

Pain in the left arm. Sharp pain in the joints of the hands, elbows and shoulders. Transient pains in the legs. Hands and feet cold in a warm room. Swelling of the left ankle. Feet swollen and painful.

Lungs

Hemoptysis. Expectoration of blood.

PAGE 787

Mouth

Mouth painful with bleeding gums. Small ulcerous swelling on the uvula. Ulcerations on the soft palate, roof of the mouth and tongue.

Nose

Nosebleed. Pimples and boils on the nose. Pustule on the left side of the nose. Swelling on the nose. Slight bleeding from the nose on wiping. Nosebleed, boils on the nose.

Rectum

Rectal pain one hour after stool passed. Anal pruritus. Bright red blood seen in stools, caused by painful constipation. Bacillary or protozoic dysentery. Proctitis.

Skin

Spots on the nose and face with pustules and boils, small wounds. Rough patch on chin. Burning spot on upper lip. Boils. Anthrax. Axillary adenitis of sweat glands. Sycosis of the beard.

Sleep

Sleep disturbed by disordered dreams or nightmares (thinks he is being followed).

Stomach

Nausea, flatulence, general weakness, worse in the morning. Alcoholic gastritis. Discomfort in the stomach after lunch with nausea and burning acidity and a tart taste. Nausea before eating with diarrhea. Vomiting around 4 a.m. Gastric and duodenal ulcer (hemorrhaging type).

Temperature

Cold shivers coming suddenly without apparent cause.

Throat

Swallowing painful. Throat painful with sensation of a ball stuck in it. Tonsils swollen. Swollen glands in the neck. Tonsillitis, glandular fever (infectious mononucleosis).

Vertigo

Vertigo after exertion or when sitting down. Fear of falling backwards when looking up.

Compare

(1) *Latrodectus Mactans*.

(2) *Naja* - Weakness and cardiac complaints with coughing and choking. Left-sided ovarian pain. Sudden desire to commit suicide.

(3) *Crot-h.* - Skin or cellulitic inflammations. Hemorrhaging of black, clot less blood. Infectious or adynamic conditions.

SOURCES

Clarke. Julian.

Histaminum

Pharmacy

Hist. Imidazolethylamine. Histamine hydrochloricum. Historical dose: All potencies, 5x to 30c.

History

Histamine is a capillary vessel dilator, an arteriole vessel constrictor, a hypertensive. It constricts the bronchi and stimulates the tissues of the intestine, the uterus and the gastric and pancreatic salivary secretions. It is normally used in the form of Histamine bichlorhydrate, which serves as the stock for homeopathic preparations.

The symptomatology was established in 1950 by J. Gringuaz of Buenos Aires, on thirty-nine provers, using the following potencies: 30c, 200c, 1000c, then 12c, 6c and 3c.

Homeopathic

Histamine has general asthenia as after physical exertion. Dryness of the mucous membranes. Feeling of constriction in different parts of the heart. Quivering and cramping contracture of the muscles. Irritable, susceptible, impatient with need to walk up and down.

Headaches and vertigo with sensation of heat and burning on the head and face. Loss of sense of taste and feeling that the teeth are loose.

All symptoms of the skin and mucous membranes in allergic types. Redness and burning sensation in circumscribed areas of the skin. Red, itching papules. Pruritus and burning in the nose, throat, ears and vagina.

Burning epigastric and abdominal pains. Burning precordial pain. Burning thoracic pain, fitful coughing. Oliguria with burning and pain on urination. Burning pains in the scrotum and left ovary. Burning, cramping, spasmodic pains in the joints and muscles.

PAGE 788

Clinical

Allergic, reactions. Angina pectoris. Arteritis. Asthenia. Asthma. Bee stings. Blepharitis. Bronchitis. Cancer. Cervicitis. Colitis. Conjunctivitis. Cystitis. Dysthyroidism. Emphysema. Gastric, duodenal ulcers. Headaches. Insomnia. Pericarditis. Pruritus. Pyelonephritis. Typhoid fever. Vertigo. Whooping-cough.

Constitutions

Allergic and psoric constitutions. Tubercular types with dysthyroidism. **Planets:**
Mercury.

Modalities

Better from pressure. Better by fanning. Worse from movement. Worse from nervous irritation. Worse from deep breathing. Worse from heat.

Symptoms

MIND

Sensitive to the slightest trifles. Impatient, restless with need to move from place to place aimlessly. Quarrelsome. Melancholic, sad, prostration which disappears by forced walking. Waiting makes him particularly nervous, needs to walk up and down.

Pain and gastric constriction when receiving news or remembering a painful experience.

Cannot find correct words, forgets proper nouns. Slowness and difficulty in understanding. Psychogenic allergy. Melancholic type with anguish and reduction of mental faculties.

Abdomen

Acrid dyspepsia. Gastric and duodenal ulcers. Spasmodic enterocolitis. Painful contractions. Sensation of constriction at belt-level. Hemorrhagic rectocolitis. Ulcerous membranous colitis. Typhoid fever and paratyphoid fever.

Chest

Angina pectoris. Stinging pains in various parts of the thorax. Thoracic pain, as if caused by contusion or crushing. Feeling of anguish in the chest, which necessitates deep breathing.

Ears

Pain in one or other of the ears, spreading to all the sense organs. Pain in the mastoid. Feeling of blocked ears with ringing and heaviness in the ears. Alternating sensation that the ear is blocked, then clear.

Eyes

Feeling of heat and pruritus at the edge of the eyelids. Contracture and muscular twitching of the eyelids and around the eyes. Spasmodic closing of the eyelids. Feeling of a foreign body in the eyes. Edge of the eyelids red, **edematous**. Yellowish secretion from

the eyelids or dryness of the mucous membranes. Allergic conjunctivitis. Blepharitis. Stinging pain, as if a nail were being driven into the eye. Better by the cold, aggravated by a draught.

Face

Facial pains on one side of the face, spreading towards the upper and lower maxilla and the teeth. Unilateral heat on the face.

Female

Left-sided ovarian pain, spreading to the leg and left hypochondrium. Menses too early or late. Diminution in quantity of menstrual flow. Menses extremely foul-smelling. Leucorrhoea with smell of 'burnt' blood. Cystitis. Ovaritis and salpingitis. Ovaritis. Cervicitis. Cancer of the cervix.

Head

Frontal pain, at the temples and nape of the neck, spreading towards the front and back of the head. Heavy, compressive headaches, better by cold and pressure and fresh air, aggravated by movement, by bending the head and by the sun. Sensation of tension of tightness at the scalp with pruritus. Sensation of heat and itching in localized places.

Heart

Precordial pain as if produced by a needle. **Heart** pain that alternate with or accompanying a toothache. Pericarditis. Feeling of heart 'caught up,' and need to hold it

with the hand. **Heart** feels too large. Feeling as if drops of icy water were flowing through the heart. Pain in the heart region with constrictive feeling, drawing, **dull pains**. The heart-beat is irregular with an extra systole with compensatory intervals.

Kidneys

Cystitis. Pyelonephritis. Unbearable feeling of heat in the bladder, all the time, needs to urinate, but can only pass a few drops at a time. Despairs at inability to urinate with ideas of suicide and he runs from one place to another. Spends hours in the bathroom, trying to urinate. Urinary retention with urination only in drops, feeling of having to strain and accompanying the hemorrhoid congestion. Urine burns like fire. Needle-like pain in the bladder towards the urethral canal.

PAGE 789

Limbs

Arteritis of the lower limbs. Muscular and joint pains, burning, stinging, drawing, dull, crushing pains. Feeling of exhaustion, does not want to make the slightest movement. Feeling of formication, tickling, pruritus in the muscles. Feeling of heat, as if he had been burned. Sensation of an electric current across the arms. Involuntary spasms and muscular contractions. Sensation as if band were tied around the stomach and around the limbs. Allergic rheumatism.

C Lungs

Lack of air, feeling of oppression of constriction in the chest. Coughing fits which almost choke him with tickling in the throat which prevents speech. Persistent, dry, fitful cough, coming from the throat or the supra-sternal cavity. Yellowish or white-yellow or greenish-yellow sputum, tasting of cheese. Chronic bronchitis. Dilatation of the bronchi. Asthma. Emphysema. Whooping-cough.

Male

Hydrocele. Epididymitis and orchitis. Prostatic adenoma. Burning, stinging, drawing pains. Pain travels from one side to the other. Pain moves in the scrotum with occipital headache.

Mouth

Mouth dry. Loss of sense of taste. Salivary secretion sometimes profuse, sometimes dried-up. Heat and itching in the mouth. Loss of sense of taste. Wine smells of 'perfume.' Dares not open mouth too wide, as a result of pains arising from the passing of cold air. Accompanying dental and precordial pains.

Nose

Pruritus in the nose with feeling that the skin on the nose is shrinking. Feeling that nasal orifices are enlarged. Feeling of painful dryness in the nostrils. Inspiration difficult and painful in cold air. Nose blocked on one or both sides. Head cold with blocked nostril on one side and feeling of heat and prickling. Spasmodic rhinitis.

Rectum

Painful contractions, followed by diarrhea with black stools. Stools black with a nauseating odor. Tenesmus and feeling of not having finished, when expelling stools.

Skin

Urticaria. Certain areas of the skin have a sensation of heat and burning, hyperanesthesia. Red, itching papules, the size of a pea, all over the body. Amelioration by scratching, aggravated by washing or bathing. Baldness. Alopecia. Loss of hair from the head and body. Hair becomes dry. Redness and heat on the skin of the face, as after a first degree burn.

Formication and tickling with numbness on different areas of the skin. Lichen planus. Prurigo strophulus.

Sleep

Insomnia until 2 a.m. to 3 a.m. Insomnia with abundance of ideas. Dreams on insects.

Stomach

Nausea when eating or thinking about eating. Stomach heavy, distended, as though it would burst. Stomach-ache, as if he had eaten indigestible food. Tense, anguishing pain, caused by a weak feeling in the pit of the stomach. Worse when recalling unpleasant memories or receiving news. Sensation of fire in the stomach.

Teeth

Dull or drawing pains in the teeth and cavities of extracted teeth. Alveolar, dental pyorrhea. Feeling that the teeth are loose, dares not chew for fear of losing them.

Temperature

General chills, shivering, alternating with feeling of heat. Feeling of great heat with sweating and weakness.

Throat

Painful dryness of the pharynx. Worse on swallowing and from heat, better with the cold. Dryness of the throat. Feeling of a lump or a foreign body in the throat. Feeling of pressure of constriction in the throat, as if tied by a band.

Vertigo

Vertigo, as if on a swing with nausea and misty vision.

Compare

(1) Apis - Acute inflammations with rosy edema, prickling, burning pains, as if produced by red-hot needles.

(2) Ars. - Anxiety, agitation. Burning pains. Cadaverous odor of the secretions.

(3) Sec. - Tendency to hemorrhage. Burning pains and chilliness all over the body, putrid diarrhea, cramps, especially in the lower limbs, chilliness, pallor and burning pains at the limbs, worse in the cold.

Hoitzia coccinea

(colibri flower)

Pharmacy

Hoit. Hoitzia Coccinea. Colibri flower. Polimoniaceae family. The mother tincture is obtained from the entire fresh plant. Historical dose: Tincture and all potencies, 3x to 30x.

Herbal

Hoitzia Coccinea grows in the valley of Mexico. Its common name comes from the feeling on touching it. It seems to be covered with small thorns.

Hoitzia is a voracious plant, belonging to the Polimoniaceae family and growing up to 1 meter in height with a tap-root, gnarled with fine isolated rootlets, which in turn give out other smaller rootlets. Straight, cylindrical stem, 'sub-ligneous', covered with small whitish hairs, alternated, oval, spear-shaped leaves and axillary flowers.

In herbal medicine, it is used as a sudorific remedy and the Mexican cowherds use it for fevers and eruptions in their cattle. The women use a decoction of the plant for washing their hair, it prevents hair from falling out. Twenty drops of mother tincture in a half-liter of boiled water, is used as a compress is recommended for irritations of the scalp resulting from the use of hair dyes.

The mother tincture is obtained from the entire fresh plant and it was Manuel De. Legarreta who established its Homeopathic proving.

Homeopathic

Hoitzia has high temperature from the start and increases in intensity. Stifling feeling of heat, general aching. Pains in the throat, neck and ears.

Shivers at every movement is thirsty, has anorexia, frequent and scanty urination. Sleep heavy. Uneasiness, fear, exaltation.

Acute infectious conditions. Appearance red, temperature high, steady. Nervous and circulatory over-excitability. Congestion of the head, eyes, stomach intestines and genital organs. Scarlet fever, anasarca-type and urticarial eruptions.

Post-vaccination encephalitis. Anti-small-pox and anti-diphtheria. Encephalitis following measles, chicken pox. Serous meningitis in young subjects.

Clinical

Aching. Cerebral, gastric and intestinal typhus. Chicken-pox. Diphtheria. Encephalitis. Measles. Meningitis. Miliary fever. Scarlet fever. Small-pox. Typhoid and paratyphoid fevers. Vaccinations, effects.

Constitutions

Planets: Mars, Moon.

Modalities

Better lying in a curled-up position. Worse from movement.

Symptoms

MIND

Fearful, anguished state of mind. Nervous excitability, groaning and hallucinations.

Abdomen

Pains in the epigastric and intestinal regions. Acute inflammation of the gallbladder and biliary passages. Acute enterocolitis. Crohn's disease, terminal ileitis. Abdominal muscles painful.

Chest

Constrictive oppression as after running a race. Sensation of tightness in the thorax, as if in a breast-plate.

Ears

Sensation of blocking in the auditory canal. Crackling noises with dryness of the ear. Acute congestive otitis.

Eyes

Bloodshot and burning, conjunctiva red. **Eyelids heavy, swollen, tend to close.** Photophobia, weeping. Edges of eyelids red, **edematous. Gaze is fixed and vague.** The eyelids are half-closed. Blepharitis. Conjunctivitis. Iritis. Keratitis.

Face

Face red, swollen.

Female

Copious menstruation, which improves the general condition. Lochia, very copious. Burning and itching leucorrhoea. Menses late by two to three months, then menorrhagia with intense bilateral ovarian pains. Heat in the low abdomen, painful with feeling of a foreign body in the abdomen. Profuse metrorrhagia with acute, burning pains, tearing pains, black blood with clotting and a putrid odor. Menorrhagia. Metrorrhagia.

PAGE 791

Food

Thirst for water, which repulses, followed by vomiting.

Head

Head heavy with sensation of fullness. Congestive beating in the temples with dizziness. Acute frontal headache, stupefying, soothed by holding the painful area tightly.

Heart

Strong heart beats, resounding in the head and audible. Pulse strong and rapid. Pericarditis. Myocardia. Valvulitis.

Kidneys

Urine red, frothy, blood-streaked. Pain and burning in the urethra. Tenesmus of the bladder. Hematuria. Slow difficult, painful urination, as a result of prostatic congestion.

Limbs

Limbs are painful, aching. Ameliorated by lying in a curled-up position. Muscular rheumatism. Acute joint rheumatism.

Lungs

Frequent, deep inhalation, provoking a slight cough. Frequent, short, persistent coughing. Sputum like egg-white, foamy, profuse. Pneumonia. Bronchopneumonia.

Male

Prostatic adenoma.

Mouth

Mouth dry, burning. Swollen gums and tongue. Saliva thick, sticky, difficult to spit.

Breath fetid.

Nose

Nose swollen, painful. Vesicles and scabs on the edges of the nostrils. Nosebleed frequent, but lasts only a short time. Maxillary and frontal sinusitis. Ethmoiditis.

Rectum

Stools hard, dry, round, burning, followed by a dysentery-like pressing need to evacuate with tenesmus.

Skin

First and second degree burns. Erythema. Solar erythema, (phlyctena). Scarlet fever-type and anasarca-type eruption with itching and burning. Urticaria eruptions on the feet, hands and face with a bluish complexion. Edema. Seborrheic alopecia. Anthrax.

Stomach

Acute pain in the stomach with vomiting of mucus and bile. Phlegmonic gastritis.

Temperature

Congestive fever, high, steady, even after appearance of eruption.

Throat

Throat red, swollen, burning.

Compare

(1) Bell. - Active congestion with nervous and vascular excitability. Dryness of the mucous membranes. Photophobia. Hyperthermia.

(2) Euphrasia - Irritating, excoriating weeping from the eyes. Non-irritating coryza. Amenorrhea. Frequent urination.

Compare

(3) Ars. - Agitation with fear of death. Burning pains. Cadaverous odor of secretions.

(4) Rhus-t. - Agitation of the body. Stiffness of the limbs. Skin red, swollen with vesicular, burning, itching eruptions.

Ilex aquifolium

Holly

(bach flower remedy)

Pharmacy

Holly. *Ilex aquifolium*. Flowering twigs are boiled for half an hour, the water strained and used as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

Herbal

The remedy Holly belongs to the group of Over sensitivity to Influences and Ideas, as classified by Bach. Additional remedies in this group are Agrimony, Centaury and Walnut, all helping those suffering from vulnerability to disturbances from outside.

Planets: Moon.

Homeopathic

The Holly state can be a state of exhaustion, frazzled nerves and of being over stimulated by environmental impact. Excessive noise and turmoil, as may be caused by children, can spoil the mood and create the urge to "fight" oneself free. If held within, there is much internal suffering and agony.

PAGE 792

If expressed, others suffer as well, while there might be the illusion of having helped the self to feel less stifled.

Nervousness, physical irritability, tension headaches or migraines may occur, headaches may come on after annoying experiences or reflect the force of suppressed anger.

The person may be prone to outbursts of anger, rage or violence which can also lead to injuries for oneself and others.

The suppressed Holly state can over time result in psychosomatic illness, (see Willow). In regard to mental disorders, this remedy is of value in treatment of antisocial personality disorders, (Chestnut Bud, Vine).

Paranoid personality disorder and delusions. Disorders with aggressive or jealous features. In persecutory or paranoid delusions, there can be heightened accusation and antagonism against the imagined threat of others (Beech, Willow). In problems with impulse control, when rage is not bridled, (Cherry Plum, Impatiens, Vervain).

Symptoms

MIND

In the Holly state, one easily perceives disturbances or other people as threats to one's peace and well-being. Over sensitivity to minor occurrences which would leave many others undisturbed. The irritated mind is set on rejection in such a state, on being free of the annoyance, even to the point of inflicting harm, as happens in extreme cases.

The Holly state is a fighter's mentality, an agitated, aggressive state, either expressed through words or gestures, or simply held within, as stirred-up emotions grip the self. The mind, being too quick to perceive others as threatening, is prone to be swayed and become unreasonable due to suspicion, envy, jealousy, revenge, anger and wounded pride.

Emotions experienced in the Holly state can be very strong and rule the self. Persons with good intentions who are irritable and easily annoyed.

Much violence and abuse originate in this agitated Holly state that may come on even if not wished for. To be prone to vexation and upset is a painful experience, creating much internal suffering.

SOURCES

Bach.

Homarus unknown species

(lobster digestive fluid)

Pharmacy

Hom. Homarus. Lobster. N. O. Crustacea. Triturations of sugar of milk saturated with the digesting fluid of the lobster, a thick, reddish offensive liquid contained in a sac situated at the back of the mouth. Historical dose: Tincture and all potencies, sixth potency.

History

The effects of lobster on some persons and under some conditions are well known. In order to thoroughly study the effect A. M. Cushing adopted the happy idea of proving the specific lobster poison and the result has been a very valuable addition to the *Materia Medica*.

Persons have been known to die after eating lobster and thereafter drinking milk. Cushing put a little of the poison into warm milk and in ten minutes it was a hard mass. Cushing found that milk aggravated his symptoms during the proving. "worse from milk" should be a strong indication for its use. **Planets:** Moon, Mercury.

Homeopathic

Dyspepsia, sore throat and headache seems to be a combination that may be controlled by this remedy. Frontal and temporal pain chiefly with soreness in eyes. Throat sore, raw, burns with tough mucus. Pain in stomach and abdomen, better after eating. Belching. Chilliness and pain all over. Itching of skin.

The more prominent symptoms of the proving were: Sore throat, which was quite severe, felt dry, looked much inflamed with large blood-vessels and appeared granulated, headaches, deranged digestion, pains in back, sexual excitement, disturbed sleep. For patients who are awakened in the night by the necessity to pass wind, Hom. should be the remedy.

PAGE 793

Pains were sharp and sudden, compelling him to sit down. Pain somewhere all day in eyes and various parts of body and limbs after retiring. Strange feeling all over, was not dizzy. Felt sick, unable to move, better moving. Dull feeling. Nervous feeling, but dread of moving. Restlessness.

Clinical

Back, pains. Bones, pains. Coryza. Diaphragm, pain. Dyspepsia. **Eyes** disorders. Flatulence. Granular throat. Headache. Liver, pains. Edema. Paralysis, nervous. Pruritus. Sleep, disordered. Spleen, pains. Throat, sore. Wrist, pain.

Causations

Milk.

Modalities

Better from motion. Better from passing wind. Better from inhaling cold air. Better after eating after dinner. Weakness, worse walking. Worse from drinking milk. Worse after sleep in the morning on waking. Worse at night, on drawing a long breath.

Symptoms

MIND

Frightened feeling. Dullness of mind. Nervous but with dread of moving.

Abdomen

Pain in diaphragm and hypochondria. Pain in liver and spleen.

Back

Aching just below diaphragm in center of right scapula in morning inside of scapula, worse right. Sharp pain at superior spinous process of left ilium. Sharp pain, transient, sudden in right side near kidney, forcing him to sit down.

Chest

Sharp pain in back side of left lung. Burning distress at right of lower end of sternum in both sides with difficult breathing.

Ears

Frequent stabbing through lower lobe of left ear, had to pinch it.

Eyes

Aching in eyes. Smarting in eyes. Aching pain in left ball. Lids stuck together in the morning. Edema of lids. Profuse lachrymation.

Head

Headache in morning, sharp at times, mostly in temporal region, worse left. Dizziness.

Limbs

Grinding pain just above elbows. Pain in left wrist in afternoon. Pain in right thigh and leg. Lame pain in right knee. Knees weak, worse right, worse afternoon. Knees weak and trembling. Left foot lame through toe joints at times.

Liver

Pain in lower part of liver. Sharp pain in region of left lobe of liver, worse drawing a long breath.

Lungs

Difficult breathing after retiring. Intense edema of throat rendering breathing almost impossible.

Male

Long-continued excitement every morning and in night.

Mouth

Profuse salivation.

Nose

Stinging in nasal passages. Burning in nasal passages extending to throat after rising. Sensation of mucus in left nostril. Nose stopped in morning. Discharge from the nose, watery from left nostril. Sneezed often.

Pulse

Pulse full, rolling.

Rectum

Frequent inclination to stool during the day. Alternate diarrhea and constipation, changing every three or four days. After much effort passed large, long tenacious stool.

Skin

Sore pimple on left thigh, outside. Itching: in various parts frequently day and night of various parts before and after retiring, better scratching, but appearing in another place. Itching sudden, worse night, worse in limbs, frequent sudden darting, on various parts, worse legs.

Sleep

Restless at night. Sleepless. Woke early and could not go to sleep on account of pains all over, worse epigastric region, back, arms and legs.

Stomach

Belching forth of tasteless wind in the morning. Pain all the forenoon with occasional hot flashes. Sharp pain after a light breakfast. Burning in stomach.

Temperature

Chilliness all over with trembling. Feet cold and damp afterwards burning.

Throat

Pain near left ear, sharp, sudden, transient. Burning in throat, right side and in esophagus, stomach and bowels. Edema of throat so great he could hardly breathe.

PAGE 794

Comments

A curious sensation was: "Felt as though could not move, on moving no pain, felt Better by moving."

On this indication with others, Cushing cured a case with Hom. 4x. The patient had headache, sore throat, loss of appetite and when she awoke in the morning felt as if she could not move at all.

On receiving Hom. there was a speedy restoration of keen appetite, both for food and work and loss of headache and sore throat.

Another cured case had the following symptoms: "No appetite, distress in stomach, restless sleep, very tired in morning."

A case of frequent "bilious spells" was also cured in a man who had Nux-v. and Dioscorea with only temporary relief.

L. H. Hallock relates a personal experience. An hour after eating a small amount of lobster salad, general pruritus commenced, worse in lower limbs, especially the calves. The itching was of a biting, burning character, not better by rubbing or scratching, almost unendurable. It lasted two hours in spite of bathing with hot and cold water, fresh and salt.

No sooner had the itching abated than lips, nose, eyes began to swell, until the eyes were closed and lips almost completely inverted. Throat swollen and edematous so that it was almost impossible to breathe, profuse salivation.

Eight hours after the meal he had the appearance of a severe and protracted debauch. In twenty-four hours was as well as ever. Once subsequently he had a like experience after eating lobster.

Compare

(1) Sep., Murex, Aster., Astac.

(2) in cold damp feet, Calc.

(3) Lach. - worse after sleep.

(4) Hydr., Phyt., Pic-ac.

(5) worse from milk, Calc., Chin., Con., Nit-ac., Sulph., Mag-c., Aeth.

Homeria collina

(cape tulip)

Pharmacy

Home. *Homeria collina*. Cape Tulip. N. O. Iridaceae. Tincture of bulbs. Historical dose: Tincture and all potencies.

History

The toxic affects of *Homeria collina*: A Malay woman with her three grandchildren, age 12, 8 and 6, ate a small basinful of the bulbs with their supper, (between 7 and 8 p.m.). About 1 a.m. the woman woke with severe nausea and vomiting and found the children similarly affected. She tried to call for help, but found herself too weak to leave her bed and when by five o'clock assistance arrived the eldest girl was found moribund and expired almost immediately.

The boy of 8 died an hour later. The youngest child was found in collapse, almost insensible, cold limbs, pulse scarcely 50 and irregular, pupils much dilated. The grandmother's symptoms were similar, but lesser in degree, accompanied by constant efforts at vomiting. By using stimulants she and the child eventually recovered. Obstinate constipation prevailed. **Planets:** Moon.

Homeopathic

Homeria is a violent narcotic-acrid poison very like *Colchicum* in its effects. Collapse, almost insensible, cold limbs. Severe nausea and vomiting. Constipation. Pulse is irregular and the pupils are dilated.

Clinical

Collapse. Constipation. Vomiting.

SOURCES

Clarke.

Mel

Honey

Pharmacy

Honey. Mel. Historical dose: Topically and internally taken as a food or medicine.

Herbal

Honey was widely used in ancient Egypt as a food and as a remedy for many skin problems. **Planets:** Saturn, Mars.

Homeopathic

Honey is a natural anti-septic, tonic and cleanser. Ancient Egyptians used honey as an application for emergencies.

Such as burns, bites, stings, cuts, sores and ulcers. It is useful for many acute and chronic skin disorders. Eczema and psoriasis.

PAGE 795

Clinical

Bites. Burns. Cuts. Eczema. Psoriasis. Stings. Sunburn. Ulcers. Wounds.

Compare

(1) *Aloe vera*, *Calendula*.

(2) Ric., the castor oil. Tea tree oil. *Urinum humana*.

SOURCES

Murphy.

Lonicera caprifolium

Honeysuckle

(bach flower remedy)

Pharmacy

Honeysuckle. *Lonicera caprifolium*. The flowering heads are picked with a few leaves and boiled for half an hour. The water is strained and used as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

Herbal

The remedy Honeysuckle belongs to Bach's group of Not Sufficient Interest in Present Circumstances, along with the remedies Clematis, Wild Rose, Olive, White Chestnut, Mustard and Chestnut Bud. These remedies are for those not fully engaged in the here and now and consequently not living to the fullest. **Planets:** Moon.

Homeopathic

Honeysuckle may apply to many different situations of life, whenever a lost preferred state calls from the past and diverts from fully exploring the present. Home-sickness, a lost love, even loss of beauty or position in life, can lead to the Honeysuckle state.

In mental illness, when sentimental visions of the past grip the self repeatedly, or when one experiences delusions, visions, or voices of lost loved ones in reaction to unresolved trauma or severe grief (Star of Bethlehem). Lethargy, sleepiness and diminished vitality can be concomitant symptoms.

Symptoms

MIND

In the Honeysuckle state, the mind dwells on past memories. Reminiscences and nostalgia carry more fascination than the colorless present. In fact, in the Honeysuckle state, one sadly believes that the happiness of the past can never be repeated in the present or future and one hangs on to it.

Sadness is the predominant emotion, yet it is tinged with cherishing something lost. Longing to relive former happiness. There is also hopelessness and resignation in regard to present and future. These feelings are often in old age when the losses cannot be replaced in this life. The children have moved on, one's health is fading, the partner may be dying.

SOURCES

Bach.

Carpinus betulus

Hornbeam

(bach flower remedy)

Pharmacy

Hornbeam. *Carpinus betulus*. Collect twigs with both male and female flowers, the males are the catkins, whereas the females are smaller and actually look more like flowers and grow at the end of the twig. Boil for half an hour, strain the water and use as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

Herbal

The remedy Hornbeam, together with Cerato, Scleranthus, Gentian, Gorse and Wild Oat, belongs to Bach's group of For Those who Suffer Uncertainty. These remedies help those suffering from lack of certainty or strength of purpose in their daily affairs. **Planets:**

Moon.

Homeopathic

Lethargy in mind and body, often accompanies the Hornbeam state. Which may seem like a mild depression in some cases.

PAGE 796

The remedy can be of service after head injuries when power of concentration is diminished and fatigue sets in readily (Scleranthus, Mustard, Wild Oat).

This remedy is of value in study and school settings, or whenever prolonged mental work is called for. It will revitalize mental powers of clarity and concentration and give perseverance. It is of service in developmental, learning disabilities and retardation, (Chestnut Bud, Mustard, Wild Oat).

In brain dysfunction due to physical causation, as in organic mental syndromes and disorders and in retardation, A chronic Hornbeam state may lead not only to physical fatigue, with a devitalization of the body, (see Wild Oat). Avoidance of work and procrastination may occur due to fatigue. Work does not appeal, one feels lax in fiber.

Symptoms

MIND

The mind in need of hornbeam is fatigued and listless and the body may feel this lethargy as well. One has to use willpower and push oneself to work and still the mind may feel dull or lacking in power of concentration.

Emotions center around the fatigue and one copes with listlessness, frustration, temporary feelings of being overwhelmed, lack of interest, boredom, mild depression and occasional resentment and unkindness. One is more prone to be irritable and may be less inclined to be of assistance or do extra work for others, mostly because one needs the extra strength for oneself.

SOURCES

Bach.

Hura brasiliensis

(assaku)

Pharmacy

Hura. Hura brasiliensis. Assaku. N. O. Euphorbiaceae. Tincture of milky juice. Historical dose: Tincture and all potencies, sixth potency.

History

The milky juice called Assacu by the Brazilians of Hura is as powerful as that of the better-known Euphorbians.

Hura has been used in leprosy, when skin feels as if it were hide bound. A case of leprosy having been reported cured with Assacu led to its extensive use in this disease, though, as Mure (who proved it) says without curing any others.

Two of his provers had been affected with leprosy, but under homeopathic treatment they seemed to have got well. One of them during the proving had symptoms of compression of the spinal marrow with very great suffering. **Planets:** Saturn.

Homeopathic

Skin of forehead feels drawn tight. Tense vesicles. Sensation of splinter under thumb-nails. Stiff neck, pain in back. Throbbing in finger tips. Itching, pimples on all projecting portions of bone, malar bones, etc.

Clinical

Blindness. Hysteria. Leprosy. Sinuses disorders. Skin disorders. Spine, pains.

Symptoms

MIND

Excited and oppressed as if by some misfortune. Causeless weeping followed by laughter. Flow of sad thoughts, imagines she will lose some one dear to her. Exaggerated conscientiousness. Irritable. Indisposed to work.

Abdomen

Frightful colic with diarrhea and shivering. Throbbing in left side abdomen. Twisting pain in left side with very painful shooting, extorting cries. Stitch in ileo-cecal region, worse on movement.

Back

Stiff-neck, right side, least motion is painfully felt in nape. Dislocated and tearing pain in dorsal region, on sitting down. Severe pains in lumber region, weakness. Excruciating pain in lumbo-sacral region, when trying to lift a weight.

Breasts

Sensation of small ball under right breast. Sharp pain shifting from shoulder to left breast. Stitches in breasts. Throbbing. in breasts.

Chest

Nervous shivering all over chest. Suffocative sensation, especially when thinking of anything that has gone wrong. Lancinations in chest preventing deep breathing.

Throbbings in chest.

PAGE 797

Ears

Pain behind and in right ear. Stoppage in ears. Loud whizzing and whistling sound in ears.

Eyes

Prickling and burning in eyes, sensation as if sand in them. Eyelids red. Vision dim. Blindness. Sparks and zigzags before the sight when walking.

Face

Face weary-looking as after a debauch, rings round eyes. Face dull and dark-looking with paleness mottled with red. Face scarlet and bloated. Heat rising to face. Swellings on upper part of right cheek. Lips red. Small pimples inside lower lip.

Female

Pain in uterus as if compressed, as if a sharp instrument were thrust into it, followed by lancinations in vagina. Leucorrhoea. Menses scanty, eight days too early, profuse with leucorrhoea.

Food

Hunger sometimes immediately after a meal.

Head

Rush of blood to the head. Heaviness of the head. Numbness of the head. Skin of forehead feels drawn tight. Painful lancinations through head. Constriction in back of head.

Heart

Constant pain at heart, sometimes very sharp, arresting breathing.

Kidneys

Acute pain in right kidney while walking, with great urging to urinate. Urine light green, clear, deposits a white sediment.

Limbs

Weariness of limbs. Lancinations, throbbing, rheumatic pains, numbness in upper and lower limbs. Dislocated pains in joints. Throbbing in finger-tips. Pain as from splinter under thumb-nail. Heat in nails, sensation as if part of nail had been torn off.

Lungs

Feeling of suffocation. Sighs and yawns much. Dryness of glottis causing cough. Considerable yellow, thick, frothy sputa. Expectoration rusty-colored, foul, bloody, like milk-chocolate.

Male

Intolerable erections: amorous dreams with erections, lemon-colored semen. Weight in testicles when walking.

Mouth

Tongue white, pain at tip. Fleshy excrescence on inside of lips. Clammy mouth, foul smell. Taste of copper, of blood, clammy, smoky.

Nose

Redness of (left) wing of nose. Constriction, throbbing at root of nose. Coryza, nosebleed. Sense of smell very acute.

Rectum

Constriction at anus. Frequent ineffectual urging to stool. Diarrhoea succeeded by great weakness of chest. Stools are liquid, painless, flowing constantly, offensive containing thread-worms. Constipation, hard, difficult stools.

Skin

Large pimples, itching. Pimples, painful to touch on face. Cluster of pimples or vesicles on various parts. Red vesicular pimples, the vesicles break on pressure and water squirts out with great force. Small vesicular pimples with itching. Itching on forehead, eyelids, chin, beard, back, legs, sleep disturbed by it.

Sleep

Yawning and drowsiness. Nightly restlessness. Dreams of traveling, of swimming, of yellow water, of corpses, of assassins.

Stomach

Great hunger with pain in stomach, hunger satisfied immediately on eating.
Qualmishness. Stomach ache, as from hunger.

Teeth

Lancinations in teeth and gums, passing to ear. Pimples on gums.

Temperature

Feet and body generally constantly cold and damp. Heat and transient perspiration.
Flushes of heat in face. Cold sweat on face and all over body.

Throat

Irritation of throat with dryness. Spitting of blood in morning.

Vertigo

Confusion. Dizziness.

Comments

All the provers had symptoms of nervous excitement, twitching and irritability. The gastro-intestinal irritation of the other Euphorbians was marked in the provings. Mure's

provings were made with single doses of the 5c potency. *Clinical*

experience is needed to bring out the characteristics.

PAGE 798

Farrington gives these indications: Vesicles which are so tense that when pricked they eject their contents, sensation of a splinter under thumb-nails.

The eruptions of Hura, he says, prefer the skin covering projecting portions of bone or the malar bones. He compares it with Cantharis.

Compare

(1) Crot-t., Ric., Euphor., Hura-c.

(2) Calo. - Leprosy, livid and gangrenous tubercles, thickening of the skin.

Relations

Antidoted by: Camph., Opium.

Boericke. Clarke.

Hura crepitans

(monkey's dinner-bell)

Pharmacy

Hura-c. Hura crepitans. Sand-box. Monkey's dinner-bell. N. O. Euphorbiaceae. Tincture of seeds. Historical dose: Tincture and all potencies.

Herbal

The Treasury of Botany, only recognizes one species of Hura, H. crepitans. But Mure compares his Hura with H. crepitans. They are probably varieties of the same species, the properties of the milk of the two being the same. The curious, rounded, hard-shelled fruits are about the size of an orange and have as many deep furrows as there are cells, each cell containing a single flattened seed.

When the fruit is ripe and exposed to a dry atmosphere, it bursts with great force, accompanied by a loud, sharp crack like the report of a pistol, for which reason it is often called the Monkey's Dinner-bell.

The Hura-c. seeds are emetic in a green state violently purgative, but when dry, according to Lunan, they lose this property. An oil is extracted from them and sometimes used as a purgative, about twenty drops of it being equal in action to a tablespoonful of castor oil.

A venomous milky juice is abundant in all parts of the plant and if it be applied to the eye causes almost immediate blindness. **Planets:** Moon.

Homeopathic

The observed effects of Hura-c. were found from eating the seeds. Burning in throat, vomiting and purging, suffocation, headache, were the main symptoms complained.

Clinical

Blindness. Diarrhea. Sore-throat. Vomiting.

Compare

(1) Hur-br., Ric., Crot-t.

(2) Caps. - burning in throat not better by water.

Relations

Antidoted by: Camph., Op.

Hydrangea arborescens

(seven-barks)

Pharmacy

Hydrang. Seven-barks. Hydrangea arborescens. N. O. hydrangeaceae or Saxifragaceae. Tincture of fresh leaves and young shoots. Fluid extract. Historical dose: Tincture and all potencies.

Herbal

Like some other members of the Saxifragaceae, Hydrangea has a traditional reputation as a "stone-breaking" remedy having been used in calculous diseases for many years.

Dr. Nottingham of Lansing, says that in physiological doses it produces giddiness, oppression of the chest and acts as a cathartic, diuretic, sialogogue and narcotic.

Nottingham used it with brilliant results in the following case: Mr. B., 71, tall, slender, dark, was exceedingly irritable and frequently subject to violent paroxysms of anger. For many years he had been accustomed to make the most reckless use of drugs and was always requesting his homeopathic doctor to give him "something stronger."

For eight years he had suffered from bladder sphincter irritation with dribbling of urine, severe spasms of prostate, kidney catarrh, yellow sand in urine and even small stones.

After persistent use of best indicated remedies with no effect, the fluid extract of Hydrangea was given, as teaspoonful every three or four hours.

PAGE 799

The symptoms disappeared in a very short time. Cooper has also used this remedy, (which, he says is the thirstiest plant known) with good effect in diabetes in cases presenting great thirst with abdominal symptoms and in enlarged prostate. It appears to act strongly on the neck of the bladder. **Planets:** Venus, Saturn.

Homeopathic

Hydrang. is a remedy for gravel, profuse deposit of white amorphous salts in urine. Kidney stones, kidney colic, bloody urine. It acts on the ureters. Pain in lumbar region. Dizziness. Oppression of chest.

Hansen adds that it is particularly useful for profuse deposits of white amorphous salts in the urine and Hydrang. has arrested the tendency to formation of stones, relieves distress from kidney stones with soreness over region of kidneys and bloody urine.

Clinical

Bladder, catarrh, stones. Diabetes. Dizziness. Gravel. Kidney stones. Prostatic disorders. Urine incontinence.

Symptoms

Abdomen

Sharp pain in loins, especially left.

Food

Great thirst with abdominal symptoms and enlarged prostate. (Ferr-pic., Sabal.)

Kidneys

Burning in urethra and frequent desire. Urine hard to start. Spasmodic stricture.

Urine

Profuse deposit of white amorphous salts. Heavy deposit of mucus. Gravel deposits.

Compare

(1) Lyc., Chim., Berb., Pareira, Uva, Sabal, Oxydendron.

(2) Geum.

(3) Polycytrichum - according to Dr. Cushing in tincture or infusion for enlarged prostate or prostatitis.

SOURCES

Boericke. Clarke.

Hydrastinum muriaticum

(muriate of hydrastia)

Pharmacy

Hydrin-m. Hydrastinum muriaticum. Muriate of Hydrastia. An alkaloid of Hydrastis canad.. Trituration of the crystals. Historical dose: Trituration and all potencies, 3x to 200c.

History

Locally used in aphthous sore mouth, ulcers, ulcerated sore throat, ozaena, etc. **Planets:** Moon.

Homeopathic

Hydrastinum mur. is a uterine hemostatic and also a vaso-constrictor, metorrhagia, especially from fibroid tumors, hemorrhages in dilatation of the Stomach and chronic digestive disorders.

Clinical

Aphthae. Fibroid tumors. Metrorrhagia.

Comments

The alkaloids of Hydrastis have been largely used in the allopathic school for internal hemorrhage. Hydrin-m. was found to be inconvenient by reason of its irritant properties. Its use in fibroid tumors has been advocated by Dr. Burford and others in the homeopathic school.

A case of central uterine fibroid tumor under my care, about the size of a large orange, and pressing on the bladder, causing bladder symptoms, was quickly reduced in size with the disappearance of all symptoms by Hydrin-m. 3x.

SOURCES

Boericke. Clarke.

Hydrastis canadensis

(golden seal)

Pharmacy

Hydr. Hydrastis canadensis. Golden Seal. The Orange-root. Yellow Puccoon. N. O. Ranunculacee. Tincture of the fresh root. Historical dose: Tincture and all potencies, tincture to thirtieth potency.

Herbal

Hydrastis, the Golden seal plant is the only specimen of its genus among the Ranunculacee. It grows in shady woods in rich soil and damp meadows. The Fruit is like a raspberry and the plant is sometimes called Ground Raspberry in consequence.

The medicinal properties of Hydr. were known to the Native Americans. Hydr. acts on mucous membranes, causing catarrhal process with a tendency to hemorrhage and ulceration. The root of Hydrastis from which the tincture is made is really a perennial underground stem, thick, knotty and yellow.

PAGE 800

The yellow color is very intense and it has been used by Indians as a dye. The first mention of it in medical literature is by Rafinesque. Hale quotes him as saying that it is "tonic, ophthalmic, detergent," and that "it is said to enter into compound remedies for cancer, acting as a detergent tonic and the Cherokees are supposed to use it in that disease."

This is important as showing that the traditional reputation of the plant agrees with the results of later experience. For though by no means a specific in all cases of cancer, it is in cancer cases that Hydr. has won its chief fame.

Clarke thinks it may fairly be said that more cases of cancer have been cured with Hydrastis than with any other single remedy.

Homeopathic

The catarrh of Hydrastis canadensis is characterized by thick, yellow, acrid, ropy discharge. (**damp heat**) Cancer and cancerous state (**cancer--Spleen Deficiency Leading To Kidney Deficiency, Yang Deficiency with: Deficiency (ie fatigue), Dampness (ie teeth marks), Blood Stagnation (purple tongue), Toxins**), before ulceration with pain. Cerebral effects prominent, feels his wits sharpened, head cleared, facile expression. Weak muscular power, poor digestion (**spleen deficiency**) and obstinate constipation. (**Liver Qi Stagnation, Wind, Diet, Accumulation of Phlegm, Qi Deficiency, Blood Deficiency, Yin Deficiency, Yang Deficiency, Accumulation of Cold, yin cold in intestine**) Lumbago. (**kidney deficiency**) Emaciation and prostration. (**spleen and kidney deficiency**)

Hydrastis canadensis action on the liver is marked. Goiter(wind cold damp heat) of puberty and pregnancy.(kidney related) Small-pox internally and locally. The power of Hydrastis over Small-pox seen in modifying the disease, abolishing its distressing symptoms, shortening its course, lessening its danger and greatly mitigating its consequences. (Garth Wilkinson).

Mucus is found in the stools in the urine,(damp heat) hawks up mucus. Sense of raw burning.(yin deficient heat) orblood stagnation) Cancer and pre-cancerous states.

Goiter of puberty and pregnancy. Modifies the course of small-pox when given internally and applied externally. Frequent fainting spells(heart qi collapse with lung qi deficiency) with profuse perspiration. Shallow ulcers.(yang type ulcers) Small wounds bleed and suppurate.(blood stagnation and damp heat) Clothing feels uncomfortable about groins.

Clinical

Alcoholism. Asthma. Cancer. Catarrh. Chancroids. Constipation. Corns. Dyspepsia. Eczema. Ears disorders. Faint. Fistula. Gastric catarrh. gonorrhea. Hemorrhoids. Jaundice. Leucorrhoea. Liver, cancer. Liver disorders. Lumbago. Lupus. Menorrhagia. Metrorrhagia. Mouth, sore, Nails disorders. Nipples, sore. Nursing, women. Placenta, adherent. Post-nasal catarrh, Rectum disorders. Sciatica. Seborrhea. Sinusitis. Stomach disorders. Syphilis. Taste, disordered. Throat-deafness. Throat, sore. Tongue disorders. Typhus. Ulcers. Uterus disorders.

Constitutions

Hydrastis is especially active in old, easily-tired people, cachetic individuals with great debility.(spleen and kidney deficient people.) It produces, atonic cachectic, degenerative conditions, hence suitable in old, easily tired, weak persons with great debility and emaciation.(spleen and kidney yin deficient) Cancerous diathesis. Cancer and pre-cancerous states. Emaciated, broken-down constitutions. **Planets:** Jupiter, Saturn.

Modalities

Better from pressure, rest.(yang deficiency) Worse from inhaling air,(qi stagnation) cold air,(cold qi injure yang) dry winds,(yin deficiency increase) open air. Worse slight bleeding, washing.(blood stagnation) Worse touch,(qi stagnation) old age, motion.(qi deficiency) Worse at night.(yin deficient) Skin symptoms are worse from warmth(lung damp heat) from washing. The catarrhal symptoms are worse from harsh, dry winds, out of doors.(cold dry affects)

Symptoms

MIND

Forgetful, cannot remember what he is reading or talking about.(immediate events forgets so heart yin deficiency) Irritable,(heart yang floating) disposed to be spiteful. Gloomy,(heart qi depressed) taciturn, disagreeable. Moaning with occasional outcries from pain. Depression,(lung,heart) sure of death and desires it.(lung,kidney,heart)

Abdomen

Gastro-duodenal catarrh.(Colon cancer. Loud rumbling(dampness and qi stagnant) with dull aching,(qi stagnation due to phlegm) worse moving.(heat or qi deficiency) Cutting, (blood stasis) colicky pains,(cold,heat,blood stasis etc) better after passing flatus. Sharp pain(blood stasis) in the cecal region. Sharp pain(blood stasis) in region of spleen. Pains

in the groin as if he had strained himself.(strained-may be blood stasis) Gripping pains with the stools.

Back

Dull, heavy, dragging pain (damp heat)and stiffness,(yin deficiency) particularly across lumbar region, must use arms in raising himself from seat. Neuralgia of neck.(heart qi stagnation) Muscles of neck feel sore.(spleen/stomack blood stasis in the channel) Tired aching across small of back and in limbs,(spleen and kidney qi deficiency) knees ache, better by walking about.

PAGE 801

Breasts

Cracked and sore nipples of nursing women.(liver damp heat so cracked and heat-sour)) Pain in breast (right) on sneezing.(yin side so sneezing gives jerk to blood stasis in breast) Cancer of breast,pains like knives thrust into part.(blood stasis) Cancer of breast, nipples retracted. Hard, irregular tumor of left breast,(blood stasis) glands in axilla enlarged and painful,(damp heat/blood stasis) cachectic appearance.

Chest

Chest raw, sore, burning.(damp heat or yin deficiency) Pain from chest to left shoulder.(pain spreading—heat).Asthma and edema of lungs.(dampness accumulation in lungs so asthma and edema) Cancer of right lung.

Ears

Deafness.(due to damp blockage) Eustachian catarrh with high-pitched voice.(damp blockage so to overcome catarrh and ear blockage high pitched voice) Roaring in the ears like machinery.(phlegm fire) Pain in right ear.(damp heat qi stagnation) Otorrhea, thick mucous discharge (fetid).(damp heat with heat excess) Throat deafness.(deafness due to phlegm congestion in throat)

Eyes

Ophthalmia with thick mucous discharge.(damp heat) Yellow. Profuse secretion of tears,(heat) smarting and burning of eyes and lids.(heat) Lids, agglutinated,(dampness) blepharitis.(toxic damp heat,wind damp,spleen deficiency with dampness) Opacity of the cornea. Dark greenish-yellow conjunctiva.(damp heat)

Face

Thin, yellow, sunken.(yellow-here it is vacuity heat,thin-damp,sunken-yin defient) Cancer on lips. Expression weary,(spleen qi defency) dull,(dampness) skin pale, or yellow-white. Erysipelatous eruption following flushes of heat.(heart heat so erysipelas eruption over body and flush of heat) Aphthae on the lips. Epithelial cancer of lip. Tenacious mucus hangs in shreds from mouth.(phlegm heat)

Female

Erosion and excoriation of cervix.(toxic damp heat or blood stagnation) Thick, acrid, yellow, ropy leucorrhea.(damp heat) Pruritis vulvae with profuse leucorrhea.(damp heat itching in vulvae,damp excess) Menorrhagia and metrorrhagia(metrorrhagia-Irregular uterine bleeding between patients cycle. Large amount of blood, or spotting for long periods of time-- KI Qi ↓ , SP Qi ↓,Heat in Blood (↓ or ↑),Blood stag.) with fibroids. Removes the tendency to habitual adherent placenta.(phlegm heat) Vagina sore during sex, bleeding afterwards.(blood stagnant) Hot, watery, discharge from uterus.(damp heat) Fibroid tumors at menopause.

Food

Indigestion from atony of the stomach, (atony—poor blood supply and stagnation) especially in old people. Cannot eat bread or vegetables. Bread or vegetables cause acidity, weakness, indigestion. (spleen /stomach deficiency)

Head

Neuralgia of the scalp and neck. (heart and kidney qi deficiency –nerve related to scalp and neck) Eczema on forehead along the line of hair worse after washing. (damp heat in stomach channel) Dull, pressing frontal pain, (dull, pressing pain—qi stagnation in stomach) especially connected with constipation. (qi stagnant constipation)

Heart

Palpitations from a slowly progressing weakness. (slow progressive—due to damp so damp accumulation weakness with spleen qi deficient which supplies less spleen qi to heart so palpitation) Palpitations with faintness. (heart qi deficient with heart yin deficient so faint) Heart agitated. (yin vacuity heat heart agitation) Violent long-continued palpitation in morning. (yang rising time heart yang hyper) Pulse slow during the chill.

Kidneys

Dull aching in region of kidneys. (kidney qi stagnation so dull and aching) Mucus in urine. Gleety discharge. (damp /phlegm in lower jiao) Urine smells decomposed. (kidney yang deficient) Putrid odor of urine. (kidney yang deficient) Catarrh of bladder, with thick, ropy mucous sediment in urine. (damp heat catarrh and phlegm type mucus) Dysuria, suppression. (damp/phlegm obstruction) incontinence. (Kidney qi vacuity, lung spleen qi vacuity, damp heat in the bladder, liver kidney yin vacuity, heart-kidney insufficiency).

Limbs

Limbs tired, ache, with coryza. (spleen qi deficient so vacuily cold aching and cold coryza or dampness) Shifting pain in right arm and leg, then left leg. (spleen qi stagnation or wind so shifting pain) Irritable, (liver/heart qi stagnation) indolent, or scrofulous (phlegm accumulation) ulcers (heat) on the legs. (phlegm heat) Rheumatic pains. (yin vacuity internal heat or Damp heat internally exuberant) Sharp shifting pains. (blood stagnation pain as sharp—blood stasis but may be phlegm stasis also) Pain from right hip to knee while walking. (spleen qi deficient damp accumulation in yin side –right side, hip to knee that is sprading so heat so damp heat) Legs feel weak. (spleen qi deficient) Aching in sole of left foot. (vacuity cold is yang and normal cold is yin so here it is kidney qi deficiency vacuity cold pain) no relief from change of position. Atonic ulcers on the legs.

Liver

Jaundice, (damp heat liver) with catarrh of stomach and duodenum. Gallstones. (phlegm heat) Atrophy, (damp heat type atrophy) cancer of liver. Torpor of the liver, with pale, scanty stools. Cutting pain from liver to right scapula, worse lying on back or right side. (cutting pain—blood stasis, --right side worse –yin side, damp heat—heat spreads so from liver to scapula and heat is yang so back) Liver atrophied. (damp heat)

Lungs

Bronchial catarrh, later stages. (later stages when heat rises internally and dampness become phlegm) Bronchitis in old, exhausted persons (kidney yin and spleen qi deficient persons) with thick, yellow, tenacious expectoration. (phlegm heat) Dry, harsh cough. (yin deficient) Loose cough, (damp) bloody or thick, (heat) yellow tenacious sputum, (damp

heat) raises much mucus. Breathing difficult,(lung qi deficiency or stagnation) worse lying on left side.(yang side) Frequent fainting (heart yin and yang collapse) spells with cold sweat all over.(lung/heart qi deficient so cold sweat) Feels suffocating when lying on left side.(suffocation—blood stagnation but since it is left side so chest qi stagnation)
Laryngeal and bronchial catarrh. Dry, harsh, rattling cough from tickling in larynx.
(phlegm heat with excess heat so dryness ,phlegm—tickling) Bronchitis of old, exhausted people, thick, yellow, tenacious, stringy sputa. Tuberculosis with emptiness in stomach,(TB due to stomach yin vacuity) emaciation,(heart/kidney yin vacuity) loss of appetite.(stomach food or damp blood etc stagnation)

Male

Gonorrhoea, in second stage, discharge thick and yellow.(damp heat) Debility after spermatorrhea. (Damp heat pent up internally,yin deficiency with fire flaring,kidneys weak and failing to consolidate etc and debility due to spleen qi deficiency or dissipation and not due to kidney)) Gleet, debility, copious, painless discharge.(damp discharges only so copious and no pain but after spleen qi become deficient)

Male

Dragging in right groin to testicle, thence to left testicle, thence to left groin.

PAGE 802

Mouth

Bitter, peppery taste in mouth.(heart yin) Taste, bitter. Aphthae. Stomatitis of nursing mothers or weakly children. Bleeding painful cancerous growth on hard palate.(damp heat growth and bleeding) Taste flat, peppery. Excessive secretion of thick, tenacious mucus.(phlegm heat) Tumor in hard palate.

Nose

Sinusitis after coryza.(damp coryza becomes phlegm heat sinusitis) (Kali-bi.) Post-nasal dripping. Thick, tenacious yellow secretion.(phlegm heat) Coryza watery, excoriating, burning, smarting and rawness.(smarting-blood stagnation coryza or damp heat coryza) Nosebleed with burning rawness, followed by itching.(damp heat itching with heat excess so bleeding) Constant discharge of thick white mucus(lung damp heat), sinus headache.(phlegm heat stagnation headache) Ozaena, with bloody, purulent discharge. Air feels cold in nose.(phlegm heat so air feels dry cold) Blows nose all the time.(qi or phlegm stagnation) Tickling, like a hair in right nostril.(right-yin side so phlegm sticking so tickling,if yang side then qi stagnation)

Rectum

Hemorrhoids, even slight bleeding exhausts.(blood stagnation so slight bleeding sucks heart qi so exhaustion) Raw smarting in the rectum during stools,(blood stagnation remaining long afterwards. Prolapsed,(spleen/kidney qi deficiency) anus fissured.(kidney yin deficient) Contraction and spasm.(kidney qi deficiency cold contraction and cold stagnation so blood congealation spasm) Constipation with a sinking feeling in stomach.(lung or large intestine yin deficiency with yin vacuity in stomach) Constipation during pregnancy after purgatives.(vacuity heat constipation) Fetid flatus.(qi stagnation so flatus and heat so fetid) Stool light colored, soft, acrid, greenish.(damp-soft heat-acrid,greenish stools) Stool lumpy, covered with yellow.(damp heat) Proctitis. Fistula of anus.(damp heat infection,deficiency heat,infection- so tonify body)

Skin

General tendency to profuse perspiration(**damp heat –damp may show tendency as it stores**) and unhealthy skin. (Hepar.) Jaundice,(**liver damp heat**) dark greenish-yellow color. Ulcers, cancerous.(**damp heat**) Atonic ulcers, following removal of tumors. Eruptions like small-pox. Lupus. Hot, dry skin, with fever.(**yin deficiency vacuity heat**) Burning heat and itching in skin.(**damp heat itching**) Nettle rash ("hives"), worse from scratching. worse at night.(**rash due to yin problem**) Scarlet raised nodular eruption. (**blood stagnation or heat**) Infantile intertrigo. Variola, all stages, itching tingling of the eruption.

Sleep

Awakened by backache(**cold aching due to kidney qi deficient**) and dull pains in navel and hypogastric region.(**qi stagnant or damp heat or damp cold type of pains in heart and liver**) Dreams wearisome,(**liver-spleen related**) restless sleep.(**liver yang hyper**) Difficulty in awaking.(**heart yin excess or heart yang less**)

Stomach

Weak digestion.(**spleen/stomach deficiency**) Gastritis. Sore feeling in stomach more or less constant.(**damp heat so heat creates soreness and constant due to dampness or blood stasis**) Gone feeling in stomach with loathing of food (stomach yin deficiency)or as of a sharp lump in stomach.(**phlegm in stomach**) Painful epigastric tumors with pulsations. (**blood congealation tumor due to cold stagnant ,cold stagnation so pulsing**) Stomach cancer and ulcers.(**damp heat cancer**) Apt to vomit all food, retaining only milk or water, mixed.(**stomach yin deficiency so atony so water suits but due to dry ness and atony other foods doesn't**) Atonic dyspepsia. Belchings of sour fluid.(**liver qi stagnation**) .Faintness at the stomach, sinking, gone feeling.Marasmus. Acute, distressing cutting pains. (**cutting: blood stasis**) Chronic gastric catarrh, ulceration.(**chronic—damp or deficiency,catarrh or ulcer—heat involved so damp heat**) Carcinoma,with emaciation.

Temperature

Heat alternating with chill.(**damp—chill, heat--hot**) Tendency to profuse perspiration. (**dampness excess shows tendency for the same**) Chill morning or evening,(**yang/yin switchover time dampness increases**) chilliness, especially in back or thighs,(**chilliness due ti kidney or spleen qi deficiency**) with aching,(**cold aching**) pulse slow. Heat in flushes.(**heart heat**) Great heat of whole body.(**heart heat**) Constant dull burning pains all the evening.(**evening dampness increases as mentioned above,burning—heat so damp heat**) Gastric,(**qi stagnation fever**) bilious(**heat or liver type fever**) or typhoid(**damp heat type of fever**) forms of fever, with gastric disturbances, jaundice (**liver heat**)and great debility(**spleen qi deficient dampness**) following.

Throat

Scraping in larynx.(**scraping—damp heat or blood stasis may be**) Follicular pharyngitis. Raw, smarting, excoriating sensation.(**blood stasis or damp heat may be**) Child is aroused suddenly from sleep by post-nasal dripping. Hawking of yellow, tenacious mucus. (**phlegm heat qi stagnation**) (Kali-bi.) Goiter of puberty and pregnancy.(**damp accumulation in throat due to kidney deficiency**) Uvula sore and relaxed.(**damp –relaxed or qi deficient,sore-heat or qi/blood stagnation**) Throat y, raw, sore.(**yin deficient**) Hawking of yellow, thick mucus from posterior sinuses.(**dampness and qi stagnation**) Ulcers in the throat, esp., after mercury.(**heat and dampness in ulcers**) Cancerous ulcers.

Tongue

Tongue white, swollen, large, flabby, slimy, shows imprint of Teeth (Merc.)(damp heat in heart, stomach or tongue) Ulceration of tongue,(damp heat) fissures toward the edges.(yin deficiency or damp heat) Cancer of tongue. Tongue swollen, shows marks of teeth, coated white or with a yellow stripe.(damp heat) Tongue as if burned or scalded, later a vesicle forms on the tip.(heart heat,tongue tip—heart)

Comments

Grimmer states: It is in liver cancer that Hydrastis has proven highly effective. Even in advanced cases it has been of great assistance in the relief of pain, permitting the patient to retain consciousness to the end without the need of narcotics or analgesics.

Thanks to the excellent provings that have been made by homeopaths and the careful observations of able practitioners, we are in a position to use the remedy with much greater precision than formerly.

PAGE 803

In very many cancer cases there is what has been termed a "pre-cancerous stage," a period of undefined ill-health without any discernible new growth.

The facial expression is dull, heavy, sodden-looking, yellowish-white in color.(heart—damp heat) The tongue is large, flabby and slimy-looking,(damp) bluish-white under the fur which is yellow, slimy and sticky(damp heat-stomach or heart) and indented by the teeth.(dampness) Belchings generally sour,(liver) at times putrid.(kidney)

Appetite bad, the power of digesting bread and vegetables especially weak and causing belchings.(spleen/stomach deficiency) Weight at stomach with fullness,(phlegm in stomach) empty aching "gone" feeling(feeling in small intestine due heart vacuity) (this is a grand characteristic of Hydr. and it is constant, not occurring at special times like that of Sulph., etc.). worse After a meal.(meal further affects undigested or phlegm in stomach)

The action of the bowels is either infrequent and constipated (lung heat ,intestine yin deficient,heat etc)or frequent (spleen qi deficient,damp stools)with loose, soft, light-colored stools. Clifton found this type of dyspepsia occur frequently in tubercular families and often cured it and even in cases of actual tuberculosis this type is not uncommon, the loss of appetite and "goneness" being especially prominent.

In dyspepsia Clifton found the tincture and lower potencies answer best in catarrh of nose and fauces the higher were better. Catarrh of almost all mucous surfaces is caused by Hydrastis, nasal catarrh, pharyngeal, bronchial, gastric, duodenal intestinal, urethral (gonorrhoea, gleet), vaginal. The characteristic catarrh is yellow (the leading color of the drug) or white tough and stringy.(damp heat with excess heat)

The action on the skin is no less marked. Garth Wilkinson found it externally and internally an excellent remedy in small-pox. Eczema, drying into crusts and burning like fire, has been cured with and application of one part Hydr. tincture to nine of glycerine. The burning was removed.

Clarke once saw a woman, 60, who had been given Hydr. 5 drops of tincture in water three times a day.

After a week she came out in a scarlet rash, raised and nodular, exceedingly irritable, especially at night. It was on every part of the body except the face and was worst on buttocks and elbows. It remained out a week. The patient at the same time became very ill with sickness and general digestive disorder.

The skin may be jaundiced.(damp heat) There is excessive sweat, especially of armpits or genitals(lymph areas sweat—damp heat) offensive ulcers, chancroids, fissures.

The female genital organs are very much affected: Metrorrhagia, leucorrhoea, pruritus vulva, scirrhus of uterus of breasts, sore mouth nursing-women, sore nipples. Weiss gave a woman, 31, who had adherent placenta in several confinements in succession. Hydr. 3x three drops daily from the fourth month during her last three pregnancies and each terminated without adherent placenta.

Four other cases of habitual adherent placenta were successfully treated in the same way. There is much backache of severe character in connection with many of the Hydr. conditions. Sometimes it awakens patients in the night.

Like many other "yellow" medicines, it has a marked action on the liver, causing jaundice and liver enlargement. Cases of cancer of the liver have been reported cured by it. Fullness, goneness and constipation are the leading indications. The constipation of Hydr. is a leading feature of the pathogenesis. There is torpor of the bowels, stools lumpy, covered with yellowish tough mucus (**damp heat stool**) with the constipation continual pain in head, (**blood stagnation in large intestine channel going to head**) bad taste in mouth.

Hydr. has been a good deal used in bronchial catarrhs with the characteristic tenacious secretion. It is worthy of note that most remedies which powerfully act on the skin will also cause an asthmatic state.

PAGE 804

Compare

(1) Hydrastinum muriaticum, Xanth. apifolia, Kali-bi., Con., Ars-i., Phyt., Aster., Stann., Puls.

(2) Galium - cancer of the tongue.

(3) Manzanita - diarrhea, gonorrhoea, gleet, leucorrhoea, catarrhal conditions.

(4) Hydrastine sulphate 1x - hemorrhage of bowels in typhoid.

(5) Marrubium - a stimulant to mucous membranes, especially laryngeal and bronchial, chronic bronchitis, dyspepsia and hepatic disorders, colds and coughs.

Relations

Antidote: Sulph. Useful after too much Chlorate of Potash for sore throat.

SOURCES

Boericke. Clarke. Grimmer. Phatak.

Hydrobromicum acidum

Pharmacy

Hydrobr-ac. Hydrobromic acid. Hydrobromicum acidum. Historical dose: All potencies.

History

Seems to have a specific effect on the inferior cervical ganglion increasing the action of the sympathetic, promoting vaso-constriction. Relieves headache, tinnitus and vertigo, especially in vaso-motor stomach disturbance. **Planets:** Mercury.

Homeopathic

The throat is dry and puckering. Constriction in pharynx and chest. Waves of heat over face and neck. Pulsating tinnitus with great nervous irritability, (Houghton). Vertigo with palpitations, arms heavy, seemed as if parts did not belong to him.

Clinical

Tinnitus. Vertigo.

SOURCES

Boericke.

Hydrocotyle asiatica

(gotu kola)

Pharmacy

Hydroc. Hydrocotyle asiatica. Indian Pennywort. Gotu kola. N. O. Umbelliferae. India and South Africa. Tincture of whole fresh plant. Historical dose: Tincture and all potencies, first to sixth potency.

Herbal

Gotu Kola is known as Indian Pennywort. It produces hypertrophy and induration of connective tissue. Curative in disorders that exhibit interstitial inflammation and cellular proliferation in any part.

Hypertrophy and induration of connective tissue. Hydrocot. has been long known as an Indian remedy. Boileau was the first to use it as a remedy in leprosy.

Audit cured this case: Girl, 20, weak and sickly-looking, since childhood troubled with glandular swellings, for eight years had lupus excedens of nose. Her mother had coppery eruption on face.

On right of nose was a button the size of sixpence covered with a thick crust covering yellow pus mixed with blood. Margins irregular and livid. Five other buttons size of lentils near root of nose both sides.

Hydroc. was given in 6c, 3c, tincture and the 18c potencies in succession with intermissions and completely cured in five months. **Planets:** Mercury, Saturn.

Homeopathic

Hydrocotyle asiatica has considerable reputation in leprosy and lupus, when there is no ulceration. The skin symptoms are very important. Of great use in ulceration of womb. Difficulty in maintaining the upright posture. Very copious perspiration. Pains of cervical cancer.

Excessive thickening of skin and marked exfoliation of skin. It is supposed to influence Leprosy, Elephantiasis, lupus. Copper colored eruptions in various places. Intolerable itching especially of soles, vagina. Cannot stand straight.

Clinical

Acne rosacea. Constipation. Elephantiasis arabum. Favus. Gangrene after amputation. Gonorrhoea. Gout. Ichthyosis. Leprosy. Leucorrhoea. Liver, contraction. Lupus. Neuralgia orbitalis. Skin disorders. Syphilis. Uterus, follicular inflammation. Vagina, pruritus.

Symptoms

MIND

Weak concentration. Gloomy thoughts. Misanthropy. Inclination for solitude. Indifference. Gaiety. Loquacity. Poor Memory.

Abdomen

Borborygmi in different parts. Flatus. Violent contractions of intestines. Pain, every five minutes, worse transverse colon. Constriction. Sensation as if all the organs were in motion. Heat in hypogastrium.

PAGE 805

Back

Renewal of old rheumatic pains in left rhomboid, worse pressure. Bruised pain in loins. Obstruction in region of kidneys with heaviness.

Ears

Pain in left internal meatus. Throbbing in right ear, ringing in left with stoppage. Confused noise in left, blowing sound.

Eyes

Eyes look unsteady. Injection of palpebral conjunctiva. Pricking in eyes. Vision dim, dazzling.

Face

Intoxicated expression. Intermittent pain in left cheek-bone. Pain in left cheek-bones and about orbits.

Female

Pruritus of vagina. Heat within vagina. Granular ulceration of womb. Profuse leucorrhoea. Dull pain in ovarian region. Cervical redness. Vulva, vagina and cervix red. Weight in uterus. Pain in whole uterus, left side. Severe labor-like pain in uterus and appendages.

Food

Loathing of food. Anorexia, then strong appetite. Aversion to tobacco-smoking.

Head

Congestion of blood to the head, heaviness. Painful drawing in almost all cranial nerves. Neuralgic pain in external frontal nerve. Intense pain with some swelling in posterior part of skull. Occiput acutely sensitive to touch. Constriction of back part of skull and scalp.

Heart

Cardiac spasm. Constriction of heart with quiet and regular pulse or with a few separate beats in certain arteries or with hot flushes in different parts of the face. Irregular beating of heart. Pulse stronger and fuller.

Kidneys

Slight formication in kidney. Inflammation of neck of bladder. Irritation of neck of bladder. Constriction of bladder. Frequent desire to urinate. Irritation of urethra. Urine increased. Urine becomes brown on cooling. Urine turbid without sediment.

Limbs

Contractions of forearms and legs. Irresistible inclination to stretch. Pain in all joints, worse left, pain in all muscles. Sensations as if hot water ran through marrow of bones.

Liver

Pain in upper part of liver. Obstruction in hepatic region.

Lungs

Pricking in vicinity of glottis. Dryness of windpipe of ventricles of larynx. Speaking soon fatigues. Irritation of air-passages. Difficult expectoration of bronchial mucus. Breath short. Oppression of chest, which suddenly ceases and then returns at longer or shorter intervals.

Male

Drawing in spermatic cords, worse left Scrotum relaxed. Impotence. Indifference to intercourse. Feeling of weight in prostate gland.

Mouth

Whitish spots on left upper and under sides of tongue. Impediment in speech. Redness of velum palati with pain on swallowing, worse by food. Hyperemia of mucous membrane. Saliva increased. Taste insipid or bitter, unpleasant in morning.

Nose

Coryza, dry. Bleeding. Swelling of nose. Tickling, worse left nostril. Feeling as before bleeding. Stoppage of nose. Lupus excedens of nose.

Skin

Dry eruptions. Great thickening of epidermoid layer and exfoliation of scales. Psoriasis gyrate, on trunk and limbs, palms and soles. Pustules on chest. Circular spots with dry scaly edges. Intolerable itching, especially of soles. Profuse sweat. Syphilitic disorders. Acne. Leprosy. Elephantiasis (Ars.) Lupus non-exedens. Yellowish spots on legs. Pricking on different parts. Itching in several places.

Sleep

Yawning and stretching. Sleepiness in the daytime. Heavy, dreamless sleep. Persistent dreaming all the time he was asleep.

Stomach

Anxiety in region of stomach. Belchings frequent, acid. Nausea. Swelling of stomach. Contraction, cramp like pain. Sensation as if gases collected into a ball.

Heat in stomach region spreading out like a bar.

Stool

Weight in rectum. Burning in anus. Itching in anus. Ineffectual desire for stool. Stools dry, dark. Stools increased. Stools easier.

PAGE 806

Temperature

Shivering in afternoon. Cold hands and feet with general condition resembling precursory stage of fever without alteration of pulse. Febrile movements. Heat of skin. Profuse sweat.

Throat

Voice weak. Tonsils red. Pricking in pharynx. Disorder of constrictor muscles of pharynx. Esophagus is dry and rough, burning and pricking in esophagus.

Vertigo

Vertigo with torpor.

Comments

The skin and the female generative organs are the chief seats of the drug's action, though the liver, the nerves and the mucous membranes are also powerfully acted upon. A great variety of skin disorders have been cured with it, acne, eczema, pemphigus, lupus, copper-colored eruption, papular eruption on face intolerable itching in various places.

Other indications are: Stomatitis, aphthous and syphilitic. Irritation of the neck of the bladder increased secretion of urine. Heat and itching in vagina. Weight in uterus. Granular ulceration.

Hydrocotyle acts on the male sexual organs also, causing weight in the "male uterus," the prostate gland. Gouty and rheumatic disorders.

Affections of the trigeminus nerve. Bruised feeling in all the muscles. A patient of mine who was taking Hydrac. for eczema with advantage complained of persistent dreaming all the time he was asleep and an unpleasant mouth on waking in the morning.

Hydrocyanicum acidum

(prussic acid)

Pharmacy

Hydr-ac. Hydrocyanicum acidum. Prussic Acid. One measure of the dilute acid of B. P. to two measures of rectified spirit makes the 1c dilution, rectified spirit for all above.

Historical dose: All potencies, sixth and higher potencies.

History

The pathogenesis of Hydr-ac. is mainly composed of symptoms observed in poisoning cases and clinically verified, but it has also been proved by Joerg and his pupils.

Hydr-ac. is one of the deadliest and most rapidly acting of poisons. Hence its applicability in cases of critical intensity, such as the collapse stage of cholera, when it supervenes on sudden cessation of all discharges, convulsions during severe attacks of illness.

Hydr-ac. acts powerfully on the celiac ganglia, causing intestinal cramps and colics. Convulsions and paralysis are the leading keynotes of the medicine's action. In the convulsions the body is stiffened and thrown back, cramp in nape of neck is very characteristic. The breathing comes in paroxysms, jaws set, foaming at mouth, face flushed, bluish tint. **Planets:** Moon.

Homeopathic

Hydrocyanic acidum is a rapidly acting deadly poison, producing convulsions, paralysis, collapse, cramps everywhere. Effects are sudden, spasms, collapse, strokes. Convulsions and paralysis express the action of this remedy. Spasmodic constriction in larynx, feeling of suffocation, pain and tightness in chest, palpitation, pulse weak, irregular.

Sinking sensation at the epigastrium. Hysterical and epileptic convulsions. Cyanosis. Collapse, due to some pulmonary condition not a cardiac collapse. Catalepsy. Cholera. Stage of collapse, (Ars., Verat.).

Intense coldness. Tetanus narcolepsy. Lack of reaction. Lightning like jerks from head to feet. Evacuations cease suddenly, sinks down unconscious. Prolonged faints. Bluishness. Epileptic attacks preceded by nausea and vomiting or waterbrash.

PAGE 807

Clinical

Angina pectoris. Anorexia. Asthma. Cholera asiatica. Colic. Coma vigil. Convulsions. Delirium. Dyspepsia. Epilepsy. Hemiplegia. Hiccough. Labor pains. Stings. Stomach, catarrh. Sun-stroke. Tetanus. Uremic convulsions. Whooping cough.

Modalities

Worse from full moon, suppressions, storms.

Symptoms

MIND

Fear of death, house falling, horses, cars. Fear of crossing the street, even when the vehicle is at a considerable distance. Fear of imaginary troubles. Loud involuntary screams, just before the convulsions. Unconsciousness. Wild delirium.

Back

Muscles of the dorsal region are contracted. Hands icy cold.

Chest

Angina pectoris, severe pain. Torturing pain in chest.

Eyes

Distorted and half open. *Eyeballs fixed.*

Face

Pale or bluish, looks old. Lips pale or bluish. Jaws clenched in rigid spasm. Froths at mouth. Frightful contortion of muscles.

Head

Violent stupefying headache. Intense cerebral congestion. Brain feels on fire. As if a cloud were going over his brain. Pupils motionless or dilated. Supra-orbital neuralgia with flushing on same side of face.

Heart

Violent palpitations. Angina pectoris, severe pain. Clutches at the heart as if in distress. Heart failure, compression at heart. *Blood vessels distended*, writhing in them. Pulse, failing, weak, irregular, unequal with occasional strong beats. Cold limbs.

Lungs

Breathing slow irregular, gasping. Noisy and agitated breathing. Asphyxia. Dry, spasmodic, suffocative cough. Asthma with choking, contraction of throat.

Lungs

Convulsions with whoopingcough. Paralysis of lungs. (Aspid.) Marked cyanosis, congested lungs.

Mouth

Froths at mouth. Dry. Taste, pussy, metallic, astringent. Tongue cold.

Rectum

Cholera.

Skin

Bluish eruptions.

Sleep

Drowsiness. Yawning with shivering. Coma vigil. Irresistible drowsiness. Vivid incoherent dreams.

Stomach

Anorexia. Stomach pain, worse when stomach is empty. Drinks, rumbles through Throat and Stomach. Burning from navel to esophagus, chronic dyspepsia. Great sinking at pit of Stomach. Pulsative pain in precordial region.

Temperature

Icy coldness, worse hands.

Throat

Noisy swallowing drink rumbles through throat and stomach. Spasms or paralysis of esophagus.

Comments

A. H. Croucher cured a boy, 3 1/2 of convulsions with Hydr-ac. First attack occurred six months previously. His father's sister had died of epilepsy. Before the fits came on he could walk well, but could not afterwards. The fits occurred at intervals of about three weeks when a succession of them occurred, each lasting about five minutes during two or three days. During the intervals between the fits he would generally scream.

In the morning on awaking, patient cried out, then convulsions occurred, body and limbs convulsed, eyelids twitched but remained open, eyeballs turned up and to right. Seemed quite unconscious. Hydr-ac. 2x, one drop three times a day increased afterwards to two drops and continued for a fortnight. No more convulsions, but three months later a rash developed all over him.

The characteristic blue tint of Hydr-ac. is apparent after death in some poisoning cases: livid spots on limbs, nails violet. In one case there was a brilliant violet hue all over. The tetanic spasm of Hydr-ac. is persistent and tonic and has none of the reflex excitability of the Nux state.

Hydr-ac. acts most powerfully on the muscles of face, jaws and back, the risus sardonicus is pronounced, lividity, frothing.

PAGE 808

It acts on the medulla and through the vagus nerve on heart and respiration. The breathing is irregular and gasping. The heat is greatly disturbed, blueness and coldness of surface. The pulse is feeble, imperceptible. The patient clutches at the heart as if in distress. The prostration of Hydr-ac. is profound: drinks roll audibly into the stomach.

It cured a boy of four of fever who had this symptom: "when swallowing a teaspoonful of liquid it sounds like water rolling into an empty barrel." Paralysis attacks first the lower, then the upper limbs.

A dry tearing cough worse at night is among the symptoms of Hydr-ac. and it relieves a similar cough often met with in tuberculosis patients. "Feels as if a cloud were going over his brain," is a symptom Cash removed with Hydr-ac. in a case of sunstroke.

There is much disturbance of the digestion, which is worse after eating. The headache is worse at night and the vertigo worse in the open air. Coldness is a great feature with the remedy, marble coldness within and without. Blue tinge of the skin is also characteristic.

Compare

(1) Camph. - cholera, coldness, Helod. - coldness.

(2) Cic. - spinal cord, cramp in nape.

(3) Con. - paralysis spreading from below upward.

(4) Oenanth. - epilepsy.

(5) Lauro. - dry tickling cough, Lauro. has also a cough with jelly-like sputa dotted with bloody points.

- (6) Lach., Tab. (asphyxia), Hell.
(7) Solania - paralysis of lungs and heart.
(8) Nux-v. - tetanus, but of different type.

Hydrogenium

(the element)

Pharmacy

Hydro. Hydrogen. The Element. Historical dose: All potencies.

History

Hydrogen was the first element to be formed.

This primordial element hydrogen begins Mendeleev's Periodic Table. It has a positively-charged proton as its nucleus and a negatively-charged electron-cloud around it. **Planets:** Moon.

Homeopathic

This is a summary of a first provings of Hydrogen by Jeremy Sherr and his team of provers in England. They proved modern Hydrogen with its increased Tritium content as it is now.

Symptoms

MIND

Everything is out of balance. Perception seems to have altered, which makes everything different. Feels distant and separated from things. Feeling spacey, lightheaded. Feeling of expansiveness. Unreality feeling like after taking drugs. As if in a dream. Distortion of reality. Everything seemed a long way away. Confusion of identity.

Difficult concentration. Confusion of mind. Emotional confusion. Feel grubby. Accident prone at work. Aversion to studying. My head feels full of confused, disjointed and jumbled thoughts. Muddled and forgetful. Irresolution about what to do with her life.

Absent-minded and forgetful. Forgets what he is going to do. Tendency to lose things and blamed myself. Trouble finding the right word and explaining my mental state.

Mistakes the left and right sides. Mistakes when writing. Difficulty adding up, counting, finding names for things, calling pets by their wrong names.

As after a fright. Angry mood and very irritable. Depressed like seeing a window open and unable to go through it. Strong alternations of moods, high then low. Suicidal tendency, desire to jump from a high building or cut wrist. Religious. Desire to reorganize the house. Overwhelming desire to be in the country.

Doing everything faster. Feel like a crippled old man. Walking slower than usual. Feeling of nervous apprehension as if before a visit to the dentist or the excitement with butterflies in the stomach.

PAGE 809

Anxiety about money and fear of poverty. Marked tendency to panic. Desire to be alone. Aversion to being touched.

Feeling weepy and vulnerable. Insecurity and self doubt. During the full moon felt low and depressed. Thoughts of death and suicide. Sensation of being larger. Sensation of being smaller than normal. Felt distant and detached. Indifference to husband. Felt emotionally numb and unable to respond, as if I wasn't there. Indifference, despair and hopelessness, no way out. Apathetic. A feeling of boredom and depression. Deep sighing with sense of resignation. I feel I can't cope.

Feel a blanket of depression over me. Silent, morose and introverted. Developed a self pitying, very tearful depression through the morning. Caught myself talking to myself. Loquacious. Suspicion and paranoia. Everything seems funny. Laughed at serious things.

Abdomen

Aversion to tight clothing around waist with nausea. Pain in the abdomen after stool, better bending double. Achy pain in the right iliac in the late morning. Pains in right groin, ever increasing. Sharp pain, left lower abdomen, feels like movement of gas. Stabbing pain in right, lower abdomen, groin. Sunken feeling.

Back

Coldness in back. Sensation of dry radiating heat at the sacrum through the night. Itching on back below scapula on coughing. Twinges of pain across back. Backache, better lying on the painful, side. Deep, bruised pain between left scapula and vertebral column.

Aching pain, right lower inside angle of scapula. Aching between lower and mid back.

Pain in lower lumbar area, better for hot bath. Aching and weakness in lower back.

Aching pain in sacrum making him want to rock backwards and forwards.

Stabbing pains. Sharp neuralgic pain shooting from left shoulder near neck, like an electric shock. Stiffness in neck. Tension in the back of the neck with headache. Tiredness in back with aching. Weakness in back.

Breasts

Breasts enlarged. Feels like bone pains. Shooting pain in the right nipple.

Chest

Feeling of anxiety in chest. Tightness in chest on waking with wheezing. Chest felt very dry in central heating. A hard pain in the chest like someone was squeezing it. Short, sharp pains lower end of sternum.

Coughs

Coughs seems to be worse in the morning, better through the day and worse at night.

Coughing immediately on waking. In the middle of the night, cough with catarrh at back of throat, better for a drink. Deep barking cough, with no expectoration, compelled by tickling in throat. Barking cough with lachrymation and nose running with clear fluid.

Cough with wheezing has to lean forward. Dry cough from tickling under the sternum.

Greatly aggravated by smoking and drinking. Tickling in throat compels cough. Cough from swollen sensation in throat.

Dreams

Confused dreams. Many dreams unremembered. Dream of colors, blue seas. Dreams of colors. Dreams more active and busy. Dream of profuse flakey yellow catarrh pouring from nose into basin. Dreams of suppressing my emotions. Had a headache in the dream and woke up with a headache. Dream that father died, very upsetting. Dream that the mole I have beside my nose grew much larger and I was afraid I'd have to cut it out.

Hurrying, busy dreams. Dreamed I was pregnant. Feels is generally dreaming more about her children than ever before. A frightening dream. Horrible dream of killings, murders

and suicides. Dream of spies, resistance movements, excitement, suspense and avoiding being caught. Horrific dream about sick cows wasting away with a sort of "cattle aids". An awful, sinking, helpless, end-of-the-world feeling.

Ears

Blocked sensation in ears, worse swallowing. Traveling in a car, eustachian tube blocked, like in an airplane. Right ear feels cold. Ears felt rough and itchy. Feelings of formication on ears. Itching behind both ears and in left external meatus on waking. Ringing noise in both ears with headache. Ears hurt in the morning. Aching in right ear, with a cold sensation as if blowing on it. Deep aching pain in right ear. Two sharp inward stabbing pains in the left ear, followed by ringing in ear. Sharp pain in the left ear after waking. Left sided earache and coming in waves. Sudden stabbing pain in left ear. Pulsing in ears, "as if I can hear heart working". Ears feel peppery at base inside. Very conscious of sounds and noises.

PAGE 810

Eyes

Desire to close eyes with headache. Green-yellow crust around left eye on waking. **Eyes** bloodshot and watery. Ecchymosis. Bright red pustule on rim of right upper lid with sticking, pricking pain, worse by blinking. **Eyesight** deteriorated. Sensation as if grit in the left eye at night, but nothing actually there. **Eyes** feel heavy. Watery eyes during cough, after yawning. Sharp pain above the left eye. **Eyes** stinging. Photophobia to artificial lights and car lights. **Eyes** prickly and tired. Blinking a lot. Swelling of upper eyelids. Left eye twitched. Black spots floating across the vision. After looking away from a picture on the wall, retained white image on the vision. Lights in front of eyes when jumping up quickly. Floating specks of light before vision.

Face

Pale face. Flushed face with general weakness. Face felt hot with red cheeks. Flushed face with headache after anger. Patch of dry, scaly skin under chin. Very rough, chapped lips. Dry, chapped lips. Crack appeared corner of mouth, left side. Skin flaking on waking. Pimples right side of chin. Two red spots on cheeks with headache.

Face

Face looked pale and drawn with black circles under eyes and chin down. Looked older. Aching in facial bones with a cold. Twinge where jaw joins skull, worse motion and opening mouth. Face aching in the morning on waking, especially the teeth. Stiffness and pain in right side of jaw. Left side of face feels tender and aches. Numb, tingling lips, worse on left, as if anesthetized, like cocaine.

Female

Itching of external genitalia, better for scratching. Brown vaginal discharge. Period three days earlier than normal. Black blood to begin with, later in the day it became more red with dark clots. Flow heavier than normal. Period late, with slow onset of intermittent bleeding. Periods up to two weeks late. Heaviest periods I've ever had. Period started with immediate heavy flow and slight cramping pain on waking. Period lighter than usual. Starts and stops with more clotting. Slight pain between ovaries, extending to just above the pubic bone. High sexual energy. Pain between ovaries, extending to just above pubic bone.

Food

Desire for cold water which does not ameliorate the sore throat. Appetite increased. Hungry as if nothing will fill the emptiness in my stomach, better eating bread. Appetite diminished with weight loss. Complete loss of appetite with weeping. Didn't enjoy her usual lunch of bread, butter and banana, which felt dry and heavy. Averse to spicy food. No desire for tea. Averse to hot drinks and hot food. Craving for spicy Foods. Desires pineapple, sweets, alcohol. Desire to smoke tobacco. Nauseous after a cup of tea. Averse to any tea. Smell of garlic made me feel nauseous. Very thirsty for cold drinks.

Head

Head feels hazy, heavy and unpleasant. Head feels too heavy for the neck. Band round the skull. Formication which moves about on the scalp. Sensation as if something is crawling on head like lice.

Sensation as if a locust, on the back of the head. Hair sticky after washing. Slight humming in head. Headaches are worse from a sudden movement. Frontal headache. Headache is worse reading, but better when writing, worse traveling in a car. Headache over right eyebrow. Headache all day before period, left side. Feels pain inside the brain. A constant piercing headache in the center of the skull. Skull bones aching. The headache prevents work and is better from a short nap. Headache with a feeling of a line across the top of the head from side to side. Tenderness at the base of the skull. Dull ache, vertex and behind eyes. Headaches in spots that can be covered by a finger. Burning, throbbing pain, left side of head and face. Sharp, piercing pains. Attack like having a stroke, worse moving head. Profuse perspiration in bed at night, soaking the pillow. Sweating on forehead. Tingly sensation over head and face with vertigo.

PAGE 811

Heart

Conscious of heart beat. Feeling of anxiety. Heart palpitations, pounding. On climbing the stairs, three or four heavy beats of the heart **with stiffness of the legs. Single thump in the heart**, with a sense of loss and longing. Palpitations while lying on left side, with a sensation of buzzing as if nerves firing in the heart. Thudding palpitations, frightened him, thought he was having a heart attack, worse anxiety.

Kidneys

At the end of and after urination, a stinging, burning pain along the urethra. Bladder feels full, but little passes. After just one cup of tea at breakfast, urination three times in twenty minutes. Urinate frequently due to nerves. Woke at midnight to pass urinate. Urine escaped with cough. Bladder fuller than usual on waking. Urine smelled strong.

Larynx

Voice quite deep, with roughness and lots of phlegm in the throat. Voice seems weak, deep and rough. Voice lower as if getting a cold, as if something stuck at the bottom of larynx. Voice seemed low.

Larynx

Tickling between larynx and sternum with dryness.

Limbs

Fingernails swollen, hot, very sensitive to touch, suppurating yellow water or pus under the skin. Cuts become slightly septic, tender to touch and swollen. Piercing pain as if stuck with a piece of wood. Feels as if the skin is trying to burst out from the swelling. Legs feel weak, wobbly when walking. Clumsy and knocked things over more than usual.

Cut finger and hurt fingernail. Feeling cold, especially hands and lower legs. Fingers of left hand feel cold and numb. Hands feel icy cold to touch. Hands and knees cold. Feet cold with hot flushes, while walking outside. Right foot icy cold. Right leg and foot very cold. Athlete's foot. Broken skin and redness between toes. Formication on the inside of the lower right leg. Warm, glowing hands on waking. Hot thighs with cold feet. Nails seem more brittle. Numbness and tingling in arms. Lower legs feeling numb and cold as if dead. Felt as though shoes too tight. Soles of feet felt numb when walking. Aching shoulders and arms extending to fingers. Left arm aches. Pain in wrist after writing. Muscles in right buttock very sore. Pain in back of right knee. Aching in shin bones. Soreness and tenderness in soles of feet. Burning sensation of soles of the feet. Sharp neuralgic pain shooting from left shoulder like an electric shock. Splinter-like pain in right elbow. Shooting pain in right heel. Throbbing pain in the big toe of the right foot. Cold sweat on palms with apprehension. Heaviness and restlessness of both legs during the night. Hands shaking while trying to write or after anger. Stiffness of legs on climbing stairs. Tingling in legs, feet. Calves feel heavy and tired.

Lungs

Breathing difficult on inhalation. Sighing a lot, needing air. Wheezing on waking with itching in the back. Clear, white and bubbly expectoration hawked up from throat.

Coughs a lot and bring up lots of egg-white mucus.

Bringing up, a dark color phlegm. Mucus difficult to cough up. Cough with difficult expectoration of very small amounts of thick, yellow mucus.

PAGE 812

Male

Crack, split on the foreskin and a red rash on the end of the penis. Burning, aching sensation at the base of the penis on the left.

Mouth

Gums bleeding. Mouth dry. Dry mouth and lips. Mouth feels dry with thirst. Small ulcer behind the teeth, bottom left side. Ulcer right side of lower jaw under lip. Lots of salivation at night, with toothache. Swelling mouth and lips. Bitter taste in mouth. Usual food tastes dry. Bread tasted like sawdust. Ended up eating fruit which had a sharper taste. Metallic taste in mouth. Water tastes metallic after cleaning my teeth. Burning peppery sensation in the mouth, throat, extending into ears and nose, with watery eyes.

Neck

Neck sensitive to cold, wanted a scarf. Red spots on left side of neck. Glands both sides of neck swollen, worse pressure. Gland in neck on right side swollen and painful and hard to touch. Neck area feels enlarged. Feeling as if tendons in back of neck too short. Numb feeling back of neck. Pain in back of neck, right side, on swallowing cold liquids. Neck feels as if I had been struck a blow on the back of it.

Nose

Mucus from nose, difficult to swallow. Nose stuffy with clear, fluid coryza. Slight catarrh and much sneezing in the evening. Nose running on the left side and the right side is clear. Nose runs only while eating. Mucus builds up in the nose sometimes with mucus streaked with blood on blowing the nose. Flakey yellow-green catarrh with bits of blood in the flakes. Pale green crusts from nose. Thick green mucus. Nose running white, clear fluid like a tap. Lots of mucus of an egg-white consistency. Sensation of large bump at

the end of the left nostril. Itching inside nose. Sensation of movement, "as though worms moving". Pain root of nose, with obstruction.

Raw pain from constantly blowing the nose. Sharp peppery sensation behind left nostril. Tip and wings of nose throbbing during headache. Very acute sense of smell. Sneezing a lot on waking. Sneezing and feeling cold, followed by a warm feeling. Sneezing with acrid, itchy sensation. Sneezing and thin coryza. Tingling in nose, with sensation as if about to sneeze.

Perspiration

Perspiration very cold. Waking from frightening dream in a cold sweat. Woke up covered in cold perspiration and in emotional turmoil. Cold perspiration with paranoid anxiety. Perspiration with heat and odor on waking. Perspiration all over through the night, with fever feeling. Perspiration during sleep. Clammy sweat in bed at night during sleep.

Rectum

Very constipated, straining to pass a stool. A sensation of a ball in the rectum which would not move. Feeling of fullness in the rectum. Constipated with hard stool. Constipated with desire for stool and had to strain for ages. Flatulence smelling of putrid eggs. Pain in rectum when sitting, as if forcing back a stool. Anus sore during and after stool. Fast expulsion of diarrhea-like stool. Very urgent desire for stool in the morning. Urging to stool absent all day.

Skin

Increased tendency to herpetic eruptions. Got sunburned mainly on the left side of the back, although the whole of him was in the sun, very strange.

Sleep

Sleep deep and refreshing. Painful to move from one position to another. Wants to sleep propped up on pillow because of sore throat and stuffy head. Restless at night. Very sleepy in morning, needed frequent short naps during the day. Sudden sleepiness. Unable to get to sleep. Couldn't sleep for ages, with irritability. Sleepless from thoughts at night. Waking several times in the night. Woke in the night with a terrible fright, shaky, about to scream. Very warm in bed at night on waking.

Perspiration all over. Had to uncover limbs to cool down. Waking early with an urge to rise. An attack of yawning. Sleepy at noon could not stop yawning, much better after lunch.

PAGE 813

Stool

Stool came very forcibly and fast, like an explosion. Small, hard stool which felt large. Stool light-colored and looser than normal. In the morning, passed a small stool with lots of mucous. Flatus with discharge of gray, white mucus from the anus which smelled fishy. Lumpy stool, smells fishy. Clay-colored soft stool in the morning. Pale, yellowish soft stool in the morning. Stool slender, small and loose. Long, thin soft stool.

Stomach

Anxious, queasy feeling in the stomach. Sensation of "butterflies", with apprehension. More hungry than usual. Sensation of wind in stomach with belching. Stomach feels distended and bloated one hour before evening meal. Wobbly feeling in stomach, "as if something wanting to come up". Nausea with weakness or headache. Nauseous feeling with flushing and trembling. Constant feeling of nausea, worse bending over and better breathing deeply and standing quite still. Retching after bending over. Nausea better

movement and walking about, better eating. Nauseous after a cup of tea, while preparing food and from the smell and thought of food. Smell of garlic nauseous, as if during pregnancy. Nausea recurring again noticeably on driving the car. Nausea coming on while lying in bed in the morning on waking. Nausea in epigastrium and umbilical.

Teeth

Toothache at night. Woke with severe toothache, better drinking cold water. Severe toothache, left lower side, with left sided earache, worse eating. Pains unbearable. Toothache on upper right side. Aching pain in teeth on right side, extending to right ear and top of right eye. Pressing pain in lower incisors. Severe stabbing tooth pain throughout whole mouth.

Temperature

Chill followed by heat. Chilly with the influenza. Shivery feeling. Fever during the night with vivid nightmares. Fever through the night with perspiration. Cold then hot. Felt hot internally and externally with red cheeks. Slight fever on waking.

Throat

Catarrhal feeling at back of throat. Phlegm in the throat. Sensation of a film over the throat, with a sensation of difficulty in breathing. Choked on a piece of food. Throat feels furry with a furry taste. Sensation of a hair on the right side of the throat. Tickle, deep in throat causing coughs. Burning sensation on roof of mouth at back of throat with post-nasal catarrh, worse from swallowing. Sensation of a lump in the throat. Throat painful and dry. Sore throat with blocked nose, worse sneezing. Sore throat, worse on waking in the morning, better warm drinks and worse inspiring cold air. The pain moved from the left to the right. Right side of the throat painful on swallowing. Rawness of throat and roof of mouth. Frequent swallowing.

Tongue

Tongue white, more in center. Small white spot to the left of the middle of the tongue, feels sharp, worse touch and eating. The tip of tongue feels a little numb and very smooth. Spot on the right side of the tongue with sharp pain, worse moving tongue. The spot is under the surface, not visible. "Feels like its been cut".

Vertigo

Vertigo, all day. Sensation of dizziness through head like a wave. Vertigo during headache. Vertigo in the morning, worse moving head. Nausea and vertigo. Felt dizzy on getting out of bed in the morning. Vertigo, worse on rising from sitting. Lost balance slightly towards the right.

Comments

Other remarks from the provers of Hydro. include: You take the remedy and its quick, like time traveling. I can't believe its only a week ago I took the remedy. It seems like an eon. Time sense seems warped.

PAGE 814

I looked at the clock. I think it was about an hour clock time. Time is different on this level, its moving very quickly. A lifetime is a very short space of time.

My whole time scale has changed since taking the remedy, I've lost a lot of boundaries on time. Don't hurry, just do things in my own time. It seems as if all the days became one. Confused about what happened when and where, about what happened in the past. I was having problems assimilating the notion of time, outside time seemed beyond

description. I Couldn't differentiate between backwards and forwards in time. Felt I had got stuck in time.

Eyes seemed brighter. Colors looked bright and beautiful. Much more one-pointed concentration on whatever I am doing. Not thinking of more than one thing at a time. Interior monologue much stilled. Concentration better. Relaxed attitude to work I have to do (curative). Concentration improved (curative). More efficient than usual. Ready to fill in odd spaces of time with odd jobs (curative). Felt alert and mentally active in the evening and night. Memory improved.

Have given up my normal planning and making lists. I used to organize all the time (curative). Confidence is improved before and during teaching (curative). Less procrastination than usual (curative). Less nervous with strangers (curative). Usual tendency to bite and tear thumbs much better (curative). Mood better in the evening Ñ more cheerful and positive.

Feels quite elated and bouncy. Felt extremely good in spirits and health on waking. Woke up feeling incredibly happy. Husband commented that prover was more buoyant than for some time. Great exhilaration Ñ was singing and joking with the children. Even husband's anger did not dampen my enthusiasm. Feel happy and bubbly inside while lying in bed. Felt exhilarated.

Surprised how much less I react back to husband when he is angry Ñ not needing to respond (curative). I feel nicely balanced, more able to think in the now. I am generally more self-centered, less irritable and confused. Things are more in perspective (curative). Looking back over the last few days, I coped with a lot of pressure really calmly (curative). Although feeling very tired, not feeling irritable or snappy as usually would when tired (curative). Felt emotionally 'stretched out', but calm. Irritations don't make me so cross. The 'stretchiness' absorbed the daily irritations Ñ they didn't peak up enough to a point where I felt irritated and cross (curative).

I usually don't remember dreams, but during the proving they were vivid. Revolting dream of ordering crepes with baby rabbits and kittens inside. The tiny animals were whole and live in tomato sauce, but only moving a little. I managed to finish my plateful as it tasted good, but it revolted me and I was relieved to finish, but my horror returned when my friend came in with a plate of the same which I had to help her eat. My revulsion became worse when one of the kittens clung to my hand. This dream occurred after feeling self-conscious about eating meat-filled crepes the previous night.

Used to have 'deja vu' dreams where situations I dreamed about later appeared in real life. This symptom stopped during the proving. Dream of a girl at school who committed suicide, and of participating in a play about death. Dream of my dead grandmother in the afternoon. Several erotic dreams about people I haven't really thought of sexually.

Difficult to pass stool. Usual diarrhea after headache or eating gone Ñ (curative). Expected diarrhea from anticipation and eating a full tea cake did not materialize. (curative). Menses started again during the menopause after an absence of six months. Noticed mustache seemed less and hair was finer in a woman, observers agreed. Mustache in a woman (disappeared).

PAGE 815

Scalp less dry, less dandruff, less itchy (curative). Spot on hairline at the base of the neck, very itchy. Sore pimple on the back of the head. Usual itching of scalp has been absent (curative). Usual flatulence is improved. (curative). Less stiffness and aching in

the back on waking that usual. (curative). Back much less strained on physical work than usual. (curative).

Hydrophis cyanocinctus

(sea-serpent)

Pharmacy

Hydroph. *Hydrophis cyanocinctus*. Sea-serpent. The tincture is made from the venom of Sea-serpent. Historical dose: Tincture and all potencies, 6c to 30c.

History

Hydrophis cyanocinctus is a venom of a sea-serpent, whose habitat is along the coasts of the Pacific Islands, Australia, India and China. J. R. Reside carried out a Homeopathic Proving in 'double blind,' from January to June 1958, on ten provers, eight of whom were men and two women. The potencies used were 6c and 30c. **Planets:** Mercury, Moon.

Homeopathic

Hydroph. from a toxicological point of view, attacks the peripheral nerves, giving a symptom table similar to that of poliomyelitis. From the pathogenic point of view, it is possible to note particularly a depressive state and weepy, irritability, fatigue, forgetfulness and an inability to concentrate.

Depression, heaviness, clouded mental state. Throat dry. Stinging pains in the limbs and thorax. Worse at night and after nightmares. Wakes with a feeling of thoracic oppression. Paresis, paralysis without sensory disorders. The toxicology enables us to describe a paralytic syndrome comparable to that of poliomyelitis.

Clinical

Polyneuritis. Poliomyelitis. Myopathy. Styes.

Modalities

Aggravation on waking, before menses, on speaking. Worse on the left side. Aggravation in the morning. Worse from heat. Worse from lying flat.

Symptoms

MIND

State of euphoria, followed by a period of sadness with tears, ameliorated by consolation. Cannot concentrate. Lethargy, depression. Disgust for life. Anxiety with clairvoyance. Sleepy, lacks initiative. Depressive states during menopause.

Abdomen

Enterocolitis. Rectocolitis. Violent, sharp, stinging pains with feeling of tension along the colon, worse in the morning and on the left side.

Ears

On the left, pains in the lobe. Earache. Deafness in the left ear.

Eyes

Burning, especially on the left side. Eyelids heavy. **Troubled vision**. **Pruritus** of the eyelids. Predominantly on the left side. Styes (especially on the left). Conjunctivitis. Blepharitis.

Female

Menses abundant. Blood-streaked vaginal discharge. Cervicitis. Vaginitis. Menorrhagia. Salpingo-ovaritis. Pre-neoplastic conditions.

Head

Headache with heavy head, worse on the left and at the front. Headache worse in the morning and from heat, ameliorated in fresh air. Headache with beating in the temples and sensation of a tight band. Pruritus of the scalp.

Heart

Pain in the precordial region, spreading to the left hemi-thorax, worse when lying flat. Feeling of dryness and burning in the thorax. Extra systole. Arrhythmia. Coronary arthritis. Angina pectoris. Valvular disease. Septicemia.

Limbs

Pain in the thumbs and arms, especially the left. Stinging pains in the limbs and the left hip. Feet cold. Numbness, heavy feeling in the limbs. Paretic and paralytic syndromes of the lower limbs. Painful paraesthesia.

Lungs

Dyspnea. Tracheitis and bronchitis.

Mouth

Dry, worse in the morning. Toothache in the molars, on the left side. Left maxillary pain, which prevents mastication.

Nose

Burning catarrh, ameliorated in the fresh air. Coryza.

PAGE 816

Rectum

Constipation and acute pains after going to stool. Painful, swollen hemorrhoids. Anal pruritus.

Skin

Skin dry with chapped hands. Spots on the face and nape of the neck. Skin itching at different parts of the body.

Sleep

Sleep disturbed, woken by nightmares between 2.30 and 4.30 a.m. with feeling of anguish and heat and feels very ill. Calls out in his sleep.

Stomach

Nausea, thirsty for cold drinks. Epigastric pains and pain in the right hypochondrium, worse after meals.

Temperature

Profuse sweating without a temperature. Fever with shivering. Fever with inflammation of the throat.

Throat

Dry, burning. Tonsils sore. Tonsillitis. Pharyngitis. Hoarseness worse in the morning and after speaking. Laryngitis. Tickling cough and dryness in the larynx.

Compare

(1) Lach. - worse after sleep and when lying down with localization on the left side and pain in the precordial region with constriction.

(2) Lath. - paresis of the limbs.

SOURCES

Julian.

Hydrophyllum virginicum

(virginian waterleaf)

Pharmacy

Hydro-v. Hydrophyllum virginicum. Virginian Waterleaf. N. O. Hydrophyllaceae.

Tincture of fresh plant in flower. Historical dose: Tincture and all potencies.

Herbal

The Hydrophyllaceae are nearly allied to the Borages. They grow among moist, shady rocks and they derive their name from the circumstance that in spring a small quantity of water is held in the cavity of each leaf.

Hydrophyllum needs further proving that it may have its position defined. It should prove to be a good adjunct to Euphrasia. Dr. Hoyt tested the remedy in one case of catarrhal inflammation of the eyes, which is cured like magic. **Planets:** Sun.

Homeopathic

The older writers speak of Hydrophyllum as an antidote to Rhus poisoning.

Eyes inflammation.

Comments

The only homeopathic experience on record is that of Dr. Hoyt of Indiana, which is recorded by Hale. Ten minutes after gathering a cluster of the beautiful blue flowers, Hoyt noticed his eyes began to water and burn with slight itching. By the time he reached home he was suffering severely, eyelids swollen, fiery red, some sensitiveness to light.

The symptoms continued through afternoon and evening and kept him awake some time. In the morning, the lids were agglutinated and eyes sensitive to light. The burning and smarting were less, but lachrymation remained and it was a week before the eyes were quite right.

SOURCES

Clarke.

Hyoscinum hydrobromatum

(alkaloid of Hyoscyamus)

Pharmacy

Hyosin. Hyoscyamine hydrobromate. alkaloid of Hyoscyamus. Scopolamine hydrobromide. Historical dose: All potencies, 3x and 12x trituration.

History

Hyoscyamine hydrobromate corresponds to the effects of strong poisons introduced into or generated within the body. **Planets:** Moon.

Homeopathic

Hyosin. is similar in its effects to alcohol, both recent and remote. It is a remedy for shock. mania and chorea insomnia.

Symptoms of uremia and acute nervous exhaustion. Paralysis agitans, tremors of disseminated sclerosis. Dry cough in tuberculosis. Sleeplessness and nervous agitation.

Clinical

Chorea. Insomnia. Mania. Parkinson's disease. Uremia.

SOURCES

Boericke. Clarke.

PAGE 817

Hyoscyamus niger

(henbane)

Pharmacy

Hyos. Hyoscyamus niger. Stinking Roger. Henbane. Hog-bean. N. O. Solanaceae.

Tincture of fresh plant. Historical dose: All potencies, sixth to 200c potency.

History

Hyoscyamus "Hog-bean" is nearly allied to Belladonna botanically and in pathogenetic action the two drugs are much alike in their main features. But when examined closely their differences are sufficiently well marked to render their distinction easy.

Though sometimes growing near rivers, Bell. flourishes best in a chalky soil. Hyos. is found growing on old rubbish heaps, near ruins, on roadsides and sometimes by the seashore.

The flower of Bell. is of a dull, purplish brown of Hyos. a dirty yellow with claret-colored streaks. Bell. is a smooth plant, whilst Hyos. is densely covered with thickly woven hairs and by a sticky, heavy-smelling exudation.

Hyos. is one of our best remedies in toothache, having well-defined symptoms. Hyos. is also an ancient domestic remedy for toothache, the application being peculiar. A penny is made hot in the fire and when taken out a pinch of Henbane seeds is dropped on it and fumes come away. A wineglass is inverted over it and this is soon filled with the fumes and applied to the mouth, when the fumes are inhaled.

The popular idea is that the fumes expel the "worms" of toothache, but, as Lauder Brunton has shown, the supposed "worms" are the embryos of the seeds forcibly expelled on the rupture of the seed coats by the heat.

Homeopathic

Hyos. disturbs the mind, brain and nervous system profoundly. Diabolical force seems to take possession of the brain preventing its functions.

Hyos. causes a mania of a quarrelsome and lascivious nature. Disturbs the nervous system profoundly. It is as if some diabolical force took possession of the brain and prevented its functions.

It causes a perfect picture of mania of a quarrelsome and obscene character. Inclined to be unseemly and immodest in acts, gestures and expressions. Very talkative and persists in stripping herself or uncovering genitals. Is jealous, afraid of being poisoned, etc.

Hyos. symptoms also point to weakness and nervous agitation, hence typhoid and other infections with coma vigil. Tremulous weakness and twitching of tendons. Subsultus tendinum. Muscular twitchings, spasmodic affections, generally with delirium. Non-inflammatory cerebral activity. Toxic gastritis.

Hyos. has gestures, carphology, picks at bed clothes, with fingers. When lying on back, suddenly sits up and lies down again. Convulsions, trembling, jerks, twitchings, cramps are very marked features.

Active mania or convulsions, alternate with or ends in deep sopor. Motions of the arms are clutching or angular, throws arms about, misses what is reached for totters while walking.

Paralysis after spasms. Epilepsy, vertigo before the attack. Falls suddenly to the ground with cries. Child sobs and cries without waking. Eclampsia. Chorea, local, twitchings of solitary muscles, squinting, stammering. Sensation as if walking on and through air.

Clinical

Amaurosis. Angina pectoris. Bladder, paralysis. Bronchitis. Chorea. Coma vigil. Cough. Delirium tremens. Diarrhea. Dysmenorrhea. Enteric fever. Epilepsy. **Eyes** disorders. Hemoptysis. Hemorrhages. Hiccough. Hydrophobia. Hypochondriasis. Lochia, suppressed. Mania. Meningitis. ^{MIND} disorders. Neuralgia. Night-blindness. Nosebleed. Nymphomania. Paralysis. Parkinson's disease. Parotiditis. Pneumonia. Puerperal mania. Rage. Sexual mania. Sleep, disordered. Stammering speech. Tetanus. Toothache. Urine, retention. Vision, disorders.

Causations

Ill effects of suppressed lochia or milk. (damp and body fluid suppression) Grief, (lung) unhappy love. (heart) Jealousy. (heart and kidney) Fright, (heart, kidney, gallbladder) disappointed love. (heart)

Constitutions

Hyos. is suited to nervous, (heart) irritable, (heart, liver) excitable, (heart) sanguine people to light-haired people. **Planets:** Moon.

Modalities

Better from sitting up, (sitting connected to spleen and liver) motion, (excess condition, cold condition,) warmth, (blood deficiency) stooping. (helps yin) Worse from emotions, (liver heart) jealousy, fright, unhappy love. Worse from touch, (qi stagnation) cold. (cold) Worse after eating, (stomach excess condition) when lying down. (deficiency condition) Worse evening and night. (yin time problem) Worse from cold and cold air. (yin problem as it is pathogenic cold) Worse before, commencing and during menstruation. (before—blood stagnation, during- heat condition)

Symptoms

MIND

Mania, erotic, exposes genitals, sings amorous songs. (heart yang does not have control over kidney yang) Laughs, (heart yang excited) sings, (heart and spleen yang involved) talks, (yang excess) babbles, quarrels. (liver yang) Talkative, obscene, lascivious mania, uncovers body, jealous. (kidney /liver yang) Does foolish things, behaves like mad. (heart-mind control lost) Inclined to laugh at everything. (heart) Delirium (blood heat affecting heart and liver so delirium aggravated at yin time) with attempt to run away. Muttering delirium. (blood heat delirium so muttering) Low, speech with constant carphologia, deep stupor. (blood heat stupor, phlegm heat stupor etc) Fears, being alone, (liver wants others I suppose) being pursued of water, (blood related or damp related) being poisoned, (toxic

heat in blood) being bitten (blood heat may be) etc. Fear of being bitten by beasts. (blood heat) Very suspicious. (liver problem) Restless. (yin deficiency with hyperactive heart fire or liver involved) jumps out of bed, wants to escape. (jumping—wind, so heart wind) Rage with desire to strike, bite, fight insult, scold and to kill. (heart fire hyper) Thinks one is not at home. (shen is not grounded due to heart yin deficiency) Speechless from fright. (heart yang stagnation due to fright leads to kidney and lung qi stagnation at throat) Confusion. (phlegm fire misting the mind) Talks with imaginary persons to dead ones. (lung – imaginary and lung is animal world and corporeal soul – physical world that is matter) Imagines things are animals. (lung involved) Plays with fingers. (fidgety—liver) Syphilophobia. Unconsciousness, can barely be aroused. (heart fire or phlegm fire)

Abdomen

Distention. (qi stagnation) Colic, as if abdomen would burst. (qi stagnation) Colic with vomiting, belchings, hiccough and screaming. (qi stagnation) Red spots on abdomen. (blood stasis) Umbilicus open, urine oozing through. (heart-kidney involved) Gastritis or peritonitis with hiccough. (gastritis-qi and blood stagnation) Tympanites. (qi stagnation)

Back

Pains in the back and especially in the lumbar region (kidney qi deficient) with swelling of the feet. (cold damp) Lancinations in the loins and shoulder-blades. (lancinating: blood repletion)

Breasts

Soreness in spots to left of nipple (liver yang hyper or liver fire) alternating with stitches. (liver blood or qi stagnation)

Chest

Suffocating fits. (blood stagnation and heat, fits due to heat may be) Spasm, forcing bending forward. (bending forward—yin so blood stagnation spasm) Dry, spasmodic cough at night (lung blood heat/phlegm heat cough,) worse lying down, better sitting up (excess condition both) from itching in the throat, as if uvula were too long. (phlegm or blood stagnation so long uvula) Hemoptysis.

Ears

Deafness from paralysis of auditory nerve. (nerve is from heart—paralysis is from qi and blood stagnation in the vessel so deafness) Buzzing in the ears. (blood/qi stagnation) Hardness of hearing, as if stunned. (stunned—qi stagnation)

Eyes

Pupils dilated, sparkling. (pupil—kidney, liver fire so sparkling and dilated) fixed.

Aversion to light. (light qi further irritates liver wind) **Eyes** open but does not pay attention. (heart yang floating so less attention due to less grounding, or liver fire may be)

Eyes roll about in orbits. (liver wind) Squint. (liver wind) Constantly stares at surrounding objects. Objects, seem red, large or with colored borders (yellow). (liver fire) Strabismus. Spasmodic closing of lids. (spasm—yin blood deficiency or pathogenic factors attack) Diplopia.

Face

Pale, flushed, dark red. (heart blood vacuity and yin vacuity fire) Muscles twitch. (spleen qi stagnation) Grimaces and makes ridiculous gestures. (heart fire may be) Lower jaw drops. (liver yin deficient so lower jaw drops due to tendon weakness, lower—yin)

Muscles twitch, when protruding the tongue.(heart yang hyper with spleen qi stagnation)
Lock jaw.(liver tendon locked so liver wind or liver qi stagnation)

Female

Lascivious, uncovers sexual parts. Excited sexual desire. Nymphomania.(kidney yang hyperactive) **Hysterical(liver wind)** or epileptic spasms,(Liver Wind, Phlegm Epilepsy, Blood Stasis,Spleen Deficiency With Phlegm,Spleen And Kidney Deficiency)
before menses.(blood stasis) **Convulsive trembling of hands and feet during menses.**
(heart fire and kidney yang hyper ,during menses—heat) Bedwetting during menses.
(heart fire so involuntary with no control and heat push out urine as bladder and heart connected) **Painless diarrhea in lying-in women.(dampness diarrhea so yin diarrhea so in women,and painless as no cold heat etc,excess condition so lying aggravates)**Colds that settled in the uterus and cause labor-like pains.(pathogenic cold settled) Convulsions during pregnancy.(during pregnancy is heat condition so heart fire,liver fire and this heat condition add up so convulsion) **Milk and lochia suppressed.(stomach juice become milk so if this is suppressed it affects stomach qi stagnation due to damp so spleen qi so heart fire,lochia—kidney qi stagnation due to suppression which makes kidney yang hyper.)**
Spasms of pregnant women.(pregnant women—heat condition with heart fire condition so spasm) Puerperal mania.

Food

Aversion to water.(dampness accumulation in stomach or due to blood problem which is liquid) Loss of taste.(dampness blocking stomach qi and taste bud nerve to heart is damp blocked) Bulimia with violent thirst with inability to swallow. Thirst with drinking but little at a time.(due to blood heat may be)Dread of drinking.(due to problem in liquid/yin or blood) After a meal, headache intoxication,(damp heat headache,after a meal—heat, heat—intoxication and headache) great anguish(heart) and sadness.(heart,lung) After drinking, convulsions.

Head

Feels light (heart fire so yin deficient)and confused.(due to blood heat and not due to dampness) Rolls or shakes the head to and fro, when bending forward in stupor after concussion of the brain.(blood heat stupor and not phlegm heat) Brain feels loose.
(Inflammation of brain(blood heat or heart fire) with unconsciousness,(blood heat or heart fire) head is shaken to and fro. Waves of pulsation in head.(blood heat or cold congealation of blood) Pulsating headache.(pulsating—cold stagnation blood congealation)

Heart

Pressure, tightness and anxiety in precordial region.(qi and blood stagnation) Oppression of heart(qi stagnation) with transient stitches.(qi stagnation) Tearing, sticking in heart.
Violent stitch in precordial region.(qi stagnation) Soreness, tightness of heart region.(qi stagnation) Heart's action violent, tremulous, irregular.(heart qi stagnant so action is irregular,tremulous and violent may be due to blood stagnation too) Palpitations,(qi and blood stagnation) unable to move body without anxiety, apprehension of suffocation(suffocation-blood stagnation) or swooning.

PAGE 819

Kidneys

Involuntary urination.(heart fire) Bladder paralyzed.(bladder/kidney qi and blood is stagnant) Has no will to urinate.(will power is kidney and will is heart so heart doesn't have will to through out urine or yin) (Caust.) Frequent, scanty, painful, nightly urination (kidney yin vacuity heat)or retention of urine after childbirth.(blood stagnation or blood deficiency after childbirth so retention may be due to one or both)

Limbs

Great restlessness,(yin deficiency with hyperactive heart fire or liver involved) every muscle twitches.(spleen qi stagnation) Will not be covered. Picking at bed-clothes, plays with hands,(fidgety—liver) reaches out for things.(liver wind) Epileptic attacks ending in deep sleep.(epileptic attacks due to liver qi and blood stagnation so deep sleep due to blood stagnation) Spasms and convulsions.(liver wind or heart fire and qi and blood stagnation) Cramps in calves and toes.(cold stagnation in spleen channel) Child sobs and cries without waking.(blood stagnation so without waking,lung qi is depressed so sobs and cry and not heart) Trembling of hands and feet.(heart fire or heart qi stagnant) Fists clenched with retraction of thumbs (in convulsions).(fists clenched—anger or fire,retraction of thumb-heart)

Lungs

Slow, rattling breathing.(rattle and slow—dampness in lung), Dry, hacking spasmodic cough from a dry spot in larynx at night,(phlegm stagnation with lung yin deficiency) worse lying,(excess) eating,(excess and fod/phlegm stagnation) drinking,(dampness) talking,(lung qi dissipation) singing,(spleen qi dissipation) better sitting up.(help spleen qi) Hemoptysis of bright red blood with spasms.(lung blood stagnation) Spasms of chest with shortness of breath,(blood/phlegm) stagnation forcing him to bend double.(yin type) Exhausting cough with sweat.(lung qi vacuity)

Male

Impotence.(Kidney yang vacuity,yin vacuity fire effulgence,former heaven vacuity,liver qi depression and binding,heart spleen dual vacuity,fright damaging the kidneys,damp heat pouring downward,dampness and phlegm obstructing the network vessels,stasis obstructing the essence vessels.) Lascivious, exposes his genitals, plays with genitals during fever.(during heat or fever heart fire loses control)

Mouth

Foams at mouth.(phlegm damp) Sordes on teeth,(sordes—phlegm damp sticky) closes tightly.(phlegm stickiness) Tongue protruded with difficulty,(tongue in out stiffness – heart qi stagnation) can hardly draw it in. Speech, impaired,(heart and lung qi stagnant) lost from fright.(heart qi stagnant) Tongue dry, red, cracked, stiff and immovable,(heart yin deficient,qi and blood stagnation) protruded with difficulty, speech impaired. Bites the tongue while talking.(qi/blood stagnation in tongue so stiff) Tongue dry, rattles in mouth. Grinds the teeth during convulsions, children.(worms,heart/liver fire convulsion with kidney yang hyper may be) Teeth feel loose when chewing,(kidney yin deficiency as they are loose rooted or stomach dampness) also too long.(phlegm accumulation) Violent pain in teeth(stomach heat) with twitching of muscles of hands, face etc.(qi stagnation heart which covers hands and face) Lower jaw drops.

Neck

Tettery spots on the nape of the neck.(nape of neck is kidney region only) Stiff, contracted to one side.(kidney qi /blood stagnation)

Nose

Nostrils sooty, smoky. **Sudden jerks at root of the nose.(yang excess or heat—jerky)** or **Loss of smell and taste.(loss of smell- Wind heat in the lng channel,depressive heat in the gallbladder channel,damp heat in the spleen channel,dual vacuity of lungs and spleen,qi stagnation and blood stasis,dual vacuity of qi and blood.)****Nosebleed.(blood stasis or wind heat)** Cramp-like pressure(cold stagnation blood congealation) at the root of the nose and the zygomata. Dryness of nose.(wind heat or blood stasis)

Pulse

Pulse is full, hard, strong, rapid intermitting, slow, small, scarcely perceptible.

Rectum

Diarrhea,(heart heat/liver heat or any other heat diarrhea) colicky,(heat colick) pains involuntary,(heart fire or heat) aggravated by mental excitement (heart fire)or during sleep.(during sleep heat is more) Diarrhea after childbirth.(after childbirth blood stagnation or blood deficiency so vacuity heat diarrhea) Stools involuntary,(heart) bloody,(blood stagnation or heat) yellow(heat), watery(small intestine not absorbing fluid properly)or although hard,(heat) worse mental excitement(heart) during sleep during fevers,(heat) while urinating. (lung,bladder,kidney involved)

Sleep

Nightly sleeplessness.(heart/kidney yin deficiency) Nervous wakefulness.(heart yang excess) Sopor with convulsions. Falls asleep while answering.(dampness blocks the conciousness) Starts out of Sleep, frightened.(heart/liver fire) **Sits up and then goes to sleep again.(spleen vacuity dampness blocks the conscios so bring sleep)** Laughs during sleep.(heart yang excited during sleep) Child sobs and cries in sleep without waking. Coma vigil. Profound, comatose sleep with convulsions (heart qi and blood stagnation)and involuntary movements of the limbs.(heart qi stagnation) When sleeping, carphologia or smiling countenance (heart qi stagnant)or starts with fright.(heart qi stagnant)

Stomach

Hiccough, belchings empty,(qi stagnation) bitter.(heart) Nausea(qi stagnation) with vertigo.(stomach qi stagnation due to phlegm) Hiccough from concussion of brain. (concussion of brain—heart qi stagnant may be) Hiccough of nursing children. (heart/stomach qi stagnation during sucking milk) Cramps(cold stagnation) in stomach better after vomiting,(cold damp in stomach) worse after irritating food.(qi stagnation in stomach) Vomiting with convulsions. Hematemesis, violent cramps, relieved by vomiting,(cold stagnation,blood congealation) burning in stomach,(stomach heat) epigastrium tender.(qi stagnation or damp heat)

Temperature

Septic fevers.(heart fire and dampness may create septic fever) Slides down in bed. (spleen qi deficiency) Low fever with hot, pale skin. Warm sweat.(blood heat sweat)

Subsultus during fevers.

Throat

Constriction of throat inability to swallow liquids,(damp cold stagnation or kidney impact on throat) solid and warm food better. Stinging dryness. Elongation of uvula. Fluids come out through the nose (lung depuration/distribution function is not proper ie lung qi deficient)or go down into larynx.

Vertigo

Vertigo, (lung qi or smell qi gathers in heart but heart yang already excess so may be, gas affects lung and stomach qi) before spasms from smell of flowers, gas etc. Vertigo as if intoxicated. (toxic heat in brain or damp heat misting the mind) As of water swashing in head. (dampness misting mind)

Comments

The delirium of Hyos. is more of the low, muttering type, (heart yin deficiency heart yang effulgence) whist that of Bell. tends to be violent and furious. (heart fire)

PAGE 820

Hyos. also has fits of ungovernable rage. (heart fire) but the violence is not so sustained as that of Bell. (yin deficiency so no sustain or storing or supplying continuous fuel) The face of Bell. is red of Hyos. pale or bluish. (blood deficiency or cold congealation of blood) Hyos. corresponds to a great variety of cases of melancholia (heart, lung) than Bell. and here one great characteristic is "suspicion, (liver)" so frequently met with in cases of insanity or of those on the borderland, (Lach.)

A patient, a clever lawyer, suffering from nervous breakdown, had to abandon his business entirely some time before he came under my care. He had improved alot, when I heard from his wife in the country that he had a kind of a fit and became cold and senseless, his face working much. After that he fell asleep and had another attack an hour and a half later.

After this he was suspicious and said that his wife was poisoning him. I sent a single dose of Hyos. 1,000c to be given in food or in drink without his knowing. It was repeated once a week. He began to improve forthwith and in a few months was perfectly restored to health, though some other medicines were given later on.

In this case there was an additional indication of Hyos. in the working of the muscles of the face. Twitching (qi stagnation) is one of the grand characteristics of Hyos. "Every muscle in the body twitches from the eyes to the toes." clonic spasms: twitching of groups of muscles, spasms in general with unconsciousness. (yang stagnant with heart fire)

Another feature of the Hyos. insanity is uncovering. (liver disharmony as liver has affinity to freedom) This is not because the patient feels too warm, but because they will not remain covered: nymphomania, lascivious mania, lies naked in bed and chatters. There are violent outbreaks in the delirium of Hyos., but they cannot be kept up (as are those of Bell.), on account of the weakness.

Hyos. corresponds to the typhoid state: tongue dry (stomach/heart heat) and unwieldy, sensorium so clouded that if the patient be aroused to answer he falls back into a stupor again. (phlegm misting the mind and senses)

The sight is disordered, sees things too large or too near and grasps at them, picks the bedclothes and mutters. (liver wind, heart fire) Twitchings, subsultus tendinum and picking at the bed-clothes. Teeth covered with sordes. (damp collection on teeth) Involuntary passage of urine and feces. (heart control less ie less yang or heart fire)

When influenza takes the typhoid form it often finds its remedy in Hyos. (influenza turns into typhoid that is lung systems affected stomach/spleen symptoms) Clarke rapidly cured a boy in whom influenza attacked the meninges of the brain with pains in the head, especially forehead, piercing to the brain. Parotiditis with metastasis to brain.

Hyos. is suited to many pulmonary conditions. The characteristic cough is worse on lying down, almost completely removed by sitting up, worse at night, worse after eating, drinking or talking. Cough from elongated uvula.

The drowsiness of Hyos. has another side in restlessness. The patient lies awake for hours, children twitch in sleep, cry out, tremble and awake frightened. Hyos. 30c is one of the most useful remedies in restlessness and sleeplessness.

Compare

(1) Bell., Stram., Agar., Gels.

(2) Hyosin.

(3) Scopola, the Japanese Belladonna is chemically identical with Hyoscine. - Joyous delirium, licking of lips and smacking of mouth, sleepless, tries to get out of bed, sees cats, picks imaginary hairs, warms hands before imaginary fire, etc.

Antidotes: Bell., Camph.

SOURCES

Boericke. Clarke. Phatak.

Hypericum perforatum

(st. john's wort)

Pharmacy

Hyper. St. John's-wort. Hypericum perforatum. N. O. Hypericaceae. Tincture of whole fresh plant. Historical dose: Tincture and all potencies, esp. tincture and 30c to 200c potency.

Herbal

The leaves of various species of Hypericum are sprinkled with pellucid dots and black glands which contain an essential oil.

These, which are most conspicuous in Hyper., have evidently given the signature which has led to the chief use of the plant in medicine.

PAGE 821

Namely, Hyper. is a remedy for wounds or punctures of the tissues. The leaves, moreover, are lance-shaped. The leaves of Hyper. androseum, commonly called Tutsan (toute saine), were applied to fresh wounds from olden time. The word Hypericum means "sub-heather" indicating its manifest relation to the heaths, which at once leads us to think of Ledum.

The proving of Hyper. by Mÿller and others is very complete and brings out the relation of the drug to wounds and their consequences and also its applicability in maladies of other kinds. Tearing, rheumatic, shaking pains and paralytic weakness. Crawling sensations in hands and feet, felt fuzzy, sticking in them as from needles.

Homeopathic

Hypericum is an excellent remedy for the depression. It is called for in nervous depression following wounds, effects of shock and fright . Nerves are severely sensitive. Injury to Nerves, especially fingers toes, nails. Lacerations, with the intolerable, violent, shooting and sharp pains. Shooting pains from injured part. Very painful sore parts, occiput, coccyx etc. Injury to the brain and spinal cord. Punctured or penetrating wounds, very sensitive to touch. Wounds are more tender than appearance would indicate.

Excessive painfulness is a guiding symptom to its use. Spasms after every injury. Neuralgia of the stump. Prevents tetanus. Relieves pain after operations. Pain in old scars. Crushed fingers, especially tips. Prevents lockjaw. Puncture wounds. Relieves pain after operations. Bites of animals and insects. Supersedes the use of morphine after operations. (Calen.)

Tailbone pains from injury. Spasmodic asthmatic attacks with changes of weather or before storms, better by copious expectoration. Injured nerves from bites of animals. Tetanus. Neuritis, tingling, burning and numbness.

Hypericum has an important action on the rectum and hemorrhoids. Constant drowsiness.

Convulsions after knocking the body against anything. Lies on back, jerking head backwards. Pains extend towards the trunk or down sides with crawling and numbness. Neuritis of head or chest in epigastrium inter-scapular spine, finger tips etc. Tingling, burning and numbness with neuritis. Shudderings. Joints feel bruised. Jerks in the limbs.

Clinical

After-pains. Asthma. Bites. Bone fractures. Brachial neuralgia. Breast disorders. Brain, concussion. Bruises. Bunions. Corns. Depression. Diarrhea. Gunshots. Headache. Hemorrhoids, bleeding. Hypersensitiveness. Impotence. Labor, effects. Lacerations. Meningitis. ^{MIND} disorders. Neuralgia. Panaritium. Paralysis. Punctures. Rabies. Rheumatism. Scars. Sciatica. Spasms. Spinal concussion. Spinal injury. Stiff-neck. Surgery, effects. Tail-bone pain. Tetanus. Ulceration. Whooping cough. Wounds.

Causations

Ill effects of fright, bites, shocks. Dental work. Gunshot. Injections. Punctures. Lacerations. Bruises. Wounds. Stab wounds. Surgery. Worse after forceps delivery, as a complication of injury.(all are qi stagnation /blood stasis)

Constitutions

Nervous constitutions.(heart related) **Planets:** Mars, Mercury.

Modalities

Better from lying on face,(to keep yang side up and not yin side patient wants to be pressed or warmed) bending back,(yang side) rubbing.(blood circulation improves) Better bending head backward.(yang helped) Worse from injury, concussion of spine or coccyx. Worse shock, exertion.(qi stagnation) Worse a jar or touch.(qi stagnation) Worse change of weather,(protective qi or yang disturbed or qi stagnation or wind) fogs,(damp wind) cold damp,(damp cold) motion(qi deficient or heat). Worse in close room. (suffocation or qi stagnant—closed room)

Symptoms

MIND

Depression and Melancholy.(heart and lung qi depressed) Great nervous depression after shock.(heart qi depressed) Removes the mental and physical effects of injury, fright and shock.(qi stagnation) Head injury, (Nat-s.). Makes mistakes in writing,(heart qi stagnant so mind not proper) forgets what she wanted to say.(heart qi/blood stagnation or deficiency,this is immediate recollection failure so heart) Weakness of memory.(heart kidney communication problem or shen not receiving data as it is floating) Feels lifted

high in air (extreme nerve qi disturbance gives shock to heart so shen floats then grounding) or anxiety lest he fall from a height. (shen doesn't want to be grounded again) Mental excitement as after drinking tea. (heart nerve energy excited or heart qi excited) Irritable and depressed. (heart qi stagnation so irritable)

Abdomen

Bubbling at navel. Tympanitic distention, (qi stagnation) better after stool. (qi and blood stagnation due to stool so gaseous) Sticking in the stomach in right hypochondrium. (phlegm in yin side of stomach) Tympanitic distention of abdomen, relieved by a stool. Effects of surgery, (shock to heart qi/blood) laparotomy.

PAGE 822

Back

Violent pains and inability to walk or stoop after a fall on the coccyx. (kidney qi stagnation and blood stagnation as injury may block qi/blood) Pain in nape of neck. (kidney qi deficiency) Cervical vertebrae very sensitive to the touch. (qi stagnation heart) Pressure over sacrum. (qi stagnation—qi stagnation, sacrum—kidney) Spinal concussion. Coccyx injury from fall with pain radiating up spine and down limbs. (spreading pain is heat and shooting pain is wind so radiating pain may be due to qi stagnation or wind) Jerking and twitching of muscles. (jerking—heat, twitch—qi stagnation spleen) Painfully sensitive spine. (sensitive—qi stagnation) After a fall, slightest motion of arms or neck extorts cries. (qi and blood stasis) Pain in hips, small of back and coccyx after labor. (injury due to excess labor that is kidney yang deficiency so vacuity cold pain) Aching pain and sensation of lameness in the small of the back. (cold aching that is kidney qi deficient and blood stasis so lameness may be) Stitches in the small of the back. (qi stitches) Lies on back jerking head backward. (yang-back and heat-jerk)

Breasts

Scirrhus of breast from injury. Painful scar (damp converts in phlegm which in turn change to heat which is scar or from injury) after mastectomy. Stitches from within outward, (liver qi stagnation so outward motion) through left breast (yang) and sternum, worse from motion. (qi stagnation)

Chest

Anxiety in chest in forenoon (chest qi stagnation in yang rising time) with short breath. (qi stagnation) Stitches in the chest, below the breasts. (qi stagnation) Pressure and burning in the chest. (pressure—qi stagnation and heat in the chest) Tightness (qi stagnation) in the chest. Worse in foggy weather. (dampness and cold) Pneumonia (cold stagnant blood congealation pneumonia) in persons who have hemorrhoids. (cold stagnant blood congealation) Stinging in left chest, (qi stagnation yang side) worse when moving. (qi stagnation)

Ears

Sticking through the right ear in evening. (yin side, phlegm in ear) Itching in right meatus. (phlegm heat itching) Sensitiveness of hearing during menses. (during menses—heat so heart heat or yang excited so sensitive hearing)

Eyes

Sticking through (right) eye. (yin side, phlegm in eye) Burning stinging in tarsi. (damp heat) Stye on left lower lid. (toxic wind heat so yang side—left and lower lid--stomach)

Face

Hot and bloated.(wind heat) Eczema of face,(damp heat) eruptions seem to be under the skin.(damp more heat less) Intense itching.(damp heat or wind) Tension,(qi/blood stagnation) tearing in cheek in left zygoma. Eruption around mouth(stomach heat) and on right ear.(damp heat so yin side) Yellowish green scabs with cracking and moisture.
(damp heat)

Female

After pains violent in sacrum and hips with severe headache after forceps delivery.(qi and blood stagnation) Menses too late,(blood stasis) headache.(due to liver blood stasis) sickening pain in abdomen, sensitive to noises.(heart qi stagnant) Tension in region of uterus,(kidney qi stagnation) as from a tight bandage.(qi stagnation) Leucorrhea.(due to poor surgery etc toxic damp and heat)

Food

Appetite increased morning and evening.(changeover time of yin/yang liver heat attacks spleen/stomach so appetite increased) Great thirst.(stomach heat) Craving for wine.(heat) Desire for pickles, warm drinks.(heat)

Head

Heaviness or formication in brain.(dampness/blood stasis in brain) Tearing stitches (qi stagnation due to phlegm or blood congestion)in the brain. Brain feels loose.(dampness) Head feels as if touched by icy cold hand. Head feels larger,(dampness/blood congestion) drawn to a point.Pulsation,(heart channel cold stagnation blood congealation) heat and burning in the vertex.(liver heat in the channel,vertex—liver) Falling of hair after injury.
(blood deficiency or blood stagnant) Great heaviness in the head. Sensation as if the head became elongated. Headache, extending into zygoma or cheek.(liver qi stagnation headache so extending to cheek ie kidney region,liver –kidney or yang –yin combination) Headache with sore eyes after a fall.(liver qi stagnation headache,sore eyes due to fall)) Hair moist,(kidney damp excess) rest of body burning hot.(heart or liver heat due to qi stagnation)

Heart

The heart feels as though it would fall down in the evening.(yang diminishes in evening so floating heart yang in yang time also falls down so afraid) Palpitations.(heart yang or blood involved) Pulse rapid and hard. **Local congestions** (blood stagnation)and capillary weakness with or without hemorrhages (spleen or heart qi/blood deficiency so weak)and nervous depression, following wounds.(heart qi depressed due to shock)

Kidneys

Nightly urging to urinate with vertigo.(damp cold vertigo so yin time urge to urinate) Desire to urinate with violent tearing in the genital organs.(violent tearing may be due to blood stasis) Swelling and hardness(blood stagnation) of female urethra with burning(heat) soreness(blood stagnation/heat) and sensitiveness.(qi stagnation/heat)

Limbs

Violent pain and inability to walk or stoop after a fall on coccyx, tailbone. Darting pain in shoulders.(shooting pain—wind) Pressure along ulnar side of arm.(pressure—qi stagnation) Cramp in calves.(cold stagnation so cramps,calves-spleen) Pain in toes and fingers, especially in tips.(tips—maximum nerves so qi/blood stagnation in heart or nerves) Crawling in hand and feet.(nerves qi stagnation) Sharp pain in upper and lower limbs.(blood stagnation—sharp pain (excess condition) in spleen channel) Neuritis with

tingling, burning pain,(heat) numbness (qi or blood deficiency in nerves or phlegm)and flossy skin. Joints feel bruised.(qi and blood stagnation) Hysterical joints. Limbs feel detached.(dampness or binding qi deficiency may be) Tetanus.(lock jaw may be due to liver qi stagnation due to tendons involved) (Phys., Kali-br.) Traumatic neuralgia and neuritis.(heart /nerve qi and blood deficiency or stagnation) Aching in sciatic nerve (left) after prolonged sitting.(heart/spleen qi or nerve qi deficient so vacuity cold aching,prolonged sitting consumes spleen qi)

Lungs

Frequent dry hacking cough,(lung yin deficiency) short,(qi stagnation) barking cough. Asthma,(due to wind cold) worse in the foggy(wind cold) weather and better profuse expectoration.(stagnant cold released) Hoarseness,(damp cold may be)Scraping(damp cold or blood stagnation) and roughness(wind cold may be) in larynx, upper part of pharynx and sinuses in foggy weather. Whooping cough,(wind cold and not wind heat) worse 6 to 10 p.m.(kidney,heart protector,triple burner times)

Mouth

Old ulcers or sores in mouth when very sensitive.(sensitive so heart qi stagnation or heat opens again old ulcers or sores in mouth) Toothache better lying on affected side quietly.(yin vacuity heat type toothache so affected side lying gravitates yin to affected place) Dryness of the lips and mouth.(stomach and spleen vacuity heat) Dry, burning heat in mouth.(stomach heat)

Mouth

Tongue coated white or dirty yellow, at base, tip clean.(large intestine and stomach food etc stagnation) Taste: insipid of blood.(heart and stomach large intestine connected) Thirst with feeling of heat in mouth.(stomach heat)

PAGE 823

Nose

Pain in bridge of nose on rising.(lung heat) Sore within nose, itching,(lung yin vacuity so soreness,itching due to wind) continually picking it. Dryness of nose (lung yin deficient)with sneezing(qi stagnation) of left nostril(yang side) with crusts(phlegm) in it. Smell very acute.(lung qi stagnated and heat)

Rectum

Hemorrhoids with pain,(blood and kidney qi stagnation) bleeding and tenderness,(qi stagnation) use tincture externally and internally. Urging, dry, dull, pressing pain.(qi stagnation—urge,pressing,dull but dry may be due to blood/fluid vacuity) Summer diarrhea with eruptions on the skin.(pathogenic lung heat diarrhea and eruptions) Loose, bilious, yellow stools evening or morning.(damp heat type stool when yin –yang changeover so pathogenic can attack,damp-loose) Diarrhea driving out of bed in morning.(yang rising liver heat diarrhea) Very unusual severe urging. Constipation,(Constipation from dryness and fire,damp heat brewing and binding,blood vacuity and intestinal dryness,stomach or intestine heat) violent tenesmus(Damp heat brewing and binding,external contraction of epidemic toxins,cold and dampness accumulating internally,qi stagnation,qi vacuity,blood vacuity and fluid damage) with discharge of a hard little ball(liver qi stagnation or heat) with nausea.(nausea—qi stagnation) Burning, biting and feeling of dryness in rectum.(kidney yin vacuity heat with qi and blood stagnation --biting)

Skin

Punctures,(qi and blood stagnation) stab wounds.(same) Bites.(qi and blood stagnation)
Stings.(blood and qi stagnation) Lacerated wounds with much prostration from loss of blood.(blood and qi vacuity) Falling of hair from injury.(blood stagnation or blood deficiency) Painful scars in tissues rich in nerves.(heat in the nerves so scar)
Hyperidrosis, sweating of scalp,(scalp is oily so damp,sweating may be due to heat or kidney vacuity heat but worse in yang rising so sweating due to heat) worse in morning after sleep. Eczema of hands and face intense itching,(damp heat heart/spleen channel) eruption seems to be under the skin.(dampness more heat less) Herpes zoster. Skin rough as if full of small knots.(knots—qi stagnation and/or dampness) Smarting eruption like nettle-rash, on the hands.

Sleep

Constant drowsiness.(sleepiness while awake-Spleen qi vacuity,yang vacuity,heart/spleen dual vacuity,kidney essence vacuity,dampness encumbering spleen yang..or otherwise blood or phlegm stagnation) Talks wildly in night after 4 a.m.(lung time so lung qi stagnation) while asleep, apprehensive, gasped for air.(lung qi stagnation or deficiency so gasping) Spasmodic jerks in arms or legs on going to sleep.(spleen qi and fluid stagnation with liver yin deficiency so when sleeping liver yang attacks spleen to produce jerks and spasms) twitching.(spleen qi stagnation) Dreams with alot of activity, traveling, vivid, (liver or heart yang excess or liver/heart fire) distressing.(heart qi suppressed) Laborious dreams.(heart qi stagnant)) Wakes 4 a.m.(lung time) with sense of levitation.(liver soul or yang floating immediately after awaking from sleep as soul come back to body)

Stomach

Belches while drinking water.(qi and fluid stagnation in stomach) Pressure at the stomach on eating but little.(food stagnation or phlegm in stomach) Nausea and inclination to vomit.(phlegm in stomach-vomit and qi stagnation-nausea) Thirst with feeling of heat in mouth.(heat in stomach) Feeling of lump in stomach.(phlegm in stomach) (Abies nig., Bry.)

Temperature

Shuddering over whole body with desire to urinate.(lung protective qi deficiency so shuddering or pathogenic cold attack with lung qi deficiency which make desire to urinate as lung qi not able to hold) Pulse hard, accelerated. Heat with delirium,(heart heat create delirium) wild, staring look.(wind heat) Hot head,(heat) throbbing (cold stagnation or blood congealation)of the carotids, bright-red, bloated face.(blood congealation)

Moist hair on the head. Burning heat of the skin,(lung heat) great oppression(oppression—qi stagnation) and anguish.

Throat

Sensation as of a worm moving in throat.(qi stagnation in throat) Hot risings in esophagus after a fright (liver/gallbladder qi stagnation or liver fire so hot rising) with anxious feeling.(anxious is also due to yin deficient hyperactive fire) Tongue, white at the back,(stool stagnation in large intestine) tip clean.(heart is ok) Craving for wine with feeling of heat in mouth.(stomach heat)

Vertigo

Confusion,(dampness in head) vertigo(blockage by phlegm dampness)and heaviness.(phlegm dampness)

Comments

One of the provers had on waking at 4 a.m. a feeling as though she were suspended and not lying in bed, at another time as though she were lying very heavy in bed. The former condition has led to cures in effects of accidents attended with the sensation "as if being lifted high into the air and great anxiety lest she should fall fro this height."

The characteristic of the Hyper. wounds is that they are very sensitive to touch (Led. punctures are not particularly sensitive). Great nervous depression following shock or wounds. The kinds of wounds for which Hyper. has been found of service are wounds of parts rich in nerves, brain, spine (spinal irritation from falls), coccyx, finger-ends. Wounds from stepping on nails or any punctured wounds.

W. J. Guernsey relates the following case: A nine year old boy, was bitten by a pet rat on the first finger of left hand. Nothing joint was observed at the time, but some time after, he became ill and when Dr. Guernsey was called his state was alarming. The boy could talk with great difficulty, teeth firmly locked, conscious, neck so stiff the head could scarcely be moved. There was more tenderness about the wound than the appearance would indicate.

Hence Hyper. was preferred to Led. It was given (8. p.m.) in the 500c, dissolved in water, at first every fifteen minutes, later every two hours. At 3 a.m. there was improvement, he fell asleep and the next morning was practically convalescent.

Ulceration and sloughing of wounds. Hard, dry, yellow crusts form on healing wound.

PAGE 824

Bunions and corns when the pain in excruciating. Not only is the pain sense exalted, there is exaltation of the senses of hearing and smell. Violent labor-pains and after-pains. Tympanitic distention of abdomen, cutting pains.

Gilchrist says Hyper. 3x, given at intervals of twenty minutes for twelve hours or longer, seems to control perfectly the pain following laparotomy. But it must not be thought that Hyper. has no sphere outside wounds and their effects.

Like Arnica it has many uses in the respiratory sphere. It has cured asthma worse in foggy weather, the attacks were better by copious expectoration. Whooping cough worse 6 to 10 p.m. Tightness of chest, stinging worse on moving. Summer diarrhea with eruption. Palpitation and local congestions with or without hemorrhage and nervous depression, following wounds.

Roehrig considers Hypericum externally and internally the nearest thing to a specific in bleeding hemorrhoids. He gives it to pneumonia patients who have hemorrhoids, it cures the pneumonia and prevents the arrest of the flux, always a dangerous symptom in these cases.

Usher confirms this, "pain, bleeding and tenderness" are his indications. "It seems to suit the plethoric with great soreness." He uses the 1x.

Hypothalamus

Pharmacy

Hypoth. Hypothalamus gland. The mother tincture is prepared from the hypothalamus of the ox. Historical dose: All potencies, 6c to 30c.

History

Hypothalamus glands are made up of pure hypothalamic hormones, (vasopressin and oxytocin, combined with a transporting protein).

These hormones are liberated in their active form, under such stimuli, as pain and modifications in the blood biochemistry.

As well as changes in the volume of the blood. The posterior hypophysis is therefore subject to a direct nervous control. There are no neurosecretory tissues going from the hypothalamus to the adenohypophysis. However, the blood irrigation of this gland is completely assured by the vessel gates which form in the median protuberance and which traverse the pituitary stem to flow into the sinusoid of the anterior hypophysis.

Neurons, notably those from the median protuberance, secrete substances which travel down from the neurons and accumulate at the end of the tissues. When the cells of the median protuberance are stimulated, these agents penetrate the vessel gates and the sinusoid and instigate the liberating of the anterior hypophyseal stimulants. The usage of hypothalamus in homeotherapy is clinical in nature. There is no Homeopathic proving.

Homeopathic

Physiological and nervous instability. Congested veins. Sensation of intense heat, as if sitting on a very hot furnace. Malfunctioning of the thyroid with a fall in the basal metabolism. Disorders of the appetite and of the water metabolism. Water retention with obesity.

Epileptiform convulsions, especially during puberty. Epileptic vertigo with almost complete loss of consciousness for a few minutes with extreme paleness of the face. Occipital headaches, accompanied by an intense feeling of sadness, aggravated in the evening.

Malfunctioning of the thyroid with a fall in the basal metabolism. Baldness during the menopause. Circulatory complaints with livid color of the lower limbs. Feeling that the heart has stopped and then started again, faster.

PAGE 825

Clinical

Amenorrhoea. Anorexia. Anxiety. Asthma. Baldness. Bedwetting. Constipation. Dysmenorrhoea. Dyspnea. Epilepsy. Flatulence. Hemorrhoids. Insomnia. Thyroid, disorders.

Constitutions

Tubercular constitutions. **Planets:** Moon.

Modalities

Aggravation from cold. Tendency to evening rise of temperature, occurring irregularly but may last for several months.

Symptoms

MIND

Depressive condition, linked to psychological or physical stress. Of a gentle nature likeable, extremely sensitive. Cries about trifles. Alternating smiles and tears. Easily discouraged. Becomes very sad, melancholic with sexual impulses which take him by surprise, either morbid dread of the opposite sex or on the contrary, irresistible attraction.

Mental fatigue with feeling that the brain is cluttered with ideas which are difficult to grasp because they are constantly changing. Lack of ability to make decisions, which can lead to loss of willpower. Anorexia. Morbid hunger-pangs, alternating with periods of anorexia. Anxiety, aggravated by darkness. Fear of falling asleep lest he should not wake again.

Abdomen

Flatulence with extremely noisy rumbling, located principally on the right side of the abdomen.

Female

Epileptiform complaints during puberty, especially in young girls. Menstrual cycle irregular, sometimes too short, sometimes too long. Menses copious, bleeding ameliorated by lying position. Amenorrhea after physical or psychological stress. Menstrual blood very dark, congeals easily. Blood clots. White discharge aggravated during ovulation.

Food

Cannot bear either raw or sweet foods. Appetite disorders, mental anorexia.

Head

Occipital headaches, accompanied by an intense feeling of sadness, aggravated in the evening.

Heart

Circulatory complaints with livid color of the lower limbs and acrocyanosis of the limbs. Feeling that the heart has stopped and then started again, faster.

Kidneys

Complaints of the water metabolism with water retention and obesity. Urinary incontinence when lying down, walking or coughing. Bedwetting in the young. Burning during and after urination. Tenesmus of the bladder.

Limbs

Inflammation of the skin beneath the nails.

Lungs

Bronchial asthma. Heavy cough, causing shooting pains in the clavicles, sternum and occiput. Cough aggravated when lying down, ameliorated by standing up. Asthma occurring after end of menses. Dyspnea with oppression and shooting pains in the left arm, not aggravated by exertion.

Male

Sexual deviations. Drawing sensation, pains going from the knee towards the testicle, especially on the right side. Inflammation of epididymis, evolving into a chronic state.

Mouth

Tongue covered with a whitish coating. Tendency to lose sense of taste.

Nose

Thick, irritating, yellowish coryza, ameliorated by heat, aggravated by the cold.

Rectum

Stubborn constipation: stool black, very difficult to expel in small, caked balls.
Hemorrhoids, bleeding easily.

Skin

Papular and pustular skin diseases. Attacks of acne during puberty: large pimples, purplish in color with itching, aggravated by scratching. Small varicose veins, very noticeable, violet in color. Baldness in women with thinning of the hair at the hairline. Nails break and have white spots.

Sleep

Insomnia or sudden, irresistible need to sleep, usually lasting only a short while, but occurring several times in one day.

Stomach

Gastric pains two hours after eating.

Temperature

Tendency to evening rise of temperature, occurring irregularly but may last for several months. Temperature fluctuations.

Vertigo

Epileptic vertigo with almost complete loss of consciousness for a few minutes with extreme paleness of the face.

PAGE 826

Compare

(1) The closest remedy is Puls., but unlike Puls., Hypothalamus is aggravated by the cold, ameliorated by the heat.

(2) Also note Bac. and Tuberculinum.

Iberis amara

(bitter candytuft)

Pharmacy

Iber. Iberis amara. Bitter candytuft. Lepidium Iberis. N. O. Crucifer. Tincture of seeds. Historical dose: Tincture and all potencies, tincture and potencies 5x to 30c.

Herbal

The genus was named by Dioscorides from Iberia, Spain, its supposed original habitat. Ancient authorities had mentioned Iberis amara as useful in the treatment of hypertrophy of the heart. This led Hale to have the remedy proved.

Hale considers that Iberis amara's primary depressing action is a transient one, the secondary, exciting action is more persistent. The heart symptoms of the remedy are very pronounced and well marked. They consist of dull or stitching pains. Palpitations and breathlessness on slightest exertion. Pains down the left arm and numbness with an intermittent pulse.

Proctor has related his own experience with this remedy. After an attack of influenza of moderate intensity in 1890, he suffered from cardiac weakness for over two years. Every waking moment was attended with cardiac distress.

On the least agitation the weakness developed into irregular palpitation with great anxiety. Worse from tobacco, which had to be discarded, worse from wine, except port.

After all the usual remedies had been taken in vain, he took Iber., one drop in a powder on the tongue, two or three times a day.

After about ten days the heart suddenly fell almost into its perfect, regular, unconscious beat and retired at once and finally from further observation. Proctor has repeatedly given Iber. since then in similar cases with the same success. **Planets:** Sun.

Homeopathic

Iberis amara has a marked action on the heart and is useful in heart diseases. Heart enlarged with thickening of the Heart walls.

Weakness of heart after influenza, (Crat.) Sylvester had observed that Iber. controlled the violence and sharp action of the heart and softened the pulse. Hence its great service in hypertrophy of the heart. Hale's provers have confirmed this observation, the pulse being softened even during palpitations.

Iber. has marked action upon the heart. Possesses great efficacy in cardiac diseases. Controls vascular excitement in hypertrophy with thickening of the heart's walls. Heart debility after influenza. State of nervous excitement. Conscious of Heart's action may possibly prove a keynote for its use. Infarction of the myocardium. Paroxysmal tachycardia.

Iber. has these symptoms on going up the stairs: dyspnea and palpitations, (Calc.) Feeling of lameness and soreness through whole body, as from a cold. Desire for stimulants. Palpitations with vertigo and choking in the throat, worse slightest exertion, laughing, coughing. Darting pains through heart. Numbness and tingling in left hand and arm. Liver region full and painful. White stools.

Clinical

Angina pectoris. Asthma. Bradycardia. Bronchitis. Debility. Dropsy. Dyspnea. Fatigue. Heart, weakness. Heart, disorders. Liver, pain. Palpitations. Rheumatic myocarditis. Vertigo.

Modalities

Better by eating. Better from cold. Better from expelling gas. Better from belching. Worse on turning in bed. Worse lying down, on left side. Worse motion, slightest exertion. Worse from heat, warm room. Worse at night and in the morning on rising. Worse by sitting still.

Symptoms

MIND

Aware of heart's action. Nervous agitation. Bad-tempered. Sad, down-hearted, oppressed with desire to sigh. Very irritable with dullness of mind and lack of memory. Nervous and irritable on rising in morning. Feels as if frightened, an indefinable dread with trembling. An excited, frightened feeling with cold sweat on face. Fearful and trembling.

Diminution in intellectual capacity with poor powers of concentration. Trouble in remembering what he has just learn. Remembers, on the other hand, old events from the past.

PAGE 828

Abdomen

Fullness and distention of bowels. Intestinal process accelerated with painful cramps, eased by the elimination of gas. Heaviness and pain in the hepatic region. Fullness with oppression in right hypochondriac region.

Back

Sensation of fullness in neck and head.

Chest

Slight pain under sternum, at articulation of third rib. Fullness and constriction under sternum with sharp pain through chest. Continued feeling of weight and anxiety in chest. Fullness in chest with fullness and heat in head and neck and flushed face.

Ears

Dullness of the hearing and comprehension. Dull hearing and labored breathing. Roaring in ears with heaviness of head, slight nausea and palpitation of heart.

Eyes

Red eyes with flushed face. **Feeling in eyes as if being forced outward.** Flashes before eyes with dull headache and palpitation of heart.

Face

Flushed hot face and red eyes with palpitations.

Food

Loss of appetite with feeling of indigestion. Desire for stimulants. Ameliorated by eating.

Head

Sensation of heaviness and fullness in the head with buzzing in the ears. Congestion and headache, ameliorated by fresh air.

Heart

Conscious of heart's action. On turning on left side, stitching pain as of needles through ventricles felt at each systole. Palpitations with vertigo and choking in throat. Stitching pains in cardiac region. PULSE full, irregular intermittent. Worse least motion and in warm room. Sensation of weight and pressure with occasional sharp, stinging pains. **Dropsy with enlarged heart.** Violent palpitations induced by slightest exertion or by laughing or coughing. Dilation of heart. Wakes with palpitation about 2 a.m. Tachycardia. Darting pains through heart.

Kidneys

Frequent but scanty urination. Excessive evacuation of urine. Frequent presence of bile pigment in the urine.

Limbs

Cold feet and hands. Numbness and tingling in left hand and arm. Whole body sore, lame and trembling.

Lungs

Dyspnea and palpitations on going upstairs. **Heart** dyspnea, shortness of breath. Constant desire to draw breath without relief, (Carb-v.) Respiration more frequent and labored. Cough causes redness of face. Pulmonary rattle with viscous, stringy sputum. Constant hawking of thick, stringy mucus until after a meal.

Mouth

Dryness of the mouth with bitter or peppery taste.

Rectum

Pain in region of liver with clay-colored stool. White stools. Tenderness of bowels with thin, whitish stool.

Sleep

Sleep disturbed with aggravating dreams. Restless turning in bed with ludicrous dreams. Restless nights with horrid dreams.

Stomach

Heavy and full sensation in the gastric region. After eating, sour belching, hawking of stringy mucus better. Nausea with cold, chilly feelings over body. **Heart**burn, nausea with belching, which eases the condition.

Stool

Stools are clay-colored, thin, whitish, large, white.

Temperature

Heat and fullness in neck and head with flushed face and cold feet and hands. Feverish chilliness. Cold, chilly feeling with nausea. Quickly passing febrile symptoms.

Throat

Dryness in the throat and larynx with feeling of constriction. Tickling in throat. Throat and trachea fills up with mucus. Throat as if filled with dust. As if both tonsils were enlarged. Constant hawking up of thick, viscid, stringy mucus better after a meal.

Choking sensation in throat with fullness and heat, just above cricoid cartilage.

Constrictive sensation in throat with stabbing pains in heart, dyspnea and palpitations.

PAGE 829

Vertigo

Vertigo and pains around heart. Vertigo, as if occiput were turning around, eyes feel forced outwards. Vertigo on standing, ameliorated by lying down.

Comments

The concomitant symptoms are well marked. Fullness and heat in head and neck, vertigo, nausea. The excessive nervousness and frightened condition so frequently found associated with heart disorders was pronounced in the provings. Cold hands and feet. Choking sensation in the throat was also marked. The stool were white as those of Dig.

A common symptom was: "On turning on left side a sharp sticking pain is felt as if a needle were crosswise in the ventricles and pricked at each contraction." Sharp stinging pains, through the chest. Iberis is one of the many remedies introduced into homeopathy by Hale.

Compare

(1) Amyl., Lepidium, Spig., Dig., Cact., Bell., Amyg., Crat., Phaseolus.

(2) Spig. - Palpitations, violent contraction of the heart with oppression and anxiety.

(3) Cact. - Sensation of constriction in the heart like a vice. Constriction of the head and chest.

(4) Aur. - Palpitations with hot flushes, forcing the patient to remain seated with the body bent forwards.

Boericke. Clarke. Julian.

Ichthyolum

Pharmacy

Ichth. Ammonium Ichthyol Sulphonate. Ichthyolum. Solution. The most important of the salts are the ichthyosulphonic acids, prepared from a bituminous mineral of Tyrol, which is rich in fossilized remains of fish. A clear, reddish-brown viscid liquid. Historical dose: Tincture and all potencies, lower potencies.

History

Ichthyolum is an unproved remedy which has been used in old-school therapeutics as an external application and internally in skin affections, rheumatism, scrofula, nephritis and gonorrhoea.

Ichth. is a powerful anti-septic. As an external application to rheumatic joints it has achieved marked results. A solution of equal parts of Ichthyol and water is warmed and applied to the affected joint on calico and covered with heated cloths, outside of which is an impervious fabric to prevent evaporation.

Pure Ichthyol or an ointment of Lanoline and Ichthyol may be used instead. With Lanoline making up 20 to 50 per cent of the ointment. Externally, it is used as an ointment, for chronic eczema and psoriasis, also acne rosacea and gouty joints.

Chilblains, scabies. Rectal suppositories for senile prostate. **Planets:** Saturn.

Homeopathic

Ichthyolum's action on skin, mucous membranes and kidneys is prompt and useful. It is strongly anti-parasitic, redness, pain and inflammation, decreases tension. Excellent in winter coughs of old people.

Polyarthrititis. Chronic rheumatism. Uric acid diathesis. Hay fever. Chronic hives. Alcoholism, when nothing will stay on stomach. Gouty joints have also been benefited. Tuberculosis, aids nutrition. Scarpa claims to have used it with excellent effect in a large number of cases of tuberculosis.

Clinical

Acne. Arthritis. Gonorrhoea. Hay fever. Neuralgia. Pruritus vulvae. Rheumatism. Skin disorders. Tuberculosis.

Symptoms

MIND

Irritable and depressed. Forgetful, lack of concentration.

Abdomen

Griping in umbilical and left hypogastric region.

Eyes

Burn, red, worse any change of temperature.

Face

Skin feels dry and itches. Acne on chin.

Female

Fullness in lower abdomen. Nausea at time of menses.

Food

Increased appetite.

Head

Dull, aching, better cold, pressure. Dull frontal and supra-orbital headache, worse moving eyes, cold air, better warmth.

PAGE 830

Kidneys

Increased in quantity and frequency. Burning pain in meatus. Uric acid deposits.

Limbs

Lameness in right shoulder and right lower extremity.

Lungs

Coryza, dry, teasing cough. Bronchitis, especially of the aged. Bronchiectasis and tuberculosis.

Mouth

Disagreeable taste, burning sensation, very thirsty.

Nose

Bland coryza, stuffed feeling, feels sore inside. Irresistible desire to sneeze.

Rectum

Disposition to soft, shapeless stools. Early morning diarrhea.

Skin

Heat and irritation, Itching. Scaly and itching eczema. Crops of boils. Itching of pregnancy. Psoriasis. Acne rosacea, erysipelas.

Stomach

Nausea.

Throat

Irritated, pain to ears, sore, dry with hawking and expectoration.

Comments

Anshutz writes: The principal action of Ichthyol in the following proving seems to have been on the mucous membranes of the nose and throat, on muscle tissue, producing rheumatic pain, on the skin and on the urine.

The blood count was not conclusive, only two cases being tested and in one a diminution of red blood corpuscles before after taking the drug) was noted. No marked change in the number or character of the leucocytes and lymphocytes was noted.

Most of the provers had increased appetite and after taking the drug for some time a marked feeling of well-being. Stool became free in some cases diarrhea and offensive.

A languid, tired feeling with mental torpidity while actively taking the drug was usually followed by a feeling of improved, vigorous health when the drug was left off to be again repeated upon renewed administration of the remedy.

The skin showed many interesting changes worthy of further proving, pruritus, acne and urticaria being produced. Rheumatic pains in different parts of the body were also noted.

The urine showed valuable changes: Increased urination was noted in all cases with a change in color from the usual straw to a dark straw or reddish tint. The solids were increased, as were the sulphates.

In many cases uric acid was deposited in the form of brick-dust or red sand, which microscopically proved to be the lozenge, plate and gravel form of uric acid crystals.

Calcium oxalate crystals were also found in a few cases and in several instances the passage of the crystals produced a mild inflammation of the pelvis of the kidney (mild catarrhal pyelitis) which in the writer's case disappeared after six months, when the urine had again become normal.

Therapeutically it would seem that in Ichthyol we have a potent remedy for the uric acid diathesis with its various manifestations and symptoms. Lithemia, as indicated by the urinary proving, should prove amenable to the drug if given in potency.

Hay fever symptoms were also prominent in the proving of the drug and its application in this intractable affection is awaited with interest, local applications of Ichthyol having been used by a number of physicians in cases of hay fever with quite satisfactory results for some time.

The lachrymation, coryza and the dry, teasing cough of measles seems also well pictured in some of the symptoms produced by this drug. Whooping cough tonsillitis and tiresome intractable cough of the aged suffering from bronchial disorders would also appear to offer a chance for trial with this remedy.

It was prescribed in several cases of gonorrhoea with frequent urination and burning in the anterior urethra with some success. Some have seen the remedy act beneficially in dry, hacking coughs such as were developed by the provers.

The 3x, 6x and 8x potency, especially the latter, were employed.

Ictodes foetida

(skunk cabbage)

Pharmacy

Ictod. Ictodes fetidus. Pothos fetidus. Skunk cabbage. Skunk-weed. N. O. Orontiaceae, Calliaceae orontoide, allied to Araceae. Tincture of whole fresh plant including root. The root loses its pungent taste and appears to be nearly inert in a few weeks after it is gathered. Historical dose: Tincture and all potencies.

Herbal

The smell from spathe and flowers is pungent and very subtle. The seeds are said to afford more relief in asthmatic cases than the root, for they are remarkably active, pungent and exhale the odor of Asafetida.

An acrid principle resides in the root, even when perfectly dry, producing an effect like that of the Arum and the Ranunculi. When chewed in the mouth, the root is slow in manifesting its peculiar taste, but after some moments a pricking sensation is felt, which soon amounts to a disagreeable smarting and continues for some time.

This acrimony is readily dissipated by heat. The decoction retains none of it. The distilled water is impregnated with it, if the process be carefully conducted, but loses it on standing a short time. To insure a tolerably uniform activity of this medicine, the root should be kept in dried slices and not reduced to powder until it is wanted for use.

The bruised leaves are frequently applied to ulcers and recent wounds and, it is said with good effect. They are also used as an external application in cutaneous disorders and the expressed juice being successfully applied to different species of herpes. The leaves are also used in the country to dress blisters with the view of promoting their discharge.

The Treasury of Botany thus epitomizes the traditional uses of this plant in medicine: "The roots in cases of asthma, the leaves as an application to ulcers. The seeds are also considered to be anti-spasmodic and useful in coughs."

Hering and others proved it and largely confirmed its popular reputation, as also its clinical relationship to the Arum family. It is frequently used in childbed to promote the birth. For expelling worms, the pulverized root should be administered in molasses for a sufficient length of time, following it up with a purgative. **Planets:** Mercury.

Homeopathic

Ictodes fetidus has burning sensations from fauces down throat, enlarged glands of throat, swelling of nose and sneezing, spasmodic cough and skin disorders are common to *Ictod.* and the Arums. A remedy for asthmatic complaints worse by inhalation of dust and relieved by stools.

Absence of mind. Headache in small spots with throbbing in temporal arteries. Red swelling across the nose. Pain in throat while sneezing. Tongue numb. Abdomen distended. Inclined to smoke, but it does not taste good. Hysterics. Epilepsy. Erratic and spasmodic pains.

Ictodes fetidus is a powerful anti-spasmodic, expectorant, vermifuge, menagogue, sudorific, etc. It is used with success in spasmodic asthma and coughs, hysterics, pertussis, epilepsy, dropsy, scurvy, chronic rheumatism, erratic and spasmodic pains, childbirth, worms, etc.

Clinical

Asthma. Catarrh. Cough. Dropsy. Herpes. Hysteria. Rheumatism.

Modalities

All complaints better in open air. Motion aggravates.

Symptoms

PAGE 832

MIND

Cross, impetuous inclined to contradict. Absence of mind. Inattention, enters sick-room without knocking, does not listen to patient.

Abdomen

Expansion and tension in abdomen. Pain in abdomen here and there in single spots. When walking, sensation as if the entrails were hanging loose and flabby without any pain.

Chest

Pain in chest and in axilla, seems to have a connection with burning in esophagus. Pressing pain in sternum.

Face

Swollen submaxillary glands.

Female

Amenorrhoea.

Food

Inclined to smoke, but it does not taste good.

Head

Drawing in forehead in two lines from protuberances to glabella, where it draws outward as from a magnet.

Kidneys

Great urging, urine darker.

Limbs

Aching along right tibia.

Lungs

Spasmodic asthma. Sudden anxiety with dyspnea and sweat, followed by stool and relief of that and other complaints. Inclined to take a deep breath. Hollowness of chest with constriction in fauces and chest. Asthma, worse or caused by dust. Heaves in horses from dusty hay. Spasmodic cough. Senile catarrh.

Male

Titillation, voluptuous but painful, around corona glandis.

Mouth

Scurvy. Numbness of tongue, cannot touch teeth with it. Papilla elevated. Tongue red and sore on tip and edges.

Nose

The nose is swollen as far as the nasal bones extend, red like a saddle, sore to touch, worse left side. Cartilage cold and bloodless with red spots on cheeks and small pimples on left side of face. Violent sneezing with pains in palate, fauces and esophagus to stomach, hurting for a while after in cardiac end of stomach.

Skin

Herpes and skin affections.

Stomach

Nausea and vomiting. With every firm step, pain in pit of stomach as from something breaking loose.

Throat

Burning from fauces downwards through chest. Esophagus is painful on sneezing.

Vertigo

Vertigo and dimness of sight. Headache in single places, lasting a short while, then changing place, dullness, pressing in temples, now more in one, then more in the other with violent pulsation of arteries.

Comments

Anshutz reports: a young woman, about eighteen years of age, was harassed by severe convulsive and hysteric paroxysms, almost incessantly in so much that her friends estimated the number at seven hundred in the course of a few weeks, her abdomen was remarkably tumefied and tense and there was a bloatedness of the whole surface of her body and the slightest touch would occasion intolerable pain.

At length her limbs became rigid and immovable and her jaw was so completely locked that she was unable to articulate and liquids could only be introduced through the vacuity of a lost tooth.

She had been treated with a variety of antispasmodic and other medicines, by an experienced physician without relief. Having prepared a strong infusion of the dried root of skunk cabbage, Anshutz directed half a tea cupful to be given every few hours without any other medicine.

The favorable effects of which were soon observable and by persisting in the use of it about ten days the muscular contractions were removed, the jaw was relaxed and her faculty of speech and swallowing with the use of all her limbs, were completely effected.

Another young woman had the most distressing attacks of hysteria for several days without obtaining relief by the medicines prescribed.

When the skunk cabbage infusion as so successfully directed that her fits were immediately arrested and in a few days a cure was completely effected.

The brother of this patient was seized with violent convulsions of the whole body in consequence of a cut on his foot, the skunk cabbage was administered and he was speedily restored to perfect health.

PAGE 833

A woman was affected with violent spasmodic pains, twenty four hours after childbirth, six doses of skunk cabbage entirely removed her complaints.

A number of cases catarrhal disorders of the old people in which a syrup prepared from the root in substance has alleviated and removed the complaint.

In delicate stomachs it occasion vomiting even in a small quantity. In several cases of gastrodynia, where it was given with a view to its antispasmodic effect, it was ejected from the stomach more speedily than common cathartic medicines. In a dose of thirty grains to bring on not only vomiting, but headache, vertigo and temporary blindness. The root is a pungent antispasmodic in colics and griping of the bowels.

Leaves bruised relieve painful swellings, whitlows, etc. In chronic cough attended with a cold phlegmatic habit of body, the powdered root of this plant was employed with the most decided benefit. In an old man who has been for many years afflicted with a very troublesome cough and difficulty of breathing,

In cases of chronic catarrhal and asthmatic disorders. Skunk cabbage is not only a good antispasmodic in all cases where such are indicated, but it is also a powerful emmenagogue, antihelmintic and a valuable remedy in dropsy in spasms, rheumatism, palpitations, etc.

SOURCES

Anshutz.

Ignatia amara

(st. ignatius bean)

Pharmacy

Ign. Ignatia amara. St. Ignatia's bean. Strychnos ignatia. N. O. Loganiaceae. Philippine Islands. Tincture and trituration of the seeds. Historical dose: All potencies, 30c or 200c potency for acute shock, grief.

History

The seeds of Ign. contain a larger proportion of strychnia than those of Nux vomica.

The great differences in the characteristic features of the two medicines prove the wisdom of considering medicines apart from their so-called "active" principles.

The seeds of Ignatia contain a larger proportion of strychnine than those of Nux vomica, yet there is a great difference between the characteristic features of the two drugs. Ign. has been called the "feminine" of the "masculine" Nux-v. The consequences of worry or a worrying state of mind, no less than grief, call for Ign. an introverted state of mind.

Guernsey thus depicts the Ign. state of mind: "Any one suffering from suppressed or deep grief with long-drawn sighs, much sobbing, etc., also much unhappiness, cannot sleep, entirely absorbed in grief, for recent grief at the loss of a friend, disorders of the mind in general, particularly if actuated by grief, sadness, hopelessness, hysterical variability, fantastic illusions."

Fixed ideas may be added and desire to be alone. Ign. covers many of the effects of grief, especially if recent. Clarke once gave instant relief with Ign. 30c in the case of a lady who had just heard of her brother's death (not unexpected) and who complained of an intense pain in the head just over the root of the nose.

Homeopathic

Ignatia is adapted to the persons of nervous temperament especially women of sensitive, easily excited nature, mild disposition, quick to perceive and rapid in execution. The superficial and erratic character of its symptoms are most characteristic.

PAGE 834

Ignatia has a marked hypersensitivity of all the senses and a tendency to clonic spasms. Hence, it is one of the chief remedies for emotional shock, conflict, disappointment, fright and grief.

Effects of grief and worry. Rapid change of mental and physical condition, opposite to each other. An emotional state of grief or frustration. Great contradictions. Alert, nervous, apprehensive, rigid, trembling patients who suffer acutely in mind or body, at the same time made worse by drinking coffee. Cannot bear tobacco.

It affects the mind and the emotional element is profoundly influenced and co-ordination is interfered with. It causes erratic, contradictory, paradoxical mental and physical effects, which change rapidly and are opposite to each other.

The nervous system is affected causing spasmodic effects often violent with rigidity, twitching and tremors. Pain is small, circumscribed spots. (Ox-ac.)

Hiccoughs and hysterical vomiting. Sensation of lump, foreign body or sharp pressure. Jerks run through the whole body. Tendency to start. Globus. Clavus. Hysteria. Chorea after fright from grief worse after eating, better lying on back.

Convulsions of children during dentition after punishment after fear or fright, return at the same hour daily. Spasms with cries or involuntary laughter. Spasms alternating with oppressed breathing. Pain in spot worse close attention. Oversensitive to pain. Pains change their locality, come gradually, abate suddenly or come and go suddenly.

Symptoms pass after profuse urination. Plague, preventive and curative. Nervous shuddering with pain. Paralysis after great mental emotions and night watching in sick chamber. Catalepsy with opisthotonos. (Nat-m. should follow in chronic conditions).

Clinical

Amenorrhoea. Anger, effects. Anguish. Anorexia. Anus disorders. Anxiety. Appetite, disordered. Back, weakness. Catalepsy. Chorea. Clavus. Convulsions. Croup. Debility. Dentition. Depression. Diphtheria. Disappointment. Dysmenorrhoea. Epilepsy. Esophagus disorders. Fainting. Flatulence, obstructed. Fright, effects. Glands, enlarged. Grief, Headaches. Heart disorders. Hemorrhoids. Hiccoughs. Hysteria. Hysterical-joint. Intermittent fever. Locomotor ataxia. Melancholia. Menopause. Numbness. Ophthalmia. Paralysis. Plague. Rectum, pain. Rectum, prolapsed. Rheumatic fever. Sciatica. Sensitiveness. Sinking. Sleep, disordered. Spinal irritation. Tenesmus. Throat, sore. Tobacco, allergy. Toothache. Tremors. Urine, abnormal. Vagina, spasm. Voice, lost. Yawning.

Causations

Ill effects of disappointed love, (heart) grief, (heart+lung) fright (heart+gallbladder), worry, (spleen) jealousy, (kidney) old spinal injuries.

Constitutions

It is adapted to the sensitive, excitable, nervous temperament, (heart related) women of a sensitive, easily excited nature, (excess heart yang) dark hair and skin, but mild disposition, quick to perceive, (heart yang excess) rapid to execute. (heart gives order soon and nerve energy fast) Romantic, idealistic and overworked. Suitable to persons who had been starving either from want or other causes. **Planets**: Moon, Mercury.

Modalities

Better while eating, (heat increase while eating) change of position, (blood or qi stagnation) lying on affected part, (qi deficient) urination, if alone. (no outside that is heart disturbance) Better from pressure, (qi deficiency) deep breathing. (heaven qi being hold by kidney) Better from swallowing, eating, (yin deficient) near a warm stove, (cold pattern) sour things. (liver related yin wanted) Worse emotions, (liver and heart) chagrin, worry (spleen), fright (gallbladder and heart), shock, (lung and heart) grief after losing persons or objects that were very dear. (heart, lung) Worse air, open, (wants to be alone) cold, odors (lung qi gets disturbed) touch. (lung qi) Worse yawning, (kidney and probably lung related) stooping, (yin problem) walking, (qi stagnation) standing, (kidney deficiency) at the same hour and day. (liver related) Worse in the morning after meals, (qi stagnation due to food etc) coffee, (heart yang excited) smoking, (lung and heart heat) liquids, (phlegm stagnation or excess) external warmth. (heart yang hyper)

PAGE 835

Symptoms

MIND

Ailments from grief, (lung) fright (heart /gallbladder) or emotional shocks, (liver qi stagnant) disappointments. (heart) Unhappy love. (heart) Sighing (qi stagnation) and sobbing. (lung) Inward weeping, (suppressed grief or qi stagnation at yin level that is stored) enjoys being sad. (qi stagnation) Perfectionist. Highly emotional and moody. (liver qi stagnation so moody) Capricious. Changeable mood. Idealistic. Romantic. Oversensitive and nervous. (heart) Silently brooding. (grief went deeper and lodged into heart so heart qi stagnation, brooding is spleen) Constantly frustrated. (liver qi stagnation) Irritable. (liver yang hyper) Worse from consolation. Not communicative. (heart and lung qi depressed) Desire to be alone. (heart qi depressed) Angry with himself. (liver qi depressed) Internal conflicts with herself. (liver/gallbladder—gives direction and decision

so conflict means indecision so gallbladder deficiency) Intolerant of contradiction(liver qi stagnant or yang hyper) of reprimands.(liver yang hyper) Melancholic,(lung) sad(heart,lung) and tearful.(lung) Anguish, shrieks for help. Faints easily.(heart qi vacuity) Girls who faint when they go to church(heart qi vacuity) or who fall in love with married men.(heart qi depressed) (Nat-m.) Fear of robbers at night.(kidney yin deficiency) Thinks she has neglected her duty.

Abdomen

Rumbling in bowels.(water or damp accumulation with qi stagnation) Weak feeling in upper abdomen.(stomach qi deficient as stomach connected to heart) Throbbing in abdomen.(cold stagnant,blood congealation) (Aloe, Sang.) Colicky,(intestinal blockage due to blood stagnant or qi stagnant) gripping pains(qi stagnation may be) in one or both sides of abdomen. Flatulent colic,(qi stagnation) especially at night. As if the intestines were going to burst.(qi stagnation) The flatulence presses on the bladder.(qi stagnation) The pains in the abdomen are worse after taking coffee,(coffee disturb stagnant heart qi or excites it) brandy (liver qi irritated or liver heat)or things sweetened with sugar.(sugar increase heat in stomach) Periodical(liver-stomach related) cramp-like pains (cold stagnation)in the abdomen.

Back

Stiffness of the nape of the neck.(kidney yin vacuity) Convulsive bending backwards of the back.(yang side so kidney yang excess as backwards means yang) Aching pain in the glands of the neck.(cold stagnation—aching so pathogenic cold) Pain in the os sacrum in the morning,((yang rising time so excess yang pain) when lying on the back.(excess yang) Violent sacral pains.(excess kidney yang pain) The back is bent forward.(kidney yin deficient) Convulsive bending backwards of the spine.(kidney yang deficient) Weak back with sciatica.(kidney/spleen qi deficient or kidney/spleen qi deficient sciatica)

Breasts

Stitches in nipples on deep inspiration.(deep inspiration—kidney yang affected so kidney qi stagnant in nipples and not liver qi)

Chest

Constriction of the chest, feels as if too small.(cold stagnation) Aching of the chest.(cold stagnation) Shootings(wind) in the chest and in the sides, excited by flatulency.(abdomen qi stagnation excite wind in chest region)

Ears

One ear red and hot.(kidney yin vacuity) Hardness of hearing,(kidney yin vacuity) except for the human voice. Roaring,(liver fire –music—spleen and heart,liver wind itching) better by music better by Itching in the ears. Noise before the ear, as from a strong wind.(liver wind) Worry takes away hearing (spleen qi stagnation due to worry which affects ear through spleen channel may be)and intensifies the noises.(due to qi stagnation noises intensified) Loud talking worsens headaches.(loud talking—yang excess that is liver yang excess increase headache too)

Eyes

Inflammation of the eyes.(liver yang excess) Redness of the eyes.(liver heat) Asthenopia with spasms of lids (spleen qi stagnation)and neuralgic pain about eyes.(heart qi stagnation) (Nat-m.) Eyelids seem dry.(spleen yin vacuity) Pressure on the eyes.(pressure —qi stagnation liver) Lachrymation,(liver heat so lachrymation) especially in the brightness of the sun.(liver yang excess) Convulsive movements of the eyes, and of the

eyelids. **(liver wind)** **Fixed look with dilated pupils.** Flickering zigzags. **(liver fire or liver wind)** Flashes of light from violent coughing. **(liver yang excess or liver heat attacks lung so violent cough with flashes of light due to excess liver yang).** Photophobia. **(liver yin deficient so absorb of light qi is difficult)**

Face

Twitching of muscles of face and lips. **(spleen qi stagnant)** Masseters stiff and hard. Facial muscles distort on attempting to speak. **(lung qi stagnation or wind during speaking affects spleen qi stagnant so muscle distort)** Emotional trismus. Lock-jaw. **(liver qi stagnation)** Spasmodic clenching of the Jaws. **(liver qi stagnant)** Pain in the lower jaw, as if dislocated. **(lower jaw tendon dislocation means liver qi deficiency so not able to bind may be)** Redness and heat of one cheek, red and pale alternately. Face changes color when at rest. **(at rest heart blood supply pattern changes)** Perspiration on the face alone. **(heart heat)** Eruption on the face. **(heart heat)** Lips dry, cracked, and bleeding. **(spleen/stomach yin deficient and due to vacuity heat bleeding)** Scabs on the commissure of the lips, and on the lips. **(wind heat scabs and not damp heat scabs)** Pains in the submaxillary glands. Swelling of the parotids, with shooting pain. **(wind heat as liver yang hyper generates wind heat)**

Female

Menses, irregular, **(qi stagnation)** black. **(blood stagnation)** Menses too early. **(blood stagnation with kidney yin vacuity)** too profuse **(kidney qi deficiency)** or scanty. **(kidney yin vacuity heat)** Amenorrhea. **(Liver and Kidney Insufficiency, Deficiency of Qi and Blood, Blood Depletion due to Yin Deficiency, Qi Stagnation and Blood Stasis, Accumulation of Phlegm-Dampness, Blood Stasis due to Cold in Blood)** **Suppressed menses from grief.** **(lung qi stagnation suppress the menses that is depuration)** During the menses **(heat)** great fatigue **(spleen qi deficient)** with spasmodic pains in stomach and abdomen. **(stomach and abdomen qi stagnation or liver wind attacking)** Metrorrhagia. Cramp-like **(cold stagnation)** and compressive pains **(cold stagnation)** in the region of the uterus. **(kidney qi deficiency)** Menstrual cramps. **(kidney vacuity cold)** **Uterine spasms like labor pains.** **(liver wind in uterine channel due to yin vacuity as yin vacuity generates wind)** Corrosive **(toxic damp heat or blood stagnation)** and purulent leucorrhea, **(damp heat)** preceded by contractive pressure in the uterus. **(preceded by cold stagnation)** Chronic leucorrhea **(damp heat, damp--chronic)** **with sexual desire.** **(liver yang excess or damp heat in kidney area)**—so chronic may be) Sexual frigidity. **(kidney qi deficiency)**

Food

Averse to ordinary diet, longs for great variety of indigestible articles. **(indigestible articles pull out qi from inner being as in this medicine qi goes into inner being)** Craving for acid things. **(needs heat inside)** Craves raw or indigestible things, sour things. **(needs heat)** bread especially rye bread. Appetite for various things, but when offered appetite fails. **(gallbladder indecision or direction may be affected)** Aversion to warm food, meat, alcohol. **(heat or warm affects liver heat or stomach heat)** Aversion to tobacco. Repugnance to tobacco-smoke. **(wind heat which affects liver yang rising that is liver wind heat)** Dislike to wine and brandy. Food has no taste. **(taste nerve to heart blocked or stomach yin vacuity)** Milk taken in the morning leaves an after-taste for a long time. **(damp heat in yang time as liver yang attacks stomach to give it heat so dampness stores the taste)**

Head

Congestive headaches following anger or grief. (liver or lung qi stagnation which leads to blood congestion Headache), worse smoking or smelling tobacco. (wind heat) Inclines head forward. (blood congestion so yin type that is forward head) Headache as if a nail were driven out through the side. (blood stasis in the head) Headache, worse or better by stooping. (yin type headache) Throws the head backwards from weight at occiput (blood congestion but at yang side ---not understood) or during spasms. (wind heat spasm so heat is yang) Headache from abuse of snuff (qi stagnation in head due to snuff) tobacco smoke, coffee from close attention. Cramp-like pain over root of nose. (cold stagnation pain)

Heart

Palpitations during menses. (heat in heart channel) Anxious feeling in the region. (heart, lung, spleen involved) Palpitation of the heart at night (heart yin deficient) with shootings in the heart. (wind heat in heart) Throbbing (either cold stagnation or qi stagnation) in the chest. Sticking (phlegm) in precordial region on expiration. Cardiac hyperesthesia. Anxious feeling in precordia.

PAGE 836

Kidneys

Frequent, profuse, watery urine. (kidney qi deficiency) (Ph-ac.) Urging to urinate with inability to pass urine. (urge to urinate means heart giving instruction to release but bladder qi/lung weakness so unable to pass) Frequent and copious emission of water urine. Urine lemon color. Involuntary emission of urine. (heart qi not able to control the discharge) Continual want to urinate after taking coffee. (heart qi irritation by coffee make desire or urge for urination constantly) Sensation of burning and smarting in the urethra during urination. (smarting —may be wind so wind heat in liver channel going through urethra and during urine—heat may be) Itching in the fore part of the urethra. (wind).

Limbs

Jerking in limbs. (jerk—heat but may be due to qi stagnation or wind too) Warm sweat on the palms. (heart heat) Cramps in calves. (cold stagnation in spleen channel) Heavy feet. (damp accumulation in kidney channel) Dislocated pain in joints. (qi deficiency of lung, kidney and spleen) Knees are involuntarily drawn upwards, when walking. (spleen qi deficiency so gravity or earth yin forces not able in ankle and heart have upside yang) Trembling of hands when writing. (qi stagnation heart/spleen channel or liver wind or kidney deficiency) Burning in heels on placing them near one another, (blood deficiency of liver channel so vacuity heat when come near but when touch they are actually cold due to less blood) when they come in contact they are cold to touch, worse at night. (yin deficiency) Sciatica worse in winter, (cold channel sciatica) better in summer. Corns painful as if sore. (blood vacuity heat) Knees hot with cold nose. As if flesh was loose on bones from a blow. (blood vacuity so flesh gets loose) Pain in achilles tendon and calf. (liver wind heat, spleen qi deficiency or may be all may be located in one channel) Ulcerative pain in soles. (damp heat in kidney channel) Lancinating, (blood repletion) cutting pain (blood stagnation) in the shoulder-joint, when bending the arm forward.

Lungs

Catching respiration. (inhales greedily means kidney needs heaven qi more) Takes deep breath, for relief. (kidney qi deficiency) Choking, spasms of glottis. (qi stagnation in

glottis) (Cupr.) Much sighing. (qi stagnation) Dry, hacking, spasmodic cough in quick successive shocks, (lung yin deficiency cough so spasm) shutting of the breath. (lung qi stagnant and yin deficient) Reflex coughs. (lung yin vacuity cough) Cough, as from dust or sulphur fumes. (lung qi stagnant so irritation from dust etc) Coughing increases the desire to cough. (means inner being stagnant qi push out or be free from it) Cough, every time he stands still during a walk. (spleen qi stagnation helped by movement of limbs but stand still increase qi stagnation and affects lung) Whispering voice, cannot speak loudly. (lung yin and qi deficiency or qi lung is deep in inner being)) Sleepy after coughing. (lung qi deficiency) Hollow spasmodic cough. (lung yin deficient) worse in the evening. (yin time) little expectoration, leaving pain in trachea. Whooping-cough. (lung yin vacuity) Dry, hoarse cough. (lung yin vacuity with slight phlegm)

Male

Sweat on scrotum. (heat in liver channel) Penis, contracted, becomes small. (kidney qi vacuity cold) Urging to stool with erection. (liver heat or liver blood supply so erection attacks lung with vacuity heat so urge to stool which through large intestine urge to defecate) Much itching in the penis, removed by scratching. (wind heat itching) Lasciviousness and weakness of genital power, (kidney qi deficient) without erections. Contraction of the penis, it becomes quite small. Absence of sexual desire. (kidney qi deficiency) Erections with painful uneasiness, (liver heat gives erection but kidney qi vacuity cold give contraction so painful) and aching at the pubis. (same as previous)

Mouth

Sour taste. (liver taste so liver attacking the stomach) Accumulation of acid saliva in the mouth. (liver saliva) Spasmodic closing of the jaws, (liver qi stagnation or liver wind) bites inside cheek or tongue when talking or chewing. Redness of the mouth and of the palate. (stomach heat and heart heat) Easily bites inside of cheeks. Aptness to bite the tongue, on one side, when chewing or speaking. (no control on tongue muscle that is either heart qi problem or spleen) Moist tongue, loaded with a white coating. (moist—dampness, stomach damp cold or indigested food stagnation) Stitches in palate. (vacuity yin pain so vacuity heat reaches to ear) extending to the ear. Foam at the mouth. (phlegm damp or turbid phlegm in stomach) Voice weak and tremulous. (lung qi weak and depressed)

Nose

Sensitive to inspired air. (kidney yang sensitive) Pain over the root of the nose. (lung qi deficient cold) Sneezing attacks. (lung qi stagnation) Cold with hot knees. Itching in the nose. (wind or damp heat) Nostrils excoriated (damp heat or blood stagnation) and ulcerated, (damp heat) with swelling of the nose. (heat, dampness) Nosebleed. (stomach, large intestine, bladder heat etc) Stoppage of one nostril, (blood or phlegm stagnation) dry coryza. (lung vacuity heat coryza) with dull headache. (qi stagnation-dull) and excessive nervous excitement. (heart yang excess) Dryness of the nose. (lung/stomach vacuity heat)

Rectum

Itching **and tingling** in the anus. (wind or damp heat and qi stagnation in kidney channel) Constipation from taking cold, (wind cold constipation) from riding in a carriage. (large intestine qi stagnation) Constipation of

neurasthenics. Prolapsus of the rectum while at stool.(spleen qi deficiency with lung qi deficiency)Painful constriction of anus after Stool.(lung qi vacuity after stool has impact on kidney qi vacuity cold) Stools pass with difficulty. Painless contractions of anus. Hemorrhoids, better sitting, worse coughing.(lung qi stagnation with spleen qi deficiency) Diarrhea from fright.(gallbladder heat diarrhea or heart heat)

Stitches

from anus deep into rectum.(qi stagnation in kidney and lung)Hemorrhage and pain,(damp heat hemorrhage) worse when stool is loose. (dampness) Pressure as of a sharp instrument from within outward.(qi stagnation within) Discharge of blood from the anus.(damp heat in kidney region) Ascarides in the rectum. Contraction of the anus.(kidney qi vacuity cold)

Skin

Itching, nettle-rash.(wind heat) Nettle rash over the whole body with violent itching (during fever).(wind heat) Very sensitive to draft of air.(wind)

Excoriation,

especially around vagina and mouth.Painful better pressure.(qi deficiency) Chilblains.(cold congealation of blood) Excoriation of the skin, vagina and mouth. Itching on becoming warm in the open air.(wind heat itching) Great sensitiveness of the skin to a draft of air.(lung qi stagnation)

Sleep

Sleep light, every sound wakes.(liver yang floating) Jerking of limbs on going to sleep. (heat or spleen qi stagnation) Whimpering while sleeping. Insomnia from grief.(lung qi depressed insomnia) Violent spasmodic yawning with running from eyes.(liver yin vacuity heat pushes tears from eyes and kidney yang deficiency to suck more air)

Sleepwalking

from wounded pride, honor.Dreams, same horrid dreams over and over again.(liver or heart fire) Child awakes from sleep with piercing cries and trembles all over.(liver yin vacuity so liver heat and wind) Children with hiccough,(wind) chewing motions of mouth during sleep.(wind) Profound and comatose sleep(blood stagnation) with a stertorous breathing. Very light sleep, hears everything that happens around him.(liver yang floating including liver channel going to ear)

PAGE 837

Stomach

Cramps in stomach, worse slightest contact.(cold cramps that is vacuity cold and qi stagnation so touch aggravats) Sinking in Stomach,(stomach yin vacuity) relieved by taking a deep breath.(kidney yin supports heart yang from sinking) All-gone feeling in stomach,(yin vacuity) much flatulence.(wind due to yin vacuity) Hunger with nausea. (wind heat,wind –nausea or qi stagnation) Hiccough from smoking.(qi stagnation or wind hiccough from wind heat) Hiccough with belchings empty or bitter after eating,(wind hiccough and belching or stomach/heart wind or heart qi stagnation so bitter) drinking. Nausea or vomiting better indigestible things.(wind type nausea and vomiting which is better by hardness or indigestibles) Sour eructation.(liver yang rising) Regurgitation of

food, or of bitter serous matter. (liver yang attacking stomach so regurgitation with heart involved due to bitter taste) Nausea with agitation and anguish. (wind or qi stagnation with liver-agitation and heart heat and anguish—heart may be involved) Vomiting of bile and mucus. (liver yang attacking stomach having damp heat in the stomach) Periodical attacks of cramps in the stomach. (liver related-periodical, cold stagnation in stomach)

Teeth

Looseness of the teeth. (dampness or stomach/kidney qi deficiency) Difficult

dentition with convulsions. (kidney qi deficiency or stagnant with wind heat) Toothache, worse after drinking coffee and smoking. (coffee—heart yang excited so toothache and lung wind heat toothache that is lung and heart also has channels to tooth

with stomach) Toothache, as if the teeth were broken. **Toothache**

towards the end of a meal, worse after its conclusion. (phlegm heat stagnation in stomach so damp heat toothache)

Temperature

Chill during pains. (cold stagnation pains) Chill with red face. (heart /stomach heat but

lung qi less) **Shaking** chill. (lung qi vacuity) Chill with thirst, not relieved by external heat. (internal heat with lung qi deficiency so external cold) During fever, itching, nettle-rash all over body. (internal wind heat) Sweat, worse on eating often, (stomach heat sweat) on a small spot on the face. (stomach heat sweat) Heat with aversion to uncover but no thirst. (external heat then internal cold so no thirst) Feeling as if sweat would break out, but does not. (due to internal cold or qi vacuity) Febrile

shivering, especially in the back and arms. (internal heat with external cold so shivering) with thirst for cold water. (internal heat) and sometimes with nausea and vomiting. (qi stagnation or others as above) External heat with internal coldness.

Throat

Feeling of a lump in throat that cannot be swallowed. (qi stagnation in chest) Tendency to choke. (qi stagnation) globus hystericus. (qi stagnation or wind heat) Inflamed, hard swollen tonsils (heat) with small ulcers on them. (damp heat) Follicular tonsillitis. Sore throat, (qi sytagnation or damp heat) stitches when not swallowing, (qi stagnation) better eating something solid. (qi stagnation helped by solid) Stitches extend to ear, between acts of swallowing. (wind heat, wind—stitches, spreading—heat) Submaxillary glands painful

when moving the neck. Cramps in **gullet**. (cold stagnation) Goiter. Sore throat, as if there were a plug in it, when not swallowing.

Vertigo

Vertigo with sparks before the eyes. (liver yang rising or wind heat vertigo)

Comments

The mental symptoms of Ignatia along with inflammation of the joints, as well as the fever, have disappeared under its action.

The special indication of Ign. in cases of hysteria is the rapid alternation of moods. Uncontrollable laughter alternating with outbursts of tears. Laughs when she ought to be serious. Sensitive, impressionable. This condition with the characteristic globus hystericus. A lump rises from the stomach into throat as if she would choke, she swallows it down but it constantly returns, worse after drinking water, indicate Ign.

Convulsions, spasms from fright. The child stiffens out and bends backward. Half-unconscious state, thumbs clenched, face blue. Cramps and spasms are prevalent as with Nux-v.

Nervous twitchings and even convulsions also occur. Distortion of the facial muscles whenever the patient attempts to speak. Pains rapidly alternate in character and are excessive.

Exaggerated and outlandish symptoms. Empty retching is better by eating. **Sudden loss of function in any organ.(sudden yang or qi vacuity of organ,actually qi suddenly goes into inner being leaving the organ empty)**

There are many bodily conditions not associated with mental disturbance that require Ign., for it must always be borne in mind that the absence of any joint characteristic of a remedy is no contra-indication to its use provided other indications are sufficiently pronounced.

Ign. will cure many painful conditions of the anus and rectum including hemorrhoids and prolapse.

Especially when characterized by "sharp, stitching pains shooting up the rectum," or "constricting pain at anus worse after stool, better while sitting."

PAGE 838

Pressure as of a sharp instrument from within outward is a characteristic. "Headache as if a nail were driven out through the side of the head, better by lying on it." Pains change their locality, come gradually and abate suddenly or come and go suddenly. Headaches terminate with a profuse flow of urine. In dentition it is frequently called for.

Ign. is one of the remedies which have "goneness," or sinking at the stomach in a very pronounced degree. It often occurs in the night, keeping the patient awake. With this there is a disposition to sigh. Sometimes a feeling as if the stomach were relaxed. There is a regurgitation of food. Hiccough worse by eating or smoking or emotional disturbances (especially in children), empty retching better by eating, vomiting at night of food taken in evening.

Hysterical

vomiting. Sour saliva and sour taste in mouth. Toothache, worse after a meal, not so bad while eating another paradoxical condition.

The dysmenorrhea in which Ign. is indicated has labor-like bearing-down in hypogastrium, better by pressure, by lying down, by change of position. The flow is

black, putrid, if profuse, clotted.

Spasms

and convulsions, ending in long-drawn sighs, are met by Ign.

Nash relates a case of puerperal convulsions in which this feature led to a cure. There are a number of characteristics respiratory symptoms: Hysterical aphonia. Laryngismus stridulus, patient sits up in bed, hoarse, hacking cough.

The characteristic cough of Ign. is an irritable and irritating cough: the longer the cough lasts the more the irritation to cough increases. Kent describes it as: "Hack, hack-et-hack, ending in sobbing." Cough every time he stands still during a walk. Hollow, spasmodic cough as from sulphur fumes.

Cough as from inspired feathery dust. Sensations of formication **and**

numbness are very general. Pains are apt to be in small circumscribed spots.

Ign. is one of the chilly medicines like Nux, Caps., Ars. Clarke astonished himself once by curing rapidly with Ign. a severe case of rheumatic fever, which had been making no progress under Bryonia.

In the fever of Ign., the thirst occurs during the chill and in no other stage. This is a very unlikely condition and no other remedy has it. In intermittent fever it is the only remedy that will cure certain cases.

B. Simmons defines the place of Ign. in sciatica thus: "Lancinating, cutting pains,

beating, bursting pains, chilliness with thirst, flushes of heat, chiefly face without thirst." The limb is swollen and thigh knotty and she cannot get up or lie down without pain, generally left side.

Teste places Ign. in his Ipec. group: Nausea and vomiting, reversed peristalsis, congestive headaches and engorgements resulting from vomiting, tenesmus, intermittent fevers are the leading characteristics of the group.

Ilex aquifolium

(american holly)

Pharmacy

Ilx-a. *Ilex aquifolium*. American Holly. N. O. Aquifoliaceae. Tincture of fresh leaves, berries and young shoots. Historical dose: Tincture and all potencies.

Herbal

The best-known members of the *Ilex* genus are the common Holly and the *Ilex Paraguayensis* or Paraguay tea from which the drink called Mate is made. The leaves of *Ilex-aq.* are reputed to be equal to *Cinchona* in the treatment of intermittent fever.

Haller commended the juice of the leaves in jaundice, the berries are purgative and emetic. Hale quotes Rafinesque as saying, "The decoction and wine have been used for cough, pleurisy, colic, gout and rheumatism."

Hale quotes an article by Dr. Hendricks on the affect of *Ilex aq.* on the eye. With 5-drop doses of the *Ix*, given four times a day. Dr. Hendricks cured several cases of "rheumatic inflammation of the eye with periostitis of the frontal bone, which often leads to staphylomatous degeneration of the cornea."

Hendricks gives this case: A girl, 17, had been under the most renowned oculists since her fifth year. She had great infiltration of cornea, staphyloma, eyeball looked like a lump of flesh. Nightly burning pains in orbits. *Ilex aq.* cured completely in six days. **Planets:** Saturn.

Homeopathic

Ilex aquifolium has intermittent fever. Marked eye symptoms, spleen pain. All symptoms better in winter.

Infiltration of cornea, staphyloma, nightly burning in orbits, rheumatic inflammation of eye. It has been used in coughs, pleurisy, colic, gout and rheumatism.

Clinical

Diarrhea. Eyes disorders. Intermittent fever. Jaundice. Spleen, pain. Staphyloma.

Comments

Cooper has cured with it pain in spleen. His keynote indication for it is: "Symptoms better in winter." He improved with it a bad case of chronic deafness having this peculiarity. A feeling of irritation in urethra with constant dripping from orifice, probably from prostate in a man about 50, disappeared after a drop of the tincture.

Cooper says the diarrhea of Ilex. aq. is accompanied with mucous flux and he suggests that it may be useful in pilosis, (sprue).

Compare

Boericke. Clarke.

Ilex mate

(yerba mate)

Pharmacy

Ilex paraguariensis. Yerba Mate. Historical dose: Tincture and all potencies.

Herbal

Yerba Mate is said to be of use as a prophylactic against sunstroke, being a stimulant to the circulation as a diaphoresis and diuresis herb. **Planets:** Sun, Venus.

Homeopathic

Persistent epigastric pain, sense of dryness of mouth and pharynx. Anorexia, heartburn with nervous depression, neurasthenia. Somnolence incapacity for work. Diminution of urinary secretion. Headaches and pruritus, itching. Kidney colic. Hemicrania.

Clinical

Anorexia. Depression. Headaches. **Heart**burn. Hemicrania. Kidney colic.

Neurasthenia. Sunstroke.

PAGE 840

Ilex vomitoria

(yaupon)

Pharmacy

Ilex Vomitoria. Yaupon. Historical dose: Tincture and all potencies.

History

Ilex Vomitoria has emetic properties. It also possesses tonic and digestive qualities, free from sleepless effects. **Planets:** Venus.

Homeopathic

Ilex Vom. has an active principle said to act as a powerful diuretic employed in nephritis and gout.

Clinical

Gout. Nephritis.

SOURCES

Boericke.

Impatiens glandulifera

(bach flower remedy)

Pharmacy

Impatiens. *Impatiens glandulifera*. The mauve flowers are picked and floated on to a bowl of water which is left in the sun for several hours. The water is strained and preserved as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

Herbal

Together with Heather and Water Violet, this remedy belongs to the group of Loneliness, as classified by Bach. All three remedies bring healing to those suffering from inner loneliness mostly due to self-centered reasons. **Planets:** Moon.

Homeopathic

Impatiens is indicated in all situations of life calling for increased patience and forbearance, or when one's life style has become tense and driven. The impatient urges and the tendency to high-speed performance have to be held within, there creating nervous tension and cardiovascular strain.

There may be internal agitation and impatience. Here, the suffering may be great, since outlets of inner tension are blocked out of consideration for others and inner tension may mount to an advanced stage of nervousness.

In extreme cases, a nervous breakdown is threatened. Concomitant symptoms are nervous tension, strain, problems with high blood pressure, heart trouble.

Threatened nervous breakdown in extreme cases. Internal and external agitation and sudden explosions of temper with possible violence are common.

Symptoms

MIND

The mind is in a tense, wound-up state and there is the urgency to work and move fast. Speeding in mind leads to speeding in one's movements, propelled by internal agitation and restlessness. Efficiency is a desirable goal in this state, one works fast and counts one's progress, one gets the job done.

This inner dynamic, usually coupled with ability and skill, gives the personal perspective of being a leader or role model whom the others should follow or keep up with.

Impatient people may be ruthless or self-centered, short of temper and intimidating. In problems with impulse control and during drug rehabilitation, this remedy can help restore balance in mind/emotions and body and increase self-mastery (Cherry Plum, Holly, Vervain).

While being in the more expressed *Impatiens* state, one usually feels less inclined to linger with others and pay thoughtful attention, but drives oneself and others from one activity to the next.

Commonly, there are experiences of anger, frustration, dissatisfaction and irritability. Self-centeredness may be high and the feeling may exist that others should pay attention and revolve around the impatient person's idiosyncrasies.

The less expressed impatient type may experience despair more easily or feelings of being overwhelmed by high situation demands coupled with inner lack of nerve power and calm control.

Imperatoria ostruthium

Pharmacy

Imp. Imperatoria ostruthium. Peucedanum ostruth. N. O. Umbelliferae. Tincture or infusion of root. Historical dose: Tincture and all potencies.

History

Imperatoria like Athamanta, belongs to the genus Peucedanum. Kleemann observed the effects of the infusion of the root, a teaspoonful every two hours. **Planets:** Mercury.

Homeopathic

A few symptoms were noted, but they were peculiar. "Diminished secretion of mucus in intestines and air passages" is noteworthy.

Clinical

Skin disorders. Stomach disorders.

Compare

(1) Atham. and Umbelliferae.

SOURCES

Boericke. Clarke.

Indigo tinctoria

Pharmacy

Indg. Indigo tinctoria. An oxidation product from the juices of several plants, chiefly Indigo tinctoria. N. O. Leguminose. Trituration. Historical dose: Trituration and all potencies, third to thirtieth potency.

History

Indigo was introduced into medicine as a remedy for epilepsy. It has been extensively proved by homeopaths and observations have also been made of its effects on epileptic patients who were receiving large doses from old-school practitioners.

Pure powdered Indigo placed on the wound cures snake and spider poison. (Kali permang., Golondrina, Cedron).

Teste tried Indg. in cases of epilepsy, but with little success, except in cases arising from the presence of worms. In cases of worm fever he has used it with great effect. The patients were children from ten to twelve years old, lymphatic, apathetic, peevish, who ate a great deal.

Teste also used Indg. with success in the following cases: (1) Semi-liquid diarrhea (three to four stools a day, coming on especially after exercise in a stout old man, frequently given to excess of eating).

(2) Chronic catarrh of the bladder.

(3) Stricture of urethra after old gonorrhoea with Plb. and Sep. **Planets:** Moon, Mars.

Homeopathic

Indigo has marked action on the nervous system and of undoubted benefit in the treatment of epilepsy with great sadness. Excited mood and desire to be busy. Neurasthenia and hysteria. Stricture of esophagus, blue color. (Cupr.)

Indigo has some reputation in the treatment of epilepsy, when the attacks are preceded by a furious excitable disposition followed by melancholy, timidity and mildness. There is a peculiar undulating sensation in the brain with obscuration of vision or sensation as if the brain were frozen, before the attack. Pain in the limbs worse after every meal.

Sciatica—pain from middle of thighs to the knee.

Clinical

Acne. Amenorrhea. Anus, prolapse. Brachial neuralgia. Constipation. Cough. Diarrhea. Epilepsy. Face, pimples on. Headache. Hysteria. Nosebleed. Kidney colic. Sciatica. Skin disorders. Toothache. Urethra, stricture. Worms.

Modalities

Better pressure, rubbing. Better by motion, walking. Worse during rest and sitting. Worse in afternoon in evening. The vertigo with headache is better in evening and worse in open air. Warmth rushes to head on entering a warm room after walking in cold air. Worse after eating and after evening meal.

Symptoms

Back

Stitch between the scapula. Stitch in the small of the back, going off after an evacuation.

Breasts

Stinging in the breasts, going off momentarily by rubbing. Burning in the breasts during the menses. Shooting pains in and around the breasts.

Chest

Rumbling and grumbling in the chest at every inspiration.

Ears

Pressure and roaring.

Eyes

Convulsive twitching and quivering of the eyelids, impeding the sight. Pressure in the eyeball. Inflammation of the meibomian glands on the lower lids.

PAGE 842

Face

Tearing, piercing and gnawing pains in bones of the face and especially of lower jaw. Pricking in right malar bone. Pain in the submaxillary glands extending to the teeth. Congestion in the fact with burning cheeks.

Female

Menstruation too early. Acts as an emmenagogue.

Head

Convulsions. Sensation of a band around forehead. Undulating sensation through whole head. Sensation as if brain were frozen. Gloomy, cries at night. Hair feels pulled from vertex. Head feels frozen.

Kidneys

Constant desire to urinate. Urine turbid. Catarrh of bladder. kidney colic. Frequent desire to urinate with burning in the fundus of the bladder. Stricture of urethra.

Limbs

Weakness of arms. Sciatica. Aching, stinging, bruised pain in sciatic nerve. Pain from middle of thigh to knee. Boring pain in knee-joint, better walking. Pain in Limbs worse after every meal. Drawing in the muscles, in deltoid. Convulsive startings in the arms. Veins of the hands red inflamed and tense.

Tearing in the lower limbs, especially in the toes.

Lungs

Violent cough inducing vomiting, bleeding of the nose. Suffocating cough, exciting vomiting in the evening, before and after lying down.

Male

Depressed sexual desire. Itching of the urethra, glans and scrotum.

Mouth

Numbness of interior of mouth in the morning after waking. Sensation of burning on the tongue and in the bottom of the palate. Vesicles on the tip of the tongue. Metallic taste in tongue with contracted feeling in pharynx. Spitting of bloody saliva.

Nerves

Excessive nervous irritation. Epilepsy, flashes of heat from abdomen to head, fit begins with dizziness. Aura from a painful spot between shoulders. Reflex spasms from worms. Hysterical symptoms where pain predominates.

Nose

Excessive sneezing and bleeding from nose. Nosebleed with vanishing of sight. Tearing and incisive pains in the bones and cartilages of the nose.

Rectum

Falling of rectum. Aroused at night with horrible itching at anus. Dull sticking in rectum. Diarrhea, stool liquid with flatulence and colic. Obstinate constipation, stool scanty, hard, retained. Itching at anus. Pinworms. Prolapsed anus after each stool.

Skin

Face and whole body covered with pimples. Fine heat-rash, especially left side of face extending from forehead to throat. Itching of skin with constipation. Boils on ribs and various parts. Itching in face and various parts of body, better by rubbing.

Sleep

Sleepiness in the evening and disturbed sleep at night. Illusory sensations. Children aroused at night with horrible itching at anus. At night, anxious waking with a start. Anxious dreams. Nervous irritation. Predominance of cold. Convulsions, attacks sudden.

Stomach

Metallic taste. Belchings. Bloating. Anorexia. Flushes of heat rising from stomach to head. Empty risings. Retching and vomiting of watery fluid.

Vomiting of glue-like mucus. Tingling pain in the pit of the stomach.

Teeth

Drawing, gnawing, tearing pains in teeth (right). Teeth as if being pulled out.

Temperature

Chilliness with cold hands and violent headache with constant desire to urinate, urine turbid. Great heat, particularly in the face with increased secretion of urine.

Vertigo

Vertigo with nausea.

Comments

The provings bring out many neuralgic and nervous symptoms. These have been supplemented by clinical observations and the place of Indg. in the Materia Medica is now fairly well defined.

The symptoms were: Chilliness, catarrhal cough, coming in long paroxysms in evening. Whitish, moist tongue, sour or foul breath.

PAGE 843

A large but soft abdomen, diarrhea of two or three stools in twenty-four hours like grayish paper, sour, ascarides in rectum, even crawling out during sleep.

In the dynamic cures of epilepsy effected by Indg., there has been great melancholy which the patient has sought to hide, spending many nights crying alone or a furious excitable disposition before the attacks and mild and timid after.

The attacks have been sudden, apparently originating in the solar plexus from which flushes of heat arise to the head induced by cold or fright.

A peculiar sensation is an undulating sensation in the brain (which Clarke also observed in a case of epilepsy benefited by Cimic., the Ind. undulation causes obscured vision). A dry suffocative cough in evening and after going to bed and a cough always attended by nosebleed are characteristics.

A case narrated by Nash brings out one of the characteristic conditions of Indg. A hard-working man, over 70, gradually became unable to work. Weak, stiffness all over, especially right side, arm and leg.

Pain in right hip running down leg, worse beginning to move after resting. Can hardly turn over in bed.

Appetite poor, stomach distressed, four or five hours after eating, if he eats more than a very little. Pains in the limbs decidedly worse after every meal. Indg. cured promptly.

There are marked symptoms of brachial and sciatic neuralgia which have this peculiarity: they come on or are worse while sitting and are better by moving about.

Compare

(1) Cupr.

(2) Sulph. - epilepsy, sinking sensation, hot flushes, worm fever.

(3) Kali-br. - epilepsy, acne.

(4) Cimic. - epilepsy with waving sensation in brain.

(5) Rhus-t. - worse by rest, better by motion.

(6) Ind., timid, sad, low-spirited, Bufo, vehement or excitable, Bufo - epilepsy.

(7) Lyc. - worse in afternoon.

(8) Ign. - sad introverted.

(9) Baptisia and other Leguminose.

Relations

Antidoted by: Camph., Bry., Nux-v.

SOURCES

Boericke. Clarke. Phatak.

Indium metallicum

(the metal indium)

Pharmacy

Ind. Indium metallicum. A metal. Trituration of the pure metal. Historical dose: Trituration and all potencies, sixth to 200c potency.

History

Indium receives its name from the Indigo blue line in the spectrum through which its presence was discovered in Zinc-blend. It is a rare metal, nearly like lead in appearance and in softness.

Indium has been proved under the direction of Bell, mostly in the potencies and the symptoms mark it out as allied in action to Selenium and Titanium in its general action.

Homeopathic

Indium metallicum has affects on the Male sexual sphere. There is diminished power and control, frequency of nocturnal emissions, sexual dreams of perversion which should render it of service in some cases of sexual psychopathy. Backaches. Headaches and migraine. Seminal emissions.

There is also a headache with sleepiness and nausea. There are many marked symptoms in the throat, the characteristic condition being worse in evening and better by eating and by drinking cold water. The urine is horribly offensive after standing a short while.

Clinical

Backache. Chronic fatigue. Depression. Foot-sweats. Headaches. Megrim. Nosebleed. Paralysis of the sphincters. Pollutions. Sexual perversion. Sore throat. Throat, ulceration. Uvula, enlarged, ulcerated.

Constitutions

Tubercular types. **Planets:** Venus, Moon.

Modalities

Better out of doors in cold air, by drinking or washing in cold water. Worse in a warm room. Worse by motion. On the other hand, there is restlessness compelling to move about. Several symptoms occur in early morning 3 to 4 a.m. in afternoon, 3 p.m. to 6 p.m. there is faintness at 11 a.m.

PAGE 844

Symptoms

MIND

Depression. Psychologically exhausted, cannot work. Sleepy and irritable with pain in the occipital region. State of indifference. Sexual psychopathy.

Back

Pain in the back. Stiffness at the nape of the neck. Stiffness in neck and shoulders.

Chest

Burning pain behind the sternum. Pain in the left side of the thorax and towards the left axilla.

Ears

Painful pustules on the outer ear. Helix red and feels sharp, needle-like pains.

Eyes

Uncertain sight in the evening. People seem pale or yellow.

Face

Painful suppurating pimples. Corners of mouth cracked and sore. (Cund.)

Female

Menses prolonged. Drawing pains in the low abdomen with marked irritability.

Head

Sudden violent or beating headaches, especially in the right occipital region. Pruritus of the scalp with internal head pains. Pain in Head when straining at Stool.

Head

Bursting in head during stool. Dull pains in temples and forehead with nausea, weakness, Sleepiness.

Kidneys

Horribly offensive smell of urine after standing a short time. Urine foul-smelling.

Limbs

Pain, especially in left arm. Legs restless and weary. Toes itch. (Agar.) Pains in the limbs. Jerking in the legs. Pain in the muscles, especially in the right ankle, then moving to the left ankle and spreading over the whole foot. Muscular shuddering. Weakness of the legs, feels particularly tired after walking, becomes restless and needs to move again.

Lungs

Must breathe deeply.

Male

Emissions too frequent. Diminished power. Testicles tender. Drawing pains along spermatic cord. Testes soft, heavy. Increased sexual desire, nocturnal discharge followed by insufficient erection, premature ejaculation.

Mouth

Pharyngeal muco-viscous secretions, sticky and yellow.

Nose

Violent attack of sneezing.

Rectum

Loses control of the anal sphincter when urinating. Headaches during difficult evacuation of the bowel.

Sleep

Hallucinatory dreams.

Stomach

Acrid dyspepsia. Nausea with headaches at breakfast. Weakness in the stomach around 11 a.m.

Throat

Uvula enlarged, ulcerated, thick tough mucus in back part of pharynx. Worse evening.

Comments

The mental condition of Ind. is one of depression, curiously not unlike that of Indigo, whose color it shows in the spectrum. Headaches were very marked in the proving and one notable symptom appears: "Violent pain in the head when straining at stool." This is not infrequently met with in practice and I have given great relief with Ind. 200c to a patient who had this symptom.

Berridge reports this case: A boy, 10, constipated five or six years. Stool about once a week, dark and short, sometimes with blood, anus sore after stool.

He has to strain much, seizing his thighs with his hands and straightening himself forcibly, the effort makes his face red and the head feels as if it would burst. Ind. in high potencies cured.

PAGE 845

Compare

- (1) Sel., Titan. - male sexual organs.
- (2) Bell.
(headache, menses), Aspar. - urine, Sang. - headache, rheumatism.
- (3) Phos., Nat-c., Sulph. and Zinc. - faintness, 11 a.m. .
- (4) Ferr. - headache, ebullitions, lameness of shoulder muscles.
- (5) Brucea, Lach., Nux-m., Op., Stann. and Stry. - Headache with sleepiness. Ind. has nausea as well as sleepiness.
- (6) In throat symptoms better from eating and drinking. Ind. resembles Es. h., Benz-ac., Cist., Lach.
- (7) Mur-ac. - Adynamic types, red face, dry tongue, cannot urinate without evacuating the rectum.
- (8) Tub. - Constant need to move about, changing, erratic pains, has to make an effort to urinate during the stool.

Indolum

Pharmacy

Indol. Indolum. Crystalline compound derivable from Indigo, but also a product of Putrefaction of Proteids. Historical dose: Trituration and all potencies, sixth potency.

History

Indolum's primary action is to increase the elimination of Indican. **Planets:** Saturn.

Homeopathic

Auto-intoxication. Persistent desire to sleep, dull, discontented mental state, hideous delusions and nervousness, constant motion of fingers and feet. Intestinal putrefaction.

Clinical

Auto-intoxication. Constipation. Delusions. Dullness. Fatigue. Headaches. Nervous. Sleepiness.

Symptoms

Food

Great thirst. Hungry sensation after full meal.

Head

Dull occipital and frontal headache in afternoon. Dull sensation over eyes. Eyeballs hot and hurt when moved. Pupils dilated with headache.

Limbs

Very tired and sore in lower limbs. Feet burn. Knee-joints sore.

Sleep

Sleepiness. Continuous dreaming.

Rectum

Constipation.

Stomach

Bloated feeling.

Compare

(1) Skatol.

SOURCES

Boericke.

Influenzinum

(influenza nosode)

Pharmacy

Influ. Influenzinum. The nosode of Influenza. Historical dose: All potencies.

History

The nosode of influenza has with many practitioners taken the place of Baptisia as the routine remedy in epidemics.

It may be given in the 12c or 30c potency, either in the form of tincture, pills or ten pellets may be dissolved in six ounces of water.

Of this a dessert spoonful may be given for a dose. It may be repeated every two hours. This will be found sufficient to control a large proportion of the cases. **Planets:** Mercury.

Homeopathic

The general directions Clarke gave to his patients are these: When "colds" appear in a family let all those who are unaffected take Ars. 3c thrice daily and let the patients take Infl. 30c every hour or two.

This generally prevents the spread of the trouble and clears up the "colds," whether they are of the influenza type or not. Influenzinum has the ability to develop old troubles and thus it takes a variety of forms in different persons. Infl. need not be expected to cure all cases unaided or indeed to be appropriate to every case.

Influenza, measles. Weakness and fatigue. Influenza encephalitis. Syndrome of meningitis. Post - influenza depressive neurosis. Entero-colitis of influenza. Diarrhea of influenza.

General ill feeling with chill, headache, diffused pains. Neurotic, depressive persons. Anorexia. Stiffness. Tendency to hypotension. Hyperthermia. Sycosis.

Clinical

Catarrh. Colds. Influenza.

Symptoms

Abdomen

Gastro-intestinal pain.

Blood

Leucopenia with mononucleosis.

Ears

Otitis of influenza.

Eyes

Eyes are heavy and sensitive to movements, stiffness. Conjunctivitis of influenza.

Head

Meningitis syndrome. Encephalitis syndrome with vomiting. Headache of influenza.

Heart

Hypotension. Weakness of the myocardia. Cardiac neurosis.

Limbs

Venous and arterial congestion of the lower limbs. Rheumatoid pains during humid and cold weather.

PAGE 846

Lungs

Dry painful cough. Bronchitis. Broncho-pneumonia of influenza. Sub-acute edema of babies. Bronchial asthma.

Nose

Nasal congestion. Coryza of influenza. Sinusitis.

Rectum

Weakness of the anal sphincter. Weakening diarrhea.

Throat

Pharyngitis. Chronic laryngitis. Nasal voice . Stridulous laryngitis of children.

Comments

Varicose veins and ulcers, (Oscilococcinum). Venous stasis of lower limbs. Intermittent lameness. Acute and chronic rhino - pharyngitis. Laryngitis of influenza. Chronic atrophic rhinitis. Bronchial asthma. Nasal polyps. Sinusitis, otitis. Acute coryza, chronic coryza, blepharitis, conjunctivitis. Infection rheumatism

Compare

(1) Oscilococcinum.

(2) Mimosa pudica - Inflammation of the eyes and nasal mucosa. Headache, worse by movement, better while closing eyes. Diarrhea with colic and irritating stools.

(3) Galphimia glauca - Hypersensitiveness to change of weather, Hypersecretion of nasal and ocular mucous.

(4) Luffa operculata: Fronto-occipital headache. Acute or chronic inflammation of the nasal mucosa.

Relations

Compatible with: Cimic., Ars., Bell., Bry., Hep., Merc. and many others.

SOURCES

Boericke. Clarke. Julian.

Insulinum

Pharmacy

Ins. Insulin. Insulinum. Insulin is an aqueous solution of an active principle from pancreas which affects sugar metabolism. Historical dose: All potencies, 3x to 30x.

History

If Insulin is administered at suitable intervals in diabetes mellitus, the blood sugar is maintained at a normal level and the urine remains free of sugar. Overdosage is followed by weakness and fatigue and tremulousness and profuse sweating.

Besides the use of Insulin in the treatment of diabetes, restoring the lost ability to oxidize carbohydrate and again storing glycogen in the liver. **Planets:** Jupiter.

Homeopathic

Some use of Insulin homeopathically has been made by Dr. W. F. Baker, showing its applicability in acne, carbuncles, erythema with itching eczema. In the gouty, glycosuria when skin manifestations are persistent give three times daily after eating. Insulin is indicated for persistent cases of skin irritation, boils or varicose ulceration with polyuria.

Clinical

Acne. Boils. Carbuncles. Diabetes. Eczema. Glycosuria. Gout. Varicose ulcers.

SOURCES

Boericke.

Inula helenium

(scabwort)

Pharmacy

Inul. Inula helenium. Scabwort. Elecampane. N. O. Compositae. Tincture of fresh root dug in autumn of the second year. The juice of the root was proved. Historical dose: Tincture and all potencies, first to third potency.

Herbal

Inula is a perennial plant with a stem from three to four feet high, large saw-toothed leaves tapering to a stalk and large heads of yellow flowers. The root has an aromatic camphor-like taste, due to the presence of a crystalline substance called Helenin, allied to the chemical constitution to Kreosote.

It also contains a quantity of starchy material, called Inulin, which differs from ordinary starch in being colored yellow by Iodine. Elecampane was formerly much used as an aromatic tonic and as a stimulant of all the secreting organs likewise in coughs, dyspepsia.

This quotation from the Treasury of Botany well sums up the chemistry and ancient history of the plant as handed down from the time of Dioscorides. Ben Jonson refers to it in one of his poems.

PAGE 847

A popular tradition credits it with the cure of facial erysipelas and certain symptoms of the face in the provings seem to confirm this.

The homeopathic knowledge of it is due to Fischer, who proved the root-juice.

Clinical

experience has confirmed and added to the symptom list. A very pronounced effect was observed in the pelvic organs, pressing and dragging towards the rectum and genitals. **Planets:** Venus.

Homeopathic

The old reputation of the remedy in coughs is confirmed: Violent tickling in Larynx, producing dry cough, worse lying down, worse at night, larynx painful, also dry cough with constant tickling in throat-pit, difficult breathing and sensation as if hoarseness would occur.

A mucous membrane medicine. Bearing-down sensation in pelvic organs and bronchial symptoms are most marked. Sub-sternal pain. Diabetes.

Clinical

Backache. Cough. Cramp. Dysmenorrhea. Erysipelas. Leucorrhoea. Rectum, pain in. Sciatica. Toothache.

Modalities

Worse at night, worse lying down (except the uterine pain, which compels patient to remain lying). Worse by motion after eating.

Symptoms

MIND

Excessive anxiety and trembling of the whole body, chattering of teeth from cold, during menstruation.

Abdomen

Violent motion beneath right hypochondrium, as though something living were moving about. Sticking as with two pins to right of umbilicus.

As from a knife between umbilicus and right groin. Stitches in left side of abdomen towards left groin.

Back

Pain through back and chest, on inspiration. Transient pain in right scapula. Violent backache during menstruation.

Chest

Stitches behind sternum and beneath left seventh and eighth ribs. Throbbing and jerking pain as from suppuration, in middle of chest.

Ears

Dull stitches in left ear, with transient sticking above right eyebrow in evening.

Eyes

Twitching in upper lids. Burning in left eyeball. Swimming before eyes and pressure in temples and forehead.

Face

Left side of face red and hot, a white spot near nose. Flushes of heat, left cheek glowing.

Female

Menses too early and painful. Labor-like pains, urging to stool, dragging in genitals with violent backache. Itching of legs during menses, chattering of teeth from cold during menstruation. Moving about in abdomen, stitches in genitals. Chronic metritis. Movings about in abdomen followed by yellowish leucorrhea.

Head

Rush of blood to head with sleeplessness. Throbbing after eating, pressure in temples and forehead. Headache in right side, afterward in left. Sticking headache in right side. Jerking, tearing pain in occiput. Burning headache in left temple, in a spot as large as a silver dollar in evening.

Kidneys

Urging to urinate ten times in one hour, urine passes by drops. Urine smells of violets. (Tereb.)

Limbs

Coldness, shaking in bed, cold, blue hands and nails. Pain in right shoulder and wrist, tearing in left palm, unable to double fingers, pain in lower limbs, feet and ankles.

Tearing, jerking in right arm. Upper arms as far as elbows fall asleep. Tensive drawing in hips. Sticking in right hip. Cramp in calves during sleep.

Lungs

Dry cough, worse at night and lying down, larynx painful. Chronic bronchitis. Cough with much thick expectoration with fatigue and weak digestion. Teasing cough with much and free expectoration. Difficult breathing with dry cough, constant tickling in throat-pit. Dry, tickling cough.

Mouth

Dryness of mouth with scraping and tickling in throat, swallowing difficult. Pain in decayed teeth, worse at night.

PAGE 848

Nose

Stitches in right side of middle of nose. Sticking, crawling in root of nose, extending to eyebrows.

Rectum

Pressing dragging towards rectum and genitals, as if substance would come out, occurring repeatedly.

Skin

Itching as from fleas, violent on legs during menses, with burning after scratching in bed.

Sleep

Sleep restless, starting and crying out. Dreams are lascivious, disgusting.

Stomach

Nausea in morning coming from stomach. Twisting as of a ball in epigastric region, above umbilicus. Sticking pain in epigastric region.

Throat

Violent tickling in larynx, producing dry cough. Palliative in tubercular laryngitis.

Vertigo

Vertigo on stooping. Confusion of head with nausea in evening.

Comments

Headache and labor-like pains. Inula is one of the remedies which has sensation as of something alive moving about internally, also twisting as of a ball in umbilical region, as if a substance would come out of rectum and genitals.

Another peculiar sensation is: as though some one was poking him with a finger in various parts of the body, especially in diaphragm, so painful he awoke with clenched teeth. Sticking pains as with pins or a knife are numerous. The majority of the symptoms occurred on the right side.

Compare

- (1) Croc., Ign.
- (2) Arum-d. - loose cough worse at night on lying down.
- (3) Sep. - forcing in genitals and rectum.
- (4) Croc. and Thuj. - sensation of something alive.
- (5) Terebe. - urine smelling of violets.
- (6) Ign. - cough worse lying down and in evening.
- (7) Sulph. Psor. - worse at night in bed.

SOURCES

Boericke. Clarke.

Iodium

(iodium)

Pharmacy

Iod. Iodium purum. Iodine. An element. Tincture. Historical dose: Tincture and all potencies, third to thirtieth potency. The crude drug in saturated solution may be required. Ioduretted solution of Kali-iod. (35 grains Potassa and 4 grains Iodine to 1 oz. of water, 10 drops three times a day)

History

Iodine tincture is an allopathic skin disinfectant. Ioduretted solution of Kali-iod. is said to expel tapeworms dead. Locally it is an effective and easily managed microbicide. Ideal agent to keep wounds clean and disinfected, (Calen.) Gunshot wounds, (Hyper.) and compound fractures. Bites of insects, reptiles, etc.

Iodine has great absorbent action, which is rapid and intense. The most prominent feature of the action of Iodium is its power of causing absorption. It is this power which has made the drug such a favorite among old-school practitioners as a paint in all kinds of swellings.

Given internally its power is much greater, the absorbents are stimulated to fresh activity, muscles, fat, tissues and glands waste away and general emaciation is the result. When new growths and hyperplasia are present, these come under the action of Iod. before the normal tissues.

Homeopathic

Glands, thyroid, testes, mesenteric and mammary, first get swollen, hard and heavy, then begin to dwindle. New growths and hyperplasias come under its action when their growth is rapid. All glandular structures, respiratory organs, circulatory system are especially affected, they atrophy. Rapid metabolism: Emaciation, weight loss with great appetite. Hungry with much thirst. Better after eating.

Great debility, the slightest effort induces perspiration. Iod. individual is exceedingly thin, dark complexioned with enlarged lymphatic glands, has voracious appetite but gets thin. Tubercular type.

Arthritis deformans. Acts prominently on the connective tissue. Lead poisoning. Tremors. Acute exacerbation of chronic inflammation. Iodine craves cold air. The plague. Capillary congestion followed by ecchymosis, edema, hemorrhages and nutritive disturbances. Abnormal vaso-constriction.

Sluggish vital reaction, hence chronicity in many of its aspects. Acute catarrh of all mucous membranes, rapid emaciation, with a good appetite and glandular atrophy call for this remedy in numerous wasting diseases and in scrofulous patients. Goiter.

Acute disorders of the respiratory organs. Pneumonia, rapid extension. Iodine is warm and wants cool surroundings. Weakness and loss of breath going upstairs. Adenoid vegetations. Tincture internally and applied locally to swollen glands and rattlesnake bites.

Weak and rapidly losing flesh, even with a good appetite. feels always too hot. Great debility, the slightest effort induces perspiration, cannot talk, becomes out of breath going up stairs. Atrophy or induration of testes, ovaries, uterus. Wasting diseases of scrofulous patients. Pancreatic diseases. Adenoids. Goiter. Tuberculosis. Trembling of limbs or body. Acute exacerbations of chronic inflammation.

Facial paralysis or epilepsy from suppression of goiter. Emaciation with glandular enlargement. Sluggish reaction, hence chronicity of many disorders.

Clinical

Appetite, disordered. Atrophy. Brain, atrophy. Breast-feeding, disorders. Cancer. Chilblains. Chyluria. Constipation. Coryza. Cough. Croup. Debility. Diabetes. Diarrhea. Emaciation. Enteric fever. Galactorrhea. Goiter. Headaches.

Heart disorders, hypertrophy. Hemorrhoids. Hiccough. Hydrocephalus. Iritis. Jaundice. Joints disorders. Laryngitis. Leucorrhea. Liver disorders. Lymphatic swellings. Melancholia. Ovaries, disorders. Ozaena. Prostate gland, enlarged. Rheumatic gout. Rheumatism. Salivation. Scars. Seborrhea. Infertility. Syphilis. Tabes mesenterica. Throat disorders. Thyroid disorders. Tuberculosis. Uterus disorders. Voice disorders. Vomiting. Worms.

Causations

Ill effects of nervous shock, disappointed love.(hearty qi stagnation)

Constitutions

Iod. is specially suited to persons of dark hair and complexion, dark, yellow, tawny skin. Suitable to over-grown boys(growth controlled by kidneys so kidney yang excess) with weak chest(lung qi vacuity) and aged persons(kidney yin deficient). **Planets:** Jupiter, Saturn.

Modalities

Better from cold, air, bathing, walking about in open air.(heat,lung qi deficient so needs air) Better from eating,(yin deficiency) sitting up.(spleen qi deficient) Worse by warmth, by wrapping up in a warm room.(yin vacuity heat so in vacant small place there is heat) Worse heat of room, air, wraps, exertion,(liver blood deficient) ascending.(liver yang rising) Worse talking,(lung qi deficiency) fasting,(stomach heat) night(yin problem),rest(excess condition,heat) touch,(qi stagnation) pressure.(excess condtion) Worse when quiet in warmth, right side.(yin side problem)

Symptoms

MIND

Excited and restless.(liver yang excitation and restless and not heart excitation) Anxiety(yin deficient with hyperactive heart fire,phlegm heat accumulated in the chest,liver heat or liver fire attacks heart etc) when quiet.(heart fire become active) Sudden impulse to run and do violence,(heart fire) but motion worse and exhausts,(spleen qi deficiency) better if busy.(heart fire hyper needs continuous occupation or busy) Anxiety about present and depression,(hyperactive heart fore and heart yin deficient—depression) no reference to the future. Dejected with tendency to weep (heart and lung qi depressed)or intolerably cross and restless.(heart fire overactive) Forgetful(heart yin deficient). Must be busy. Fear of people,(kidney) shuns every one.(liver) Melancholy. (lung) Thinks he is well. Fear of people of physicians, shuns everyone. Suicidal tendency. (kidney-lung communication) Fretful, forgets what is to be spoken or done, does not know what.(immediate memory problem—heart problem) Does not understand why he has done some joint thing. Impulse to do some strange things without any cause to kill somebody or to kill himself.(impulse is fire,killing has sun element in it ,heart fire) Heart palpitates when thinking of real or imaginary wrongs.

Abdomen

Mesenteric glands enlarged.(blood and fluid stagnation) Pancreatic disease. Cutting pain

in abdomen.(blood stagnation in abdomen) **Trembling** in abdomen.

(qi stagnation in abdomen)

Back

Swelling of the neck when speaking.(lung qi deficiency affects kidney yang heat—heat-swelling) grows thick.(kidney yang heat where kidney—growth and neck,yang back,heat—thick)

Breasts

Nodosities in the skin of breasts with black points.(toxic phlegm heat or blood stagnation) Dwindling of Breasts. Breasts heavy, as if would fall.(phlegm or blood congestion)

Chest

Great weakness about chest.(chest qi deficiency) Tickling all over chest.(qi stagnation in the chest)

PAGE 850

Ears

Chronic deafness with adhesions in **the middle ear**.(phlegm stagnation

in ear,phlegm—chronic) **Eustachian deafness**.(phlegm stagnation) Eustachian catarrh.(damp heat)

Eyes

Pain in eyes.(liver fire) Pupil **dilated**. (liver fire or liver wind)Protruded.

(liver fire) Staring with wide open eyes,(liver fire) eyelids seem to be retracted. Constant motion of eyeballs.(liver wind) Convulsive movements(liver wind) and

quivering of the eyes **of lower eyelids**.

Acute dacryocystitis. Violent profuse lachrymation.(liver fire)

Face

Withered,(heart blood and qi deficiency) brownish, sallow or dusky, miserable look.

Coldness of face(blood deficiency) in fleshy children.(phlegm dominant) Facial paralysis after reduction of goiter.(phlegm stagnation in glands affect heart region here so face that means heart fire must have created goiter that is blood stagnation may become hard)

Female

Great weakness during menses.(Alum.,Carb-an.,Cocc.,Hematox.)(spleen weakness due to liver heat or fire) Menstruation irregular.(Liver Qi stagnation, Liver Blood stagnation, Spleen deficiency) Menses, brown, renewed after every stool. Uterine hemorrhage.

(spleen qi deficiency,blood stasis,blood or damp heat etc) Wedge-like pain from ovary to uterus.(blood stasis) Ovaritis. (Apis., Bell., Lach.) Wedge-like pain in the right ovarian region.(blood stagnation) Leucorrhea, acrid, eroding thighs and linen,(toxic damp heat)

worse during menses. (heat) Sterility from atrophy of ovaries and breasts. (Heat in the Lungs injuring Yin fluids, Invasion of Damp-Heat, Invasion of Cold-Dampness, Stomach and Spleen deficiency, Spleen and Heart collapse, Liver and Kidney deficiency, Blood stasis in the channels.)

Food

Ravenous hunger with great thirst. (liver fire attacks stomach) Only feels well while eating in any diseased condition. (stomach fire) Ravenous hunger, yet emaciates (stomach heat, spleen qi deficiency so poor blood formation and assimilation so

emaciation) or variable appetite with thirst. Gets anxious or worried if he does not eat. (stomach vacuity increase heart fire) Drinking cold milk better constipation. (dry heat constipation helped by damp cold)

Head

Reverberations in head. Throbbing, (cold or qi stagnation) rush of Blood (heart fire) and feeling of a tight band. (qi stagnation) Headaches of old people, (kidney yin deficiency vacuity heat headache) worse in warm air, fatigue, (spleen deficiency) walking fast, (spleen qi deficiency as waking involves muscles) riding in car. Brain as if stirred round with a spoon. (heart fire) Chronic, congestive headache of old people. (kidney yin deficiency vacuity heat pushes blood outside the vessels so blood congestion) (Phos.)

Heart

Violent heart action. (heart fire) Feels as if squeezed by an iron hand (severe blood stagnation) (Cact.) followed by great weakness (due to blood vacuity in further path of stagnated blood) and faintness. (blood vacuity) Tachycardia. Palpitations, worse least exertion. (liver blood vacuity fire attacks heart so palpitation, exertion consumes liver stored blood) Feeling of vibration or purring over heart. (heart fire) Tachycardia. Pulsation in large arterial trunks. (cold or qi stagnation) Myocarditis, painful compression around heart. (cold or qi stagnation)

Kidneys

Urination frequent and copious, (kidney qi vacuity cold urine) urine, dark, yellow-green, milky with variegated cuticle on its surface. (phlegm heat urine) Sediment like red pepper. (blood heat or stagnated blood sediment) Incontinence in old people with prostatic enlargement. (damp heat or blood stagnation enlargement due to which kidney yin vacuity heat incontinence) Milky white fluid runs from urethra after stool. (after stool there is impact on lung, large intestine or heart.)

Limbs

Joints inflamed and painful. (damp heat) Chronic arthritic affections, (**Heat patterns: A. Yin vacuity, internal heat, B. Damp heat internally exuberant, 2. Cold pattern, 3. Qi & blood dual vacuity**) damp heat internally exuberant) stiff and enlarged joints. (damp heat) Synovitis. (damp heat) Pain in bones at night. (it is not aggravation at night so no yin vacuity heat concept but it is positive cold at night at yin time so pain due to positive cold) Cold hands and feet. (spleen qi vacuity cold) Back of hands, brown, as if swollen, painful when turning hand, not when closing fingers. Gonorrhoeal rheumatism. (damp heat ganorrhoea and rheumatism) Rheumatism of nape and upper limbs. (wind heat at it involves upper portion so it is yang) Acrid sweat of feet. (kidney yin vacuity heat)

Pulsation in large arterial trunks. (cold or qi stagnation in heart vessels) Rheumatic pains, (wind cold) nightly pains in joints, (wind cold) constrictive sensations. (cold) White swellings. (cold stagnation) Edema of the feet. (Damp heat pouring downward, yang vacuity of spleen and kidneys, vacuity of the qi and blood, blood stasis from external injury) Painful corns. (phlegm cold or heat)

Liver

Jaundice, eyes, skin, nails yellow. (damp heat in liver channel and liver) Liver and spleen sore and enlarged. (damp heat stagnation)

Lungs

Raw and tickling feeling provoking a dry cough. (yin vacuity qi stagnant cough) Pain in Larynx. (vacuity heat pain) Laryngitis with painful roughness, worse during cough. (yin vacuity qi stagnation) Child grasps throat when coughing. Right-sided pneumonia with high temperature. (positive cold type pneumonia with heart fire) Difficult expansion of chest, (yin deficient so no flexibility) blood-streaked sputum internal dry heat, (yin vacuity) external coldness. (lung qi deficiency) Pneumonia. Hepatization spreads rapidly with persistent high temperature. (fire spreads rapidly so hepatization due to liver fire or heart fire with persistent (blood involved-heart) temperature—heart fire) absence of pain in spite of great involvement, worse warmth, craves cool air. Croup in scrofulous children with dark hair and eyes. (phlegm heat stagnation cough) (Brom. opposite.) Inspiration difficult. (phlegm heat stagnation) Dry, morning cough from tickling in larynx. (phlegm heat sticking with qi stagnation) Croupy cough with difficult respiration, wheezy. (phlegm heat obstruction) Cold extends downwards from head to throat and bronchials. (damp cold, damp has downward motion) Pleuritis effusion. (dampness heat) Iod. cough is worse indoors in warm, (lung yin vacuity heat) wet weather (damp obstructions) and when lying on back. (lung qi deficiency or protective yang less)

Male

Testicles swollen and indurated. (damp heat) Twisting in spermatic cord. (wind heat) Atrophy of testes with loss of sexual power. (damp heat atrophy with kidney qi deficiency) Sarcocoele. Hydrocele. (dampness accumulation)

Mouth

Offensive odor from mouth. (stomach damp heat, gaseous, constipation etc) Aphthae. Foul ulcers and salivation. (stomach damp heat ulcers) Gums loose and bleed easily. (stomach vacuity heat) Profuse fetid, soapy saliva. (stomach heat) Metallic taste. (stomach –lung combination) Tongue, hypertrophied, painful, nodular or fissured. (damp/phlegm with stomach yin vacuity heat) Tongue thickly coated. (heat)

PAGE 851

Nose

Red and swollen, much and sudden sneezing with dripping of hot water. (lung pathogenic wind heat with qi stagnation, pathogenic due to suddenness) Sneezing. Sudden violent influenza. (pathogenic wind heat) Dry coryza becomes fluent in open air. (qi stagnation coryza) A fluent hot coryza with general heat of skin. (wind heat pathogenic with lung heat) Pain at the root of the nose and frontal sinuses. (wind heat) Nose stopped up. (damp heat) Tendency to ulceration. (damp heat) Loss of smell. (lung heart communication problem or blockage by damp/phlegm/blood the nerve going to heart, or smell function that is lung qi not working properly) Acute nasal engorgement associated with high blood

pressure.(blood congestion in nose) Descending colds.(damp cold) Alae nasi as if spread wide apart.(wind heat)

Rectum

Stools, frothy, whey-like, fatty, cheesy or lenteric,(damp/phlegm type stools) pancreatic disorders. Chronic(damp/blood etc) morning(yang time) diarrhea(damp heat) of emaciated,(spleen/lung qi deficient) scrofulous children.(phlegm heat) Hemorrhage at every stool.(lung heat with lung qi deficiency) Diarrhea, whitish, frothy, fatty.(damp heat diarrhea) Constipation with ineffectual urging.(phlegm heat sticky so constipation and sticky so ineffectual urge) with better by drinking cold milk.(damp cold) Constipation alternating with diarrhea. (Ant-c.)(phlegm heat or damp heat in both)

Skin

Hot, dry, dirty, brown spots on.(toxic heat in skin) Yellow and withered.(blood and qi vacuity) Nodosities on skin.(phlegm cold or heat or blood stagnation) Anasarca of cardiac disease. Itching and itching pimples in old scars.(damp heat itching, heat-scar,damp--chronic) Scars break open.(heart fire forces heat patterns to open up) Glands enlarged.(damp heat/cold)

Sleep

Restlessness in blood, prevents sleep.(blood heat due to heart fire)

Stomach

Pulsation in the pit of the stomach.(cold or qi stagnation) Bitter taste to solid food,(heart –stomach fire) not drinks.(help in heart fire and stomach fire) Hiccough. Empty belchings.(qi stagnation) Throbbing at pit of stomach.(cold or qi stagnation) Empty belchings,as if every particle of food were turned into gas.(gas-qi and blood vacuity) Anxious and worried if he does not eat.(stomach yin vacuity affects heart and spleen) (Cina, Sulph.) Loses flesh, yet hungry and eating well. (Abrot.)(stomach yin vacuity heat but spleen qi deficient)

Temperature

Flushes of heat all over the body,(heart fire) heat waves to head(liver/stomach/heart fire). Marked fever,(heart fire) restlessness,(heart fire or blood heat) red cheeks,(heart fire or kidney yin vacuity heat) apathetic. Profuse sweat.(heart fire) Hyperpyrexia or external coldness with anxiety or stupor.(lung qi deficiency or poor blood circulation in exterior,and internal heart fire) Hectic fever.(heart fire) Sweats easily.(due to fire and lung qi deficiency) Early morning sweat better .(lung qi rises so sweat less)

Throat

Hoarse. Constriction, impeding deglutition.(phlegm heat in stomach) Burning and scraping in throat.(vacuity heat in stomach) Larynx feels constricted.(cold stagnation) Goiter, hard with sensation of constriction.(damp/phlegm cold stagnation) Uvula swollen. Submaxillary glands swollen.(damp cold congestion) Thyroid enlarged.(damp cold stagnation).

Vertigo

Vertigo, worse from stooping,(yin type vertigo that is vertigo from liver yin blood deficiency) worse in warm room.(liver vacuity heat)

Comments

Clarke had seen it given with excellent effect in the lower potencies, when swollen and deformed joints have been left behind after an attack of acute rheumatism. Scrofulous and

syphilitic indurations, effusions and tumors and especially goiter, are equally amenable to its resolvent action.

Emaciation of single parts. "Eats ravenously, yet emaciates," is a keynote. In this connection must be mentioned its power to set up a ravenous appetite. It seems as if the waste of tissue set up the desire for absorbing great qualities of food. Absence of appetite is also among the effects of Iod. and either condition may indicate it.

Clarke once used it with excellent effect in the case of a young woman who had a nervous shock and had lost all appetite and desire to live. She was much emaciated and had quietly made up her mind to starve herself to death.

Clarke gave five drops of Iod. 3x in a wineglass of water half an hour before meal-times and her appetite returned with such vigor she could not choose but eat and was soon restored to a normal mental and bodily state.

Iod. produces atrophy of nerve and brain tissue, as well as of other tissues and it also has a place in acute hydrocephalus and in pleuritic effusions. In tubercular disease of all kinds, it may be called for: tabes mesenterica, pulmonary tuberculosis. In rheumatism and heart disorders it has a large sphere.

Iod. is indicated by indurations or atrophy of testes, ovaries and uterus. The salivary glands and pancreas are especially affected by Iod. and a diarrhea of milky, whey-like stools often indicative of pancreatic diseases is especially amenable to its action.

In pneumonia and tubercular disorders with lung consolidation it is of great service.

PAGE 852

The chief indications are: Dyspnea, cough with blood-streaked expectoration, tickling all over chest, weakness and emaciation, worse of symptoms in a warm room. This last, "Worse by warmth," is a leading modality of Iod.

In defects of growth, curvature of bones and in children's ailments, it follows well upon Calc. In tuberculosis of rapidly-growing young people, thin and dark, it is especially indicated.

There are many marked symptoms in the heart sphere: palpitation from slightest cause, sensation as if being squeezed, hypertrophy. With the heart symptoms there is a "gone," exhausted feeling and the patient is scarcely able to breathe or walk.

C. S. McKay noticed lumbrici passed by an infant who had tasted Iodine accidentally and used the experience in another case, giving a dilute solution (one part of the tincture to three of water of this three drops every three hours) and produced the expulsion of lumbrici when Santonin had completely failed.

Weakness is marked in Iod. Nervousness, restlessness, twitching, subsultus tendinum and trembling. Also sense of trembling in inner parts. Facial paralysis and epilepsy have followed suppression of goiter by large doses of Iod. Weakness is excessive. Fainting on going upstairs.

Nash thinks Iod. one of the remedies affected by the moon's changes. In cases of goiter where it is indicated, he gives a powder of Iod. c. m. every night for four nights after the moon has passed the full.

Compare

- (1) Hep., Merc., Phos.
- (2) Abrot., Nat-m., Sanic., Tub.
- (3) Brom. has light hair and complexion, Iod. dark.
- (4) Bor. - carrion-like odor of ulcers.

Compare

(5) Chlorum, Nat-m. - ravenous appetite yet gets thing - Nat. m. especially about the neck.

(6) Kali-i. - talkative as if from alcohol.

(7) Bar-c. - tabes mesenterica, extreme hunger, emaciates, talkative, averse to strangers, Bar-c. suited to dwarfish persons, has not the intolerable crossness of Iod., which is worse than that of Ant-c.

(8) Alumina - apprehensive, fears.

(9) Apis - in joint effusions, sensitiveness, hydrocephalus.

(10) Cact. and Spig.

(11) Hydr. - uterine affections.

Relations

It antidotes: Merc. Follows well: Merc., Hep. (croup), Ars. Followed well by: Arg-n., Calc., Merc. Phos., Puls. Complementary: Lyc., Badiaga.

Boericke. Clarke. Phatak.

Iodoformium

(iodoform)

Pharmacy

Iodof. Iodoform. Trituration. Solution. Historical dose: Triturations, tincture and all potencies, second trituration. Three grains on the back of the tongue will relieve attack of asthmatic breathing.

History

Iodoform has been proved by Underwood and Haines. To the symptoms experienced by them have been added the recorded effects observed on patients treated with it in old-school practice. Many cases of fatal poisoning have occurred.

All the symptoms of acute meningitis have been produced in some instances and this fact has been turned to good account by homeopaths.

W. J. Martin cured two cases of tubercular meningitis with Iodoform 2x. He put 4 grains in half a tumbler of water and gave a teaspoonful every two hours.

One case was that of a child, fourteen months old and the symptoms were: sleeps much, moves mouth constantly as though chewing or sucking, bores head back and rolls it from side to side. Had been ill twelve days.

Violent convulsions followed, face distorted, eyes squinting, head retracted, neck and back stiffness.

Automatic movement of one arm and leg. The child was expected to die that night, but Iodoform was now given and improvement set in. Fever abated and in one week all symptoms had passed away. **Planets:** Mercury, Saturn.

PAGE 853

Homeopathic

Iodoform is a very useful remedy for tuberculous conditions especially tubercular meningitis. (Bacil.) Used for failing of sight due to retro-bulbar neuritis, central scotoma, partial atrophy of the optic disc. Sub-acute and chronic diarrhea of children.

Pupils dilated, contract unequally. Sleep interrupted by sighing and cries. Mesenteric glands enlarged. Chronic diarrhea, stools, greenish, watery, undigested with irritable temper, due to suspected tuberculosis. Cannot stand or walk with eyes closed.

Clinical

Breast, pains. Chancre. Cough. Delirium. Diplopia. Eczema. Enteric fever. Eye, disorders. Headaches. **Heart** disorders. Hydrocephalus. Locomotor ataxia. Mania. Meningitis. Paralysis. Tuberculosis.

Modalities

Better by uncovering. Worse at night, warmth touch, motion. Worse by touch, by riding in cars.

Symptoms

MIND

Apathetic, amnesia for recent events, nightly restlessness, did not recognize persons, weak-minded. Forgetful. Irritable. Excitement, melancholia, hallucinations of sight and hearing. Screams out, leaves her bed but falls down after walking a few steps. Talks nonsense. Sees everything double. Excessive talkativeness. Fear of death. Anguish. Bemoans her approaching death. Drowsiness developing into perfect coma. Delusions, dressing himself in strange costumes. Imagined he had the best tenor voice in the world and proceeded to hire a large concert hall.

Abdomen

Flatulent colic. Rumbling in abdomen. Scaphoid abdomen. Abdomen distended, mesenteric glands enlarged. Cutting in abdomen. Warmth in abdomen. Right inguinal region, sharp pain, cutting, with desire for stool, sore pain.

Back

Contraction of muscles of neck. Bruised sensation in nape. Spine sore, does not wish it touched. Pain along spine, along right side of dorsal vertebrae, in lumbar region, with weakness and straining. Sharp pain in angle of scapula.

Chest

Sore pain in apex of right lung. Feeling of a weight on chest. Pain in left breast like a hand grasping at the base of the heart.

Ears

Sticking in right ear, sticking, then fullness. Ears feeling dry and feverish, and full. Neuralgic pains in left ear. Dull hearing.

Eyes

Pupils, dilated, contract unequally, react poorly. **Eyes** bloodshot and painful. Vision double. Failing sight due to retro-bulbar neuritis, central scotoma-partial atrophy of optic disc. Sensitive to light.

Face

Pains in malar-bones, in zygomatic muscles, worse motion and bending forward. Drawing in malar-bones, with pressing. Stiffness of zygomatic muscles. Twitching of facial muscles. Aching in right lower jaw. Lips and throat dry, lips dry and stinging.

Head

Headache on waking. Sharp, neuralgic pain. Head feels heavy, as if it could not be lifted from the pillow. Meningitis. Itching of occiput. Stitching in temples. Frontal pain, worse from descending stairs.

Heart

Sticking through heart.

Kidneys

Urine very yellow, and smelling like saffron. Albumen and casts in urine.

Limbs

Legs weak, cannot stand and walk with eyes closed. Weakness of knees when going upstairs.

Lungs

Cough and wheezing on going to bed. Hemoptysis. Asthmatic breathing. Cough from the dryness of throat. Smothering sensation. Respiration irregular, deep inspirations alternating with apnea.

Mouth

Metallic taste. Sharp pain in upper teeth. Aching in teeth. Teeth feel sore and too long.

Rectum

Stool delayed, with feeling as if anus were drawn up into rectum. Cholera infantum. Chronic diarrhea, Stools greenish, watery, undigested. Diarrhea with suspected tuberculosis.

Skin

Red rash over loins, back of arms and elbows. Fine eruption of macules, papules and vesicles. Diffuse redness with edema. Horrible irritation all over body.

PAGE 854

Sleep

Restless sleep, full of dreams. Wakefulness. Confused dreams, of accidents. Sleepiness. Very drowsy. Sleep interrupted by sighing and cries. Jerks and shocks in nerves when trying to sleep.

Stomach

Nausea, at times.

Temperature

Susceptible to hot weather. Heat at night, keeps laying off covers. Temperature may be elevated to 104 degrees or more. Sweats easily from motion. Sweat on head.

Vertigo

Sudden giddiness. Confusion with nausea. Feeling as if he had been intoxicated. Vertigo on sitting up in bed.

Throat

Aphonic disturbance of voice. Stitching in right side of throat. Dryness of throat, with bitter taste, dryness with rawness on swallowing.

Comments

A boy of 10 had Iodoform thickly applied to a point in amputated limb at which the stitches did not hold well. On the third day he was sleepy after a restless night with frequent sighing. The dressing was renewed and on the same day, not having eaten anything since the day before, he had several attacks of vomiting, bilious and easy.

All these symptoms increased during the next few days. The child was constipated and seemed to suffer from his head. Nights very restless, sleep interrupted by sighing and cries like those of meningitis. Drowsiness during the day. Pupils unequally contracted, reacted slowly to light. He was perfectly indifferent and did not recognize those about him.

Later, nightly agitation was replaced by tranquil delirium. Pulse rapid and small. On the sixth day the dressing was changed, on the seventh day the symptoms began to abate and disappeared after the ninth.

Drowsiness is a marked feature. In cases of medicinal poisoning, the symptoms sometimes come speedily and sometimes only after a long period of medication.

The symptoms set in with a great suddenness and intensity. For instance, a woman, 26 who had taken 42 grains of Iodoform in eighty days, suddenly after a hot bath felt very dizzy and weak in the legs, felt unable to knit and diplopia set in. Symptoms of mania followed, weakness, staggering on closing the eyes. For twelve days she was unable to walk alone.

These symptoms having set in suddenly after a hot bath seems to show that the "Worse by heat and by damp" of Iod. is reproduced in Iodoform. Malaise, loss of strength and of appetite, occasional vomiting and the patient is weighed down with a sense of depression, moderate fever, rapid pulse, drowsiness, complete wasting.

The external use of it has set up eczema. In one case, that of a soldier who had Iodoform applied to his arm, a scarlatina-like rash appeared, spreading from arm over the body and ending in desquamation.

Scarlatina was actually diagnosed, but some doubt was raised and suspicion being thrown on the Iodoform, a piece of silver was placed in the mouth. Immediately a garlic taste was experienced showing the presence of Iodoform, which other tests confirmed. Iodoform imparts a garlic odor to silver.

Ipecacuanha

(ipecac-root)

Pharmacy

Ip. Ipecacuanha. Ipec root. Cephaelis ipecacuanha. N. O. Rubiaceae. Tincture and trituration of the dried root. Historical dose: Trituration, tincture and all potencies, Third to 200c potency.

Herbal

The well-known emetic effect of Ipecacuanha Wine gives a rough keynote for the use of Ip. in homeopathy. Wherever ailments are associated with the presence of constant nausea (nausea is due to qi stagnation but constant nausea is blood stagnation too) Ip. is very likely to be of help.

PAGE 855

Mixed with oil, powdered Ip. has been used to vesicate the skin and, diluted, the tincture is used for the bites of insects, bee. and wasp-stings. Ipecacuanha produces violent irritation of the skin(**lung qi irritation**) and between the acts of vomiting an uncontrollable desire to scratch is often felt in those under the influence of material doses.

The special form of nausea is a constant but desire to vomit or immediately after vomiting there is instead of relief, a desire to vomit again.(**qi and blood stagnation**) With this there is a clean or not very dirty tongue. There is profuse salivation(**stomach/kidney qi deficient or stomach heat**) with the nausea. The nausea of Ip. is often met with in disorders of the stomach and bowels of the respiratory organs and in fevers.

In the stomach itself, there is a symptom which is very characteristic of the remedy, a feeling "as if the stomach were hanging down relaxed.(**spleen qi deficient so prolapse muscles**)" There is disgust at the stomach for food,(**stomach qi stagnant**) empty vomiting, (**stomach qi stagnant**) vomiting of bile of blood.(**stomach blood stagnation**) No better by vomiting.(**qi stagnation**)

Homeopathic

The principal feature of Ipecacuanha is its persistent nausea and vomiting, which form the chief guiding symptoms. Morphine or heroin addiction. (Aven.) Ipecacuanha acts chiefly on the pneumo-gastric nerve, producing a gastro-intestinal disturbances and respiratory disorders with continuous nausea.

Indicated after indigestible food, raisins, cakes, etc.(**indigestible food blocks qi**) Especially indicated in fat children and adults,(**phlegm dominated**) who are feeble and catch cold in relaxing atmosphere, warm, moist weather.(**damp heat affection**)

Spasmodic disorders. Hemorrhages bright-red and profuse.(**qi deficiency hemorrhages with arterial blood and blood vessels also may contain qi that is spleen qi**) Discharges are foamy(**wind damp**) and profuse.(**qi deficiency**). Bright red, gushing hemorrhages with nausea.(**stomach qi stagnation produce hemorrhages in various places**)

Nausea and shortness of breath usually accompany most of the complaints.(**shortness of breath due to stomach qi stagnation**) Convulsions infantile, body rigid, stretched out, followed by spasmodic jerking of arms towards each other.

Awkward, stumbles against everything. Tetanic spasms from swallowing tobacco. (**tobacco irritates stomach and heart qi**) Convulsions in whooping cough from suppressed exanthema from indigestible food. Over-sensitive to heat and cold. Opisthotonos and emprostotonos.

Clinical

Anemia. Asthma. Bronchitis. Catarrh. Cholera. Convulsions. Coughs. Deafness.

Diarrhea. Dysentery. Enteric fever. **Eyes**, disorders. Gallstone colic. Gastric ulcer. Hematemesis. Hemorrhage. Hemorrhoids. Hysteria. Intermittent fever. Menstruation disorders. Miscarriage. Nausea. Opium habit. Pregnancy disorders. Remittent fever. Salivation. Tetanus. Toothache. Tuberculosis. Vomiting. Whooping cough. Worm-fever. Yellow-fever.

Causations

Ill effects of vexation, reserved displeasure.(**continuous qi irritation inside so continuous nausea**) Injuries, loss of blood,(**continuous vacuity of blood till blood gets restored till**)

then nausea) suppressed eruptions. Morphine, opium and heroin addictions. Quinine. Indigestible food, rich food, pork, pastry, fruits, candy, ice cream.

Constitutions

It is specially suited to: stout persons of lax tissue to fair people to women and children to emphysematous persons to persons who have a history of nosebleed (**blood vacuity**) or other blood-loss. (**blood vacuity**) It is indicated in fat children and adults who are feeble and catch cold in warm moist weather. **Planets**: Moon.

Modalities

Better from open air, (**lung qi stagnation**) rest, (**qi deficiency**) pressure, (**qi deficiency**) closing eyes, (**liver yin or qi deficiency**) cold drinks. (**problems may be due to damp heat**) . Worse overeating, ices, pork, veal, mixed or rich foods, candy, fruits, raisins, salads, lemon peel, berries. (**stomach food indigestion**) Worse periodically, (**liver-stomach involved**) heat and cold, vomiting, (**qi/blood stagnation so after vomiting also there is no change or worse**) motion, (**spleen qi deficiency**) lying down. Worse from warmth, damp of room. (**damp heat**) Worse in winter and dry weather. (**pathogenic dry cold problem**) Worse in warm, moist wind (**catarrh, asthma**). (**wind damp heat problem**) Chill is worse in warm room, by external heat. Summer heat or hot room causes fainting. (**pathogenic heat disturb stomach and heart so fainting**) has effect Worse from abuse of drugs, morphine. (**liver heat problem**) Worse by motion.

Symptoms

MIND

Full of desires, (**heart yang irritated by desires**) they know not for what. ("so desires comes from irritable qi and not from outside) Irritable, holds everything in contempt. (**heart fire**) Cries, screams, howls and is hard to please, especially children. (**heart fire**) Sadness. (**lung qi deficiency**) Faints suddenly in summer or hot room. Mental depression. (**heart qi depressed**)

PAGE 856

Abdomen

Cutting, clutching, worse around the navel. Body rigid, stretched out stiff. Gripping, drawing or cutting pain about the navel, worse motion, better by repose, extending towards the uterus.

Back

Tetanic spasms of back which bends the back backwards or forwards. Shooting from kidney region into thighs. Cramps between scapulae during motion.

Chest

Constant constriction in chest and larynx, worse least motion. Chest seems full of phlegm, but does not yield to coughing.

Ears

Cannot endure the least noise. Coldness and chilliness of the ears, during the fever.

Eyes

Inflamed, red, conjunctivitis. Pain through eyeballs. **Profuse gushing lachrymation** with nausea. Shooting pains through the eyeball. Nausea from looking on moving objects. Cornea dim. **Eyes** tire from near vision. Vision is constantly changing. Spasm

of accommodation from irritable weakness of the ciliary muscle. Nausea from looking on moving objects.

Face

Pale, blue about the eyes or lips, white linea nasalis. Periodical orbital neuralgias with some lachrymation, photophobia and smarting eyelids. Convulsive startings of the muscles of the face. Lips covered with small aphthae and eruptions. Rash in the face. Pityriasis. Redness of the skin around the mouth.

Female

Uterine hemorrhages, profuse, bright, steady flow or gushing with nausea and gasping with each gush of blood. Vomiting during pregnancy.

Pain from navel to uterus. Cutting pain in uterus from left to right. Menses too early and too profuse. Prolapse of uterus worse during menses. Hemorrhage of placenta praevia. Great weakness with scanty menses.

Food

Aversion to all Food. Thirstless. Desire for dainties, sweets. The stomach disordered may be occasioned by rich food, pork, pastry, fruits, candy, ice cream. Cold water worsens spasmodic cough. Cold drinks or ice-cream causes colic.

Head

Migraines Headaches with nausea and vomiting. Bones of skull feel crushed or bruised. Pain extends to teeth and root of tongue. Pain in occiput, worse vomiting during chill. Cold sweat on forehead. Pain, as of a bruise, in all bones of the head. As if brain compressed. Painful pressure on the forehead. Pain in the occiput and the neck. Hydrocephaloid.

Kidneys

Unsuccessful urging to urinate. Hematuria with nausea and cutting in abdomen and urethra with oppression in chest and short breath. Shooting from kidney, down the thighs to the knees.

Limbs

Body stretched stiff, followed by spasmodic jerking of arms towards each other. Coldness of one hand, other is hot. Femur as if dislocated on sitting down. Pains as if bruised in all the bones.

Lungs

Dyspnea, constant constriction in Chest. Yearly attacks of difficult shortness of breathing. Suffocative attacks from foreign substance in wind pipe. Gasps for breath. Asthma. Cough incessant and violent with every breath. Continued sneezing, coryza, wheezing cough. Bubbling rales. Loose, coarse rattle in Chest without expectoration. Broncho-pneumonia. Suffocative cough, child becomes stiff and blue in the face. Whooping cough with nosebleed and from mouth. Bleeding from lungs with nausea, feeling of constriction, rattling cough. Croup. Hemoptysis from slightest exertion. (Mill.)

Mouth

Child thrusts its fists into the mouth and screams. Tongue clean, not coated. Red pointed tongue. Saliva increased. Toothache with a jerk radiating to temples, better while eating. Tongue, clean, yellow or white, pale. Taste, bitter, sweetish, bloody.

Nose

Nosebleed, bright red blood. Coryza with stoppage of nose and nausea. Sneezing. Loss of Smell

Rectum

amoeboid dysentery with tenesmus, while straining. Dysentery with head hot and cold legs. Pain so great that it nauseates. Stools, brown, grass or yellow green, frothy, molasses-like or bloody, slimy. Pitch-like, green as grass like frothy molasses with griping at navel. Lumps of mucous in stools.

Skin

Pale, lax. Blue around eyes. Miliary rash. Itching with nausea, scratches until he vomits. During the nausea the patient is forced to scratch himself, until relieved by vomiting. Rash in lying-in women. Suppressed rash.

Sleep

Eyes half open during sleep with moaning and groaning. Shocks in all limbs on going to sleep. (Ign.) Loss of sleep which causes nausea and fatigue. Sleeplessness. Agitated sleep with groans. Frightful dreams, with frequent starts and terror during sleep.

Stomach

Horrid indescribable pain and sick feeling in the stomach. Constant nausea and vomiting with pale, twitching of face. Stomach feels relaxed, as if hanging down. Nausea not better by vomiting. Nausea, copious salivation, violent itching in the skin and empty risings. Vomits, blood, bile, food, mucous, worse stooping. Vomiting of infants at the breast. Vomiting during pregnancy. Hiccoughs. Retching, especially after drinking anything cold or after smoking. Vomiting of black matter like pitch.

Temperature

Intermittent fever, irregular cases after quinine. Suppressed of mixed intermittents, nausea in all stages. Short chill with long heat. Chill alternating with heat. Heat without thirst.

Relapses with improper diet. Catarrhal or gastric fevers. Hands and feet drip cold sweat. Infantile remittent fever.

Throat

Hoarseness, especially at end of a cold. Complete aphonia. Spasms of vocal cords. Sore throat, as from swelling of the pharynx. Difficult swallowing, as from paralysis of the tongue and of the gullet. Spasmodic contractive sensation in the throat. Fauces, stinging, rough, sore, and dry.

Vertigo

Vertigo when walking, and when turning round, with tottering and staggering.

Comments

The stomachic disgust of the remedy is depicted on the countenance, which expresses nausea. The corners of the mouth are drawn down. Blue rings round the eyes. (kidney qi deficiency) Sometimes the mental state corresponds: "Moroseness and contempt for everything," "Disdainful humor". The irritability of the elders becomes in children crying and screaming.

J. R. Haynes uses **Ip. as antidote to the Opium and Morphine habit**. He gives five drops of Ip. tincture for every grain of Morphine or its equivalent in Heroin, Opium, which the patient has been accustomed to take. When a definite sequence is observed in the order of occurrence of symptoms this is of great practical importance.

Jahr recommended that in all cases of intermittents in which no other remedy is particularly indicated Ip. should be given to begin with. It will either cure the case or bring out more definitely indications for another remedy.

Clarke has frequently found this advice useful and it occurs to me that as most intermittents have been treated with quinine it is thought its antidotal properties that Ip. exerts some of its good effects. It has a strongly marked periodic action.

A special indication for it is: Nausea through all the stages. Other indications are "Stages completely mixed up, short chill, followed by long fever."

Ip. has many bone pains in the head and elsewhere. (blood stagnation pain in bones)
Pains as if bones were all torn to pieces. (blood stagnation and heat)

PAGE 858

Ip. is given as an expectorant in old-school practice and is supposed to act by its nauseating doses are neither necessary nor desirable. The cough of Ip. is dry, spasmodic, constricted, asthmatic. (pathogenic dry cold spasmodic cough) Violent degree of Dyspnea with wheezing (phlegm stagnation) and great weight and anxiety about the precordia.

Threatened suffocation from accumulation of mucus. (phlegm stagnation suffocation)

In whooping cough (phlegm stagnation) a characteristic is the spasmodic rigidity (due to blood stasis and phlegm stagnation) of the patient. "Child loses breath. (phlegm stagnation) turns pale, stiff and blue. (blood vacuity or blood stagnation) strangling with gagging and vomiting of mucus, bleeding from nose or mouth. (blood acuity)"

Guernsey thus describes the effect of Ip. in the female sexual sphere in which the hemorrhagic power of the remedy is of the highest importance:

"Threatened miscarriage often with a sharp pain (blood stagnation) around the umbilicus, which runs downward to the uterus with constant nausea and discharge of blood (blood vacuity) before the proper period, metrorrhagia often after confinement, which is heralded by a low pulse, nausea, etc., there is a steady flow of bright red blood, (steady flow— blood stagnation) which may soak through the bed to the floor or may run over the foot of the bed."

Where there is this steady flow of bright red blood give Ip., run from above down, some from left to right, cutting pain in abdomen. (blood stagnation in abdomen)

There is a remarkable headache "as if bruised, (kidney blood stagnation that is bone marrow gets affected) all through the bones of the head and down into the root of the tongue." (blood stagnation –bone marrows) Nausea is generally an accompaniment. Brain feels bruised, pain piercing (blood stagnation) to roots of teeth. There is also a sick headache originating in the stomach, (sick headache means continuous headache—blood stagnation in stomach) the nausea preceding the headache and persisting all through.

Another sphere in which Ip. has shown great curative power is the eye. According to Allen granulations of the lids (stomach blood stagnation so granulation in eye lids) have been cured by the instillation of the dilutions.

Also sub-acute inflammation of the cornea with intense pain and great photophobia. (inflammation due to wind heat that is liver yang excess with liver blood vacuity)

Pustular conjunctivitis, (damp heat in liver channel) especially in children. Inflammation with tearing pain (blood stagnation) and gushing of tears. (liver wind heat) Violent neuralgia (violent means blood stasis in nerves) of eyeballs, shooting (wind heat) in the head with gushes of tears, nausea, etc.

Dr. Nancy T. Williams has cured several cases of gall-stone colic (phlegm heat stagnation) with Ip. 6c. The relief was prompt and lasting. On the strength of this symptom of Hahnemann's "external chilliness with internal heat, (lung qi deficiency and external pathogen goes into deep and heat increase or internal heat due to yin vacuity as if internal yang excess then heat will go on surface)"

Cooper cured an immense uterine fibroid where persistent painful irritation of the skin (blood stasis and qi stagnation) with constant retching and vomiting, made worse irritation of the skin with constant retching and vomiting, made worse by eating, (eating further stagnate blood and qi in stomach so stomach stagnation has something to do with uterine fibroid) constituted the prominent symptom.

Frightful irritation inside and out, especially vaginal with thick leucorrhea (stomach phlegm heat stasis may create thick leucorrhea with constant irritation due to phlegm) and a feeling of desperation, yields to Ip.

Ip. has been used locally and internally for malignant pustule and anthrax in which disease Dr. Edwin Musckett considers it specific. In certain forms of peripheral neuritis it deserves more consideration than has hitherto been allotted to it (Cooper).

Ip. has much of the sensitiveness of Chin. There is better by touch. (due to blood vacuity) Oversensitiveness to heat and cold (blood vacuity may be) Ip. according to Hahnemann is a short-acting medicine.

Ipomoea purpurea

(morning glory)

Pharmacy

Ipom. Ipomoea purpurea. Convolvulus Duartinus. Morning Glory. Bind-weed. Convolvulaceae, family. The mother tincture is prepared from the dried bark. Historical dose: Tincture and all potencies, 1x to 30c.

PAGE 859

History

Ipomoea in allopathic medicine is used solely as a drastic purgative. Not one homeopathic treatise mentions the turpeth as remedies for constipation. Castro carried out a proving in 1940, using the potencies 1x, 2x, 3x, at the rate of 1-200 drops per day in progressive doses.

Homeopathic

Ipom. has fever, agitation and mental confusion. Insomnia and delirious dreams. Bilious vomiting. Predominance of irritation of the brain. Neuromuscular and arthritic pains. Pain in left lumbar muscles on stooping.

Aching in top of right shoulder kidney colic, aching in small of back and limbs. Kidney disorders with pain in back. Delirium with hallucinations, excitability, mumbling. Much abdominal flatulence.

Clinical

Backache. Delirium. Fever. Flatulence. Insomnia. Kidney colic. Kidney, disorders. Worms.

Constitutions

The remedy is especially suited to neuro-bilious, hypersensitive types, prone to epileptiform fits. The remedy is useful for phospho-fluoric types, syphilitic. **Planets:** Venus.

Modalities

Better from lying down. Worse in the morning. Worse at night. Worse from fatty foods.

Symptoms

MIND

Desire for solitude. Sadness, tears, hypersensitive to noise. Intense anxiety with palpitations. Loss of memory and prostration. Epilepsy. Catatonia. Delirious dreams. Nocturnal terror in children, especially in the worm-ridden.

Abdomen

Abdomen distended, sensation of heat in the epigastrium before passing stools. Cholecystitis. Biliary sycosis syndrome.

Back

Heaviness of the back and neck, aggravated at night, on going to bed. Lumbar aching.

Chest

Thoracic spasms. Feeling of laryngeal and pectoral constriction.

Ears

Buzzing. Pupils dilated.

Food

Anorexia, aversion to fatty foods, meat and milk. Worse from fatty foods.

Head

Headache with a unilateral perspiration.

Heart

Palpitations with anxiety and hysterical spasms. Pulse accelerated with extra systole.

Kidneys

Left kidney pains with nausea. Kidney pain spreading towards the left ureter. Kidney colic, predominantly on the left side.

Limbs

Limbs cold, sweating. Limbs heavy. Joints painful. Pain in the left lumbar muscles on bending down. Muscular spasms with fatigue.

Lungs

Irregular breathing.

Mouth

Mouth discolored, feeling of swallowing his tongue. Bad taste in the mouth.

Rectum

Rectal tenesmus. Stools soft orange-yellow in color.

Skin

Skin discolored, yellow, dry, despite cold sweating. Viral jaundice.

Sleep

Nocturnal aggravation, forcing him to get up.

Stomach

Acrid dyspepsia. Hiccoughs, thirsty for cold water. Yellow-green vomiting.

Temperature

General fever with total insomnia, cold sweats and contracture of the jaw muscles.

Throat

Throat dry, constant need to swallow, swallowing difficult.

Vertigo

Vertigo with nausea, ameliorated by lying down.

Compare

(1) Cresol.

(2) Stram. - hallucinations, delirium with talkativeness.

(3) Hyos. - delirium, strips himself.

(4) Agar. - muscular jerks in the lower limbs.

PAGE 860

Iridium metallicum

(the metal)

Pharmacy

Irid. Iridium metallicum. The metal. Trituration. Historical dose: Trituration and all potencies, sixth and higher.

History

Iridium is a rare metal of the Platinum group found in platinum ore. It is one of the heaviest substances known.

It shares with Osmium, Palladium and Platinum a place in the treatment of rheumatism and gout. Laboucher gave Irid. in the 4c potency, Pall. in the 3c, Plat. in 2c and Osm. in the 1c. Laboucher says Irid. is superior to Palladium, Platinum and to Osm. in uterine tumors. **Planets:** Saturn, Moon.

Homeopathic

Iridium has alot of intestinal putrefaction and septicemia. Anemia increases red corpuscles. Epilepsy, lupus. Rheumatism and gout. Uterine tumors. Spinal paresis. Exhaustion after disease. Nephritis of pregnancy. Children who are puny, weak-limbs and grow too fast.

Clinical

Anemia. Axilla, abscess. Bronchitis, chronic, Cramps, Gout. Hemiplegia. Neuralgias. Numbness. Rheumatism. Spinal paresis.

Symptoms

MIND

Facilitates mental labor. Weariness in back and limbs followed by favorable reaction, feeling of self confidence. Difficult concentration of thought. Sensation as if mind were void. Thought confused.

Back

Weakness in the kidney region. Spinal paresis, especially for the aged and after disease.

Breasts

Piercing, gnawing pains in breasts.

Ears

Feeling of numbness in ears and throughout the body lasting but a short time.

Eyes

Feeling as if eyes were being affected from below upward.

Face

Pain in the left malar bone, a kind of stinging. Pain is also felt in right malar bone like a pressure.

Female

Swelling of ovaries without dropsy. Corroding and suppurating ulcers of uterus, bluish patches on uterus. Uterine tumors with suppuration.

Head

Right side of scalp sensitive. Pains in middle of occipital bone. "Wooden" feeling in right side of head. Neuralgia of head especially temples, drives one crazy. Open air and noise seem to bruise the head.

Limbs

Neuralgia of the limbs. Pressing in groin and left thigh. Tension in both thighs, especially left. Dislocated feeling in left hip-joint and dull pain toward left gluteal region.

Lungs

Hoarse cough, worse talking, posterior sinuses feel raw inflamed, profuse, thick, yellowish discharge. Chronic laryngeal catarrh.

Mouth

Increased saliva with sensation in malar bones, which is more perceptible on left side.

Stomach

Cramps in stomach.

Nose

Profuse, watery coryza, better indoors. Ozaena.

Comments

A. J. Tafel took 20 grains of the 3c trituration. He experience a number of symptoms, all within two hours of taking the dose. Prominent among them were: A sensation of numbness in ears and throughout the body. A feeling as if they eyes were being affected

from below upward. A feeling as of a triangle in face, the based formed by the two malar bones, the apex in the vertex.

The numbness and the cramp-like contractions in the right calf, show a resemblance to the action of Plat. Irid. needs and deserves a fuller proving. The majority of symptoms appeared on the left side.

Laboucher says it is "admirable in all cases of anemia," is better than China for the aged and persons exhausted by disease, for puny, weak-limbed children and those who grow too fast. He mentions a particular alternation of symptoms or reaction. Painful weakness of lower limbs and kidney region.

PAGE 861

Followed by a favorable reaction, self confidence and facilitated mental labor.

Iris-t. Iris tenax. Iris minor. N. O. Iridaceae, Tincture of the lower or bulbous stems. Tincture of the whole plant. Historical dose: Tincture and all potencies.

Herbal

The herb Iris tenax "grows very luxuriantly in the clay ground and on the hillsides of Oregon." The tissue of the plant is so strong that it is used by Indians for making cord and weaving into bags, etc.

Dr. George Wigg of Portland, Oregon proved Iris tenax in the later part of 1885. He published the proving under the name of Iris minor. This, as Heath has shown is a local name only, its true botanical name being Iris tenax. **Planets:** Moon.

Homeopathic

Iris tenax resembles Iris-ver. in producing bilious vomiting, burning sensations and low spirits. Dry mouth, deathly sensation at point of stomach, pain in ileo-cecal region, appendicitis. Pains from adhesions after. Mental gloom and homesick feeling.

The symptoms which Dr. Wigg considers most remarkable are: (1) Absence of saliva with dry mouth.

- (2) Gloomy, cast-down, home sick feeling.
- (3) Burning in eyes without tears.
- (4) Pain in one tooth only.
- (5) Itching and burning of scalp without eruption.
- (6) Chill at 2 p.m.
- (7) Painful spot in ileo-cecal region.

Clinical

Appendicitis. Fever. Headache. Homesickness. Intermittents. Mania. Peri-typhlitis. Sleeplessness. Stomatitis. Vomiting. Xerostoma.

Modalities

Sweet oil and camphor ameliorates burning in mouth and throat. Worse by sucking in cold air, (burning in mouth and throat). Hot applications aggravates pain in bowels. Cup of tea aggravates vomiting. Many symptoms appear or are worse on waking.

Comments

Dr. Wigg (age 44) took 5 drops to 1x of the strong tincture. A female prover took repeated doses of Ir-t. 2x and 3x. The order in which the symptoms occurred in Dr. Wigg's case is roughly as follows:

In the fifteen minutes burning in mouth and throat. This passed off in the night, but was intensified by each fresh dose. After the second dose, taken early next morning, the burning was reproduced, followed by dry mouth and absence of saliva in two hours.

Then came the mental gloom and homesick feeling increasing towards midnight, headache in temples toothache, sinking, all gone feeling, itching and burning of scalp, abdominal pains, diarrhea, desperate exhaustion compelling him to keep in bed, hard chill followed by rise of temperature.

The acute pains in the bowels passed off in the night, but for fourteen days there was a tender spot over the ileo-cecal region and the bowels did not act normally for ten days.

In the female prover it produced a strange sensation in her mind: she thought some of her friends had died, the next day she was unusually cheerful. The most remarkable symptoms were, no doubt, the "fearful pain in the ileo-cecal region and the hard chill at 2 p.m. " These indications led to the cure in the two following cases:

(1) Miss A., school teacher, had for several years a pain beginning in right eye, extending thence to right half of head. When the pain was most severe she vomited a quantity of green bile. When she did not vomit she had nausea and chill between 2 and 3 p.m.

The pain passed off in sleep at night. It always began on Saturday, before rising. Ir-t. 30x every six hours commencing on Friday morning, was given and quickly cured after Ir-v., Aloe, Cimic. and Kali-bi. had failed to give much relief. The relief from Ir-t. was so marked the patient thought she had received morphine.

(2) Mr. E. after walking thirty miles over a mountainous country in August, while in a state of perspiration drank a large quantity of buttermilk. Four hours after he was taken with fearful pain in ileo-cecal region.

PAGE 863

This caused a deathly sensation at epigastrium. Finally he vomited much dark green bile without relief.

An old school doctor was called in and diagnosed obstruction with probable death in four days. He lingered three weeks and was brought home to Portland where Dr. Wigg saw him and diagnosed typhilitis, badly treated. Pressure on the ileo-cecal region caused death like sensation at stomach pit. Pain continued until he vomited a cupful of dark green bile. Somewhat constipated.

Under Iris-t. 15x every three hours he commenced to improve at once and in two weeks was back at his business. Dr. Wigg notice the all-gone feeling particularly on standing up, on walking in the morning. Cold water did not improve burning in mouth and throat.

Cold pillow improved pain in temples.

Iris versicolor

(blue flag)

Pharmacy

Iris. Iris versicolor. Blue flag. Iris hexona. N. O. Iridaceae. Tincture of fresh root collected in early spring or autumn. Trituration of the resinoid. Irin or Irisin. Historical dose: Trituration, tincture and all potencies.

Herbal

Iris versicolor is also one of our best remedies for sick headache. (blood stagnation in stomach) These headaches seem to be of gastric or hepatic origin and often begin with a blur before eyes. (liver damp/phlegm fire) It seems to act most powerfully upon the digestive tract.

Iris is another remedy which causes great nausea and vomiting. (qi stagnation stomach) It is sometimes very serviceable in cholera infantum. The substance vomited is generally very sour, so sour that the throat excoriates the throat. (heat) **Planets:** Jupiter.

Homeopathic

Iris versicolor acts powerfully on gastro-intestinal mucous membranes, on salivary glands, The thyroid, pancreas, salivary intestinal glands and gastro-intestinal mucous membrane, are especially affected. Increases the flow of bile. Migraine Headaches(liver channel pglegm heat) and cholera morbus are a special therapeutic field for its action.

Burning of mouth tongue, throat, clear down into stomach and of anus if there is diarrhea. (stomach blood and qi stagnation with liver phlegm heat attacking stomach) Vomiting of stringy, glairy, ropy mucus, hangs in strings down to receptacle on the floor. Vomiting sour or bitter substances. (phlegm heat in stomach attacked by liver and heart heat) Gastric or hepatic sick headaches with blur before the eyes at the beginning.

Liver and pancreas affected, producing profuse secretions, which are sour, acrid and burning. (stomach phlegm and heat both produce profuse secretion) Oily nose, greasy taste and fatty stools are other characteristics. (phlegm/dampness stagnation) Promotes the flow of bile. Symptoms set in suddenly, with a rapid elimination. (excess condition due to suddenness) Cholera morbus and sick headaches.

Clinical

Colic. Headaches. Indigestion. Migraine. Rheumatism. Vomiting.

Modalities

Better from gentle, continued motion. (blood stasis) Worse in evening and at night after midnight, (yin problem) from rest. (excess condition) Worse periodically, (liver involved) weekly, 2-3 a.m., spring and autumn, mental exhaustion, (heart yin deficient which increases heart yang overactive) hot weather.

Symptoms

MIND

Low-spirited. (heart yin deficient) Fear of approaching illness. Dullness of mental faculties. (phlegm/dampness in upper burner) Much mental depression. (heart yang depressed vreating depressed internal heat) Despondency. (lung) Nervous fretfulness. (heart related) Vexed, irritable mood, disposed to find fault. (heart/liver problem) Ill humor. (heart) Inability to fix the mind on any subject. (heart yang floating) Dullness of the head. (phlegm/dampness) Weakness of memory. (heart kidney or hear spleen or heart alone problem)

Abdomen

Cutting pain.(blood stagnation) Flatulent colic.(qi and blood stagnation) Colicky pain before each spell of vomiting and purging. Awful burning in region of pancreas.(heat excess) Colic better by bending forward,(blood stagnation or phlegm heat colic) better by discharge of flatulence.(qi and blood stagnation) Sharp griping pains (blood stagnation)in the bowels. Pain in the abdomen better by discharge of flatus.

Back

Stiffness in the back increasing on sitting down.(phlegm heat stagnation on the back as sitting down increases phlegm or dampness)

Chest

Rheumatism in muscles of chest along with acid indigestion.

PAGE 864

Ears

Roaring, buzzing, Ringing in ears with deafness.(liver wind heat or yang rising and deafness may also be due to phlegm stagnation in liver channel or blood stagnation/qi stagnation in nerve from ear to heart) Aural vertigo with intense noises in ears.(liver channel wind heat or blood stagnation)

Eyes

Sunken.(liver yin /blood deficient so sunken) Violent supra-orbital pains.(blood stagnation in orbits) Periodic visual disturbances,(liver involved) blindness,(liver channel phlegm stagnation) **hemioopia, with headache.** Redness of conjunctiva.(liver heat or blood stagnation) Burning in internal canthus.(canthus-heart so burning means heart heat)

Inflammation of eyelids, from cold.(cold stagnation,blood congealation inflammation)

Face

General appearance of anguish.(heart qi irritation) Neuralgia after breakfast,(after breakfast phlegm/food stagnation in stomach increases so blood and qi stagnation die to being indigested so heart nerves gets affected) beginning in infra-orbital nerve and involving whole face.

Female

Neuralgia and rheumatism of uterus.(stomach phlegm or qi/blood stagnation produce neuralgia and rheumatism due to qi/blood stagnation) Menses regular but excessive.(phlegm stagnation in stomach—menses profuse due to phlegm) Leucorrhoea.(phlegm) Morning sickness of pregnancy,(kidney qi deficient with phlegm heat stagnation in stomach) vomits sour or bitter, with protracted nausea, profuse ropy saliva, tenderness over stomach.(phlegm heat stagnation with qi)

Food

Loss of appetite.(phlegm stagnation in stomach) Bitter, putrid taste.(heart/kidney taste in stomach) Nausea and empty belchings.(qi stagnation)

Head

Frontal headache with nausea.(stomach qi stagnation) Headache begin with blurring of vision.(blurring of vision—phlegm stagnation in stomach) Sick headaches with diarrhea.(phlegm stagnation in stomach so sick headache as it is continuous (blood or phlegm) and diarrhea due to phlegm heat of stomach) Sick Headaches, worse rest,(excess condition) begins with a blur before eyes after relaxing from a mental strain.(spleen strain or qi action helps clear damp stagnation) Right temples especially affected.(yin side so stomach damp stagnation headache) Shooting in temples with contractive feeling of the scalp.(scalp-phlegm,shooting—wind,contractive cold so wind damp cold) Tired headache

with mental exhaustion (studying, sewing)(spleen qi vacuity-mental) worse coughing,(qi stagnation) cold air,(wind cold) better gentle motion.(blood stagnation or deficiency)
Scalp feels constricted. Pustular eruption on scalp.(phlegm heat)

Kidneys

Profuse, clear urine with headache.(kidney qi deficiency urine and headache) Burning along the length of urethra after urination.(after urination—qi deficiency kidney,liver heat in liver channel) Diabetes.

Limbs

Shifting pains.(wind or qi stagnation) Shooting laming pains along limb.(wind pain) Sciatica, as if left hip-joint were wrenched.(wrenching pain—cold stagnation so yang side it is spleen qi vacuity cold pain) Pain extends to popliteal space. Gonorrheal rheumatism (use Irisin).(toxic phlegm heat gannorhea and rheumatism)

Liver

Liver sore.(heat stagnation) Pain in the region of the liver, worse from motion.(heat stagnation)

Mouth

Feels greasy, burnt or scalded.(damp heat stomach,scalding—heat stagnation) Tongue burns or feels cold.(damp heat so when damp excess then cold and when heat excess then burn) Greasy or sweetish taste.(sweet—stomach,greasy—phlegm) Profuse ropy saliva, drops when talking.(stomach phlegm heat,heat—profuse) Tongue feel scalded.(heat stagnation) Slight toothache in a warm room.(slight pain –due to damp or qi stagnation so damp heat in stomach)

Nose

Oily.(phlegm) Constant sneezing.(phlegm--constant sneezing)

Rectum

Stools, bilious, acrid, watery, burn like fire.(stomach damp heat stools) Painless(dampness) cholera morbus. Periodical night diarrhea with pain and green discharges.(stomach phlegm heat with liver-green,periodical attacking stomach,green-heat too) Constipation.(stomach excess heat constipation) Urging to stools with headache, facial neuralgia and pain in teeth.(stomach phlegm heat stagnation so facial nerve blocked by phlegm and teeth pain due to heat) Stools, fatty.(phlegm excess stools) Anus feels sore as if sharp points sticking in it.(phlegm heat sticking)

Skin

Pustular eruptions.(phlegm heat,pustules—phlegm,eruption--heat) Herpes zoster and gastric derangements. Psoriasis, irregular patches with shining scales.(shining scales—phlegm heat) Eczema with nightly itching.(damp heat--itching eczema) Sweat smells of vinegar.

Stomach

Burning of whole alimentary canal, not better by cold drinks.(heat stagnation but not better by cold drinks means phlegm/dampness present as damp so no drink required and damp so no cold required) Vomiting, sour, bloody, bile.(heat stagnant so bloody) Nausea. (phlegm,blood/qi stagnant however blood/qi stagnant=phlegm stagnant) Profuse flow of saliva. (Merc., IP., Kali-i.) Sour, bitter belchings. Continuous nausea, bitter, sweetish water, acrid, watery, sour vomiting with burning. Periodical vomiting spells, every month, six weeks, lasts for two or three days.

Temperature

The pulse is accelerated. Chilliness during the whole night. (yin time chilliness means dampness dominant) Perspiration over the whole body, but principally in the hypochondria. (wind cold or lung qi deficiency—whole body) Bilious (damp heat) and typhoid fevers. (phlegm heat fevers) Sweat smells of vinegar.

Throat

Heat and smarting in throat. (wind heat in stomach) Burning from fauces to stomach, (heat) better inhaling cool air (hot wind) or drinking cold water. (hot damp) Goiter. (phlegm heat stagnation)

Vertigo

Immediate dizziness (stomach phlegm heat blockage) with pressure in forehead. (pressure—phlegm heat) Slight giddiness, (phlegm stagnation) coming on suddenly while walking within doors.

Comments

Nash writes: The stomach troubles are often accompanied by a burning of tongue, throat, esophagus and stomach and if diarrhea present with burning of the anus. This burning of the canal is very characteristic of this drug. The vomiting is not always sour, but may be bitter or sweetish.

There is also profuse flow of saliva. Nash once had a case of stomach trouble in a middle aged lady. She had frequent attacks of vomiting of a stringy, glairy mucus which was very ropy.

PAGE 865

The vomit would hang in strings from her mouth to the receptacle on the floor. Then the substance vomited became dark colored like coffee became very weak, vomited all nourishment. She also had profuse secretion of ropy saliva.

Thinking she had cancer of the stomach, she made her will and set her house in order to die. Kali-bi. was given with no benefit, but Iris cured her completely in a short time and she remains well 10 years since.

PAGE 866

Jaborandi

(pilocarpus)

Pharmacy

Jab. Jaborandi. Pilocarpus pennatifolius aut microphyllus. N. O. Rutaceae. Tincture of fresh leaves. Tincture of dried leaves and stems. Historical dose: Tincture and all potencies, third potency.

Herbal

Jaborandi is a South American tree growing to the height of twenty feet. It is used by South American Indians as an antidote to the bite of serpents of the Trigonocéphalous group.

The face, ears and neck become in a few minutes after a dose of Jab. deeply flushed and drops of perspiration break out all over the body while at the same time the mouth waters and saliva pours out in an almost continuous stream. The sweat and saliva produced by a single dose is often enormous in quantity, not infrequently half a pint.

Jab. has a reputation in the old school as a stimulant of the breast secretion and a case is quoted from the Lancet in which a woman whose milk had ceased for a fortnight received ten drops of the fluid extract every four hours.

The secretion of milk was re-established, but the patient began to suffer from extreme nervous excitement accompanied by a fixed idea that she should murder her family with a hatchet. The drug was stopped and these symptoms disappeared and with them the activity of the breast glands.

Jab. has been used as a remedy for baldness and it forms the principal ingredient in some of the popular hair restorer tonics. In a number of patients who have been taking it white hair and blonde hair have been observed to turn black. **Planets:** Moon, Mercury.

Homeopathic

Jaborandi has been extensively used in ophthalmic practice for its mydriatic properties. Incidentally its action on the skin and salivary glands was observed and led to extensive provings being made.

Pilocarpus is a powerful glandular stimulant, produces hypersecretion from upper respiratory tract, salivary glands and abnormal sweats. In addition it produces very important eye disorders.

Exophthalmic goiter with increased heart's action and pulsation of arteries, tremors and nervousness, heat and sweating, bronchial irritation. A valuable remedy in limiting the duration of mumps. Its most important effects are perspiration, salivation and myosis. Hot flushes, nausea, salivation and profuse perspiration.

Other secretions, lachrymal, nasal, bronchial and intestinal also but in less degree. Jaborandi is homeopathic to abnormal sweats and has achieved great success in night sweats of tuberculosis patients.

Acts upon the thyroid and its sudorific action may possibly be due to it. It is of most service in kidney disease, especially with uremia, eliminating both water and urea. Scarlatinal dropsy. Contra-indicated in heart failure and in post-puerperal uremia and in senile cases.

Clinical

Alopecia. Asthenopia. Bronchitis. Burns. Cataract. Ciliary spasm. Diarrhea. Dysmenorrhea. Erysipelas. Eye disorders, surgery on. **Eyestrain**. Flushings, menopausal.

Glaucoma. Hair loss. **Heart** disorders. Hypermetropia. Leucorrhoea. Miliaria. Mumps. Perspiration, excessive. Pregnancy, salivation. Salivation. Scalds. Strabismus. Tuberculosis. Worms.

Modalities

Worse start of menses. Cold. Exhaustion.

Symptoms

MIND

Very nervous and tremulous. Fixed idea that she will murder all her family with a hatchet. Confusion. Disinclination to speak.

Abdomen

Empty, gone feeling. Cutting in lower abdomen. Severe pains over pubes with strong desire to pass water, which gave better.

Breasts

Milk deficient, excessive.

PAGE 867

Chest

Sticking in chest. Pain in chest and around heart. Pressure on chest with anxiety, palpitation and pain in region of heart. Anxiety in chest with oppression, preventing sleep.

Ears

Mumps, especially when metastasis to the testes. Nervous deafness, better in noise. Tinnitus. Serous exudation into tympanic cavity.

Eyes

Tension in, Glaucoma. Hyperopia. Eye-strain from whatever cause. **Eyes** easily tire from slightest use. Irritability of the ciliary muscle. Heat and burning in eyes on use. Headache, smarting and pain in globe on use. **Everything at a distance appears hazy, vision becomes indistinct every few moments. Retinal images retained long after using eyes.** Irritation from electric or other artificial light. Pupils contracted, do not react to light. Staring eyes. Near-sighted. Vertigo and nausea after using eyes. **White spots** before eyes. Smarting pain in eyes. Lids twitch. Atrophic choroiditis. Spasm of the accommodation while reading. Exophthalmos. Squint convergent after operation. Vitreous opacities.

Face

Redness of face and of ears. Pallor with heat of face and throbbing of temporal arteries.

Female

Menses, start with coldness, throbbing in head and pelvis and backache. Menses scanty, congested head, dry skin. Flushing at menopause. Leucorrhoea. Edema of pregnancy. Puerperal convulsions in a stupor, threatened suffocation from inability to swallow excessive quantity of saliva.

Food

Good appetite. Hunger disappeared and he could not eat. Urgent thirst.

Head

Headache every day about noon. Empty feeling in head. Throbbing pain in vertex and front of head. Baldness. Light hair turns black. Pain in lower part of occiput.

Heart

Pulse is irregular, dicrotic. Oppression of chest. Cyanosis, collapse. Nervous cardiac disorders. Violent ebullitions to heart and chest.

Pain in heart region. Palpitations. Irregularity, weakness and rapidity of action.

Kidneys

Scanty, pain over pubes with much urging. Burning in urethra with urging to urinate. Urine dark. Urine increased during the sweat.

Lungs

Breathing difficult. Bronchial mucous membrane inflamed. Loose cough. Much inclination to cough and difficult breathing. Edema of lungs. Slow, sighing respiration. Frothy or profuse, thin, serous expectoration. Breathing hurried.

Male

Orchitis, metastasis of mumps. Orchitis with incipient bronchial trouble.

Mouth

Saliva viscid like white of egg. Dryness. Free salivation with profuse sweating. Tension in salivary glands. Salivation with profuse sweat with dry skin, stringy, but not viscid. Constant spitting of alkaline saliva. Saliva contained a notable quantity of urea.

Nose

Copious nasal discharge.

Rectum

Constipation. Hard stools. Stools are watery, yellow. Frequent and painless stools. Undigested, gushing, weakening, papescent and large and painless stools. Diarrhea with flushed face and profuse perspiration. Passage of threadworms.

Skin

Excessive perspiration from all parts of the body. Persistent dryness of skin. Dry eczema. Semi-lateral sweats. Chilliness with sweat. Red. Sweats with palpitations, general pulsations and tremors. Nervous sweats. Unilateral sweat.

Sleep

Sleepiness. Fell asleep while sitting reading. Profound sleep in daytime. Did not sleep well on account of restlessness with pressure on chest and hurried breathing. Distressing dreams towards morning. Dreams of accidents and fights, waking him twice a night.

Stomach

Hiccough. Nausea on looking at objects moving, vomiting, pressure and pain in stomach. Stubborn vomiting of pregnancy.

Nausea, sudden and retching often with hiccough. Vomiting after supper.

PAGE 868

Temperature

Chilly up and down back at 7 p.m. Shivering. Profuse sweat. Sweat on forehead, then over whole body, then chiefly on face, legs and feet. Sweat contains urea. Perspired easily before taking, but did not sweat during the proving.

Throat

Exophthalmic goiter with increased heart's action, pulsation in arteries, tremors and nervousness. Swelling of submaxillary glands (Merc., Calc.) Dryness at back of throat. Soreness and smarting of throat.

Vertigo

Headache with vertigo and nausea on using the eyes.

Comments

Dudgeon has recorded the following interesting case: A gentleman, 45, rose at an early hour and went to the other side of his bedroom to get a dose of Nux-v. 3c for some fancied derangement of his stomach. On coming back to bed he was seized with sudden violent crimson flushing of the face followed almost immediately by profuse perspiration, beginning in the face and head and extending all over the body.

This was followed by extreme coldness of the limbs and sickness terminating in the vomiting chiefly of sour mucus. The attacks recurred every quarter of an hour throughout the day. Not only was he unable to get out of bed, he could not raise himself up in bed or lie otherwise than on his right side without the most distressing giddiness and a feeling "as if he should die." Pulse 60, regular and strong, temperature below normal.

Ten drops of Jab. 1c were mixed in half a tumbler of water and a dessert spoonful given immediately and repeated every half hour. After the second dose the attacks ceased and he was able to take bread and milk without sickness. He had a good night's rest and was perfectly well the next day.

Hale commend its use in women or young girls who have always a dry skin, scanty menses and tendency of blood to the head.

Duncan has aborted erysipelas by painting the tincture on the part four to five times daily. A sharp smarting is the first effect, followed by a more agreeable, soothing sensation. In burns, scalds and some forms of eczema and psoriasis the same use has given excellent results.

The action of the remedy to the eyes is very pronounced and it has been found useful in many conditions of eye weakness, especially hypermetropia, ciliary spasm, convergent strabismus and after operations for strabismus.

Sandesberg noticed that the internal use of Jaborandi and Pilocarpine in cases of detachment of retina and choroiditis seemed to occasion opacity of the crystalline lens. He treated a horse for iridochoroiditis and large opacities of the vitreous with infusion of Jab. leaves and injections of Pilo. The disease was quickly arrested, the vitreous cleared up completely, but during the first week the crystalline lens became opaque.

Bell commends it in diarrhea with gushing painless stools, flushed face, profuse salivation intense thirst, urine dark, scanty (or profuse), profuse sweat.

Cooper has seen a violent leucorrhoea caused by Jab., also the discharge of a quantity of threadworms. One patient after having been injected with Pilocarpine, complained of great sensitiveness to cold: constantly taking cold and in dread of bronchitis, the skin too became irritable.

The Hom. News, February, 1900, quotes an incidental cure of dysmenorrhoea in a woman, age 23, who received five-drop doses of Jab. for increased eye-tension which rapidly disappeared.

The patient noticed that she passed the next menstrual period without pain though she usually had to spend two to four days in bed.

PAGE 869

The drug was continued in smaller doses and the improvement was maintained.

"When the period begins with a feeling of coldness and faintness and neuralgic throbbings in head and pelvis with backache, a drop or two of Jab. in hot water will at once relieve" (Cooper).

Jab. acts more on left side. Sometimes the left side only is affected by sweating, the right side being quite dry. Headaches were more noticed on left side. Headache worse at noon every day. Eating helps distress in stomach.

Compare

(1) Amyl-n., Atrop., Phys., Lyc, Ruta.

(2) Pilocarp. mur. - Meniere's disease, rapidly progressive tuberculosis with free hemorrhages, profuse sweating, 2x trituration.

(3) Atropine is the antagonist to Pilocarpine in dose of one one-hundredth grain for one-sixth of Pilocarpin.

Jacaranda caroba

(brazilian caroba tree)

Pharmacy

Jac-c. Jacaranda caroba. Brazilian caroba tree. Caroba. Bignonia caroba. Jacaranda Brasiliensis. N. O. Bignoniaceae. Tincture of fresh flowers. Historical dose: Tincture and all potencies, tincture to third potency.

Herbal

There are several species of Jacaranda," especially Jacaranda Procera. have the reputation of being curative in syphilis" says the Treasury of Botany. Mure proved Jacaranda caroba and the symptoms of the proving certainly point to this. **Planets:** Venus, Saturn.

Homeopathic

Jacaranda caroba has reputation as a remedy in venereal diseases and rheumatism. The urinary and sexual symptoms are important. Morning sickness. Rheumatic symptoms. Among other symptoms noted are lancinations in the heart. Rheumatic pains in the limbs. Itching at anus.

Hering gives these symptoms as having been confirmed:

Contact of urine with chancre causes tearing pains, which affect the whole organism. Prepuce much swollen, could not be drawn over glans, on attempting to do so, copious discharge of yellowish green pus. Chordee in gonorrhoea. Dull pain under sternum on raising head and drawing breath.

Clinical

Balanorrhoea. Chancre. Chordee. Gonorrhoea. Gonorrhoea. Muscular rheumatism. Phimosis. Rheumatism. Syphilis.

Symptoms

Abdomen

Painful stitch in the right and left side of navel. Swelling of the right groin painful to touch. Acute pain at the hypogastrium when pressing upon it.

Back

Pain in nape. Neck so painful that the head cannot be turned to right. Stiffness in loins.

Chest

Dull pain under the sternum on raising head and drawing breath. Prickling under the sternum.

Ears

Flapping in the ears, as of wings. Stoppage and heat in the left ear, with burning, digging pain extending to the left nostril.

Eyes

Eyes pain, are inflamed and watery.

Food

Food tastes insipid, nausea while eating.

Head

Coryza with heavy head. Dull pain between the forehead and right temple. Fullness in the head. Pain, as if a plug were pressing on the right side of the forehead.

Heart

Sensation as if the heart beat in the pit of the stomach. Sharp pain in region of heart. Painful stitch at the heart, extending to the right side. Stitch at the heart, which seems to beat slowly.

Kidneys

Urethra inflamed, discharge of yellow matter.

Limbs

Rheumatic pain in right knee. Weakness of lumbar region. Morning soreness and stiffness of muscles. Gonorrhoeal rheumatism. Itching pimples on hands. Gonorrhoeal and syphilitic arthritis.

Male

Heat and pain in penis, painful erections, phimosis. Chancroid. Chordee.
Itching pimples on glans and prepuce. Discharge of yellowish white liquid from the prepuce. Phimosis. Prepuce painful and swollen. The prepuce cannot be drawn back. Suppuration between the glans and prepuce. Acute pain in the left testicle when walking. Heat and swelling of the scrotum. Painful erections. Syphilis.

PAGE 870

Mouth

Food tastes flat or acid. Dry mouth in the morning in bed. Raw pain at the left side of tongue. Mouth dry and clammy.

Nose

Sneezing and fluent coryza. Coryza, with heaviness and weariness at the vertex, forehead, and eyes.

Rectum

Constipation. Itching at the anus while sitting. Acute pain with lancinations in the anus. Prickling around the anus. Excrescence at the anus.

Sleep

Restless sleep with frightful dreams.

Stomach

Nausea when eating. Fullness at the pit of the stomach, with hurried breathing. Pressure at the pit of the stomach. Painful stitch between the pit of the stomach and the umbilicus.

Temperature

Internal chill. Dry, prickling heat all over.

Throat

Sore and dry. Vesicles in pharynx. Sore throat with constrictions of the pharynx and difficult swallowing. Constrictive sensation at the throat.

Vertigo

Vertigo on rising with heavy forehead.

Comments

Mahony has confirmed these symptoms of Jac-c.: "Food tastes insipid, nausea during eating." Motion aggravates. Symptoms come on when walking, raising head, sitting.

J. S. Whittinghill has cured several cases of muscular rheumatism characterized by a peculiar soreness and stiffness of muscles in the morning. Worse by any motion.

Compare

- (1) Thuj. - gonorrhea, rheumatism.
- (2) Cor-r. - red and sensitive chancre and chancroids.
- (3) Jac-g.

Boericke. Clarke.

Jacaranda gualandai

Pharmacy

Jac. *Jacaranda gualandai*. Carroba. N. O. Bignoniaceae. The dried leaves are crushed and macerated in five parts by weight of alcohol. Historical dose: Tincture and all potencies.

History

Dr. J. S. Whittinghill contributed the following, *Eclectic Medical Journal* concerning *Jacaranda*: Of this South American remedy the *Dispensatory* says it is used in Brazil and

other South American countries for syphilis, sometimes under the name Carroba.

Planets: Saturn.

Homeopathic

Jacaranda gualanai has syphilitic symptoms, especially of eye and throat. Chancroids.

Atonic ulcers. Dark, painless diarrhea.

Clinical

Rheumatism. Syphilis.

Symptoms

Back

Weakness of the lumbar region.

Eyes

Pains and inflammation of the eye with redness more marked in the left eye. Sensation of sand in the eyes. Ophthalmia, **which begins in the left eye with lachrymation and night agglutination of the eyelids.** Weakness of sight. Syphilitic-like ophthalmia.

Head

Vertigo on rising after stooping with momentary loss of sight and sensation of heaviness in the forehead. Weakness of memory and inability to study.

Male

Increased secretion of the urine. Pain in the penis. Blenorrhagia with a discharge which stains the linen a dirty yellow color. Chancroids.

Rectum

Diarrhea with dark mulberry colored stools without pain or tenesmus, but with mucus.

Throat

Pain and burning of the larynx, when laughing or reading aloud and small vesicles in the pharynx.

Comments

Anshutz reports: The following letter from Dr. J. F. Convers of Bogota, throws some further light on its use. Let me give the results of my experience with Jacaranda. I believed it be a true specific for certain kinds of rheumatism. Its first trial was given a patient suffering as follows:

PAGE 871

She had rheumatism for about ten years and never became serious. sometimes she was nearly relieved from it, again lost much rest and sleep from it. Her wrist would become painful and very weak from ordinary labor. She always suffered very much in the morning upon any motion and complained of being stiff. Had to have assistance in dressing. Upon sudden motion, sensation in the muscles as of tearing and being bruised-even painful upon pressure.

I gave her different remedies as they seemed to be indicated with no results towards removing the trouble. I thought there could be nothing lost by trying Jacaranda. It met with decided success. She was entirely relieved of muscular pains in a few days. Had the recurrence of some symptoms in about six weeks after, tried Jacaranda again with the same decided success.

Some eight weeks have elapsed since with no recurrence of muscular pains.

I have tried it on three other patients with the same peculiar morning stiffness and soreness of muscles. All were relieved in a few days. They have no more muscular trouble. so I put morning soreness and stiffness of muscles as the guide in prescribing Jacaranda.

I have used the mother tincture at 5 drops per dose and the 3x dilution of it in the treatment of blenorrhagia and chancroids with the great success. In my experience I have found that this medicine is a complementary and antidote to Merc.

Jalapa

Pharmacy

Jal. Jalapa. Exogonium purga. Ipomoea purga. Convolvulus purga. N. O. Convolvulaceae. Mexico. Trituration of root. Historical dose: Tincture and all potencies, third to twelfth potency.

Herbal

Jalapa the well known purgative of old school practice. It has had a short proving by Jeanes. Allen gives this as cured:

Coryza in an infant, violent attacks of crying and intense pain,(blood stagnation) quiet during the day, but screaming all night.(yin type so cold stagnation blood congealation)

Nash cured with Jal. 12c a desperate case of entero-colitis(cold type –severe) in which there was a screaming all day as well as all night. With the screaming there was constant body contortions, bending forward, backward and sideways alternately. **Planets:** Moon.

Homeopathic

Jalapa is a powerful purgative, hence it affects intestines and stomach. Causes and cures colic and diarrhea.(cold colic or blood congealation colic and blood stagnation diarrhea) The characteristic stools of Jal. are watery, sour smelling and bloody.(damp cold or blood stagnation) There is cutting colic before(blood stagnation) and during the stool.(heat or cold stagnation) The most marked worse is at night.

A child may be quite quiet all day, but screams and tossed about all night. In such a case Jal. is very likely to be the remedy whether the child is suffering from diarrhea or other complaint. Colic. Stools, watery, muddy or sour, bloody. Infantile diarrhea with general coldness, blueness of face.

Clinical

Anus, soreness. Coryza. Diarrhea. Gout. Fainting. Restlessness.

Modalities

Worse night, belchings.

Symptoms

MIND

Great restlessness with anxiety.(due to intense pain and stagnation of blood) Fainting fits,(blood stagnation and vacuity) weakness.(spleen and heart qi deficiency) Quiet all day, but screams and tossed about all night.(yin type severe problem so blood stagnation)

Abdomen

Flatulence and nausea.(qi and bloodstagnation) Abdomen distended.(qi stagnation) Face cold and blue.(blood stagnation and deficiency) Pain in right hypochondrium.(yin side cold/blood stagnation) Severe griping, cutting pain in bowels, worse at night.(blood stagnation) Pain in middle of abdomen and in region of left superior flexure of colon. Pain in cecum. Flatulent rumbling in bowels.(dampness and qi stagnation or damp wind) Colic: violent pain in small intestines, as if abdomen would be cut to pieces.(blood stagnation in heart or small intestine) Inflammation of intestines.

Back

Severe pain about superior margin of left scapula.(yang side back and left but severe pains are due to cold or blood stagnation so it should be right side)

Ears

Humming in ears.(may be due to cold/blood stagnation)

Head

Violent headache. Pain in head, smarting in skin of forehead.(cold stagnation in stomach so severe ,forehead)

Kidneys

Pain and pressure in region of bladder.(

PAGE 872

Limbs

Excessive uneasiness and tossing about of limbs.(heart qi irritated) Aching in arms and legs, mostly right side.(cold aching yin side) Pain in large joint of great toe.(fixed location so damp ,blood stagnation or cold pain) Smarting at root of nail.(cold/blood stagnation) Burning of soles.(kidney vacuity heat) Pain in thighs.(cold stagnation pain) Smarting on inside edge and at root of left great toenail with heat, tearing and pulsation.(blood stagnation) .

Male

Thrilling sensation in urethra while urinating.(during urination— thrill in urethra due to bladder heat)

Mouth

Dryness of lips.(blood deficiency)) Tongue, smooth, glazed, dry, smarting. Biting and smarting of tongue. Stinging on tongue and in fauces.(stinging may be due to blood congealation)

Rectum

Anus sore.(blood stagnation) Pinching and griping.(qi stagnation) Watery diarrhea, thin, muddy stools.(damp or blood stagnation) Diarrhea in infants. Severe cutting, griping pain in bowels.(blood/qi stagnation) Infantile diarrhea, general coldness, blueness of face. Stools, violent, excessive, bloody, watery (blood stagnation with small intestine not absorbed water) with weak pulse, sour smelling with great restlessness and anxiety.(heart heat or qi irritation) Before and during stool: cutting colic.(blood stagnation) Pain in sigmoid flexure of colon. Soreness of anus.

Stomach

Flatulent(qi and blood stagnation) and frothy belchings with abatement of pain. Nausea.(qi stagnation)

Temperature

General coldness and blueness of face. Febrile attacks. Great disposition to perspiration of head and superior parts of body.(lung heat perspiration so heat goes up)

Comments

There is great restlessness and anxiety with Jal. The abdominal pain is very severe (⊕**blood stagnation in abdomen**) " as if the abdomen would be cut to pieces," severe griping, cutting pains. (**blood stagnation**) Pain in sigmoid flexure. There is a great weakness with fainting fits, excessive uneasiness and tossing about of limbs. There is better of pain by belchings of frothy matter and flatulence. (**froth—damp wind, flatulence due to blood stagnation here**) General coldness and blueness of the face. (**cold stagnation, blood congealation in stomach**)

Jasminum officinale

Jasmine

Pharmacy

Jasm. *Jasminum officinale*. White Jessamine. N. O. *Jasminaceae*. Some botanists include the Jasmine in the *Oleaceae*. Tincture of red berries. Historical dose: Tincture and all potencies.

Herbal

Jasminum should not be confounded with *Gelsemium*, the "Yellow Jessamine," or "Carolina Jessamine," which belongs to a different order of plants.

The Treasury of Botany states that the bitter leaves of *Jasminum floribundum* are used in Abyssinia against tapeworms. The bitter root of *Jasminum angustifolia*, powdered and mixed with the powdered root of *Acorus calamus* is considered in India an excellent application in ringworm.

The only observation on this plant is one made by W. H. Hull on a boy who ate the red berries. They produced a comatose state, vomiting and convulsions ending in tetanus.

Planets: Moon.

Homeopathic

Jasminum officinalis has not been used in homeopathy, but the poisoning case shows that it is a very powerful drug. The convulsive symptoms were better by a bath.

Symptoms go from above downwards and from left to right.

Muscular movements observed first about eyes and face, especially on left side towards which eyes and facial muscles were directed, becoming generally more severe, going from head to left arm, then to left lower limbs, until finally the whole body was thrown into most violent convulsions.

At one time the spasms were chiefly opisthotonos, when the whole surface was congested almost to a blackened hue, most marked about the muscles of the head and throat, jaws locked, trismus complete, better by a bath. Weak and almost helpless for a few days. Lying on the floor in a fainting fit. Perfect insensibility. Surface cool.

Clinical

Convulsions. Tetanus.

Symptoms

MIND

Comatose condition. Perfect insensibility.

Eyes

Pupils immoderately dilated.

PAGE 873

Face

Face pale. Muscular movement first above eyes and face, especially left side towards which eyes and facial muscles were directed.

Lungs

Breathing somewhat bronchial but of unusual frequency.

Pulse

Slow and feeble.

Stomach

Vomiting. Slight emesis after first sleep.

SOURCES

Boericke. Clarke.

Jatropha curcas

(purging nut)

Pharmacy

Jatr. *Jatropha curcas*. *Atropa curcas*. Physic nut. N. O. Euphorbiaceae. West Indies.

Tincture and trituration of seeds. Historical dose: Trituration, tincture and all potencies, third to thirtieth potency.

History

Jatropha is one of the most active of the Euphorbians and strongly resembles *Croton* in its action, especially in the urgent gushing stools and the irritation and pimples of the skin. It is also an active purgative, hence it affects stomach and intestines.

Kent describes the sphere of Jatr. in cholera thus: The characteristic is rice water discharge, it has vomiting and purging, more or less sweat, more or less cramps, suppression of urine, the great prostration, syncope and rapid onset peculiar to cholera and it has this to differentiate it from all other remedies. The vomiting and purging and evacuations are thick, albuminous, lumpy instead of thin and watery. **Planets:** Moon.

Homeopathic

Jatropha corresponds more to the earlier than the collapse stage of cholera. Cramps are predominant, gripping cutting pains, sensation as if balls were rolling together in abdomen. The patient writhes about in bed with pain.

One of the most notable characteristics of *Jatropha* is the very marked and peculiar gurgling it causes: much noise in the abdomen as if a bottle was being emptied, followed later by a thin stool.

Sudden desire for stool and constant noise of liquids in abdomen, especially left side. Vomiting, easy, albuminous. Hiccough followed by copious vomiting. Loud gurgle like water from a bung hole in abdomen, then profuse gushing stools. Unquenchable thirst. Rice water stools. Violent cramps that draw the muscles of calf flat. Icy coldness of the whole body, especially lower limbs.

Clinical

Blepharospasm. Borborygmi. Cholera. Choleric. Cramps. Diarrhea. Eyelids inflamed. Heels sensitive. Mouth ulceration. Skin disorders. Vomiting. Worms.

Modalities

Better by placing hands in cold water. Worse covering, morning, summer. Worse walking in open air. In room, headaches are worse. Patient seeks to cool himself by throwing off covers and lying on ground. Touch and pressure aggravates.

Symptoms

Abdomen

Distended with gurgling noises. Pain in hypochondria. Pain deep in abdomen, behind the navel. Abdomen swollen and sore to touch. Lancinating, stinging pain with the colic. Tympanites. Rumbling in the abdomen with colic. Noise like the gurgling of water coming out of the bung hole of a barrel during the fecal discharge.

Back

Stiffness of muscles of nape of neck and forehead. Bruised feeling muscles of back and chest. Stiffness in lumbar region.

Chest

Pain in region of left third rib inside nipple. Constriction in chest with anxiety, preventing sleep. Violent (aching) pain in left clavicle. Sticking from above downwards, deep in chest behind sternum.

Ears

Burning hot ears with heat in the back part of the head.

Eyes

Itching and smarting of margins of lids. Twitching of left upper lid. Bright and dark spots before eyes. Black points before eyes.

Face

Hot face and head, chilliness in the back. Pale face with blue margins round eyes. Painful cracked lips.

PAGE 874

Female

Vomiting of pregnancy.

Food

Violent unquenchable thirst, not satisfied by drinking water. Dreads to drink on account of nausea.

Head

Heat and heaviness of the head. Head hot, stupefaction with yawning and nausea. Heat in head, face and ears. Headache with nausea and vomiting. Violent pressing pain in the temples, ceasing in open air and reappearing when entering a room. Stiffness of muscles on forehead and neck.

Heart

Feeling of sinking and nausea in the precordial region, **followed by soft stool**. Violent palpitation, shaking the chest, when moving slowly about the room. Pulse: irregular, small thready intermittent, **greatly slowed**. Almost pulseless.

Kidneys

Violent urging to urinate. Urine pale yellow, frothy.

Limbs

Muscles of limbs contracted by violent spasms. Pain in the limbs and joints. Cramps in muscles, especially calves, legs and feet. Coldness of whole body. Pain in ankles, feet and toes. Heels sensitive.

Liver

Pain in region of liver and under right scapula to shoulder.

Lungs

Painful pressure right side of larynx at night, waking him, not worse by touch. Short, hacking, persistent cough. Hollow cough. Respiration quick, panting. Respiration difficult.

Male

Aching in genital as after excessive sexual intercourse. Drawing in genitals, extending along inner side right thigh to navel.

Mouth

Metallic, bloody taste with much spitting of saliva. Increased accumulation of thin saliva. Long continued pain and burning of the tongue. Numbness of tongue with heat and dryness of mouth. Mouth feels as if scalded.

Nose

Itching of the nose while eating. Ulcers in the nose and mouth.

Rectum

Sudden, profuse, watery like rice-water. Diarrhea, forced discharge.

First stage of cholera, before collapse. Loud noise in abdomen like gurgling of water coming out of a bung-hole, associated with coldness, cramps, nausea and vomiting. Watery diarrhea, it gushes from him like a torrent. Very copious mushy stools with quantities of lumbrici and threadworms. Constipation. Stitches in anus and rectum.

Skin

Pimples on wrist, back of hand, cheek, back of neck, bend of right thigh. Itching and slightest tension round mouth. Itching between fingers in palms, between toes in bed at night, first worse then better by rubbing.

Sleep

Excessive drowsiness. Restlessness at night on account of rush of thought and palpitations. Attacks of anxiety at night did not permit sleep.

Stomach

Hiccough, followed by copious vomiting. Belchings of air. Nausea and vomiting, brought on by drinking with acrid feeling from throat. Great thirst. Glass of water almost immediately vomited. Very easy vomiting. Vomiting of a large mass of dark green bile. Heat and burning in stomach with crampy, constrictive pain in the epigastrium. Vomiting of pregnant women.

Temperature

Heat in head, face and ears. Chilliness and clammy perspiration. Chilliness in the back with heat in the face and head. Chilliness with cold hands and blue nails. Coldness of the whole body, mottled blue. Cold hands with heat in the mouth and throat.

Throat

Dryness in fauces and throat. Burning in the mouth and throat, followed by dryness. Spasmodic constriction in throat, ascending from stomach.

Vertigo

Giddiness which followed by unconsciousness and delirium.

Comments

The diarrhea of Jatr. is very often associated with coldness with mottled blue surface with cold sweat. At times the purging is accompanied by copious (and easy) vomiting of watery albuminous ropy liquid. Sudden desire for stool is marked. Water is almost immediately vomited.

PAGE 875

The abdominal symptoms are most important. At night: mouth dry, itching between toes. After midnight: profuse watery diarrhea. In morning: stools, headache is worse, metallic bloody taste, much spitting of saliva. Suppressed measles, (Farrington). Valuable in cholera and diarrhea. Summer: diarrhea, occurring suddenly.

Compare

(1) Camph., Verat., Gamb., Crot-t.

(2) Jatropha urens, Sponge nettle - edema and cardiac paresis.

SOURCES

Clarke.

Jatropha urens

(spurge nettle)

Pharmacy

Jatr-u. Jatropha urens. Spurge nettle. Tread softly. N. O. Euphorbiaceae. Southern United States. Tincture of fresh plant. Historical dose: Tincture and all potencies.

History

According to Allen this is the most poisonous plant known. He quotes from the Kew Gardens Quarterly, the experience of Mr. Smith, who touched his wrist against the fine bristly stings of the plant while reaching over it. He experienced these symptoms: numbness and swelling of the lips.

The action of the poison was on the heart, circulation stopped and Mr. Smith soon fell unconscious, the last thing he remembered being cries of "Run for the doctor!"

Other Jatropha are Jatr. glauca or Jatr. glandulifera of the East Indies, the seeds of which when crushed yield and oil which is used as external application against rheumatism, which has curious nodulated gouty looking stem. **Planets:** Sun, Saturn.

Homeopathic

Cardiac paresis. Edema.

SOURCES

Clarke.

Joanesia asoca

Pharmacy

Joan. Joanesia asoca. Saraca indica. Bark of an Indian Tree. Historical dose: Tincture and all potencies.

History

Joanesia was introduced by Dr. N. D. Ray, Calcutta. **Planets:** Venus, Moon.

Homeopathic

Joanesia has extensive sphere of action on female organs. Amenorrhoea and metrorrhagia.

Clinical

Amenorrhoea and metrorrhagia.

Symptoms

Back

Pain along spine radiating to abdomen and thighs.

Female

Delayed and irregular menses, menstrual colic, amenorrhoea, pain in ovaries before flow, menorrhagia, irritable bladder, leucorrhoea.

Food

Thirsty. Desire for sweets, also acid things.

Head

Unilateral headache, reflex uterine, congestive headache, better open air and by free flow. Pain in eyeballs, supra-orbital pains, photophobia. Nasal catarrh, profuse, watery discharge. Loss of sense of smell.

Sleep

Disturbed. Dreams of traveling.

Stomach

Thirsty, excessive nausea, obstinate constipation, hemorrhoids.

SOURCES

Juglans cinerea

(butternut)

Pharmacy

Jug-c. Juglans cinerea. Juglans cathartica. Butternut. N. O. Juglandaceae. U. S. Tincture of bark of root. Triturations of the resinoid Juglandin. Historical dose: Tincture and all potencies, tincture to third potency.

History

The Butternut and the Black Walnut (*Juglans nigra*) are the American representatives of the Walnut family. *Juglans ciner.* and *Juglans regia* or *Nux Juglans*, have both been proved and studied with both the digestion is first disordered and with this other symptoms, as headache, occur. These run an acute course and then skin disorders manifest themselves and these run a chronic course.

Before the homeopathic provings were made Jug-c. had a reputation as a mild cathartic. Applied to the skin, the juice causes reddening and blistering.

PAGE 876

It was successfully used in camp diarrhea and dysentery in the early American wars. "The green rind rubbed on tetter and ringworm dispels them." **Planets:** Jupiter, Saturn.
Homeopathic

Juglans cinerea has a faulty elimination that produces jaundice and various skin eruptions. The sharp, occipital headache, usually associated with liver disturbance is very characteristic. Pain in chest, axilla and scapula with suffocative sensation. Feeling as if all internal organs were too large, especially those of left side. Gallstones. The itching is worse when overheated from exercise.

Clinical

Acne. Angina pectoris. Axilla, pain. Chest, pain. Gallstones. Coryza. Eczema. Erysipelas. Erythema nodosum. Headache. Herpes. Hydrothorax. Impetigo. Lichen. Migraine. Pemphigus. Ringworm. Rodent ulcer. Scapula, pain. Scarlatina. Tetter. Vision, lost.

Modalities

Better getting heated, exercise, scratching. Better on rising in morning. Worse walking, chest pains. Going up hill causes retro-sternal pain. Stooping causes pain in scapula and back.

Symptoms

MIND

Absent-minded. Dull feeling, cannot remember anything that was read. Wants to be alone. Want to do nothing but eat and sleep. Cannot concentrate upon any one subject. Confusion.

Abdomen

Soreness in region of liver. Stitches in hepatic region, and under right scapula. Pain in the hypochondrium. Flatulent pain in different parts of abdomen. Heavy pain in umbilical region. Burning in abdomen after stool.

Back

Muscles of neck rigid, lame. Pain between scapula and under right. Pain in lumbar vertebrae. Pricking up and down spine. Sticking under right scapula on stooping.

Chest

Angina pectoris. Oppression at chest, hindering long breathing with cutting pains in lungs. Tuberculosis with great emaciation. Pain in left chest. Dropsy of chest of rheumatic origin. Retro-sternal pain.

Eyes

Eyes red and swollen. Inflammation with pustules on lids and around eyes. **Eyes** burning in afternoon. Feeling in eyes as if drawn together. Loss of vision on sudden motion, with faint-like giddiness.

Face

Pallor. Erythematous redness with dry, burning sensation.

Food

Ferocious appetite. Thirsty, want to drink all the time.

Head

Dull, full head. Sharp, occipital headache. Head feels enlarged. Dull headache is better when getting up. Severe headache, can hardly see. Eruption on scalp. Pustules on lids and around eyes. Itching of scalp, intense, must scratch constantly.

Kidneys

Urination frequent and copious, frequent with burning smarting with headache.

Limbs

Aching pains in the limbs. Pain in elbows and knees. Pain in shoulder. Sharp, rheumatic pain in shoulders and wrists. Pain in right axilla in afternoon. Cramp-like pain in hip at night. Pain in thighs and left knee in forenoon. Occasionally sharp pain in calves.

Lungs

Raising a quantity of dark blood. Expectoration of very tenacious mucus.

Mouth

Acrid feeling in mouth and throat. Soreness in region of tonsils externally. Dryness of root of tongue and fauces. Tongue coated white, yellow in the moving. Burning and pricking in mouth and throat. Taste coppery. Swelling of submaxillary glands, worse right.

Nose

Tingling in nose, sneezing. Coryza, preceded by pain under sternum with threatening suffocation. Later, copious, bland, thick mucous discharge.

Rectum

Yellowish-green stools with tenesmus and burning at anus. Camp diarrhea. Stools bilious, copious, frequent, painless.

Loose stool smelling like onions. Diarrhea with burning in anus before and after stool. A drastic purge, producing irritation and inflammation of mucous membrane of bowels. Constipation, with griping in umbilical region. Constipation preceded by diarrhea.

PAGE 877

Skin

Red like flush of scarlatina. Jaundice with pain about liver and right scapula. Itching and prickling when heated. Pustules. Eczema, especially on lower limbs, sacrum and hands. Erythema and erysipelatous redness.

Sleep

Constant yawning, without sleepiness. Sleepiness. Sleeplessness after 3 a.m. Sleep restless and light. Sleep unrefreshing. Dreams are vivid, frightful. Dreams of being among Indians.

Stomach

Atonic dyspepsia with much belchings and flatulent distention. Nausea in morning. Nausea worse at night. Burning in stomach. Sinking in stomach extends to abdomen with headache.

Temperature

Chilliness alternating with flashes of heat. Chilliness along spine, beginning in back when near the fire, without coldness of flesh.

Throat

Sore throat in forenoon with roughness, on swallowing. Faoes dry. Burning in pharynx. Pain in right side of fauces.

Vertigo

Vertigo, with slight nausea. Slight vertigo with sinking faint feeling in stomach extending to abdomen.

Comments

The provings brought out the characteristics in much detail and clinical use has still further developed them. Jug-r. has been used with much success in scrofulous and scorbutic conditions and both Jug-r. and Jug-c. cause dark, clotted hemorrhage, Jug-c. from the lungs and Jug-r. from the uterus.

Both act on the axilla, Jug-c. causing acute pains and numbness, Jug-r. affecting skin and glands. Jug-c. has some remarkable head symptoms. Sharp shooting pain in occiput is very characteristic. There is a headache with frequent urination and burning.

It has morning headaches like Nux-v. Bry., Chel. and Iris and it much resembles the last in the disturbance of the digestive organs. Pains in liver and right scapula, acute diarrhea. It is one on the medicines which produces epigastric sinking. This extends to the abdomen and is accompanied by headache. One patient who was taking Jug-c. for acne developed all the symptoms of angina pectoris.

But the skin is the organ most of all affected by the drug. All kinds of eruptions have been caused or cured by it including scarlatina and rodent ulcer. There are a good many rheumatic pains in the remedy.

Compare

(1) Juglandin - duodenal catarrh, bilious diarrhea.

(2) Chel., Bry., Iris.

SOURCES

Boericke. Clarke.

Juglans regia

(walnut)

Pharmacy

Jug-r. Juglans regia. Nux juglans. Walnut. Juglandaceae. Tincture of leaves and of rind of green fruit. Historical dose: Tincture and all potencies, tincture and lower potencies.

Herbal

Juglans regia, the Royal Nut has a place in medicine which deserves to be better known. The Treasury of Botany gives a hint in this remark: "Its plantation should not be too near dwellings, as some persons are affected by the powerful aroma of its foliage."

"It was said that in the golden age, when men lived upon acorns, the gods lived upon Walnuts and hence the name of Juglans, Jovis glans or Jupiter's nuts".

The remarkably brain-like appearance of the nut has given rise to the notion that is a "brain-food." From many points of view the walnut-tree is of very great importance and well deserves its lofty name. Besides providing food, at any rate fit for the gods and look at once light and strong, a sap that yields sugar, a fruit that yields a dye and an oil and serves for pickles. **Planets:** Moon, Saturn.

PAGE 878

Homeopathic

Jug-r., produced this curious symptom: Excited, as if intoxicated in the evening in bed and a feeling as if the head were floating in the air. This showing a decided brain action, such as we generally associate with the "wine" rather than the "walnuts" of dessert.

Peevishness and mental indolence were other mental symptoms noted. Skin eruptions are prominent. Muscles relaxed. Exhaustion and disinclination for the usual business. Intoxicated sensation, as if flying. The head symptoms are as marked as those of Jug-c., but the sharp pains were not noted in the occiput as with that remedy, but in the forehead.

Clinical

Acne. Anus, burning. Axillary glands, suppuration. Chancre. Eruptions. Exhaustion. **Eyes**, pain. Favus. Flatulence. Headaches. Herpes. Levitation, sensation. Menorrhagia. Purpura. Ringworm. Skin disorders. Scurvy. Spleen, pain. Syphilis.

Modalities

Worse by motion, migraine worse by speaking, pain in abdomen worse by laughing. There is aggravation after fat food. Worse evening at 9 p.m. and after 9 p.m. The itching is worse at night. Warmth of bed aggravates toothache. It removed a winter rash aggravated by undressing. Rash caused in was aggravated by washing.

Symptoms

MIND

Excited in evening in bed as if intoxicated and feeling as if the head were floating in the air. Peevish and discontented in evening. Disinclined to talk or argue, as was customary with him, mental indolence. Inattention when reading and disinclination to work.

Abdomen

Fullness, bloated, tension and heaviness in the abdomen. Pain in epigastric region with distention of abdomen. Drawing with pressure in region of spleen. Pain above umbilicus.

Back

Stitches in sacral region. Violent stitches in the small of the back, causing one to tremble.

Chest

Itching on the sternum. Sticking in lungs not dependent on motion or respiration.

Oppression.

Ears

Aching and fullness in right, then left ear, then discharge of pus from both ears. External ear inflamed and two painful sore on it. Burning in left ear, then redness and swelling.

Eruption behind ears of children.

Eyes

Burning in eyes. Pressive pain above eye (left) worse by motion. Feeling of coryza.

Face

Swelling of left cheek and upper lip.

Female

Menses early, black, pitch-like coagula. Menstruation too profuse, discharge of a large quantity of black clots, preceded by pressive drawing pains in the abdomen, worse by motion, accompanied with general exhaustion and loss of appetite.

Food

Appetite increased. Unusually great appetite without increase of thirst. Appetite lost. Thirstlessness while eating and aversion to wine. Aversion to tobacco-smoking in evening. Thirst increased.

Head

Confused, feels as if head were floating in air. Occipital sharp pain. Styes.

Kidneys

Frequent desire to pass water from loss of tone of sphincter. Constant urging and involuntary dribbling. Obligated to urinate often and much at a time. Copious urine, but no thirst. Urine scanty and clear. Urine dark red.

Limbs

Drawing pain as if sprained. Sticking and itching in right leg and right fingers. Drawing and paralyzed feeling in legs and knees with weakness.

Male

Frequent erections day and night. Burning in penis after sex.

Mouth

Tearing in hollow teeth, worse warmth of bed. Tongue coated white in morning with bitter, slimy taste. Tongue covered with white mucus. Salivation. Taste bitter. Taste slimy in morning on waking.

Rectum

Stool are liquid twice a day, preceded or accompanied by pain in abdomen, thin, soft, large, at last almost thin. Stool hard, difficult, scanty. Stool delayed.

Constipation. Large stool, then burning pain and pressure in anus. Itching at the anus in the evening in bed with stitches, compelling one to walk about.

PAGE 879

Skin

Comedones and acne of the face. Crusta lactea with soreness around ears. Itching and eruptions of small red pustules. Scalp red and itches violently at night. Chancre-like ulcer. Axillary glands suppurate. Pimples on face, red pimples on face, neck, shoulders and back.

Sleep

Yawning in afternoon with stretching. Sleepiness. Inability to sleep after dinner though inclined to do so earlier than usual. Restless sleep with frightful dreams. Restless dreams.

Stomach

Belchings are violent, frequent, loud, tasting as after eating fat. Fullness and bloated of the stomach. Hiccough more violent after eating. Nausea at 6 a.m. and after supper. Vomiting, woke suddenly vomited food eaten four hours before, then slept without further trouble. Burning in stomach.

Throat

Aphonia or great hoarseness. Hawking of much mucus.

Comments

There are few remedies which cause flatulence and bloating of the abdomen more markedly than Jug-r. It appears to affect the spleen more than the liver, (opposite of Jug-c.).

There is diarrhea and many rectal and anal symptoms, but the diarrhea is not so distinctly bilious as that of Jug-c. Like *Carya alba* and Jug-c., the Jug-r. is hemorrhagic, the blood being black and clotted, (uterine).

Remarkable symptoms of inflammation and ulceration appeared in the male sexual organs. This to a large extent belongs to the general skin action of the remedy.

It was Clotar Miller who made the observation that "In the digestive organs it causes derangement and irritation, which simultaneously call forth abnormal symptoms in other organs, especially in the head.

After this action, which is brief, appear various exanthematous symptoms, which appear late and run a chronic course."

The skin symptoms of the Regia are more pronounced and varied than those of Cinerea. This has led to its more frequent use in scrofula, as skin and gland disorders go much together.

Farrington says Jug-r. is one of the best remedies in "tinea favosa, especially in the scalp behind the ear, itching is intense at night so that the patient has difficulty in sleeping."

Scabs appear on arms and in axilla. In the proving of Jug-r. the symptoms went from the right axilla to left. In a patient of mine, a nurse who had poisoned her left arm some years before from septic and possibly syphilitic case inflammation of the axillary glands ensued, first of left then of right, leaving an eczematous itching condition.

The glands of the groin also became affected. Elaps. 200c had relieved the bulk of the conditions, but there was still a little irritation occasionally in the axilla and I thought I might expedite matters by giving Jug-r. 2c three times a day.

This is what happened: Five days after beginning the Jug-r. an eruption of minute vesicles appeared on her back, itching much. It extended all up the center of the back from sacrum to mid-dorsal region, spreading out below, tapering above.

She had scratched holes in two places. The rash was worse after washing. But all soreness and irritation had gone from the arms and axilla. It was antidoted with Rhus-t. 2c. Four years later she had no more trouble with the glands.

C. Mÿller, who experienced the axillary skin symptoms in his own person, had never suffered from a skin affection before. One of the provers was cured of an itching eruption of the legs from which he had suffered in winter for four years, the itching commencing as soon as he began to undress.

PAGE 880

Many of the symptoms closely resembled syphilis and the affection of the cheek in one of the provers was actually diagnosed as syphilitic by a medical man who saw him in C. Mÿller's absence. The left side of head, face and abdomen mostly affected. Axillary symptoms proceed from right to left.

Juncus effusus

(soft rush)

Pharmacy

Junc-e. Juncus effusus. Common rush. Soft Rush. N. O. Juncaceae. Tincture of root. Historical dose: Tincture and all potencies.

Herbal

According to Nowack and Rinks, Juncus is a diuretic and has been used in dropsical, kidney stones and kidney diseases. Hartmann used the tincture with success in dysuria, strangury and ischuria. In Livonia a decoction is used for stone and gravel. **Planets:** Venus, Saturn.

Homeopathic

Junc-e. was proved by Dr. Whale and a number of symptoms were produced. The most notable were bubbling sensations in various parts and a number of pains pressive and sticking were noted in the chest. Pulling in cervical vertebrae in neck muscles.

There was much rumbling of flatus in abdomen and marked better to abdominal symptoms when flatus was emitted. The exact preparation used in the proving was not recorded. Fresh plant tinctures should be used in any further experiments.

Clinical

Asthma. backache. Calculus. Catarrh. Dropsy. Flatulence. Headache. Kidney, diseases. Rheumatism. Scars disorders.

Modalities

Better emission of flatus. Better by motion. The pains were worse on left side, appeared or were worse at night and came on again in morning and evening. Worse flexing parts, worse bending sideways, better stretching out arm. Rheumatic pains worse by rest.

Chilliness worse on uncovering.

Compare

Juniperus communis

(juniper berries)

Pharmacy

Juni-c. Juniperus communis. Juniper berries. Juniper. N. O. Gymnosperm of the Conifer. Tincture of fresh ripe berries. Historical dose: Tincture and all potencies. Best form is the infusion. One ounce to a pint of boiling water. Dose, one-half to two ounces or tincture, one to ten drops.

Herbal

Juni-c. has not been proved, but sufficient is known of its action to warrant its inclusion and to show the analogy between its action and that of Sabina.

Gin owes its distinctive properties to the oil of Juniper berries and that is why this spirit is in such popular repute as a remedy for dysmenorrhea. It has a very powerful action on the kidneys and has cured cases of kidney dropsy. **Planets:** Venus, Sun.

Homeopathic

Hale also commends it in certain coughs with scanty, loaded urine. He says German doctors used Juniper a lot in gastric affections, abdominal flatulence and colic. Catarrhal inflammation of kidneys. Dropsy with suppression of urine. Old persons with poor digestion and scanty secretion of urine. Chronic pyelitis.

PAGE 881

Clinical

Allergies. Cedar fever. Dropsy. Coughs. Dysmenorrhea. Hay fever. Hemorrhages.

Symptoms

Chest

Painful ribs and sternum from coughing attacks. (Bry.)

Kidneys

Strangury, bloody, scanty urine, violet odor. (Tereb.) Weight in kidney region. Prostatic discharge. Kidney hyperemia. (Eucal.)

Lungs

Severe painful coughs. Cough with scanty, loaded urine.

Nose

Coryza. Hay fever, allergies. Violent sneezing from cedar pollen.

Juniperus virginiana

(red cedar)

Pharmacy

Juni. Juniperus virginianus. Red Cedar. N. O. Gymnosperm of the Conifer. Tincture of fresh twigs. Historical dose: Tincture and all potencies.

Herbal

The effects of Juniperus virginianus have been largely observed on women who have taken it to stimulate the uterus or bring on the menses. **Planets:** Moon.

Homeopathic

From the herb Juniperus virginianus a number of fatal cases have occurred. The patients passing into violent convulsions, followed by an apoplectic or stroke condition insensibility and collapse.

Clinical

Convulsions.

Eyes, twitching.

Strangury. Strokes. Tetanus. Uterine hemorrhage.

Justicia adhatoda

Pharmacy

Just. Justicia adhatoda. Basaka. Singhee. An Indian Shrub. Tincture of fresh leaves. Historical dose: Tincture and all potencies, third potency and higher. Severe aggravation have been noticed from lower potencies.

Herbal

The Ayurvedic physicians of India prize it very much. They are so very sure of its efficacy that they call it Baidyamata, i.e. mother of physicians. They confidently proclaim that no death can occur from cough of any kind if Vasaka can play its role and find time to display its healing virtues.

The cough of Justicia is sometimes dry, spasmodic, constricted. There is a violent degree of dyspnea associated with the cough. So much so that there is great fear of threatened suffocation. In whooping cough the child loses breath, turns pale, stiff and blue and there is rigidity of the body. There is usually vomiting with the cough and no food or drink is retained by the stomach.

In the first stages of tuberculosis it will surely be found to be a valuable remedy. In this complaint there is usually spitting of blood. The mucous membranes are dry, especially those of the mouth and throat. The mouth, throat and tongue are dry and there is thirst present.

Justicia has some influence upon the hepatic system. In functional derangements of the liver it is certainly an excellent remedy. It has also great loss of appetite and there is also obstinate constipation in the bargain. **Planets:** Mercury, Moon.

Homeopathic

A highly praised remedy for acute catarrhal conditions of the respiratory tract, use in the beginning. It is cooling, destroyer of hoarseness and a sure and strong arrestor of blood. It is highly efficacious in cold, coryza, cough, bronchitis, pneumonia, tuberculosis, spitting of blood, fever, jaundice, vomiting, thirst, loss of appetite and constipation.

Allergies and Hay fever. Fits of sneezing with lachrymation and loss of smell and taste. Coryza, fluent, acrid with violent sneezing, coughing or asthmatic attacks. Cough with tightness of chest, as if it would burst with bronchial rattle, obstruction of breath and sneezing. Stiffening out, trembling and convulsions with cough or fever.

PAGE 882

Whooping cough. Tough expectoration. Puffy hands and feet in a.m. Chilliness. Sensitiveness.

There is a marked over-sensitiveness to external impressions. The characteristic mental symptom of Justicia is irritability. The patient is easily angered. The patient is not in good humor and is very averse to holding any conversation.

Clinical

Appetite, loss. Asthma. Blood, spitting, Bronchitis. Colds. Constipation. Coryza. Coughs. Depression. Fevers. Jaundice. Pneumonia. Thirst. Tuberculosis. Vomiting. Whooping cough.

Modalities

Worse close room, dust, noise, eating.

Symptoms

MIND

Irritable, sensitive to external impressions. He grew anxious and discouraged, he felt a decided aversion to conversation and was inclined to be angry. The patient was extremely irritable, everything upsets him. Depression of spirits, he was over-sensitive to external impressions.

Head

Hot, full and heavy head, lachrymation with coryza, profuse, fluent with constant sneezing, loss of smell and taste, coryza with cough. Highly efficacious medicine for acute catarrhal conditions of the respiratory tract (used in the beginning).

Lungs

Dry cough from sternal region all over chest. Hoarseness, larynx painful. Paroxysmal cough with suffocative obstruction of respiration. Cough with sneezing. Severe dyspnea with cough. Tightness across chest. Asthmatic attacks, cannot endure a close, warm room. Whooping cough.

Mouth

The mouth is dry.

Throat

Dry and painful during empty swallowing, tenacious mucus.

Comments

Blackwood writes: This one of the most ancient drugs in India, the most highly valued by Ayurvedic medicine. Its field of use is in colds, coryza, cough of any kind, vomiting, bronchitis, pneumonia, tuberculosis, spitting of blood.

Fevers, jaundice, loss of appetite, and constipation. These ailments are what the ancient cult use it for.

Proving developed catarrh, violent sneezing, watering eyes, profuse coryza, loss of appetite, vomiting, liver pains, hoarseness and very painful suffocative cough with blood streaked mucus and high temperature. It was proved by two men twenty - seven and thirty - two years of age, and each experienced practically the same symptoms, which have been clinically verified.

PAGE 883

Kalium aceticum

(acetate of potash)

Pharmacy

Kali-a. Kali aceticum. Kali acetas. Acetate of Potash. Potassium Acetate. Solution in distilled water. Historical dose: Tincture and all potencies.

History

Kali-a. is a well-known in allopathic practice as a diuretic and in less degree cathartic. These actions are positive and direct and the homeopathic uses are chiefly in cases of over secretion of urine and in diarrhea.

One of the main purposes for which its diuretic and cathartic properties are sought by allopaths is as derivative in cases of dropsy, chiefly ascites and hydrothorax. It is quite possible that this action may be specific, that is homeopathic and not merely derivative, for both Acet-ac. and the Kali cause great disturbance in the circulation of fluids in the tissues. **Planets:** Venus, Jupiter.

Homeopathic

Kali-a. has had a few provings have been made and these have brought out a preponderance of abdominal and urinary symptoms. Griping, diarrhea, bleeding of hemorrhoids increased flow of urine, which was more watery and alkaline. Weakness, trembling, profuse perspiration, especially about the head.

Trembling and anxiety in whole body of transient duration. Symptoms generally were worse in morning, but there was a headache, worse 4 p.m.

Clinical

Diabetes. Diarrhea. Dropsy. Hemorrhoids. Urine, alkaline.

Symptoms

Abdomen

Pains in region of umbilicus, lasting without cessation until going to bed, when they suddenly disappeared. Unnatural distention of abdomen after dinner. Griping. An indefinite gnawing pain lasting an hour. Gnawing sensation in abdomen which lasted until evening.

Head

Headache about 4 p.m. Dull headache in morning. Much perspiration of head.

Kidneys

Urine very much increased in quantity and very watery. During the proving the urine evolved ammonia. Urine strongly alkaline, sweetish odor, yellow color.

Limbs

Great weariness of all limbs with some headache. Extreme weariness and trembling in all limbs in morning. The weariness in lower limbs and the dull headache disappeared half an hour after the afternoon nap.

Rectum

Discharge of hemorrhoid blood several times during day. Diarrhea. Two stools in evening.

Stomach

Constrictive, dull pain in stomach, extending to low down in abdomen, gradually disappearing after two hours. Dull, pressive, pinching and constrictive pain in epigastric region, coming on a few minutes after each dose and lasting an hour.

Temperature

Much perspiration on head, especially from II a.m. to I p.m. Profuse perspiration, which was very offensive during a walk of two hours.

Compare

Kalium arsenicosum

(fowler's solution)

Pharmacy

Kali-ar. Fowler's solution. Kali arsenicosum. Potassium arsenate. Fowler's Solution is the form in which Kali-ar. has been tested, consists of Arsenious acid I part, Carbonate of potash I part, Compound tincture of lavender 3 parts, distilled water 95 parts. Dilutions should be made from this. Historical dose: All potencies, third to thirtieth potency.

History

It is not possible to separate entirely the pathogenesis of Kali-ar. and Ars. Kali-ar. is the favorite form in which Arsenic is prescribed by the allopaths, consequently the bulk of observations from over-dosing are due to this preparation and as it is named Liquor arsenicalis it is considered as Arsenic and nothing else.

PAGE 884

The Arsenic symptoms predominate, much of our knowledge relating to this remedy comes to us from the effects of overdosing and protracted use of the medicine on patients suffering from chronic skin and blood diseases.

A number of cases while taking this remedy developed right-sided herpes in other patients, the sclerotics became thick and yellow instead of clear and blue, the iris, which was blue, became more gray, the fair, florid skin became muddy and older looking.

Epithelioma has developed in a patient after prolonged treatment with allopathic Kali-ar. for psoriasis. This remedy may cure psoriasis when it is indicated according to the symptoms. **Planets:** Saturn.

Homeopathic

The Kali-ar. patient tends towards anxiety and skin diseases. He is restless, nervous and anemic. It is a valuable remedy for inveterate skin diseases and when patient's condition tends towards malignancy. All the sufferings are worse at night. Sudden noise or touch throws the whole body into a tremor. The tongue, burns, numb, neuralgia. Palpitations with nephritis. Burning in throat. Aching in stomach. Passes much gas then diarrhea.

Cauliflower-like excrescences of os uterus with flying pains, foul smelling discharges and pressure below the pelvis. Intolerable itching worse undressing, walking, warmth.

Chronic eczema. Psoriasis. Numerous small nodules under the skin. Black leg ulcer running bloody, foul water with cutting, burning, itching and dyspnea. Phagedenic ulcers, deep base and turned up edges.

Such weakness she cannot sit up in bed, a loud noise or sudden, unexpected motion throws her whole body into a tremor. Emaciation. Tremors. Faintness. Chilly and sensitive to cold. Cannot get too warm even in summer.

Rheumatic, gouty and syphilitic pains. Gouty nodosities. Bright's disease, deafness.

Diarrhea, dropsy, eczema, epithelioma, exophthalmos, eye affections, herpes zoster, measles, military rash. Neurasthenia, psoriasis, skin affections, neuralgia of tongue, varicose veins and ulcers make up the roster of complaints that this remedy has helped and cured.

Clinical

Asthma. Bright's disease. Cancer. Deafness. Diarrhea. Dropsy. Eczema. Epithelioma. Exophthalmus. Eye disorders. Herpes zoster. Jealousy. Measles. Melancholy. Miliary rash. Lung disorders. Neuralgia. Neurasthenia. Psoriasis. Skin, disorders. Tongue, neuralgia. Varicose veins. Ulcers.

Modalities

Worse touch and noise. Worse cold feet. Worse 1 to 3 a.m.

Symptoms

MIND

Great nervousness. Anxiety and panic attacks. Fear of heart disease. Fear of high blood pressure of having a stroke. Anxiety about health. Mentally, the patient needing this remedy is morose and quarrelsome, behaves like a person, startled, fixed look, protruding brilliant eyes, anxiety and fright. Depression, melancholy. Scolding, retired and discontented, jealous. Indifferent to everything, scarcely answered questions addressed to her or replies to them in a peevish tone. Face looks frightened and anxious, worse every third day.

Abdomen

Burning pain in bowels, unquenchable thirst, belly tense and painful involuntary watery stools with sense as if a red-hot iron were in anus. Frequent griping pains in bowels and constant desire for stool, considerable tenderness in whole abdomen, which is distended.

Back

Much pain and tenderness down spine.

Eyes

Startled look with protruding, brilliant eyes, pale face and sunken cheeks. **Eyes** red. Heat and itchiness of lids, followed by swelling and tenderness, conjunctiva becomes inflamed, eye sensitive to light, dark discoloration round orbit. Itching of conjunctiva. Protrusion of eyeballs.

Whites of eyes look thick and yellow. Jaundice. The blue iris becomes more gray. Conjunctiva glassy. Injected conjunctive and eyeballs fixed. *Right eye weaker, watery, as after weeping.*

PAGE 885

Head

Headache in left parietal bone, as if it was sore and pressed upon by hand, behaves like a crazy person. Constricted feeling in head, as if there was a wound in the bone which was being scratched. Crusta lactea. Thought her head felt larger.

Heart

Weak heart. Palpitations with anxiety and fear. Pulse weak and contracted. Pulse is small, scarcely perceptible, rapid. High blood pressure from worry and fear.

Face

Nodular eruption on face, boils. Face pale. Complexion muddy. Looks older.

Furfuraceous eruption on beard.

Female

Cauliflower excrescences of uterine cervix with flying pains, foul smelling discharge and pressure below pubis. Menses absent. Milk entirely arrested afterwards restored by treatment.

Food

Appetite lost. Intense thirst.

Kidneys

Urine scanty with pellicle.

Limbs

Aching pain in right shoulder and elbow, followed by herpetic eruption. Palms and soles speckled over with corns. Knees bent up so he could not move his feet. Varicose veins of legs. Crampy feeling of lower limbs with partial loss of motion and sensation, livid in places, tending to slough.

Mouth

Gums swollen and tender. Tongue clear, red like raw beef. Tongue coated on edges only with mucous stripes. In middle towards tip of tongue a smooth, red spot with troublesome burning and numbness. (Neuralgia of tongue). Tongue swollen, felt too large in mouth.

Tongue whitish.

Rectum

Violent diarrhea. Stools white, watery, frothy. Sensation as of a red-hot iron in anus.

Sensations

As if a red-hot iron were in anus. The head feels larger. Anxiety felt in solar plexus.

Protrusion of eyeballs.

Burning and numbness of tongue. Tongue feels too large. Sensation of a ball rising from pit of stomach to larynx causing suffocation.

Skin

Intolerable itching, worse from undressing. Dry, scaly, wilted. Acne, pustules worse during menses. Chronic eczema, itching worse from warmth, walking, undressing. Psoriasis, lichen. Phagedenic ulcers. Fissures in bends of arms and knees. Gouty nodosities, worse change of weather. Skin cancer, where suddenly an alarming malignancy without any external signs sets in. Numerous small nodules under skin.

Stomach

From pit of stomach to spine an anxiety feeling with palpitations. Empty feeling in stomach. Sinking at epigastrium with faintness. Constant pain and nausea after food, frequent vomiting of ingesta. Weight in stomach feeling after eating. For one or two hours, repeated every five or ten minutes, sensation as of a ball rising from pit of stomach to larynx threatening suffocation, better by loud belching.

Throat

Some gastric cough and frequent raking of throat and fauces of a muco-purulent secretion mixed with specks of blood. Complete aphonia, following skin affection.

Sensation in throat and larynx as if forced asunder. Throat dry and sore. Throat constricted with copious flow of saliva.

Comments

The cases of Kali-ar. poisoning with massive doses present nothing to distinguish them from cases poisoned with other arsenical preparations. But Kali-ar. has had a short proving and a number of cases of medicinal provings in allopathic hands are on record.

Jonathan Hutchinson has recorded a number of cases of right-side herpes. One of his patients observed that whilst taking Kali-ar. her sclerotics became thick and yellow instead of clear and bluish. The iris which was blue became more gray. Her skin instead of being fair and florid became muddy and older looking.

PAGE 886

This was a mystery to Hutchinson seeing that he usually gave Kali-ar. to make the skin clearer, but he was compelled to record the homeopathic fact, though he did not apparently perceive the homeopathic solution of the mystery.

The same authority has put on record cases of epithelioma developing after prolonged medication with Kali-ar. for psoriasis. The skin symptoms of Kali-ar. are exceedingly well marked.

In one case an attack of measles was almost exactly depicted. Itching was worse at night and worse on undressing, worse by warmth.

Periodicity was marked as with Ars., symptoms were worse every other day in the morning, mind symptoms worse every third day.

The right-sidedness of Ars. was reproduced in the right-sided herpes, repeatedly noticed by Hutchinson, but there was a left-sided headache.

A case of deafness of years, standing was cured with Fowler's Solution, associated with constant sickness, nothing could be kept down.

Compare

- (1) Levico, Nat-a. and other Arsenic compounds.
- (2) Chin. - periodicity.
- (3) Cic. - fixed eyeballs.
- (4) Rumex and Jug-r. - worse on undressing.
- (5) Iod., Kali-bi., Merc-c.

Relations

In some cases of overdosing Kali-i. proved antidotal. For other antidotes see Ars. which it greatly resembles and with which it must be compared.

SOURCES

Kalium bichromicum

(bichromate of potash)

Pharmacy

Kali-bi. Kali bichromicum. Red Chromate of Potash. Bichromate of Potash. Potassium bichromate. Potassium dichromate. Solution in distilled water. Trituration. Historical dose: All potencies, third trituration to thirtieth potency and higher.

History

Kali bichromicum with the other Chromium preparations, Chr-ac. and Chro-ox. owes its introduction into the Materia Medica to the late Dr. J. Drysdale, whose monograph upon it, forming one section of the Hahnemann Materia Medica.

The Bichromate of Potash, which is manufactured in large quantities from chrome-iron-ore is the preparation from which all other salts of Chromium are derived.

The native association of Chromium with Ferrum is worthy of note. The Bichromate is largely used in the arts in dyeing, calico-printing, wood staining in photography and as a solution for producing the current in electric batteries.

Many of the most remarkable symptoms were obtained from workmen engaged in the preparation of the salt. Some of these had been noted before Drysdale took up the study of the drug. The first proving was published by him in 1844 in the British Journal of Homeopathy. The following year it was proved by the Austrian Society.

Among these keynote of Kali-bi. four may be named as pre-eminent: (1) Discharges from mucous membranes of thick yellow, green tough, stringy mucus or mucus, which adheres to the part and can be drawn out in strings. (phlegm heat)

(2) The occurrence of pain in small spots. (phlegm heat) In connection with this is another feature showing a sharply defined action:

(3) Punched-out, perforating ulcers, occurring on skin, mucous membranes and affecting bones. (toxic phlegm heat as phlegm deposits at one spot and excoriates the place including bones)

(4) Alternating and shifting conditions: Pains wander from part to part, (wind) rheumatic pains alternate with gastric symptoms or with dysentery. (rheumatic pain, gastric symptom, dysentery all due to wind phlegm heat) headache alternates with blindness, (headache, blindness due to phlegm heat blockage) fibrinous deposits extend downwards. (phlegm)

Kali-bi. has been used in syphilis. In secondary and tertiary syphilis "chrome-water" was also remarkably successful. In homeopathic practice Kali-bi. has been also been successful. Its symptoms correspond to a variety of diseases.

PAGE 887

Especially keratitis and iritis, ozaena, bone-pains and nodes, (phlegm heat) sore throat, syphilitic rheumatism and ulcers. In very weak solutions (about 1 to 2,000) Kali-bi. has been used with much success as a local application for ulcers, especially treating horses for farcy, using the remedy both externally and internally.

Homeopathic

Kali-bi. specially affects the mucous membranes of the air passages, nose, pharynx, stomach and duodenum, producing thick, sticky, ropy, stringy tough, lumpy or thick discharges. Diseased conditions progress slowly (phlegm) but deeply, (phlegm) causing great weakness bordering on paralysis (phlegm may be) but little fever. (phlegm) Plastic or fibrous exudations spread downwards.

Mucous membranes everywhere are affected. Catarrh of pharynx, larynx, bronchi and nose and a tough, stringy, viscid secretion is produced, which condition is a very strong guiding symptom for this drug. Perforation of the septum. (toxic phlegm heat) Chronic atonic catarrh. Polyps. (phlegm) Dilatation of stomach and heart. (phlegm heat)

Pains migrate quickly, rheumatic and gastric symptoms alternate. More adapted to sub-acute (due to phlegm) rather than the violent acute stage. Pains occur in small spots (phlegm) or migrate quickly from place to place (wind) and finally attack the

stomach. (place of phlegm production) Rheumatic and gastric symptoms alternate. Diagonal pains. (wind) Ascending symptoms, gastric pains, chills, heat etc. (wind heat) Pains appear and disappear suddenly. (due to wind or phlegm stagnation suddenly may be) Cracking of joints. (wind)

Shooting (wind) from root of nose to external angle of eye begins morning increases to noon and cease towards evening (sun-headache). (wind heat) Affections of autumn and spring.

Complaints of hot weather are particularly likely to want Kali-bi., but at the same time there is "great liability to take cold in open air," and "moderately cold air is felt very unpleasantly." Eruptions begin in warm weather (opp. Rhus-t.).

The formation of crusts on mucous membranes and skin. (phlegm heat) Ulcers with dark dots, deep, perforating, round, punched out with over-hanging edges or thick crusts. Septic or peptic ulcers. (toxic phlegm or damp heat) Sensation of heaviness in different parts. (phlegm)

As if a hair on tongue in nostrils etc. (sticky phlegm) Yellowness of discharges, eyes, vision tongue etc. (damp heat) Sharp stitching pains. (phlegm heat pain, phlegm—stitching) Itching internally (phlegm) in vagina, ear, lungs etc. (wind or damp heat) Indolent or sluggish reaction in many conditions, (phlegm) ulcers inflammations etc. (damp heat) Stubborn (phlegm), suppurations. (heat so phlegm heat) Neuralgia, daily at the same hour. (wind heat, wind cold, toxic heat, qi and blood stagnation, periodicity means liver involved and wind heat means liver yang rising may be due to kidney yin or liver blood deficiency) Membranes look furred. Epilepsy, rosy saliva from mouth during convulsions. (phlegm heat epilepsy and convulsion) Weakness and weariness after pains. Sickly, chilly and cachectic.

Clinical

Acne. Anemia. Asthma. Blotches. Bone, disorders. Bronchitis. Burns. Cachexia. Catarrh. Menopausal flushes. Coccyx, pain. Conjunctivitis. Constipation. Cornea, opacities. Colds. Coryza. Descemetitis. Duodenum, ulcers. Dyspepsia. Ears, pains inflammation internal and external. Emaciation. Epilepsy. **Eyes**, inflamed. Farcy. Gastric ulcer. Glanders. Gleet. Gonorrhea. Gout. Hay fever. Headache. Intermittent fever. Intestines, ulceration. Iritis. Keratitis. Lumbago. Lupus. Measles. Mumps. Neuralgia. Nightmares. Nodes. Nosebleed. Nose, soreness. Obesity. Ophthalmia. Ozaena. Polyps. Post-nasal catarrh. Pruritus vulvae. Rheumatism. Rhinitis, atrophic. Sciatica. Scrofula. Sinusitis. Smell, illusions. Sun-headache. Sycosis. Syphilis. Throat, sore. Tobacco intolerance. Trachea disorders. Ulcers. Urethritis. Warts. Whooping cough.

Causations

Ill effects from indulgence in beer and malt liquor.

Constitutions

It is adapted to fat, fair, fleshy, light complexioned persons. (phlegm dominated) subject to catarrhs or with syphilitic (heat dominated) or scrofulous history. (phlegm heat) Kali-bi. is especially suited to fair-haired, fat persons, especially fat, chubby children, sluggish people.

Kali-bi. is particularly suited to fat people. **Planets:** Jupiter, Saturn, Moon.

Modalities

Better from heat, wrapping up. Better motion, (excess condition or cold or yang deficiency) pressure. (deficiency of qi blood yin etc) Open air ameliorates, especially vertigo, but aggravates the gastric complaints and chilliness. Worse from cold, damp, open air, spring. Worse from undressing. Worse morning, 2-3 a.m. after sleep. (liver time liver yang rising that is wind heat) Worse from protruding tongue. Worse from hot weather. (due to damp heat problem with cold and heat both) Worse from alcohol, beer, (increase damp heat) suppressed catarrh. (suppressed phlegm heat) Worse from stooping, sitting. (yin dampness blockage or spleen qi stagnation increases) Worse by eating, eating causes cough, causes weight in stomach. (phlegm in stomach)

Symptoms

MIND

Mentally ill-humored (phlegm stagnation in heart) and low in spirit. (phlegm stagnation). listless, (phlegm) aversion to mental and physical exertion, (phlegm stagnation) weak memory, (Heart/spleen vacuity, kidney essence vacuity, breakdown of interaction of heart and kidney, phlegm, blood stasis.) vanishing of thoughts. Anxiety arising from chest. (Yin ↓ w/ hyperactive HT Fire, LR Heat, Phlegm-Heat) Indifferent. (Phlegm dampness clouding the clear portals, qi depression with blood vacuity, liver/kidney vacuity, sea of marrow vacuity, blood stasis and qi stagnation.) Indolent, (phlegm) aversion to mental and bodily labor. Fear of people, avoids human society.

Abdomen

Stitches in region of liver and spleen and through to spine. Cutting pain in abdomen, soon after eating. Cutting pains to loins, cannot walk, extends to groins. Chronic intestinal ulceration with vomiting and emaciation. Painful retraction, soreness and burning. Feeling of constriction from liver to shoulder (right). Stitches in spleen extending to lumbar region. As if something eating in bowels.

Back

Pain in coccyx and sacrum extending up and down. Stiffness of neck worse bending head forward. Cutting through loins, cannot walk. Pain in coccyx worse walking, sitting and touching it, extending up and down. Coccyx pains before urination, better after. As if something cracked across sacrum worse stooping.

Breasts

Milk, stringy, watery.

Chest

As of a bar across the chest. Cough with pain in sternum, extending to shoulders, worse when undressing. Pain at bifurcation of trachea on coughing from mid-sternum to back.

Ears

Sharp stitches in ears (left). Thick yellow fetid discharge. Violent tickling in ears. Tympanum perforated. Swollen with tearing pains.

Eyes

Ulcers on cornea, no pain or photophobia. Conjunctiva, yellow, puffy, covered with yellow-brown spots. Supra-orbital neuralgia, right side. Discharge ropy and yellow. Descemetitis with only moderate irritation of eye. Conjunctivitis, granular lids with pannus. Iritis with punctate deposits on inner surface of cornea. Slight pain with severe ulceration or inflammation. (Con. opposite.) Blindness, before headache. Vision seems crossed better looking with one eye. Eyelids, swollen, winking during convulsions,

itching, granular. Dense opacities of cornea. Photophobia only by daylight. Eyelids twitch on opening.

Face

Pale, yellowish. Blotchy, red, florid. Blotchy, red appearance. Acne. (Jug., Kali-ars.) Bones sensitive, especially beneath orbits. Mumps on the right side. Sweat on upper lip.

Female

Menses with suppression of urine or red urine. Leucorrhoea, acrid, yellow, ropy with pain across sacrum and heaviness in the hypogastrium. Prolapse uterus worse hot weather. Itching burning of vulva with sexual excitement. Vomiting of pregnancy. Pruritus vulvae with great burning and excitement.

Food

Desire for beer and acids. Dislikes water. Cannot digest meat. Beer and malt liquors aggravate, though he craves them. Overeats.

Head

Periodical headaches. Migraines in small spots and from suppressed catarrh.--- Headache, over eyebrows, preceded by blurred vision.--- Blindness, followed by violent headache, over eyebrows or outward along the brows.--- Headache, worse cold, better pressing at the root of the nose,--- by warm soup. Aching and fullness in glabella. Frontal pain, usually over one eye. Bones of head feel sore, sharp, stitches in bones. As of a solid block in forehead.

Heart

Dilated with kidney lesions insufficiency of aortic valves. Cold feeling around heart.

(Kali-n.) **Heart** weak. Pulsation felt in all the arteries.

Kidneys

Burning in urethra. After urinating a drop seems to remain which cannot be expelled. Ropy mucus in urine. Urethra clogged up. Heavy kidneys. Kidney congestion. Nephritis with scanty, albuminous urine and casts. Pyelitis, urine with epithelial cells, mucus, pus or blood. Hematochyluria. Bloody urine and pain in back.

PAGE 889

Limbs

Pains fly rapidly from one place to another. (Kali-s., Puls.) Very weak limbs. Paralytic weakness of hands. Left-sided sciatica, better motion. Sciatica, better motion and flexing the leg, worse standing, sitting or lying in bed. Bones feels sore and bruised. Wandering pains, along the bones, worse cold. Tearing pains in tibia, syphilitic rheumatism. (Mez.) Pain, swelling and stiffness and crackling of all joints. Soreness of heels when walking. Pains in small spots. (Ox-ac.) Pain along border of the foot. Rheumatic pains worse eating. Achilles tendon swollen and tender. Shin bones, painful, periostitis from blow.

Liver

Soreness in right hypochondrium, fatty infiltration of liver and increase in soft fibrous tissue.

Lungs

Dry metallic hacking cough. Profuse, yellow expectoration, very glutinous and sticky, coming out in long, stringy and very tenacious mass. Membranous croup, extending to larynx and sinuses. Asthma worse sex. Cough better expectoration.

Male

Itching and pain of penis with pustules. Ulcers with paroxysmal stitches, aggravated at night. Syphilitic ulcers with cheesy, tenacious exudation. Chancres ulcerating deeply. Constriction at root of penis, at night on awakening. Gleet with stringy or jelly-like profuse discharge, clogging the urethra. Erections. Sexual desire absent in fleshy persons. Stitches in prostate when walking, must stand still.

Mouth

Toothache, radiating with swelling of the glands. Tongue, glistens, cracked, red, dry, shining, smooth or heavy, lemon yellow, furred in dysentery. Tongue, thickly coated, broad, flat indented. Tongue pains when protruded, at the root. Sticky mouth. Dry, viscid saliva. Sweet, metallic, taste. Aphthous ulcers deeply corroding. As of a hair on back part of the tongue, not better by eating or drinking. Mouth dry better by drinking cold water.

Nose

Sinusitis with distress and fullness at root of nose. Loss of smell. Nasal discharges, thick, ropy, sticky, greenish, yellow, acrid. Tough, elastic plugs, leave a raw surface. Large clinkers. Inability to breathe through nose. Post-nasal dripping of thick mucus. (Hydr.) Much hawking. Pains at bridge or root. Suppressed catarrh. Coryza with obstruction of nose. Snuffles, especially of fat chubby children. Expired air feels hot. Tickling as from a hair in left nostril. Coryza with obstruction of nose. Violent sneezing worse in the morning. Nasal septum ulcerates, round ulcer. Abscess. Ozaena. Fetid smell from retention of discharge in nose. Nasal diphtheria. Two loose bones as if rubbing together on blowing the nose. Nose, feels heavy, dry. Nasal polyps.

Rectum

Stools, jelly-like, gelatinous, worse mornings. Dysentery, tenesmus, stools brown, frothy. Sensation of a plug in anus. Periodic constipation with pain across the loins and brown urine.

Skin

Acne. Pustules with black apices. Papular eruptions. Ulcers with punched-out edges with tendency to penetrate and tenacious exudation. Depressed, round, scars after healing of eruptions or ulcers. Pustular eruption, resembling small-pox with burning pains. Skin, hot, dry and red better cool air. Itching with vesicular eruption. Brown spots. Blisters on soles.

Sleep

Unrefreshing, feels debilitated in limbs.

PAGE 890

Stomach

Gastric symptoms are relieved after eating and the rheumatic symptoms reappear. Feels as if digestion had stopped. Dilatation of stomach. Gastritis. Sore spot in stomach or food lies like a load. Round ulcer of stomach. Nausea with heat in the body better eating and open air. Nausea with burning in anus and erections. Nausea and vomiting after beer. Vomiting more than he drinks of bright yellow water. Regurgitates liquids. Vomiting of bright yellow water.

Temperature

Hot flushes, then sticky sweat, then chill. Cold sweat on hands and feet. Chill with sweat.

Throat

Catarrhal laryngitis, cough has a brassy sound. Hawks up thick mucus, must wipe it away. Voice hoarse worse evening. Tickling in larynx with cough, worse eating with belchings better heat, then vertigo. Fauces red and inflamed. Dry, burning and rough. Parotid glands swollen. Uvula relaxed, edematous, bladder-like. Pseudo membranous deposit on tonsils and soft palate. Burning extending to the stomach. Aphthae. Diphtheria with profound prostration and soft pulse. Discharge from mouth and throat tough and stringy. Fissured pharynx. Something sticks in with pain into neck and shoulders. Throat pains when putting the tongue out. Tonsils swollen with deafness in children.

Vertigo

Vertigo with nausea. Vertigo in many complaints, on stooping or when rising from a seat. Comments

Among other leading characters, scarcely less distinctive are: (a) The formation of plugs or clinkers on mucous membranes.(phlegm) especially in the nose. This may be regarded as an advanced stage of the stringy mucous secretions.

(b) Still another variety of this is the formation of false membranes(phlegm) as in croup and diphtheria with hoarse, metallic cough and the formation of casts of the bronchial tubes (phlegm stagnation)in fibrinous bronchitis.

(c) Yet another characteristic mucous discharge is one of "jelly-like mucus.(phlegm)" (d) Indigestion from drinking beer, loss of appetite, weight in pit of stomach(phlegm) immediately after eating, flatulence.

(e) Among peculiar sensations the "hair sensation"(sticky phlegm) is marked in Kali-bi. It occurs chiefly on the back part of the tongue and in the left nostril.

One of its effects is "odorless stools.(phlegm) and the oxygen element is probably accountable for this. Another point in this connection is that the antidotes to poisonous doses of Kali-bi. are the same as the antidotes to the acids.

Storer cured with Kali-bi. a case of asthma in a man who noticed that the attacks were caused by and always followed sex. Kali-bi. was prescribed on other indications, but this symptom must be noted for future verification.

Kali-c. has marked "worse from sex" and also from emissions. This is very characteristic and has led to many cures.

Kali-bi. has many symptoms of ulceration internal and external. Nash relates a good cure with Kali-bi. A women had deep punched-out ulcers with regular edges. One of them had perforated the soft palate and threatened the whole palate. It had a syphilitic appearance and also a stringy discharge, but not to a great amount.

In three weeks Kali-bi. 30c made cure which proved permanent, the local condition entirely healed and the patient's general state improved correspondingly.

J. B. garrison records the rapid action of Kali-bi. in two cases of intermittent fever on an indication given him by Martin Dischere. The latter once took by mistake an overdose of Kali-bi., which was followed by vomiting of a large quantity of bright yellow water. (large quantity of water-damp and yellow-heat so damp heat) tasting very bitter.

(1) Garrison's first case was a laborer, ill a month with fever, pains and paroxysm at 1 p.m. Just before Garrison saw him he had vomited " a large quantity of bright yellow water."

PAGE 891

Kali-bi. 1x, one grains dissolved in a tumbler of water, a teaspoonful every two hours, cured at once.

(2) The second case was that of a woman who had been nine months under allopathic treatment. She had not been out of the house for two months and had been told she could not recover. Among other symptoms was this: Vomited much more than she drank (phlegm or damp) in the morning vomited a large bowlful of bright yellow fluid.

The yellowness (heat) of Kali-bi. secretions and excretions is noteworthy.

Kali-bi. is particularly suited to fat people and Goullon gives the case of an enormously fat man of "formless colossal body " who complained of chronic accumulation of phlegm. He seemed fairly filled up with it, especially in morning, for which all domestic remedies and mineral waters had been given in vain.

Kali-bi. 2x was ordered, a few grains in hot water every evening. In two weeks the patient could resume his walks. He felt easy on his chest, the accumulation of phlegm disappeared, his bowels became regular instead of constipated.

H. W. Champlin, cites a case of chronic rheumatism in an old lady over 70 confirming symptoms of Kali-bi. She was restless and sleepless at night and Rhus-t. relieved this somewhat, but closer investigation brought out this:

(1) The pains changed rapidly from one place to another and (2) they occupied small spots that could be covered with the point of a finger. Kali-bi. cured rapidly.

Kali-bi. also has rheumatic-like or shooting and pricking pains here and there. In one prover the rheumatic pains were worse and the gastric pains better after eating. There were cramps in various parts, twitches in hands and feet, stinging pains all over. Pains in short jerks as if a nerve were suddenly pulled. (jerks—heat, pulling pain-qi stagnation so wind heat)

Sudden pains. (excess condition) Pains appear and disappear suddenly. (wind)

Diagonal pains. (wind) right breast and left elbow. Left forearm and right occiput. Right knee and hip. Left breast and right shoulder.

Shifting pains and sudden pains. (Lac-c.) Right axilla, left thigh. Right big toe, left little finger. Right forearm, left elbow. Right foot, ankles, shin, left hip, arm, shoulder.

Painful vomiting, sour and mixed with clear mucus, may be bitter from the presence of bile, vomiting caused by every attempt to eat or drink (phlegm or wind in the stomach) with distress and burning rawness about the stomach.

This corresponds to the vomiting of alcoholics, especially in beer-drinkers, also to gastric ulcer. The abdomen swells up immediately after a full meal. (phlegm) Food lies like a load as if digestion were suspended. (phlegm) There is aversion to meat and longing for beer and for acid drinks. (phlegm)

It removes the chronic effects of drinking too much malt liquor, especially lager beer. Some of the workmen found they could not drink coffee as it made them worse and they were obliged to take tea instead. This bears out Hering's dictum that "wine-drinkers should take coffee and beer drinkers should take tea." Coffee antidotes wine and tea antidotes beer, so as Kali-bi. corresponds to bear effects tea will be likely to agree with it better than coffee.

Kali-bi. causes great prostration, discomfort, debility and desire to lie down. The neuralgic attacks sometimes recur every day, at the same hour. Epilepsy has been cured by it when there was flow of tough, stringy fluid from the mouth in the attacks.

In the cough of Kali-bi. the stringy, difficult expectoration and early morning worse will generally indicate or a pain from mid sternum through to back. (due to phlegm) But there is also a cough caused by eating.

W. J. Pierce records the case of James S., 40. For four months past, as soon as he swallowed food (not liquids), a tickling in throat excited a severe cough, (tickling—sticky cough or qi stagnation) which stopped only on vomiting and was followed by a watery coryza. This was so distressing that for two months he had eaten only two meals a day. There was pharyngeal catarrh with stringy mucus hanging from naso-pharynx. Kali-bi. 1c, a tablet every two hours, was given. He had no more vomiting and only coughed twice in the next five days and was soon quite cured.

Kalium bromatum

(bromide of potash)

Pharmacy

Kali-br. Kali bromatum. Bromide of Potassium. Potassium Bromide. Solution.

Trituration. Historical dose: Trituration and all potencies, third trituration and higher.

History

Remember the unstable character of this salt. Said to be much more active if salt is eliminated from the diet. Like all Potash Salts, this weakens the heart and lowers temperature. Brominism is caused by it. Kali-br. has been proved, but the greater part of the pathogenesis is made up of symptoms observed in allopathic overdosings to which are added symptoms cured in the practice of homeopaths.

In old-school practice Kali-br. has been given in epileptic and other convulsive disorders with the idea of overwhelming disease than of curing it. The effect has been in numberless cases to reduce or prevent the recurrence of epileptic attacks.

At the expense of keeping the patient constantly under the influence of the drug and producing a state of mental imbecility, "decreasing the excitability and power of the motor cells of the brain" (Alberton.)

Along with this it has produced a great variety of skin eruptions. At the same time, Kali-br. has a decidedly specific relation to epilepsy and the epileptic state and in its own cases will cure in the potencies.

One of the most troublesome "accidents" of the allopathic use of Kali-br. is the production of eruptions of many kinds, but most notably acne. Acne has a very definite relation to the sexual organs, being especially noticeable at puberty and in women at the menstrual period. Clarke knew of no remedy of such universal usefulness in cases of simple acne as in Kali-br. 30c.

It has produced moist eruptions and pityriasis of the scalp. The sebaceous follicles are particularly affected, which should give it a place in seborrhea. Erythema nodosum was observed in some patients under its influence.

The old-school contra-indications for the Bromides are: General weakness and feebleness of the nervous system, post-typhoid and post-puerperal insanity, senile softening of the brain and when the gastro-intestinal mucous membrane is irritated (Hare). These are keynotes for Kali-br. in potencies.

Homeopathic

Kali-br. affects the mind and nerves, producing failure of mental power, general numbness and anesthesia of mucous membranes especially of eyes, throat and skin.

Its power over sexual sphere is very great, patient has sexual fancies, satyriasis and nymphomania. General failure of mental power and loss of memory. Melancholia.

Anesthesia of the mucous membranes, especially of eyes, throat, skin.

PAGE 893

Acne, loss of sexual desire, paralysis. Leading remedy in psoriasis. Nodular form of chronic gout. Symptoms of strokes. Uremia, aphasia, somnolence and stertor, convulsions, albuminuria.

Kali-br. for epilepsy with a salt-free diet. Epilepsy is associated with sexual excess or abuse in men and in women fits occur during menses, fits usually occur during new moon and are followed by headaches. Onset of diseased condition is slow without any pain.

Paralysis. Weakens the heart and lowers temperature. Parkinson's disease.

Clinical

Acne. Aphasia. Asthma. Cholera infantum. Chorea. chordee. Colic. Delirium. Delusions. Diabetes. Epilepsy. Erythema. Hemorrhoids. Impotence. Insanity. Insomnia. Laryngeal spasms. Laryngismus. Locomotor ataxia. Mania. Nightmares. Nose, eruption. Ovaries disorders. Paralysis. Parkinson's disease. Paralysis. Polyps, rectal. Psoriasis. Screaming. Sebaceous cysts. Seborrhea. Self-abuse. Sensibility, loss. Sleeplessness. Sleepwalking. Speech, disorders. Strokes. Syphilis. Tetanus. Urine incontinence.

Causations

Ill effects of worry, loss of business, reputation and embarrassment, illness or death of a near friend. Anger. Fright. Chorea from fright. Emotional disturbance. Sexual excess.

Sexual abuse.

Constitutions

Nervous constitutions. Children who from time of birth can swallow solids with ease, yet choke every time they try to drink. **Planets:** Moon.

Modalities

Better from when busy mentally and physically. Skin better in cold weather. Worse from mental exertion, emotions, anger. Worse from fright, worry, grief. Worse periodically, at night, 2 a.m. Worse summer, new moon. Worse from puberty. Worse unsatisfied sexual desire, sexual excess.

Modalities

There is chilliness in a hot room and itching during high fever. worse In hot weather, worse in summer. Cough worse lying down.

Symptoms

MIND

Senile softening of the brain. Loss of memory, forgets how to talk, has to be told the word before he can speak it. Amnesic aphasia. Brain fag from grief and anxiety. Slow, hesitates, omits or mixes up words in talking and writing. Fidgety, busy hands, fumbles. Moves arms about wildly.

Depression and insomnia. Melancholy, much concerned about health, complains without cause. Feeling of moral deficiency, religious depression. Remorse, wrings hands, bursts into tears. Imagines he is singled out as an object of divine wrath.

Paranoid delusions, thinks he is pursued, will be poisoned, will commit some great crime, will murder her children or husband. Suspicious, looks on all sides, fears people, yet cannot remain alone in the dark. Fear of being poisoned. (Hyos.) Horrid illusions.

Active delirium.

Delusions of conspiracies against him. Suicidal mania with trembling. Profound indifference and disgust for life.

Abdomen

Spasms in with retraction of walls. Prostration. Internal coldness. Sensation as if bowels were falling out. Cutting colic. Enlargement of liver and spleen. Small tumor in region of spleen. Abdomen sunken, almost stuck to vertebral column.

Back

Tabes dorsalis from sexual excesses. Backache, tired lameness of legs.

Chest

Burning in chest. Pneumonia in alcoholics.

Ears

Hardness of hearing. Sounds echo in ears. Roaring synchronous with pulse, at night. Ringing in ear. Roaring in ears at night synchronous with pulse. Sounds echo in ears, headache. Hard of hearing.

Eyes

Sunken, eyeballs move in every direction. Squinting after night terrors of children. Vision dim. Lusterless, gaze fixed. Vessels of fundus enlarged, conjunctive congested. Squinting after night terrors of children.

Face

Flushed, yellow, cachectic. Acne on face. Expressionless face incipient softening of brain. Complexion yellow, cachectic. Face flushed. Acne, on face in young fleshy people. Papular rash.

Female

Fibroids. Subinvolution. Sexual feeling lost. Aversion to sex, (Sep.) Nymphomania during puerperal state. Pruritus. Sterility from excessive sexual indulgence. Ovarian

neuralgia with great nervous uneasiness from ungratified sexual desire. Cystic tumors of ovaries. Flooding in young women with sexual desire. Menorrhagia from strong sexual desire.

PAGE 894

Food

Taste foul, salty, lost. Anorexia, foul breath, white tongue, salty taste in mouth. Thirst intense with dry mouth. Troublesome pressure at stomach after dinner, lassitude.

Head

Brain-fag. Numb feeling in head, worse occiput. Symptoms of a stroke. Violent headache or numbness felt in occiput from concussion of brain.

Kidneys

Diabetes mellitus. (Ph-ac.) Dribbling of urine at the beginning of stools. Bedwetting. Urethra numb. Sensibility of urethra diminished. Urine profuse with thirst. Neuralgia of neck of bladder. Diminution of sensibility of urethra. Urine profuse with thirst. Urine with abundance of phosphates, copious, pale, scanty. Incontinence of urine. Thin, yellowish urine. Nocturnal involuntary emissions of urine.

Limbs

Jerking and twitching of muscles. Fidgety hands, busy twitching of fingers. Hands and fingers in constant motion. Trembling of hands during voluntary motion. Unsteady gait. Cannot stand erect, legs weak.

Lungs

Croupy cough. Spasmodic croup. Reflex cough during pregnancy. Breath hot, hurried. Asthma with dry cough tosses arms about wildly. Cough dry, fatiguing, hacking cough at night.

Male

Excessive sexual desire with constant erections at night. Debility and impotence. Effects of sexual excesses, especially loss of memory, impaired co-ordination, numbness and tingling in limbs. Sexual excitement during partial slumber. Desire is lessened, even impotence. Impotence with melancholy, epilepsy, nervous prostration.

Mouth

Difficult speech, stammering. Breath fetid. Numb. Tongue protrudes with a jerk, Chorea. Tongue is red, dry, enlarged: red. Fetid breath, a peculiar sickening odor tongue white. Saliva profuse with fetid breath. Suppressed salivation in teething children.

Nose

Smell impaired. Coryza with tendency to extension into throat. Thick mucus and yellow scabs in nostrils. Erythematous swelling of nose.

Rectum

Cholera infantum with reflex cerebral irritation, jerking and twitching of muscles. Green watery stools with rapid collapse. Rectal polyps, persistent diarrhea, much blood expelled. Painless diarrhea with great chilliness, even in a hot room. Stools, watery (like rice-water), painless. Asiatic cholera, first stage, vomiting, cramps, rice-water discharges, restores secretion of urine. Constipation, stools very dry, hard and infrequent.

Sensations

Parts feel as if growing large. Paroxysms of numbness, feels as if needles were pricking him. Trembling sensation.

Skin

Itching, worse on chest, shoulders and face. Psoriasis. Moist eczema of legs. Anesthesia of skin. Skin cold, numb. Scars remaining after eruptions. Moist eruptions. Acne simplex and indurate, bluish red, pustular, worse on face and chest. Eruption of small boils in successive crops with troublesome itching. Large indolent, painful pustules, boils. Long lasting scrofulous ulcerations. Syphilitic psoriasis.

Sleep

Extreme drowsiness. Sleeplessness, due to worry, grief and sexual excess. Night terrors in children, awake screaming, unconscious, recognizes no one, followed by squinting.

Grinding teeth in sleep. Restless sleep.

Horrible dreams. Sleepwalking in children.

Stomach

Vomiting with intense thirst after each meal, hysterical after exciting emotions. Persistent hiccough. (Sul-ac.)

Teeth

Odontitis of children. Difficult dentition of children. Vomiting and diarrhea of teething children.

PAGE 895

Temperature

Painful flushing of the the face during menopause. Body cold, skin corrugated and mottled. Shivering with cold and cold skin. Heat like cold stage, not very strongly marked. Head hot, feels as if in a furnace with coldness and chills. Sweat abundant, viscid, all over, long lasting and exhausting (ague).

Throat

Congestion of uvula and fauces. Anesthesia of fauces, pharynx and larynx. Numb. Dysphagia of liquids, (children), can swallow only solids. (Hyos.) Anesthesia of mouth, throat and pharynx, (chronic alcoholism). Uvula and fauces congested, then edematous. Dryness of throat. Diphtheria with quick pulse, fever, dry tongue offensive breath.

Vertigo

Vertigo, as if ground gave way and staggering gait. Vertigo is worse by stooping. Dizziness, noises in ear, nervous excitement, sleepless. Vertigo with palpitations, nausea and even unconsciousness.

Comments

Kali-br. has a very profound action on the the generative organs and the mental side of the generative sphere: sensual, lascivious fancies, satyriasis and nymphomania and finally impotence and wasting of the sexual organs.

The cases of epilepsy in which it is curative are chiefly those associated with sexual excess or abuse in men and those associated with sexual excess or abuse in men and those in which the fits occur during or near the menstrual period in women. The power of Kali-br. over the sexual sphere is very great.

It is indicated also in cases of epilepsy occurring at the new moon and when headache follows the fit. In spasms from fright, anger or emotions.

Spasms in nervous, plethoric persons during childbirth, dentition, whooping cough in Bright's disease.

The moral and intellectual faculties are greatly disordered. The memory is lost: forgets how to talk, aphasic, has to be told the word before he can speak it. Depressed,

melancholic, uncontrollable weeping. "Feel as if they would lose their minds."
Restlessness and sleeplessness from worry.

Staggering gait, ataxia, numbness and tingling in legs and spine with increase in sexual appetite. "Fidgety hands," fingers must be playing with something, twitching of fingers, cannot sit still. Night terrors in children from over excitability of brain from worry during dentition.

Cholera infantum with hydrocephalic symptoms. Drowsiness is one of the notes of the drug: "Drops asleep in his chair and if aroused falls asleep again immediately." The deep sleep may be broken by a start, though waking is very difficult. Confused dreams.

Benumbed sensation of brain. Reflexes are diminished and there is general loss of general sensibility and also of certain parts, particularly fauces, larynx and urethra. This depressed state has another side to it in the curious restlessness and fidgetiness. In the lungs pulmonary edema or suffocative bronchitis may develop, the patient may become cachectic and the condition resemble typhoid fever, (Amory Hare).

Wenzel Heyberger has recorded a case of diabetes in a lady, 68, cured with Kali-br. The patient had been ill five months and was reduced to a skeleton. She first noticed a remarkably good appetite but after meals had heartburn and belchings.

Then there was polyuria and frequent disturbances at night to pass water. Weak in the head, confused, memory impaired. Vision almost gone. Rushing and roaring in ears. Tormenting thirst. Stools difficult and delayed. Powders medicated with Kali-br. 2c were given, one every six hours.

PAGE 896

The first night the patient slept without disturbance and the quantity of urine and proportion of sugar diminished. After about six weeks the improvement seemed to stop and Kali-br. was given in allopathic doses, but this aggravated the condition. Kali-br. 2c was resumed and the case went on to a cure.

Hale cured with Kali-br. many cases of cholera infantum and one case of "violent periodic umbilical colic, leaving tenderness on pressure."

The characteristic hour of recurrence is 5 p.m. Another feature of the Kali-br. action is in relation to new growths. A number of cases of ovarian cyst have disappeared under its action, also fibroids and fatty tumors. The acne-producing property of the drug shows its relation to sebaceous secretions and it has removed sebaceous cysts and wens.

In connection with ovarian tumors or other disorders or independently, there may be uterine hemorrhage. Metrorrhagia or menorrhagia. It may arise from reflected irritation and may be accompanied with sexual excitement. But that is not necessarily the case. "Flooding, especially in young women," is Hering's indication.

Buford has used it extensively in such cases and in potencies approaching the crude. Kali-br. is more particularly adapted to persons inclined to obesity to children to nervous women. More symptoms have been noted on the right side than on the left.

Compare

- (1) Camph. Am-br., Aur.
- (2) Bor. - night-terrors.
- (3) Kali-c. - persons inclined to obesity. also Am-c., Calc., Graph.
- (4) Kali-i. - acne, syphilis, Kali-p. and Calc. - night terrors.
- (5) Hyos. - mania, excited sensorium without inflammation of brain, fears being poisoned, sees ghosts, sexual excitement.

- (6) Plat. - sees ghosts, demons.
- (7) Arg-n. - fearful apprehensive mood, imagines cannot pass a certain point.
- (8) Glon. - fears being poisoned, also Rhus-t.
- (9) Staph. - mental depression, weakness of legs from masturbation.
- (10) Gels. - in incoordination of muscles.
- (11) Con. - nervous cough during pregnancy.
- (12) Bov., Stram. - slow, difficult speech, stammering.
- (13) Ip. - cholera infantum.
- (14) Zinc. - fidgety restlessness, Zinc. of feet, Kali-br. of hands.
- (15) Tarent. - reflex symptoms, any little irritation such as dentition or indigestion may causes convulsions. Fidgety hands.

Relations

Kali-br. is Antidoted by: Vegetable acids, oils, Camp., Nux-v., Zinc. It antidotes: Lead-poisoning. It follows well: Acon. and Spong. in croup, Eug. Jambos in acne.

Kalium carbonicum

(carbonate of potassium)

Pharmacy

Kali-c. Kali carbonicum. Carbonate of potassium. Potassium Carbonate. Solution. Trituration. Historical dose: Trituration and all potencies, thirtieth and higher. Sixth trituration.

History

Kali-c. the potassium carbonate, sometimes called "Vegetable alkali," exists in all plants and was originally obtained from the ashes left after burning wood and vegetable structures. Potassium salts play a no less important part in the animal economy. Kali-c. may be regarded as the typical member of the Kali group of homeopathic remedies, though Causticum has also claims on the title.

The Potassium salts have more specific relation to the solid tissues than to the fluids of the body to the blood corpuscles rather than to the blood plasma. The fibrous tissues are particularly affected, the ligament of joints of the uterus of the back. It corresponds to conditions in which these tissues are relaxed. (spleen qi deficient) Joints give way. (spleen qi vacuity) the back feels as if broken. (spleen qi vacuity as back muscles too weak and vacuity cold) the patient feels compelled to lie down in the street. (qi deficiency)

Goullon calls attention to the importance of this polycrest in complaints of women in which it rivals Sepia, differing from the latter having menstruation too protracted and recurring too frequently, the pains and troubles occur before the menses.

The menopausal flushings of Kali-c. are associated with disturbance of the heart. (menopause affect heart directly here which heated up and so blood flushes to face)

Palpitations are most violent. By quieting these Kali-c. often serves as an excellent soporific.

PAGE 897

In addition to the uterus and heart, lungs, pleura, bronchi and larynx all come under its action. Chronic laryngeal catarrh Goullon specially mentions as frequently cured by it. He places it in the front rank as a knee remedy.

Among the grand characteristic of Kali-c., three stand out above the rest: (I) Stitching, (phlegm) sharp pains, (heat, blood stagnation) also called jerking pains (heat) worse during rest, (excess condition) worse lying on affected side. (phlegm/blood stagnation)

(2) Worse 2 to 4 a.m. (liver time)

(3) The occurrence of bag-like swellings over the eyes, between the eyebrows and the upper lids. (lung qi deficient so clear fluid stagnates in the body. upper lid swelling due to spleen damp accumulation, lower lid belong to stomach)

Homeopathic

Kali-c. has weakness caused by all potassium salts (spleen qi deficiency) is more pronounced in this typical salt of potassium group. Weakness of the muscles of heart, (spleen weakness) of the back of limbs, (spleen weakness) weakness of intellect, (spleen weakness) Fibrous tissues, ligaments of joints, (liver) of uterus, of lumbar back are particularly affected Ñ producing relaxation, joints give way, back feels as if broken, the patient feels compelled to lie down or lean on something. (so liver – spleen problem)

Sweat, backache and weakness are the three characteristic symptoms of Kali-c. Those who have vague or those who withhold their symptoms. Use cautiously in old gouty cases, advanced Bright's and tuberculosis.

The weakness characteristic of all Potassium Salts is seen. All Kali pains are sharp and cutting, (blood stagnation or cold stagnation blood congealing) nearly all better by motion. (cold) Soft pulse, coldness, general depression and very characteristic stitches, which may be felt in any part of the body or in connection with any affection.

Sensitive to every atmospheric change (protective yang deficient) and Intolerance of cold weather. (lung vacuity cold) One of the best remedies following labor. Miscarriage, for consequent debilitated states. Early morning aggravation is very characteristic.

Fleshy aged people (phlegm with kidney yin deficient) with dropsical (lung qi distribution of fluid problem so dropsy) and paretic tendencies. (qi vacuity and phlegm obstruction) Sweat, backache and weakness. (qi deficiency sweat) Throbbing pains. (cold stagnation blood congealing) Tendency to dropsy. (lung qi deparation function poor) Tubercular diathesis. (phlegm stagnation) Pains from within out (heat or yang excess type pain) and of stinging character. (cold stagnation or blood congealing) "Giving-out" sensation. (yang type) Fatty degeneration. (phlegm related) Stinging pains in muscles and internal parts. (cold stagnation or blood congealing) Twitching of muscles. (due to phlegm or qi stagnation) Pain in small spot on left side. (small spot-phlegm/blood stagnation, left—yang so qi stagnated due to phlegm/blood pain) Hypothyroidism.

Sharp stitching, (phlegm) stabbing (blood stagnation) or catching pains are felt in various parts of the body, joints, chest, muscles, head, lying on affected side etc. or with any disorders. Throbbing pains, (cold stagnation) numbness (blood vacuity due to cold stagnation in further path) or coldness of single parts. (cold stagnation or blood congealing) abdomen, fingers. Parts lain on are painful or go to sleep. (low blood circulation so blood vacuity while pressed) Discharges are profuse and acrid. (lung qi deficiency – profuse, acrid-heat and acrid fluid means kidney fluid metabolism so kidney yin vacuity heat) Convulsions, (Convulsion due to Exogenous Wind, due to Summer Heat, due to Dampness-Heat or Pestilential Poisons, Convulsion Precipitated by Sudden Fear) seems to pass off with belchings. (exogenous wind) Sudden unconsciousness. (sudden fright unconscious) Twitching of the muscles, rigidity and atony of the muscles.

Fatty degeneration. Hypothyroidism. Tendency to start **(liver yang hyper) with a loud cry. (lung yang excess) when touched, even lightly especially in the soles, which leads a thrill throughout the whole body. (blood deficiency in soles so slight touch sends thrill but pressure touch stops the blood)** Pains go to the part uncovered, not lain on **(cold stagnation blood congealation so covered then heat helps or blood vacuity due to cold stagnation and on covering blood and qi start moving so pain goes off)** Closing of ulcers or fistulous openings, **(due to phlegm excess closures or cold stagnation constriction closure)** catching cold and over strain. **(kidney qi deficient cold) Debilitating states after miscarriage and labor. (kidney qi /yin deficiency weakness)** Disposition to phlebitis.

Clinical

Amenorrhea. Anemia. Asthma. Axilla, perspiration. Backache. Biliousness. Bronchitis. Catarrh. Chilblains. Colds. Coughs. Debility. Dropsy. Dysmenorrhea. Dyspepsia. Ear inflammation. **Eyes inflammation.** Face, blotches. Fear. Freckles. Hair disorders. Headache. Heart disorders. Hemorrhage. Hemorrhoids. Hip-joint disease. Hydrothorax. Hysteria. Kidneys disorders. Larynx, catarrh. Leucorrhea. Liver disorders. Lumbago. Lungs disorders. Menopause disorders. Menorrhagia. Metrorrhagia. Pleurisy. Pleurodynia. Pneumonia. Pregnancy, disorders. Sciatica. Sleeplessness. Spinal irritation. Stomach disorders. Stomach pain. Throat, sore. Toothaches. Tuberculosis. Typhoid. Urination, frequent. Urticaria. Uterus, cancer. Wens. Whooping cough.

PAGE 898

Causations

Ill effects of suppressions of eruptions in childhood. **(heat suppressed)** Never well since pneumonia. **(cold suppressed)** Catching cold. **(protective yang deficient)** Overstrain. **(kidney qi deficient or liver blood)**

Constitutions

It is suited to persons of soft tissues with tendency to be fat. Kali-c. is suited to the aged, **(kidney yin deficient)** rather obese, lax tissue **(spleen qi deficient with phlegm deposit tendency)** to dark hair persons of lax tissue and inclined to be fat, to diseases after childbirth **(kidney yin deficiency)**, after loss of fluids. **(yin deficiency)** It is adapted to fleshy, aged, soft, thin blooded **(watery blood that is dampness in blood is more)** and cold persons, sensitive to atmospheric changes, **(low vitality that is heaven qi)** to every draft of air, **(internal wind may be)** always shivering with dropsical **(lung qi deficient so fluid accumulation tendency)** and paralytic tendency. **(other parts fluid deficiency tendency due to lung improper distribution)** worse he cold air feels hot. Tubercular diathesis. **Planets:** Saturn.

Modalities

Better in warm weather, though moist during day, while moving about. **(excess condtion)** Better from warmth, **sitting with elbows on knees**, open air. **(heaven qi helps)** Worse from cold air in cold weather, change of weather and also draught, **(lung qi and yin deficiency)** water after overheating, winter. Worse from after exertion, **(low vitality, spleen, kidney qi deficiency or liver blood)** 2-3 a.m., **(liver time)** before menses. **(liver blood stagnation)** Worse from loss of fluids, **(yin deficient)** after childbirth, **(kidney yin deficient)** miscarriage. Worse from stooping, **(yin type problem)** by a sudden or unguarded motion **(excess condition)** touch, **(liver yang hyper)** motion. **(low vitality)** Worse after sex,

(yin kidney vacuity) from soup and coffee, (heart yang hyper) lying on left and painful side. (yang side left – lying aggravates excess condition)

Symptoms

MIND

Alternating moods. Peevish. Very irritable (liver). Weeps much. (lung) Despondent. (lung) Full of fear and imaginations. (kidney and spleen) Fears of the future of ghosts of death. Anxiety with fear when alone. (heart, kidney, liver) Anxiety felt in stomach. (phlegm stagnation in stomach so anxiety at heart also has phlegm stagnation) Anxious about his own diseased condition.

Easily startled. (liver) starts when touched especially on feet, (liver yang hyper at the feet) on dropping to sleep. Obstinate. (liver phlegm may be) Hypersensitive to pain, noise touch. (heart yang hyper) Never wants to be left alone. (liver yang) Never quiet or contented. (liver/heart yang hyper) Quarrels with his family. Sensation as if bed were sinking.

Abdomen

Flatulence. Distended, hard, tympanitic and cold. Throbbing at navel. Feeling as if a cold fluid passed through intestines during menses. Pain from left side through abdomen, must turn on right side before he can rise. Cutting pain as if intestines were torn. Sensation of a lump rising from the abdomen, to throat and back again, on coughing.

Back

Stiffness and paralytic feeling in back. Burning in spine. Severe backache during pregnancy, labor or after a miscarriage. Lower back feels weak. Backache with given up feeling, must lie down, as if broken. Lumbago with sudden sharp pains extending up and down, back and down the thighs. Stitches in region of kidneys and right scapula. Hip-disease. Pain in buttocks and thighs and hip-joint. Lumbago with sudden sharp pains extending up and down back and to thighs. Neck feels large. Spine painful while eating. Burning in the right side of spine.

Breasts

Fine stitches in breasts. Swollen, sensitive and painful breasts, before menses.

Chest

Stitching pains. Lungs seem to stick to the ribs. Coldness of chest. Cutting pain in chest, worse lying on right side. Stabbing pains. Hydrothorax. Pleurisy. Whole chest very sensitive during coughing.

Ears

Stitches in ears from within outwards. Cracking in ears. Right ear hot, left pale and cold. Noises in ear with headache. Itching, cracking, ringing and roaring.

Eyes

Stitches in eyes. Lids stick together in morning. Swelling over upper eyelid like little bags. Swelling of glabella between brows. Asthenopia. Weak after sex after measles after miscarriage. Vision spotted, bright sparks, blue, green spots, drops, before the eyes. Spots, gauze and black points before eyes. Painful sensation of light penetrating the brain on shutting the eyes. Eyelids cold.

Face

Bloated. Pale, sickly, sallow with sunken eyes. Freckles. Swelling of lower jaw and sub-maxillary glands. Cramps in jaws.

Female

Eclampsia, better belchings. Labor pains inefficient, felt in back, down the hips and thighs. Complaints after childbirth or miscarriage. Puerperal fever with cutting pain in hypogastrium with black and scanty urine.

Female

Uterine hemorrhage, constant oozing after copious flow with violent backache, relieved from sitting and pressure. Amenorrhea. Difficult, first menses, delayed with chest symptoms and ascites. Menses, early with profuse discharge, late with scanty and pale discharge. Pre-menstrual syndrome, swollen breasts, water retention. Menses early, profuse (Calc.) Delayed menses in young girls with chest symptoms or ascites. Violent colicky pain, before menses. Menses, irritating and of pungent odor. Leucorrhea with labor like pains causing itching and burning in pudendum, better washing. Hemorrhages after curetting and all sorts of other treatment. Menorrhagia better taking bath. Soreness of genitals during sex and during menses. Uterine tumors, cyst.

PAGE 899

Food

Desire for sweets, for acids. Disgust for food. Milk and warm food disagree. Worse from ice-water. Wants to eat frequently but least food oppresses her. When hungry, feels anxious, nauseated, nervous, tingling, palpitation etc.

Head

Headache from riding in cold wind. Headache comes on with yawning. Headache into eyes, worse motion of carriage, sneezing, coughing, stooping, yawning, better when raising the head and pressing the forehead. Constant sensation as if something loose in head, turning, twisting towards the forehead. Wakes from headache. Hair, dry, falls out from eyebrows, temples and beard. Painful tumors on scalp. Loose feeling in head. Great dryness of hair, falls out. (Fl-ac.)

Heart

Heart degeneration. Threatened heart failure. Palpitations, then weakness in valvular disease. Violent palpitations, shakes the whole body, throbbing extending to tips of fingers and toes. Burning in heart region. Heart pains extend to left scapula. Arrhythmia. Sensation as if heart were suspended, seems to hang by a thread.

Kidneys

Rises several times at night to urinate. Nocturnal bedwetting of adults, worse coughing, sneezing. Pressure on bladder long before urination, the more it is pressed less the urine flows. Burning in left kidney. Stitching pain in kidneys, going from buttocks to thighs. Nephritis from exposure to cold or injury. Urination slow with burning in urethra. Involuntary urination when coughing, sneezing, etc. Urine, foamy with thick red sediment.

Limbs

Paralysis of elderly people and dropsical disorders. Limbs go to sleep easily. Back and legs give out, feel heavy. Uneasiness, heaviness and tearing in limbs and jerking. Tearing pains in limbs with swelling. Limbs sensitive to pressure. Jerks the limbs especially when the feet are touched. Weakness in arms, feel numb, cold. Tearing in arms from shoulder to wrist. Lacerating in wrist-joint. Burning like fire in fingers. Pain from hip to knee. Knees painful, worse going downstairs or upstairs. White swelling of knee. Soles very sensitive.

Itching of great toes with pain. Tips of toes and fingers painful. Sciatica, tearing pain in the thighs with jerking of muscles.

Liver

Stitches or sore liver.

Lungs

Dry, hard cough about 3 a.m. with stitching pains and dryness of pharynx. Bronchitis. Pneumonia. Hydrothorax. Pleurisy. Asthmatic, wheezing, worse least motion or walking, alternating with diarrhea with vertigo. Leaning forward relieves chest symptoms.

Expectoration must be swallowed, cheesy taste, copious offensive, lump. Expectoration scanty and tenacious. Tendency to tuberculosis. Constant cold taking, better in warm climate. Whooping cough. Cough with relaxed uvula. Incessant, hard retching or choking, futile cough, then vomiting.

Male

Complaints after sex. Prostration after sex, often with shuddering. Sleeplessness and uneasiness for 2 or 3 days after sex. Aversion to sex. Excessive emissions, followed by weakness. Copious painful pollutions with painful erections.

Strange uneasy feeling in genitals. Chronic gonorrhea, painful scanty discharge, burning during and after urination.

PAGE 900

Mouth

Gums separate from teeth. Itching in gums, pus oozes out. Pyorrhea. Aphthae, much salivation. Burning, soreness or painful pimples on tip of tongue. Toothache, alternating with stitching pains in left breast, only while eating. Mouth slimy. Tongue, gray-white. Much saliva constantly in mouth. Bad, slimy taste.

Nose

Swollen, hard, red. Nose red, covered with pimples. Chronic colds. Breathes through mouth. Obstruction better walking in open air. Stuffs up in warm room. Descending coryza. Thick, fluent, yellow discharge. Post-nasal dripping. Sore, scurfy nostrils, bloody nasal mucus. Crusty nasal openings. Nosebleed on washing face in morning. Ulcerated nostrils. Fetid yellow-green or crusty discharge.

Pulse

The pulse is small, soft, variable intermittent or dicrotic. Weak, rapid pulse intermits, due to digestive disturbance.

Rectum

Chronic diarrhea of dyspeptics during day only. Constipation after or during menses. Stools, difficult of large, hard lumps, then burning or torn feeling. Hemorrhoids inflamed, bleeding, large, swollen, painful. Itching, ulcerated pimples around anus. Large discharge of blood with natural stool. Pain in hemorrhoids when coughing. Burning in rectum and anus. Stitching like fine needle during pregnancy or red hot poker in rectum better cool bathing. Easy prolapse. (Graph., Podo.) Itching. (Ign.) Anal fistula. Constipation alternating with diarrhea.

Sensations

As if bed were sinking under her. Whole body as if it were hollow. Burnings like fire. Sensation of a lump rolling over on coughing, rising from right abdomen to throat. Lump in throat. Feeling as if the bed were sinking under her. Pulsative pains and throbbings. Burning sensation and burning pains.

Skin

Sensitive, dry. Burning as from mustard plaster. General itching or hives during menses. Itching of warts. Tension, pressure, rending in scars.

Sleep

Drowsy after eating. Falls asleep while eating. Talks in sleep. Awakes at about 2 a.m. to 4 a.m. with nearly all complaints. Wakes at 1 or 2 a.m. , cannot sleep again. Yawns with headache etc.

Stomach

Anxiety felt in stomach. Epigastric pain to back. Epigastrium is very sensitive externally. Flatulence, distended and sensitive. Fullness even after little drink or food. Feeling of lump in pit of stomach. Gagging. Easy choking when eating. Dyspepsia of old people, burning acidity, bloating. Gastric disorders from ice-water. Salty, sour regurgitation. Sour belchings. Nausea, better lying down. Constant feeling as if stomach were full of water. Vomiting of sour mucus.

Temperature

Chilly with hot hands and sleepiness in open air. Internal burning. Sweat scanty, foul on feet. Sweats with slightest exertion, on painful part, on affected part.

Throat

Hoarseness and loss of voice. Catarrhal aphonia with violent sneezing. Haws up tough mucus in morning. Dry, parched, rough. Swallowing difficult, food slowly descends, remains half way in esophagus with gagging and vomiting. Stricture of esophagus. Small particles of food go easily in windpipe. Sticking pain as from fish bone.

Vertigo

Vertigo on turning.

Comments

The mental state is one of **peevishness** and irritability. (heart/liver related) Easily startled by any noise (especially if unexpected). (liver related) Fear is prominent. (kidney related) fears to be alone. (kidney liver related as liver wants people around may be) Intellect impaired. (spleen deficiency) **dose not care for anything**. Indifferent with bodily exhaustion. (spleen qi exhausted so dampness affects mind/heart so indifference) when questioned does not know what to answer. (that means he understand the question but unable to process it so spleen heart related) The "touchiness" of the remedy is very marked: "**Cannot bear to be touched**. (probably due to heat or qi stagnation) starts when **touched ever so lightly**. (light touch helps in blood vacuity so aggravation may be due to blood stagnation too) **especially on the feet**. (spleen/kidney qi stagnation or heat)"

PAGE 901

Relaxation of tissues (spleen qi vacuity) is a great note of Kali-c. It is suited to persons of soft tissues (spleen qi deficient) with tendency to be fat. (damp/phlegm accumulation tendency) Easy sweating (due to phlegm or damp there is easy sweating) may be placed in the same category and when there is a combination of "sweat, backache and weakness," the three, according to Farrington, constitute a grand characteristic.

The backaches (damp/phlegm cold obstruction backache) of Kali-c. are very important. The pain may extend downwards to the buttocks and even to the knee. (damp cold being heavy going downwards) Pain from hip to knee (damp cold type pain) more especially if right sided (yin side) has led to the cure of many cases of hip-joint disease. This symptom also led me to make a remarkable cure of another kind.

A lady, 73, stout, short, pale and of very soft tissue, had for four months suffered from "rheumatic pains," and an offensive vaginal discharge. A local practitioner of repute was consulted and pronounced it cancer of the womb in an advanced stage and gave her four months to live. She described to Clarke the pain as being all round the lower abdomen and a "dull, heavy, depressing, dead pain, commencing at the inner part of the top of the right hip, iliac crest and extending to the knee."

The pain was so severe it made her feel quite sick and faint. The discharge was very offensive like decaying meat. Great weakness and trembling accompanied the discharge, urine was almost like blood at times and had a sandy sediment. Kali-c. 1,000c. was given and at once improvement set in. In a few months all the bad symptoms had disappeared and never returned. The patient lived ten years after this.

A man had an ulcer of right leg with swelling of ankle and he complained of waking at 2 a.m. Kali-c. 30c cured, but meantime he developed this symptom: "Great weakness of right thigh, as if it would give out when walking." This "giving-out" feeling is very characteristic of the remedy. "Constant backache, the patient feeling all the time that the back and legs must give out."

Kali-c. corresponds to many cases of lumbago,(due to kidney qi vacuity) stitching pains,(qi stagnation pains) pulsations,(vacuity cold stagnation or blood congealation) better by pressure(deficiency) and by lying flat on the back. "Weakness, sweat and backache" appear in many conditions of debility(from yin vacuity) as from loss of fluids (yin vacuity)after confinement or miscarriage. Complaints after sex in males,(kidney yin vacuity) especially complaints of the eyes.(kidney yin deficiency so liver yang rises so eyes affected) Weary and sleepy during and after eating.Yawns continually.(Spleen qi vacuity,phlegm dampness encumbering the spleen—for yawning also same)

Kali-c. acts profoundly on the tissues. It causes fatty degeneration of the heart and other muscles. It affects the blood itself (spleen-clear fluid heart-redness of fluid kidney—essence) as well as the circulation,(heart and lung) causing anemia(may be due to spleen/kidney/heart deficiency) and hemorrhages.(spleen qi deficiency so not able to hold blood in the vessels,heat,blood stagnation etc) Throbbing(cold stagnation,blood congealing) of blood-vessels all over body and to ends of fingers and toes(maximum nerves so heart related) is a marked symptom. Irregularity of heart's action.(heart qi stagnation)

A peculiar symptom is: sensation as if the heart were suspended by a thread.(heart qi suspended or stagnated) The digestion is very much disordered,(stomach qi stagnation due to phlegm) flatulence,(phlegm in stomach) distention,(phlegm stagnation) constipation.(lung qi deficient ,heat and deficiencies of yin,yang,blood,qi)) Many symptoms come after eating.(excess condition) Drowsiness(Spleen qi vacuity,phlegm dampness encumbering the spleen.) toothache only when eating.(while eating-phlegm dampness in stomach so stagnation of qi by extra food) It has the fish bone sensation in the throat,(phlegm stagnation) which is part of the general tendency to stitching(phlegm stagnation) pains.

The cough has peculiarities in addition to that of time aggravation 2 a.m. to 4 a.m.(liver time)It is dry, paroxysmal, loosen viscid mucus or pus which must be swallowed.(so liver yang attacking lung or phlegm heat stagnation in the lung)

Another feature is easy choking.(phlegm stagnation) food easily gets into windpipe.(due to phlegm obstruction) Pain in the back when swallowing.(difficult swallowing—phlegm stagnation so backache due to phlegm stagnation) Spasms with gagging(phlegm obstruction) or vomiting of ingesta.(phlegm vomiting) The expectoration consists of hard, white or smoky masses.(phlegm) which fly from the throat when coughing.(phlegm) Globules of pus may be contained in it.(phlegm heat)

Kali-c. is more a right than a left-side medicine.(yin type due to phlegm) The base of the right lung is more affected than any other part. Goullon says also the apices. Kali-c. is a remedy often called for in sick-headache.(phlegm headache) "Violent(heat,blood stagnation) headaches about the inner(yin so due to blood or phlegm) temples,(liver) violent stitching(phlegm) or jerking pains(heat), on one side of the head or both."

One-sided(damp/phlegm obstruction or blockage) headache(phlegm stagnation type) with nausea.(phlegm stagnation in stomach) One case which Clarke cured was better by lying down, better by a tight band round the head.

PAGE 902

Pressure(phlegm stagnation) and drawing in forehead extending into eyes and root of nose.(pain in root of nose normally due to phlegm stagnation) Congestion to head and heat of face (heart or stomach phlegm heat)often accompany the headaches.(phlegm heat) "Drowsy while eating" is a very characteristic symptom of Kali-c. (Spleen qi vacuity,phlegm dampness encumbering the spleen.)

Id of Stettin, Germany, has recorded a case which well illustrates this. A lady, 65, suffered from chronic bronchial catarrh and emphysema. In November, 1886, she had asthmatic complaints, depriving her of sleep with cough and mucous expectoration difficult to raise.

Always when eating she was so weary she fell asleep and could not finish her meal. After eating still very tired. In the morning passed much flatulence. Kali-c. 10c removed the condition in a few days.

The following March after a cold there was a recurrence, but without the weariness and Kali-c. failed, whist Ars. 15c rapidly cured.

In the same patient Kali-c. manifested its power in another set of symptoms: **Toothache alternating with tearing, stitching pain in left breast and under left false ribs.(yang side pains ,due to qi stagnation)** The side pains were worse at night,(liver phlegm heat –yin side) especially in evening as soon as she lay down, worse lying down,(excess condition) particularly worse lying on **right (yin side)i.e.,painless side. Not influenced by pressure or motion.**

Kali-c. is a chilly medicine. There is great tendency to take cold and worse of symptoms when body temperature is low, **aversion to open air.** I have often relieved with Kali-c. Blotchy eruptions (wind cold eruptions)of the face which were worse in a wind or cold air.

Kali-c. appears to have alternating symptoms: it has cured a case of toothache which alternated with tearing, stitching pains in left breast and under left false ribs, it has also pulsations in the back alternating with pains in the back.(cold stagnation or blood congealation in the back,but back is yang so not understood) The pains in the side were worse evening, on lying down and especially on lying on right, (painless) side.

The nervous excitability (heart yang excited)of Kali-c. may go as far as pronounced hysteria,(heart/liver yang hyper) sudden shrieking,(yang hyper) cannot bear to be

touched.(yang hyper active) **Spasms**, puerperal convulsions(due to wind,heat,freight,damp heat) and paralysis.(Lung stomach fluid damage,liver kidney yin vacuity,cold dampness invading and spreading,damp heat invading and spreading,spleen stomach qi vacuity,kidney yang vacuity,blood stasis obstructing the network vessels,liver depression with blood vacuity)Twitching of muscles,(spleen qi stagnation) rigidity of muscles,(spleen yin deficiency) muscular atony(yin spleen deficient or blood supply poor), **disposition to easy overlifting**. Oppression of breathing accompanies most complaints.(lung qi stagnation) Anemia with great debility.(blood deficiency with spleen/heart/kidney deficiency) **skin watery**,(heart not converting clear fluid into blood) **milky white**. Dropsical disorders.(phlegm/damp accumulation due to lung deficiency) Ulcers bleeding at night.(damp heat ulcers ,in yin time damp impact increase so blood water increase which overflows as bleeding may be)

Compare

- (1) Kali salicylicum - vomiting, especially of pregnancy, arteriosclerosis with chronic rheumatism.
- (2) Kali silicum - gouty nodosities.
- (3) Kali aceticum - diabetes, diarrhea, dropsy, alkaline urine, very much increased in quantity.
- (4) Kali citricum - Bright's disease-1 grains to wine-glass of water.
- (5) Kali oxalicum - lumbago, convulsions.
- (6) Kali picricum - jaundice, violent belchings.
- (7) Kali tartaricum - paraplegia.
- (8) Kali telluricum - garlicky odor of breath, salivation, swollen tongue.
- (9) Calc., Am-p., Phos., Lyc., Bry., Nat-m, Stann., Sep.

Relations

Antidotes: Camph., Coffea. Complementary: Carb-v. - lowness of vitality(heaven qi less) may suggest a preliminary course of Carb-v. to nurse up recuperation to the point that Kali-c. would come in helpfully. Follows: Nux-v. often in stomach and bladder troubles.

SOURCES

Boericke. Clarke. Phatak.

Kalium chloricum

(chlorate of potassium)

Pharmacy

Kali-chl. Kali Chloricum. Potassium Chlorate. Trituration. Solution. Historical dose: All potencies, second to sixth potency.

History

Kali Chloricum is not to be confounded with the chloride which constitutes the Kali-m. of Schÿssler. Hering has amalgamated the symptoms of the two under the heading Kali-m., but Clarke kept them separate. Kali-chl. is an exceedingly active poison. It has long been used in the old school in solution, as a wash for sore mouth and for foul ulcers.

PAGE 903

Hutchinson observed a number of cases in which it produced the very condition which it was give to cure: "most acute ulceration and follicular stomatitis. The whole mucous

surface was red and tumid and in the cheeks, lips, etc., were numerous gray-based ulcers."

Fatal poisoning has occurred, death taking place in convulsions. The blood is disorganized and after death liver, spleen and kidneys are found softened and filled with disorganized blood, this should give it a place in cases of lardaceous and fatty degeneration of solid viscera. Mouth, hypochondria and rectum are the parts most affected. **Planets:** Moon, Saturn, Venus.

Homeopathic

The chemical Kali Chloricum disorganizes the blood and affects the mouth, kidneys and rectum. Profound prostration, coldness in different parts and organs. In the blood and easy hemorrhages, nosebleed, bloody stools etc., scurvy, are most marked symptoms.

Kali-chl. acts very destructively upon the kidneys, producing a croupy nephritis, hemoglobinuria, etc. Toxemic conditions of pregnancy with urinary symptoms. Parenchymatous nephritis with stomatitis. Noma. Chronic nephritis, hepatitis. Septicemia. Anemia.

Produces most acute ulcerative and follicular stomatitis. Discharges are fetid. Gray, white, plastic exudates. Lardaceous and fatty degeneration of liver, spleen and kidneys and other solid organs.

Clinical

Albuminuria. Aphthae. Asthma. Cancrum oris. Clumsiness. Crusta lactea. Cystitis. Dysentery. Epithelioma. Hematuria. Hemorrhages. Hangnails. Hemorrhoids. Mercurial poisoning. Mouth inflammation. Nephritis. Neuralgia. Edema. Paralysis (facial). Pharyngitis. Pimples. Proctalgia. Purpura. Scurvy. Stomatitis. Syphilis. Tic-douloureux. Toxemia. Ulcers.

Modalities

Better from nosebleed, mental symptoms. Worse from cold, mercury, jar, coughing, sneezing.

Symptoms

Abdomen

Gripping colic with shifting of flatulence and diarrhea, followed by continuous rectal pain.

Chest

Constriction of chest, as from sulphur fumes.

Face

Swollen, she can hardly see in the morning. Neuralgic pains worse talking, eating or slight touch followed by numbness.

Heart

Coldness in precordial region. Right pulse full, left small. *Coldness in blood.*

Kidneys

Nephritis. Urine albuminous, scanty, suppressed. Albumin and bile, high phosphoric acid with low total solids. Hematuria, diuresis.

Limbs

Ankles swell in the evening. Arms, feet cold.

Mouth

Whole mucous surface red, tumid with gray-based ulcers. Stomatitis, aphthous and gangrenous. Fetor. Noma. Scurvy. Salivation, profuse secretion of acid saliva. Tongue, swollen, cold. Mercurial stomatitis, (as a mouth wash).

Nose

Bleeding at night, only from right nostril.

Rectum

Diarrhea, profuse, greenish mucus. Gripping colic with shifting of flatulence and diarrhea, followed by continuous rectal pain. Dysentery, much blood passing with mucus, profuse greenish, cries with violent cutting pain in the rectum in dysentery and diarrhea.

Skin

Cold. Pimples between lip and chin. Jaundice. Itching miliary or papular eruptions. Discolored, chocolate tint.

Stomach

Sudden vomiting incessant of all food of offensive dark green mucus. Stomach cold. Sensations of a weight in the epigastric and umbilical regions. Flatulence.

Throat

Cold feeling in throat.

Comments

Rushmore records a proving of Kali-chl. in an unmarried lady, 50, short, brunette, who had goiter in early life, which disappeared under the application of Iodine. Later on a fibroid tumor developed in the uterus.

PAGE 904

For this the patient was advised to take crude Potassium chlorate, dissolved in water, daily.

The following symptoms were observed: Increased moral irritability. Felt dreadfully dull and stupid. Dizzy on stooping and rising. Slight headache over eyes, objects appear double, beside each other. Face swollen so she could hardly see on rising in morning. Smarting of tongue.

Kali-chl. took away her desire for acids. Diminished appetite. Much commotion and flatulence in abdomen. Increased urine. Dreams of terrible things never thought. Great coolness, shivering on cold days, seemed as if it cooled off her blood. Clumsiness. General bloated feeling.

In the provers great weakness was manifested, rheumatic and neuralgic pains, many occurring in the facial nerves. Facial paralysis has been cured with it. The heart was the seat of much disturbance and a coldness was felt about the precordia.

The stomach and bowels were disordered and Allen credits Kali-chl. with the cure of this: "Dysentery with most violent cutting pains as from knives, frequent stools, tenesmus, making the patient cry out, evacuations very small, almost pure blood, great prostration."

The sexual organs were excited. The skin also manifested a number of symptoms: Pimples in various parts, between lip and chin. It has cured epithelioma of face and of great toe, (Allen).

Compare

(1) Especially Kali-m.

(2) Caust. - facial paralysis.

(3) Kali-bi. - follicular pharyngitis.

(4) Zinc., Cadm-s. and Cact. - asthma with great constriction of chest.

(5) Graph., Kali-n. and Nat-m. - cold feeling about heart.

Relations

Kalium chlorosum

(javelle water)

Pharmacy

Kali-chls. Kali chlorosum. Javelle Water. Bleaching fluid. Formula variable, contains Potassium hypochlorate principally, chloride and some carbonate. Solution. Historical dose: All potencies.

History

The observations with Javelle Water are from poisoning cases. **Planets:** Mercury.

Homeopathic

The most notable symptoms were: Watery eyes, pale, puffy face, constriction of throat and of chest. There was much sensitivity noted. Sensitiveness of epigastrium and especially of larynx and whole anterior portion of neck. This will probably prove an indication in laryngeal disorders. Cramps and restlessness were also noted.

Clinical

Aphonia. Asthma. Coryza. Diphtheria.

Compare

(1) Kali-chl., Calc-m., Chlorum, Nat-hypochlor.

SOURCES

Clarke.

Kalium citricum

(potassium citrate)

Pharmacy

Kali-cit. Kali citricum. Citrate of Potash. Potassium Citrate. Solution. Trituration. Historical dose: Trituration and all potencies.

History

Kali citricum has been used in solution (eight to ten grains to a wineglass of water) to assist the action of the kidneys in sufferers from Bright's disease who were under the absolute skim-milk dietary. **Planets:** Venus, Saturn.

Homeopathic

Kali citricum has also been used in the same way in old school practice, as a solvent for gouty concretions about joints. Bright's disease.

Comments

Kali-cit. has not been proved, but "Agricola " has recorded the effect of a large dose given by an allopath to a patient suffering from suppressed kidney action after influenza.

PAGE 905

In three days the kidneys acted freely, but these new symptoms were set up: Tympanites, constant flow of mucus from anus, awful gastric and abdominal pains, "as if a machine were at work inside, skinning the inside of the stomach and the whole length of the intestinal tube."

Flatus was constant and in great amount, producing a pain of its own, which was a prominent feature. This pain as if machinery were at work inside recalls a pain of Nit-ac.

SOURCES

Clarke.

Kalium cyanatum

(potassium cyanide)

Pharmacy

Kali-cy. Kali Cyanatum. Potassium cynaide. Cyanide of Potash. Solution. Trituration. Historical dose: All potencies, sixth potency and 200c.

History

The Cyanide of Potash is much used in photography and being for this reason an accessible poison, numbers of cases of suicide and attempted suicide by its means have occurred. It is from the symptoms observed in such cases that a great part of the pathogenesis is built up, but it has also been proved by Lembke and others.

This most poisonous chemical should be remembered in agonizing neuralgias especially of orbital and supra-maxillary with screaming and loss of consciousness. **Planets:** Saturn. Homeopathic

Kali-cy. has benefited cancer of tongue with indurated edges. Agonizing neuralgia. Strokes, asthma, cancer, Cheyne-Stokes breathing, ciliary neuralgia, epilepsy, headache, trifacial neuralgia, tic douloureux, rheumatism, speech loss and cancer of the tongue are conditions in which this remedy has been curative.

The neuralgic pains are unbearable, they more commonly appear in the temporal and facial regions involving the trigeminal nerve. Disposition gentle but crossness almost uncontrollable on entering room, cool open air produces good spirits.

Inability to recollect certain words, aphasia, prolonged stupor intense vertigo, objects seem to be moving around him, head drawn backwards, unable to tolerate any covering on head, convulsive motion of eyelids and eyeballs, pupils largely dilated and insensible to light, obscuration of vision. Sudden sinking sensation. Sick headache, sciatica, epilepsy.

Sudden sinking sensation. Power of speech lost but intelligence intact. Sciatica, gait unsteady. General convulsions. Sudden convulsive action of whole body, about ten minutes after heart ceased to beat. Sphincters rigidly contracted.

Clinical

Aphasia. Asthma. Cancer. Cheyne-Stokes. Chills. Ciliary neuralgias. Convulsions. Epilepsy. Eye disorders. Facial pain. Headaches. Memory lost. Neuralgias. Rheumatism. Sciatica. Speech, lost. Strokes. Tongue, cancer. Vertigo.

Modalities

Better from motion in open air. Worse from 4 a.m. to 4 p. m.

Symptoms

MIND

Disposition gentle. Crossness almost uncontrollable on entering room, while cold open air produces good spirits. Aphasia. Inability to recollect certain words for several days.

Lying on floor in a deep stupor.

Abdomen

A feeling as if bowels were about to act. Pains in abdomen in groins in afternoon.

Back

Vague pain in neck. Very marked weakness in lumbar regions with dull pain and weakness of right and left iliac region, while walking and during afternoon.

Chest

Anxious feeling in the chest. Oppression.

Ears

Rushing in ears.

Eyes

Eyes fixed. Eyelids began to open and shut alternately, eyeballs stared in different directions. **Eyes** closed, but on raising lids the eyeballs were seen to be in uninterrupted convulsive motion. Swelling of upper lids. Pupils largely distended and insensible to light.

Obscuration of vision, so that it was with difficulty that he distinguished the features of those near him. Loss of sight, as sight returned there was ***double vision.***

PAGE 906

Face

Severe neuralgia in temporal region, recurring daily at same hour. Pain in orbital and supra-maxillary region with screaming and loss of consciousness.

Head

Head drawn backwards. He was unable to tolerate any covering on head, whether in the cold or warmth, because it caused the frightful headache, for months after the attack. Gnawing pain across temple. Sharp pains in occiput. Soreness of scalp over parietal regions.

Heart

Stitches in heart and lungs. Jerking stitches in heart on respiration. Palpitation of heart. Pulse at times fifteen beats slower than usual.

Kidneys

Bladder distended by a large amount of urine, which had to be evacuated by a catheter. Urine came away involuntarily.

Limbs

Gait seemed unsteady. Limbs icy cold. Limbs rigid and convulsed. Tetanic spasms of muscles of arms and legs. Limbs are flaccid with occasional convulsions more like a shuddering than anything else.

Lungs

Cough prevents sleep, respiration weak, cannot take deep breath. Voice hoarse after the attack. Loud mucous rattle. Respiration superficial. Slow and difficult breathing.

Respiration became very slow, only seven to the minute, expiratory act prolonged intervals between respirations remarkably long. Respiration nearly suspended, but thorax convulsively raised, at irregular intervals, far apart.

Mouth

Cancer, ulcer of tongue with indurated edges. Cancerous ulceration of right side of tongue. Speech difficult. Power of speech lost but intelligence intact. Lips and mucous membrane of mouth pale. Slight frothing at the mouth. Tongue has peculiar dark ground seen through heavy white coating.

Nose

Blew pure blood from nose about 10 a.m. inside of nose feeling parched, hot and dry, blood drying in nose very quickly.

Rectum

Feces came away involuntarily. Bowels obstinately constipated.

Sleep

Sleepiness during day. Restless, dream filled sleep all night, could not lie on one side for any length of time. Dreams very lively, especially towards morning. During whole night, dreams horrid and exciting.

Stomach

Copious vomiting, followed by return of consciousness. Sharp gastric pains. Pain at epigastrium of a griping intermittent character. Epigastrium prominent, almost immediately. Severe burning in stomach. Great sensitiveness of epigastric region.

Temperature

Surface of whole body cold and moist. Shiverings. Coldness of limbs, which were pendulous and without muscular power. On awaking from cat-naps has a chill, which in face, wakes him before he can get soundly asleep, followed by a very slight sweat. Awoke about 6 a.m. with heat and disagreeable feverish perspiration over whole body, except legs below the knees with flushed face. Hands and face covered with cold perspiration.

Throat

Astringent sensation in throat with nausea, lasting until after midnight. Feeling of constriction about fauces with muscular tremors about throat, for one or two days afterwards complained of great stiffness about throat. Patient was able to swallow as soon as a large amount of fluid filled the pharynx after every swallow the whole body was seized with convulsive tremors and flushes of redness spreading over the face. Had no sensation of act of swallowing.

Vertigo

Intense vertigo, so that all objects seemed to be moving around him.

Comments

The stroke and epileptic symptoms of Hydr-ac. were reproduced in the salt and one very pronounced symptoms was slow breathing.

PAGE 907

Strong tetanic convulsions. Loss of consciousness and vision occurred and as consciousness and vision returned, vision was double.

In one poisoning case the fingers were stretched out and spasmodically contracted. In another case after the failure of all efforts to restore the patient (a photographer) with

ether injections and repeated washings out of the stomach, he was placed in a hot bath and icy-cold water was poured over head and nape.

Each time water was poured on his head, the patient drew deep inspirations, which gradually grew deeper and more regular until consciousness was restored.

He complained of sharp occipital and gastric pains. Convalescence was rapid, but a general muscular weakness and impairment of speech lasted a long time. The chief clinical uses recorded of Kali-cy. have been in epithelioma of the tongue, apoplectic and epileptic conditions, respiratory disorders, rheumatism of the joints and neuralgias.

Cattel recorded in the early volumes of the Brit. four. of Homeopathy several remarkable cases of neuralgia cured by Kali-cy.

From Hering's Guiding Symptoms: "Agonizing attacks of neuralgic pains between temporal regions and ciliary arch and maxilla with screaming and apparent loss of sensibility, as if struck with a stroke, pulse 84, face flushed."

In this case the concomitants pointed to the drug. "Severe neuralgia in temporal region and left upper jaw, daily at 4 a.m. increasing until 10 and ceasing at 4 p.m. in the interval, anorexia, fever, headache." The symptoms were worse in a room, worse immediately after meals (fullness), better by motion in open air.

E. T. Adams treated an inveterate whiskey-drinker, 55, for a swelling on the right side of the tongue, excavated so deeply that the first joint of the thumb could be laid in it. It had been pronounced cancerous.

The patient could take no solid nutriment and fluids only with great pain. Under Kali-cy., he recovered rapidly, was able to walk and to eat dry bread and cooked beef with comparative ease. Persuaded by his former attendants to undergo operation, he died nineteen days after.

Petroz was the first to give Kali-cy. 1,000c in cases of this kind. A woman had cancerous ulcer of right side of tongue involving the root. With a view of relieving the woman's sufferings, Petroz gave her Kali-cy. 1,000c once in four days.

In two weeks the suffering was much diminished, the tongue appeared less thick and speech easier. In another fortnight the patient's countenance had lost its gray hue and drawn features and she could eat a crumb of bread. The case went on to complete and permanent cure.

Kalium ferrocyanatum

(prussian blue)

Pharmacy

Kali-fcy. Prussian blue. Kali Ferrocyanatum. Historical dose: All potencies.

History

Prussian blue has physical and mental prostration following an infectious disease.

Inability to sustained routine work. **Planets:** Moon.

Homeopathic

Neuralgic disorders depending on impoverished blood and exhausted nerve centers, especially spinal. Fatty and functional heart troubles. Pulse weak, small, irregular.

Uterine symptoms like Sepia, bearing-down sensation and gastric sinking, profuse, pus-like leucorrhoea with a passive hemorrhage.

PAGE 908

Clinical

Heart, disorders. Leucorrhoea. Neuralgias. Pulse weak.

SOURCES

Boericke.

Kalium hypophosphoricum

(hypophosphate of potassium)

Pharmacy

Kali-hp. Hypophosphate of Potassium. Kali hypophosphoricum. Historical dose:

Trituration and all potencies, 5 grains of crude to 3x.

History

Effects of excessive tea drinking. **Planets:** Mars.

Homeopathic

Kali-hp. has great debility with atrophy of muscular tissue. Phosphaturia with general anemia or leucocythemia. Chronic bronchitis where the expectoration are thick and fetid, sometimes scanty and tough. Anemia. Tea, effects.

SOURCES

Boericke.

Kalium iodatum

(iodide of potassium)

Pharmacy

Kali-i. Kali iodatum. Potassium iodide. Kali hydroiodicum. Solution. Trituration.

Historical dose: Trituration and all potencies, crude drug in small material dosage. When strictly homeopathically indicated, as in acute respiratory disorders the third potency or higher potencies.

History

Potassium Iodide was used as anti-syphilitic remedy. The history of Kali-i. in relation to syphilis is both interesting and important. As we should naturally expect, Kali-i., being anti-syphilitic is also antidotal to mercury.

But Kali-i. is perhaps more anti-scrofulous (**anti phlegm**) than anti-syphilitic. (**anti heat**) It acts best in scrofulous patients, especially if syphilis or mercurialization or both are super

added. It also causes infiltration, edema and dropsy of various kinds. (dampness accumulation) The blood is acted upon (probably clear fluid in blood increases so blood is diluted) and hemorrhage occurs and purpura hemorrhagica. (kidney qi deficiency)

Grimmer says: Kali iodatum has cured many types of **tumors and cancers** generally based on a **syphilitic** (Toxic Heat Invading Lung And Spleen, Liver Meridian Damp Heat, Toxic Heat In Blood, Toxic heat In Tendons And Bones, Liver And Kidney Deficiency,

Heart And Kidney Deficiency) or **tubercular miasms** (insufficiency of qi and blood, and accumulation of phlegm and turbidity in the channels and connecting vessels) and often there is present a combination of both these in many cases of malignancy. Nightly aggravations of complaints are a strong feature of this remedy. (yin type problems)

Hering speaks of Kali-i. as having been curative in pneumonia (Wind Cold, Phlegm, Wind Heat, Phlegm Heat, Toxic heat, Yin Deficiency With Lung Heat, Lung And Spleen Qi Deficiency, Heart Yang collapse, Pathogens attacking the Liver with Delirium) and **Bright's disease**. It is a favorite remedy for aneurysm (blockage of phlegm/stasis, loss/collapse of Yin/Yang) among old-school practitioners, but there is no need to imitate their massive doses, its action is evidently specific. Kali-i. has been commended as a protective against foot and-mouth disease in cattle.

Homeopathic

Kali-iodatum acts prominently on fibrous and connective tissues, producing infiltrations, edema. (liver meridian damp heat) The profuse, watery, acrid coryza (damp heat in the lungs) that the drug produces serves as a sure guiding symptom, especially when associated with pain in frontal sinus. (stomach phlegm)

Kali-i. has glandular swellings. (dampness accumulation) Purpura and hemorrhagic diathesis. (spleen qi deficiency so hemorrhagic tendency) Diffused sensitiveness, of glands, scalp, etc. (diffused—qi stagnation) Rheumatism (Wind (Migratory), Cold (Pain), Dampness, Heat, Wasting Rheumatism) in neck, back, feet, especially heels and soles, worse cold and wet. (damp cold rheumatism) Iodide of Potassium in material doses acts in the different forms of fungoid disease (thrush, ringworm, etc.) offer simulating syphilis and bacterial diseases like tuberculosis.

Kali-i. has symptoms like loss of weight, (phlegm reduction, under nutrition etc) spitting of blood (lung heat) etc. Tea-taster's cough due to inhaling the fungus, (toxic heat in lungs) also brings about often favorable reaction in many chronic ailments even when not clearly symptomatically indicated.

Syphilis may be indicated in all stage: (1) In acute form with evening remitting fever, (liver yang excess in evening) going off in nightly perspiration. (lung damp) (2) Second stage, mucous membranes and skin ulcerations. (damp heat) (3) Tertiary symptoms, nodes. (phlegm heat) Craves motion in open air. (needs heaven qi, motion desires means cold stagnation) Glands enlarged (dampness accumulation) and indurated. Glands are swollen (phlegm deposit) or atrophied (Heat in the Lungs injuring Yin fluids, Invasion of Damp-Heat, Invasion of Cold-Dampness, Stomach and Spleen deficiency, Spleen and Heart collapse, Liver and Kidney deficiency, Blood stasis in the channels) Exostosis, (phlegm accumulation) swelling of the bones (phlegm) and rickets. (

Spleen and Lung Deficiency, Spleen Deficiency with Hyperactive Liver, Spleen and Kidney Deficiency)

Purpura and hemorrhagic diathesis come under its influence. Feels used up. (spleen yin deficient) Crushing (blood stagnation) or sharp stitching pains (phlegm type pain). Discharges are copious, watery, acrid, salty, thick, green or foul. (damp heat discharges) Diffused soreness after pains of affected part. (qi stagnation pains and soreness) Pains long after injury. (qi stagnation or damp pains as damp stores the things) Weakness, (spleen qi deficient) emaciation. (poor nutrition of muscles due to spleen deficient) Arteriosclerosis. Cachexia. Contraction of muscles and tendons. (spleen qi vacuity cold and liver yang deficiency so contraction of tendons) chronic (phlegm) arthritis with spurious ankylosis. Actinomycosis. Coldness of painful part in bones. (cold stagnation in bones) Fungoid diseases. (toxic heat) Dropsy from pressure from swollen glands. (damp accumulation)

Clinical

Actinomycosis. Allergies. Aneurysm. Anhidrosis. Bright's disease. Bubo. Bunions. Cancer. Decay bone. Colds. Condylomata. Coughs. Croup. Debility. Dropsy. Ears, pain.

Emaciation. Erythema nodosum. **Eyes**, disorders. Fibroids. Glandular swellings. Goiter. Gonorrhoea. Gout. Hemorrhages. Hayfever. Housemaid's knee. Influenza. Inter-menstrual hemorrhage. Joints disorders. Laryngitis. Liver, diseases. Locomotor ataxia. Lumbago. Lungs, disorders. Menstruation, disorders. Neuralgia. Nodes. Noises in ears. Nystagmus. Odor, body. Edema glottidis. Pancreatitis. Paralysis. Pleurisy. Prostate disorders. Rheumatism. Rickets. Rupia. Sciatica. Scrofula. Small-pox Spine, curvature. Spleen. Syphilis. Tic douloureux. Tinnitus. Tongue neuralgia. Tuberculosis. Tumors. Ulcers. Wens.

Constitutions

Gouty, rheumatic, syphilitic diathesis. Hemorrhagic diathesis. **Planets:** Saturn.

Modalities

Better from motion, (excess condition or cold) cold air, (damp heat) open air. (lung qi deficiency) Worse from heat, pressure touch, mercury. (excess condition so worse from pressure, yang hyper so touch etc) Worse from changing weather. (phlegm) Worse at night, (yin type) damp weather. **Worse jarring, cold foods especially milk.** Worse sunset to sunrise. (yin type) Worse warm clothing, warm room.

Symptoms

MIND

Half-mad all night, (heart yin vacuity) talkative and full of jokes. (heart yang hyper) Sadness, (lung, heart) anxiety, (heart, kidney, spleen) fright at every trifle, (heart, gallbladder) every little noise startling. (liver or heart) Apprehensive and weepy in the evening. (lung phlegm) Weeping from slight cause, (lung damp) sadness, anxiety. Dreads the return of dawn (yin problem that is phlegm or yin vacuity) **and the trivial details of life seem insupportable. Always troubled.** Nervous, **must walk.** (heart yang hyper) Troublesome impressions easily become fixed ideas. (fixed ideas—spleen problem) Loss of memory, cannot find words at the moment wanted, (spleen deficiency) cannot write his reports, cannot play music, (spleen deficient) Abusive. (liver fire) Bad temper. Irritable, irascible especially towards his children, his family. (liver/heart fire) Harsh tempered and cruel. (heart fire) Despondent. Sad, anxious. Talkative, **disposed to jest.** Cannot think.

Abdomen

Flatulence with air hunger. Squeaking or clucking noise in abdomen.

Back

Small of the back as if in a vice. Bruised pain in lumbar region worse sitting bent. Pain in coccyx as from a fall.

Breasts

Atrophy of breasts. Menses late and profuse.

Chest

Chest pains go backwards. Pain from sternum to back.

Ears

Noises in ear. Tinnitus. Boring pain in the ears. Deafness.

Eyes

Puffy, burning, watery, conjunctiva red. Syphilitic iritis. Bony tumors of the orbit. Constant oscillations of the eyeballs. Winking is painful. Pustular keratitis and chemosis. Edema around. Lower lids twitch.

Face

Facial neuralgia. Sharp pain in upper jaw. Tight pain at zygomata. Glutinous mucus on lips in a.m.

Female

Menses late, profuse. The uterus feels as if squeezed during menses. Leucorrhoea, corrosive like meat washing. Fibroid tumors, metritis, sub-involution, hypertrophy.

Food

Cold food and drink aggravate. All symptoms worse by drinking cold milk. Much thirst. Aversion to all food to broth.

Head

Bilateral headaches. Violent headaches. As if screwed, through sides of head, worse warmth and pressure. Hard painful lumps on cranium with headache. Pain in tense over eyes and root of nose. Brain feels enlarged. Pain in scalp on scratching, as if ulcerated. Big head and small jaws, rickets. Scalp fissured and sore. Tender spots on head. Hair changes color and falls off.

Heart

Palpitation and darting pains worse when walking. Aneurysm.

PAGE 910

Kidneys

Frequent urination of copious, clear, urine, worse before menses, at night.

Limbs

Rheumatism, pains at night and in damp weather. Severe bone-pains. Contraction of joints. Periosteum thickened, especially tibia, sensitive to touch. (Kali-bi., Asaf.) Rheumatism of knees with effusion. Pain in small of back and coccyx. Pain in hip, forcing limping. Sciatica, worse lying, on the affected side, sitting, standing, wakes him at night, better walking and flexing legs. Formication of lower limbs when sitting, better lying down. Tip of thumb ulcerates and turns yellow.

Lungs

Whistling asthmatic breathing. Air passages raw. Violent cough, worse in morning. Air hunger with flatulency in a.m. , awakes choking. Expectoration like soap-suds, greenish.

Pneumonia, when the hepatization commences. Pneumococcic meningitis. Stitching pains through lungs to back. Asthma. Dyspnea on ascending with pain in heart. Pulmonary edema. Hydrothorax. (Merc-sul.) Pleuritic effusion. Cold travels downward to chest. Dry bronchitis.

Male

Atrophy of testicles. Chronic gonorrhoea, discharge thick green. Excoriation by least friction.

Mouth

Toothache nagging, as if a worm were digging in it. Taste bitter, on waking, salty. Saliva increased. Bloody saliva with sweetish or disgusting taste. Severe pain at the root of tongue, at night. Ulcers in mouth, as if coated with milk.

Nose

Red, swollen. Tip of nose red. Nasal catarrh involving frontal sinus. Burning, throbbing in nose and sinuses. Violent sneezing. Takes cold from every damp day. Coryza, descending, profuse, acrid, hot, watery discharge, worse cool air with salivation and dyspnea. Stuffiness and dryness of nose without discharge. Tightness at the root of the nose. Ozaena with perforated septum. Cool, greenish, irritating, discharge from nose.

Rectum

Fissured anus of infants. Diarrhoea with pain in lumber region, as if broken or as if menses would appear. Early morning diarrhoea of tuberculosis. Stools frequent.

Sensations

As though head was enlarged, as if it were screwed in, as if a large quantity of water were forced into brain, as if it would be forced asunder, as if a leaflet were at root of nose. As if a worm was crawling at root of nose. Back as if in a vice. As of a tumor in ovaries. In chest as if cut to pieces. In coccyx as if bruised.

Skin

Hives. Giant urticaria. Rough nodules all over, worse any covering, heat of body intense. Acne, hydroa. Acne rosacea. Small boils, leaving scars. Purple spots, worse on legs. Tendency to edematous swellings, eyelids, mouth, uvula, etc.

Sleep

Weeps loudly during sleep, but unconscious of it.

Stomach

Faintness at epigastrium. Flatulence. Sensation as if waterbrash is occurring. Throbbing, painful burning.

Temperature

Chilly in bones in painful parts. Heat in evening. Uncovers then chilly. Alternate heat and chill. Heat with shudders. Hot and dry, then drenching sweat. Profuse night sweats which better.

Throat

Sore of speakers. Goiter sensitive to contact. Dry. Tonsils enlarged. Larynx feels raw. Laryngeal edema.

Vertigo

Vertigo in the dark, worse railway traveling.

Comments

It may be mentioned the power of Kali-i. over tumors of other kinds. Enlarged lymphatic glands, (phlegm accumulation) syphilitic nodes, (phlegm heat accumulation) condylomata

and tumors of the breast(**phlegm accumulation**) and uterus have been removed by it. This has occurred under the action of the crude salt for the most part and the general explanation is that the solvent action of the drug is most powerfully excited on new tissues.

Several cases of abdominal tumor were successfully treated with Kali-i. in 3x, 10c and 15c triturations.

PAGE 911

Two of these had been unsuccessfully treated with the crude salt before coming under his care. This they could not tolerate on account of loss of appetite and irritation of the mucous membrane of mouth and throat.

One of these patients had a large tumor on the level of the great curvature of the stomach extending on both sides, plunging into the abdominal cavity and extending into the pelvis, it was adherent and difficult to define.

She had a jaundiced, dirty-looking skin and loss of appetite and mostly vomited her food. A suspicion of latent syphilis led Gaudy to the remedy, which was perfectly tolerated in potency, though not in the crude. Health rapidly improved and in three months there was hardly any tumor to be discovered. The second case was very similar in nature to this.

Cooper reports this case: Womb packed with fibroids, pain in right inguinal region on exertion, spirits depressed, tinnitus like buzzing of flies, constant tired, sleepy feeling down the limbs, hot burning feet, though sometimes intense shivering all over, pains in the breasts, which are tender, unable to go long without food, constant distention as from flatus, sinking at scrobiculus cordis at 11 a.m. , sleep dreamy, all these symptoms moved away under Kali-i. 30c, leaving the patient in absolute comfort.

A grand indication for Kali-i., as pointed out by Cooper is a diffused sensitiveness over parts affected. (**qi stagnation**) This appears in the provings: The scalp is painful on scratching, as if ulcerated (after eleven days). (**qi stagnation**)" This is from Hartlaub and Trinks. "Swelling of the whole thyroid gland **increasing very rapidly** with some sensitiveness to touch and pressure. (**dampness heat accumulation, heat or yang excess—sensitive, excess condition—pressure worse**)

It has removed sensitive syphilitic nodes. (**heated phlegm**) In all neuralgic (**heart related**) or inflammatory conditions where there is heightened (**yang hyper**) and diffused sensitiveness (**qi stagnation**) of the affected part, Kali-i. must be considered.

The action of Kali-i. in the respiratory sphere is important. Kali-i. corresponds to serous effusion on the brain secondary to hepatization of the lungs. (**liver yang attacks lungs so due to lung heat exudation of liquid from serous membranes in brain**) The coryza of Kali-i. is well known and constitutes for the old school the only generally recognized indication of "Iodism," as it is called with supreme disregard of the Kali element.

The discharge is acrid, watery, the eyes smart and are puffed. (**damp discharges with heat stagnation**) there is lachrymation. (**liver yang hyper**) This action on the eyes may develop **into iritis, keratitis (liver heat)** and chemosis. The coryza recurs repeatedly from every little cold (**when recurs again and again then it is either phlegm or deficiency may be**) and makes the nose red and swollen. (**blood congealation in nose due to cold**) The discharge may become thick, green offensive, (**phlegm heat**) **ozæna and perforation of the bones** may occur. (**toxic heat with phlegm**)

Kali-i. corresponds to many cases of tuberculosis, laryngeal and pulmonary. Deep, hollow, (yin deficiency) hoarse cough (phlegm) with pain through breast (phlegm heat). A characteristic is stitches (phlegm heat, heat--spreading) through the lungs in middle of sternum, through sternum to back or deep in chest while walking. The expectoration is greenish, copious and looks like soapsuds. (damp heat discharges)

The digestive tract is no less disordered than other mucous membranes. There is a terrible pain at the root of the tongue (phlegm heat stagnation or large intestine accumulation) which is characteristic. There is loss of appetite and indigestion (spleen qi deficiency) with flatulence and bloating (stomach qi stagnation or phlegm) almost as intense as that in Lyc.

Eruptions of many kinds appear, scrofulous and syphilitic in appearance. (pure heat or phlegm heat eruptions) There is a papular and pustular eruption, especially on scalp and down back, (phlegm heat) the pustules leaving scars when they heal. (phlegm heat, potential organ or meridian disturbance)

The sciatica (wind cold) of Kali-i. is worse at night, (yin type, cold) worse lying on painful side, (excess condition—cold) better in open air. (heaven qi helps) The chest symptoms like those of Kali-c., may be worse in early morning 2 to 5 a.m. (lung time) Headache worse 5 a.m. (large intestine time) also **headache worse after a night's rest.** (heat in large intestine) Loose stools (heat in large intestine) also occur at that time (Kali-bi.). Like Merc., Kali-i. has great sensitiveness to atmospheric changes (phlegm/dampness stores and affected by heat and cold both so changes affects as he does not want change) Every little exposure every damp day will set up the symptoms. At the same time there is the better in open air of Iod., etc.: "Irresistible desire for the open air, walking in open air does not fatigue."

The chill of intermittent fever is not better by warmth, but warmth better many symptoms of teeth and scalp. In general, however, there is aversion to heat. Heat worse headache. Motion aggravates especially walking, (heat-motion aggravation or spleen qi deficiency) **after the first movement in the lower limbs it is more bearable.** Sitting hurts (spleen deficiency) and flexing limbs (spleen qi stagnation) better some of the pains. Worse from touch (yang hyper or qi stagnation) is a very marked feature of Kali-i., this is part of the "diffused sensitiveness" noted by Cooper. (qi stagnation)

Kali-i. is a remedy that has a great number of keynote. It seems suitable for pale, delicate subjects is also required for those **who flush easily (yin vacuity yang floating)** and are manifestly plethoric. **A diffused arterial vasculosis is met by it, but it is also called for in venous state.**

Its characteristic tinnitus aurium is certainly the sharp, shrill, hissing and piercing noises, (liver yang hyper) but it also relieves the throbbing, pulsative noises, (cold stagnation or blood congealation noises) especially when **the heart is hypertrophied** (and inclined to fatty degeneration).

But perhaps the most satisfactory action of Kali-i. in the 30c is in rickets along with its many attendant symptoms. When children cannot bear to be touched, **cannot ride in jolting conveyances,** (yang hyper) have big heads and emaciated limbs, (fluid accumulation in upper burner and spleen qi/yin vacuity) big teeth (phlegm excess or kidney energy) **and small jaws** and when they incline to frequency of urination **and of defecation,** (kidney qi deficiency) Kali-i. 30c will work wonders.

SOURCES

Boericke. Clarke. Grimmer. Phatak.

Kalium muriaticum

(chloride of potassium)

Pharmacy

Kali-m. Kali muriaticum. Potassium chloride. Chloride of Potassium. Kali chloratum. Not to be confounded with Chlorate of Potash, Kali chloricum. Trituration. Solution. Historical dose: Trituration and all potencies, third to thirtieth potency.

History

Kali-m. is to Schÿssler that we owe the introduction of this salt, Kali muriaticum into homeopathy. His account of it is this: "It is contained in nearly all the cells and in chemically related to fibrin. It will dissolve white or grayish-white (**cold phlegm**) secretions of the mucous membrane and plastic exudations." This gives the indication for Kali muriaticum in Catarrhs in croupous and diphtheria (**cold phlegm croup and diphtheria**) exudations and in the second stage of inflammation of serous membranes when the exudation is plastic. (**plastic-cold phlegm**)

When the cells of the epidermis lose molecules of Kali-m. in consequence of a morbid irritation, then the fibrin comes to the surface as a white or whitish-gray mass, when dried this forms a mealy covering. (**cold phlegm**)

If the irritation has seized upon the tissues under the epidermis, then fibrin and serum are exuded, causing the affected spot on the epidermis to rise in blisters. (**blisters—here cold phlegm type**) Similar processes may take place in and below epithelial cells. **Planets:**

Mercury.

PAGE 913

Homeopathic

Kali-m. causes catarrhal condition, producing milky white, viscid, sticky, thick, slimy or lumpy discharges.(**phlegm cold**) Tough plastic or fibrinous exudates.(**phlegm cold**)

Although not proven, this remedy has a wide clinical use, through its introduction by Schuessler. It is of great value in catarrhal disorders(**due to phlegm cold**) in the sub-acute inflammatory states, fibrinous exudations and glandular swellings.(**phlegm cold type**)

White or gray coating of base of tongue and expectoration of thick, white phlegm, (**phlegm cold**) seem to be special guiding symptoms_ Bursitis, patellar.

The great keynote of Kali-m. is whiteness.(**due to cold**) Whiteness of secretions, exudations,(**cold**) **eruptions of tissues**.(**phlegm cold eruptions**) The next is toughness. (**phlegm cold condensed**) Fibrinous exudations and discharges too readily clotting blood. (**due to cold stagnation**) Hence embolism(**blood congeal**) indurations, hard swellings. (**blood congeal induration and swelling**)

Hard deposits.(**phlegm cold**) glandular swelling.(**phlegm cold,blood congealation**) Sore, cutting(**blood congealation or stagnation**) or sticking,(**phlegm**) **shifting pains**.(**phlegm**) **Crawling** and numbness(**blood stagnation/phlegm**). Embolism.(**blood congealation**) Crosswise symptoms.(**wind phlegm**) Slow reaction.(**phlegm**) Stubborn infiltration.(**cold phlegm**)

Clinical

Acne. Aphthae. Breasts, cysts. Bubo. Bunion. Burns. Cataract. Chilblains. Constipation. Croup. Cystitis. Diarrhea, Diphtheria. Dropsy. Dysentery. Ear disorders. Eczema. Embolisms. Eustachian tubes. **Eyes** disorders. Glands, swollen. Hemorrhoid. Hodgkin's disease. Ingrowing toenails. Jaundice. Joints, stiff. Leucorrhea. Meales. Mumps. Rheumatism. Scorbutus. Shingles. Sinusitis. Small-pox. Sycosis. Tendons, creaking. Vaccination, effects. Warts.

Causations

Ill effects of vaccination, sprains, burns, blows, cuts.(**these all affect fibrin in the blood to move out**)

Modalities

Better from cold drinks.(**cold drinks dilute the cold hard phlegm**) Rubbing.(**warm the cold**) Letting hair down. Worse from open air, cold drinks.(**due to cold phlegm**) Worse from drafts,(**wind phlegm**) lying.(**phlegm stagnation,excess condtion**) Worse at night,(**yin type**) dampness, sprains.(**blood fibrin goes out**) Worse during menses.(**during menses-heat increases but it is fibrin going out in the blood here so more heat or more motion more fibrin will go out**) Worse by motion. Worse by any fatty, rich food or pastry. (**phlegm cold**) Worse by warmth of bed, (rheumatic symptoms)(**blood congealation and phlegm in channels and collaterals**)

Symptoms

MIND

Discontent,(**liver or heart yang hyper**) discouraged.(**gall bladder deficient**) **Fears evil.** **Sits in silence.** Imagines he must starve.(**due to phlegm cold stagnation**) Irritable and angry, at trifles.(**liver yang hyper**).

Abdomen

Abdominal tenderness and swelling. Flatulence. Fullness after eating

Back

Heaviness under right shoulder. Buzzing under right scapula. Backache better lying. Lightning pains from small of back to feet. Must get out of bed and sit up.

Breasts

Cysts. Soft, tender nodes in breasts. Painful breasts before or at menses. Bunches in breast feel quite soft and are tender.

Ears

Eustachian tube blockage. Catarrhal conditions of the middle ear. Glands about the ear swollen. Great effusion about the auricle. Deafness from catarrhal condition and occlusion of eustachian tubes. Crackling noises on blowing nose or swallowing. Snapping, itching or as of a plug in ears. Glands about the ears are swollen. Soreness of eustachian tube.

Eyes

Trachoma. *Corneal opacities*. *Pustules on cornea*. Exudation in retina. Cataract.

Scintillations on coughing. **White mucus**, purulent scabs. Superficial ulcer.

Face

Bluish, sunken. Cheeks swollen and painful. Paralysis, following pain in face. Muscles of face twitch and tremble worse eating, speaking or coughing. Mumps without fever.

Female

Menstruation too late or suppressed, checked or too early. Excessive discharge, dark-clotted or tough, black blood like tar. (Plat.) Leucorrhœa, discharge of milky-white mucus, thick, non-irritating, bland. Morning sickness with vomiting of white phlegm.

Food

Habitual loss of appetite or refuses food.

PAGE 914

Head

Sinus headache. Headache with vomiting. Stunning shock in or a leaden load holds down occiput better letting hair down and warmth. Brain feels loose. Sweating of head. Sick-headache with white-coated tongue, vomiting of white phlegm. Meningitis. Crusta lactea. Copious white dandruff.

Heart

Coldness at heart. Palpitation from excessive flow of blood to heart in hypertrophic conditions.

Kidneys

Dribbling urination. Cystitis. Discharge white thick mucous. Acute cases of inflammation of bladder, in second stage, when swelling has set in and discharge in thick, white mucus.

Limbs

Rheumatic fever, exudation and swelling around joints. Rheumatic pains felt only during motion or increased by it. Nightly rheumatic pains, worse from warmth of bed.

Lightning-like pains from small of back to feet, must get out of bed and sit up. Hands get stiff while writing or knitting. Cold hands and feet. Cold foot sweat. Cramps in limbs in

legs. Twitching thighs. Tension in leg alternating with tension in arm. Cutting in bones. Exudation and swelling around the joints. Cracking of tendons, back of hand.

Liver

Jaundice if caused by a chill resulting in catarrh of duodenum, stools light in color. Sluggish action or complete torpidity of liver, pain in right side.

Lungs

Asthma with gastric derangements, mucus white and hard to cough up. Loud, noisy stomach cough. Cough short, acute and spasmodic like whooping cough, expectoration thick and white. Rattling sounds of air passing through thick, tenacious mucus in the bronchi, difficult to cough up. Difficult or oppressed breathing. Bronchitis. Expectoration sticky, milky or flies from the mouth. Rawness in chest. Flushes of heat in chest.

Male

Gonorrhoea, and orchitis resulting from a suppression of same. In bubo for the soft swelling, and in soft chancre. Gleet combined with eczema, visible or latent.

Mouth

Eruptions around the mouth. Aphthae. Thrush. White ulcers in the mouth. Swollen glands about jaw and neck. Coating of tongue grayish-white, dry or slimy. Scorbutic gums. Tongue, mapped, gray or white, at base. Taste, salty, bitter with coldness of tongue. Sensation as if a tumor were growing on the tongue.

Nose

Stuffy cold in head, whitish gray tongue. Discharge white, thick. Hawking of mucous from posterior sinuses. Catarrh, phlegm white, thick. Vault of pharynx covered with adherent crust. Nosebleeds. (Arn., Phos.)

Rectum

Constipation, light-colored stools. Diarrhoea after fatty food, clay-colored, white or slimy stools. Dysentery, purging with slimy stools. Hemorrhoids, bleeding, blood dark and thick, fibrinous, clotted. Anus sore, worse walking or after stools. Itching or crawling in anus after stools. Thread-worms.

Skin

Acne, erythema and eczema with vesicles containing thick, white contents. Dry, flour-like scales on the skin, (Ars.) Bursitis. Branny. Eruptions connected with stomach or menstrual disorders.

Sleep

Anxious dreams. Restless sleep, startled at least noise.

Stomach

Dyspepsia and indigestion, with a whitish-gray tongue, sick feeling after taking fat, pain and heavy feeling on right side under shoulder. Fatty or rich food causes indigestion. Nausea with shivers. Stomach heavy, at night. Vomits food. Vomiting of white, opaque mucus, water gathers in the mouth. Pain in the stomach with constipation. Bulimia, hunger disappears by drinking water.

Teeth

Gumboil before matter forms. Toothache with swelling of the gums and cheeks.

Throat

Loss of voice, hoarseness. Follicular tonsillitis. Tonsils swollen inflamed, swallowing excessively painful, can hardly breathe. Grayish-white, ulcerated, chronic sore throat.

Adherent crusts in vault of pharynx. "Hospital" sore throat. Eustachian catarrh. Hawks out thick white mucous, cheesy.

PAGE 915

Comments

The Kali-m. conditions and symptoms most strongly emphasized are a chronic(phlegm) catarrhal(phlegm cold) condition of middle ear. Closed Eustachian tubes.(phlegm cold) Snapping and noises in the ear.(cold phlegm obstruction) Grayish white, dry or slimy tongue.(cold phlegm) Hemorrhoids,(blood congealation or cold stagnation) **bleeding**, blood dark(cold blood), fibrous,(fibrin out) clotted.(blood congealed due to cold)_ **Diphtheria.** Rheumatic fever with exudation and swelling around the joints.(blood congealation/phlegm)

It is said to have cured cataract (cold phlegm stagnation)after Calc-fl. had helped. Clarke has cured with it rheumatism affecting most left shoulder and elbow worse in morning on rising.

Kali-m. manifests the action of its two elements in about equal proportions. It compares closely with Kali-chlor. and it is quite possible that the proving of the latter will be available for both preparations, as Hering infers. Among the symptoms of Kali-chl. are: "Tendency to rush of blood to both eyes and Light before both eyes on coughing and sneezing."

Boericke and Dewey give: "Protruded appearance of eyes, white tongue, croupy, hard cough, harsh barking." Hering gives: "Cough, noisy with protruded appearance of eyes." In a case Kali-m. caused a severe aggravation of the following, " As if eyes would be forced out of head with cough."

Compare

- (1) Bell. which Kali-m. follows well in the catarrhal and hypertrophic conditions.
- (2) Kino - otorrhea with stitches in right ear.
- (3) Bry., Merc., Puls., Sulph.
- (4) Kali-chl. in tough secretions, Kali-bi., Kali-c., Hydr.
- (5) in rheumatic affections, Bry., Rhus-t., Sulph.
- (6) Merc-d. in the Eustachian tube and in inflammations of ear.
- (7) Graph., Nat-m., Nit-ac., Sil., Apis, Thuj.
- (8) Puls. in worse from fatty food, worse from warmth.

Relations

Antidoted by: Bell., Calc-s., Hydr., Puls. It follows well: Calc-p. Calc-fl., Ferr-p.

Kalium nitricum

(saltpetre)

Pharmacy

Kali-n. Kali nitricum. Saltpetre. Nitre. Nitrate of Potassium. Potassium Nitrate. Trituration. Solution. Historical dose: Trituration and all potencies, third to thirtieth potency.

History

Saltpetre of the Alchemists. Kali-n. is known in old-school practice principally as a "refrigerant diuretic," and as the active agent in the well known "nitre papers," which are burnt for producing fumes to allay attacks of asthma.

A solution of saltpetre as an application was an old remedy for inveterate mange in cats. Nitre with Sulphur and Charcoal forms gunpowder. A teaspoonful of this in hot water was a favorite remedy for gonorrhoea among soldiers in the days when black powder was used.

Homeopathic

Kali-n. has also been used in rheumatism and for incontinence of urine in children.

Potassium Nitrate affects respiratory organs, kidneys, heart and blood vessels. Secretions are increased into cavities.

Often indicated in asthma, also valuable in cardiac asthma of great value in sudden dropsical swellings over the whole body. Gastro-intestinal inflammation with much debility and relapse in tuberculosis, call for this remedy. Suppurative nephritis.

Sudden dropsical swelling of the whole body. It is often indicated in suppurative nephritis, asthma and cardiac asthma. Pains are dull stitching, throbbing. Wooden, numbness. Relapsing tuberculosis. Very weak. Hemorrhagic tendency.

PAGE 916

Clinical

Asthma. Bedwetting. Chest pain. Colic. Diabetes insipidus. Dysentery. Dysmenorrhoea.

Gastritis. Headache. **Heart** disorders. Herpes. Meniere's disease. Menorrhagia. Nosebleeds. Peritonitis. Pleurisy. Pneumonia. Polyps. Rheumatism. Tuberculosis. Vertigo. Constitutions

Suited to asthmatic constitutions and chest complaints. **Planets:** Mercury, Saturn.

Modalities

Better lying down, lying right side, uncovering head. Better from gentle motion, drinking water in sips. Worse from walking, cold, damp, taking cold, lying with head low, breathing. Worse eating veal. Worse towards morning and in afternoon. Worse coffee, wine, beer.

Symptoms

MIND

The mental state of Kali-n. is chiefly one of peevishness, fretfulness and boredom. Mental weariness from lack of occupation or interest. Discouragement and fear of death.

Abdomen

Violent pain in right side after eating veal. Excessive Distention of abdomen. Gripping about umbilicus. Stitching and sticking pains. Peritonitis. Incarceration of flatus, especially in afternoon and evening. Very loud rumbling in abdomen.

Back

Pains extend into the chest. Shooting pains in sacral region. Violent pains in loins on waking. Pains in back on stooping. Feeling in back as if kidneys engorged. Aching in lumbar region. Shootings in and between scapula.

Chest

Chest feels constricted. Oppression on chest, when ascending. Contractive pain in chest. Inflammation of lungs. Sticking in left side near sternum.

Ears

Chronic deafness from paralysis of auditory nerve. Vertigo and tinnitus. Shooting in ears. Inflammation and swelling of lobe of right ear. Tinkling and ringing in ears. Vertigo and tinnitus.

Eyes

Burning in eyes, with lachrymation and photophobia. External angle of right eye twitches, worse chewing. Vision becomes clouded. Turbid corpus vitreum. (Arn., Ham., Phos.)

Transient blindness. Colored circles before eyes. In evening, candles appear surrounded by a rainbow-like halo.

Female

Profuse menses, black like ink. Menses too early, profuse, preceded and with violent backache. Leucorrhea. Burning pains in the ovarian region only during menses. (Zinc. after menses)

Food

Another characteristic of Kali-n. is worse from eating veal or effects of eating it are headache, diarrhea, etc.

Head

Pains in occiput better letting hair down. Head pain, better motion of carriage. Scalp very sensitive. Headache with vertigo, as if falling to right side and backwards, worse stooping.

Heart

Palpitations, worse lying. Violent stitch in precordia and beating of heart. Pulse is weak, small and thready.

Kidneys

Frequent and profuse emission of clear urine. Diabetes insipidus. Dull kidney pains. Burning in urethra while urinating and greatly diminished urine.

Limbs

Drawing in limbs with paralytic weakness. Stitches between shoulder-blades. Tearing and sticking in shoulders and joints. Hands and fingers seem swollen. Rheumatic pains and stitches in limbs and joints.

Lungs

Rapid gasping breathing, sits upright. Dry, morning cough with pain in the chest and bloody expectoration. Bronchitis with sharp, short, dry, hacking cough. Congestion of right lung. Asthma with excessive dyspnea, nausea, dull stitches and burning in chest. Dyspnea so great that breath cannot be held long enough to drink, though thirsty. Sour-smelling expectoration. Expectoration of clotted blood after hawking mucus. Acute exacerbations in tuberculosis. Spasmodic croup, paroxysm of crowing.

Mouth

Tongue red with burning pimples. Throat constricted and sore. Fetid breath. Burning blister at tip of tongue. Crawling on tongue. Tongue loaded with a white coating. Taste disagreeable, nauseous, disgusting, sour.

Nose

Violent coryza with obstruction of nose, and loss of smell. Sneezing. Swollen feeling, worse right nostril. Point red and itching. Burning in nose with digging and clawing pain. The nasal bones are painful, especially to the touch. Swelling of interior of nose. Ulcers in the nostrils covered by a scurf. Nosebleed with acrid blood. Polyps. (Sang-n.)

PAGE 917

Rectum

Diarrhea from eating veal. Thin, watery dark, bloody stools. Membranous shreds with tenesmus. Feces hard, difficult, and retarded, evacuated with much effort. Urgent want to evacuate with tenesmus. Hard like sheep's dung. Frequent pressing n rectum. Dysentery with much cutting pain, great thirst and icy coldness of feet.

Skin

Lancinations in skin. Pricking like needles, followed by burning. Tubercles, size of a pea. Burning vesicles filled with yellowish serum, which break when scratched. Sudden dropsical swelling.

Sleep

Drowsiness during day. Disturbed sleep at night, constant dreaming, with frequent awakening. Anxious and uneasy dreams about dangerous situations. Nightmare. Coma.

Stomach

Faint like weakness at stomach pit. Nausea, as if about to vomit worse at night. Epigastric or sub-sternal pains go towards axilla. Ineffectual retching. Vomiting of mucus, mixed with blood. Gnawing, spasmodic weakness, and pressure on epigastrium. Burning in stomach. Severe pain after every meal.

Teeth

Toothache, with sharp drawing, or tearing pains in teeth and head. Shooting in carious teeth, when touched. Pulsative toothache, at night, worse by cold things. Swelling of gums, of an inflammatory or scorbutic character, they bleed readily.

Temperature

External coldness, chin, skin. Internal burning. Extraordinary shiverings not better by hot drinks or coverings. Coldness in afternoon with thirst, or coldness, preceded by headache. Quotidian fever, with drawing pains in limbs. Profuse and colliquative sweat. Sweat in morning, especially on chest.

Throat

Hoarseness. Laryngeal diphtheria. Sore throat with shooting pain. Impeded swallowing from tension and cutting in the larynx. Loss of speech. Nocturnal pain in throat, as if it were contracting.

Vertigo

Fainting fits with vertigo in morning, worse on standing, better sitting down.

Comments

Kali-n. has been extensively proved by homeopaths and symptoms have been added from cases of poisoning, so that its characteristics are well defined. It is almost equal to Kali-c. in producing stitching pains and it is like it in having a cough at 3 a.m. The pains produced by Kali-n. are very severe Ñ stitching, cutting, lancinating, tearing and pressing.

And there is, as with many other Kalis, much external sensitiveness Ñ of scalp of abdomen of testes. That its anti-asthmatic properties are homeopathic is abundantly shown in the respiratory symptoms it produces. Its "diuretic" properties are utilized

homeopathically in diabetes insipidus and its use in bedwetting must come in the same category.

Kali-n. acts with great intensity on the abdominal and pelvic organs. It produces the most painful colics, diarrhea and dysentery. In the male sexual sphere, excitement and pain in tests and cords. In the female, menorrhagia with flow of ink-like blackness. These are characteristic.

There are many curious symptoms in the nose: "The pain-like contraction in the eyes, forehead and face concentrates in the tip of the nose. Swollen feeling in right nostril, which is painful on pressure, sore pain in upper part of right nostril with external sensitiveness", these two last symptoms led to the cure of a large nasal polyps in a girl.

In a poisoning case there was in the period of recovery intense vertigo with tinnitus, which should indicate Kali-n. in some cases of Meniere's disease. Easy intoxication by wine or beer was noted by several provers. A peculiar connection symptoms is a sour taste in the throat.

PAGE 918

Another peculiar symptoms is in with the asthmatic state. The breathlessness is so great that the patient though thirsty can only drink a sip at a time between the breaths. Allen thus defines the asthma of Kali-n. as asthma with excessive dyspnea, faintness and nausea with dull stitches or with burning pain in chest, rather free expectoration.

Compare

(1) Cann-s. which contains a large amount of Kali-n.

(2) Lyc., Sang., All-s., Ant-iod.

Relations

Antidotes: Op., Nit-s-d. It antidotes: Opium or Morphine poisoning, 8 to 10 grains to glass of water.

SOURCES

Boericke. Clarke. Phatak.

Kalium oxalicum

(potassium bioxalate)

Pharmacy

Kali-ox. Kali oxalicum. Kali oxalas. Potassium Bioxalate. Salts of Sorrel. Trituration. Solution. Historical dose: All potencies.

History

Only cases of poisoning have been observed with this salt. **Planets:** Moon.

Homeopathic

The main symptoms of Kali-ox. are those of violent irritation. Convulsions, violent and continuous vomiting, cramps, severe pain in the back, coldness and collapse. One patient became insane.

A peculiar symptom was throbbing in the head with great thirst. There were severe pains in the back recalling the action of Oxalic acid with which (Rumex acet.) this remedy must be compared.

Clinical

Convulsions. Cramps. **Eyes** inflamed. Lumbago. Vomiting.

Symptoms

MIND

Loses his reason. Becomes insane. Extreme depression.

Abdomen

Violent pains in abdomen and convulsions. Scalding sensation extended over abdomen with tenderness on tolerably firm pressure.

Back

Pain a back. Severe lumbar pain.

Bladder

Urination accompanied by a sensation of scalding.

Eyes

Great soreness of eyes with dim vision. **Conjunctive injected**, pupils dilated.

Face

Countenance flushed. Face pale, anxious-looking and covered with a cold sweat. Face and lips pale with continual riggers over whole body.

Food

Great thirst and throbbing pain in head.

Head

Swimming in head, heaviness, throbbing pain and great thirst.

Kidneys

Urination accompanied by a sensation of scalding.

Limbs

Spasmodic contractions in hands. Nails and fingers blue. Great weakness in lower limbs. Cramps in legs. Muscular weakness. Falls and utters loud cries. Tendency to faint. Lying on the floor quite faint.

Mouth

Tongue and fauces red and irritable. Very strong acid taste of poison lasting two days.

Skin

Cold and clammy.

Stomach

Vomiting and faintness. Vomiting, continuing at intervals of ten minutes to an hour for nearly a week. It had scarcely reached the stomach when she was seized with excruciating pain, followed by violent convulsions and death within ten minutes. Very severe burning pain in stomach and bowels.

Temperature

Sensations of coldness, succeeded by burning heat in chest and stomach and general muscular weakness. Continued rigors affecting whole body.

Throat

Scalding sensation in throat and stomach.

SOURCES

Clarke.

Kalium permanganatum

(permanganate of potassium)

Pharmacy

Kali-perm. Permanganate of Potash. Kali permanganicum. Kali manganicum. Kali hypermanganicum. Solution in distilled water. Trituration.

PAGE 919

Historical dose: Trituration and all potencies, locally, 1 dram to a quart of water to correct fetor in cancer, ulcer, ozaena and other foul odors.

History

Kali-perm. is the well-known disinfectant and has been chiefly used in medicine as a local application in diphtheria and other conditions where there are fetid discharges.

Kali-perm. counteracts effects of alkaloids of many poisonous plants. Owing to its oxidizing powers if given before the alkaloid has been absorbed.

A case of Opium poisoning is reported in which an ounce of laudanum had been swallowed by mistake. Kali-perm. in dilute solution, (2 grains to the pint) was given repeatedly and acted promptly. Next day only dryness of mouth and throat was felt.

Intense irritation of nose, throat and larynx.

Kraft, who has used it largely in diphtheria, gives it in this way: A few grains are dissolved in a tumbler of water, sufficient to make it very red. A teaspoonful of this is put into another tumbler of water and a teaspoonful out of the second tumbler is given every hour or two. **Planets:** Mars, Saturn.

Homeopathic

Kali-perm. has various septic conditions, the tissues are infiltrated with tendency to sloughing. Bites of snakes and for other animal poisons, (Led.) Dysmenorrhea.

Diphtheria. The swollen uvula is also noteworthy. Extreme fetor of the breath and bloody discharges from the nose and intense prostration appear to be the leading indications for it in diphtheria.

There was intense irritation of nose, throat and larynx with bloody and bloody discharges and constant inclination and constant flow of ropy mucus from the stomach were among the noted effects. The uvula was swollen and red.

Clinical

Bites. Cough. Diphtheria. Gastritis. Ozaena. Salivation. Snake-bites. Throat, sore. Uvula, swollen. Warts.

Symptoms

Back

Muscles of neck feel sore.

Chest

Aching in region of cricoid cartilage, worse every attempt to swallow.

Ears

Sharp pricking pains extending from throat to left mastoid process, apparently along Eustachian tube.

Eyes

Profuse lachrymation.

Face

Face hot.

Food

Appetite lost. Thirst, inability to drink.

Head

Head feels full.

Kidneys

Compelled to urinate frequently, urine copious, clear, watery. Urine profuse and watery.

Limbs

Legs feel as though he could not move them, tremble on attempting to stand.

Lungs

Short, hacking cough, with a constant painful urging to swallow. Constant short, painful hacking cough, with blood-streaked sputa.

Mouth

Fetor of breath. Swollen uvula. Mouth and lips very dry, lips smart when exposed to cold air. Profuse flow of saliva. Increased flow of saliva runs constantly out of the mouth.

Speech painful, difficult, hoarse.

Nose

Smarts and irritates. Posterior sinuses painful. Nasal discharge smart and irritates.

Bloody discharge, nose feels stuffed and full as in catarrh. Profuse bleeding from nose.

Rectum

Obstinate constipation.

Skin

Profuse sweat.

Sleep

Restless at night. Sleepless.

Stomach

Hot, burning pain in stomach. Sickening pain in stomach. Nausea and constant inclination to swallow. Nausea and vomiting.

Throat

Constrictive, smarting sensation in throat. Larynx feels raw. Swollen and painful.

Everything hawked up streaked with blood. Constant inclination to swallow.

Comments

Potassium permanganate is recognized as being the most effective chemical antidote in cases of morphine or opium poisoning, acting directly on the morphine and oxidizing it to less toxic substances.

PAGE 920

To be effective the permanganate must come in direct contact with the opium or morphine in the stomach. The treatment is administration of two to five grains of potassium permanganate in dilute aqueous solution as soon as possible after the poison is taken, this amount to be increased if very large doses of the poison have been taken.

Washing out the stomach with a quantity of 1 to 500 solution of permanganate is also recommended, using at least a pint of this solution either by a stomach pump or by enforced vomiting.

Compare

(1) Other oxidizing salts, especially Kali-bi., also Mang., Caust., Kali-c.

(2) in edematous uvula, Mur-ac., Apis.

(3) in diphtheria, Diphth., Merc-cy., Arum-t., Kali-bi., Kali-m.,

(4) in thick, ropy mucus, Kali-bi.

Relations

Kali-perm. antidotes Opium.

SOURCES

Boericke. Clarke.

Kalium phosphoricum

(phosphate of potassium)

Pharmacy

Kali-p. Kali phosphoricum. Phosphate of Potassium. Trituration. Solution in distilled water. Historical dose: Trituration and all potencies, third to thirtieth trituration.

History

Schuessler's great remedy for conditions arising from want of nerve power. (heart yang deficient) According to Schüssler: Kali-p. is contained in the cells of the brains, nerves, muscles, blood (corpuscles and plasma) and intercellular fluids. A disturbance in the motions of its molecules produces: (1) In brain cells: Despondency, (heart, lung) anxiety, (heart, lung) fearfulness, (kidney heart) home-sickness, suspiciousness, agoraphobia, with a weak memory. (heart kidney spleen) (2) In Vasomotor Nerves: First small and frequent pulse, later, retarded. (heart yang excited then due to heart yin deficiency soon dissipated so retarded and weak) (3) In Sensory Nerves: Pains with sensation of paralysis. (pain is yang excited after dissipation of yang due to less yin paralysis) (4) In Motor nerves: Weakness of muscles and nerves even to paralysis. (heart yin so yang is less, spleen qi is less which supply energy or qi to heart) (5) In trophic tissues of Sympathetic Nerve: Retarded nutrition, (slow circulation of blood, spleen qi deficient with damp) even total arrest in a limited area of cells and then a softening. (arrest of circulation of blood due to poor nerve energy)

Kali-p. corresponds to those cases in which there is increased sensitiveness to all impressions from a weakness (protective yang and inner nervous energy less so increased sensitivity) of the vital resistance or control. In weakened states from shock, mental or physical from over-strain or over-drain of the system. (nervous or heart energy drained or exhausted)

H. T. Doge gives these indications: Worn-out nursing mothers, tired to distraction by nervous babies. Worn-out business and professional men and women or students. (nervous energy or heart yang dissipated)

Special indications being: Foul breath with low nervous condition tongue (stomach toxic heat with heart yang less or spleen yang less) with brownish mustard-like coat, dull heavy ache between shoulders, (phlegm heat stagnation in stomach, heart or lung channel which goes to shoulder) restlessness. (yin deficient) He commends the higher potencies where indications are close.

Homeopathic

The Kali-p. patient is nervous, sensitive, weak and easily fagged, by slight causes like pain, worry, mental fatigue etc. (nerve energy less) One of the greatest nerve remedies. Conditions arising from lack of nerve power, neurasthenia, mental and physical depression, (nervous energy less depression) are wonderfully improved by this remedy. Nervous prostration. Weak and tired. Especially adapted to the young.

Marked disturbance of the sympathetic nervous system. The causes are usually excitement, overwork and worry. Besides, it corresponds to states of weakness (low nerve energy so low blood circulation in the area) and decay, (poor blood circulation) gangrenous conditions. (blood stagnation in the area due to poor circulation) In these two directions it has won many clinical laurels. Remember it in the treatment of suspected **malignant tumors**. After removal of cancer when in healing **process skin is drawn tight over the wound**. Delayed labor. (poor blood circulation and nutrition so less nerve energy so labor pains which happens due to nerve energy gets delayed)

Kali-p. has neurasthenia. Paralysis infantile during dentition. (during dentition sufficient nerve energy is used so paralysis due to less nerve energy) Paralytic weakness or pain with sensation of paralysis. Gangrenous conditions, suspected malignant tumors, putrid, carrion like odor of secretions, (blood stagnation in the area which decays so putrid odors) foul odor of the body. (areas in the body due to poor blood circulation due to nerve less energy are decaying so foul odor) Secretions are golden yellow. (damp heat secretions with heart involvement so golden, heat-yellow) Stitching pains (phlegm or qi stagnation). Emaciation, (blood circulation less due to nerve weakness so emaciation) wasting diseases. (poor nutrition) Sea-sickness without nausea. Sexual excitement from indulgence or suppression. (nervous dissipation due to nerve excitation) Irregular, menses, (nerve energy less so blood circulation poor so ren and mo channel blood storage is also poor and since nerve is the channel thorough which commands from brain moves so if nerve signal problems then irregular menses) pulse, etc. Nervous, restless, fidgety feeling in feet, (nervous irritation or kidney qi stagnation in feet) trembling sensation in muscles of legs. (spleen qi deficiency with less nerve energy so blood circulation so trembling) Numb sensations. (blood /phlegm stagnation)

Clinical

Alopecia areata. Amenorrhea. Anemia. Asthma. Atrophy. Bedwetting. Brain, concussion. Brain-fag. Brain-softening. Cancrum oris. Carbuncle. Chilblains. Diphtheria. Dysentery. Face, neuralgia. Feet, fidgety. Gangrene. Hypochondriasis. Hysteria. Insomnia. Melancholia. Menstrual headaches. Nervous dyspepsia. Neurasthenia. Night-terrors. Noma. Nymphomania. Edema pulmonum. Paralysis. Pneumonia. Ptosis. Puerperal fever, mania. Sciatica. Scurvy. Stomach, ulcer. Ulcers. Urticaria. Whitlow.

Causations

Ill effects of mechanical injuries, (nervous shock so improper working of nerves) grief, (lung qi deficiency) vexation, (nerves energy consumed) Mental, (nerve energy consumption) overwork, (nerve and physical energy consumed)

Constitutions

Weak nervous system and brain. It is suited to pale, sensitive irritable persons. **Planets:** Moon, Mercury.

Modalities

Better warmth, (less nerve energy so less qi and warmth) rest, (qi restores) nourishment. Better from sleep, (qi restores) eating. (yin restores) Better from gentle motion, (blood deficiency so gentle motion helps to warm but fast motion consumes qi) leaning against something. Better when menses comes. (nerve irritation goes down) Worse from slight causes touch, (nerve irritation) pain, (nerve irritated) cold, dry air, (yin

deficient lung) puberty,(kidney yin deficient so nerve weak as essence makes part of blood) sex.(kidney qi deficiency) Worse excitement,(heart energy dissipated) worry, (spleen energy dissipated) mental and physical exertion,(spleen and kidney energy dissipated) eating, early morning.(yang rising so heart yang excited)

Symptoms

MIND

Shy, nervous dread, starts easily.(nervous sensitive so starts easily,shy and timid-gall bladder deficient) Anxiety(nervous) with nervous dread, lethargy.(poor nerve energy) Extreme lassitude and depression.(nerve energy poor or phlegm so lassitude,nerve requires strengthening from lung qi and kidney essence too,lung qi weak so depression) Slightest labor seems a heavy task.(poor nutrition and nerve energy in the body) Indisposition to meet people.(nerve weak so want to be alone) Brain-fag.(nervous exhaustion) Forgetful.(nerve energy dissipated) Loss of memory.(nerve energy dissipated) Hysteria. Somnambulance.(walk in sleep due to nervous weakness) Depressed, gloomy.(heart,lung) Great despondency about business.(heart,nerve weak) Night terrors.(liver/heart yin deficient liver yang hyper) Angry. Irritable,(liver yang hyper) children cry and scream, fly into passion,(liver fire) can hardly articulate. Fears, about future, his health, of crowds, death.(kidney and liver yin deficiency) Perverted affections, averse to her own, cruel to husband to baby. Religious melancholy.

Abdomen

Cutting pain in abdomen. Enterocolitis. Feels cold better covering.

Back

Paralytic lameness of back, must lean on a chair. Axillary sweat smells of onions. Spinal irritation. Creeping sensation and intense pain along spine, relieves the headache.

Ears

Humming and buzzing in the ears. Hearing sensitive, cannot endure noise. Deafness from atrophic condition of nerve.

Eyes

Burn, sting, swim in tears. Yellow-gray milky secretion. Retinitis. Weakness of sight, loss of perceptive power after diphtheria from exhaustion. *Drooping of eyelids*, left. (Caust.) Squint after brain diseases. Black spots before.

Face

Sad, care worn look. Livid and sunken with hollow eyes. Right-sided neuralgia, relieved by cold applications. Brown stripe at the edge of hair. Neuralgia better cold application.

Female

Menstruation too late or too scanty in pale, irritable, sensitive, lachrymose females. Delayed menses with depression. Too profuse discharge, deep-red or black-red, thin and not coagulating, some times with offensive odor. Feeble and ineffectual labor pains. Horribly foul leucorrhea. Periodical discharge of copious orange colored fluid from vagina and rectum. Sexual desire intense for days after the menses.

Food

Craves ice-cold water, vinegar, sweets. Aversion to food to bread to meat. No appetite except for sweets.

Head

Headache of students, worse before and during menses, better by gentle motion. Occipital pain, better after rising. Cerebral anemia. Pains are relieved by gentle motion. Headache with weary, empty, gone feeling at stomach. (Ign., Sep.) Hunger with headache.

Heart

Pulse irregular. Palpitations, worse slightest motion or ascending stairs.

Kidneys

Bedwetting. Incontinence of urine. Nocturnal bedwetting, obstinate in nervous, excitable children in old people. Very yellow urine.

Urine saffron yellow or milky. Bleeding from urethra. Urine stops and starts.

PAGE 922

Limbs

Paralytic lameness in back and limbs. Exertion aggravates. Pains with depression and subsequent exhaustion. Prickling in hands and feet. Numb finger tips. Foot feels frost-bitten. Pains in soles. Paralytic weakness of limbs. Feet fidgety.

Lungs

Nervous asthma. Short-breath worse going upstairs. Asthma, least food aggravates. Short breath on going upstairs. Cough, yellow expectoration.

Male

Nocturnal emissions, sexual power diminished, utter prostration after sex. (Kali-c.) Sexual excitement. Prostration and weak vision after sex or after nightly emissions.

Mouth

Palate feels greasy. Aphthae. Breath offensive, fetid. Tongue coated brownish. Tongue, yellow like liquid mustard. Mouth, excessively dry, as if tongue would cleave to the roof of the mouth. Toothache with easily, bleeding gums, they have a bright-red seam on them. Gums, spongy, receding, bleeding with toothache. (Caps., Ham., Lach.) Speech, slow, becoming inarticulate. Creeping paralysis of the tongue. Nervous, chattering of teeth. Noma.

Nose

Hay fever, as a prophylactic. Itching in posterior sinuses. Violent sneezing with symptoms of fresh cold, at 2 a.m. Nasal disease with offensive odor, fetid discharge.

Rectum

Diarrhea, foul, putrid odor, hot, golden yellow stools. Painless stool from fright, followed by depression and exhaustion. Diarrhea while eating. Dysentery, stools consist of pure blood, patient becomes delirious, abdomen swells. Cholera, the stools have the appearance of rice water. (Verat., Ars., Jatr.) Paretic condition of rectum and colon after removal of hemorrhoids. Prolapse rectum. (Ign., Podo.)

Sensations

As of tongue would cleave to root of mouth, as if a ball were rising in throat, as if a rocket had passed through head.

Skin

Blue spots on skin. Skin inactive. Cold. Jaundiced.

Sleep

Night terrors of children. Drowsy. Yawning Sleepwalking. Sleeplessness from worn, business troubles etc. Amorous dreams, restlessness and heat during sleep.

Stomach

Nausea, better belchings, worse coughing. Hungry, soon after eating. Nervous gone sensation at the pit of stomach better eating. (Ign., Sep., Sulph.) Feels seasick without nausea.

Temperature

Subnormal temperature.

Throat

Aphonia from paralysis of vocal cords. Gangrenous sore throat.

Vertigo

Vertigo when facing sun, worse looking up, on standing from sitting up. Vertigo from lying, on standing up from sitting and when looking upward. (Gran.)

Comments

The depression is the characteristic of Kali-p. action, conversely it cures depressed states of mind and body, (nerve energy weakness) hypochondriasis, hysteria, (nerveous weakness hysteria) neurasthenia, nervous insomnia, (due to nerve weakness) Spasms of irritable weakness, (nerve weak) paralysis, (nerve weak so poor blood circulation) septic states and septic fevers (blood stagnation in the areas due to poor nerve signals) and hemorrhages. Progressive muscular atrophy, (poor nutrition/blood due to poor nerve communication with spleen qi deficient) round ulcer of stomach, (one spot of ulcer that is no blood supply to part due to nerve injury or else) alopecia areata, (spot baldness that is no blood supply to part) Scurvy, phagedenic chancre, carbuncles, (poor blood supply so ye sadane lagte hai) typhoid, (in this wounds become putrid or septic due to poor blood supply) typhus fever and weak states.

The action of the phosphoric element is very clearly visible but for accurate prescribing something is needed beyond Schÿssler's indications, excellent as they are and this something has been provided by a proving published by H. C. Allen.

As Allen points out, a vein of Kali symptoms runs through the proving, e.g. , early morning waking, the peculiar mouth and the severe action on the skin. "Worse after sex and sensitiveness to touch". In menstrual headaches (nervous energy weakness headache) it is indicated and in neurasthenia and

PAGE 923

Allen has developed clinically the characteristic color of the excretions, Golden or orange-yellow. The urine is very yellow. (damp heat)

He cured with Kali-p. an old pelvic abscess with orange-colored discharge, having given the remedy for sleeplessness.

The provers experienced great lassitude, (phlegm or poor nutrition overall due to poor circulation and spleen deficiency) they lost much flesh. Nervous, hot, restless, easily startled, (heart yang hyper) Trembling of hands from nervousness, (spleen qi deficient with poor blood supply) Stitching pains, (phlegm type) Numb finger-tips, (phlegm or nerve path blocked type) The least touch causes starting, (extra sensitive nerves dur to heart yang hyper due to heart yin deficient) There is a toothache alternating with headache, (nervous toothache and headache)

W. T. Laird points out that Kali-p. cures a nervous dyspepsia almost identical with that of Anac. The Kali-p. patient is more decidedly neurasthenic than the other and the relapses, which are frequent in both, are mostly due to dietetic errors in Anac. cases and to excitement or worry in the Kali-p. cases.

H. M. Rean reports three cases of amenorrhea cured: Miss B., 19, very nervous, pale blonde, skin rather waxy, cross and snappish, cries easily, constant dull headache, yet very drowsy all day. At times so fidgety could not control herself and called her mother to hold her hands. Menses did not appear until eighteen and were scanty then and since.

Kali-p. 3x four times daily caused great improvement at next menstrual period. In three months menses were regular and normal and in five months the patient was perfectly well.

J. C. Nottingham considers a leading indication of Kali-p. "nervousness arising from excessive sexual excitement, whether indulged or suppressed." He has cured impotence and seminal losses on these indications. Accompanying symptoms are: Aching in sacrum, (poor blood supply in sacrum may be) sleeplessness, pain in back of neck and head, general irritability, great despondency, frequent urination, (kidney qi deficient) large quantities being passed night and day and containing phosphates. (kidney qi deficient)

Compare

(1) Zinc., Gels., Cimic., Lach., Mur-ac.

(2) Kali-hp.

(3) Macrozamia spiralis - extreme debility after severe illness, collapse.

Macrozamia spiralis - Weariness from no assignable cause, no pains. Boring pain at vertex, vomiting and retching all night, impossible to eyes, giddiness and cold.

(4) Genist.

SOURCES

Boericke. Clarke. Phatak.

Kalium silicicum

(silicate of potash)

Pharmacy

Kali-sil. Kali silicicum. Silicate of Potash. Historical dose: Trituration and all potencies, higher potencies.

History

Kali silicicum is a deep acting remedy. **Planets:** Saturn.

Homeopathic

Kali-sil. has lassitude very marked. Absent-minded, anxious indolent, timid. Feeble will power. Desire to lie down all the time. Emaciation. Head congested, blood surges from body to head. Nasal catarrh, discharge bloody, excoriating offensive nose, swollen, ulcerated.

Stiffness over body and limbs. Creeping sensation over limbs. Twitching of muscles. Weak and weary. Weight in stomach after eating, nausea, pain, flatulence. Pain in liver region. Constipation. Construction of anus during stool. Vertigo, coldness of head, photophobia.

Clinical

Emaciation. Vertigo.

Modalities

Worse open air, drafts, cold, exertion, motion uncovering, bathing.

SOURCES

Boericke.

Kalium sulphuricum

(potassium sulphate)

Pharmacy

Kali-s. Kali sulphuricum. Potassium sulphate. Trituration. Historical dose: Trituration and all potencies, third to thirtieth potency.

History

Kali-s. Schuessler's tissue remedy that affects respiration, mucous membranes and skin (**lung related**) where it causes desquamation. Schüssler's account of this remedy is as follows:

PAGE 924

Kali-s., which in reciprocal action with iron effects the transfer of the inhaled oxygen to all the cells is contained in all the cells containing iron. (**liver disperse and distribute qi in the body so heaven qi coursing is controlled by liver**)

A deficiency of Kali-s. causes: A sensation of heaviness (**less qi or yang in parts or general then yin impact increases so feel heaviness**) and weariness, (**less energy so weariness**) vertigo, (**less oxygen in liver channel to brain**) chilliness, (**heaven qi deficient**) palpitation of the heart, (**heaven qi and nutrition qi combine become thoracic qi so palpitation due to its deficiency**) anxiety, (**less oxygen in heart and mind**) sadness (**heart and lung qi deficient**) toothache, (**toothache, headache and pain in limbs all due to oxygen deficiency that is liver qi coursing function not proper**) headache and pain in the limbs.

These are worse in a room (**close room suffocation due to less oxygen**) in warmth towards evening, (**in evening there is less oxygen**) better in open, cool air. (**more oxygen**)

Also to catarrh (**yellow discharge— damp heat**) of larynx, bronchi, nostrils, etc., where the secretion has the above named characteristics to catarrh of stomach, where the tongue has a yellowish mucous coating to catarrh of middle ear and of the kidneys.

Kali-s. effects the access of oxygen and so facilitates the formation of new epithelium.

Schüssler points out that Kali-s. and iron carry on the same transference of oxygen in the organic world.

When a sulphate and any oxide of iron comes into contact with decomposing organic substances they surrender their oxygen and form suppurate or iron. With more oxygen added, this may be further decomposed into sulphuric acid and an oxide of iron. **Planets:** Mercury, Venus.

Homeopathic

Kali-s. is Schüssler's Pulsatilla. It has had no proper proving and the fine indications are not so clear as they might be. The leading indications are those given by Schüssler "the yellow color of the discharges, (**damp heat discharges**) the skin and mucous membrane appearances and the Worse by warmth (**due to internal damp heat**) and Better in open air."

Kali-s. has discharges that are profuse (**heat**) and deep yellow, thin or sticky. (**damp**)

Processes are torpid in nature. Ailments accompanied by profuse desquamation.

Suppurations. (**damp heat suppuration**) Yellow, mucous and serous discharges, profuse and intermittent. (**damp heat, intermittent—liver**), Lack of reaction. (**heaven qi deficient so protective yang deficient so lack of reaction**) Cancer, (**oxygen deficiency cancer**)

epithelial. (**chilke skin se utarte hai**) Growth of nails interrupted. (**less oxygen**) Gonorrhoea

(damp heat in lower jiao or yang deficiency in lower jiao etc)and ophthalmia neonatorum, (Puls.). Kali-s. is applicable to the later stages of inflammation.(when yellow pus formed)
The pains are wandering(liver wind or qi stagnation pain or due to phlegm),wandering rheumatism(Puls,Kali-bi.)(liver wind,phlegm,qi stagnation)Stitching,(phlegm/qi stagnation) tearing,(blood stagnation) festering pains, that shift about.(with qi stagnation)
It has been found of much use in oxaluria.

Clinical

Asthma. Cataract. Catarrh. Chorea. Dandruff. Dyspepsia. Eczema. Epithelioma. Eustachian catarrh. Gleet. Gonorrhea. Nails, diseased. Nettle-rash. Ozaena. Polyps. Psoriasis. Rheumatism. Rhus poisoning. Scabies. Sinusitis. Vertigo. Whooping cough.

Causations

Ill effects of chill when over heated.(excess yang suddenly brought down by chill)

Injuries.(sudden disturbance in qi flow)

Modalities

Better from walking,(spleen qi stagnation) fasting.(phlegm in stomach) Better cool, open air. Worse in heated room. Worse from warmth,noise, evening. Worse in evening, (Puls.).

Symptoms

MIND

Hurried Irritable.(liver yang hyper) Frightened at trifles.(liver/gall bladder or heart qi stagnation) Desires and rejects the things.(liver qi stagnation) Fear of falling.(kidney deficiency) Anxiety in evening.(brain less oxygen or heart yin deficient) Mental exertion aggravates.(spleen qi deficient) Always in a hurry.(liver yang hyper) Timid.(gallbladder deficiency) Desire to lie down,(due to weariness or heaven qi deficiency) but lying aggravates(due to damp/phlegm stagnation and spleen qi coursing function of liver further gets slow) so one must walk for relief.(spleen qi stagnation)

Abdomen

Colicky pains, abdomen feels cold to touch. Hard tympanitic in whooping cough. Empty feeling in hypogastrium better passing flatus.

Ears

Eustachian deafness. Discharge of yellow matter. (Hydr.) Watery, sticky, thin, yellow discharge offensive with polyps.

Eyes

Ophthalmia neonatorum. Purulent yellow mucus in eye diseases.

Face

Aches in heated room. Epithelioma.

Female

Menses too late, scanty. Metorrhagia. Menses with a feeling of weight in the abdomen. Leucorrhoea, yellowish, watery.

Food

Dread of hot drinks. Craves sweets. Burning thirst.

Head

Rheumatic headache, beginning in evening. Bald spots. Dandruff and scaldhead. Yellow dandruff, moist, sticky. Bald spots (after gonorrhoea).

Kidneys

Oxaluria. Pyelitis.

Limbs

Pain in nape, back and limbs, worse in a warm room. Shifting, wandering pains.

Rheumatism worse heat. Arthritic nodes.

PAGE 925

Lungs

Coarse rales in chest. Bronchitis. Rattling of mucus in chest. (Ant-t.) Post-influenza cough, especially in children. Asthma with easily expelled yellow, slimy expectoration.

Cough, worse in evening and in hot atmosphere. Croupy hoarseness. (Hep., Spong.)

Male

Gonorrhoea, discharge slimy, yellowish-green. Orchitis. Gleet.

Mouth

Loss of taste and smell. Tongue coated yellow and slimy. Insipid, pappy taste. Gums painful.

Nose

Colds with a yellow, slimy expectoration. Nose obstructed. Smell lost. (Nat-m.)

Engorgement of the nasal pharyngeal mucous membrane, mouth breathing, snoring, etc., remaining after removal of adenoids.

Rectum

A yellow, slimy diarrhea. Constipation with hemorrhoids. (Sulph.)

Skin

Dry skin. Desquamation. Psoriasis. (Ars., Thy.) Intertrigo. Eczema, burning, itching, papular eruption. Nettle-rash. Polyps. Epithelioma. Seborrhea. Favus. Ring-worm of scalp or beard with abundant scales. Yellow, jaundice. Ulcers, ooze thin yellow water.

Stomach

As of a heavy load on stomach. Burning thirst, nausea and vomiting. Load feeling.

Temperature

Profuse easy sweat. Intermittent fever, rise of temperature at night with yellow, slimy tongue.

Throat

Croupy hoarseness.

Comments

M. E. Douglass reports an asthma case with a lot of thick yellow expectoration.

(**damp/phlegm heat discharges**) Much rattling in chest, (**yellow but loose cough so damp heat**) with labored breathing (**phlegm heat stagnation in chest**) and talking almost impossible. This was cured with Kali-s. 3x, five grains every hour in the attack.

Hansen cured with Kali-s. a case of psoriasis (**oxygen less where scales are there**) beginning on the right leg, later attacking the left elbow and left leg. Eruption, papular, oval and annular with paler centers, covered with whitish scales, (less oxygen) skin beneath red and smooth. The guiding symptom was "great desquamation of the epidermis."

Compare

(2) Puls., Kali-bi.

(3) Hydr. - dyspepsia, epithelioma.

(4) Chromico. 3x. - produces in the nasal passages very fine threads from the septum to external wall, disorders of nasal fosse and hay fever. Chronic colds. Sneezing, red, watery eyes, irritation of mucous membrane.

Relations

Antidote to: Rhus poisoning. Compatible: Acet-ac., (itching and redness of skin), Calc., Hep. Puls., Rhus-t., Sep., Sil., Sulph.

SOURCES

Boericke. Clarke.

Kalium tartaricum

(tartrate of potash)

Pharmacy

Kali-t. Kali tartaricum. Tartrate of Potash. Cream of Tartar. Trituration. Solution.

Historical dose: Trituration and all potencies.

History

A few symptoms of this well-known substance are collected in Allen's works. Among them pain in loins and paraplegia are very noticeable. **Planets:** Moon.

Homeopathic

Emaciation. Extreme weakness, can scarcely walk. There is vomiting of black-green fluid. Feces look like coffee-grounds. Pain in umbilical region with great thirst.

Clinical

Colitis. Debility. Diarrhea. Emaciation. Flatulence. Paraplegia. Vomiting. Weakness.

Symptoms

Abdomen

Pain in umbilical region with thirst. Flatulence and griping. Pain in loins.

Limbs

Thighs and legs paralyzed.

Mouth

Tongue brown and dry.

Pulse

Pulse feeble.

Rectum

Diarrhea and violent vomiting. Feces like coffee-grounds.

Stomach

Great thirst and pain in umbilical region. Violent vomiting and diarrhea. Vomits a black-green fluid. Inflammation of stomach and intestines.

SOURCES

Clarke.

PAGE 926

Kalium telluricum

(potassium tellurate)

Pharmacy

Kali-tel. Kali telluricum. Potassium tellurate. Trituration. Solution. Historical dose: All potencies.

History

A few symptoms of Kali-tel. have been observed of which the garlicky odor of the breath was the most noticeable and persistent. **Planets:** Mercury.

Homeopathic

Kali-tel. has the tongue coated white and swollen and there was salivation. Appetite increased at first: later diminished, finally lost. Breath offensive. Salivation. Tongue, swelling.

Symptoms

Heart

Oppression in cardiac region.

Mouth

Tongue coated white and somewhat swollen. Garlicky odor in mouth (appeared soon after first dose, lasted seven weeks, was so offensive to others he was obliged to avoid society). Copious secretion of saliva.

Sleep

Sleepiness during first days.

Stomach

Inclination to vomit.

Compare

(1) Tell., Phos. and Kali-p. - garlicky odor.

SOURCES

Clarke.

Kalmia latifolia

(mountain laurel)

Pharmacy

Kalm. Kalmia Latifolia. Mountain laurel. Ledum floribus bullatis. American Laurel. Calico Bush. N. O. Ericaceae. Rocky sterile hills, near water in New England States. Flowers May and June. Tincture of fresh leaves when the plant is in flower. Historical dose: Tincture and all potencies.

History

Kalmia is the name of a genus of heath worts, natives of North America. Kalmia latifolia, which has large and showy flowers is found in the northern parts of the United States. Its flowers "yield a honey" said to be deleterious and its leaves and shoots certainly are so to cattle. Meadows says cattle eat Kalm. in the latter part of the winter when they are in want of something green.

Kalm. angustifolia, probably for the same reason, has the name of Lamb-kill. The powdered leaves of some are used as a local remedy in some skin diseases.

The hard wood of Kalm. latifolia is used in the manufacture of various useful articles. The Canadian partridge is said to become poisonous as human food after feeding on Kalmia berries" (Treasury of Botany).

Hering introduced the Kalmia into homeopathic practice, himself and his friends being the first provers. The head including eyes and face, shows the chief intensity of its action and scarcely less so, the heart.

A number of skin symptoms confirm the popular use of the leaves and among them a "stiffness" of the skin (especially of the eyelids) is the most remarkable. (qi/blood stagnation) **Planets:** Sun, Saturn.

Homeopathic

Kalm. affects the nerves, heart, circulation. A heart, nerve and rheumatic remedy. Has also a prominent action on the heart. In small doses, it accelerates the heart's action in larger it moderates it greatly. Pains shift rapidly. (heart wind) Nausea and slow pulse frequently accompanying.

Neuralgic pains, shoot downwards with numbness. (heart wind so neuralgic pains shooting and numbness due to blood deficiency or damp, downward motion may be due to damp) Pains of locomotor ataxia. (tendon movement problem may be so liver heat pain) Protracted and continuous fevers with tympanites. (continuous fever due to blood deficiency or blood stagnation and tympanites due to blood and qi stagnation which produce gas.) Paralytic sensations, (poor circulation) pains and achings in limbs (spleen qi deficient) accompany nearly every group of symptoms. Albuminuria.

The pains of Kalm. are neuralgic with tingling, (qi stagnation in nerve) numbness (blood stagnation in nerve), trembling or paralytic weakness. (blood vacuity and stirring wind or spleen vacuity with stirring wind etc so trembling) Pains shift rapidly, shooting outward along the nerves (wind) with much nausea (liver/stomach qi stagnation or phlegm) and slow pulse. (heart qi deficiency) Aching, bruised stiff feeling. (bruised—blood stagnation, stiff-blood stagnation) Dull tearing, crushing pain, (phlegm heat stagnation so dull pain) moving downwards.

Pain alternating with cardiac symptoms (neuralgic pain so heart related) or between upper and lower limbs. (neuralgic pain upper limb due to wind and lower limbs due to phlegm stagnation in nerves) Rheumatism, syphilitic. (heat stagnation in syphilis so stagnated heat creates wind so rheumatism) Neuralgia after the disappearance of herpetic eruptions. (herpetic eruption due to wind heat, damp heat, yin deficiency with deficiency fire so wind heat/damp heat suppression creates neuralgia) Motion brings on complaints. (heat type so motion affects). Great weakness with neuralgia. (spleen yang deficiency with heart wind)

PAGE 927

Clinical

Angina pectoris. Blindness. Bright's disease. Dropsy. Dysmenorrhea. Gastralgia. Globus hystericus. Gout. Headache. Heart, disease. Lumbago Neuralgia. Ptosis. Pregnancy, albuminuria. Rheumatic fever. Rheumatism. Retinitis. Sun-headaches. Syphilitic sore throat. Tinnitus. Tobacco, effects. Vertigo. Vomiting.

Modalities

Better from eating, (deficiency) cloudy weather, continued motion, (helps phlegm stagnation or wind but increases heat) recumbent posture. Worse from motion, (heat) open air, (oxygen increases heat) lying on left side, (yang or qi problem that is spleen yang deficient or yang overactive) bending forward, (yin type problem may be phlegm/blood

related) looking down. (yin type) Worse from heat of sun, (heart heat) becoming cold. (cold consumes yang) Worse from sunrise to sunset. Worse stooping. Worse during leucorrhea. Worse leaning forward, (Kali-c. opposite)

Symptoms

MIND

Confusion of brain. (phlegm obstruction in heart or heart wind) Memory and mental faculties are perfect in a recumbent posture. But on attempting to move, vertigo. (heat and excess condition aggravated by movement so phlegm heat obstruction) Anxiety and palpitations. (phlegm heat obstruction) Irritable and cross. (liver yang hyper or phlegm heat so irritable etc)

Abdomen

Pains in region of liver. Incarcerated flatus with nausea. Sensation of weakness in abdomen extending to throat, better by eructation. Sudden pains in paroxysms, across abdomen, above umbilicus. Neuralgia of bowels in married women.

Back

Pain from neck down arm, brachialgia. Pain down back, as if it would break in localized regions of spine, through shoulders. Lumbar pain of nervous origin with heat and burning.

Chest

Feverish heat with great pain in chest, worse when breathing and from slightest motion. Pain in chest as from a sprain. Shooting through chest above heart into shoulder-blade, pain in left arm. Stitches in lower chest. False pleurisy of winter season. Rheumatism of muscles of thorax and back, worse from every motion.

Ears

Sound like blowing of a horn. Stitches in and behind right ear, at night. Acute inflammation of meatus. Sound like blowing a horn after cracking in head. Meniere's disease.

Eyes

Stiff drawing sensation when moving the eyes. Vision becomes black on looking downwards. Eyelids stiff. Retinitis albuminuria especially during pregnancy. Vision impaired. stiff, drawing sensation when moving eyes. Rheumatic iritis. Scleritis, pain increased by moving the eye.

Face

Flushing with vertigo. Neuralgia, worse right side from exposure to cold, better food. Lips, stiff, dry, swollen. Stitches and tearing in bones of jaw and face.

Female

Menses to soon, regular but painful. Menses, suppressed with pain in limbs and back and inside of thighs. Leucorrhea, one week after menses, symptoms worse during leucorrhea. During menses, pains in limbs, loins, back and interior of thighs.

Head

Cracking in head, frightens him, it sends in a sound in ears like blowing of a horn. Headache worse and better with sun. Shooting from nape to vertex and face. Maddening supra-orbital pain, (right). Pain in front and temporal region from head to nape and to teeth from cardiac origin.

Heart

Heart's action tumultuous, rapid and visible. Paroxysms of anguish around heart.

Fluttering of heart with anxiety. Pains, sharp, burning shooting, stabbing, radiating to left scapula and arm, take away the breath. Palpitations, worse leaning forward. Gouty and rheumatic metastasis of heart. Tachycardia with pain. (Thyr.) Dyspnea and pressure from epigastrium toward the heart.

Sharp pains take away the breath. Shooting through chest above heart into shoulder-blades. Pulse slow, weak, tremulous. (Dig., Apoc.) Frequent pulse. Tobacco heart.

Hypertrophy, valvular insufficiency. Aortic obstruction.

Kidneys

Albuminuria with pains in lower limbs. Frequent urination of large quantity of yellow urine with sharp pains in lumbar region. Post-scarlatinal nephritis.

Profuse urination better headache. Albuminuria with pains in lower limbs with dropsy.

PAGE 928

Limbs

Deltoid rheumatism, especially right. Pains from hips to knees and feet. Pains affects a large part of a limb or several joints and pass through quickly. Weakness, numbness, pricking and sense of coldness in limbs. Pains along ulnar nerve, goes into third or fourth fingers. Joints, red, hot, swollen. Tingling and numbness of left arm. Tingling and numbness of the left arm (heart pains).

Lungs

Pressure as if one squeezed throat with thumb and finger. Noise as from spasm of glottis when breathing. Hoarseness with coryza. Tickling in trachea. Frequent cough caused by dryness or scraping in the throat. Expectoration easy, smooth, gray, tasting putrid, salt. Difficult and oppressed breathing, throat feels swollen, nausea.

Male

Frequent, spontaneous, lasting erections without desire. Pain in right testicle, morning, changed to left afternoon.

Mouth

Stitches in tongue. Tingling in salivary gland. Bitter taste with nausea better eating. Tired feeling in chewing muscles.

Nose

Coryza with increased sense of smell with sneezing. Tearing in root of nose and nasal bones with nausea.

Rectum

Stools like mush, easily discharged, as if glazed, followed by pressure on rectum. Diarrhea with dullness, dizziness, weariness, nausea and bellyache.

Sensations

As if something loose in head diagonally across the top. As if the body was surcharged with electricity, as shuddering without coldness. As if something was being pressed away from under sternum.

Skin

Stiff, dry. Sensation of rigidity of skin. Pricking sensation in skin with moderate sweat. Erysipelatous on hand with oppressed breathing. Eruption like scabies.

Red inflamed places here and there, exceedingly painful, as if boils would form.

Sleep

Sleepless, turns often, wakes very early in morning. Restless sleep, turns often. Periosteal pains prevent sleep. While sleeping stands up and walks about, talks in sleep. Dreams, racking his brains, fantastic. Dreams of murder.

Stomach

Feeling as if something being pressed under the epigastrium. Pain in pit of stomach, worse by bending forward, relieved by sitting erect. Warm, glowing sensation in epigastrium. Nausea and vomiting. Wine relieves vomiting. Bilious attacks with nausea, vertigo and headache. Sensation of something being pressed under the epigastrium.

Teeth

Teeth tender with neuralgia of face. Pressing pain in molars, late in evening.

Temperature

Protracted and continued fevers with tympanites.

Throat

Throat feels swollen, sensation as of a ball rising. Sensation of dryness in throat with aching pains, dryness causing cough. Pressure in throat, stitches in eyes and nausea.

Vertigo

Vertigo with headache and nausea. Every motion causes vertigo. Vertigo with headache, blindness, pains in the limbs and weariness, worse stooping, looking down. Vertigo, worse stooping.

Comments

Neuralgias, (heart wind) especially of right side. Wandering rheumatic pains which travel from above downwards. (heart wind with phlegm) Tumultuous action of the heart and slow pulse. These are the cardinal features of Kalm. Though Kalm. acts most markedly on the right side of the head, it acts very markedly on the left (heart) side of the chest and left arm.

Vonder Luhe cured with Kalm. 200c an intercostal neuralgia of left side, so intense that the patient could not lie down or sleep at night. The chief guiding symptom was a concomitant numb sensation of whole left arm. (phlegm stagnation in heart)

PAGE 929

Lambert has recorded the case of a gate-keeper, 54, who had smoked since he was seven years old. He suffered from "tobacco heart," palpitation, occurring on least exertion or fright and sometimes awakening him in the night, pulse intermittent, no valvular lesion, tingling in left arm and leg and sensation as if the blood did not circulate in them.

He could walk all right, but not far. The chief thing he complained of was sharp pain in right temple like pins and needles of eighteen months' duration. (blood stagnation or blood deficiency pain in right temple nerve) It was induced by touch (nerve sensitive) and turning head quickly. (motion aggravates) Kalm. 3x cured the temporal neuralgia (heart wind or blood stagnation in nerves) and greatly alleviated all the other symptoms.

The spinal action is unmistakable and the provings give "weakness and paralytic condition of limbs," (phlegm stagnation with wind heat or spleen qi deficiency) "shuns all exertion, (spleen qi deficiency, liver blood deficiency) can hardly go upstairs," and many symptoms of pain in back. (kidney qi deficiency or phlegm/blood stagnation) Neuralgias appear in almost all regions. in eye in uterus (dysmenorrhea) in stomach as well as head, chest and limbs. (heart wind)

Pains in the periosteum preventing sleep. The rheumatic pains proceed from above downwards, (wind heat with phlegm) but some of the sensations ascend: as if a ball was rising in the throat. (qi stagnation) Sensation of weakness in abdomen extending to throat. (spleen qi deficiency) Every heart-beat has a strumming as if it would burst, along sternum to throat. (blood stagnation with wind heat from stomach to throat) Pain between shoulders coming up over head. (heart/lung wind heat) Also in rheumatism, the lower limbs are affected first, then the upper. (phlegm with wind). The pains and conditions requiring Kalm. frequently have nausea (wind) and slow pulse (phlegm) as concomitants. Among noteworthy symptoms are: Dry throat. Dry, stiff, swollen, cracked lips. (stomach heat and wind, wind-stiff, heat—swollen and dry) Tingling in salivary glands immediately after eating. (after eating heat increases, tingling—wind so wind heat in stomach) Stitches in tongue. (phlegm stagnation in tongue) Vomiting with ruminating action: without the least nausea. Pressure on rectum after stool. (phlegm stagnation) The sensation of "rigidity of the skin" (lung qi stagnation) should make us think of it in scleroderma.

There is much external sensitiveness: Face, pit of stomach, muscles of neck sore, worse by touch. Rubbing eyes causes stinging in them.

The pains are during early part of night or soon after going to sleep. (yin type so phlegm stagnation) Pain in forehead comes on in morning on waking. (liver yang rising so wind heat) The headache is worse again in evening, (headache due to phlegm or yin) when eye-symptoms and pains (eye symptoms and pain due to phlegm) generally are worse. Kalm. has a "sun-headache," worse and better with the sun.

A sudden chill or exposure to a sudden wind causes the pains. (sudden chill affect yang and get converted into reactionary heat or wind) Heat worse and cold better pain in head. Open air worse headache and eyes. (open air increases oxygen that is heat which aggravates) Every summer there is roughness of cheeks. (summer heat affects kidney yin vacuity) Mental faculties and memory perfect, least motion causes vertigo. (liver heat vertigo) Lying on back better breathing, on left side worse palpitations.

The worse from motion is very marked, almost equaling that of Bry., even motion of eyes and eyelids is painful. (heat or qi deficiency) Vertigo is worse on stooping. (vertigo due to phlegm heat in liver channel) on looking down, on rising from a seat. Palpitations are worse on bending forward and worse by mental effort. (phlegm stagnation palpitation and mental effort affects spleen qi which increases further damp)

Proell cured with Kalm. 1c, 2c and 3c headaches (phlegm) and weak memory (phlegm due to spleen deficiency) preventing him from continuing his studies in a boy of 13 who had insufficiency of the mitral value. The neuralgic pains are better by food, (deficiency condition neuralgic pain that is wind produced due to heart yin vacuity heat or blood vacuity etc) wine better vomiting. Symptoms worse during leucorrhoea. (during leucorrhoea heat increases may be) A leading concomitant of the Kalm. neuralgias is a paralytic weakness and trembling.

Compare

- (1) Kalm. contains Arbutin.
- (2) Derris pinuta of great service in neuralgic headaches of rheumatic origin).

Kamala

Pharmacy

Kam. Kamala. *Croton coccineus*. *Rottlera tinctoria*. N. O. Euphorbiaceae. India, South Arabia, Australia. A red mealy inflammable powder, obtained from the tri-lobed capsules of the plant. Tincture. Solution in Ether. Trituration. Historical dose: Tincture and all potencies.

PAGE 930

Herbal

Kamala is best known in medicine as a remedy for tapeworms. It is given in doses of half to two drachms. The Treasury of Botany says: "Among the Arabs of Aden it is given internally in leprosy, and used in solution to remove freckles and pustules, while in this country it has been used successfully in treating the eruption known as 'wildfire' (*Strophulus volaticus*) in children, by rubbing the powder over the affected part with moist lint. **Planets:** Moon, Saturn.

Homeopathic

Kam. appears, however, to be most valued as an anthelmintic, and has been extensively used with much success in India in cases of tapeworms, three drachms being sufficient for a robust person, and half that quantity for one of feeble habit."

Clinical

Skin, affections. Tapeworm.

Compare

(1) Kam. shows by its clinical uses its relationship with *Croton* and the other Euphorbians.

Karaka

(kopi tree)

Pharmacy

Kara. Karaka. *Corynocarpus levigatus*. Kopi Tree. N. O. Myrsinaceae, Allen puts it in Anacardiaceae. New Zealand. Tincture or Trituration of fresh seeds. Historical dose: Trituration, tincture and all potencies.

History

G. Bennett has recorded a few symptoms observed in the case of a Maori chief poisoned with the seeds of the Karaka. It contains a tasteless farinaceous substance and are eaten in times of scarcity.

But the raw seeds are poisonous and produce spasmodic pains, giddiness and partial paralysis.

To obviate this they are steamed for twenty-four hours and then either buried in the ground or allowed to soak in water for some days, (Treasury of Botany). **Planets:** Moon.

Homeopathic

Kara. has spasm with pains. Violent pain lasting a week. Partial paralysis. Heat anesthesia, when warm water was applied he did not feel any warmth from it. Violent spasms and convulsions of whole body, arms and legs stretched violently and rigidly out. Permanent rigid distortion.

Clinical

Convulsions. Pains. Paralysis.

Comments

C. F. Fischer proved Karaka and used it clinically in cases of convulsions. He quotes an account of its effect from the Proceedings of the New Zealand Institute:

Violent spasms and convulsions of whole body, arms and legs stretched violently and rigidly out, great flushings of heat, protrusion of eyes and tongue, gnashing of jaws. The poison proves rapidly fatal if the patient is not attended to immediately and the limbs are permanently and rigidly distorted if they are not fixed in proper positions until the crisis is passed.

The general treatment is to bind the patient (generally a child) with the limbs in right positions, dig a pit and place him in it, standing, buried up to the chin with a gag in his mouth.

The writer described a youth, age 12, who had recovered after being poisoned, but whose limbs had not been properly secured and were ever after absolutely useless. One leg was curved up behind his loins, the other bent up with the foot outwards, one arm inclined behind his shoulder, the other slightly bent and extended forward and all, as to muscles inflexibly rigid. He could not move himself or even drive away the flies.

Karwinskia humboldtiana

Pharmacy

Karw-h. The *Karwinskia humboldtiana*. N. O. Rhamnaceae family. Found in Mexico. The seeds, crushed and macerated are used for the preparation of the homeopathic mother tincture. Historical dose: Tincture and all potencies, 6c to 30c.

PAGE 931

Herbal

The plant *Karwinskia* belongs to the Rhamnaceae family, it is found in the Northern States of Mexico. Known locally under different names, such as: Tullidora, the 'little coyote,' 'wild capuli', 'little black rod,' 'cacachila'.

It is a small shrub, but can grow up to 9 meters in some places. The leaves are elliptical or oblong, rounded at the end, the flowers are small, yellow-green in color. The fruits are small in clusters from 6 to 9 mm in diameter, dark violet in color, usually containing four seeds of which only two are reproductive.

The Karw-h. seeds are toxic, they cause paralysis of the limbs, which becomes generalized and can terminate in death. They contain a fatty acid, a yellow substance and a glucoside, which is the cause of the paralysis of the motor nerves.

A homeopathic proving of Karw-h. was carried out by Luis de Legarreta and published in 1961 in his *Materia Medica of Mexican Plants*. The clinical observation of the mass intoxication of one hundred and six soldiers constitutes the first Memoirs of Dr. Castillo Najeros, published in Mexico in 1918. **Planets:** Moon.

Homeopathic

Karw-h. is a remedy with neurotrophic action, paralyzing the motor nerves. Thus giving a picture of flaccid paralysis, which increases, ending in quadriplegia. Bedsores.

Ascending progressive paralysis, flaccid and painless, predominantly on the left side.

Progressive paralysis with amyotrophy of the lower limbs. Paralysis of the lips tongue and larynx. Poliomyelitis. Acute and sub-acute, polioencephalitis. Acute spinal paralysis in the adult. Sub-acute atrophic spinal paralysis. Chronic anterior paralysis.

Loss of contractility and mobility of the leg muscles. Paresis of paralysis, rising to the upper limbs and muscles of the thorax and diaphragm. Reduction of tendons reflexes and skin. No diminution of reflexes of the bladder and intestines. The paralysis is predominantly on the left side.

Clinical

Acute poliomyelitis. Acute bulbar paralysis. Amyotrophy. Bedsores. Dyspnea. Encephalitis. Paralysis. Paresis. Poliomyelitis. Quadriplegia.

Symptoms

Abdomen

Lack of intestinal inactivity, partial obstruction.

Back

Cramping pains in the back.

Ears

Buzzing in both ears.

Head

Severe headache. Constant headache with feeling of heaviness.

Heart

Pulse slow from 65 to 70 beats a minute with temperature of 38-39°C.

Limbs

Progressive paralysis. Cramping pains in the arms and legs. Loss of contractility and mobility of the leg muscles.

Lungs

Dyspnea, which becomes worse and can end in respiratory paralysis, (need for respiratory assistance). Difficulty in speech. Bronchopneumonia, paralytic alveolitis, which can cause fatal asphyxia.

Rectum

Diarrhea in the first 48 hours, followed by intestinal paralysis with difficulty in evacuating.

Skin

Bedsores.

Stomach

Nausea with vomiting.

Compare

(1) Lathyrus Cicera - Weakness, then paralysis of the lower limbs with exaggerated reflexes and complaints of sensitivity.

(2) Hydrophis Cyanocinctus - Paralysis with muscular dystrophy.

(3) Plb. - Rapid emaciation, progressive paralysis of the limbs with amyotrophy and starting in the extensor muscles.

Kerosolenum

Pharmacy

Keroso. Kerosolenum. Kerosene. One of the lighter products, obtained by distillation from the crude oil. Solution in Rectified Spirit. Historical dose: All potencies.

History

Albatite from Nova Scotia, Kerosolene being the trade name given by the "Downer Kerosene Oil Company." Nearly or quite identical with "Gasoline," the lightest oil from Petroleum.

PAGE 932

The effects of Kerosolenum have been observed on workmen and also experiments have been made with it for the purpose of testing its anesthetic properties. **Planets:** Moon.

Homeopathic

Keroso. causes a pleasurable kind of intoxication, but too much muscular rigidity, asphyxia and intermittent pulse to render it a safe anesthetic. Laughter was noticed in two cases and this should prove an indication in some kinds of delirium and insanity.

Moderate convulsions. More muscular rigor than usual in favorable anesthesia. Partially or wholly insensible, but rapidly recovers when brought into open air. Insensibility complete, though eyes not closed.

Clinical

Anesthesia. Convulsions. Ecstasy. Laughter.

Modalities

The symptoms are better in open air.

Symptoms

MIND

On breathing the vapor one seems to float away into a wavy maze with a sense of complete loneliness, there seems but one object in the universe, oneself, on recovery, the first object seen seems the only other object. Laughed (after tooth extraction) and only felt he had a pleasant dream. Lost himself, but was inclined to laugh and would not keep still

Chest

During the convulsions breathing somewhat checked by rigid contraction of chest muscles.

Eyes

Eyes a little unnaturally open and staring.

Face

Momentary dusky redness of face at each convulsion (as in epilepsy).

Head

Peculiar lightness of head. Slight headache.

Limbs

Weakness of the limbs.

Pulse

Accelerated intermittent, volume diminished during insensibility.

Temperature

Some sweating.

Kissingen aqua

Pharmacy

Kiss. Kissingen aqua. Cold, chlorinated, gaseous, saline Springs of Kissingen in Bavaria.

Dilutions. Historical dose: Tincture and all potencies.

History

The water of Kissingen has been proved by Carl Preu and observations have been made on its general effects. The composition of the solid constituents is very complicated, but Nat-m. is the leading ingredient, existing in the proportion of 5.82 out of a total of 8.55 in the 1,000. It compares with Nauheim, Kreutznach and to some extent with Vichy.

Planets: Jupiter.

Homeopathic

The conditions against which Kiss. is useful are abdominal affections, especially a catarrhal condition of intestinal atony. Convalescence from typhoid and gallbladder affections, disorders of the liver, spleen and intestinal glands. Also used in cases of gout where the asthmatic principle appears to be repercussed upon the abdominal viscera, for then the waters draw it out to the joints. Only these waters require to be managed with extreme prudence, if you overdo the doses by ever so little you will bring on a true attack of gout.

Clinical

Albuminuria. Constipation. Corns. Diabetes. Diarrhea. Gallbladder affections. Gout. Hemorrhoids. Liver, disorders. Mesenteric glands, disorders. Noises in ears. Rectum, disorders. Spleen, disorders. Warts.

Modalities

Worse in the forenoon and at night. Worse on waking. Worse while eating, (vertigo).

Worse during the menstruation, (toothache). Worse while reading and writing.

Comments

Constantin James gives an excellent account of its action. The dose is from three to six glasses of the water in the morning and two at 4 p.m. , but the general rule is that no more it to be drunk than the stomach can digest without difficulty.

In the first days there is increase of appetite and force, but in proportion as the water is absorbed the effects become general.

PAGE 933

Then an eliminatory "crisis " comes on. The stools become brownish, loose, bilious. The urine is turbid, depositing a sediment which rapidly putrefies. The secretion of the bronchial, genital and ocular mucous membranes and also of the skin is increased and changed in character.

At the same time patients experience a sort of moral and physical prostration and are alarmed to see old and long-forgotten troubles reappear. This crisis, which appears in the first or second week, soon disappears of itself and the cure proceeds.

Thus far Constantin James on the effects on the sick and observations recorded in Allen confirm them. Some of these effects were also observed in patient and one of these is noteworthy. The patient suffered from vomiting of blood consequent on the disappearance of a hemorrhoidal flux. Under the action of the waters the latter was restored and the blood-vomiting ceased.

Among the general effects, trembling of the whole body, weariness, pulsation of the whole body, stitches here and there, were noted and especially a very tearful disposition: "If he only looks at any one he must weep" (especially at 10 a.m.), muscle volitantes and noises in the ears, chills, heat and perspiration.

Compare

- (1) Nat-m. - weeping disposition, chill at 10 a.m. , catarrh, constipation.
- (2) Ant-c. - saburral condition.
- (3) Urt-u. - gout.
- (4) Ferr-pic. - warts and corns.

SOURCES

Clarke.

Kousso

(brayera anthelmintic)

Pharmacy

Kou. Kousso. *Brayera anthelmintica*. *Hagenia Abyssinica*. Kuso. Cosso. N. O. Rosacee. Abyssinia. Infusion of dried flowers. Tincture of flowers. Historical dose: Tincture and all potencies, 1/2 oz. Mix with warm water and let stand 15 minutes, stir well and administer. May be preceded by a little lemon juice.

Herbal

The flowers of Kousso are a favorite remedy for tapeworm with the natives of Abyssinia and the use of them in European practice for that purpose has led to the observation of the few symptoms recorded. Among which thirst, nausea and vomiting are prominent. In one case miscarriage was caused. The mode of administration as a tinea-fuge is as follows:

Take a quarter of an ounce of the dried flowers, boiling distilled water four ounces. Infuse fifteen minutes without straining. The powder is to be taken with the infusion in

the morning, fasting. Two such drafts may be given. It is best to give a purgative before and an hour or two after the draft.

A remark by Alexander Milne is significant to homeopaths: "Though Kouso leads to the expulsion of the worm, it seems not to improve the morbid condition which favors its production."

Living worms placed in an infusion of Kouso mixed with milk were killed in about half an hour. The prostration caused by the treatment is so great that Milne advises a course of Cinchona and Iron to follow. **Planets:** Moon.

Homeopathic

Kouso is a vermifuge to expel tapeworm. Kou. covers nausea and vomiting, vertigo, precordial anxiety slowing and irregular pulse, delirium and collapse. Rapid and extreme prostration.

Clinical

Miscarriage. Tapeworm.

Compare

(1) Cucurb., Gran., Fil.

(2) Kamala, an efficient remedy for tapeworm in 30-60 minims of tincture taken in cinnamon water.

Clarke.

Kreosotum

(beechwood kreosote)

Pharmacy

Kreos. The Kreosotum. Beechwood Kreosote. A product of distillation of Wood Tar. Solution in Rectified Spirit. This medicine is a mixture of phenols obtained from distillation of wood tar. Kreosotum is a mixture of phenols obtained from this distillation. Historical dose: Tincture and all potencies, third to thirtieth potency.

PAGE 934

History

The preservative principle of smoke was discovered by Reichenbach, a Moravian alchemist, early in the nineteenth century. Its name, derived from the Greek, means "flesh-preserver". Reichenbach discovered Kreosotum, and introduced it into medical practice and there was a rush for the new remedy. Kreosotum for a short time was a panacea and then fell into neglect, except among homeopaths.

Kreosote is a product of the distillation of pyroligneous acid and of tar. Meredith proved on himself "the first heavy distillate from hard green wood," obtained at charcoal works in the 4x potency. The symptoms observed were so like those of pure Kreos. that they need not be separated. Among them were: Great thirst in evening. (stomach yin vacuity heat) Enormous appetite. (stomach yin vacuity fire) Stabbings (blood stagnation) here and there. **Eyes** feel as if in a woody smoke. (liver fire or wind) Sneezing. (due to qi/phlegm stagnation in lung or cold or heat etc) Spleen pain. (may be damp heat) Nasal pus. (phlegm heat in lung) Teste includes it with Ars., Merc-c. Plb., Stann., Nit-ac., Sul-ac., Crocus and

Arg-met. in his Merc. Sol. group. He remarks that several members of this group, while preserving dead organic matter from decomposition, have just the opposite effect on living tissues.

The entire group have these characters: Suppressed or more frequently increased secretions with putridity.(**putrid secretions—toxic heat and damp that is phlegm and toxic heat and secretions controlled by kidney and lung so toxic phlegm heat in lung**) Foul breath.(**phlegm and toxic heat**) Bloating.(**phlegm accumulates and heat thrust outward so bloating due to phlegm fire**) Decay of teeth and bones.(**kidney deficiency with toxic heat external or internal invasion**) Cadaverous coldness. **Predominant left-sidedness.(yang side so it is due to fire or heat so heat is prominent in phlegm and heat)** Deep.(**phlegm related**) nervous(**heart related**) and mental derangement.(**heart so phlegm blockage in heart**) Violent oscillation of symptoms. ravenous hunger to anorexia.

All favor the production of intestinal parasites(**toxic heat and phlegm in intestine**) and all are therefore anthelmintic.

Excessive indulgence in smoked meats and fish is very injurious to the health.(**heat and phlegm**)

Kermes of Weinsberg, had collected 135 cases in which death has occurred apparently from **eating smoked food.(phlegm and heat)** The leading symptoms in all were: **Burning pain at epigastrium,(heat) bloody vomiting,(heat) meteorism, violent colic(heat) with constipation,(heat) slow breathing,(phlegm) sinking of pulse(phlegm) and dilatation of pupils. (Teste.)(heat)**

Homeopathic

Kreosote is the most active of the carbons, producing rapid ulcerations(**rapid due to excess heat and ulcer include damp so toxic heat and damp**) and **destructions of tissues. (excess toxic heat) disorganizes the blood.(toxic heat)** Pulsations all over the body(**cold stagnation or blood stagnation**) and profuse bleeding from small wounds. (**excess heat**) Very severe, old neuralgic affections,(**severe so blood/cold stagnation in heart and so cold stagnation neuralgia**) pains rather aggravated by rest.(**cold aggravated by rest**)

Cancerous ulcers of the gastrointestinal tract(**toxic heat and phlegm in lung or stomach**) and uterus(**kidney deficiency with toxic heat**) have been cured with this remedy. Inflammatory ulcerations, cancers,(**toxic heat and phlegm**) epitheliomas, hemorrhages even from small wounds.(excess toxic heat)

The genitalia of both sexes are markedly affected. Hemorrhages, ulcerations, cancerous disorders. **Rapid decomposition of fluids and secretions(toxic heat)** and burning pains. Overgrown,(**toxic heat and excess phlegm**) poorly developed children. Post-menopausal diseases(**heat increases after menopause**). Tumefaction, puffiness, gangrene.(toxic damp heat) Ailments of teething children.(kidney deficiency with toxic heat)

The glands and mucous membranes are centers of action. It affects the mucous membranes of the digestive tract, genitals.

Excoriating, burning and offensive discharges.(**toxic heat**) Burning like fire.(**toxic heat**) Profuse, acrid, hot, foul, discharges, belchings, sputum etc.(**toxic heat and damp/phlegm**), redden the part.(**toxic heat and damp**) Lumpy discharges,(**phlegm**) menses etc.(**phlegm**) hemorrhages, passive, brown, dark from small wounds.(**brown,dark—toxic heat,passive—phlegm or heart qi deficient to push the blood**). Fullness. Heaviness.(**phlegm**) Scurvy.

Great debility with miserable feeling. Blackness of teeth, (kidney qi deficient with toxic heat and phlegm) leucorrhea, lochia. (toxic heat and damp) Rapid emaciation. (rapid—heat, emaciation—due to destruction of tissues etc) Complaints accompanying yawning. (kidney deficiency) Children would not sleep unless caressed and fondled. Pulsations all over the body. (cold stagnation or blood congealation) Congenital syphilis. (kidney deficiency with toxic heat)

PAGE 935

Clinical

Abscess. Acne. Amenorrhea. Bedwetting. Cancer. Carbuncles. Cholera infantum. Coccyx, pain. Colic. Congenital syphilis. Constipation. Dentition. Diarrhea. Ear disorders. Epithelioma. Belchings. Eruptions. Flushings. Hemorrhages. Herpes. Hysterical vomiting. Impetigo. Irritations. Leucorrhea. Lupus. Menopause. Menstruation. Neuralgias. Ovary disorders. Prostate, irritation. Pregnancy, vomiting. Pustules. Rheumatism. Seasickness. Stomach disorders. Syphilis. Syphilitic deafness. Toothache, decay. Tongue, inflammation. Toothache. Tuberculosis. Ulcers. Urine incontinence. Uterus disorders. Vomiting. Whooping cough. Yawning.

Constitutions

Hering mentions these constitutions as suited to Kreos: Dark complexion, slight, lean. Complexion livid, disposition sad, irritable. Old women. Torpid, leuco-phlegmatic temperament. Old-looking children, hard to awaken. Blondes. Kreos. is suited to women and to children and especially to the leuco-phlegmatic temperament. It is suitable to lean persons, old women with post-menopausal diseases. Over grown, poorly developed children with marasmus. Hemorrhagic diathesis. **Planets:** Saturn, Moon.

Modalities

Better from warmth, hot food, motion, pressure, after sleep. (all shows cold and deficient condition which is qi deficiency of spleen, kidney, lung, stomach etc) Worse from dentition, pregnancy, rest, cold. (kidney qi deficient, phlegm stagnation—rest) Worse from eating. (phlegm in stomach) lying, (phlegm stagnation or cold stagnation) summer, (summer heat due to toxic internal heat) bad smells. (toxic heat) Worse during menses, (heat) 6 p.m. to 6 a.m. (yin problem), sex (kidney deficient) touch, (qi stagnation or yang excess) sprains. Worse in open air, (cold stagnation in lung so open increases cold) when lying after menstruation. (phlegm or blood stagnation may be)

Symptoms

MIND

Child wants everything but throws it away when given. (liver yang irritated) Screams at night. (children). (lung yin deficient, lung—cry) Music causes weeping (toxic heat is disharmonic and music is harmony) and palpitations. Fear at the thought of sex in women. (sex has toxic effect and already kidney ki deficient) Cross, willful and obstinate. (liver heat—cross and spleen yang deficient so obstinate, willful—kidney) Stupid. (spleen deficient) Longs for death. Child moans constantly or dozes with half open eyes or is cross and sleepless during dentition. (kidney qi deficient with heat or kidney yin vacuity heat) Vanishing of thought, (heart qi/yin deficient so no yin to hold thought may

be), forgetful, (heart deficient with spleen deficiency) peevisish, irritable. (heart heat or liver heat)

Abdomen

Pressure in region of spleen. Pain, as from ulceration in abdomen, when breathing and moving. Painful sensation of coldness in abdomen with too scanty emission of urine. Inflation and tension of abdomen. Contractive pain in abdomen. Shootings in abdomen, sometimes extending to sexual parts. Colic, resembling labor pains. Obstinate flatus in old abdominal disease.

Back

Dragging pain in back extending to genitals and down the thighs, as if everything would come out (in women) with urging to stool and urination with leucorrhoea. Great debility. Burning in sacrum, scapulae as if bruised.

Breasts

Dwindling of breasts with small hard painful lumps in them.

Chest

Deep pain in chest. Burning as of hot coal in chest. Gangrene of lungs. Periodical hemoptysis. Neglected tuberculosis.

Ears

Eruption around and pimples within. Difficult hearing and buzzing during and before menses.

Eyes

Hot, acrid smarting tears. Salty lachrymation. **Lids red and swollen**. Suffering of eyes alternating with limbs. Constant quivering of eyelids.

Face

Sick, suffering expression, hot, cheeks red. Yellow pallor with red blotches during chill or heat. Old looking children. Burning pains, worse talking or exertion, better lying on affected side. Lips red, bleeding. Moistens lips frequently without being thirsty.

Female

Corrosive itching within vulva, burning and swelling of labia. Violent itching between labia and thighs. Leucorrhoea, yellow, acrid, odor of green corn, worse between periods. Leucorrhoea, gushing like bloody water offensive, corrosive, staining the linen yellow. Menses, profuse, lumpy. Menstrual flow intermits (Puls.), ceases on sitting or walking, reappears on lying down. During menses, difficult hearing, buzzing and roaring, eruption after. Burning and soreness in external and internal parts.

Cancer, erosion of cervix. Uterine cancer. Stitches in vagina, make her start. Menses too early, prolonged. Vomiting of pregnancy with ptyalism. Lochia, lumpy offensive. Hemorrhage after sex. Violent pain during sex, burning in parts, followed by discharge of dark blood, next day.

PAGE 936

Food

Craves smoked meat. Disgust of food during convalescence. Cold food worse. Fasting aggravates dare not remain fasting.

Head

Dull pain as from a board pressing against the forehead. Buzzing in head. Menstrual headache. Occipital pain. (Gels., Zinc. Pic.) Scalp sensitive worse combing hair. Falling of hair.

Heart

Stitches in heart region. Pulsation in all arteries when at rest.

Kidneys

Urination, hurried involuntary, when lying, on coughing. Must hurry when desire comes to urinate. Can urinate only when lying. Dreams of urinating. Bedwetting in the first part of night. Urine offensive. Frequent urination with copious urine during day. Diabetes. Drinks much but passes little at a time. As of a lump pressing down on bladder. Violent itching of vulva and vagina, worse when urinating.

Limbs

Paralytic sensation in limbs on waking. Boring pain in hip-joints. Scapulae sore. Pain in joints, hip and knee. Pain in the hip joint (left) with sensation as if leg was too long when standing. Pain in left thumb as if sprained. Burning in soles. Ecchymosis, dorsal surface of fingers and hands eczematous.

Liver

Shooting and pressive pains in hepatic region. Sensation of fullness and pain as from contusion in liver.

Lungs

Cough, worse evening with efforts to vomit with pain in chest. Raw burning in chest, pains and oppression. Cough after influenza. (Eriodyction.) Winter coughs of old people with heavy pressure on sternum. Gangrene of lungs. Copious, purulent expectoration, after every cough. Hemoptysis, periodic attacks. Sternum feels pressed in.

Male

Burning in genitals during sex from coming in contact with acrid vaginal discharge, penis swells next day. Prepuce, bluish black with hemorrhage and gangrene.

Mouth

Lips red, bleeding. Very rapid decay of teeth with spongy, bleeding gums, teeth dark and crumbly. (Staph., Ant-c.) Black spots on teeth. Putrid odor and bitter taste. Pus, bluish, spongy, bleeding gums. Intolerable toothache during the pregnancy. Very painful dentition, child will not sleep. Aphthae or salivation during pregnancy. Taste bitter low down in throat. Foul breath. Pegged teeth.

Nose

Offensive smell and discharge. Chronic catarrh of old people. Acrid rawness. Lupus. (Ars.)

Rectum

Diarrhea, bloody, dark, brown, lenteric offensive stools. Diarrhea, very offensive, dark brown. Bloody, fetid stools. Burning hemorrhoids. Cholera infantum in connection with painful dentition, green stools, nausea, dry skin, exhaustion, etc. Green stools during dentition. Child struggles and screams during stool, as if it would go into a fit. Sore pain, worse deep breathing. Constriction of rectum with uterine cancer.

Sensations

As if a board was across forehead. As if brain would force through forehead. As if something floating before eyes. As if a hard twisted ball was lying in umbilical region. Burning as of hot coals deep in pelvis. As if small of back would break. As if scapula and other parts bruised. As if tendon of elbow-joint too short. As if small of back would break. As if hip dislocated. As if leg too long when standing.

Skin

Violently itching, moist or scruffy eczema on eyelids, face, joints, back of hands. Itching, worse towards evening. Small wounds bleed freely. (Crot-h., Lach., Phos.) Ulcers break out and heal, bleed after sex. Pustules and herpes. Urticaria after menses. Senile gangrene.

Sleep

Children would not sleep unless caressed and fondled. Disturbed, caused by restlessness of the whole body or with sensation of fatigue and pains in all limbs. Tosses about whole night without any apparent cause. Dreams of urinating. Anxious dreams of pursuit, fire, erections, etc.

PAGE 937

Stomach

Belchings, hot, frothy. Nausea, vomiting of food several hours after eating of sweetish water in the morning in pregnancy of undigested food of uterine ulcer. Cancer of the stomach. Feeling of coldness, as of ice water in stomach. Soreness, better eating. Painful hard spot. Hematemesis. Bitter taste after a swallow of water.

Temperature

Cold sweat. Feverish sensation over whole body with good appetite. Predominance of cold, tendency to shiver and frequent shiverings. Chilliness predominating while at rest. Chill with great bodily restlessness. Flushes of heat with circumscribed redness of the cheeks. Thirst after the shiverings.

Throat

Hoarseness with pain in larynx, better sneezing. Burning, choking sensation. Putrid odor. Bitter taste, when swallowing food after drinking water.

Comments

The principal observed effects of Kreos. are: Scorbutic condition of gums, falling out and decay of teeth, foul breath,(toxic heat with phlegm) costiveness, malaise. (Salt, another great preservative, also produces scurvy.)

Teste observed that it acted particularly well on infants in the cradle and congenital syphilis was a very strong indication for it. The marked action of Kreos. on the teeth and dentition confirms this.

Cooper cured with Kreos. 30c a case of auditory vertigo in a patient with pegged teeth. No other medicine would touch the case. But it is also frequently called for in acquired syphilis, especially in the skin manifestations.(syphilis is toxic heat here with lung qi or yin deficiency)

Nash confirms the action on children and especially during dentition. The teeth decay almost as soon as they appear.

Gums dark red or blue and very painful(toxic heat in stomach) incessant vomiting, cadaverous-smelling stools.(toxic heat in intestine)

The urinary symptoms are also marked and Kreos. is one of the most important remedies in bedwetting. (Kidney yang deficiency, kidney yin deficiency, spleen qi weak and sinking, lung qi deficiency with toxic heat and phlegm)The chief urinary features are: (1) Copious pale urine. (heat) (2) Sudden, great urging, (heat) the patient cannot go quick enough. (3) The child wets the bed during the first sleep which is very profound. (phlegm sleep or blood stagnation sleep)

Teste emphasizes a discharge "of fetid pus from nostrils."**(toxic heat and phlegm)** At 7 a.m. sitting up in bed, pain and stiffness across hips and sacrum, which continued during the day. Prostate and bladder irritation during night**(toxic phlegm heat in bladder and prostate)** frequently rises**(kidney qi deficiency)** to pass a very little urine,**(heat)** coming away like spray.

Kreos. cured at the same time constipation of ten to twelve days' duration. Meredith cured with it a girl, et. 17 of intense urethral scalding after urination.**(toxic damp heat)**

Grauvogl cured with Kreos. 3x a girl of 20 of suppression of menses**(creates toxic heat in body with blood symptoms may be)** with a concomitant state of imbecility. In another woman who had suppressed menses with tertian intermittent fever,**(menses suppressed converted into fever or heat)** the intermittent was cured with Chin-s. one grain four times a day and then Grauvogl, hearing for the first time of the suppression of the menses, gave Kreos. 3x with the result that the fever returned in full force.

Quinine was again given and the fever again disappeared. Before the next period, as the patient was of the Nux-v. type, that remedy was given and the period was re-established.

According to Grauvogl Kreos. has a short period of action, one or two days, Chin-s. having two or three weeks and he quotes the case to illustrate incompatibility in intermittents Chin. may be given after Kreos., but not Kreos. after Chin.)

Guernsey summarizes the action of Kreos. on women thus: "Leucorrhea putrid with accompanying complaints, leucorrhea in general, especially if very fetid and exhausting.**(toxic heat and phlegm or damp)** Female genitals in general.

Complaints after menstruation of females at change of life."**(kidney yin deficiency with toxic damp heat)** According to the same authority Kreos. affects especially the inner temples, external ears and lobe of the ear.**(kidney region)**

PAGE 938

In Clarke's experience Kreos. (3c and 30c) meets a very large proportion of toothache cases where the teeth are decayed, especially if the gums are scorbutic. It's nearest rivals are Staphisagria with blackened teeth and Mercurius with suppurating gumboil.

W. P. Wesselheft confirms these symptoms: Coarse, red elevated acne pimples, especially in blonde women.**(phlegm heat localized).** Giving out of knee-joint with annoying cracking in a large, fat blonde woman. Large purulent blisters **(toxic damp heat with kidney deficiency)** on concha of both ears with a red base like small-pox pustules.

Chronic headache **(phlegm headache)** accompanied with great drowsiness**(phlegm drowsiness)** during which the patient would sleep most of the time and groan**(phlegm stagnation)** in his sleep. Relief was followed by the appearance of a great number of small warts on scalp.**(phlegm heat stagnation and localized)**

James H. Freer cured a lady over 80 who suffered from incontinence of urine**(heart qi deficient or kidney/bladder qi deficient to have a control)** on the occurrence of a bronchial attack which compelled her to keep her bed. Villers has reported a case of incontinence worse when lying down cured by Kreos. and this led Freer to the remedy, which rapidly cleared up the case, bronchitis**(due to toxic heat with phlegm)** and all.

Freer also cured incontinence in a case of locomotor ataxia (man, 74) with Kreos. 6c. An allopathic authority, Vladimir de Holstein of Paris, accidentally cured with 6 drop doses of Kreos., given in beer or milk, aggravated constipation in a chlorotic girl. He gave it with the idea of "disinfecting" the intestines.

The vomiting of Kreos. is noteworthy. The most characteristic form is that due to weakness of stomach, (stomach qi deficiency) which cannot digest and which rejects a meal undigested some hours after it was eaten.

Vomiting of pregnancy, sweetish water with ptyalism of cholera infantum (sweet—stomach, ptyalism—stomach qi deficient or heat) incessant vomiting with cadaverous stools in malignant disease of stomach. (toxic heat in intestine with damp)

Gentry has recorded the following: Lady, 45, on visiting a friend ill with dysentery, was struck with the odor, went home, commenced to vomit and vomited all food or drink and continued without ceasing, vomiting or retching for three weeks, being fed by the rectum all the time. She had to be held up by the nurse. She was greatly emaciated.

Kreos. 200c, one dose given. In twenty minutes the retching ceased. The patient fell asleep, had no more vomiting and rapidly recovered. Up to this time she had been under allopaths, who advised that homeopathy should be tried, as they could do no more.

Harmar Smith cured a girl of 10 of very frequent and violent eructation, she was apparently healthy in other respects. Bell. and Puls. did no good. Arg-n., aggravated. Kreos. 2x at once did good and cured in a few days.

Burning pains (toxic heat) are a marked feature of Kreos. (lupus of nose with burning pains. Chronic pneumonia (phlegm and toxic heat in lungs) with pain like red-hot coals in chest (toxic heat in chest area) and stitches are even more characteristic. Itching is intense. (damp heat itching and intense due to toxicity) There is general sensitiveness to touch and contact. (yang hyper)

Marked periodicity is very apparent. (liver-stomach related) Intermittent fevers. Fretful, irritable, (liver yang hyper) apprehensive. Music makes him weep. Weak-minded with suppressed menses. Sufferings from the non-appearance of menses, hence at menopause. Prostration (spleen/kidney/lung qi deficient) and restlessness. (heart yang hyper)

Symptoms are worse after menstruation, (kidney qi/blood deficiency) worse during leucorrhea, (during heat) when yawning. (kidney yin deficient) Leucorrhea is better sitting, (improves spleen qi transformation of chyle so less damp accumulation) worse standing and walking. (walking further use spleen qi, standing uses kidney qi) Cough compels sitting up all night. (cough has something to do with spleen here with dampness or phlegm and lung yin deficient) Hoarseness is better by sneezing. Coughing causes involuntary urination. (involuntary urination and cough is of phlegm with toxic heat type) Drawing in limbs alternates with sufferings in the eyes.

PAGE 940

Lac caninum

(dog's milk)

Pharmacy

Lac-c. Lac caninum. Dog's milk. Historical dose: All potencies, thirtieth and the highest potencies.

History

Lac Caninum is not a novelty in medicine. Sammonicus and Sextus praise it in photophobia and otitis. Pliny claims that it cures ulceration of the uterine cervical os. It was considered an antidote to deadly poisons." Hering states: "Dioscorides, Rhasis, Pliny and Sextus recommended it for the removal of the dead fetus."

Hering adds that the remedy was revived by Reising of New York, who used it successfully in the treatment of diphtheria. After Reising the remedy was used by Bayard and Swan to whose indefatigable exertions we owe the present status of this medicine. Swan's, potencies were prepared from Reising's 17 c.

The provings were made with the 30c and upwards and are published in a little volume by Swan and Berridge. As in the case of Bufo, Castor equi and other remedies of ancient times, homeopathy has stepped in to confirm the accuracy of the old observers.

In the provings a large number of the symptoms were manifested in the region of the throat. It is in diphtheria, both as curative and prophylactic that Lac-c. has won its greatest fame and the provings and clinical experience have developed a grand characteristic in this and other disorders is an alternation of sides often very rapid.

The "alternation of sides" once led Clarke to the cure of an eczematous condition of the eyelids in a child. The child's aunt, who brought her to him and causally remarked that it often left one side entirely and went to the other and then back again. Lac-c. cleared it up in a very short time. **Planets:** Moon, Saturn.

Homeopathic

Lac-c. is of great value in certain forms of sore throats, diphtheria and rheumatism.

This remedy disorganizes the blood and affects the throat, breasts, kidneys and rectum. The keynote symptom is erratic pains, alternating sides. Feels as if walking on air or of not touching the bed when lying down.

Great lassitude. Great weakness and prostration. Sinking spells every morning. Breast infections. Decided effect in drying up milk in women who cannot nurse the baby. Could not bear to have any one part of her body touch another. Mouth and throat covered with aphthous yellowish-white ulcerations, easily bleeding.

Lac-c. has soreness of throat. This condition entirely ceases, only to commence on the opposite side and often alternation of sides, again returning to its first condition. These sore throats are very apt to begin and end with the menses.

Profound prostration, coldness in different parts and organs, even in blood and easy hemorrhages, nosebleed, bloody stools, scurvy are most marked symptoms. Discharges are fetid. Gray, white, plastic exudates. Fatty degeneration of liver, spleen and kidneys and other solid organs. Toxemia of pregnancy.

Clinical

Arms, varicose. Arthritis. Breasts, painful. Chancre. Colic. Croup. Cough. Diphtheria. Dysmenorrhea. Epulis. Eye disorders. Gonorrhoea. Headache. Ichthyosis. Leucorrhoea. Menses disorders. Neuralgia. Ovarian disorders. Ranula. Rheumatism. Sciatica. Spinal irritation. Stomach disorders. Syphilis. Throat, sore. Ulcers. Uterus disorders. Vaccinosis. Varicose veins. Warts.

Causations

Result of fall. Diphtheria.

Modalities

Better cold, cold drinks. Better from nosebleed, mental symptoms. Worse morning of one day and in the evening of next. Worse from cold, mercury, jar, coughing, sneezing. Worse at night. Cold winds and cold, sharp air aggravates.

PAGE 941

Symptoms

MIND

Very forgetful in writing, makes mistakes. Despondent, thinks her disease incurable. Attacks of rage. Thinks himself of little consequence.

Visions of snakes. One prover had delusions about snakes, imagined she was surrounded by them. Horrible visions, fears they will take objective form, when sitting still and thinking. Awoke in the night with a sensation that she was lying on a large snake.

Illusions or hallucinations about snakes.

Imagines snakes are all around her, that they are creeping into her bed, fears to close her eyes. Woke at daylight, feeling that she was loathsome, horrible, mass of disease.

Feels weak and nerves so thoroughly out of order. When reading anything she rapidly changes the meaning omitting or adding things. Imagines that he wears some one else's nose (diphtheria). Very restless, cannot concentrate her thoughts or mind to read, wants to leave everything as soon as it is commenced.

When speaking, substitutes the name of the object seen for that which is thought. Fear of disease of tuberculosis. Fear of heart disease of falling downstairs. Fits of weeping two or three times a day. Depression. Cross and irritable, while headache lasted. Attacks of rage, cursing and swearing at the slightest provocation.

Abdomen

Gripping colic with shifting of flatulence and diarrhea, followed by continuous rectal pain. Abdomen swollen and sensitive to deep pressure, which also causes nausea, the nausea passes off when pressure is removed. Feeling of tension in left groin, does not want to walk or stand.

Back

Neck stiff. Sharp neuralgic pain under right scapula. Lameness and cutting, pain under left scapula, worse turning in bed. Backache nearly all day between scapula, worse after becoming warm, somewhat better by leaning back.

Breasts

Breasts seem very full. Breasts swollen, painful before (Calc., Con., Kali-c., Puls.) and better on appearance of menses. Mastitis, worse from the least movement. Breasts very sore and sensitive to pressure for a day or two during menses. Breasts very painful with sharp, darting pain in right ovarian region. Constant pain in breast, they feel very sore when going up or down stairs. Constant pain in nipples. Breasts sensitive to deep pressure. Galactorrhea. Breasts painful, feel as if full of very hard lumps. Loss of milk while nursing. Dries up the milk when nursing.

Chest

Lungs feel as though fast to chest, worse while writing. Clavicles sore to touch. Stabbing pain in right lung, just below nipple, preceded by pain in stomach-pit as of a stone or undigested food. Feeling of oppression and tightness behind sternum with desire to draw a deep breath.

Ears

Pain in right ear, sometimes intense. Very sharp pain in right middle ear, while walking in wind, had to cover it with hand. Awakened several times during night by sore aching pains in the ear of side on which she is lying. Reverberation of voice as if speaking in a large, empty room. Sounds seems far off. Ringing in right ear. At night a buzzing in right ear. More than any other remedy, relieved deafness from hereditary syphilis.

Eyes

Sharp pain in socket back or right eye, followed by tenderness in right temple, both transient. Darting intense pain round left eye. **Eyes** slightly swollen, profuse lachrymation with catarrh. **Eyes** sensitive to cold air. Upper eyelids very heavy, can scarcely keep eyes open, very sleepy. Tendency in retina to retain the impression of objects and colors or somewhat of the object last looked at is projected into the next.

Face

Burning flushing of face. Marked pallor of face. Swollen, she can hardly see in the morning. Neuralgic pains worse talking, eating or slight touch followed by numbness.

PAGE 942

Female

Menses too early, profuse, flow in gushes. Sinking at epigastrium. Sexual organs easily excited. Backache, spine very sensitive to touch or pressure. Pain in left ovarian region and all across lower part of abdomen. Menses scanty at first with pain in left ovary. Membranous dysmenorrhea. Dysmenorrhea, pain in left groin with bearing down. Leucorrhoea all day, but none at night, even after taking a long walk. Constant pain in right ovary. Itching of vulva. After-pains very distressing.

Food

Appetite improved increased. Cannot satisfy her hunger. Desire for highly-seasoned dishes, which is very unusual, has used pepper, mustard and salt freely. No appetite (diphtheria, acute rheumatism). Considerable thirst. Great hunger for large quantities often. Craves milk and drinks much of it (diphtheria). Aversion to anything sweet.

Head

Sensation of walking or floating in the air. (Stict.) Pain first on one side, then the other. Blurred vision, nausea and vomiting at height of attack of headache. Occipital pain with shooting extending to forehead. Sensation as if brain were alternately contracted and relaxed. Noises in ears. Reverberation of voice.

Heart

Palpitations of heart, irregular, causing shortness of breath. Coldness in precordial region. Right pulse full, left small. Coldness in blood.

Kidneys

Nephritis. Urine albuminous, scanty, suppressed. Hematuria. Urination causes intense pain in urethra, soon passing off. Sensation after urinating, as if bladder still full, continued desire to urinate. Constant desire to urinate, passing large quantities frequently, at night she dreams of urinating and wakes to find an immediate necessity. Nocturnal bedwetting, a specific.

Limbs

Aching pains in limbs and back. Rheumatism beginning in soles flying from joint to joint and side to side. Burning of hands and feet at night. Ankles swell in the evening.

Arms, feet cold. Sciatica, right-side. Legs feel numb and stiff, cramps in feet. Rheumatic pains in limbs and back from one side to the other. Pain in arms to fingers. Burning in palms and soles.

Lungs

Constriction of chest, as from sulphur fumes. Cough from tickling under middle of sternum. Cough with pain and oppression of chest, it jars her all over. Sensation as if the breath would leave her when lying down and trying to sleep, has to jump up and stir around for an hour or so every night.

Male

Sexual desire quite marked. Right spermatic cord, low down, sore to touch. Chancre on prepuce, left side of frenum, penis greatly swollen, chancre like a cauliflower excrescence, red, smooth and glistening. Gonorrhoeal with intermittent pains in the urethra.

Mouth

Lips dry and peeling off. Feter. Acute ulceration and follicular stomatitis, aphthous and gangrenous. Noma. Scurvy. Salivation. Drooling in diphtheria. Cracking of jaw while eating. (Nit-ac, Rhus-t.) Putrid taste increased by sweets. Roof of mouth very sore with blisters. Mouth very dry. Saliva: increased, slightly viscid, ran from mouth during sleep. Mouth constantly full of mucus, but a constant inclination to swallow, which causes pain. Breath very offensive (diphtheria). Jaw cracks while eating.

Nose

Nosebleeds at night, only from right nostril. Coryza, one nostril stuffed up, the other free, alternate. Alae nasi and corners of mouth cracked. Bones of nose sore to pressure. Bloody pus discharged. Stuffed feeling in nose and throat. Watery discharge, followed by dry sensation in nose. Fluent catarrh from tubal nasal discharge like gonorrhoea, staining pillow greenish yellow.

Rectum

Dysentery much blood passing with mucus, profuse greenish, cries with violent cutting pain in the rectum in dysentery and diarrhea. Frequent desire for stool all through provings. Great tenesmus, rectum as if it could not expel feces because they are soft.

Constipation. Urgent desire for stool, but passes nothing but wind. Profuse diarrhea with colic pain. Diarrhea coming out with great force.

PAGE 943

Skin

Dry not skin, (diphtheria). Pimples between lip and chin. Herpetic eruption in both axillae. Ichthyosis with bran like desquamation of skin. Shining, glazed and red appearance of ulcers on shin and wrist (syphilis). Crusts on skin, under which grayish yellow matter formed and was squeezed out.

Sleep

Dreams of snakes. Dreamed a large snake was in bed, (tonsillitis). Great desire to sleep. Cried out and talked in sleep (diphtheria). Dreams frequently that she is urinating and wakes to find herself on point of doing so. Symptoms worse after sleep.

Stomach

Coldness in stomach. Sudden vomiting incessant of all food of offensive dark green mucus. Nausea with headache, on waking. Nausea better by belchings of wind. Weak, sinking feeling at stomach-pit, on waking in morning. Burning in epigastric region, feeling of a weight and pressure of a stone in stomach.

Teeth

Pain in left upper molars, coming from left temple through left ear. Teeth sensitive to cold water. Gums swollen, ulcerated, retracted, bleeding, teeth loose, caused by defective nutrition and exposure.

Temperature

Chilly feeling lasting all day. Internal chilliness with external warmth. Fever and chills for a few days and up and down every few hours. Intense fever on waking in morning with perspiration. Exhausting sweats after sleep. Wakes at night in cold perspiration with fearful foreboding. Perspired through night, sweat having a rank smell (acute rheumatism).

Throat

Sensitive to touch. Painful swallowing, pain extends to ears. Sore throat and cough with menstruation. Tonsillitis and diphtheria symptoms change repeatedly from side to side.

Shining glazed appearance of deposit, pearly-white or like pure white porcelain. Stiffness of neck and tongue. Throat feels burned raw. Tickling sensation causes constant cough. Sore throat beginning and ending with menses. Throat cold.

Tongue

Tongue, swollen, cold. Tongue coated white with bright red edges, profuse salivation. Tongue coated brown. Tongue dirty, deeply coated near back and center, except on edges, which are bright red. Tongue looks patched.

Vertigo

Dizzy sensation with slight nausea.

Comments

Rheumatic and other disorders having this peculiarity of changing from side to side are very likely to be benefited by *Lac caninum* from diphtheria with its fetid discharges, it is

not a far step to ozaena and Lac-c. has proved itself curative in a number of cases. Corners of mouth and ale nasi cracked.

Lac caninum has cured a case presenting the following characters: Crusts under which gray matter forms. Throat bad, swallowing difficult, mucous follicles swollen, covered with cream-colored mucus. Nose bad, feared destruction of bones. Bloody pus discharges several times a day. Bones of nose sore to pressure.

In addition to the changing sides characteristics Lac-c. has: "Inflamed surfaces (of throat) glistening." The same appearance when found on ulcerated surfaces in the skin is a leading indication for Lac-c.

E. T. Balch asked for advice in this case: Maud, age 10, brunette of healthy parents, one and a half years before fell forward and hurt her chest while playing. Nothing was thought of it at the time, but when brought to Dr. Balch she was pale, emaciated, capricious, no desire for play.

Sleep disturbed by frightful dreams during the day piteously begs her mother to take her, she is so afraid. She feels as though snakes were on her back.

PAGE 944

In response to advice tendered one dose of Lac. can. 50,000 c. was given, dry and in twenty-four hours the child became more lively and cheerful and very soon all abnormal sensations disappeared.

Another mental curiosity which has proved a useful is this: "Imagines he wears some one else's nose." Restlessness, nervousness and prostration appear in the provings and shown the relation of the remedy to diphtheria paralysis as well as to diphtheria itself.

In one prover the symptoms occurred periodically: worse in morning of one day and worse in afternoon of next. Wandering rheumatic pains. The sensation of lightness or levitation was noticed Ñ seemed to walk on air, not to touch the bed when lying. Cannot bear one part of her body to touch another, must even keep her fingers apart.

Compare

- (1) Lach., Cong.
- (2) Lac-v. - headache, rheumatic pains, constipation.
- (3) Lac vaccinum coagulatum, curds - nausea of pregnancy.
- (4) Lactic vaccini floc - diphtheria, leucorrhoea, menorrhagia, dysphagia.
- (5) Lac-ac.

SOURCES

Boericke. Clarke. Phatak.

Lac vaccinum defloratum

(skimmed milk)

Pharmacy

Lac-d. Lac defloratum vaccinum. Cow Skimmed Milk. Dilution. Historical dose: All potencies, sixth to thirtieth potency and higher.

History

The idea of potentizing skimmed milk originated with Swan upon reading Donkin's "Skim Milk Treatment for Diabetes and Bright's disease."

The symptoms set up by milk in some sensitive persons, especially the violent headache and the constipation, are a matter of common knowledge. It is in these disorders that the

remedy has especially distinguished itself. Milk contains within it an epitome of all the tissues and salts of the animal which secretes it.

It is natural to expect of it a wide range of action in the potencies. As Nat-m. is a prominent ingredient, it is not surprising that symptoms of this are found in the pathogenesis, e.g. , "thirst for large quantities often, nausea and vomiting, depression with crying and palpitation." **Planets:** Moon, Jupiter.

Homeopathic

Lac-d. is useful in diseases with faulty nutrition and anemic condition of blood. Motion sickness. Sick headaches with profuse flow of urine during pain. Feels completely exhausted, whether she does anything or not, great fatigue when walking.

Lac-d. has sufferings from loss of sleep. (Cocc.) Dropsy from organic heart disease and from chronic liver complaints. Persons or children who become sick on taking milk. Obesity. Sensation as if cold air was blowing on her, even while covered up, as if sheets were damp. Headache ceases at sunset. Most symptoms occur in the morning.

Clinical

Anemia. Appendicitis. Asthma. Breast-feeding, disorders. Bright's disease. Constipation.

Diabetes. Dropsy. Fainting. Headaches. **Heart** disorders. Leucorrhoea. Menses, suppressed. Milk allergy. Obesity. Sciatica.

Modalities

Better from rest, pressure of bandage, conversation. Worse from cold, least draught, wet, hands in cold water, worse from milk, loss of sleep, weekly. Lying down aggravates the vertigo, headache, urinary pain. Worse walking, worse sitting down, though ever so gently.

Symptoms

MIND

Despondent, better conversation, does not care to live, has no fear of death but is sure he is going to die. Horror of shut places. Loss of memory, listlessness. Disinclination for bodily or mental exertion. Depression, does not care to live, questions as to quietest and most certain way of hastening one's death. Depression with crying, palpitations and fainting spells. Imagines that all her friends will die. Does not want to talk to any one.

PAGE 945

Abdomen

Abdomen sore and sensitive to touch. Severe pain across umbilicus. Heaviness as of a stone in abdomen. Flatulence.

Breasts

Scanty flow of milk, restores the milk.

Chest

Soreness of chest with great pressure. Tuberculous deposit in apices of both lungs.

Eyes

Photophobia, even candle light unbearable. As if eyes were full of little stones during headache.

Face

Pale sickly look. Painless swelling of the face.

Female

Menses, delayed in girls who drink much milk, suppressed by putting hands in cold water. Pressing bearing down in ovarian region. Drawing pain across uterine region.

Food

Entire loss of appetite. Great thirst for large quantities and often intense thirst. Could not drink milk without its causing sick-headache.

Head

Distress in head after injury. Migraine, ceases at sunset. Pain begins in forehead to occiput in morning on rising. Intense throbbing with nausea, vomiting and obstinate constipation. Blindness, then throbbing frontal headache with much pale urination, worse noise, light, motion during menses, better by bandaging, conversation. Persistent headaches, for years. Head becomes sore on coughing.

Heart

Pressure around heart. Sharp pain in apex of heart. Palpitation of heart and flushes of heat.

Kidneys

Boring, sore pain in kidneys. Frequent and profuse urination with headache or other pains. Urination involuntary, while walking in cold air, while riding or when hurrying to catch a train and lack of sensation when the bladder is full.

Limbs

Tips of fingers icy cold, rest of the hands warm.

Lungs

Asthma so that he could scarcely breathe, accompanied by bloating in epigastric region. Short, dry cough with difficult expectoration of a small lump of mucus, which better cough.

Mouth

Mouth very dry. Breath very offensive. Mouth clammy and frothy during conversation.

Nose

Painful pressure or tightness at root of nose. Nasal catarrh.

Rectum

Persistent constipation better only by purgatives or enema with violent attacks of sick headaches. Stools hard, large with great straining, painful, lacerating anus.

Sensations

As though a knife was cutting up and down through the heart. As if head would burst. As if eyes full of little stones. As if top of head was lifted off. As if a ball of pain in center of forehead. As if flesh was off bones and edges were separated and sticking out. As if sheets were damp. As if a cold air blowing on her.

Skin

Very sensitive to cold. Symmetrical patches, causing itching and burning after scratching. Skin thickened at the edges of feet.

Sleep

Sleepy all day long. Great restlessness, extreme and protracted suffering from loss of sleep at night.

Stomach

Aversion to milk. Nausea and vomiting with sensation of deathly sickness. Vomiting incessant with no relation to eating, first of undigested food, sour, then of bitter water of pregnancy. Children suffer from coryza from drinking milk.

Temperature

Always feels chilly. Hot fever continues until near morning, wakes in profuse sweat, which stains linen yellow. Hectic fever, malignant typhoid. Sensation as if the sheets were damp.

Throat

Globus hystericus, sensation of a large ball rising from a point about lower end of sternum to upper end of esophagus, causing distressing sense of suffocation. Sore throat worse when swallowing, slight, hacking cough.

PAGE 946

Vertigo

Vertigo, worse lying on left side, moving head from pillow, turning while lying, must sit up. Faintness on extending arms overhead.

Comments

The first proving was made by a woman in New York in whose case the headache and nausea with constipation were strongly marked. A subsequent, more extensive proving was made under Swan by Dr. Laura Morgan. Hering, who adds, that with but few exceptions the symptoms have received clinical verification.

The characteristic headaches of Lac-d. are: Periodic sick-headaches in anemic women, nausea, vomiting and obstinate constipation. The symptoms which specially indicate it in diabetes are: Intense thirst, wasting. The menses are irregular, sometimes very dark, scanty, sometimes colorless water.

Lac-d. cured this case: Menses suppressed suddenly from putting hands into cold water. Great pain in uterine region. Intense headache. Pains fly all over. Flushed face. Patient slept after first dose, next morning slight flow appeared. Second dose brought back flow profusely and patient felt well and the flow continued.

Nutrition is perverted. There is loss of weight or else obesity. Dropsy. Fatty degeneration. It may be well to recall that milk is one of the articles forbidden to hydrogenoid or chilly patients. Burnett maintains that excess of milk in the dietary of children after they have cut their first teeth renders them susceptible to colds. There is periodicity in the symptoms: every eight days.

Compare

- (1) Colostrum - diarrhea in infants. Whole body smells sour. Colic.

- (4) Nat-m. - diabetes, headache, constipation, heart.
- (5) Cocc. - menstrual sick-headaches.
- (6) Cact. - heart, but Lac d. has not the "grasp" of Cact.
- (7) Nux-m. - head heavy, tends to fall to left. Lac-d. to right.

SOURCES

Boericke. Clarke.

Lac felinum

(cat's milk)

Pharmacy

Lac-f. Lac felinum. Cat's milk. Dilutions. Historical dose: All potencies.

History

Lac-f. is another of the remedies introduced by Swan. The full pathogenesis appears in Med. Visitor, Aug., 1893. The greatest number of the symptoms were experienced in the head and eyes and many of these have been confirmed. **Planets:** Sun.

Homeopathic

Lac felinum has eye symptoms, ciliary neuralgia, photophobia, asthenopia and dysmenorrhea. Among the clinically verified symptoms are: Morbid conscientiousness, heaviness in forehead, scalded sensation on tongue, absence of appetite.

Eye disorders are mostly accompanied by shooting pains from eye backwards. Styes were present in some cases. Constant nervous trembling, especially of hands, as in alcoholics.

Clinical

Asthenopia. Ciliary neuralgia. Dysmenorrhea. Headaches. Keratitis. Mouth inflammation. Styes. Throat, catarrh.

Modalities

Worse lying on left side. Lach. has worse lying on painful side. Zinc. has worse lying on painless side.

Symptoms

MIND

Great depression of spirits. Very cross to every one. Fear of falling downstairs, but without vertigo. Morbid conscientiousness, every little fault appeared a crime. Mental illusion that the corners of furniture or any pointed object near her, were about to run into eyes.

Abdomen

Pain in abdomen and back, as if menses about commencing. Pain in bowels. Sensation of a cold bandage over lower part of abdomen.

Chest

Very much oppressed for breath, continuing for several days, it is a difficulty in drawing a long breath or rather that requires the drawing of a long inspiration, for it seems as if the breathing was done by upper part of lungs alone.

PAGE 947

Eyes

Sharp, sharp pain through center of left eyeball, leaving it very sore internally and causing profuse lachrymation. Heavy pressure downwards of eyebrows and eyelids, as if the parts were lead. Inclination to keep eyes shut. **Eyes** feel as if sunken in head and left eye occasionally waters. Twitching of outer end of left upper lid inside. Ciliary neuralgia.

Female

Leucorrhoea ceased on third and reappeared on fourth day. Itching of vulva inside and out, yellow leucorrhoea. Dragging pain in left ovary. Great weight and bearing down in pelvis like falling of the womb, as if she could not walk, worse when standing.

Food

No appetite. Great desire to eat paper.

Head

Dull pain in forehead in region of eyebrows. Heaviness in forehead. Heavy pressure in sides of head and vertex. Pulsations in head with sensation of heat in forehead and constriction across bridge of nose. Acute pain on vertex, frontal region.

Kidneys

Frequent desire to urinate, urine very pale. Obstruction in urinating, has to wait.

Limbs

Pain in right side of left wrist when using index finger. Left foot feels cold when touched by right foot. Legs ache.

Mouth

Very sore mouth. Dryness of mouth. Sensation as if tongue were scalded by a hot drink. Redness under tongue, on gums and mouth. Soreness and sensation of ulcers on tongue and roof of mouth. Loss of taste. Brassy taste in mouth. Salivation tongue enlarged and serrated at edges by teeth. Small white ulcers covering tongue and mouth.

Nose

Cannot bear the smell of clams of which she is naturally very fond and cannot eat them.

Sleep

Dreamed of earthquakes. Dullness, sleepiness, gaping. Heavy, profound sleep, not easily awakened.

Stomach

Great soreness and sensitiveness of epigastric region. After eating feels swollen, has to take off her dress and loosen clothes. Stomach sore all around just below the belt, worse left side. Occasionally very slight nausea. Heat in epigastrium.

Stool

Natural stool, but very slow in passing, at 2 a.m. Stool long, tenacious, slipping back when ceasing to strain, seeming inability of rectum to expel its contents.

Teeth

Pains in all the teeth as the hot pain from head touched them.

Temperature

Cold and heat alternately, each continuing but a short time.

Throat

Tough yellow mucus in pharynx, can not hawk it up and has to swallow it. Mucus in pharynx and throat is thick, yellow tough, stringy, expectorated with difficulty and has a sickish sweet taste.

Comments

Swan writes: "Terrible headache penetrating the left eyeball to center of brain with pain in left supra-orbital region extending through brain to right vertex". Many eye cases are on record.

Swan benefited this case: "Pain in eyes back into head, extremely sharp with a sensation as if the eyes extended back. Great photophobia: any continued glare causes the pain".

Berridge reports this: "Mr. H. 37. Left eye inflamed three weeks, deep red, photophobia, on left segment of cornea as ulcer. For three nights, pain like a knife running from left eye to left occiput, on lying down, especially on left side. Burning in left temple, near eye, worse at night. Lac-f. 40,000 c. every four hours. Eye was better next days and steadily got well. The pain ceased first."

Lac humanum

(human breast milk)

Pharmacy

Lac-h. Lac Humanum. Human Breast Milk. Historical dose: All potencies, thirtieth and the higher potencies.

History

This remedy Lac-h. is made from human breast milk. A proving was done in 1993 by Jacqueline Houghton and Elisabeth Halahan in England. In folk medicine mother's milk was used as a remedy for infant conjunctivitis. **Planets:** Moon.

Homeopathic

Lac Humanum has been used for addictions and eating disorders. Conjunctivitis. Breast disorders. Swollen breasts, before the menses. Sadness during menses. The body weight changes easily.

The hormones are out of balance. Pre-menstrual syndrome. Indifference to everything. Lack of feeling. Changeable moods. The senses are more sensitive. Flushes of heat upward.

Clinical

Addictions. Breast disorders. Conjunctivitis. Eating disorders. Pre-menstrual syndrome.

Modalities

Better from eating. Better from sex. Worse from alcohol. Worse before menses. Worse from eating.

Symptoms

MIND

Detached feelings. Indifference to everything. Lack of feeling. Indifference to suffering. Sense of isolation. Irritable. Absent-minded. Irresolution. Lack of self confidence.

Anxiety. Changeable moods. Discontented. Fastidious. Averse to company. Difficult trying to concentrate. Thoughts are disconnected. Feels relaxed and tranquil. Wringing the hands. Cursing. Automatic conduct. Unconsciousness.

Abdomen

Distention, eating aggravates. Flatulence. Sore abdomen during menses, worse from pressure. Stitching in the hypochondrium.

Back

Stiffness of back. Neck stiff and cracking on turning the head.

Breasts

Swollen breasts, before the menses. Stitching in breasts. Sensation as if the milk is coming.

Chest

Constriction and oppression. Pain from sternum to back.

Ears

Ache, stitching in left ear. Noises in the ears.

Eyes

Bloodshot. Conjunctivitis. **Eyes** feel tired. Lachrymation in the wind. As if sand is in the eye.

Face

Cracks in corner of mouth. Herpes about the lips. Jaw feels dislocated. Rash, better after menses.

Female

Sadness during menses. Menses is black and dark. Clotted blood. Menses prolonged. Bearing down pains. Sex drive increased. Leucorrhoea like cream. Leucorrhoea clear, ropy and stringy. Sharp pain in ovaries.

Food

Appetite increased. Desires sweets and starches. Desires ginger, bacon, chocolate, salt. Worse from alcohol. Increased thirst. Likes warm drinks. Thirstless.

Head

Pressure and constriction. Bursting sensation, worse left side. Hammering pain.

Heart

Constriction and oppression. Cramp in heart.

Kidneys

Copious urination during menses. Strong, offensive odor. Urine dark yellow.

Limbs

Knees are stiff, feel lame. Drops things, awkward. Sciatica on right side. Numbness of soles.

Lungs

Barking, dry cough. Loose cough with thick expectoration. Expectoration thick white and difficult to expel, tastes metallic.

Mouth

Bleeding gums. Sore tongue. Vesicles.

Nose

Coryza with clear, bland, one sided discharge. Sneezing. Itching in posterior nares. Nasal congestion on waking.

Rectum

Stools are first hard then soft. Stools, ball like, offensive and soft.

Skin

Rashes and eruptions, worse before the menses. Goose bumps. Itching.

Sleep

Many vivid dreams about babies, children and family. Dreams of disaster, war and dreams of falling.

Stomach

Sour rising. Belchings, heartburn, nausea and hiccough, worse from eating. Nausea from the smell of food. Vomiting during headache.

PAGE 949

Temperature

Lack of vital heat. Flushes of heat upward and a great feeling of relaxation.

Throat

Dryness and irritation. Sensation of a lump. Tenacious mucus in throat. Sore and raw throat. Tingling.

Vertigo

Vertigo as if intoxicated. Vertigo during headaches.

Lac vaccinum

(cow's milk)

Pharmacy

Lac-v. Lac vaccinum. Cow's milk. Dilution. Historical dose: All potencies, thirtieth.

History

Lac-v. was proved by J. C. Boardman of Trenton, New Jersey. Swan's 200c potency was used. The headaches, biliousness and constipation frequently induced by milk are well known.

Swan gives a brief proving and some cures.

The cures were: (1) Short rheumatic pains in knee and ankles on walking, passing fetid flatus.

(2), Fever at night followed by profuse sweat all over, the fever was preceded by chilly feeling, beginning at shoulders, then running up from feet to head, headache.

(3) Flat white ulcers on tongue, sensitive, covered with white slimy mucus, extending to sides of cheeks. (4) Brown crusts, having greasy appearance, especially in corners of mouth like "butter-sores." (5) Fullness of head, as if too large and heavy. (6) Vertigo. (7) Belchings and passing of much flatus. **Planets:** Moon.

Homeopathic

The keynote of Lac-c. is alternation of sides in Lac-v. the symptoms appeared on both sides at once. The headaches were well brought out in the proving. Milk frequently aggravates rheumatism and Burnett has observed that children who drink much milk after their teeth are grown become very labile to colds.

The great thirst and excessive flow of urine suggest diabetes. To these symptoms might be added the effects of milk on persons intolerant of it. The pains in chest, abdomen, hips, thighs and knees were all felt on right and left sides simultaneously.

Clinical

Albuminuria. Blindness. Diabetes. Headache. Milk intolerance. Rheumatism. Sternum, pains. Tongue, ulcers.

Symptoms

MIND

General nervousness with depression of spirits, feeling as though about to hear bad news. Mental confusion.

Abdomen

Pain proceeding from sternum, extending across abdomen about an inch below umbilicus.

Back

Pains in sacrum.

Chest

A sharp pain appeared on each side of sternum and about middle of chest with a sense of suffocation. Burning sensation in same region. Sharp pains in left lower chest. Sharp pain began in right chest.

Ears

Ears felt stopped up, felt deaf in both ears, although she could hear as before.

Eyes

Dull pain over right eye and very slight dull feeling over left eye. **Eyes** have a blur or dimness or obscurity of sight off and on for a few moments at a time. Blindness of both eyes, comes and goes.

Female

White watery leucorrhea, pain in sacrum.

Food

Thirst for cold water in quantities, drank three glasses during evening.

Head

Headache feels all over heavy, dull, aching, drowsy, wants to go to sleep. A creeping sensation or screw-like or vertical motion, began over left eye. Woke in morning with an aching pain all over head, most severe in occiput. Sensation like a fire-ball in each temple simultaneously.

Kidneys

Frequent discharge of clear urine, nearly colorless, no sediment. Urinates every fifteen minutes in large quantity each time. Urine was not increased in morning, but was dark red without sediment.

PAGE 950

Limbs

All the joints of body, especially knees, feel weak and powerless, as when half drunk. A clammy sticky coldness in both hands and both feet simultaneously. Aching pains in bones from both hip-joints to both feet, simultaneously also burning sensation in both feet.

Mouth

A dirty, yellow-coated tongue, which felt parched. Sore taste. Acid saliva staining handkerchief yellow.

Rectum

Obstinate constipation.

Sleep

Must force herself to keep awake. Must force herself to keep her eyes open, for if she shuts them she cannot avoid falling backwards. Sleepy and could have fallen asleep at any time during the whole day. General restlessness and bad dreams. Dreams of trying to lay out a corpse.

Stomach

Swelling or bloating of stomach. Sour taste, nausea, but no rising or vomiting.

Contractive, pressing pain in stomach-pit, better by external pressure.

Temperature

A slight fever over the entire body with a moisture in both hands and aching in legs from thighs to knees. Hands became hot and dry, a decided fever heat of hands. Also pain on left side of head with a chilling sensation.

Throat

Sensation of plug in throat or larynx.

Vertigo

Vertigo, falls backwards if she closes her eyes.

Lac vaccinum coagulatum

(milk curds)

Pharmacy

Lac-v-c. Lac vaccinum coagulatum. Milk Curds. Historical dose: All potencies.

History

The only use that Clarke knows as having been made of Lac-v-c. is in the nausea of pregnancy, the indication being Nausea of pregnancy with desire for food and better by drinking milk, (Chel.). **Planets:** Moon.

Clinical

Morning sickness. Nausea of pregnancy.

SOURCES

Clarke.

Lacerta agilis

(green lizard)

Pharmacy

Lacer. Lacerta agilis. Green Lizard also Large Green Spotted Lizard. N. O. Lacertilia. U. S. Tincture of whole animal. A separate preparation of the spotted lizard should be made. Historical dose: All potencies.

History

The Green Lizard is usually considered to be non-poisonous, but Baldelli, who ate a lizard cut into small pieces, developed some decided symptoms of indigestion, blisters under the tongue and skin eruptions.

A girl, bitten on the sole of the left foot by a "large green spotted lizard," died of the effects of the bite after twenty-one days of suffering. This is recorded in Allen's Appendix and comes from an American source, so it is probably an American variety of Lacerta that is accountable for this. **Planets:** Moon.

Homeopathic

Lacer. has pain, swellings, numbness, delirium with an alternating state of greatly increased mental acumen, left-sided paralysis, neck and jaw of left side rigid and muscles, tender.

Clinical

Skin, eruptions. Tongue, vesicles under.

Modalities

The symptoms of the proving were better by drinking frequently vinegar and water. Motion causes excruciating pains in bitten limb. Touch aggravates.

Symptoms

MIND

Occasional delirium. Wonderfully increased mental acumen during intervals of reason.

Relations

Antidote: vinegar.

PAGE 951

Lachesis mutus

(bushmaster snake)

Pharmacy

Lach. Lachesis muta. Bushmaster. Surukuku. Trionocephalous lachesis. N. O. Ophidia. The Surukuku Snake of South America. Trituration. Dilution. Historical dose: All potencies, 6c to 200c.

History

To the genius and the heroism of Dr. Hering the world owes this remedy. Hering's first experiments were made when he was studying the botany and zoology of the Upper Amazon for the German Government. Except his wife, all those about him were natives, who told him so much about the dreaded Surukuku that he offered a good reward for a live specimen.

At last one was brought in a bamboo box and those who brought it immediately fled along with the native servants with them.

Hering stunned the snake with a blow on the head as the box opened, then, holding its head in a forked stick, he pressed its venom out of the poison bag upon sugar of milk.

The effect of handling the virus and preparing the lower potencies was to throw Hering into a fever with tossing delirium and mania, much to his wife's dismay. Towards morning he slept and on waking his mind was clear.

He drank a little water to moisten his throat and the first question this indomitable prover asked was: "What did I do and say?" His wife remembered vividly enough. The symptoms were written down and this was the first installment of the proving of Lachesis. The natives crept back one by one next day and were astonished to find Hering and his wife alive.

The snake grows up to seven feet in length. It has fangs nearly an inch long, with a reddish brown skin marked along the back with black brown rhomboidal spots. Nearly all the provings of Lachesis were made with the 30c and higher potencies.

Homeopathic

Lachesis like other snake venoms, decomposes the blood, rendering it more fluid. Hence Lachesis has a hemorrhagic tendency that is marked. Hemorrhages, are thin, containing dark particles like charred straw, vicarious, nosebleed, bloody urine etc. Small wounds bleed much. Hemophilia.

Lach. has malignant or septic states, gangrene, diabetic, traumatic, cancer, carbuncle, diphtheria, erysipelas come under its influence. Purpura, septic states, diphtheria and other low forms of disease, when the system is thoroughly poisoned and the prostration is profound.

Great physical and mental tension. Nerves become very sensitive especially the cutaneous and vasomotor ones. High blood pressure. Manic-depression. Sensation of tension in various parts.

The modalities are most important in guiding one to the remedy. Symptoms appear on left side, then go to the right side, especially in the throat and ovaries. Left sided paralysis after a stroke or cerebral exhaustion. Awkward gait, left side weak. Symptoms can develop in sleep and the patient wakes up from symptoms, at any time day and night.

Lach. is a great female remedy. Very important during menopause and for those of a melancholic disposition. Flushes of heat, rushes of blood. The ill effects of suppressed discharges. Discharges are acrid and offensive.

Excessive sensitiveness of the surface with intolerance of touch or constriction. Cannot bear anything tight anywhere. Sensation of constriction in the throat, abdomen, head.

Ascending sensations in throat, from hot flashes, chills. Sensation of a lump in throat, abdomen, liver, rectum, etc. As if a lump rolls about in bladder. Blueness of the affected parts of hands. Excessive painfulness of throat, ulcers, spots on body. Sensation as if a skullcap. Drawing sensations in vertex, jaws, in the rectum.

Intensively rapid onset of the disease with great prostration. Intense nervous irritability with restless tossing and moving about. Hysteria. Hard throbbing or hammering pains. Neuralgic pains change locality with palpitations. As of thread drawing the part or spreading over.

Epilepsy, comes on during sleep from jealousy, onanism, loss of fluids. Dropsy from liver and spleen diseases after scarlatina. Chorea from piercing the ears.

Lach. has helped cellulitis with burning and blue color of the skin. Delirium tremens with much trembling and confusion. Trembling of the whole body of hands, tongue, etc. Catalepsy. Diphtheria paralysis and other disorders, (Botul.) Diphtheria carriers.

PAGE 952

Clinical

Albuminuria. Alcoholism. Amblyopia. Aneurysm. Appendicitis. Asthenopia. Asthma. Atheroma. Bedsores. Boils. Bubo. Bubonic plague. Cancer. Carbuncle. Catalepsy. Cecum inflammation. Chancre. Chilblains. Ciliary neuralgia. Cough. Cyanosis. Delirium tremens. Diphtheria. Dog-bite. Dropsy. Dyspepsia. Ears, disorders. Epilepsy. Erysipelas. Eyes, disorders. Fainting. Fistula lachrymalis. Flatulence. Gallstones. Gangrene.

Glanders. Gums, bleeding. Hay fever. Headache. **Heart** disorders. **Heart** burn. Hemiplegias. Hemorrhages. Hemorrhoids. Hernia. Herpes. High blood pressure. Hoarseness. Hysteria. Injuries. Intermittent fever. Jaundice. Labor, pains. Laryngismus. Laryngitis. Leprosy. Liver disorders. Locomotor ataxia. Malignant pustule. Mania. Manic-depression. Measles. Meniere's disease. Menopause. Mercury, effects. Morvan's disease. Mumps. Neuralgia. Nymphomania. Otorrhea. Ovary, disorders. Paralysis. Perspiration. Phlegmasia alba dolens. Plague. Pneumonia. Puerperal fever. Pulmonary edema. Purpura. Quinsy. Rabies. Scarletina. Sciatica. Stings. Strokes. Syphilis. Throat, sore. Trachea disorders. Traumatic fever. Tumors. Ulcers. Varicose veins. Vertigo. Vicarious menstruation. Warts. Whitlow. Wounds.

Causations

Ill effects of suppressed discharges injuries, sprains, puncture wounds, bites. Ill effects of grief, fright, vexation, anger. Jealousy, disappointed love, masturbation. Never well since menopause. Alcohol. Delirium, tremens from night-watching, over-fatigue, loss of fluids, over-study.

Constitutions

Especially suitable to alcoholics. **Planets:** Mars, Moon, Sun.

Modalities

Better appearance of discharges, warm applications, open air, belchings, hard pressure. Better from cold drinks, bathing affected part, sitting bent. Better eating, especially fruits, warm applications. Worse from sleep after sleep, morning, spring. Worse from heat of room of summer of sun. Worse from empty swallowing, liquids. Worse from slight touch or pressure of clothes, around neck, waist. Worse from suppressed discharges, at start and close of menses. Worse from menopause, alcohol, cloudy weather, standing or stopping, motion, closing eyes, hot drinks.

Symptoms

MIND

Nervous, excitable. Great loquacity, rambling, frequently jumping from one subject to another, then sadness or repeats the same thing. Delusions, thinks herself under super human control, thinks she is dead and preparations are being made for her funeral, thinks herself pursued, hated and despised.

Fears, going to sleep, lying down or fears that heart will stop. Restless, uneasy, does not want to attend to business, wants to be off somewhere all the time. Derangement of time sense. Sad in the morning, no desire to mix with the world. Aversion of women to marriage. Persistent erotic ideas without ability.

Religious insanity. (Verat., Stram.) Talks, sings, whistles, makes odd motions. Mocks. Crawls on the floor, spits often, hides, laughs or is angry during spasms. Weak memory. Mistakes are made in writing and speaking.

Mentally, worse after sleep. Insane jealousy, suspicious. (Hyos.) Mania from overstudy. Feels full of poison. Hateful. Malice. Mischievous. Predicts the future correctly.

PAGE 953

Abdomen

Tympanitic, sensitive, painful. (Bell.) Cutting pain in right side of abdomen causing fainting. Swelling in cecal region, must lie on back with knees drawn up, appendicitis. Pain from anus to navel. Abdomen hot, sensitive, painfully stiff front loin down thighs.

Back

Neck sensitive to the least pressure. Neck stiff, moves jaws with difficulty. Neuralgia of coccyx, worse rising from sitting. Feels as if sitting on something sharp, must sit perfectly still. Sensation of threads stretched from back to arms, legs, eyes, etc.

Breasts

Breasts inflamed, bluish. Nipples swollen, erect, painful to touch. Milk, thin, blue.

Ears

Ear pain with sore throat. Pulsations in ear. Hardness of hearing with lack of ear wax. Ear wax too hard, dry, like chewed paper. Blockage of eustachian tube, (Kali-m.) Tearing pain from zygoma into ear, with sore throat.

Eyes

Defective vision after diphtheria, extrinsic muscles too weak to maintain focus. Sensation as if eyes were drawn together by cords which were tied in a knot at root of nose. Blindness with lung or heart disorders. **Eyes** watery from pain. **Fistula lachrymalis with eruptions on face.** Intra-ocular hemorrhages. Feels as if eyes were forced out on pressing the throat. Dim sight. Unsteady look, eyes roll vacantly.

Face

Purple, mottled, puffed, looks swollen, bloated, jaundiced, chlorotic during heat. Pale. Pain in facial bones. Trifacial neuralgia, left side, heat running up into head. (Phos.) Tearing pain in jaw-bones. (Amphis., Phos.) Lower jaw drops during coma. Septic mumps. Flushes of heat. Enormous swelling of lips.

Female

Menopausal troubles, like palpitations, hot flashes, hemorrhages, vertex headache, fainting spells, worse pressure of clothes. Uterine and ovarian pains, all relieved by the flow, (Eupion.) Acts especially well at beginning and close of menstruation. Menses too short too feeble. Menses, black, scanty, lumpy, acrid, vicarious from nose. Less the flow more the pain. Dysmenorrhea, on first day. Desire to go in open air and run about before menses. Ovarian tumors. Left ovary, swollen indurated, painful, must lift covers. Uterus feels as if the os is open. Nymphomania. Leucorrhoea, copious, smarting, staining and stiffening the linen greenish.

Food

Desires for alcohol, wine, oysters. Craving for coffee which agrees. Hungry, cannot wait for food or loss of hunger alternately. Hungry, cannot wait for food. Better after eating, especially after fruit. The throat symptoms are worse by hot drinks. Thirsty but fears to drink.

Head

Headache, heavy, bursting, down to nose, side (right) feels cut off. Migraine, pain extending to neck and shoulders. Pain through head on awaking. Pain at root of nose. Weight, pressure or burning of the vertex. Waves of pain, worse after moving. Sun headaches with glimmering of vision. Headaches with flickerings, dim vision, very pale face. Falling of hair especially during pregnancy. Does not want hair touched. Perforating tumor of the skull.

Heart

Palpitations with fainting spells, during menopause. Anxiety about the heart. Constricted feeling causing palpitations with anxiety. Cyanosis. Irregular beats. Restless, trembling.

Heart, weak, turns over or too big. As if heart were hanging by a thread. Cyanosis neonatorum. Senile arteriosclerosis. Carditis. Pulse, weak intermittent, slow, irregular.

Kidneys

As of a ball rolling in the bladder when turning over. Bloody urine. Urine, frequent, foamy, dark. Small tumor in urethra causing retention. No urine, no stool.

PAGE 954

Limbs

Sciatica, right side, better lying down. Pain in tibia after sore throat. Shortening of tendons. Swollen glands in axilla. Garlic odor of sweat in axilla. Left arm numb, finger tips numb. Trembling of hands in alcoholics. Felon, bluish swelling. Tingling, pricking in left hand. Cracks in skin at the corners of nails. Knees cold or as if hot air is going through. Foot sweat, foul or cold. Sciatica, must lie still, worse by least motion. Toes feel broken. Pain in the shin bones in disorders of throat. Cramps in calves from fear.

Phlegmasia alba dolens.

Liver

Hepatitis and abscess. Septic gall bladder. Liver region sensitive. Sore festering, throb deep in liver, cannot bear anything around waist.

Lungs

Upper part of windpipe very susceptible to touch. Sensation of suffocation and strangulation on lying down, particularly when anything is around throat, compels patient to spring from bed and rush for open window. Feels he must take a deep breath. Cramp-like distress in precordial region. Cough, dry, suffocative fits, tickling. Little secretion and much sensitiveness, worse pressure on larynx after sleep, open air. Cough during sleep without being conscious of it. Breathing almost stops on falling asleep. (Grind.) Sensation as of a plug (Anac.) which moves up and down with a short cough. Last stage of pneumonia. Abscess of the lungs. Expectoration, frothy, purulent, difficult, bloody with excessive perspiration.

Male

Strong sexual desire without physical power. During sex the emission is tardy or does not occur at all. Lascivious ideas without erection of penis. Prepuce thickened. Semen with pungent odor. Ill effects of masturbation. Cheerful after night emission.

Mouth

Aphthous and denuded spots with burning and rawness. Gums, bluish, swollen, spongy, easily bleeding. Tongue swollen, burns, trembles, red, dry and cracked at tip, catches on teeth. Bad odor from mouth. Much thick, pasty saliva. Thick blundering speech, cannot open mouth wide. Peppery, sour, taste. Nauseous taste. Cannot bear anything before mouth. Toothache, pain extends to ears. Chattering of teeth. Teeth feel too long. Sudden forcible protrusion and retraction of tongue.

Nose

Discharge with every cough. Stopped up coryza. Nosebleeds with amenorrhea. Nosebleed on blowing the nose. Blood and pus from nose. Nostrils sensitive. Coryza, preceded by headache. Hay asthma, paroxysms of sneezing. (Sil., Sabad.) Red pimples on nose (rum blossom) of alcoholics. Cannot bear anything before nose.

Rectum

Constipated offensive stool. Constipation of pregnancy. Anus feels tight, as if nothing could go through it. Pain darting up the rectum every time he sneezes or coughs. Hemorrhage from bowels like charred straw, black particles. Hemorrhoids protrude, become constricted, purplish, stitches in them on sneezing or coughing. Constant urging in rectum, not for stool. Offensive stools. Beating in the anus as from hammers with menses. As of a ball, rolling when turning over. Diarrhea from fruits and acids.

Sensations

As if frightened by visions behind him, as if knives were being thrust into brow, as if tongue bound or tied up, as if a part of right side of head cut away. As if heart hanging by a thread and every beat would tear it off, as though heart turned over and ceased beating for a moment, as if heart hadn't room to beat. As if neck constricted with a cord.

Skin

Hot perspiration. Bluish, purplish appearance. Boils, carbuncles, ulcers with bluish, purple surroundings. Dark blisters. Bed-sores with black edges. Blue-black swellings.

PAGE 955

Purpura with intense prostration. Senile erysipelas. Wens. Cellulitis. Fungoid ulcers. Varicose ulcers. Pyemia, dissecting wounds. Scars, redden, hurt, break open and bleed. Capillaries dilated. Small wounds bleed much.

Sleep

Sudden starting when falling asleep. Sleepiness, yet cannot sleep. (Bell., Op.) Wide-awake in evening. Sleeps into aggravation. Sleeplessness from cerebral irritation of alcoholics. Frightful dreams of snakes. Children toss about moaning in sleep. Sleepiness yet cannot sleep.

Stomach

Any food causes distress. Pit of stomach painful to touch. Gnawing pressure in stomach better by eating, but returning in few hours (cancer). Soreness or cramp in epigastrium. Trembling movement in the epigastric region. Vomits during menses with headache. Belchings, before epilepsy, at menses. Nausea, comes on after going to bed after drinking ice water.

Temperature

Chill worse drinking with sweat. Heat, on vertex in flushes, on waking, on falling to sleep. Sweat, about neck during sleep in axilla. Chilly in back, feet icy cold, hot flushes and hot perspiration. Paroxysm returns after acids. Intermittent fever every spring.

Throat

Purple, livid color of throat. Sore throats, began on the left side. Sore throats, worse left side, swallowing liquids. Throat pain extends to ear. Collar and neck-band must be very loose. Diphtheria, membrane dusky, black, pain aggravated by hot drinks. Chronic sore throat with much hawking, mucus sticks. Tonsillitis. Tonsils purplish. Quinsy. Septic parotiditis. Constriction, better eating. Choking. Cannot swallow sweet or acrid things. Feeling as if something was swollen which must be swallowed, worse swallowing saliva or liquids. As of a lump in throat, ascending and is swallowed back again. As of hot lump or soft body or crumb of bread. Throat pit feels swollen or sore spot back of pit. As of a skin hanging in or a valve in larynx.

As of a plug moving up and down with cough. Larynx painful to touch. Loss of voice from paralysis of vocal cords or edema.

Vertigo

Vertigo. Relieved by onset of a discharge (menses or nasal catarrh). Vertigo, worse turning to right, closing eyes, looking at the one and same object from walking in open air. Fainting with pain in heart, nausea, pale face, vertigo.

Comments

The four main characteristics of Lach. are: (1) Aggravated by sleep. (2) Excessive sensitiveness of the surface with intolerance to touch or constriction. (3) Left-sided and the direction left to right, symptoms begin on the left side and either remain there or proceed to the right.

(4) Better from the onset of a discharge. There is a headache which is better as soon as nasal catarrh comes on. Uterine pains are better as soon as menses appear. Worse from non-appearance of an expected discharge and it is this which is the foundation of Lach. to the menopausal state.

Wherever one or more of these features is prominent in any case Lach. Will most likely prove the remedy. Homeopathic literature abounds with illustrations of the first named, worse from sleep.

An illustration from Nash: An old syphilitic patient suffered from obstinate constipation and was taken with severe attacks of colic. The pains seemed to extend all through the abdomen and always came on at night. The man was not making any progress, when one day he remarked to Nash, "Doctor, if I could only keep awake I would never have another attack."

And in response to an inquiring look from the doctor, he added, "I mean that I sleep into the attack and waken in it." He never had another. One dose of Lach. 200c cured the colic and the constipation too.

"Sleeps into an aggravation, worse after sleep whether by day or by night, as soon as he falls asleep the breathing stops"

PAGE 956

The hemorrhages of Lachesis have this peculiarity, the fluid contains flakes of decomposed blood looking like charred wheat straw. Uterine hemorrhage and hemorrhages in typhoid fever presenting these characters will find their remedy in Lach.

The sensitiveness to contact of Lach. is not so much on account of pain or aggravation of pain, as on account of the uneasiness it causes. In uterine disorders, the patient wants to lift clothes up to prevent contact with the lower abdomen. Touching the throat in laryngeal disorders causes suffocative spasms.

A minor characteristic of Lach. is pain in the shin bones. Much pain in shin bones of an aching kind only. This has been frequently verified, but W. J. Guernsey has pointed out that when such pains occur concomitantly with throat affections, Lach. is specific. This has been confirmed. Guernsey remarks that in such cases it will always be found that the throat affection is worse on left side or commenced on left side.

Persons who have peculiar sensitiveness of the surface of the body. Women who have never been well since the change of life. Debilitated, weakened persons. Thin rather than fat persons, persons who have been changed both mentally and physically by their illness. Alcoholics. Sufferers from effect of masturbation. Persons who have been overdosed with Mercury and for syphilitic disorders. Children and elderly people. Persons who cannot stand the sun and who are worse in summer weather.

The delirium of Lach. is of the low, muttering type, at times the patient sinks into a torpid state with cold limbs, tremor of body and hands, tremor of tongue. Tremor of tongue is a leading feature of many Lach. states. It not only trembles, but it catches in the teeth or lower lip when the patient attempts to put it out.

The mind is profoundly disturbed. There are rapidly alternating states: Exalted powers, rapid succession of ideas and again there is weak memory. Frequent mistakes in writing. Mental confusion. Frantic loquacity, jumps from one subject to another is a strong characteristic. Talks, sings or whistles constantly, makes odd motions with arms. Insane jealousy. Intense sadness and anxiety. Irritable, irascible, peevish, malicious.

Fainting fits and vertigo on closing eyes, on looking intently at any object in morning on waking. Rush of blood to head. Sun-headaches. Headache with very pale face. Throbbing headaches in temple with heat of head. Headache extending into nose, better when nasal catarrh comes on.

Cases of rabies have been cured with Lach., the thirst, spasms, sensitiveness and nervous prostration closely corresponding to the symptoms of rabies. Fainting accompanying other complaints is an indication for Lach.: with pain at heart with nausea with vertigo and pale face. Catalepsy. Awkward gait, left side weak. Gressus gallinaceus.

Disturbances of sight and hearing are numerous. Clarke had frequently cured with it noises in the ears when worse after sleep. In hay fever it is the remedy when there is headache extending into nose worse on suppression of the discharge, which may occur in sleep or when the paroxysms are worse after sleep. Sore nostrils and lips. Pus and blood from nose. Red nose of alcoholics.

Dark red eruptions, purplish swellings, black and blue spots are characteristic of Lach. Ulcer sensitive to least touch. Small ulcers.

The throat is a special seat of the Lachesis action. Sore throats of all descriptions come within its range, provided some of the characteristics are present: worse after sleep, by touch. Symptoms are worse left side or proceeding from left to right. Cannot bear any pressure about neck.

Empty swallowing is agonizing, liquids are swallowed with less pain and solids with the least pain. Diphtheria, mercurial and syphilitic sore throat. Fetid breath. The prostration is out of all proportion to the appearance of the throat.

Lach. has sinking in the stomach and cannot go long without food. Unquenchable thirst. Desires: oysters, wine, coffee (coffee agrees). Symptoms are better after eating, especially after fruit. The throat symptoms are worse by hot drinks. Nausea always after drinking. Everything sours, heartburn. Alcoholic drinks aggravates.

Although Lach. is a left-side medicine, it has a powerful action on the liver as well as the spleen. "Acute pain in liver extending towards stomach.

Lach. is also one of the most prominent remedies in appendicitis. The general characteristics will guide here. Buboes. Lach. And Naja have had the greatest success of all homeopathic remedies in the recent epidemics of Plague in India.

The bladder and rectum are most painfully affected. There is a very characteristic symptom in the bladder: Sensation as if a ball were rolling loose in the bladder or abdomen on turning over. The urine is almost black, frequent, foaming, dark.

The patient always has to urinate after lying down, day or night, especially after sleep, more frequent in the night. Urine has little black spots or flakes like soot floating in it. (H. N. Martin).

Stitches in kidneys. The ball sensation occurs elsewhere: as if a ball or lump or button in throat, as if two balls threatened to close the throat, as if a ball rose from abdomen to throat, as if a plug were in anus.

Many severe and characteristic symptoms appear in rectum and anus. Diarrhea is fetid, cadaverous. Atony of rectum. There is also constipation. Painful hemorrhoids. Visible spasmodic tenesmus in paroxysms from two to five minutes, extorting cries, passes blood and mucus.

Painful constriction of anus followed by collapse. Hemorrhoids with scanty menses. Burning in rectum. Stitch in rectum (upwards) when coughing or sneezing. Tugging upward sensation as from a mouse. Full feeling in rectum and sensation as of little hammers beating.

Both ovaries are affected, but principally the left, swelling induration, tumors. Menses regular but scanty, pains better when flow is established. In a case of Clarke's, Lach. 12c postponed the menses for a week. Many symptoms occur in connection with menses.

The breasts are affected. Obstinate and distressing eruptions appear on the nipples and areola of a middle-aged woman after a dose of Lach. In high potency. Cancer of the breast when assuming a bluish appearance will be helped by Lach. Lochia are thin, ichorous insufficient. Milk thin, blue, nipples extremely sensitive to touch.

In the respiratory sphere the sensitiveness of the parts to touch, constriction and worse by anything tight around neck are the ruling conditions. Tickling, irritating cough. The least thing coming near mouth or nose interferes with breathing. Sleeps into an attack of asthma. Threatened paralysis of lungs. The heart feels too large, cramp-like pain in precordia. Constriction. Palpitations with numbness down arm. Cyanosis. Varicose veins.

Lach. is one of the remedies for "griddle pain" as if burnt or scalded in different parts. Burning sensation and pains are a leading feature throughout this remedy. Lach. is called for in many kinds of fever, particularly intermittents after abuse of Quinine.

Compare

(1) Puls. - menstrual cough, menses scanty, but pain worse as flow increases.

- (2) Con., Graph. - scanty menses.
- (3) Anthr. - carbuncles, boils.
- (4) Terebe., Kali-bi. - tongue glazed and shining, Apis, Lach.
- (5) Phos., Sulph. and Mur-ac. - piles during menses.
- (6) Bell. and Dulc. - paralysis of lungs.
- (7) Iris-t. - appendicitis.
- (8) Ph-ac. - disappointed love.

PAGE 958

- (9) Lyssin, Sabad. - throat affected left to right, Sabad., more chronic.
- (10) Cotyledon - menopausal troubles. Nat-m., Nit-ac., Crot-h.
- (11) Amphibena, snake lizard - right jaw swollen and painful, sharp pains, headaches, sharp pains. Eruption of vesicles and pimples.
- (12) Naja, Elaps., Crot-h., Lepidium.
- (13) Nux m. - cough of pregnancy, Lach. has a cough at menstrual period when it is going off.
- (14) Staph. - on swallowing, pain runs externally along parotid gland to the ears, perspiration impossible.
- (15) Sil., Caul., Sul., Ust. and Vib. - left ovarian and left inframammary pain.

Relations

Antidote to: Ars., Merc., Radiate heat outwardly, alcohol inwardly, salt on the effects of bite. Antidotes to potencies: Alum., Bell., Cocc., Coff., Hep., Merc., Nit-ac., Nux-v., Ph-ac., to the visible spasmodic tenesmus of rectum, Sep. According to Teste the chief antidote is Cedron. It antidotes: Bufo, Crot-h., Rhus. Complementary: Crotalus cascavella often completes curative work of Lach. Also Lyc., Hep., Salamandra. Incompatible: Acet-ac., Am-c., Carb-ac.

SOURCES

Boericke. Clarke. Phatak.

Lachnanthes tinctoria

(spirit weed)

Pharmacy

Lachn. Lachnanthes tinctoria. Spirit-weed. N. O. Hemodoraceae. Tincture of whole plant. Historical dose: Tincture and all potencies, third potency. Tincture in tuberculosis.

Herbal

Lachnanthes is a herb, growing in sandy swamps near the coast. The root is red and fibrous, leaves sword-shaped, stem hairy, flowers yellow, woolly. It belongs to the same order as Aletris and is allied to the Irises.

A curious observation is that the white pigs and sheep of Virginia lose their hoofs if they feed on Lachn., while the black varieties eat it without inconvenience. The loquacity of Lachn. is remarkable.

Hering says the Indians chew the plant when they meet the white man to give them a flow of language. Lachn. has been used with success in diphtheria, typhoid fever, typhoid pneumonia. **Planets:** Saturn, Mercury.

Homeopathic

Lachn. has an affinity for the head, chest and circulation. A remedy for torticollis and rheumatic symptoms about neck. Stiffness of neck, drawn over to one side in sore throat. Pain in nape as if dislocated, when turning the neck or bending the head back. Wry neck. Very restless, throws herself about, feels weak. Body icy cold, face yellow, tendency to sweat. Tuberculosis. Produces a desire to talk a flow of language and the courage to make a speech. Bubbling and boiling about the heart, rising to head. Bridge of nose feels pinched. Feeling of icy coldness in mid scapular region.

Clinical

Cough, Diphtheria. Headache. **Heart**, heat in, pains in. Pneumonia, typhoid. Sore throat. Stiff-neck. Torticollis. Tuberculosis. Wry-neck.

Symptoms

MIND

Restlessness tosses about (during perspiration). Great loquacity afterwards stupid and irritable. Ill-humored and sleepy. Great hilarity (evening). Became much excited over a trifle. Loquacious delirium with brilliant eyes and circumscribed red cheeks.

Abdomen

Rolling of wind in abdomen and discharge of flatulency. Sensation of heat through abdomen.

Back

Burning in right scapula. Chilliness between the shoulder blades, pain and stiffness in back. Sensation between the shoulder-blades as if wet with cold perspiration. Burning in region of left kidney, extending towards right side. Burning in spine above sacrum.

Bladder

Pressure on bladder while urinating.

PAGE 959

Chest

Sensation of fullness in chest is compelled to inhale deeply. Stitches, left side of chest. Stitches under right breast and under clavicle.

Ears

Singing in ear when walking in open air. Tearing in ears. Crawling and itching in ears. Itching or tingling in ears, better by boring with the finger, but immediately returning and feeling as if something had closed ear. Almost complete deafness during fever.

Eyes

Obscuration of sight, as if a cloud were before the eyes. Pressing in eyes as from dust. **Secretion of white mucus** from eyes. Sensation of twitching in upper eyelids. Violent lachrymation and burning of eyes, sensation of dryness. **Eyes** feel heavy, as if they could not be kept open. Looks with fixed eyes. Yellow spots before eyes. Bright, sparkling eyes with delirium.

Face

Face swollen with redness and blueness under eyes. Pale, sickly countenance, face and lips bluish, eyes dull, feel thick and cold. Circumscribed redness of face with violent

delirium and brilliant eyes. Redness of face, yellow face. Sensation as if something were crawling over face.

Female

Menses too early, blood viscid, mixed with mucus. During menses, sensation of distention of abdomen, it feels as if it were boiling. Menstrual blood profuse, bright red.

Food

Aversion to meat. Much thirst.

Head

Head feels heavy. Right-sided pain, extending down to jaw, head feels enlarged, worse least noise. Scalp painful. Sleepless. Circumscribed red cheeks, scalp feels sore, as if hair was standing on end, burning in palms and soles. Bridge of nose feels as if pinched.

Heart

Sensation of heat in region of heart. Stitches in heart with anxiety. Frequent violent pulsations of heart, each beat is double, one hard and full, the other soft and small. Trembling of heart with great debility. Stitches in heart with anxiety. Sensation of heat-bubbling and boiling around heart region, rising to head.

Male

Violent burning in left half of the scrotum, drawing toward right side. Tingling and itching of scrotum. Perspiration of scrotum and penis.

Mouth

Saliva of tough mucus. Swelling and tension of the lips. Lips red. Sensation if the mouth were sore and thick.

Limbs

Tearing from the shoulder, extending to finger-joints. Thumb and index-finger feel as if sprained. Tearing in elbow-joints. Tearing in knuckles of the middle fingers of the right hand. Burning of palms and soles. Cramps in the feet during night.

Lungs

Cough worse in bed and after sleeping. Cough dry, as if it came from larynx with sore throat. Expectoration streaked with blood with severe pain in chest, (pneumonia).

Neck

Stiff neck, the head is drawn to one side. Drawn over to one side in sore throat. Rheumatism of the neck. Stiffness of neck. Pain in nape, as if dislocated.

Nose

The nose bleeds profusely, the blood is pale. Bridge of nose feels as if pinched.

Rectum

Continuous stitch in rectum. Frequent stool, passes much wind. Frequent unsuccessful desire to evacuate.

Sensations

As if head enlarged, as if split open with a wedge, vertex as if enlarged, as if hair standing on end. As if a cloud before eyes, pressing as from dust in eyes. As if some thing had closed ear. Bridge of nose as if pinched. As of something crawling over face.

Skin

Sensation in skin as if an eruption would appear. Pimples appears here and there, containing a watery fluid. Itching and burning in the skin all night, worse after scratching. Stinging, itching and tingling on thighs, legs, feet, arms.

Sleep

Sleepiness with yawning, eyes feel so heavy that she cannot keep them open. Sleepless or restless sleep with distressing dreams. Cannot go to sleep easily. After waking and stretching, a shock followed by chilliness and goose bumps all over.

PAGE 960

Stomach

Sensation of qualmishness above navel, when walking in open air. In pit of stomach, beating as from a pulse, as if a hammer were beating on an ulcerated spot. Fullness in pit of stomach.

Teeth

Pain in all the teeth when eating or drinking warm things. All the teeth feel loose and too long, worse in bed.

Temperature

Flashes of heat alternating with chilliness. Continuous chilliness. Feels hot, but the chills run all over her before the heat can develop itself. Icy coldness of body. Fever with violent delirium and brilliant eyes. Fever with somnolency. Perspires freely after midnight. The skin is cold, damp and clammy during the coldness. Icy cold perspiration, principally on forehead.

Throat

Great dryness in throat, especially on awaking during the night with much coughing. Sore throat with short cough. When swallowing, itching. Sensation of swelling in pharynx with stiffness of neck and head drawn to one side (diphtheria).

Vertigo

Giddiness in the head with sensation of heat in chest and around heart and perspiration. Giddiness with icy coldness of the forehead.

Comments

The head, the chest and the circulation seem most prominently affected by Lachn. There are headaches of great intensity, right-sided, as if split open with a wedge with icy coldness of body, crying spells, worse by vomiting. In the chest there are sharp stitches in quick succession in right side of chest below mamma.

A peculiar symptom is: Sensation of heat, bubbling and boiling in chest and region of heart, rising to head, giddy, breaks out into perspiration. Trembling of heart. There is also burning of palms and soles and burning under nail of left toe.

On the other hand, there is much coldness and chilliness. Continued chilliness. Sensation as if a piece of ice was lying on back between shoulders, then a shock followed by coldness over whole body with goose bumps.

These attacks occur on moving, better after going to bed. Cannot get warm under a feather bed. A hot flat-iron better icy coldness of body. Lachn. has been largely used in cases of tuberculosis often empirically.

Arthur Dalzell reports these cases: (I) Mrs. B., 43, fibroid tuberculosis of both lungs, collapse of right lower lobe. Great prostration. and night-sweats. The bowels are alternately relaxed and confined. Pain and stiffness in back, bruised all over, dry cough, roughness of throat, heart-sounds weak. Sleep bad owing to cough. Lachn. tincture, three drops every four hours.

In three days the prostration was diminished and the cough was much Better night-sweats and bruised feeling gone. From this time an emulsion containing cod-liver oil,

liquor pancreaticus, eggs, cream and hypophosphites and oil of Eucalyptus were given in addition. The case went on to recovery.

(2) Mrs. R., 45 in last stage of tuberculosis. Right lung consolidated, left in cavities. This patient had circumscribed flush on face, brilliant eyes, throat rough, felt bruised all over. Remittent fever. Skin dry, except at night, when she had profuse perspiration. Constant dry cough. Muco-purulent expectoration. Lachn. tincture, five drops every three hours, relieved all the symptoms and procured euthanasia, the patient dying quite easily twelve days later.

Toothache is worse eating and drinking warm things. With fever there is loquacious delirium, brilliant eyes and circumscribed red cheeks (there is also a blueness about face, blue under eyes, blue lips). During the cold sensation the skin is damp and clammy.

A peculiar symptom is stiffness of the neck, the head being twisted to one (right) side. This occurring in connection with sore throat is a strong indication. There is much dryness of throat, which is worse on waking in the night with coughing.

Compare

(1) Dulc., Bry., Puls.

(2) Fel tauri - nape of neck pains and great tension there.

Lacticum acidum

(lacticum acidum)

Pharmacy

Lac-ac. Lactis acidum. Lactic Acid. Milk Acid. Dilution. Historical dose: Tincture and all potencies, third to thirtieth potency.

History

Lactic acid was discovered by Scheele in sour milk, the result of the spontaneous fermentation of sugar of milk, under the influence of casein. It is also met with in many vegetable products which have turned sour. (Hering).

Reisig introduced it into homeopathy. Locally used in the tuberculous ulceration of vocal cords. Six to ten drops in a small glass of water in acute gastro-enteritis (Cartier).

Homeopathic

Lactic acid is a valuable remedy for morning sickness, diabetes, rheumatic affections, breast troubles. Morning sickness, diabetes and rheumatism offer a field for this remedy. Troubles in the breasts. Weakness, as if from exercise with rheumatic pains in the bones. Debility, weariness of the limbs. Aversion to exercise.

Fullness or lump like puff ball in throat. Rheumatic pains in joints, knees, worse by motion. Flying pains in the limbs. Trembling of whole body, while walking. Frequent passing of large quantities of saccharine urine. Hot acrid belchings, worse smoking. Salivation, water brash. Sweaty feet.

Clinical

Bones, swelling. Diabetes. Foot-sweat. Indigestion. Pregnancy, sickness. Rheumatism. Sciatica. Throat, constricted, sore. Vomiting.

Constitutions

It is suited to anemic, pale women. Large doses disagreed with melancholic, choleric constitution, dark hair and eyes. **Planets:** Moon, Saturn.

Symptoms

MIND

Great discouragement. Lazy. Sarcastic. Memory lost.

Back

Pain in small of back, extending into shoulders. Sore aching in lower-part of back, worse when walking.

Breasts

Pain in breasts with enlargement of axillary glands.

Chest

Left side of chest sore and painful. Cutting or sticking pain in upper third of right side.

Ears

Disturbed and troubled by noise. Roaring in left ear on rising in afternoon, singing, snapping in left ear. Pain from parotids into ear, stiff feeling in parotids.

Eyes

Sensation of fullness in eyes with headache. **Eyes** feel as if they would burst. Photophobia. Jerking of left upper lid. Marked protrusion of eyes, pupils dilated, eyes feel tired. Hyperesthesia of retina, steady aching in and behind eyeball.

Face

Face flushed or congested from headache.

Female

Aching pain in region of right ovary, worse by rapid walking or exercise. Menses: scanty, more profuse than usual, pain in small of back and lower abdomen, itching of vulva during flow. Leucorrhoea, staining linen yellow, when checked nasal catarrh ensues. Pain as if menstruating, sitting with feet high lessens uterine soreness. During pregnancy: morning sickness, salivation, nausea and vomiting, water brash better by breakfast.

Food

Appetite impaired. Voracious appetite and great thirst. Nausea, on waking better by eating in diabetes or pregnancy.

Head

Congestion of head, painless with strong pulsation of vessels of neck. Headache with sensation of fullness in vertex. Dull pain in forehead, just over eyes and extending into eyes. Pain in head and back all night. Pain in occiput and alternating between there and forehead.

Kidneys

Frequent desire to urinate large quantities. Saccharine. Frequent pain in kidneys. Urinates day and night, the attempt to retain it causes pain.

PAGE 962

Limbs

Weakness as if from exercise with rheumatic pains in the bones. Debility, weariness of the limbs. Aversion to exercise. Rheumatic pain in joints and shoulders, wrists, knees

with much weakness. Trembling of whole body while walking. Limbs feel chilly. Joints swollen, not tender, stiff. Severe, sharp pains in joints. All pains worse by movement.

Lungs

Spasmodic, ringing cough, caused by irritation in throat. Hoarse, hard, dry cough with dryness of glottis.

Male

Annoying erections in morning, but loins ache too much to attempt sex. Seminal emissions three successive nights.

Mouth

Canker sores. Copious salivation and water-brash. Mouth and fauces very dry and hot. Very sore mouth. Much saliva in mouth, tasting salty. Copious salivation (pregnancy). Bad taste in mouth. Acrid taste with nausea, sour, coppery.

Nose

Great sensitiveness of smell. Nose-bleed every morning. Severe coryza, stopped nose, sneezing, thick mucus from head to throat, yellow, dead sweet taste.

Rectum

Aching pain in anus. Soft, mushy stool, diarrhea. Greenish yellow stools with tenesmus. Very costive, stool once a week, hard, black.

Skin

Skin harsh and dry, no sweat. Red spots or blotches on various parts of the body, particularly thighs and lower limbs. Itching and burning, worse by cold.

Sleep

Restless all night. Does not sleep well.

Stomach

Nausea, morning sickness, especially in pale, anemic women. Nausea on rising in morning. Nausea after breakfast, not severe, but very persistent. Nausea, better from eating. Hot, acrid belchings. Burning, hot gas from stomach to throat, causing profuse secretion of tenacious mucus, worse smoking. Food sours. Burning and weight in stomach. Constant nausea, persisting for days.

Nausea with water brash or vomiting.

Temperature

Cold and chilly at times. Flashes of heat. Chilly, mostly on limbs. Unusual perspiration of feet. Copious perspiration.

Tongue

Tongue dry, parched. Tongue coated thick white. Yellow coating on tongue with bad taste in morning. Tongue sore on left side, raw and red, dry, parched, sticky.

Throat

Dryness and rawness, extending to larynx. Aphonia. Hoarseness. Keeps swallowing. Fullness or lump like a puff ball. Sensation of a plug in the throat. Intense burning in throat, fauces and esophagus worse by eructation. Sense of constriction low down in throat, rough and dry. Fauces hot, dry and swollen. Excessive hawking with or without nausea.

Vertigo

Vertigo when turning head suddenly, worse with heat, on rising, on stooping, at night.

Comments

Lactic acid has been proved in both the lower and higher potencies, but many valuable observations have been made on patients taking substantial doses for diabetes.

In these cases the symptoms of rheumatic fever were directly traced to the acid. Pain, swelling and stiffness and tenderness of joints worse by motion (as with Bry., which antidotes Lac-ac.) and flying pains about limbs.

One prover had pain along the right sciatic nerve. The well-known effects of milk that has soured on the stomach and remained undigested were produced. Nausea, vomiting, burning and sense of weight and these have all proved useful indications in the homeopathic use of the drug.

Diabetes is the affection for which it has been most given in old. School practice, but it has also proved of great power in this affection in the homeopathic potencies.

Nash regards the concomitance of rheumatic pains as the chief guiding symptom here.
PAGE 963

Nash records a case of diabetes with rheumatic fever supervening, cured with Lac-ac. 200c.

But nausea is no less a guide: Constant nausea, nausea on awaking, before rising, better by eating. This may occur in diabetes or it may occur in pregnancy. It is also an indication when occurring in rheumatism. There is better by belchings and worse by smoking. Smoking worse belchings. Copious foot-sweat is a feature of Lac-ac., but it is not offensive.

Compare

(1) Sarcolactic acid.

(2) Lith., Ph-ac. Lac-c., Lac-coag., Lac-d., Sacch-l.

(3) In nausea of pregnancy, Nux-v., Puls., Ph-ac., Colch., Lyc., Lac-d.

(4) Ip. - excessive hawking with or without nausea.

(5) Caust. - phlegm in throat, cannot be hawked up, causing nausea.

(6) Diabetes, Ph-ac., Acet-ac., Lac-d., Uran-n.

(7) Flying rheumatism, Puls., Rhus-t.

(8) Great discouragement, Psor.

Relations

Antidoted by: Bry. (relieved sharp pains upper third right side, but soreness remained).

Incompatible: Coffee worse symptoms.

SOURCES

Boericke. Clarke. Phatak.

Lac vaccinum flos

(milk cream)

Pharmacy

Lac-v-f. Lactis vaccini flos. Milk Cream. Dilutions. Historical dose: Tincture and all potencies.

History

Many persons can take cream who cannot tolerate milk and vice versa, therefore Swan decided to prove the different parts of milk independently. As with the other Lac preparations, a large number of the symptoms were manifested in the throat and female sexual organs. **Planets:** Moon.

Homeopathic

Lac-v-f. has a dry throat and extreme difficulty of swallowing. Menses profuse and accompanied by cramps.

Clinical

Diphtheria. Leucorrhoea. Menorrhagia. Throat, sore.

Symptoms

Abdomen

Tendency to flatulence in lower intestines.

Female

Menses seven days too soon. Menses profuse, cramps in and above region of navel, bending her double during the cramps was very cold and, although well clothed, could not get warm, painful, frequent and profuse diarrhoea, Ars. stopped the pains and the menses, Lac Deflor. restored the menses and they ceased naturally, since then, albuminous leucorrhoea like white of egg, if she walks much or is on her feet much. Sexual desire easily excited when the hand touches the bosom.

Food

Food tastes as if it lacked salt.

Kidneys

Urine appears to stain more yellow.

Limbs

Rigidity on posterior side of lower legs, just below knees, while walking, very unpleasant, but not painful.

Lungs

Sensation of shallow breathing, has to take a deep respiration to relieve.

Male

Soreness of end of prepuce, as if there were longitudinal cracks there, though none could be discovered.

Skin

Itching of body above pubes and hips, on abdomen, chest and back without eruption.

Sleep

Horrible dreams, saw a dead person in a coffin, slept and dreamed the same dreams, feels stupid, does not care to speak. Wakefulness without restlessness. Drowsy and sleepy, head feels heavy. Constant talking during sleep.

Throat

Hoarseness after singing. Dryness and redness of upper part of pharynx. Increased redness and soreness of upper part of pharynx, worse at night, causing difficulty of deglutition, obliging her to bend the head forwards on swallowing, so as to favor it, otherwise a pain runs up to ears. Great dryness of upper part of pharynx in the morning, difficult deglutition, yellow mucus with a sickish sweet taste, throat worse night and morning, at night had to take hold of throat to assist in swallowing.

PAGE 964

Compare

(1) Lac-c., Lac-f., Lac-v., Lac-coag., Lac-d.

(2) Ars. stopped abruptly the excessive menses and accompanying pain, Lac-d. restored the flow and then they ceased naturally.

Lactuca virosa

(wild lettuce)

Pharmacy

Lact. *Lactuca virosa*. Acrid Lettuce. Poison Lettuce. Opium Lettuce. Also, *Lactuca sativa*. Garden Lettuce. N. O. Compositae. Genus, Cicoraceae. Tincture of fresh flowering plant Specimens of both *Lactuca vir.* and *Lactuca sat.* might be included in the tincture. Tincture of impissated juice, "Lactucarium" or Lettuce Opium. Historical dose: Tincture and all potencies.

Herbal

The leaves of garden lettuce, *Lactuca sativa*, when too old and going to seed, have a bitter taste and the stalk then contains a milky juice which is intensely bitter. This juice contains Lactucin and is common to all lettuces, but is especially virulent in left *vir.* from which (as well as well as from *Lact. sat.*) Lactucarium or "Lettuce Opium," is prepared.

Lactuca sativa has a soporific action and is used "instead of Opium to allay cough, quiet nervousness and induce sleep in cases where from idiosyncrasy, Opium is not borne" (Brunton). This use of lettuces has been known from very remote times and has not been added to by old-school observers. The sleep-provoking power of *Lactuca* are recognizably sensitive persons who eat ordinary garden lettuce in salad. **Planets:** Moon.

Homeopathic

Lactuca virosa seems to be a true galactagogue increases the milk in breasts. This remedy also acts upon the brain and circulatory system. Delirium tremens with sleeplessness, coldness and tremor. hydrothorax and ascites. Impotence. Sense of lightness and tightness affecting whole body, especially chest. Marked action on limbs.

Clinical

Angina pectoris. Anus disorders. Ascites. Asthma. Breast-feeding, disorders.

Constipation. Cough. Diarrhea. Globus hystericus. Gonorrhea. **Heart**burn.

Hysteria. Levitation. Liver disorders. *Musca volitantes*. Noises in ears. Pylorus, pain. Sleep, excessive. Smell, illusions. Spinal cord, pains. Spleen, disorders. Whooping cough. Yawning.

Modalities

Better in open air. Yawning and stretching helps pressure in chest. Worse from touch. Sneezing aggravates. Worse in warm room.

Symptoms

MIND

Stupefaction of sense. Great restlessness. Disposition melancholy, fretful, seeming to invite sadness with extravagant and exaggerated notions. Excessive ill-humor, provoked by slightest contradiction. Difficulty in thinking.

Abdomen

Sensation of weight of fullness, borborygmi, abundant emission of wind. Colic in early morning, abdomen tense, relieved somewhat by evacuation and passing of wind. Dull shocks or else lancinations in right hypochondrium. In liver region, contusive pain in morning.

Back

Tension in muscles of neck or right side, sometimes spasmodic. Lancinations under right armpit. Drawing pains in loins towards the groins. Pains in spinal marrow, as far as the cauda equina and extending to sacrum. Contusive pain in lumbar region.

Breasts

Increase of milk in breasts, (Asaf.) Seems to be a true galactagogue.

Chest

Sense of oppression of chest. Squeezing sensation in lower chest.

Ears

Drawing pains in ears, shootings followed by tension in left ear. Buzzing in ears: ringing sound before ears, evening in bed.

Eyes

Biting in the eyes. Itching above the eyebrows. Burning in eyes, especially in the lids. Redness of conjunctiva with increased mucous secretion in elderly persons. Pupils dilated. *Cloudiness of vision, weakness of sight. Flying insects before eyes, on stooping after a meal.* Hemipopia.

PAGE 965

Face

Pale. Heat of face with trembling and sensation of swelling of lips. Tingling with a feeling of tightness on face. Lancinations in chin at extremity of sub-maxillary nerve. In lips, quivering. Swelling of the lymphatic glands.

Female

Promotes menses. Menses too early. Painful gonorrhoea. Bearing down and weak feeling about pelvic organs and general relaxed feeling.

Food

Food taste sickly, bitter after eating bread and butter, bitter as gall in throat. Want of appetite (s also): at noon food is repugnant, no appetite for bread and meat. Appetite and thirst increased.

Head

Dull, heavy, confused, dizzy. Heat of face and headache with general coldness. Headache with disorders of respiratory organs.

Kidneys

Urine smells of violets. Sensation as of a drop continuously passing along the urethra when seated. Urine clear as water and at same time more copious. Hot and burning in urethra. Dragging pressure in region of bladder, as from urgency to urinate.

Limbs

Lame hip down left side, worse walking. Coldness and numbness of feet and legs. Tremor of hands and arms. Cramps in shin bones, extending to toes and side of leg involving calves.

Lungs

Difficult breathing. Suffocative breathing from dropsy of the chest. Constant tickling cough. Incessant, spasmodic cough, as if chest would fly to pieces. Cough, provoked by a tickling in throat. Irritation of a suffocating cough.

Male

In penis, swelling of a lymphatic vessel, following morning erections. Drawing pains at root of penis or also in right spermatic cord and along internal surface of thigh. Diminished sexual appetite, chases away lasciviousness and voluptuous fancies. Painful erections during morning sleep.

Mouth

Dryness of mouth without thirst. Sharp pain in molars on left side of lower jaw, as if they were being twisted.

Soreness of gums, on an empty socket on masticating. Tongue charged with a white coating (s also), coated with thick mucus (s), sore, as if burned at tip. Contraction under tongue.

Nose

Sensation as though end of nose were distended. Peculiar smell before nose and a like taste in mouth. Coryza, followed by excoriation and dryness in nose. Frequent sneezing.

Rectum

Constipation: no stool first day or else a tardy and hard evacuation (habitual constipation diminishes). Stool only after urgent calls and griping.

Sensations

As if chest would fly to pieces, as if circulation in legs was suspended. Coldness of stomach, throat, chest, feet.

Skin

Subcutaneous lancinating and pinching in various places. Inflammation and eruptions.

Sleep

Restless, impossible to get to sleep. Deep, comatose sleep. Frequent yawning and stretching of limbs.

Stomach

After a meal, sensation of fullness in stomach with pressure downwards. Loathing, nausea sometimes with uneasiness at pit of stomach. Vomiting and loathing. Pains in stomach with contraction of pit of stomach, worse by pressure.

Throat

Slight burning in throat. Difficult swallowing with sensation as if uvula were raw with burning. Accumulation of mucus in throat, viscid mucus in throat in morning.

Comments

Homeopathic provings and records of Lact. poisonings have produced an extensive array of symptoms. A simple reading of the symptoms will show what a powerful healing agent within Lact.

As an instance of poisoning. A man, 25, ate Lact. in a salad, 7 p.m. Went to bed at 9. Was waked at 11 with sharp colicky pains, soon followed by nausea and vomiting, which lasted all night. Fell asleep at 5 a.m. , but in the morning was astonished to find himself unable to distinguish objects clearly.

PAGE 966

A boy of 10 who ate of the same meal became affected with lively delirium at midnight and it lasted until morning, he jumped about on the bed, played all sorts of pranks and

nobody could quiet him. He had no colic or vomiting. His pupils were dilated until the iris was a mere rim. Trying to read he mistook M for P and O for V.

In his delirium he had hallucinations, saw on his bed a soldier, an ink stand, etc. Both these patients and another had liquid stools. The dilated pupils persisted some time.

One of the keynote symptoms of Lact. is an indescribable sensation of tightness, affecting the whole body more or less, but especially the chest: much yawn and stretch to relieve the squeezing of the lower chest. This develops into asthma and angina pectoris.

There is tightness in the liver region and enlargements of the liver have been removed by Lact. when that symptom was present. Squeezing in left breast. Feeling as if a hundredweight on chest. On the other hand there is also a feeling of relaxation in the chest. There is intolerance of touch and pressure.

Lact. has cured a spasmodic cough in frequent paroxysms with feeling of suffocation. Attacks came suddenly without any apparent cause and were induced by a violent tickling in pharynx and roof of mouth.

Whooping cough, paroxysms preceded by anxiety. There is both constipation and diarrhea and many concomitant anal symptoms.

Hering gives "Painful gonorrhoea in females " as an indication and one of the symptoms of the male urethra is suggestive. "Sensation as of a drop continually passing along the urethra when seated." Urine has smell of violets.

Lact. has cured hypertrophy of ovaries in a woman of fifty, consequent on an miscarriage twenty-five years before. The tumor was excessively large and the patient could get no rest for the pain of the pressure.

The rectum was contracted and feces evacuated with great pain. "Fatigue during stool," and also "sleepiness during stool" are peculiar and may prove characteristic. Ebullitions rising up from abdomen suggest globus hystericus.

Extraordinary lightness of body, more pronounced in open air. Feels as if swimming in bed. Dreams of swimming in the air or of walking above the ground. The head feels light, also empty. Sensation as if head too large, as if brain loose. Sensation as if looking through gauze.

"Pain in spinal marrow even to cauda equina and streaming along coccyx" should prove a leading symptom in some spinal cases. Right arm is much affected by Lact. Sitting up better chest symptoms. Bending better pain in stomach. Crossing legs better pinching in umbilical region.

Lamium album

(white nettle)

Pharmacy

Lam. Lamium album. White nettle. Lamium levigatum. Lamium maculatum. Dead Nettle. N. O. Latilate Tincture of entire fresh plant while in flower and seed. Historical dose: Tincture and all potencies, third or higher potency.

PAGE 967

History

Lamium was proved by Hahnemann and others including Stapf. Farrington says: Lamium has been recommended for external hemorrhoids. "Hard stool with blood" is the nearest symptom bearing on this. **Planets:** Moon, Venus.

Homeopathic

Lamium alb. produced headaches of several kinds, one a "deep-in" headache, (Bac.), tightness of scalp and a backward and forward motion of the head. Headache with backward and forward motion of head. Lamium has a special affinity for female and urinary organs.

Much uneasiness of mind and body, trembling of limbs, weakness during the chill. Leucorrhoea and menses too early and scanty. Hemorrhoids, hard stool with blood. Sensation in urethra as though a drop of water were flowing through it. Tearing in the limbs. Hemoptysis. Blisters on heel from slight rubbing. Ulcers on heel. (All-c.)

Clinical

Headache. Hemorrhoids. Hernia. Leucorrhoea. Menstruation too early.

Symptoms

MIND

Whining mood inclination to weep, feels as if abandoned. Great sadness with lachrymose humor. Great agitation and anxiety, which permit no rest.

Comments

Tearing and drawing in the limbs. The menses appeared too early and were scanty. Much leucorrhoea with biting sensation or without sensation, white mucus.

A characteristic symptom seems to be backward and forward motion of head. Symptoms were worse in morning on waking (headache), worse while lying down in bed in morning, better on rising (headache), better on sitting (headache), worse in open air (headache), worse by drinking (burning in chest), worse by eating (pressure beneath pit of stomach, burning in chest), worse rising from stooping (indescribable headache).

Lapathum acutum

(common dock)

Pharmacy

Lapa. Lapathum Sylvestre. Common Dock. Rumex obtusifolius. N. O. Polygonaceae.

Tincture of fresh root. Historical dose: Tincture and all potencies.

Herbal

Lapathum is the old name of the Docks now generally named Rumex. The word is of Greek origin and signifies, according to Gerarde, "to soften, ease or purge the belly," and the name was given to "herbs used in pottage and medicine, very well known to have the power of cleansing." **Planets:** Moon, Venus.

Homeopathic

The Lapa. was proved by Widenhorn. It produced some rather severe headaches and nosebleed. Hansen says it is indicated in nosebleed following headache. Weight in stomach. Pain in kidneys with pressure from without inwards. Weak feeling in genital parts, leucorrhoea with uterine bearing down and pain in kidneys. Weariness.

Clinical

Headache. Kidneys, pain. Leucorrhoea. Nosebleed. Uterus, atony.

Symptoms

MIND

Sadness and morose, alternating with gaiety.

Lapis albus

(silico-fluoride of calcium)

Pharmacy

Lap-a. Lapis albus. Calcarea silico-fluorica. Silico-fluoride of calcium. Trituration.

Historical dose: All potencies, first to sixth potency.

PAGE 968

History

Lapis albus is Silico-fluoride of Calcium. A species of gneiss found by Grauvogl in the mineral springs of Gastein and named by him Lapis albus, "White Stone". These waters flow over gneiss formations into the valley of the Achen, where goiter and cretinism abound.

It was Von Grauvogl who first called attention to this remedy, the product of certain mineral springs in Germany, that have reputation for curing ulcers, cancers tumors. Lap-a. is a remedy for new growths and glandular disorders. Grauvogl cured with it a case of carcinoma and he and others have cured cases of goiter and scrofulous glands. **Planets:** Moon, Saturn.

Homeopathic

Lapis albus has the leading indications: Burning, shooting, stinging pains in the stomach, pylorus, also in the breasts and uterus. It has shown great power over new growths and tumors of many kinds.

Lap-a. has disorders of glands. Glands have a certain elasticity and pliability about them rather than the stony hardness of Calc-f. and Cistus. Remarkably successful in scrofulous affections, except in malarial cases.

Lap-a. has goiter, pre-ulcerative stage of carcinoma. Burning, stinging pain in breast, stomach and uterus. Connective tissue about glands specially affected. Fat anemic babies with a ravenous appetite. Goiter, cretinism and scrofulous diseases.

Severe menstrual pains causing weakness and swooning. Uterine cancer. Fibroid tumors with intense burning pains through the part with profuse hemorrhage. Sarcoma. Lipoma. Glandular swellings where no glands are usually found. Pains are burning, stinging, shooting.

Clinical

Carcinoma. Cretinism. Dysmenorrhea. Epithelioma. Fibroma. Glands, enlarged. Goiter. Leucorrhoea. Pruritus. Scirrhus. Scrofula. Tuberculosis. Tumors.

Symptoms

Chest

Persistent pains in breast region. Glandular hardening.

Ears

Otitis media suppurative. Where Silica is indicated progress is hastened by Lapis (Bellows).

Face

Opening in cheek as large as a silver dollar (carcinoma). Epithelioma of lip, crusts coming off leave raw surface. Tumor of lower lip with burning, stinging pains, that make him jump off his feet.

Female

Burning, shooting, stinging pains in breasts and uterus. Uterine carcinoma (five cases). Painful menses: suddenly taken with pain so severe that she swoons. Faints with pain at menses. Severe pain preceding the flow. Pruritus vulva.

Food

Ravenous appetite.

Head

Sick-headache.

Skin

Scrofulous abscesses and sores. Enlargement and induration of glands, Especially cervical. Lipoma, sarcoma, carcinoma. Pruritus.

Comments

In two cases of cervical glands cured by Lap-a. 6c, Dewey relates that a ravenous appetite developed while the remedy was being taken. In two cases cured by Dewey the swelling of the glands was elastic rather than of stony hardness.

In one patient the swelling was as large as a goose-egg in the right sternoclavicular region. This patient, a young lady, was a blonde, as also was a lady of thirty-five whom he cured of goiter with the remedy.

Whiting records a fragmentary proving of Lap-a. Mrs. Smith., 40, fair, stout, no children, had a large bronchocele. Averse to all animal food. Craves sweets. Has craved and drunk much ice-water in all seasons since a child. Feet and legs cold to knees. Lap-a. 6x 2 grains powders, one four times a day.

Reported in a month that the tumor was rapidly diminishing in size, but she was having much pain in it. No further medicine was given.

Two months later the tumor had diminished one-half and the patient then stated that since taking the powders she had no pain at her menstrual period, no dyspepsia and no sick-headaches.

PAGE 969

She had severe dysmenorrhea since the menses first appeared. Since leaving off the medicine the pain in the tumor ceased and also the decrease in size. Lap-a. 6x was again given and again the pain in the tumor came on and in addition, itching of the external genitals. The 30c and 200c caused such intense itching that the patient refused to take any more medicine of any kind.

Since than Whiting has cured many cases of pruritus and also of dysmenorrhea with Lap-a. The pains come on before the flow and cause swooning. One patient, 19, had dysmenorrhea from the first. Pain so severe she would fall unconscious wherever she might happen to be, the swoon lasting half an hour at times. Better when flow established. Lap-a. 200c cured.

Miss X., 34, normal until she had measles at age 20, since then pain at commencement of menstruation, so severe as to cause fainting. "This severe pain would continue less for a day or until the flow was established." Lap-a. 200c cured in six months.

W. P. Wesselheft, discussing Whiting's paper, narrated the cure of a case of epithelioma of the lip in a man of seventy with Lap-a. 12x in water. Dr. Gregory cured a young man of a tumor of the lip with Lap-a. 30c.

It recurred two years later with "burning, stinging pain, which made him jump off his feet." More Lap-a. 30c was given and cured in a year. There was in further recurrence.

Lappa arctium

(burdock)

Pharmacy

Lappa. Lappa arctium. Arctium lappa. Burdock. Lappa Major. Lappa officinalis. Arcion, (Greek). Gobo. Great Clote Burre. N. O. Composite. Tincture of fresh root.

Historical dose: Tincture and all potencies, tincture to third potency.

Herbal

Lappa arctium has been extensively proved, notably by Dr. Jeanes and Dr. S. A. Jones. The provings in the main confirm the teachings of antiquity in regard to this remedy.

A writer in the Amer. Homeopath recommended the local use of the seedling roots in acne. The roots are softened by soaking in water for two hours, then the blunt end is rubbed on each individual pimple. It is not to be repeated more often than once a week.

Planets: Moon, Venus.

Homeopathic

Lappa chiefly affects the skin, liver, joints and uterus. It has been given from the earliest times for prolapse uterus infertility, milky urine and sores about the joints. It was one of Culpepper's remedies for fetid sweat of axillae. Very important in skin therapeutics.

A large number of symptoms were observed upon the skin and mucous membranes. Acne, eczema, especially of scalp with discharge. It is one of the remedies which have been successful in curing uterine prolapse. In skin disorders it has been used externally as a glycerol, as well as internally. Eruptions on the head, face and neck, pimples, acne.

Lappa has styes and ulcerations on the edge of the eyelids. Profuse and frequent urination. Crops of boils and styes. (Anthr.) Heavy, sore and aching. As if lying uncomfortably. Numbness, lumbar region of aching calves. Constriction.

Clinical

Acne. Backache. Belching. Boils. Bunions. Dupuytren's contraction. Dyspepsia. Eczema. Eruptions. Flatus. Glands disorders. Gonorrhea. Gout. Impotence. Infertility. Phosphaturia. Rheumatism. Ringworm. Scrofula. Styes.

Ulcers. Uterus, prolapsed. Vaginitis.

Modalities

Better from cloudy weather. Worse cold, wet, shaking, lying on right side, violent exertion.

PAGE 970

Symptoms

Abdomen

Flatulent dyspepsia, belching inodorous gas.

Back

Pains in back about eighth dorsal vertebra.

Chest

Trembling in chest. Acute tingling, cutting pain under middle of sternum, extending across breast.

Eyes

Redness about. Crops of styes. Feeling as if the eye was small and constricted.

Face

Inveterate acne, worse touch. Spreading vesicular eruption, great tearing and itching. Herpetic eruption on right ala nasi.

Female

Uterine displacement, worse standing, walking, sudden jar. Bruised, sore, heavy feeling in uterus with great relaxation of vaginal tissue. Prolapsed uterus with much bearing down pain. Leucorrhoea.

Head

Weight on vertex. Pain in head in region of vertex Eczema of scalp.

Heart

Pain in heart with indescribable movement under sternum, exceedingly rapid pulse with frequent intermissions.

Kidneys

Profuse and frequent urination. Milky phosphatic urine.

Limbs

Front of thigh weak. Old sores about joints. Pain in hands, knees and ankles extending downward to fingers and toes. Pain in all joints. Eruption on limbs. Rheumatic and gouty pains. Soreness of muscles. Rheumatic pains entirely relieved by onset of diarrhoea. Sharp, darting, fugitive pains in tendons. Dupuytren's contraction. Bunion.

Lungs

Tickling in glottis with loose-sounding cough, but no expectoration. Short breath on exertion.

Male

Loss of sexual desire. Cutting, squeezed pain in whole length of urethra, scalding on urination. Ringworm-like patch of eruption on thigh beside testicles, groins raw.

Nose

Red across.

Rectum

Frequent yellow stools in forenoon, with some nausea. Diarrhoea alternating with rheumatic symptoms.

Skin

Eruptions, sticky on head, face. Moist foul eczema of infants. Many small painful boils. Axillary sweat cold, runs down chest, foul. Moist, offensive eruptions, grayish white crusts, especially when glands are swollen. Old sores, about joints.

Stomach

Sour stomach, sour taste to meat, all food turns sour, vomits it. Diarrhoea alternating with rheumatic symptoms.

Vertigo

Vertigo with nausea and vomiting.

Lapsana communis

(nipple-wort)

Pharmacy

Laps. *Lapsana communis*. Nipple-wort. N. O. Composite. Genus Cicoraceae. Tincture of infusion of whole fresh plant. Historical dose: Tincture and all potencies.

Herbal

As the common name of *Lapsana* would imply, it is a popular remedy for sore nipples, a decoction of it being used as a lotion for that purpose.

Cooper has published documents in proof of its efficiency in hemorrhoids. The method of preparation is as follows: Three ounces of the green plant (or four of the dry) are boiled in three pints of thin water gruel until it is reduced to a pint and a half.

The decoction to be strained. Half a pint to be drunk on three mornings following, fasting immediately on getting out of bed.

One patient who was cured in this way said he had no swallowed the draft more than a few minutes before he felt his stomach as warm as if he had drunk hot brandy and water. Only three doses are ordered and the patient is told in case of not being cured to wait a fortnight before repeating the treatment. **Planets:** Moon.

PAGE 971

Homeopathic

Lapsana communis is a remedy for sore nipples and hemorrhoids. Cooper has confirmed the power of Laps. over hemorrhoids, using single doses of the tincture.

Clinical

Hemorrhoids. Nipples, sore.

SOURCES

Clarke.

Larix decidua

Larch

(bach flower remedy)

Pharmacy

Larch. *Larix decidua*. Twigs with young leaves and flowers are picked and boiled for half an hour. The water is drained and used as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

Herbal

Bach grouped the remedy Larch under Despondency and Despair, together with the remedies of Crab Apple, Oak, Willow, Star of Bethlehem, Sweet Chestnut, Elm and Pine.

Planets: Moon.

Homeopathic

Larch treats states of low self-confidence. Lack of energy, drooping sensation, weary limbs and reluctant posture may be concomitant features. One may appear withdrawn or not animated.

Symptoms

MIND

In the Larch state, one does not perceive oneself as capable or successful. One anticipates failure and feels that one cannot quite measure up to the challenges of life.

For this reason, one may avoid new opportunities for growth and advancement. One also compares oneself with others, believing everybody else to be more in charge of themselves and their lives. This error of perception undermines the self-image.

In the Larch state, the view into life is too much directed within oneself rather than focused toward the people and tasks in one's environment, (Cerato, Mimulus). Worries about oneself. While being within the confines of the self and not feeling empowered to rise to life's challenges, one may experience internal sadness, regret, despondency and even despair.

In the Larch state, one feels suppressed within and it may seem impossible to rise above these limitations. Feelings of inferiority, fear of failure, shyness and lack of personal strength. Also a sense of loneliness and alienation from others. In the Larch state, one may feel lax and dampened, without energy or incentive. This experience may resemble the state of depression, when there is no real courage or joy.

SOURCES

Bach.

Lathyrus sativus

(chick-pea)

Pharmacy

Lath. Lathyrus sativus. Chickpea. Wild vetch. "Jesse," "Jarosse," Lathyrus cicera. Lesser Chick-pea. N. O. Leguminosae. Trituration of seeds. Tincture of the flower. Tincture of the green pods. Trituration of the dried pea. Historical dose: Tincture and all potencies, third potency.

Herbal

The Lathyrus is a vetch and a member of the Leguminosae family growing in India. This remedy, which produced a perfect picture of certain spinal affections, has been known for over a century.

A paralytic affection named Lathyrism has been recognized from ancient times and has been commonly attributed.

As its name implies to poisoning with Lathyrus a species of pea.

Our own Sweet Pea is Lathyrus odoratus. The two varieties of Lathyrus which have occasioned the poisonings are Lath. sativus and Lath. cicera. The peas are very much alike in appearance. That of Lath. Cicera is rather smaller than the other, more square, are a lighter brown.

PAGE 972

Except for this brownish color they could easily be mistaken for ordinary peas.

Lath. Cicera has red flowers, Lath. Sativus bluish. Both are cultivated for food and are sometimes cut green for fodder.

In Christison's Toxicology it is stated that Lath. causes paraplegia, dragging gait, turning-in of the toes, stiffness and semi-flexion of the knee-joints.

The clinical record of Lathyrus, though very meagre, gives great hope that it may prove useful in numerous cases of bedridden paraplegias and in infantile spinal paralysis, as well as in certain forms of myelitis.

In 1877 Clarke published cases relieved by Lath. sat., two of Paralysis, one of multiple sclerosis, one of rheumatic paralysis with stiff knees. **Planets:** Moon.

Homeopathic

Lathyrus sativus affects the anterior and lateral columns of the cord, causing many paralytic disorders of lower limbs.

Lath. does not produce pain. Reflexes are increased. Paralytic disorders of lower limbs, spastic paralysis, lateral sclerosis, Beri-beri. Athetosis. Infantile paralysis. After influenza and wasting, exhaustive diseases where there is much weakness and heaviness, slow recovery of nerve power. Sleepy, constant yawning.

Trembling of arms, worse on attempting to do anything. Athetosis. Infantile paralysis. Useful in wasting and exhaustive diseases when there is much weakness and heaviness and slow recovery of nerve power. Reflexes increased.

Clinical

Athetosis. Beriberi. Impotence. Locomotor ataxia. Lumbago Paralysis spinal (spinal sclerosis), rheumatic. Parkinson's disease. Paraplegia. Polio-myelitis. Rheumatism. Rheumatic paralysis. Roaring (in horses). Urine incontinence.

Modalities

Better uncovering was prominent in several cases. Better lying down, (lower limbs move freely). Worse from cold damp weather. Worse by touch. Worse by movement.

Symptoms

MIND

Depressed, hypochondriacal.

Abdomen

Colic.

Back

Lumbago. Pain in back so severe as to prevent movement. Pains in back worse or excited by touch.

Kidneys

Incontinence of urine. Pressure on bladder, if not immediately satisfied, urine, rushes out with great force. Increased bladder reflex. Frequent, must hurry, else voided involuntarily.

Limbs

Poliomyelitis with marked spastic symptoms. Tremulous tottering gait. Rheumatic paralysis. Excessive rigidity of legs, spastic gait. Knees knock together when walking. Knee jerks exaggerated. Cramps in legs worse cold and cold feet. Cannot extend or cross legs when sitting. Legs blue, swollen, if hanging down. Heels do not touch the ground when walking. Sits bent forward, straightens up with difficulty. Gluteal muscles and muscles of lower limbs are emaciated. Stiffness and lameness of the ankles and knees. Feet are dragged or put down suddenly and forcibly while walking. Legs are cold during day, become hot and burn at night better uncovering. While lying down legs can be moved from side to side but cannot be lifted.

Male

Impotence. From time to time erections and pollutions.

Mouth

Burning pain in tip of tongue. Tingling and numbness of tongue and lips, as if scalded.

Rectum

Diarrhea with urgent pressure on intestines. Dysentery. Constipation.

Sensations

Sensation as of a damp cloth around the waist.

Sleep

Continuous yawning and sleepiness.

Stomach

Weight in stomach and indigestion. **Heart** burn. Nausea and vomiting. Vomiting of blood.

Vertigo

Vertigo when standing with eyes closed.

Comments

In the British Journal of Homeopathy there is found an account of a wheat famine in India, where the peas of the plant were substituted for wheat and used as a food. Those who subsisted on it were taken, even during sleep with sudden paralysis of the lower limbs.

PAGE 973

This occurred without warning in young men more than in young women and was never recovered from.

Another observer records fifty cases who had eaten the Lathyrus bread and all stated that they became paralytic during the wet season of the country, that they went to bed quite well and awoke with stiff legs, unsteady gait and aching, but no severe pain. The upper limbs were free.

Another who saw the disease in Algeria and described the symptoms found in ten cases observed that they came on suddenly in damp weather with some pains in the loins, trembling, motor paralysis and exaggerated reflexes. He attributed these phenomena to an acute transverse myelitis with degenerative changes in the cord.

O'Connor finds that marked benefit follows its use in old cases of myelitis with marked spastic symptoms.

Bartlett recommends Lath. in excessive knee jerk and rigidity. Hart speaks of it as a remedy in locomotor ataxia, but the absence of sensory symptoms and the presence of exaggerated reflexes would seem to contraindicate it in this disease.

He also speaks of Lath. in spinal anemia, giving as symptoms: "Numbness, followed by pain in the lower limbs, sensation of a band around the body, unable to step or distinguish one limb from another"

In the case related by Bojanus the general symptoms were the same. In these it was the Lath. which was the cause of the trouble, which arose during the great Russian famine.

Horses fed with Lath. along with oats manifested symptoms of paralysis of the limbs and also of the throat and wind-pipe, setting up the condition called "Roaring." Some have died of suffocation.

The worse from cold, damp wind appears to be the leading condition of Lath. so far as at present known. In the case of horses as well as of human beings, the symptoms often remain in abeyance until cold, damp weather sets in.

Burning heat with better by uncovering is another noteworthy condition.

Clarke has relieved with it several cases of spastic paralysis, Miss R., 25, had been ill four years with the usual symptoms of spastic paralysis with excessive constipation and violent urging to pass water, if she attempted to retain it, it passed of itself. The muscles were hard and unyielding. She had very heavy drugging under allopathic treatment before coming under my care.

Hyper. was first given with considerable benefit. As the improvement went no further, Lath. 1c and 30c were given and then the improvement was much more marked. The patient is still under treatment.

In one of the cases of lathyrism the back pain was induced by touch.

W. A. Dewey has recorded a brilliant cure with Lath. 3x of a case of spastic paralysis in a man of twenty-eight. The attack had been coming on six months. The patient was a hunchback, having been deformed since the age of five, but this had given no more than the usual inconvenience. On admission to hospital (December I. 1898) he was unable to make the slightest movement of the lower limbs, even of the toes.

The adductors were in a constant state of irritable contraction, so that the thighs were constantly crossed. Reflexes greatly exaggerated. No pain. Spine not tender.

General health normal. The only other symptoms was a girdle sensation, as if he had a cloth wrung out of cold water round his waist. Three weeks after commencing Lath. sat. there was slight lessening of rigidity.

On April 5, 1899, he could raise his limbs and move his toes. On July 2nd he walked out of the hospital without difficulty, the abnormal irritability of the muscles having disappeared.

PAGE 974

Compare

(1) Oxytrop., Sec.

(2) Petiveria, a South American plant. - paralysis, paraplegia with numbness. Sensation of internal coldness.

(3) Agrostema githago - burning sensation in stomach, through esophagus into throat in lower abdomen and anus, nausea, bitter vomiting, impaired locomotion, difficulty in remaining erect, vertigo and headache, burning from lower jaw to vertex.

Latrodectus haseltii

(black spider)

Pharmacy

Lat-h. Latrodectus haseltii. New South Wales, Black Spider. Historical dose: All potencies.

History

Long lasting effects seem to indicate Lat-h. as a "chronic" for blood poisoning. Arrests intense pain in pyemia. **Planets:** Mars, Moon.

Homeopathic

Great edema in neighborhood of wound, paralysis of limbs with great wasting of muscles. Delusion of flying. Violent, darting, burning pains preceding paralysis. Vertigo, tendency to fall forward. Septicemia conditions, blood poisoning. Roaring noises. Loss of memory.

Clinical

Blood poisoning. Edema.

SOURCES

Clarke.

Latrodectus katipo

(new zealand spider)

Pharmacy

Lat-k. *Latrodectus katipo*. N. O. Arachnida. New Zealand spider. Tincture of living spider. Historical dose: All potencies.

History

Katipo is a venomous spider found in New Zealand and some parts of California. The symptoms recorded are the effects of bites. The seat of a bite becomes immediately painful and swelling occurs. In some cases the swelling does not come on until some days after the bite. In one case, five days after the bite, a scarlet papulous rash appeared on both limbs, burning like fire.

The symptoms were somewhat slow in evolution and in a fatal case, that of a girl bitten on the abdomen, death did not occur until six weeks after the bite. **Planets:** Moon, Mars.

Homeopathic

Lat-k. has lassitude, faintness, twitchings and in one case, trismus were noted. Scarlet and burning eruptions. Lymphangitis with nervous twitchings. Suffered long, wasting and losing all energy, some having appearance of one going into a decline, it was three months before he rallied and six before he recovered.

Nervous twitching all over body. Suddenly became faint and pale. Large quantities of whisky produced little impression, except a feeling as though affected side was drunk.

Clinical

Chorea. Edema. Faintness. **Heart**, slow. Lymphangitis. Nettle-rash. Twitchings.

Symptoms

MIND

Delirium half smothered by imperfect intoxication. Semi-intoxicated state. Nervous depression.

Abdomen

Very severe drawing or cramping sensation in abdomen.

Face

Anxious expression. Extreme pallor changing to blue tint of face and body. Jaws stiff very soon, could not open mouth to eat and could scarcely articulate.

Food

Lost all desire for food (after a fortnight), lingered six weeks and then died.

Heart

Almost pulseless. Pulse slow, scarcely more than twelve or fourteen beats to the minute.

Limbs

Severe shaking, burning pains ran from the bite on the foot up the limbs to back, accompanied by nervous twitching all over body soon, pain felt almost equally in both limbs and seemed to center about heel. Feet felt as if rudely lacerated by dull instrument, walking him from sleep (immediately).

Lungs

Breathing almost ceased.

PAGE 975

Skin

Small, red spot like flea-bite. Bitten surface raised, the raised part white with red halo with swelling and pain. Swelling size and shape of hen's egg. The bite remained a small purple point for nine days, on the tenth began to swell and turn white like a bee sting, pain and swelling rapidly increased, dorsum of foot and ankle like a puff-ball, red streak running up leg. A bright scarlet, papular eruption on both lower limbs, which stung and burned like fire.

Temperature

Limbs cold and flaccid. A cold, clammy sweat covered left lower extremity in morning sweat covered both limbs.

Compare

(1) Lat-m., Tarent., Mygale., Aranea.

(2) Apis, Vespa and serpent poisons.

SOURCES

Clarke.

Latrodectus mactans

(black widow spider)

Pharmacy

Lat-m. *Latrodectus mactans*. Widow Spider. N. O. Arachnida. Tincture of living spider. Historical dose: All potencies, 6x to 30c.

History

To the luminous insight of S. A. Jones and A. J. Tafel, we owe the introduction of *Latrodectus mactans* into the *Materia Medica*. The Lat-m. bite produces tetanic effects that last several days.

From the time a man was bitten he took 3 1/2 quart bottles of the best rectified whisky without any sign of intoxication.

Linnell records a case of angina pectoris, pain in precordial region and left arm. brought on by slightest exertion, cured with Lat-m. 3c. **Planets:** Sun, Mars.

Homeopathic

Latrodectus mactans affects the heart, producing a typical picture of angina pectoris.

Heart attacks. The precordial region seems to be the center of attack. Restless with

heart pains and prostrated. Fear of suffocating or dying. Constriction of chest muscles with radiation to shoulders and back.

Blood becomes thin, watery. Lowered coagulability. Inflammation of the coronary arteries. Pain in the solar plexus. Infectious purpura.

Chronic hemorrhaging endothelial plasmatic condition. Chronic idiopathic thrombocytopenia.

Lat-m. has itching and redness of the part bitten, at first without pain, but violent pain soon commenced there (back of left hand) and extended in a short time up forearm and arm to shoulder and thence to precordial region. Painful sensations extended up arm to shoulder, along neck to back of head, later in pain precordia and apnea, screaming fearfully.

Clinical

Angina pectoris. Chronic idiopathic thrombocytopenia. Colic. **Heart**, attacks. Hemorrhages, watery. Infectious purpura.

Modalities

Better by sitting quietly. Worse from the slightest movement. Worse from motion even of hands. Worse from exertion.

Symptoms

MIND

Fear of suffocating or dying. The face betrays extreme anxiety. Anxiety about the heart. Screams fearfully with pain, exclaiming that she would lose her breath and die. Thinks he will suffocate. Sensitive to noise. Intense anguish with the sensation of severe thoracic constriction. Extreme state of nervous irritation with fear of going mad. Speech hesitant with tears. Apparently moribund.

Abdomen

Severe abdominal pain with nausea and a sinking sensation at epigastrium. Colic and hardness of the abdominal wall. Chronic cramp of the abdominal muscles without painful tenderness on palpation.

Back

Dorsal and lumbar cramps, going from the nape to the loins.

Chest

Angina pectoris. Violent, precordial pain extending to the axilla and down the arm and forearm to fingers with numbness of the extremity. Sinking sensation. Cramping pain from chest to abdomen.

Ears

Pain in the right middle ear.

Eyes

Constant *pulsating pain* in the eyes.

Face

Expression of deep anxiety.

Food

Extreme thirst, vomits what he drinks.

PAGE 976

Head

Pain in neck to back of head. Occipital pain. Headache, aggravated between 2 p.m. and 3 p.m.

Heart

Precordial anxiety. Pain in precordia with a loss of breath. screaming fearfully, exclaiming that she would lose her breath and die. Violent heart pains, sharp, extending to shoulders or both arms to fingers with numbness. Restless with cardiac pain and prostration. Pulse, feeble and rapid. Pulse so frequent it could not be counted and so feeble it could scarcely be felt. Pain extends from bitten right hand to back of head, more violent pain in precordia, extending thence to left shoulder and axilla, down arm to finger-ends, left arm partially paralyzed, left pulse extinct, right pulse doubtful.

Limbs

Hard aching pain in axilla. Pain in left arm, feels paralyzed. Weakness of legs followed by cramps in the abdominal muscles. Paresthesia of lower limbs. Stinging in right wrist with itching and redness of bitten spot.

Kidneys

Burning pains on urinating in the urethra. Urine red, albuminous with casts. Proteinuria, hematuria, casts, glycosuria, diminution in the level of nitrogen eliminated through the urine.

Lungs

Gasping for breath, fear of losing breath and dying. Extreme apnea. Respiration only occasional, gasping. Bronchial rales. Cough with hawking. Yellow, thick, acrid sputum. Pulmonary edema. Respiration very slow, thinks he will suffocate.

Male

Frequent erections. Testicular pains, aggravated by movement. Very acute pains in the right testicle. Perspiration in the genital regions. Itching of prepuce with a little redness of the part.

Mouth

Labial fissure. White coloring of the tongue. Hypertrophy of the lingual papillae. Copious salivation. Trembling of the tongue.

Nose

Nose blocked. Thick, yellow discharge.

Rectum

Constriction of the anus with tarry stools. Two copious evacuations similar to the black vomit.

Skin

Loss of hair. Skin cold like ice, marble-white. Blue coloring. Eruption, which itches. Formication and extreme sensitivity. Heavy, cold perspiration. Skin very painful at the slightest touch. Burning of the soles of the feet.

Sleep

Dreams of flying. Insomnia. Sleep disturbed, anxious.

Stomach

Eructation and loss of appetite. Nausea then abdominal pains. Vomiting of black blood, which soothes the condition. Transfixation of pain or sinking at epigastrium. Feeling of weakness in epigastric region.

Throat

Throat red, dry. Tonsillitis with glairy deposit on tonsils. Pain on swallowing.

Vertigo

Vertigo and constrictive headache.

Comments

Case I. A man bitten on the prepuce. At first there was itching in less than half an hour nausea followed by severe abdominal pains. Soon after, violent precordial pains, extending to axilla and down left arm and forearm to fingers with numbness of the limbs and apnea.

Dry cupping was resorted to and the blood that flowed was thin and florid and un-coagulable. This was before Semple arrived.

He then found most violent precordial pains, the left arm almost paralyzed, pulse 130, very feeble, Skin cold as marble, countenance expressive of deep anxiety. At eight next morning in spite of stimulants, the symptoms were worse and continued to increase until 2.30 p.m. Pulse uncountable and scarcely to be felt. Vomited black vomit, a quart or more.

Soon after, reaction set in and the man gradually recovered. He had two copious stools like the black matter vomited and after that felt quite well.

PAGE 977

Jones notes that the precordial region was the chief locus of attack. He considers the order of the occurrence of these symptoms of great importance.

Laurocerasus

(cherry laurel)

Pharmacy

Laur. Laurocerasus. Cherry laurel. Cerasus Laurocerasus. Common Laurel. Prunus Laurocerasus. N. O. Rosacea. Tincture of young leaves. Dilutions of Aqua Laurocerasi. Historical dose: Tincture and all potencies, tincture to third potency. Cherry-laurel water, two to five drop doses.

Herbal

Laurocerasus, the so-called "Laurel" of our gardens is not a member of the Lauraceae, though the Bay Laurel, *Laurus nobilis* is. The Aqua Laurocerasi, prepared by distilling the fresh leaves, contains Hydrocyanic acid and is supposed to owe all its medicinal virtue to this fact.

The small quantity of Hydrocyanic acid which this medicine contains, produces symptoms accompanied by sudden debility and lack of reaction, especially in chest and heart disorders.

Asphyxia neonatorum. Lauro. has cyanosis both of the new-born infant and of heart disease. Coldness and blueness with epileptiform convulsions. A dry, tickling cough, Lauro. has also a cough with jelly-like expectoration dotted with bloody points. **Planets:** Mercury, Moon.

Homeopathic

Laurocerasus affects the mind and brain causing, bluntness of special senses. Spasmodic tickling cough in cardiac patients is often magically influenced by this drug.

Blue babies, asphyxia neonatorum. Well chosen remedies do not act. Cyanosis. Coldness not better by warmth. Weak sphincters. Long lasting faints. Chorea, emotional with constant jerks, cannot keep still. The speech indistinct after every excitement, gasping for breath.

Laur. has a lack of reaction, especially in chest and heart disorders. Drink rolls audibly through esophagus and intestines. General coldness, not ameliorated by warmth. Violent pain in stomach with loss of speech. Spasm of facial muscles and esophagus.

Suffocating spells about heart compel him to lie down. Sensation of falling down in brain in abdomen in heart etc. Epilepsy, clonic spasms of all limbs with paralytic weakness. Twitchings. Gasping, before during and after spasms. Nervous collapse. Strokes. Internal burning. Hemorrhages of thin, bright blood mixed with gelatinous clots.

PAGE 978

Clinical

Asphyxia, neonatorum. Asthma. Breathing difficult. Cholera. Cholera infantum. Chorea. Menopausal. Convulsions. Coughs. Cramps. Cyanosis. Diarrhea. Dysmenorrhea.

Epilepsy. **Heart**, disorders. Liver disorders. Metrorrhagia, Palpitations. Pneumonia, typhoid. Strokes, threatened. Tetanus. Tumors. Whooping cough.

Causations

Effects of fright.

Modalities

Better sitting up. Better from lying with head low. Better eating, sleep, open air. Worse sitting up, exertion, cold, fright. Stooping worse. Worse in the evening and night.

Symptoms

MIND

Loss of consciousness with loss of speech and motion. Fear and anxiety about imaginary evils. Sudden loss of memory from fright, pain etc. Dullness of special senses. Gets angry when not understood.

Abdomen

Falling down sensation of a lump in abdomen from above the navel to small of back worse talking or over-exertion. Gurgling flatulence.

Back

Painful stiffness in left side of neck and nape. Compressed feeling in shoulders and nape.

Chest

Constriction of chest. Burning in chest on taking inspiration. Dyspnea with sensation that he is unable to raise the chest walls, better lying down.

Ears

Hardness of hearing. Tingling in ears. Itching in ears.

Eyes

Dryness of eyes. **Eyes** widely open or half-closed, convulsed, prominent and fixed. Objects look larger. Burning pain in eyes. Pupils dilated and immovable.

Darkness before the eyes, with obscuration of sight. **Eyes** distorted. All objects appear larger than they really are.

Face

Blue with gasping. As if flies and spiders are crawling over the skin. Lock-jaw.

Twitching of the muscles of face.

Female

Pain in uterus with cancer with oozing of bright blood with gelatinous clots, better sleep.

Faints with coldness during menses. Burning and stinking in and below breasts.

Head

Head pain worse 11 a.m. to 1 p.m. Nightly tearing in vertex. As if a cold wind were blowing on head. As if brain were falling. Brain feels contracted and painful.

Heart

Folds hands over the heart, as if there were some trouble there worse by any exercise.

Palpitations. Pains in the region of heart. Pulse, weak, variable, slow or irregular. Mitral regurgitation. Clutching at heart and palpitations. Cyanosis neonatorum.

Kidneys

Urine, retained, suppressed involuntary with palpitations and suffocation and fainting.

Limbs

Skin blue. Veins of hands distended. Clubbing of fingers. Toes and finger nails become knotty. Cold clammy feet up to the knees in chorea, heart disease. Feet numb on crossing the legs. Sprained pains in hips, thighs and heels.

Liver

Pain in the liver as though abscess were forming. Liver indurated, atrophied, nutmeg.

Lungs

Shallow breathing. Asphyxia neonatorum. Suffocation, gasps for breath, on sitting up.

Gasping for breath, clutches at heart. Cough with valvular disease. Exercise causes pain

around heart. Tickling, dry cough. Cough with a copious, jelly-like, bloody expectoration. Small and feeble pulse. Threatening paralysis of lungs.

Mouth

Foam at the mouth, convulsions. Speechlessness from pain in stomach. Tongue, stiff, cold, burnt or numb.

Rectum

Paralysis of anal sphincter involuntary stools. Cancer of rectum with bleeding of bright red blood.

Sensations

Coolness of forehead as from draft of air. Weight on top of head. As if brain loose and falling into forehead when stooping. As if a veil before eyes. As if lungs could not be sufficiently expanded. As if lungs pressed against spine. As if mucous membranes were dry. Stitches are very prominent, also stiffness and pressure, especially pressure outward.

Skin

Cool, livid.

PAGE 979

Sleep

Sleeplessness from over-excitement and sudden heat. Troublesome and agitated dreams. Fearful anxiety and restless, cannot fall to sleep. Coma vigil. Spells of deep sleep with snoring and stertorous breathing. Frequent yawning.

Stomach

Persistent hiccough. Bitter belchings. Disgust for food during pregnancy. Vomiting of food during cough. Violent pain in stomach with loss of speech. Stomach pains during urination. Nausea near a hot stove.

Temperature

Coldness, chills and heat alternate. Thirst with dry mouth in afternoon. Shuddering, followed by burning heat. Heat running down the back.

Throat

Larynx and trachea raw. Low voice. Spasmodic contraction of throat and esophagus. drinks roll audibly through esophagus and intestines.

Vertigo

Vertigo with sleepiness.

Comments

Laur. has a peculiar "gasping" is indicative here, gasping without really breathing. In addition to the blueness there is twitching of the muscles of the face (which is also an indication for Lauro. in chorea). Clubbing of fingers, which is a common feature in cyanosis and tuberculosis.

"Lack of reactive power," and low vitality is another keynote of Lauro. This is particularly so when occurring in chest disorders. Long-lasting faints (Camph. has sudden fainting), seems to have no reactive power, face pale, blue, surface cold. Prostrate before getting up in morning and difficulty in opening eyes.

Attacks of indigestion and pains across lower abdomen, which come suddenly in the morning and generally disappear on getting up.

Gnawing pain in lower abdomen going on for years in old men with occasional looseness of stool. If fluids are forced down the throat they roll audibly into stomach.

When indicated in eruptive fevers the eruption is livid after pressure with the finger the skin is long in regaining its color.

There are suffocative spells about the heart worse by sitting up, the patient is compelled to lie down, (as with Psor.) Though some heart symptoms have the opposite condition and compel the patient to sit up.

Guernsey gives these leading symptoms, "Gasping for breath, the patient puts his hand to the heart as if there was some trouble there, this may result from running a short distance, which puts him completely out of breath, going upstairs, walking or any exercise may bring the gasping on."

Coldness is a common sensation internal coldness and external heat. Cold tongue. Heat of single parts. Warmth on center of forehead, then a coldness as from a draft of air lasting a long time. The left chest is most affected. There is worse before eating. Constricted sensations Ñ in gullet in rectum.

There are noteworthy uterine symptoms of menorrhagia and dysmenorrhea in the provings and the value of them has been emphasized by cases related by Cooper in his work on Cancer and Cancer Symptoms.

The indications of Laur. according to Cooper are: A sense of fatigue pervades the whole system with a very painful condition of the hard and indurated tissue of the parts affected, pain much better by sleep, tendency to oozing of blood, which is generally bright and mixed with gelatinous clots. This applies to chest as well as to uterine and rectal symptoms, only, the blood comes painlessly into the mouth, but with great pain per vagina.

In most cases Laur. will be found that the pains it relieves are such as start from the lower part of the spine and extend either round the pelvis or up to the head and are accompanied with a sense of suffocation and a sick feeling with drowsiness and a great desire to sleep that generally brings relief.

In cases that are sleepless the desire for sleep is very great. Digestion is weak, bowels confined, patient, low-spirited with flatulence and burning in chest after food. Constant tired and sick feeling. Inclined to lose flesh and hemorrhages that are small in quantity and bright in color.

PAGE 980

The flatus is audible and gurgling and rolls about the upper abdomen. In nervous disorders "constant jerks, cannot keep still" and the characteristic "gasping" are leading indications. Allen's indications are: An extremely nervous, excitable condition accompanying ailments. Diarrhea as of green mucus with suffocative spells about heart.

Dry, harassing cough of tuberculosis. Spasmodic cough of later stages of whooping cough when patient is much prostrated and has nervous spasmodic symptoms. Cough with valvular heart disease, cough incessant, especially on lying down, fluttering in heart and gasping with cough. Alternation of chill, fever and sweat in tuberculosis.

E. Wigg relates the case of May S., 7, who had been troubled some time with an almost incessant cough, for which many remedies were given without benefit. At last Wigg came to the conclusion that Laur. was the remedy and put ten drops of the Laur. 200c into five tablespoonfuls of water ordering a teaspoonful of this to be taken every two hours when the child was awake.

This was at 4 p.m. After the third dose she fell asleep. At 3 a.m. she awoke in a very excited condition. Her mother asked her if she had not been dreaming, but her tongue was so stiff she could not answer. Suddenly she began to tremble all over as if in a chill.

after ten minutes she began to twitch and jerk. Wigg was sent for and found her in this convulsed state. She could not articulate for the thickness and heaviness of the tongue. The mind was clear. Recognizing the action of Laur. Wigg antidoted it with Camphor and later a cup of coffee and she came all right in a few hours. She had no more of the cough.

Relations

Antidotes: the effects of Digitalis given in crude doses. Antidoted by: Camph., Coff., Ip., Op. Compatible: Bell. Phos., Puls., Verat.

SOURCES

Boericke. Clarke.

Lecithinum

Pharmacy

Lec. Lecithin. Historical dose: One-half to 2 grains of crude and potencies. Twelfth potency. Historical dose: Tincture and all potencies.

Herbal

Lecithin is important in the vital processes of plant and animal organisms. It is prepared from the yolk of egg, a phosphorus containing complex organic body. Lecithin has a favorable influence upon the nutritive conditions and especially upon the blood, hence its uses in anemia and convalescence, neurasthenia and insomnia. **Planets:** Moon.

Homeopathic

Lecithin has been used as a galactagogue remedy, it renders breast milk more nourishing. In Tuberculosis, Lecithin causes a marked improvement in nutrition and general improvement. It causes an immediate decrease in the excretion of the phosphates.

Tired, weak, short breath, loss of flesh. General weakness. Neurasthenia. Sexually weak. Impotency. Ovarian insufficiency. Anemia.

Symptoms

MIND

Mental exhaustion and impotency. Forgetful, dull, confused. Insomnia.

Ears

Pulsating and ringing in ears.

Face

Pain in zygoma, face pale.

Head

Aching, especially in occiput-pulsating and ringing in ears. Pain in zygoma, face pale.

Kidneys

Scanty with phosphates, sugar or albumen.

Limbs

Soreness, aching, lack of energy. Tired and weak.

Sexual

Male power lost or enfeebled. Anaphrodisia and ovarian insufficiency.

PAGE 981

Stomach

Loss of appetite, thirsty, craves wine and coffee, bloated, sore pain in stomach rising toward throat.

Ledum palustre

(marsh tea)

Pharmacy

Led. *Ledum palustre*. Marsh tea. Wild Rosemary. Marsh Cistus. Labrador Tea. N. O. Ericaceae. Tincture of dried small twigs and leaves collected after flowering begins. Tincture of whole fresh plant. Historical dose: Tincture and all potencies, third to thirtieth potency.

Herbal

In Sweden a decoction of *Ledum* is used for freeing oxen and pigs from lice. Linneus says that this same decoction, if taken internally, has cured "violent headaches and a species of angina." The leaves of *Ledum* are also used in Sweden in beer to increase its intoxicating power and also in tanning. *Led.* Is an example of a common article of diet being at the same time a very powerful medicine.

Teste, who is one of the chief clinical authorities on *Ledum*, mentions that it is native to damp regions of the North of Europe and that no animal except the goat eats it, on account of the strong resinous smell of its leaves, which "keeps off lice and prevents flour from getting moldy."

Merat says *Ledum* cures the itch and scald-head, which Teste explains by its parasiticide action.

This anti-parasitic action led Teste to think of *Led.* as a remedy for bites and punctured wounds, especially as certain symptoms of the proving seemed to agree with it. The success which has attended this use of *Led.*

In mosquito-bites, stings of bees and wasps, rat-bites, needle-pricks resulting in whitlows, confirms the observation. "Redness, swelling and throbbing in point of index finger from prick of a needle" *Led.* aborted a felon in a few days, (Wesselheft).

Homeopathic

Ledum palustre affects the fibrous tissue of joints especially small, ankles, tendons, heels and skin, hence it can be called a rheumatic remedy, where rheumatism begins in the feet and travels upwards. Affected parts become purple puffy and then emaciate.

Ledum is for punctured wounds, produced by sharp-pointed instruments or bites, particularly if the wounded parts are cold, this is the remedy. If *Ledum* is given immediately after punctured wounds, it helps prevent tetanus. Give *Hypericum* if tetanus develops. Tetanus with twitching of muscles near wound. Stings of insects. Animal bites.

For complaints of people who are cold all the time in bed in the house. There is a general lack of body heat and yet heat of bed is intolerable. Pale delicate persons. Painful, cold, edematous joints. Shifting, tearing pains. Weakness and numbness of the affected parts. Dropsy. Petechiae. Alcoholics. Rushes of blood. Abscess and septic conditions better by cold.

Led. affects the rheumatic diathesis, going through all the changes from functional pain to altered secretions and deposits of solid, earthy matter in the tissues.

The Led. rheumatism begins in feet and travels upward. Ledum affects also the skin, producing an eruption like Poison-oak and is antidotal thereto.

PAGE 982

Clinical

Ascites. Asthma. Bedsores. Bites. Black-eye. Boils. Bruises. Deafness. Ear inflammation. Eczema. Erythema nodosum. Face, pimples. Feet, pains. Gout. Hemoptysis. Hands, pains. Joints, disorders. Lice. Meniere's disease. Priapism. Prickly heat. Punctured wounds. Rheumatism. Skin, eruptions. Stings. Tetanus. Tinnitus. Tuberculosis. Vaccinations. Varicella. Whitlow. Wounds.

Causations

Ill effects punctured wounds, recent or chronic injuries, animal and insect bites, stings, bruises. Ill effects of alcohol, hair cutting suppressed discharges.

Constitutions

It is adapted to full-blooded, plethoric, robust. Suited to pale delicate persons. Complaints of persons who always feel cold and chilly. Rheumatic, gouty diathesis, constitutions abused by alcohol. Sanguine temperament (Teste). **Planets:** Mars, Saturn.

Modalities

Better by application of ice-water. Better from cold, bathing, air. Better from reposing. Better putting feet in cold water. Worse at night and from heat of bed, warmth of covers, stove, air. Worse injury, motion of joints, worse egg, wine, spitting. Worse evening and night. Worse taking wine.

Symptoms

MIND

Angry, out of humor. Dissatisfied, hates his fellow beings avoids their company. Anxiety. Timidity. Tendency to anger and rage. Vehement angry mood. Desire for solitude. Morose and peevish humor. Misanthropy. Dementia.

Abdomen

Pain in abdomen as if intestines were bruised. Sensation of fullness in upper part of the abdomen. Colic as if diarrhea would set in from umbilicus to anus. Ascites. Drawing pain. Dysenteric belly-ache. Frequent discharge of flatus.

Back

Lumbago. Stiffness, cramps in back, worse rising from sitting.

Chest

Chest hurts when touched. Oppressive constriction of chest. Pain along trachea.

Ears

Hardness of hearing, as if the ears were stuffed up with cotton worse cutting the hair, wetting the head.

Eyes

Bloodshot or bruised. Hemorrhage into the anterior chamber after an iridectomy. *Ptosis* of eye (right) from injury. *Contused wounds*. Aching in eyes. Cataract with gout. Tears acrid, make the lower lids and cheeks sore.

Face

Mottled. Eczema, facial. Red pimples on forehead and cheeks, stinging when touched. The submental glands are swollen. Crusty eruptions around the nose and mouth.

Female

Bleeding fibroids. Great coldness during menses, yet desires cold air. Menses too early and too copious, the blood is bright red. Leucorrhoea.

Food

Violent thirst for cold water. Want of appetite and speedy satiety.

Head

Raging, pulsating headache worse least covers. Affected after getting wet. Mis-step causes concussion in the brain. Itching as of lice. Blood boils on forehead.

Kidneys

Much uric acid and sand in urine. Urine often stops during the flow. Copious, clear, colorless urine, deficient in salts.

Limbs

Gouty pains shoot all through the foot and limb and in joints, but especially small joints. Gouty nodosities. Cramps over hip joint. Cracking in joints, worse warmth of bed. Rheumatism begins in lower limbs and ascends. (Kalm. opposite.) Swollen blotchy ecchymotic legs and feet. Heels sore. Soles painful, can hardly step on them. Trembling of hands when moving them or grasping anything. Easily, spraining of ankles. Feet itch by night and are stiff in morning. Ball of great toe swollen. (Both.) Feet held to earth as by a magnet, when attempting to move. Throbbing in right shoulder, on raising arm.

Ankles swollen.

Lungs

Cough with bloody expectoration. Hemoptysis, alternating with rheumatism or coxalgia. Dyspnea, chest feels constricted. Suffocative arrest of breathing. Bronchitis with emphysema of aged.

Whooping cough, spasmodic double inspiration with sobbing. Yellow, purulent, sputum.

Male

Pollutions of bloody or serous semen. Violent and prolonged erections. Inflammatory swelling of penis, the urethra is almost closed. Increased sexual desire.

Mouth

Bitter taste in the mouth, moldy when coughing. Sudden flow of watery saliva during colic. Musty taste with catarrhal affection.

Nose

Persistent nosebleed. (Meli., Bry.) Soreness of the nose with violent burning.

Rectum

Anal fissure. Blind smarting hemorrhoids. Painful hemorrhoids.

PAGE 983

Sensations

Pricking, biting sensations. Sensation of torpor of tissues, especially after suppressed discharge from ears, eyes and nose. Sensation as if something was gnawing in temples, occiput and ears. As if eyeball would be forced out. As if sand in eyes. Noises in ear as from ringing of bell or from a wind-storm, as if ear was obstructed by cotton. Itching as from lice on chest, as of lump in throat. As of boiling in hip-joint. As if muscles of thigh in wrong position. As if knee beaten.

Skin

Puncture wounds, twitches in from nails, stings, etc. foul pus. Ecchymosis. Long discoloration after injuries. Acne on forehead, sticking pain therein. Itching of feet and ankles, worse scratching and warmth of bed. Carbuncles. (Anthr. Tarant-c.) Antidote to rhus poisoning. (Grind., Cypr., Anac.) Eruptions on only covered part. Edematous swelling. Red spots and rash.

Sleep

Great inclination to sleep during day, a kind of drowsiness with great wish to lie down. Sleeplessness with restless tossing, jerking, fantastic visions and images on closing eyes. Agitated anxious dreams. Uneasy dreams in which he changes from place to place and from one subject to another. Lascivious dreams with emission of semen.

Stomach

Nausea on spitting. Dry, retching with eructation. Contractive pain in sternum when eating quickly. Nausea with the inclination to vomit, on expectorating. Water-brash with cramp-like pains in abdomen.

Temperature

Coldness, want of body heat. Coldness of parts, worse in limbs with the pain during fever, as if in cold water. Foul sweat. Profuse night sweat. Sensation as of cold water over parts, general coldness with heat of face.

Throat

Sore throat with shooting pain during and after deglutition. Cough tormenting from tickling in larynx with nosebleed, then sobbing respiration, worse receding eruptions. Sensation as if there were a plug in the throat.

Vertigo

Vertigo when walking with tendency to fall to one side. Distress when head is covered.

Comments

Teste relates a case of punctured wound: A young lady fell with an embroidery needle in her hand and the hand was pierced through and through. The wound was serious. There was no hemorrhage, but Teste noticed the intense cold which accompanies and characterizes *Ledum* fever. Within a week *Led.* cured the patient.

Yingling records a parallel case: A. J. M., 38, drove a rusty spike through his left foot near the arch of the instep, glancing to the inside of the foot without passing through the bone. This was at 5 p.m. At 8 p.m. this report was brought to Yingling:

A few moments after accident the patient felt stiffening pains in the foot, running up the leg and rapidly increasing in severity. Great chilliness with chattering of teeth followed. Lower jaw became somewhat stiff, general shivering, neck felt stiff, "can't endure it much longer."

Led. 3x was sent and rapid improvement took place from the first dose. A compress of *Calen.* 3 x. was also applied, an attack of tetanus being evidently aborted.

Led. occupies the second place in Teste's Arn. group in which are also Crot-t., Ferr. Mang. Rhus-t., Spig. The sphere of Led. is frequently identical with that of Arn., according to Teste.

But led has a special action on the capillary system in parts where cellular tissue is wanting and where a dry, resisting texture is present, as in the fingers and toes. "It is, perhaps for this reason that it acts better on the small joints than on the large joints," hence its appropriateness in gout.

The characteristic skin affection of Led. is thus described by Teste: Not so much a boil, as with Arn., as a sort of bluish or violet-colored tuberosities, especially on the forehead.

PAGE 984

An eczematous eruption with a tingling itching, that spreads over the whole body, penetrating into the mouth, probably also into the air-passages and occasions a spasmodic cough, which is sometimes very violent and might be mistaken for whooping cough. The same phenomenon takes place with Rhus-t. and Crot-t.

"In a gouty subject I have seen cough precede by days the breaking out of vesicle on the which could not fail to suggest the use of Ledum. These vesicles, which had existed on the bronchial membrane, before showing themselves in the face, on the shoulders, etc., became quite apparent on the tongue, where they might be traced to its root."

The Led. eczema is concentrated on one leg, less frequently on both at once. Ingalls commends a light paste of Ledum (equal parts of Led f., alcohol and water) as an application for carbuncles, giving Led. Ix internally at the same time.)

Dr. R. Hilbert, a German physician, has obtained very satisfactory results from the use of an infusion of the leaves of Ledum palustre as an expectorant in bronchitis. He states that the feeling of pain along the trachea, which is characteristic of the early stages of acute bronchitis, disappears after a few doses of the remedy.

The fever rapidly subsides, especially in the case of children. In chronic bronchitis the infusion facilitates expectoration and lessens cough.

Led. is particularly useful in bronchitis with emphysema of the aged, because of its action in rendering the bronchial secretion less viscid in these cases, moreover, it lessens dyspnea, stimulates the circulation and pirate to the remote no less than the immediate effects of punctured wounds: e.g. , as when a patient says: "Ten years ago I stepped on a nail and every since then have had a pain running up to the thigh."

The pains of Led. shoot upward, those of Kalm. downward. A very notable condition of Led. is worse from warmth. This is at times so great that the patient can only get relief to his rheumatism by sitting with his feet and legs in cold water.

Warmth of the bed is intolerable, he must get up and walk about.

An octogenarian had rheumatism of left arm, chiefly elbow and wrist, coming on in the night or early morning. There was no more sleep for him unless he rose and took a cold both after which he cold sleep. I cured him with Led. 30c.

As with men, the symptoms are worse at night, but with Merc. there is "sweat without Better" and the characteristic tongue and offensive mouth.

The eye symptoms of Led. are marked and Nash says Led. 200c is unequaled as a remedy for "black-eye" from a blow, if there is pain in the eyeball itself Symph. will be necessary. Slight injuries cause ecchymoses. Inflammation of ear with deafness from getting cold, (as having hair cut). Ecchymoses of conjunctiva.

The hemorrhages of Led. are red and gushing, uterine, respire day hemoptysis alternating with attacks of rheumatism. Suffering parts waste. Discoloration remains long in contused parts. Many cases of whooping cough have been cured with Led.

Lembke gives these indications: Before the paroxysms: Arrest of breathing. During: Nosebleed, shattered feeling in head and chest, rapid respiration. After: Staggering, spasmodic contraction of diaphragm, sobbing respiration. Worse evening. The pains are sticking, tearing, throbbing.

Pain in ankle as from sprain, limbs as if beaten and bruised. Hot, tense, hard swellings. "Ledum has often been given to horses when they go lame and draw up their legs. The pains move upward" (Hering).

E. Carleton completed the cure of a case of primary syphilis in which Aur. had done good, where these symptoms appeared: Feet held to the earth as by a magnet when attempting to move, when moving felt as if pricked with needles.

The pain rising gradually from feet to head, every joint and muscle of body and limbs stiff and sore, sore night-sweats, great emaciation with loss of appetite. Led. 200c in water, cured completely and speedily.

Lemna minor

(duckweed)

Pharmacy

Lem-m. Lemna minor. Duckweed. N. O. Lemnaceae or Pistiaceae. Tincture of the whole fresh plant. The fresh plant is pounded to a pulp and macerated in two parts by weight of alcohol. Historical dose: Tincture and all potencies, third to thirtieth potency.

History

The following is by Dr. Robert Cooper of London and appeared in the Homeopathic Monthly: says Lindley, "The lowest form of phenogamous vegetation. It consists of

lenticular floating fronds, composed of stem and leaf together and bearing the flowers in slits in the edge."

It forms the green scum found on stagnant ponds and dikes. It is found in two varieties, the Lemna minor and the Lemna gibba.

Dr. Burnett has noticed that Lemna patients have their nasal symptoms aggravated in damp and rainy weather. Lemna's symptoms are aggravated in heavy rains, Calendula's, when heavy clouds are about, Rhododendron's in thunder storms and Dulcamara's in damp surroundings and in foggy weather.

Nasal polyps in man, 60, markedly worse in wet weather after taking Lemna 3x at 5 drops three times a day for a month said: "That is the best tonic I have ever taken" and he could breathe quite comfortably. **Planets:** Mercury.

Homeopathic

Lemna minor acts especially upon the nostrils. A catarrhal remedy. Nasal polyps, swollen turbinates. Atrophic rhinitis. Asthma from nasal obstruction, worse in wet weather.

Foul smell in nose or loss of smell. Nose blocked with polyps. Excessive catarrh with frequent sneezing attacks. Atrophic rhinitis, crusts and muco-purulent discharge very abundant with fetor.

Clinical

Asthma. Nose disorders. Ozaena. Polyps. Rhinitis atrophica.

Modalities

Worse in damp, rainy weather, especially heavy rains.

Symptoms

Abdomen

Twisting pains in bowels, followed by diarrhea. Rumbling and disturbance in bowels.

Ears

Improvement in hearing.

Face

Pale, dull, sickly look changed to a healthy complexion.

Head

Flitting pains about head and legs with pains in eyes during heavy rain, drowsy by day, restless at night.

Lungs

Asthma, attacks coming on in rainy weather.

Mouth

Putrid taste on rising in the morning. Dry pharynx and larynx. Foulness of mouth, putrid teeth.

Nose

Polyyps which swell in wet weather. Nostrils plugged by swollen turbinates. Putrid smell. Loss of smell. Crusts and muco-purulent discharge very abundant. Post-nasal dropping. Pain like a string from nostrils to ear. Reduces nasal obstruction when it is an edematous condition. Dryness of naso-pharynx. Feeling of cold in nose better, sense of obstruction nearly gone. Post-nasal ulceration. Crusts form in right nostril.

PAGE 986

Rectum

Disposition to noisy diarrhea. Diarrhea with pains across bowels as from flatus worse after eating with very putrid teeth. Bowels acted freely with much heat in anus. Disposition to morning diarrhea.

Sleep

Snoring cured after an aggravation of diarrhea.

Throat

Sensation of intense dryness in pharynx and larynx, (if given too low in atrophic rhinitis). Dropping of foul secretion from posterior sinuses.

Comments

Clarke writes: (1) A lady, aged forty-seven, two years previously met with an accident, a sign board fell on her head when out walking in the street. Seven days after that was taken with sneezing attacks, suffered from nasal catarrh with little intermission until March, 1893, when she came under my care.

Psorinum 30c soon put a different complexion on the case and she became so far relieved of her trouble,

(which has made her life almost unbearable, as she never dared make an appointment for fear of an attack coming on) that she discontinued treatment.

Last Christmas a sharp attack of influenza brought back the catarrh and this time it proved less amenable to treatment.

Fears of polyps distressed the patient, though Clarke could not discover any. However, she again made progress, when he thought of giving her Lemna on indications given by Dr. Cooper.

On February 15, 1894, Clarke gave Lemna 3x, one tablet four times a day. February 22, very much Better has felt freer in the head than at any time during the last ten years, has felt very much better generally, spirits braced up.

She steadily progressed to cure and by March 15 could endure the smell of strong scented flowers, which before was impossible.

Captain B., aged forty-four, consulted me on February 29, 1894, for violent neuralgia on the right side of the neck, the part being exquisitely sensitive to touch. He had cough and cold for a month. On getting up in the morning he filled two pocket handkerchiefs with yellow effusion before he got his nose clear.

Clarke gave him Bell. 12c to take until the neuralgia was Better and then told him to take Lemna 3x, three times a day. On March 9 he reported that the Bell. speedily took away the neuralgia and that then the Lemna cleared off the catarrh in a most astonishing fashion. He never had a medicine to act so magically before.

A gentleman of sixty years of age with nasal polyps only moderately developed, yet of many years' duration, was much troubled by the chronic nasal obstruction which was markedly worse in wet weather. Clarke gave him Lemna 3x, five drops in water, night and morning. Returning in a month, he exclaimed:

"That is the best tonic I have ever taken, I have never taken any medicine in my life that has done me so much good.

I feel quite comfortable in my nose and can breathe through it quite well."

Lemna has so far given relief to cases of nasal polyps and to cases where the nostrils were plugged by swollen turbinates and other causes in a manner far surpassing the effect from any other remedy.

The indications that have been noticed as belonging to Lemna are either a putrid smell in the nose or a loss of all sense of smell. Also a putrid taste in the mouth, especially on rising in the morning with a general foulness of mouth, due apparently to the dropping down of impure material from the postnasal region. Along with this there sometimes seems to prevail a disposition to "noisy diarrhea."

Leonurus cardiaca

(motherwort)

Pharmacy

Leon. Leonurus cardiaca. Motherwort. N. O. Labiate. Tincture or infusion of fresh plant.

Historical dose: Tincture and all potencies.

Herbal

The popular name of this plant sufficiently indicates its traditional virtues. The only experience with it is an involuntary proving recorded by Clarence Bartlett.

A married woman, 40 took an infusion to produce miscarriage. Twenty-four hours later Bartlett saw her and found her vomiting and retching, passing bloody stools, suffering severe abdominal pains.

Which were provoked by drinking anything more than a small quantity of water, which she did to allay her great thirst. Dry conjunctive, dry, cracked tongue were noted. The bowels symptoms were worse midnight to 3 a.m. Ars. 3x relieved all symptoms. She did not miscarry. **Planets:** Moon.

Homeopathic

Leon. is valuable in suppressed lochia and menses. Leon. influences pelvic organs, allays spasm and nervous irritability. It promotes secretions and reduces febrile excitement.

Dysentery, vomiting, frightful pains in abdomen, violent thirst. Tongue dry and cracked.

Clinical

Dysentery. Hemorrhages.

Symptoms

Abdomen

Very severe abdominal pains with soreness to touch, when lying on side better drawing up legs, when on back better with legs out straight.

Eyes

Conjunctive had a very dry appearance: looked as if wiped dry.

Female

Tends to miscarry. Suppressed lochia and menses.

Food

Intense thirst, yet drinking more than a very slight quantity of water, warm or cold, provoked epigastric pains.

Mouth

Tongue dry, coated or brownish white, covered with cracks in arborescent arrangement, main crack down center.

Rectum

During the night, frequent calls to stool, stools dark brown at first afterwards bloody. Later stools contained larger quantities of blood, never any mucus.

Stomach

Shortly after taking the remedy seized with vomiting and retching, more retching.

Lepidium bonariense

(brazilian cress)

Pharmacy

Lepi. Lepidium bonariense. Brazilian cress. Lepidium mastruco. N. O. Crucifere or Brassicacee. Tincture and trituration of fresh leaves. Historical dose: Tincture, trituration and all potencies.

Herbal

Lepidium is a Brazilian cress, "very common in the neighborhood of Rio, where it is found along the roads and in stony regions" (Mure). It is a great remedy in domestic practice in Brazil and is used for purposes similar to those for which Arnica is used. All the Lepidium are anti-scorbutic and left oleraceum, the New Zealand variety, was eagerly sought after as a remedy for scurvy by the early voyagers. **Planets:** Moon, Sun.

Homeopathic

Lepi. has disorders of breast, heart, sharp pains. With heart symptoms, numbness and pain in left arm, sensation of sinking in pit of stomach. Left side of head, face, chest, hip to knee, all have sharp pain. A streak of pain from the temple to the chin, as if the face were cut with a razor.

Burning in the throat, roaring in ears. Sensation of a tight girdle around chest, as of a knife piercing the heart. Pain in neck, back and limbs.

PAGE 988

Clinical

Breasts disorders. Cough. Headaches. **Heart** disorders. Indigestion. Rheumatism.

Symptoms

MIND

Imagined the floor sinking under her. Inability to think. Imagines herself pursued by a phantom in a churchyard, cries with loss of voice next morning. Sad and quarrelsome.

Comments

Mure's proving of Lepi. brought out some distinctive symptoms on the left side of the head in the limbs and especially in the heart. Along with the latter was numbness and pain in the left arm, which should indicate usefulness in that sphere.

There was the sinking feeling in the pit of the stomach indicating an action in the solar plexus. Many of the pains dart from one part to another.

Sharp pains and throbbing pains are frequent. There is worse from stooping and worse from turning head to the right. worse When covered. It needs clinical elucidation.

Leptandra virginica

(culver's root)

Pharmacy

Lept. *Leptandra virginica*. Culver's root. *Veronica Virginica*. Black Root. Culver's Physic. Tall Speed well. N. O. Scrophulariaceae. Tincture of resinoid Leptandrin. Tincture of fresh root of second year. Trituration of dried root. A fresh plant tincture should also be made and tested. Historical dose: Trituration, tincture and all potencies, tincture to third potency.

Herbal

Leptandra in the form of the resinoid Leptandrin has been the subject of an heroic proving by Burt.

As one of the grand characteristics of it relative *Digitalis* in white stools, so the grand characteristic of *Lept.* is black stools.

Hale gives the following as the order in which the different kinds of stools occur in the time of the proving. (1) Black, thick, tar-like, fetid. (2) Thinner, brownish often fetid. (3) Stool of mixed mucus, flocculent and watery matter with yellow bile or blood. (4) Mucous bloody stool mixed with shred-like substances often pure blood.

Hale says it is only in cases of dysentery which have developed in this way that *Lept.* is curative, not in cases primarily dysenteric. Cases due to sudden climatic changes have been cured by it. **Planets:** Jupiter, Mars.

Homeopathic

Lept. affects the right side and liver, causing hemorrhages due to liver disorders. Jaundice and black, tarry stools. Bilious states. Enfeebled portal circulation. Malarial conditions. Weakness, hardly able to stand or walk.

Clinical

Ascites. Bilious attack. Bilious fever. Constipation. Diarrhea. Dysentery. Dyspepsia. Headache. Jaundice. Livers disorders. Remittent fever infantile. Yellow fever.

Modalities

Better from lying on abdomen, on side. Worse from cold drinks. Worse motion. Worse periodically. Worse from exposure to wet weather.

Symptoms

MIND

Hopeless, despondent and drowsy with liver disorders. Gloomy, despondent, drowsy. Irritable all day. Weary, can hardly walk.

Abdomen

Great distress in stomach and intestines with desire for stool. Sore or dull, burning ache over liver or near gall bladder, extending down over bowels to navel or towards left scapula or along spine, which feels chilly. Constant dull aching in umbilical region.

Back

Chilly sensation in shoulders and down back. Sore, lame feeling in small of back. Constant distress with very sharp pains by spells in lumbar region.

PAGE 989

Eyes

Profuse lachrymation. Smarting and aching in eyes with dull pain in eyeballs. Lids agglutinated.

Female

Menses, suppressed or retarded with liver affection. Leucorrhoea, warm, watery, runs down the limbs from ulceration of the os.

Food

Craving for cold drinks. Meat and vegetables disagree. Canine hunger.

Head

Dull frontal headache with aching in navel. Dull pain, vertigo, drowsiness and depression. Smarting and aching in eyes.

Heart

Soreness in heart. Pulse slow and full.

Kidneys

Red or orange colored urine with dull aching in lumbar region.

Limbs

Pain in sciatic nerve (left), worse on sitting. Nails very thin, soft and splitting.

Liver

Acute liver conditions. Burning in liver region. Bilious states. Sore or dull, burning ache over liver or near gall bladder. Liver swollen transversely. Gallstones. Jaundice.

Dull aching in liver, worse near gall-bladder. Burning distress in back part of liver and spine. Periodical liver derangement, every two or three months.

Mouth

Tongue, yellow or black down center. Flat taste.

Rectum

Jaundice with clay-colored stools. Stools, muddy, watery, worse morning, tarry or black, foul with pain at umbilicus. Bleeding hemorrhoids. Typhoid stools turn black and look like tar. Clay-colored stools with jaundice. Prolapse of rectum with hemorrhoids. Rectal hemorrhage. Stingy, waxy or spurting in the morning with pain at navel.

Skin

Jaundice. Dry, hot skin.

Sleep

Sleep sound. Sleep restless after midnight, felt very ill next day.

Stomach

Craving for cold drinks which aggravates burning and aching in stomach. Bilious vomiting. Sinking at the pit of stomach. Nausea and deathly faintness on rising. Vomiting of bile, yellow tongue, shooting pains about liver, black stools. Great distress in stomach and small intestines with immediate desire for stool.

Temperature

Chilly along the spine and down the arm. Shivering or dry, hot skin, limbs cold and numb tongue black down center. Bilious typhoid fever.

Comments

Lept. has great varieties of stool and in the later stages of the proving it became dysenteric and mixed with shreds. There was also constipation with hard black stool, followed by softer stools.

With the Lept. liver symptoms there was dull, heavy, frontal headache. These symptoms confirm the use of the drug by eclectics as a kind of "vegetable calomel." But though black stools are the chief characteristic, they are not the only kind that Lept. causes.

Farrington further characterizes the liver action of Lept.: Dull aching in right hypochondrium, gallbladder and back of liver, accompanied by soreness.

Burning distress in and about liver after spreading to stomach and bowels. With this there is drowsiness and despondency. Bilious and typhoid fevers with the black, tarry stools.

Neidhard observed a periodicity in cases cured by him: Periodical, occurring every two or three months, yellow-coated tongue, constant nausea with vomiting of bile, shooting or aching pains in region of liver, loss of appetite, urine brownish or, at any rate, very dark often pain in transverse colon, giddiness. But the most characteristic symptom is very dark, almost black stools.

In cases of disease of any kind when these characteristic black stools are present Lept. must be thought. Like Euphr., Lept. has a number of eye symptoms.

Lept. is a right-side medicine, has chilly sensation along spine and down right arm, pains in right shoulder and arm. The symptoms are worse by motion: rising causes nausea and faintness. Weakness is so great he is hardly able to stand.

A peculiar sensation is, "Feeling as if something was passing our of rectum."

PAGE 990

Levico aqua

Pharmacy

Lev. Levico aqua. An arsenical mineral water of the South Tyrol, containing also Iron and Copper with other elements. Dilutions. Historical dose: Tincture and all potencies, ten drops in wine glass of warm water 3 times a day after meals. (Burnett).

History

Levico Water, containing Ars., Iron and Copper of South Tyrol. Levico has a high reputation among health resorts for nervous and skin cases, favoring assimilation and increasing nutrition.

Burnett is the only homeopathic authority. He says "Levico in 5 to 10 drop doses is a valuable intercurrent to help in grave cases where there is much debility.

Notably after the searching remedies such as Bacillinum." Levico is supplied in two strengths, the strong and the weak. Either may be used in the doses indicated by Dr. Burnett, which is much smaller than that usually prescribed. **Planets:** Saturn.

Homeopathic

Lev. has chronic skin diseases, chorea minor and spasms in scrofulous and anemic children. Favors assimilation and increases nutrition. Debility and skin diseases.

Clinical

Debility. Skin. diseases.

SOURCES

Clarke.

Levomepromazinum

Pharmacy

Levo. Levomepromazine. Historical dose: All potencies, 5c to 30c.

History

The salt, used therapeutically is the maleate. Its action is depressive. It's properties are anti-convulsive, sedative, anti-emetic, anti-histaminic. It is used in psychiatry for maniacal cases, conditions of agitation, delirium and hallucination in the form of tablets of 5 mg and 25 mg.

The symptomatology given below is the result of the notation of the toxicology of the product from the account of the clinical case of a female patient in Brussels from self-observation by a pharmacist and finally from the proving carried out according to Hahnemann's method, by O. A. Julian, on a group of sixteen provers, nine men and seven women during the winter of 1968-69. The potencies used were: 3x, 7c, 9c, 15c, 30c and placebo. As usual, it was 7c which produced the most symptoms and in one case, it was especially 30c.

Homeopathic

Levomepromazine has the mental complaints of a depressive and schizophrenic nature. General apathy with nausea. Mental laziness with agitation. Morning, fatigue and lassitude. Fatigue, sleepiness around 5 p.m. with slow heart beat. Hypotension and tachycardia.

Multiple allergic sensitivities. Intestinal, hepatic and gastric malfunctioning. Increase in weight.

Clear diminution in attention in activity and ability to concentrate, attenuated by coffee and a cigarette.

Clinical

Agoraphobia. Alcoholism. Allergies. Anorexia. Athetosis. Chorea. Epilepsy. Hypotension. Hypothyroidism. Mental disorders. Myoclonia. Parkinson's Disease. Wilson's Disease.

Constitutions

In general, they are phospho-fluoric types or tubercular with psychomotor depression, hypotension and disinterest in the environment. Phosphor-flouric types, listless with morning fatigue. **Planets:** Moon, Mercury.

Modalities

Better from gentle heat. Better from coffee tobacco. Worse from light. Worse from a crowd.

PAGE 991

Symptoms

MIND

Mental disorders of all sorts. Disinterested state. Instability and anguish. Premonition of an indefinable imminent event. Anxiety from anticipation. State of panic with desire to cry out for help. Anguish, aggravated in a room with light and people. Desire to weep. Fear of going mad, nervy, on edge. Desire to harm someone and headache.

Schizoid cases. Anorexia. Agoraphobia. Hallucinations in chronic alcoholics. Neurosis from anguish.

Abdomen

Distention after eating starch food. Hypertrophic cirrhosis of the liver. Entero-hepatic syndrome. Gastric and intestinal dyspepsia.

Back

Pains in the shoulder.

Blood

Rise in the sedimentation rate.

Chest

Oppression of chest.

Ears

Diminished hearing. Diminution in auditory acuity.

Eyes

Feeling of eyes enlarged.

Food

Anorexia, alternating with bulimia and desire to eat anything. Progressive loss of appetite. Cannot digest milk, milk products, crustacea. Desire for alcoholic drinks which are badly tolerated.

Head

Diffuse, dull headache.

Heart

Acrocyanosis. Tachycardia neurosis, on exertion in anxious types.

Postural hypotension. **Heart** constricted with anguish in the morning. Palpitations at the slightest effort.

Kidneys

Oliguria.

Limbs

Cramps in the toes. Arthritis of the scapula and the humerus. Cramps. Clumsiness, drops things. Twisting spasms. Circulatory disorders at the periphery, the limbs of the limbs take on a purple color with mauve or white patches.

Lungs

Dyspnea on effort. Tachycardia with asthma. Attacks of dyspnea. Dyspnea from anguish. Nervous asthma.

Male

Urinary retention. Diminished libido. Neurotic impotence.

Mouth

Dryness in the mouth. Bitterness and bad breath. Tongue whitish-gray with absence of thirst.

Nose

Diminished sense of smell.

Rectum

Diarrhea with liquid stools around 8 p.m. with 4-5 successive stools. Constipation.

Skin

Painful skin hardening without suppuration, following intra-muscular injections of Levomepromazine. Pruritus sometimes accompanied by small urticaria patches. Prurigo strophulus.

Sleep

Yawning with sleepiness after meals. Sleepiness. Dreams unpleasant, anguished, about the death of dear people.

Stomach

Gastric and intestinal dyspepsia.

Vertigo

Feeling of faintness.

Compare

(1) Sep. - Apathy, sadness, headache with pressing pains. Feeling of emptiness in the stomach. Yellowish mark across the nose. Desire to be alone.

(2) Tub. - Weakness with constant need to change place. Headache from mental exertion. Anxious, glum, melancholic. Morning diarrhea.

(3) Chlorpromazine - Disorders of the body of the endocrine system and the thalamus of an introverted psychopathic nature. Hallucination, genetic troubles. Thermal and hepatic disorders. General slowing down and dumbness. Catatonic syndrome. Vesicular, bullous rashes and pigmentation disorders.

Liatris spicata

(colic root)

Pharmacy

Liat. *Liatris spicata*. Serratula. Colic root. Dense button-snakeroot. Gay feather. Devil's bit. N. O. Composite, tribe Cioracee. Tincture of powdered fresh root. Historical dose: Tincture and all potencies, 1 to 4 drams of tincture or infusion.

Herbal

Liatris is an old herbal remedy for indigestion and colic. T. C. Duncan explains, it is called "Devil's bit," a piece is missing from each tubes, Just as if it had been bitten out.

Liatris has the reputation of being "aromatic, stimulant, diaphoretic, diuretic, anodyne and carminative," particularly useful in colic, headache and flatulency. **Planets:** Jupiter.

PAGE 992

Homeopathic

Liatris is a vascular stimulant. Increases functional activity of the skin, mucous membranes. Of use in dropsy due to liver and spleen diseases, also kidney dropsy. Here the suppressed urination is most favorably influenced.

General anasarca due to heart and kidney disease. Colic. Diarrhea with violent urging and pain in lower part of back. Liat. locally, applied to ulcers and unhealthy wounds. It is a prompt diuretic.

Clinical

Anasarca. Colic. Diarrhea. Dropsy. Kidney dropsy. Ulcers.

Comments

Liat. was introduced to homeopathic medicine because of its action in two cases of dropsy under eclectic treatment. (1) Dropsy from material enlargement of liver and spleen. (2) Dropsy with almost total suppression of urine. After other remedies had failed *Liatris* was given and on the second day the patient passed a gallon and a half of urine.

A. E. White wrote of another use of Liat. It has a popular repute as specific in chronic diarrhea following exposure in camp life and also as an application to non granulating ulcers.

For this purpose the root is to be chewed and then applied. White was invited to chew a piece, which he did.

The result was in six or eight hours he had three successive calls to stool, very urgent, a little griping in lower back and some straining at stool. He has confirmed its use in camp diarrhea, but says it acts better if Sulph. or Merc-c. is given first.

He gives this case. Mr. X, 56, had chronic diarrhea since the war. He had tried treatment of all kinds, homeopathic included. Had twelve to sixteen stools a day. He had loss many pounds in weight. He was all run down and had made up his mind he had only a short time to live. He was given Sulph. 30x two doses, one each night, then Merc-c. 3x, a dose each night for five nights, then Liat. 1x, four pellets each night for five weeks, by which time he was completely cured.

SOURCES

Boericke. Clarke. Phatak.

LILIUM TIGRINUM

(Tiger Lily)

Pharmacy

Lil-t. Liliium tigrinum. Tiger lily. N. O. Liliaceae. Tincture of fresh stalk, leaves and flowers. Historical dose: Tincture and all potencies, middle and higher potencies.

Herbal

The Tiger Lily, which was introduced into the West from China and Japan, was first suggested as a remedy by W. E. Payne. Carrol Dunham urged Payne to have it well proved. This Payne did and Dunham himself assisted by having it proved on a woman under his own supervision.

The account of this case of Liliium tigrinum disease with others is given in Dunham's lucid style in his Science of Therapeutics. Some of the provings were made with tincture of the pollen alone.

The symptoms developed in this order: (1) Increased activity, things went more easily. (2) Increased sexual instinct. (3) Sweetish nausea without inclination to vomit. Abnormal fullness worse after eating ever so little. (4) Ill humor, drowsiness, sleep but with unpleasant dreams.

(5) Bloating more pronounced and chiefly across hips in uterine region, darting pains in head and lower abdomen from ovaries down thighs, pressure in vagina, pain at to of sacrum extending to hips. (6) Crazy feeling with thoughts of suicide, head grows wild after being quiet for a short time increased depressing weight over pasting, worse evening. knees ache.

Since ten days when the first dose was given, no more medicine was taken, but the Lil. tig. disease continued to develop and increase in intensity for eight weeks longer, when it was so bad that it had to be put an end to by an antidote. **Planets:** Venus, Sun.

Homeopathic

Liliium tigrinum manifests its chief action upon the venous circulation, the heart and female organs, ovaries and uterus and is useful for many reflex conditions dependent on some pathological condition of these organs.

PAGE 993

It also affects rectum and bladder and left side. Often indicated in unmarried women.

Manifests powerful influence over the pelvic organs. It is adapted to many uterine reflex states, dependent on some pathology of uterus and ovaries. More often indicated in unmarried women. The action on the heart is very marked. Pain in small spots. (Ox-ac.) Rheumatic arthritis. Burning palms and soles accompany complaints.

Full, heavy or forced out feeling in uterus, ovaries, heart etc. Utero-ovarian sagging. Wandering, flying, shooting pains or opening and shutting pains, radiating from ovary to heart to left breast, down the legs etc. Backward pains, about eyes to occiput from nipples through chest from heart to left scapula.

Lil-t. has pain in small spots. Pulsations, ebullitions, gurglings and burnings. Nervous tremors in hypogastrium in spine, knees etc. Venous congestion. Discharges acrid. Nervous, hysterical. Faints in warm room or after standing for a long time. Women exhausted by sexual excess. Symptoms of sexual over excitement. Rheumatism.

Clinical

Angina pectoris. Arthritis. Asthenopia. Astigmatism. Dementia. Diarrhea, Dysentery.

Eyes disorders. Fibroma. **Heart**, disorders. Hysteria. Ovarian disorders. Pruritus vulva. Spinal irritation. Urination, frequent. Uterus, disorders.

Modalities

Pressure and support better. Better from cool, open, fresh air. Better when busy. Better lying on left side. Worse from warmth of the room. Worse from motion, miscarriage, walking, standing. Worse from consolation, pressure of bed clothes, jarring, lying on left side, sunset, pressure, support, crossing legs, rubbing. Worse afternoon from 5 p.m. to 8 a.m. Diarrhea worse early morning. Jarring worse.

Symptoms

MIND

Mental and uterine, mental and heart symptoms alternate. Feels hurried, walks fast, does not know why. Must keep busy. Snappish. Tormented about her salvation. Consolation will aggravate. Profound depression of spirits. Constant inclination to weep.

Anxious, fears some organic and incurable disease. Disposed to curse, strike, think obscene things. Dread of insanity. Wild, crazy feeling.

Inclination to weep, weeps much is very timid and indifferent to anything done for her. Dissatisfied, envious of others. Sits alone and broods over imaginary troubles. Strong sexual desire. Sexual excitement, alternating with apprehension of religious ideas. Dementia from business worries and sexual excess, tears the hair.

Abdomen

Abdomen sore, distended, trembling sensation in abdomen. Bearing down in lower part of abdomen. Skin of abdomen feels stretched and stiff. Heavy dragging down of whole abdominal contents extending even to organs of chest, must support the abdomen with dysuria. Sharp pains, better gentle rubbing with warm hand. Sharp pains better doubling up.

Back

Neck aches, worse tired. Broken feeling between scapulae. Sensation of pulling upward from tip of coccyx. Spine sore, with stiffness worse in loins. Dull pain in sacrum.

Breasts

As of a rivet or ball under left breast.

Chest

Oppressive load on chest. Tightness of chest. Hot, congested feeling. Sharp pain through right lung worse in open air.

Ears

Rushing sounds in ear after going to bed. Neuralgia in right ear. Rushing sounds in ears after going to bed.

Eyes

Feel sprained, bite and burn worse reading. Wild look. Myopic *astigmatism*, has to turn the head sideways to see clearly. Hyperesthesia of retina. Pain, extending back into head, lachrymation and impaired vision. Weakened ciliary muscle. (Arg-n.)

Female

Prolapse or anteversion of uterus. Menses, early, scanty, dark, clotted offensive. Flow only when moving about. Congestion of uterus, prolapsed, anteversion. Bearing-down

sensation with urgent desire for stool, as though all organs would escape. (Sep., Lac-c., Bell.) Constant desire to support parts externally. Ovarian (left) pain down thighs or up below the left breast. Leucorrhea, thin, brown, acrid, stains brown, worse after menses. Sexual desire increased, obscene, must keep herself busy. Bloated feeling in uterine region. Neuralgic pains in uterus, cannot bear pressure of clothes. Sub-involution. Pruritis pudendi.

PAGE 994

Food

Craving for meat or for sour or sweet dainties. Aversion to coffee to bread. Hungry, longs for meat. Thirsty, drinks often and much and before severe symptoms.

Head

Hot, dull, heavy. Faint in warm room. Wild feeling in head, as though she would be crazy. Headache burning, dependent on uterine disorders, worse before and after menses, better at sunset. Headache over left eye to vertex with vertigo and visual effects.

Heart

Sensation as if heart were grasped in a vise. (Cact.) Feels clutched, full to bursting, cold, weak, hanging by a thread. Palpitations. Pain in cardiac region with feeling of a load on chest. Cold feeling about heart. Suffocating feeling in a crowded and warm room. Angina pectoris with pain in right arm. Pulse irregular, very rapid. Pulsations all over the body.

Kidneys

Frequent urging. Constant pressure on bladder with constant desire to urinate with a sensation as of a ball in rectum. Urine, milky, scanty, hot. If desire is not attended to, feeling of congestion in chest.

Limbs

Cannot walk on uneven ground. Staggering gait, cannot walk straight. Pain in back and spine with trembling, but oftener in front of a pressing-down character. Paralytic stiffness of fingers. Joints feel dry. Pain in right arm and hip. Pain from hip to hip. Legs ache, cannot keep them still. As of a cool wind blowing on legs. Pain in ankle joint. Burning palms and soles. Trembling of knees. Pricking in fingers.

Lungs

Air hunger, takes long deep breath. As of a lump in the center of chest moving up and down on empty swallowing. Suffocates in a warm or crowded room, theater or church.

Mouth

Tongue, coated yellowish, white in patches. Sweet tasteÑback of mouth, foul, better eating. Darting pain from teeth to ear. Mouth and throat feel coated on waking in the night. Saliva abundant. Taste bloody.

Nose

Sneezing, better pain in head and eyes. Rubbed her nose violently. Discharge thin, clear, yellow mucus. Nose stopped up.

Rectum

Weak tremulous feeling extending to anus. Constant desire to defecate from pressure in rectum, worse standing. Early morning diarrhea after rising, urgent, cannot wait a moment, stools, small, frequent with tenesmus. Tenesmus of the rectum and bladder. Hemorrhoids after delivery.

Dysentery, mucus and blood with tenesmus, especially in plethoric and nervous women at menopause.

Sensations

With nausea, a lump in center of chest which could be moved down by empty swallowing. As if an electric current in fingers and hands. As if cool wind blowing on lower limbs.

Skin

Tingling, formication, burning in various parts. Irritation of upper chest and arms and a fine rash about forehead and around borders of the hair with much itching. Skin of abdomen feels stiff and stretched.

PAGE 995

Sleep

Unable to sleep on account of wild feeling in head. Unrefreshing sleep with bad dreams. Yawning, stretching, drowsy. Slept soundly, but suddenly waked by desire to evacuate bladder. Restless sleep, wild feeling in head, everything seems too hot. Dreams are frightful and labored, unpleasant, voluptuous, half-awaking.

Stomach

Hunger, as if from spine. As of a hard body rolling around during day only. Vomiting from displacement of uterus. Flatulent, nausea with sensation of lump in stomach.

Temperature

Chilly in cool open air, otherwise better. Great heat and lassitude in afternoon with throbbing throughout body.

Throat

Hawking of mucous with constant nausea. Enlargement of right tonsil, with exudation. Soreness and dryness. Feeling of lump, with pulsations when lying.

Comments

Of these Lil-t. symptoms the most prominent were a "downward dragging" from shoulders from thorax from left breast from epigastrium down to pelvis and out at the vagina as if everything would be forced through.

Late in the proving a thin brown leucorrhoea appeared, leaving a brown stain this was a intermittent. The downward pressure involved the rectum and bladder and loins.

There was consciousness of the ovaries as distinct painful and burning spots with pains radiating from them down the thighs. Menses came at regular times but flowed only as long as she kept moving. Much hurried and driven, she knows not why.

Heart symptoms came on at this time, about a month after commencing the proving: sudden fluttering sensation, less felt if she can busy herself very much. Faintness accompanied the fluttering, as though she could make no exertion but must sit still.

Sharp pain in apex of heart. After a cessation of symptoms for about a week there was a recurrence of the same including, leucorrhoea, burning pain from groin to groin with new mental symptoms including obscene thoughts and disposition to strike and swear.

Menses recurred after only two weeks' interval, leucorrhoea having ceased two days before. After another brief interval the second recurrence occurred, which was put an end to by Platinum.

In male provers there was a good deal of pelvic distress, affecting bladder, rectum and back and a very decided increase in sexual instinct but nothing approaching the intensity of the action on the female organs.

The heart in the males appears to have borne the chief impact of the drug's action. The outward forcing in which the down-dragging symptoms of the female provers culminated was manifested in other symptoms.

One man had this: The heart's action was intermittent, every intermission followed by a violent throb, causing an involuntary catching of the breath, at the same time the blood rushed up through the carotids to the head, producing great heat and crowded feeling of head and face.

Another prover, woman, 53, who had ceased to menstruate took a drop of Lil-t. 30c. She had: A feeling of exhaustion as if the blood were pushed outward and later a blinding headache "as if all the blood were pressing outward through every aperture."

S. Lilienthal had among his symptoms: "A sensation as if a rubber band were stretched tightly from temple to temple, as if a skullcap were crushing the head, as if the brain was being pushed through eyes and ears."

"Outward forcing" is plainly a keynote of this remedy and the contractive pains at the heart as if grasped with a hand are all of a piece with this. The characteristic feature in the heart-grip is an intermittent pressure.

Also, there is alternate spasm and relaxation as if a hand squeezed the heart and then let go and squeezed again. Another leading indication is when there is pain and numbness in the right arm along with the heart pain and again when there is alternation between heart pains and uterine or ovarian pains.

The pains of Lil-t. are wandering, flying, shooting, squeezing and relaxing, opening and shutting, burning and radiating.

PAGE 996

They radiate from ovary to heart to left breast, down legs (especially left), across to opposite ovary, through left breast to back from ilium to ilium, across sacrum. In contradistinction to the down-dragging is a "pulling-up" sensation from the tip of the coccyx.

A patient to whom Clarke gave Lil-t. 30c said it caused a sensation in the abdomen as if the contents were "tied up in knots." C. Sigmund Raue has observed excellent results from Lil-t. 3x and 30c in cases of uterine fibroid presenting the characteristic symptoms of the remedy. The Lil-t. 2x and 3x caused severe aggravations, backache, fever and sweat during the night, fear of dying.

The eyes were the seat of many marked symptoms and one prover who was astigmatic after much suffering in the eyes during the proving, found her astigmatism gone when the proving was over.

Lil-t. has the left side most markedly affected. Intense restlessness, nervous system irritable, weak, trembling, aimless hurry, walks to and fro.

Convulsive contractions of almost all muscles of body and feeling as if she would be crazy if she did not hold tightly upon herself feeling as if she must scream. "Cannot walk on uneven ground." (H. C. Allen).

Berridge cured a lady, 50 of heart pain, as if grasped with hand with cold feeling from apex of heart to under left scapula, excited by worry, worse lying on right side, better lying on left side and when busy at work.

Compare

(1) Cact., Helon., Murex, Sep., Plat., Pall.

(2) Sep. - very like in most respects, but Lil-t. better by diverting mind and busying about, Sep. better by violent exertion, leucorrhoea of Lil-t. is more excoriating, Lil-t. worse afternoon, Sep. better afternoon, Lil-t. pressure in anus, Sep. weight like a heavy ball.

(3) Puls. - worse in warm room, venous stasis with taste of blood in mouth, weeping mood, Puls. quiet weeping.

(4) Nat-m. - heart, uterus, coldness about heart.

Compare

(5) Helon. - profound melancholy with consciousness of womb.

(6) Cact. - heart constricted by iron band, constriction continuous, Lil-t. intermittent, uterine and ovarian pains.

(7) Sulph. - early morning diarrhoea, burning palms and soles.

(8) Zinc - heart symptoms better by lying on left side.

(9) Pall. over-sensitive Plat., hauteur.

(10) Aur. - prolapse, Aur. from weight of organ, Lil-t. from relaxation of ligaments.

(11) Rhus - pain and numbness of left arm with heart disease, Lil-t. more characteristic, right.

Limulus cyclops

(king-crab)

Pharmacy

Lim. *Limulus cyclops*. Horse foot. King crab. *Polyphemus occidentalis*. Sauce-pan. N. O. Merostomata or the pecilopoda of the Crustacea. Coast of North America. Triturations of the dried blood. Historical dose: Tincture and all potencies, sixth potency.

History

Limulus was introduced by Hering and partially proved by him and Lippe. Hering was surprised to see the blood of the Kingcrab that he dissected, blue, which on investigation, was found to contain copper as he had surmised and which he thought would prove to be another medicine for Cholera.

Further provings are necessary to establish this, though symptoms so far observed make this probable. **Planets:** Moon.

Homeopathic

Among the Lim. symptoms recorded the most notable was a rush of blood to the face with heat of face and over whole body, recalling a similar symptom of Aster., another sea-animal. Gastro-enteric symptoms. Bodily and mental exhaustion, drowsiness after sea bathing. Painful fullness of whole right side of body.

Clinical

Cholera. Constipation. Diarrhea. Fever. Hemorrhoids. Sea-bathing, effects. Skin, affection. Strokes.

PAGE 997

Symptoms

Abdomen

Colic with heat. Cramp-like pain with watery stools. Abdomen hot and constricted.

Head

Mental depression. Difficult to remember names, confused with heat of face, rush of blood to face, worse when meditating. Pain behind left eye-ball.

Limbs

Crural neuralgia. Soles of feet ache, feel numb. Pain in right hip-joint. Heels sore.

Lungs

Husky voice. Dyspnea after drinking water. Oppression of chest.

Nose

Fluent coryza. Sneezing worse drinking water. Constant nasal dropping. Pressure above nose and behind eyes.

Rectum

Hemorrhoids, constriction of anus.

Skin

Itching spots and vesicles on face and hands. Burning in palms.

Comments

The only italicized *Lim.* symptoms in Allen are these: "Frequent rush of blood to the face and painful fullness of the whole right half of the body, especially here and there and in the lower limbs" and "heat, burning and constriction in abdomen".

There was much gastro-intestinal disturbance and in one prover a choleraic condition. Headache caused by straining at stool. The flushing of the face was worse in afternoon. there was dyspnea worse by drinking. Coryza worse drinking cold water. Heat in face alternated with confusion in head.

Compare

(1) Aster., Hom., Cupr.

(2) Ferr. - flushing. Indium - pains in head from straining at stool. Ars. - ill-effects of sea-bathing.

Linaria vulgaris

(snap dragon)

Pharmacy

Lina. *Linaria vulgaris*. Snap dragon. Toad-flax. N. O. Scrophulariaceae. Tincture of fresh plant. Historical dose: Tincture and all potencies, third potency.

History

Linaria has been proved by Muller, Raidl and others. In domestic practice *Linaria* has long been used as a lotion for inflamed eyes and as an application for painful hemorrhoids. It is said to be purgative and diuretic.

Farrington commends it for cardiac fainting: "faints dead away without apparent cause," and also in bedwetting: "bedwetting with frequent painful urging to urinate causing patient to rise at night."

Carleton has seen it produce: "fainting feeling three or four times a day, fainted away completely once." **Planets:** Moon, Jupiter.

Homeopathic

Linaria vulgaris. acts prominently within the domain of the pneumogastrics. Belchings, nausea, salivation, pressure on stomach. Jaundice, splenic and hepatic hypertrophy.

Enteric symptoms and great drowsiness very marked.

General prostration. Fainting from heart weakness. Bedwetting. Rectal symptoms.

Tongue rough, dry, throat constricted. Coldness. Confusion in head. Irresistible sleepiness.

Linaria vulgaris produced confusion in the head, thirst with rough tongue, constriction of the throat, nausea, vomiting and diarrhea, profuse urination, oppression of the breathing and stitches in the chest. Coldness was a prominent feature.

Clinical

Apathy. Bedwetting. Diarrhea. Fainting. Hemorrhoids. Ophthalmia. Tongue, roughness of, prickling on.

Modalities

Better by taking tea with milk. Symptoms worse walking in open air.

Symptoms

MIND

Peevish mind. Indifference. Stupid feeling of indifference, ill-humor with dull pain in forehead with heat after the sleep, lasting until midnight.

Compare

(1) *Dig.* - fainting and other *Scrophularia*.

(2) *Caut.*, *Eup-per.*, *Equis.* - bedwetting.

Linum catharticum

(purging flax)

Pharmacy

Linu-c. *Linum catharticum*. Purging flax. N. O. *Linacee*. Tincture of whole plant.

Historical dose: Tincture and all potencies.

History

The proving of *Linu-c.* by Stokes and Gaston shows that it deserves its name, Purging flax. **Planets:** Moon.

Homeopathic

Linu-c. has colic and diarrhea of loose, bright yellow stools and also of slender stools were most marked.

The sexual functions were depressed in men, absence of desire in women menses were omitted or delayed.

There was much nasal and respiratory catarrh, stuffed-up condition of nose and chest, trouble-some cough and difficult expectoration of frothy, yellow mucus.

Clinical

Amenorrhea. Bronchitis. Cough. Diarrhea. Hemorrhoids. Laryngitis. Rheumatism.

Modalities

The cough was worse walking in open air. Headache better in open air and better by eating.

Symptoms

MIND

Dullness and depression. Irritable.

Compare

(1) Linu-u.

Linum usitatissimum

(common flax)

Pharmacy

Linu-u. Common Flax. Linum usitatissimum. Flax. Source of Linseed or Flax-seed. N.

O. Linacee. trituration and tincture of seed or meal. Trituration and tincture of the oil.

Tincture of freshly made poultice. of freshly-made poultice. Historical dose: Tincture and all potencies, lower potencies.

Herbal

Linseed-tea and Linseed poultices are among the most innocent of domestic remedies, but occasionally The application of Linseed poultice has produced in sensitive subjects severe respiratory disturbances, as asthma, hives, etc. It has been found to contain small quantity of Hydrocyanic acid, which may account for this intensity.

The "soothing" effects of Linseed-tea and Linseed poultices are really of a specific and homeopathic nature. A teaspoonful of ungrounded Linseed, steeped in warm water for half an hour and then taken, acts as a laxative. **Planets:** Venus, Mercury.

Homeopathic

Linum usitatissimum has produced effects of the violent kind. Its action is marked by intense irritation. The decoction is of service in inflammation of the urinary passages, cystitis, strangury, etc. Also in diseases of the intestinal tract. It has a place in the treatment of asthma, hay fever and urticaria. Trismus and paralysis of the tongue.

Clinical

Asthma. Convulsions. Hay fever. Headaches. Tongue, paralysis. Trismus. Urticaria.

Symptoms

MIND

Perfectly conscious, but only able to express herself by signs.

Eyes

Unpleasant heat, burning, dryness, and intense conjunctivitis, chemosis, swelling of lids completely closes eye in one hour, edema persisted three days.

Face

Face red and slightly moist. Violent, dull pain in cheeks and temples. Jaws immovably clenched.

Head

Heavy frontal headache. Violent pain in cheeks and temples. Rigid and prominent temporal muscles, jerk rapidly. Head shakes spasmodically in measured time.

Limbs

Upper limbs shaken by spasms, but pliable and uncontracted.

Lungs

A picture of an aggravated case of bronchial asthma, it was with the most extreme effort that I could breathe. Livid, and struggles for breath, her friends thought she was dying.

PAGE 999

Mouth

Complained that her tongue was drawn down into her throat. Complete paralysis of tongue. Could not articulate a syllable. Tip of the tongue turned upwards and backwards so as to touch the velum palati.

Nose

Irritation rapidly extended through lachrymal duct to nose, heat, burning dryness with indescribably scraping, itching sensation, nearly driving him wild. Nasal passage completely closed, was compelled to breathe through mouth.

Skin

A crop of herpes (where the poultice was applied). Urticaria. One complete blotch from crown to toes, smarting, stinging, burning.

Stomach

Great weight in stomach and severe colic. Fullness in stomach and precordial uneasiness, followed by convulsions. Vomiting with copious stools.

Throat

Irritation continued (from eyes and nose) down into throat. Throat filled with large white blisters.

Comments

Clarke quoted the case of a woman in when the application of a linseed poultice to an ulcer over the right shin-bone produced an attack of asthma which nearly proved fatal. It was not the first time this had happened to her and she protested, but in vain, against the doctor's order. If a linseed poultice even come near her she felt constriction of the chest.

The doctor who ordered the poultice and reported the case, was speedily summoned to witness the worse attack of asthma he had ever seen. The patient was livid and struggling for breath.

When the poultice was removed the symptoms gradually subsided. A crop of herpes appeared where the poultice had been and an eruption of urticaria over back, chest and arms.

The dust had no effect in this case, but Dr. A. G. Towner related his own experience with it in the Era.

When in New York State he could handle Linseed in all forms freely, but after removing to Illinois it affected him most powerfully.

Once he rubbed his eye while preparing a poultice: intense conjunctivitis came on at once, chemosis and in an hour the eye was closed and did not come right again for three days. The irritation passed along the lachrymal duct and the same burning and irritation took place in the nose, nearly driving him wild.

The swelling closed the nostrils and he had to breathe through his mouth. The irritation still spread, affecting the throat, which was covered with large white blisters and a desperate attack of bronchial asthma supervened, slightly relieved by large doses of Ip.

In two hours the skin became affected with an attack of "hives" (urticaria): "I was one complete blotch from the crown of my head to the end of my toes, a complete bodily eruption, smart, sting, burn." He had five of these attacks. The steam of a poultice would cause coryza, the dust would occasion a complete attack. One was caused by inadvertently eating a lozenge containing linseed.

An entirely different set of symptoms is recorded by Allen in which a girl, et. 19, drank a cupful of milk into which she had poured by mistake some spoonfuls of linseed oil.

Immediately she felt a fullness of stomach and precordial uneasiness. She vomited, as she thought, all she had drunk and had copious stools. She soon went to bed, where she was seized with spasms which were most peculiar. Head shaking spasmodically in measured time, the eyes and prominent temporal muscles jerking rapidly. Jaws clenched. Tongue paralyzed and drawn down into throat. All the time the brain was quite clear.

A clyster of Asafetida gave temporary relief, but the symptoms recurred for a time with renewed violence.

PAGE 1000

On the third day she was quite recovered, but her health was not good for some time.

From these remarkable cases it will be seen that intense irritation is the rule of Lin. us. Skin and air passages with their offshoots are involved (asthma and skin eruptions are often found associated in natural disease) in certain cases, the nerve centers in others.

Compare

Lippia mexicana

Pharmacy

Lip. *Lippia mexicana*. N. O. Verbenaceae. Tincture of whole fresh plant. Historical dose: Tincture and all potencies, ten to thirty drops of the tincture every two to four hours.

History

The Chicago Med. Times gives these indication for Lippia. Coughs occurring every winter, especially in women. Hoarse ringing or barking chest coughs, without expectoration. **Planets:** Mercury.

SOURCES

Clarke.

Lippspringe aqua

Pharmacy

Lipp. Lippspringe aqua. The waters of the mineral spring in Lippspringe, Westphalia, containing the Sulphates of Sodium and Calcium, the Chloride of Magnesium and other salts in smaller proportion with carbonic acid, nitrogen and oxygen gases, which are freely evolved. Dilution. Historical dose: Tincture and all potencies.

History

Lippspringe aqua is a cold, sulphurated, saline spring and very gaseous of saline and piquant taste. James writes: "It is used in drink and bath as a refreshing and laxative medication. It is vaunted above all against commencing tuberculosis complicated with hemoptysis, when the subjects are plethoric, irritable and liable to pulmonary congestion". **Planets:** Moon.

Homeopathic

The homeopathic data on Lipp. are derived partly from provings and partly from observations on patients.

The purging effect was very marked, as also the diuretic. The urine was increased in quantity and the urging great in one case many stones were found. There was better after urination in one case Ñ "a peculiar feeling of comfort." "Itching of nose and anus" suggests Lipp. as a worm remedy.

Alternation of bloody stools with hemoptysis occurred in one case. Jerking of the limbs, uneasiness, cramp in calves. Perspiration and diarrhea were worse at night. Sneezing, palpitation, cramp and restlessness were worse evening.

Heaviness of chest was worse after sex and worse by smoking. Worse by walking. Better after urination.

Clinical

Diarrhea. Hemoptysis. Hemorrhoids. Jaundice. Leucorrhea. Menorrhagia. Urinary stones. Urticaria. Worms.

Symptoms

MIND

Depressed, sad, apprehensive. Apprehension worse riding in carriage, a kind of anxiety in the heart of impending misfortune with home-sickness. Irritable. Great desire to write. Weak memory.

Compare

(1) Calc-s., Nat-s., Mag-m. Restlessness, Rhus, Zinc., Caust.

(2) better by urination, Gels., Eug. j., Lith-c.
(3) worse after sex, Kali-c.

Lithium benzoicum

(benzoate of lithium)

Pharmacy

Lith-be. Lithium benzoicum. Benzoate of Lithium. Historical dose: All potencies.

History

Hale quotes T. O. Summers as saying that Lith-be. had great effect in diminishing uric acid deposits and increasing the free hippuric acid of the urine. "It acts upon the urine before it leaves the blood." **Planets:** Saturn.

PAGE 1001

Homeopathic

Lith-be. has deep-seated pains in loins in small of back. Uneasiness in bladder. Bladder irritation. Gallstones. Frequent desire. Diminishing uric acid deposit.

Clinical

Gallstones. Uric acid, deposits.

SOURCES

Boericke. Clarke.

Lithium bromatum

(bromide of lithium)

Pharmacy

Lith-br. Lithium bromatum. Bromide of Lithium. Trituration. Tincture. Historical dose: All potencies.

History

Weir Mitchell is the authority for this medicament. He gave thirty grains to a gentleman (who had one previous attack of a stroke and was hemiplegic) for these symptoms:

Numbness, vertigo, headache and thickness of speech. The one dose removed them in half an hour. **Planets:** Moon.

Homeopathic

Mitchell gave Lith-br. in epilepsy when other bromides were not borne. Hale mentions that it removed these symptoms in a case: After any prolonged mental exertion, flushed face insomnia and intense pain between the shoulders. Cerebral congestion, threatened strokes, insomnia and epilepsy.

Clinical

Cerebral congestion. Epilepsy. Insomnia. Speech, thick. Strokes. Vertigo.

SOURCES

Boericke. Clarke.

Lithium carbonicum

(carbonate of lithium)

Pharmacy

Lith-c. Lithium carbonicum. Carbonate of Lithium. Lithium Carbonate. Trituration.

Historical dose: Trituration and all potencies, first to third trituration.

History

Hering introduced and made the first provings of Lith-c. It affects the entire organism, but notably head and eyes, urinary organs, heart and joints. In arthritic complaints accompanied with heart or eye symptoms it is very likely to be needed.

Recurring attacks of acute inflammation of the small joints. The skin of the Lith-c. patient is dry and harsh like a nutmeg-grater.

According to Allen, the Lactate of Lithia has been found valuable for sub-acute rheumatism of the shoulder-joint.

Homeopathic

Lith-c. affects notably head, eyes, heart, small joints and urinary organs. Chronic rheumatism connected with heart lesions and asthenopia. Rheumatism connected with heart or eye lesions. Rheumatic nodes. Uric acid diathesis. Gout and tophi. Violent sharp pains, as from red hot needles. Hot water aggravates the itching. Open air causes post-nasal dripping from nose and constriction of chest. Inspired air feels cold even into lungs.

Effects of bruises and falls. Bruised spots from falls and blows. Whole body feels sore and heavy. Pressing from within outward in head, abdominal ring, perineum, chest. Pain as of a dull point. Paralytic stiffness of the whole body. Prostration. Acidity. Increase of bulk and weight. Many symptoms of Lith-c. have concomitants in other parts.

Clinical

Albuminuria. Aneurysm. Angina pectoris. Barber's itch. Bubo. Dyspepsia. Eye disorders.

Gallstones. Glands, swelling. Gout. Headaches. **Heart** disorders. Hemiopia. Hernia. Menstruation, disorders. Nose disorders. Obesity. Ossification of arteries. Prostatitis. Retina, anemia. Rheumatism. Spleen disorders. Stomach pain. Syphilis. Urethritis. Urinary disorders.

Constitutions

Gouty constitutions. Uric acid diathesis. **Planets:** Saturn.

Modalities

Better from rest. Better from eating, urinating, motion. Better rising and moving about outside. Worse in morning, right side. Worse at night. Worse during menses. Worse after menses suppressed. Worse from motion.

Symptoms

MIND

Disposed to weep about his lonesome condition. Difficulty in remembering names.

PAGE 1002

Abdomen

Pain in left abdominal ring like a pressing from within outward.

Breasts

Pain in breast glands, which extend into the arms and fingers.

Chest

Constriction of chest.

Ears

Pain behind ear (left), extending to neck.

Eyes

Photophobia. Pain over eyes. **Eyes** pain after reading. Dry lids.. Vertical hemiopia, right half of object is invisible, worse during menses. Sunlight blinds him.

Face

Both cheeks are covered with dry bran-like scales.

Female

Pain in breasts which extends to arms and fingers.

Head

Tension, as if bound, better sitting and going out. Headache, better eating, but returns and remains until food is again taken. Headache from sudden suppression of menses. Head feels too large. Externally sensitive. Trembling and throbbing.

Heart

Trembling and fluttering of the heart, extending to back, worse vexation. Sudden shock in heart. Throbbing, dull stitch in cardiac region. Rheumatic soreness in cardiac region. Pains in heart before menses and associated with pains in bladder and before urinating, better after. Pain in heart, extends to head.

Kidneys

Cystitis, sub-acute and chronic. Tenesmus. Soreness of bladder, pain in right kidney and ureter. Pain in bladder extending to spermatic cord after urination. Pain in region of right kidney. While urinating, pressure in heart. Urine scanty with much thirst with red brown sediment. Urine less in spite of taking normal drinks. Urine, free and colorless. Turbid urine with mucus, scanty and dark, acrid, sandy deposits.

Limbs

Rheumatic pains throughout shoulder joint, arm and fingers and small joints generally. Pain in the joints is relieved by very hot water. Nodular swellings in joints. Paralytic stiffness all over. Itching about joints. Soreness of fingers better grasping. Ankle joint pains while walking. Pain in hollow of foot, extending to the knee. Swelling and tenderness of finger and toe joints, better hot water.

Lungs

Air feels cold on inspiring, even into lungs. Violent cough when lying down.

Male

Erections after copious urination.

Nose

Swollen and red especially right side. Coryza, dropping from nose in open air.

Rectum

Diarrhea, worse from fruits or chocolates.

Sensations

Temples as if bound. Head too large. **Eyes** dry. As if veil before eyes. Lancination as from red-hot needles in bubo. Arm as if paralyzed.

Sensations

Border of foot and soles as if gouty, itching.

Skin

Dry, harsh skin. Eczema. Scabby, tettery eruption on hands, head and cheeks, preceded by red, raw skin. Barber's itch. Dull stitch, ending in itching. Rough rash all over body, much loose epithelium tough, dry, itchy skin.

Stomach

Gnawing in stomach with pain in left temple, better by eating, (Anac.) Acidity. Cannot endure slightest pressure of clothes from fullness in pit of stomach. (Lyc.)

Throat

Lumps of mucous drop into throat. Soreness extending to ear.

Vertigo

Vertigo with ringing in the ears. Dizzy states.

Comments

"Soreness" is a keynote of Lith-c.: Bruised spots from falls or blows. Bones, joints, muscles, whole body sore as if beaten. Rheumatic soreness in heart region. **Eyes** pain as if sore. "Pressing from within outward" is another common symptom: in head, abdominal ring, perineum, chest.

There are two grand characteristics about the heart symptoms: worse bending forward and better after urinating, though worse on rising to urinate. This better after urinating may be compared with worse on cessation of menses: "Menses cease suddenly and headache comes on." A pain in heart occurs before and at time of menses. The heaviness is better while eating and worse after.

PAGE 1003

A good deal of confusion in the head. The nose is red and inflamed, there is dropping of solid lumps down the back of the nose. Acidity of the stomach. Prostration of whole body, especially knee-joints and sacrum. Paralytic stiffness of whole body.

Compare

(1) Lyc., Am-p., Benz-ac., Calc.

(2) Lithium benzoicum, Lithium bromatum, Lithium lacticum, Lithium chlor.

SOURCES

Boericke. Clarke.

Lithium lacticum

(lactate of lithium)

Pharmacy

Lith-lac. Lithium lacticum. Lactate of Lithium. Historical dose: Trituration and all potencies.

History

A chemist while preparing a combination of Lactic acid and Lithium carbonate, experienced decided rheumatic pains in the small joints. Berghaus on this hint used Lith-lac. in local sub-acute rheumatism with good effect. Allen says it especially affects the shoulder. **Planets:** Saturn.

Homeopathic

Lithium lacticum has rheumatism of shoulder and small joints relieved by moving about, worse resting.

Clinical

Rheumatism.

SOURCES

Boericke. Clarke.

Lithium muriaticum

(muriate of lithium)

Pharmacy

Lith-m. Lithium muriaticum. Muriate of Lithium. Dilute Muriatic Acid was saturated with the caustic and Carbonate of Lithium and evaporated. Solution. Historical dose: Trituration and all potencies.

History

Hering, who proved Lith-c., proved also this salt. He put one drop on his tongue.

It had a salt taste, but different from common salt, a fatty-salt taste. The tongue became numb as if fat were on it. Pains in the head, back teeth and heart.

Gohrwisch, who took the third dilution, had pains in heart region and notably: Hot, burning uprising in the throat and pit of stomach like heartburn. He also had pains in teeth. The tip of the nose was red, sore and somewhat swollen. **Planets:** Moon, Mercury.

Homeopathic

Lith-m. has the symptoms of quinine poisoning. Dizziness. Head feels full. Blurring of the vision. Ringing in ears, marked tremors. General weakness, marked muscular and general prostration, no gastro-intestinal effects. Nose sore, heartburn, pain in teeth.

Clinical

Heartburn. Heart, pains. Nose, sore. Tongue, numb. Vertigo. Weakness.

Lobelia cardinalis

(red lobelia)

Pharmacy

Lob-c. Lobelia cardinalis. Red lobelia. Cardinal Flower. N. O. Lobeliacee. Tincture of fresh plant. Historical dose: Tincture and all potencies.

History

There is a proving of Lob-c. by S. D. Dubs, who took ten drops of the tincture in one dose. Dubs' symptoms have been confirmed by a second proving by Kopp.

The acrid properties of the plant were immediately felt by Dubs in burning in mouth and throat, which lasted a long time. Sticking and pricking sensation in various parts, especially left chest and left hypochondrium. Oppression of breathing. Headache at base of occiput worse by motion and shaking head, stiffness in nape. Throbbing and weakness in lower limbs. **Planets:** Mercury.

Homeopathic

Most of the effects of Lob-c. lasted two weeks and it was three weeks before the appetite returned.

PAGE 1004

There was thirst for cold water, which better burning in tongue and fauces. Many symptoms occurred at 8 a.m. Sleepy but difficulty in sleeping.

A lady to whom Cooper gave one dose of Lob-c. had "flashes of light before eyes every day for a week." It seems, he says to have an action distinct from that of other Lobelias, since a dose of it brought back pains which had been relieved by Lob. dort.

Clinical

Anorexia. Debility. Headache. Sore throat.

Compare

(1) Lob., Lob-s.

(2) Caps. - burning in mouth and throat, but Caps. is worse by cold water, Lob-c. better.

Lobelia dortmannia

Pharmacy

Lob-d. Lobelia dortmannia. N. O. Lobeliacee. Tincture of fresh plant. The principal indigenous British species. Habitat, shallow lakes. Historical dose: Tincture and all potencies.

History

We are indebted to Cooper for the whole of the information about this remedy. **Planets:** Mercury.

Homeopathic

The Lob-d. symptoms were observed on patients after single doses of the tincture allowed to exhaust their action. According to Cooper, Lob. d. has much in common with Lob. er. and Lob. i.

Clinical

Ears, noises. Headache. Indigestion. Pylorus, affections.

Lobelia inflata

(indian tobacco)

Pharmacy

Lob. Lobelia inflata. Indian tobacco, Puke weed. N. O. Lobeliaceae. Fields and roadsides from Canada to Southern U. S. Tincture of fresh plant when in flower and seed.

Trituration of dried leaves. Acetum. Historical dose: Tincture and all potencies, tincture to thirtieth potency. Locally the tincture is antidotal to Poison-oak.

Herbal

Matthew Lobe, whose name is given to this family of plants, was a physician and botanist attached to the court of James I. There are two British species,

Lobelia Dortmanna, found in shallow lakes and Lobelia urens, which grows in healthy places. Lobelia inflata, the North American variety is the most important of all, medically.

According to Hale, this plant was used by the Indians as an emetic detergent in the same way as Verat. was used by the ancients to produce "Helleborism."

But the chief modern exponent of Lobelia is Samuel Thompson of New Hampshire, who founded, the modern Botanical School. His chief remedies were, besides Lobelia, Cayenne pepper and the vapor bath. Often the Acetum Lobelia acts better than any other preparation.

Lob. probably obtained the name of "Indian Tobacco" from the similarity of its action to that of Tabacum in producing intense nausea, vomiting, profound depression at the epigastrium and collapse.

Treatment with Lobelia should always be begun with a single dose, if the symptoms permit, as in some cases it produces violent depression.

PAGE 1005

In veterinary practice it is said to have proved curative in the tetanus of horses, a disease it is also said to produce.

It must be kept in mind when studying Lob. that the herbalists used it in two forms: the decoction to produce emesis and through which they seem to have obtained its antidotal action or by virtue of which they aborted acute gout and the acetum tincture, which they gave in chronic diseases and in moderate doses."

In Water Besant's Life of Edward Henry Palmer, the great Orientalist, Palmer's own account of his cure by Lobelia is given. In 1859 he was seized with pulmonary disease, which rapidly increased until he was told he had probably only a few months to live. On the advice of a herbalist named Sherringham he took a single large dose of Lobelia and this is what he experienced: (1) Violent attack of vomiting, (2) cold chill mounting up from feet to hands, which he could no longer move to heart.

Which ceased to beat to throat, which ceased to breathe. A doctor was sent for. "I felt myself dying," he said afterwards, describing the experience, "I was being killed by this dreadful cold spreading all over me. I was quite certain that my last moments had come. By the bedside stood my aunt, poor soul, crying. I saw the doctor feeling my pulseless wrist, watch in hand, the cold dews of death were on my forehead, the cold hand of death was on my limbs.

Up to my lips, but no higher, I thought I was actually dead. I could see and hear but not speak, not even when the doctor let my hand fall on the pillow and said solemnly, "He is gone"

There was no pain, he said and he was in no concern except about a book he wanted to finish. He recovered suddenly. New strength came to him. The tuberculosis was arrested and was no more trouble to him for the rest of his life. The prickling sensation experience by Cutler is characteristic, as also is tenderness of the sacrum.

Homeopathic

Lobelia is a vaso-motor stimulant increases the activity of all vegetative processes, spends its force mainly upon the pneumogastric nerve, producing a depressed relaxed condition with oppression of chest and epigastrium, impeded respiration, nausea and vomiting.

Fatigue, relaxation of muscles, nausea, vomiting and dyspepsia are the general indications that point to the use of this remedy in asthma and gastric disorders. Asthma and labored breathing. Asthma and stomach disorders. Bad effects of drunkenness. Suppressed discharges. (Sulph.) Diphtheria. Catarrhal jaundice. (Chion.)

Nausea and vomiting with nearly all the lung troubles or stomach disorders. Lob. stimulates vasomotor nerves, causing increased secretions, relaxation and weakness with sweat.

Deathly sickness all over with oppressed rattling respiration. Sits with elbows on knees. Prickling all over. Cannot bear the odor of tobacco although addicted to its use.

Clinical

Alcoholism. Allergies. Alopecia. Amenorrhea. Angina pectoris. Asthma. Bronchitis. Cardialgia. Coughs. Croup. Deafness. Diarrhea. Dysmenorrhea. Dyspepsia. Dyspnea.

Emphysema. Faintness. Gallstones. Gastralgia. Hemorrhoids. Hay-asthma. **Heart** disorders. Hysteria. Meningeal headaches. Miller's asthma. Morning sickness. Morphine effects. Nausea. Palpitations. Pleurisy. Psoriasis. Rigid os. Seborrhoea. Shoulders, pain. Tea, effects. Urethra, stricture. Vagina, discharge. Vomiting, pregnancy. Wens. Whooping cough.

Causations

Alcohol. Tea. Tobacco. Wetting feet. Suppressions. Foreign bodies. Smoke.

Constitutions

Lobelia is suited to persons with light hair, blue eyes and fair complexion inclined to be fleshy. Weak lungs. **Planets:** Mercury, Moon.

Modalities

Better afternoon. Better from rapid walking, eating a little. Better by rapid walking, (chest pain) toward evening and from warmth. Worse tobacco afternoon, slightest motion, cold, especially cold washing. Worse from suppressions. sleep after, tea, foreign bodies. Motion, slightest exertion worse. Worse evening and night. Morning sickness, worse morning. Warm food causes vomiting. Headache is worse by tobacco or tobacco smoke.

Symptoms

MIND

Mentally restless. Great depression and exhaustion. Despondent. Sobbing and weeping like a child. Lost his reason and became convulsed, it required several men to hold him. Violent raving with flushing of face and palpitations. Presentiment of death and dyspnea. Felt he was dying with distress at chest. Felt he was dying, but was unconcerned.

PAGE 1006

Abdomen

Pains in abdomen, worse after eating with headache. Violent and painful constriction in epigastrium. Cutting and drawing pains in abdomen. Griping and twisting with nausea, violent risings and emission of foul flatus. Inflation of abdomen with dyspnea, flatulency and emission of gas with borborygmi in abdomen.

Back

Pain in sacrum, cannot bear slightest touch. Sits leaning forward. Swelling and pain left side of neck. Rheumatic pain between the scapula. Pain under right scapula worse bending forward.

Breasts

Pain in the breast. Burning feeling in breast passing upward. A tightness of the breast with heat in forehead. Drawing in left breast from nipple to axilla.

Chest

Constriction or oppressive fullness in chest. Sensation of pressure or weight in chest, better by rapid walking. Rattle in chest but does not expectorate. Violent pains in chest, worse on breathing deeply. Burning feeling in the chest, passing upwards. Tension in chest on turning body.

Ears

Aching in left ear. Deafness due to suppressed discharges, (otorrhea) or eczema. Shooting pain extending into left ear from painful spot in throat. Sudden shutting up of right ear, as if stopped by a plug. Profuse discharge from the ear. Constantly recurring earache and deafness following suppressed otorrhea.

Eyes

Burning in eyes, (hemiopia). Pain and soreness in right eye. Burning in eyes. Itching in angles of eyelids. Pressing pain in eyeballs, most in upper part. Pupils dilated. Vision dim.

Face

Sudden pallor. Bathed in cold sweat. Neuralgia of face with retarded menses. Heat of face. Sweat on face with nausea. Chilly feeling in left cheek extending to ear.

Female

Morning sickness, suddenly disappears better by a little food and drink. Labor pains with shortness of breath. Pain in her sacrum and a sense of weight in genitals. During menstruation violent pain in sacrum.

Violent pain in the sacrum with fever.

Head

Gastric headache with nausea, vomiting and great prostration. Worse afternoon until midnight. Worse tobacco. Dull, heavy pain. Headache, worse by coughing. Brain racked by cough which causes intolerable pain. Heaviness in head with lassitude in back.

Pressive pain on left side of occiput, worse at night and from motion. Wens. Seborrhoea.

Heart

Sensation as if heart would stand still, a pain deep in above heart. Pulse, weak or soft, flowing. Precordial anxiety. Deep-seated pain in region of heart. Sensation of weakness and pressure in epigastrium rising to heart.

Kidneys

Deep red urine with red sediment. Urine suppressed or infrequent. Increased secretion of urine, sometimes with want to urinate. Urine cloudy with loose deposit deep red with sediment of a dull red, soon becoming turbid.

PAGE 1007

Limbs

Rheumatic feeling in right shoulder-joint, goes to left upper arm and around elbow-joint. Fine crawling stitches inside of right deltoid. Rheumatic pain in right elbow-joint. Sweat of palms, backs of hands dry and cool, tips of fingers cold.

Lungs

Asthma, attacks with weakness, felt in pit of stomach and preceded by prickling all over. Dyspnea from constriction of chest, worse any exertion. Spasmodic cough with sneezing, belching or gastric pain. Cramp, ringing cough, short breath, catching at throat. Senile emphysema. Irritation which provokes coughing and expectoration.

Male

Fatiguing heaviness in genital parts. Smarting of the prepuce.

Mouth

Acrid, burning taste in mouth, bitter with foul tongue and thirst. Profuse flow of saliva, mercurial taste, tenacious mucus tongue coated white. Flow of clammy saliva in mouth with nausea. Sharp, disagreeable taste in mouth at tip of tongue and back of throat.

Tongue white, charged with a thick coating, on right side only.

Sensations

As of lump in pit of throat. As of foreign body in throat. As if esophagus contracted from below upward. As of a lump or heavy load in stomach. As if a lump rose up to meet food and obstruct its descent. Fullness in trachea as if from chest. As of a lump in larynx. As if the heart would stand still. As of a band about chest. As if blood stagnated in chest (better moving about). As if thousands of needles were pricking her skin from within outward.

Skin

Prickling itching of skin all over body. Prickling, itching with nausea. Plaques of edema with ecchymoses. Prickling and itching with nausea. Eruption between fingers, on

dorsum of hands and on forearms, vesicular itch-like pustules with tingling itching, (Teste). Vesicular eruption on skin.

Sleep

Disturbed sleep with many dreams, sometimes anxious, painful dreams. The dreams are many without intermediate awakening, cold sweats. Wakened early by very vivid dreams, arm was amputated, wounded by a shot.

Stomach

As of a lump in. Profuse flow of saliva with retching, hiccough, dyspnea with good

appetite. Acidity, flatulence, shortness of breath after eating. **Heartburn** with profuse flow of saliva. Extreme nausea and vomiting. Morning sickness. Deathly nausea with vertigo, better by a little drink or food, worse night and early morning. Faintness and weakness of epigastrium. Profuse salivation with good appetite. Profuse sweat and prostration. Cannot bear smell or taste of tobacco. Acrid, burning taste, acidity with contractive feeling in pit of stomach. Flatulence, shortness of breath after eating.

Heartburn.

Stool

Soft, whitish stool. Discharge of black blood right after stool. Copious hemorrhages from hemorrhoidal vessels. Stools like pap, soft, green, diarrhea, sometimes with frequent evacuations and confusion of head.

Temperature

Intermittent fevers, commencing at noon with great paleness and anorexia. Coldness of whole body, heat with tendency to perspire. Thirst before the chill and through the whole fever. Tendency to perspire excessively. At the end of the heat, perspiration with heat.

Throat

As of a lump in throat, impeding deglutition. Tickling in larynx with frequent fits of short coughing. Dryness in throat with sensation as though a solid body were there impeding both breathing and swallowing.

Vertigo

Vertigo with fear of death. Cerebral suffering, giddiness. Vertigo with nausea. Headache with slight giddiness. Vertigo as if starting from left eye.

Comments

H. M. Broderick has recorded this case: A young lady, 18, ill two years under allopathic treatment. Symptoms: Labored breathing, sense of tightness across chest compelling her to take deep inspirations, which caused pain in heart region.

PAGE 1008

Pulse full, very rapid, cough after each deep breath. Unable to lie down from oppression and pain. Twitching of muscles of face. Menses never regularly established, would go several weeks over time and then would last only a day.

Lob. i. 3x was given in water. After the second dose she went to bed and slept. The remedy was repeated just before next menstrual period. She had no more attacks and menstruation became normal.

Pain in shoulders of an elderly lady who had not menstruated for two years, Lob. relieved the pain and brought on menses.

It was a true instinct on the part of Teste that led him to class Lob. with Sulph. and though the provings and clinical experience do not fully bear out what he says about its skin action, the results of botanically practice, confirmed by Cooper, show that it has an anti-psoric action and relieves morbid states due to the suppression of discharges.

In a paper read before the Brit. Hom. Society, November 1, 1888. Cooper explains that he got no good out of Lob. until under the advice of a herbalist he used a solution of Lobelia made with common vinegar.

Here is one of his cases: A young woman, 23 of tuberculosis family history on both sides, had, when 14 to 15 years old, severe pain in left and sometimes right, side and round lower abdomen with faint feeling. This lasted until the monthly period came on regularly and then she was well until 20, when diarrhea came on, which nothing was able to check and which kept her in bed for months at a time.

The symptoms were: Pains all round abdomen and up the back, much worse after undressing, feeling of exhaustion or falling to pieces inside and out, cannot bear anything to touch her. Four or five motions daily when taking medicine, if she leaves it off continual motions all day, it literally runs from her: watery, sometimes light-colored, sometimes dark, never bloody.

Menses very irregular, sometimes five to six weeks between. All the symptoms, especially diarrhea, worse then, much tenderness all over abdomen, especially in ovarian regions, legs ache fearfully, pains all over body, faints continually. Since the illness began subject to neuralgia of face, one or other side or both, extending to chest, coming and going suddenly at any time.

In spite of treatment of all kinds including that of a skillful repertorian, she grew worse. She went into a hospital and there a small pile was removed with but temporary benefit and after this the vagina as well as the rectum began to discharge copiously an excoriating fluid.

Lob. acet., eight drops three times a day, was now given. She began to improve at once and in a few weeks was quite well. In this case the difficulty first showed itself when the menstrual era was commencing.

It was relieved when the flow was regularly established, reappeared simultaneously with menstrual irregularity.

In the next case there was an analogous history.

Cooper recalls in connection with these cases a symptom recorded by Jahr: "Violent pain in the sacrum with fever supervening upon suppression of the menses during their flow."

Alongside this action of Lob. may be placed another, also vouched for by Cooper, the power of eliminating foreign substances like that possessed by Silica. A woman got a piece of mutton-bone down her windpipe and into one of the bronchials. She was taken to the London Hospital, but the idea of operation was abandoned as hopeless and she was sent out.

Lob. tincture was given, five drops three times a day. Soon a most violent cough was set up in the course of which the patient coughed up a large quantity of fetid pus and finally the bone. By the action of Lob. in determining to the periphery it meets a large number of conditions due to suppression including cases of tuberculosis.

PAGE 1009

It is particularly called for in ailments that never finish up, whether beginning from acutely inflammatory causes or not, it also fights with symptoms occasioned by

mechanical irritants in a way that I have never found any remedy do, e.g. , where a spicula of bone presses on the brain (compression) or where a bone is lodged in bronchus.

The late Dr. Coffin in a boastful way, professed to cure children and adults whose lives were despaired of from poisoning by various substances by decoctions of Lobelia, but whether by directly evacuant action or not it is not stated.

But in my own hands a few drops mixed in water cured a baby of severe convulsions that I afterwards found were caused by a diabolical nurse giving the little one Chlorodyne.

In symptoms existing along with hereditary syphilis and in the tuberculosis of childhood it acts with full power in tabes mesenterica in persistent earaches and headaches due to suppressed discharges, where the lips are dry and hot and continual feverish colds are prominent, it is specific. Here it stands side by side with Ars-i. and our foremost anti-psorics.

In severe inflammatory conditions existing along with anthrax or with malignant deposits in different regions, Lobelia in repeated as well as in single doses will often arrest urgent mischief. A few drops of Lob. acet. in boiling water takes away the pain and tension of inflamed hemorrhoids, the patient sits on a utensil thus filled. In the bronchopneumonia of childhood and in imperfect recoveries from chest affections, especially where tubercle threatens, Lobelia is indispensable.

Lob. i. may cause a rash which exfoliates and it has cured many cases of psoriasis. It meets a condition in which the secondary digestion is at fault. The patient is thin, poor and has no appetite. It cures the condition which favors pediculi corporis.

Referring to the skin action of Lob. i., P. H. Hale says that with the intense nausea it causes, there is sometimes a prickling itching of the skin and acting on this hint P. H. Hale thinks he has seen benefit from its use in suppressed urticaria with nausea and vomiting.

The symptom Teste gives is this: "Eruption between the fingers, on the dorsum of the hands and on the forearms, consisting of small vesicles accompanied by a tingling itching and resembling the itch pustules exactly." As with Sulph. "faintness at the stomach" is a grand characteristic which will be found in a large proportion of the cases calling for the remedy.

Hale quotes Dr. Cutler's account of his own case. He had been asthmatic ten years, liable to very severe and prolonged attacks.

During the intervals scarcely ever passed a night without more or less of it and as often as not was unable to lie in bed.

In the middle of an attack he had a tablespoonful or a fresh plant tincture. In three or four minutes his breathing was quite free, but there was no nausea and thinking that necessary he took another spoonful ten minutes after the first and this occasioned sickness.

Ten minutes later he took a third and this produced a sensible effect on the stomach coats and a very little vomiting and "a kind of prickling sensation through the whole system even to the limbs of the fingers and toes. The urinary passage was perceptibly affected, by producing a smarting sensation in passing urine, which was provoked by stimulus on the bladder."

But all these symptoms very soon subsided and vigor seemed to be restored to the constitution which he had not experienced for years.

The necessity of taking Lobelia in doses sufficient to cause pathogenetic symptoms was insisted on by Thompson and though it led to some disasters seems to have been the means of saving some lives.

PAGE 1010

Thompson tells how as a boy he chewed this herb and so learned practically its effects. He used to give it to other boys out of sport. One day while mowing he gave a sprig of it to a companion.

By the time they had got six rods the man said he thought the sprig would kill him: he never felt so ill in his life before. He was in a profuse perspiration, trembled all over and was as pale as a corpse. Unable to walk, he lay down and vomited "two quarts." He was helped to his house, ate a good dinner and returned to work in the afternoon. After this he "felt better than he had for a long time." This gave Thompson his first notion of the medicinal virtues of Lobel.

Lob. is indicated in whooping cough with dyspnea threatening suffocation. Must keep mouth open to breathe.

The headaches of Lobelia are remarkable. Teste describes them as follows: Pressive headache, at occiput, less frequently at the forehead, sometimes one-sided, (left), worse by motion in evening and especially at night. Continual periodic headache in afternoon and increasing until midnight, every third attack being alternately more or less violent. The brain is racked by the cough, which causes an intolerable pain. Heat and sweat about head and face.

Cooper has recorded this case: Girl, et. 9, seized with very bad headache affecting whole head and continuing night and day for two days, Merc. and Verat-v. being given in vain. Lob. acet., two or three drops in a little water given in the morning after a bad night, gave immediate relief and restored the appetite.

Cooper considered it a meningitis headache and he finds Lob. and Kali-i. 30c especially useful in these. Excessive sensitiveness being a leading indication for the latter. A headache that has been frequently verified is "Dull, heavy pain passing round the forehead from one temple to the other, immediately above eyebrows."

Headache following intoxication, worse afternoon until midnight, worse from tobacco.

A peculiar symptom of Lob. is semi-lateral coating of tongue. Sudden pallor with profuse sweat. Gastric derangements, extreme nausea and vomiting. The nausea of Lob. is continuous and accompanied by constant flow of saliva. This is the indication for it in morning sickness and in effects of suppressed or missed menstrual period. Vomiting, face bathed in cold sweat.

The nausea of Lobelia has been used in the same way as that of Tab. and other emetics to produce relaxation of muscles, as, for example, rigid os. Sometimes this is effected by direct physiological action, but it may be homeopathic as in this cured case: "With every uterine contraction violent dyspnea, which seems to neutralize labor pain, rigid os and perineum."

But it is also of service locally, as in an enema, also in cases of difficult catheterism.

G. W. Boskowitz relates the case of a man, 40, who had twice had gonorrhoea, the second attack, three years before, having left him with a gleet discharge. For a year the stream had been diminishing until at last it took him half an hour to empty the bladder. Many surgeons had tried to pass an instrument and had failed.

Boskowitz also failed several times, until one day he dropped fifteen drops of Lob. i. tincture into the urethra and held the meatus to retain it, for five minutes. It produced a smarting which soon passed away and then the sound passed with ease. Boskowitz has used Lob. in similar cases with success.

Guernsey gives this as a leading indication when found prominent: "Urine has a deep red color and deposits a copious red sediment." Dyspnea, as well as nausea, occurring in connection with imperfect menstrual cycle may indicate Lobelia.

Compare

(1) The other Lobelias, Dig. and Tab. - heart affections, vomiting, worse by motion, sudden pallor with profuse sweat. (2) Ars. - hay fever, gastric troubles.

(3) Verat. - gastric troubles.

Lobelia purpurascens

(purple lobelia)

Pharmacy

Lob-p. Purple lobelia. *Lobelia purpurascens*. N. O. Lobeliaceae. Tincture of whole fresh plant. Historical dose: Tincture and all potencies.

Herbal

The first mention of this plant was made by Erskine C. White under the name *Lobelia rubra*, corrected later by F. Kopp and E. C. White himself to *Lob. purpurascens*.

Kopp describes the plant thus: "Stems angular, procumbent. Leaves ovate, green on surface and either purple or purple and green underneath, somewhat serrulated, rather firm, usually from half to one inch long, pedicle axillary, much shorter than the leaves, reflexed after flowering.

Flowers white above, purpled beneath, delicately scented, most delicious, corolla four or five lines long, the lower lobes oblong, obtuse, the two upper ones shorter and narrower, more acute and incurved. Capsule narrower, ovoid, fully three lines long, seeds rather large often flattened."

Lob-p. grows profusely in the Australian bush, preferably in moist places and most profusely, says Kopp, where snakes most abound. White adds that it prefers loose sandy soils. This is interesting since James S. Bray, quoted by White and Kopp, observed that the iguana after a fight with a snake, whenever it happened to be bitten, ate this Lobelia.

Bray once found a number of sheep dead and from their appearance he at first thought they had been bitten by snakes.

But on examining their stomachs he found the leaves and stalks of Lob. purp. and he came to the conclusion that this was the cause of their death. **Planets:** Mercury, Mars. Homeopathic

Lob-p. acts very like Bapt. in low typhoid conditions and seems to neutralize the poison of influenza.

Other general characteristics of Lob-p. are as follows: Intense prostration, vital and nervous. Paralysis of lungs and resultant poisoning with carbonic acid gas, vomiting and coma. Deadly chill without shivering, but overpowering the system.

Clinical

Blood poisoning. **Heart**, paralysis. Influenza, headache. Lichen tropicus. Lungs, paralysis. Snake-bites. Tongue, paralysis. Typhoid fever. Vertigo.

Causations

Blood poisoning. Snake-bites.

Modalities

Symptoms are worse by movement, worse in damp weather.

Symptoms

MIND

Hasty disposition. Dejection.

Comments

White gives a short pathogenesis in which symptoms like the effects of snake-poison are prominent. His symptoms together with those of Kopp, who crushed with his teeth and swallowed a leaf, will be found arranged in the Schema.

They bear a strong family resemblance to those of Lob. inflata.

White gives a clinical experience of his own which is important: "This plant, if only touched carelessly with the teeth, produces overwhelming giddiness. I had noticed that the sickening stupor and headache it produces exactly resembled those of La Influenza, before I knew the name of the plant.

My headache disappeared like magic under Lob. purp. tincture and I used to notice that all chest symptoms were avoided under its sway. The influenza breaks out in wet weather. This plant with its tiny gem-like white blossoms, always carpets the earth after each rain throughout the year."

PAGE 1012

Growing on sandy soil it contains much flint and like Sec., Staph. and the common carrot, agrees especially well with patients who are deficient in silica and who are nervous, liable to boils of a hasty disposition, perspire profusely and whose teeth are always decaying.

Compare

(1) Lob., Tab., Lach. and other snake-poisons.

(2) Bapt. - influenza, typhoid.

(3) Sec., Staph. - teeth.

SOURCES

Clarke.

Lobelia syphilitica

(great blue lobelia)

Pharmacy

Lob-s. Lobelia syphilitica. Lobelia cerulia. Great Blue Lobelia. N. O. Lobeliacee. Grows in low grounds in U. S. Tincture of fresh plant. Acetum. Historical dose: Tincture and all potencies.

History

The symptoms of the Lob. syph. proving, while in many points analogous to those of the other Lobelias, do not bring out the emetic properties of Lob. inflata.

There is, however, epigastric sinking, flatulence, dyspepsia and diarrhea. Lob. card., Lob. inf. and Lob. syph. all have a milky juice.

Lobelia syphilitica or cerulea gives a perfect picture of sneezing influenza involving the posterior sinuses, palate and fauces. **Planets:** Mercury.

Homeopathic

Lob-syph. is very depressed. Pain in forehead over eyes, pain and gas in bowels, followed by copious watery stools with tenesmus and soreness of anus. Pain in knees. Prickling in soles. Breathing difficult. Great oppression in lower part of chest, as if air could not reach there. Dry, hacking cough. Pain in chest under short ribs of left side. Dull, aching pain over root of nose. Eustachian catarrh. Pain in posterior part of spleen.) Internal nose painfully sensitive to cool air. Flushing after dinner better somewhat in open air.

Clinical

Acidity. Adenoids. Asthma. Back, pains. Borborygmi. Cartilages, pains. Catarrh. Coryza. Cough. Dyspepsia. Eustachian catarrh. Flatulence. Hay fever. Influenza. Kidneys, pains. Lumbago. Melancholia. Post-nasal catarrh. Pylorus, pain. Sciatica. Spine, pains. Spleen disorders. Stomach cough. Throat, sore.

Causations

Grief. Suppressions.

Modalities

Drinking cold water relieves gastric symptoms. Touch aggravates, soreness of ischium. Motion aggravates. Deep inspiration aggravates. Mental exertion aggravates. Reading and writing aggravates pain in forehead. Inhaling moderately cool air worse. Worse after dinner. Worse at night.

Symptoms

MIND

Frequent mistakes in spelling and writing with confused feeling and slight aching in head. Depressed, temper unhappy with pain in posterior aspect of spleen. Brain weakness and exertion of mind intolerable, seemed as if he would go wild.

Comments

Hale quotes Rafinesque as saying that the analysis of Lob-s. shows it to contain Silex, Iron and Muriate and Phosphate of Lime.

The marked action of Lob-s. on the posterior sinuses led Cooper to use it with success in cases of deafness arising from an "unhealthy, soft, swollen, easily bleeding catarrhal" condition of the nose-pharynx.

This is emphasized by another symptom: "Dull aching pain in center of forehead, over root of nose."

Cooper, who uses an acetic preparation considers that with this, as well as with the Inflata, a history of suppression is a leading indication. There are many notable symptoms in the back, back of chest and about the lower ribs.

Some of these led Jeanes (the first prover) to make a very fine cure of melancholia in an educated intelligent man of which these were the characteristics: "Great depression of spirits, unhappy state of mind, always associated with pain about and under short ribs in back on left side, extending outward nearly to left side, posterior aspect of region of spleen."

In the Lob-s. proving there was this: Pain on inside of right scapula. Farrington adds this: "Pain under (not below) inner border of left scapula, worse after weeping."

PAGE 1013

The pains of Lob-s. travel about from right to left from left tonsil to right from back down legs from eighth rib downward, aching from back of head down nape.

Pain in right maxillary joint with pain in middle of right lung, pain in breast and larynx, pain in left side of chest near axilla with aching in left shoulder and arm.

Compare

- (1) Other Lobelias.
- (2) Puls. - mental depression and weeping.
- (3) Chel. and Ranunc. - scapular pains.
- (4) Hydr. - post-nasal catarrh.
- (5) Cean. - spleen.
- (6) Lob. has one-sided coating of tongue. Lob. syph. has left half of palate dry.
- (7) Podo. relieved the diarrhea of Lob. s., but not the acute abdominal pains.

SOURCES

Clarke.

Lolium temulentum

(darnel)

Pharmacy

Lol. Lolium. Lolium temulentum. Darnel. N. O. graminae. Trituration of seeds. Tincture of ripe spikelets. Tincture of ripe seeds. Trituration of the dried seeds. Historical dose: Tincture, trituration and all potencies.

History

The name Darnel means stupefied and the plant's evil reputation is of very ancient date. The symptoms are the result of observations made on persons poisoned by eating meal containing an admixture of Lol. tem.

Allen mentions an assertion that Lolium is much infested with ergot and that it is to this that the poisoning symptoms are due, the unaffected grain being inert and Allen notes in support of this that the poisonings have been most frequently observed in low, wet districts and during wet seasons. Provings are needed to decide this.

A very characteristic symptom is: Tightness in the calves, violent pain in the calves as if bound with cords. This tightness affects the rest of the legs in less degree. An Italian physician, Fantoni, has tried it in headaches and meningitis.

Bonino has cured a carpenter, 29, who had trembling of the hands eleven years, worse morning. Latterly the legs also began to tremble. His father and brother were similarly affected. Merc-v. and Agar. only relieved temporarily. Lol. cured. **Planets:** Mercury, Moon.

Homeopathic

The chief symptoms of Lol. are: Nausea and vomiting of the bread containing it and mucus with it. Cold rigors internal chilliness, cold sweat. This remedy is useful in paralytic conditions. Delirium tremens. Tremors and convulsions, Parkinson's disease. Prostration and restlessness. Writer's cramp.

Clinical

Delirium tremens. Paralysis. Parkinson's disease. Tremor. Writer's cramp.

Modalities

Worse damp, wet season.

Symptoms

MIND

Anxiety and general uneasiness. Anxious and depressed. Confusion of mind, very great depression. Difficult speech. Comprehension slow and difficult, distraction, confusion and stupefaction. Mania. Slight delirium. Depressed spirits.

Limbs

Gait unsteady. Trembling of all limbs, cannot write, cannot hold a glass of water. Spasms of arms and legs. Violent pain in calves, as if bound by a cord.

Mouth

Tongue tremulous. Speech difficult, cannot pronounce the whole word.

Stomach

Nausea, vomiting. Severe purging.

Temperature

Cold rigors all over especially in limbs.

Vertigo

Vertigo, must close eyes.

Comments

Anshutz states: "The use of the drug by Dr. Bonino was truly homeopathic for the short proving of it. Allen Encyclopedia reports trembling of the limbs and hand so great that "he could not hold a glass of water."

A carpenter aged twenty-nine years, had been suffering ever since his eighteenth year of trembling in both hands, especially in the morning of late also his legs began to tremble.

It is remarkable that both his father and his brother were subject to the same ailment, while no definite cause could be indicated.

He was first given Mercurius, then Agaricus, which brought a partial but only transitory improvement. Finally Bonino prescribed Lol., which in a short time effected a cure.

On this Dr. Mossa comments as follows: The pathogenetic effects of this remedy which has not yet been proved at all are only known to some degree from its effects when it has been mixed with grain and baked into bread.

Lol. has caused chest troubles, vertigo (thence the name darnel-grass in German Taumellolch), trembling, paralysis with anguish and distress, vomiting, failing of the memory, blindness, headache, epileptic attacks, deep sleep and insanity.

The good success obtained by its use in the case given above shows what curative effects may be expected from it in severe disorders of the brain or spinal marrow.

Lonicera periclymenum

(woodbine)

Pharmacy

Lon-p. Woodbine. Lonicera periclymenum. Honeysuckle. N. O. Caprifoliaceae. Tincture of fresh plant. Historical dose: Tincture and all potencies.

History

Cooper has cured with Lon-p. irritability of temper with violent outbursts and has seen it produce the same, (Crocus). **Planets:** Mars.

Clinical

Irritability.

Compare

- (1) Lon-x., Vib., Op. Sambucus, Symphoricarpus.
- (2) Staph., Hyos., Croc. - outbursts of temper.

SOURCES

Clarke.

Lonicera xylosteum

(fly woodbine)

Pharmacy

Lon-x. Lonicera xylosteum. Fly woodbine. N. O. Caprifoliaceae. Trituration or tincture of berries. Historical dose: Tincture, trituration and all potencies, third to sixth potency.

Herbal

Lon-x. is known from the effect of poisoning by its berries. **Planets:** Moon, Mercury.

Homeopathic

Lon-x. has vomiting and purging, trembling and jerking of the limbs, convulsions and coma were the chief symptoms. Abdomen retracted especially in umbilical region.

Albuminuria. Uremic convulsions. Convulsions. Syphilis. Contraction of one pupil and dilatation of the other.

Frequent jerking of limbs. Trembling and jerking of whole body. Violent convulsions.
Seemed neither to hear nor see, unable to make answer.
When raised from bed, limbs and head fall over as if paralyzed.

Clinical

Albuminuria. Coma vigil. Convulsions. Syphilis. Uremia. Vomiting.

Symptoms

MIND

Coma. Dullness of the mind. Stupefaction.

Abdomen

Abdomen retracted, especially in umbilical region, soft. Violent colic.

Eyes

Contraction of one pupil and dilatation of the other. Conjunctiva red. Pupils dilated.
Everything foggy and indistinct to vision for half an hour. Photophobia.

Face

Red face. Pale. Lips dry.

Food

Excessive thirst.

Head

Congestion of head and chest.

Heart

Violent impulse of heart. Pulse slow, small, soft, irregular.

Limbs

Jerking of limbs. Trembling of whole body. Violent convulsions. Limbs and head fall over as if paralyzed. Limbs cold.

Lungs

Respiration rapid and deep.

Mouth

Tongue moist, coated with mucus.

Rectum

Bloody stools.

Sleep

Coma. Sleepy. Constant deep sleep with half-open eyes, red face.

PAGE 1015

Stomach

Profuse vomiting, and purging.

Temperature

Cold perspiration. Limbs are cold. Fever. Profuse cold sweat.

Compare

(1) *Lonicera periclymenum*.

(2) *Dig.* - slow pulse.

(3) *Cadm-s.* and *Rhod.* one pupil contracted, the other dilated.

SOURCES

Boericke. Clarke.

Luffa operculata

Pharmacy

Luf-op. Luffa Operculata. Columbia. Tincture. Historical dose: Tincture and all potencies, 4x to 30x.

Herbal

Luffa Oper. of Esponjilla is an exotic plant which comes from Columbia and was introduced to Europe by W. Schwabe. The symptomatology was undertaken by him on eleven people (six men and five women), using the potencies 5x, 3x, 2x. Each potency was used for one week. **Planets:** Mercury.

Homeopathic

Luf-op. has lassitude and physical fatigue. Frontal and occipital headache. Acute or chronic inflammation of the mucous membranes in the nasal cavities. Hypertrophy or atrophy of the nasal mucous membranes. Hypothyroid.

Clinical

Asthma. Breathlessness. Emaciation. Headaches. Laryngitis. Nasal polyps. Rhinitis. Sinusitis. Tachycardia.

Modalities

Better in fresh air. Worse in a room in dry air.

Symptoms

MIND

Lack of reaction with attitude of indifference and prostration.

Eyes

Musca volitantes.

Food

Extreme hunger with emaciation. Painful feeling of thirst and hunger, difficult to satisfy.

Head

Violent headaches going from the forehead towards the nape of the neck. Pain in the occipital region. Frontal pains with vertigo and musca volitantes.

Heart

Tachycardia.

Lungs

Breathlessness from the least effort. Bronchial asthma.

Mouth

Dryness of the tongue, back of the throat and pharynx. Burning sensation at the tip of the tongue.

Nose

Acute rhinitis and pharyngitis. Purulent sinusitis. Chronic atrophic rhinitis. Head colds with pale or yellow nasal secretion, especially in the morning. Dryness of the nasal mucus with sticky scab formations. Nasal polyps.

Rectum

Tendency to constipation.

Skin

Formation of small purulent, itching pimples on the face, lower lip and chin. Loses hair in abundance.

Stomach

Diffuse gastric pains. Empty feeling in the stomach.

Compare

(1) Merc-i-r. - Coryza with hoarseness. Abundant discharge with post-nasal mucus, aggravated in the open air, ameliorated by heat.

(2) Cinnb. - Pressing pains in the bones of the skull and nose with discharge of thick mucus and often nosebleed.

(3) Hep. - Sour, fetid secretions with blocked nose immediately on going out into the cold air. Ameliorated in a warm room.

Luna

(moonlight)

Pharmacy

Luna. Luna. Moonlight. Moon's Rays. Sugar of milk is exposed on a glass plate to the moon's rays and stirred with a glass rod meanwhile. The sugar of milk so charged is dynamized in the usual way, (Fincke). Higgins made a preparation by exposing pure water to the moon's rays for three or four hours in South America and then dynamizing the water so charged. Historical dose: All potencies.

History

Goullon contributed to the Rev. Hom. Belge, January, 1897, a notable article on "The Influence of the Moon on the Human Organism," in which he mentions, among other interesting facts, that sleepwalking is a lunar effect, that worm disorders are most troublesome at the full moon and that goiter changes, more or less with the moon.

Planets: Moon.

PAGE 1016

Homeopathic

Luna has the majority of the symptoms in the generative sphere, the head and the lower limbs. Excessive edema of face, neck and hands with neuralgic pains in the swollen parts.

Luna is excellent in sour belchings, especially if tasting of ingesta. Among other maladies notably influenced by the moon is epilepsy and epilepsy worse at full moon may need Silica. Scabies and worm disorders are worse at full moon.

Nervous affections, especially in subjects of sycosis, are frequently influenced by the moon. Skin diseases. Acrid yellow leucorrhoea through day with backache. Pain in right ovary.

Clinical

Acidity. Epilepsy. Headache. Inter-menstrual flow. Insomnia. Edema. Female disorders. Menses, irregular. Nightmares. Sleep disorders. Sleepwalking. Worms.

Modalities

The pains were better in open air, better by cold application, better by belchings and by passing flatus from vagina. worse After sleep, worse from milk.

Symptoms

MIND

MIND

Irritability on being spoken to. Wants to be let alone. not clear. Disinclined for mental or physical labor. Sad, depressed. Mental faculties, especially ability to receive, retain and express ideas, are most powerfully affected by the full rays of the moon in tropical countries, the influences being most felt the day before the full moon.

Abdomen

Colic, commencing two inches above umbilicus and seeming to pass directly upward to stomach, causing desire to bend forward. Faint feeling in stomach on awaking and sensation of great distention and slight pain round umbilicus, better by belchings. Pain through liver and spleen, 3 p.m.

Back

Very severe pain in sacral region in evening.

Chest

After ascending stairs, a peculiar heating sensation, beginning at lower extremity of sternum and extending outwards. Attachment of diaphragm on each side to a point under each arm, at same time warm glow down arms to finger-tips, most in left.

Eyes

Weakness of eyes and feeling of sand worse by the medicine. Sharp stinging sensation, leaving a smarting. Stinging in right eye cured. Swelling of eyelids and profuse discharge of purulent matter with a painful smarting and profuse lachrymation without heat or change of color.

Face

Edema of face.

Female

Increase of menstrual flow, amounting to hemorrhage. Menses less free, strings of dark blood, colic pain above umbilicus better by eructation. Sharp pain left side vagina, leaving dull aching which seems to extend through left external parts, then grows suddenly sharper, again returning to vagina and passing through to rectum. Sharp pains fly from vagina through abdomen, ceasing in stomach-pit. This pain was better later by passing flatus from vagina. Menses returned two days after ceasing.

Cramp-like pains in pelvic region, as if uterus were being contracted by a strong electric current. Bearing-down sensation.

Food

No appetite, slight nausea. Desires something, she does not know what. Immediately ejected cup of tea during headache, the tea tasted sour.

Head

Slight giddiness with slight bitter taste left side of tongue with increased saliva. Sharp pain just above root of nose. Pain in occiput, changing to lame feeling on retiring. Woke with very severe headache. Headache better by magnetic passes. Severe frontal headache during menses. Congestion of blood to head with sensation of great fullness.

Heart

On retching, peculiar feeling round heart as though it stopped beating, better by belchings, worse by lying down. Suffocative sensation round heart. Pulse rapid.

Kidneys

Urine profuse, clear and watery, at times darker.

PAGE 1017

Limbs

Slight rheumatic pains in shoulders, especially left. Sharp, quick pain in left cervical nerve intermittent every few seconds. Sharp pain in left great toe. Swollen feeling and sensation as if tightly bound in right calf and in hypochondria. Pain like growing-pain above left knee, better walking. After retiring, aching in bones of lower limbs with pain in lumbo-sacral region. Great lameness in anterior tibial region from walking.

Mouth

Bitter taste left side of tongue with increased flow of saliva. Repeated later after eighth dose with stinging in right eye. Recurred on waking with faint feeling in stomach. Increased flow of saliva, all day.

Nose

Sensation of a cold in head. Coryza, sneezing and pain in occiput. 4 p.m. sensation of heavy cold in head with lachrymation. Discharge of yellowish-green mucus from nose.

Rectum

Urgent desire for stool, immediately better by passing flatus.

Skin

Stinging itching right side of body as if an insect was biting the parts, felt most on foot, leg and forearm.

Sleep

Symptoms worse on waking. Felt as if had not slept enough. Dreams: horrible of death of murder, waking in affright.

Stomach

Sour belchings, especially if tasting of ingesta. Flatulency with burning in stomach. Burning worse after drinking milk. Woke at midnight with severe heartburn and great distress in stomach, had to get out of bed.

Temperature

Woke 6 a.m. with severe chill after which he had headache, felt sick and weak all day, at night had horrible dreams of death.

Throat

Some soreness in throat.

Comments

Goullon quotes a remarkable case of sleepwalking from the Cercle Medical: "A youth of fifteen in good health in other respects, had been withdrawn from his apprenticeship, on account of his nightly promenades on roofs.

He was put in a private asylum. Although his room was oriented so that no actual moon-rays could reach it, the moon nevertheless exercised a potent influence upon him. As soon as it reaches the horizon he gets out of bed and carefully with closed eyes, moves towards a window, so high that he has to jump in order to reach and open it.

As it is barricaded with an iron trellis he gets down and, crossing the corridor, goes to the outer door, above which is a window. With cat-like agility he climbs up to this, when he is seized by three warders, who take him back to his room, where, only after the moon has set, can he lie down and go to sleep. In the morning he remembers nothing. At full moon the symptoms are still more extraordinary."

Skin diseases, according to Menuret, are frequently influenced by the moon.

He instances a case of eczematous affection which increased with each waning moon and was at its maximum intensity at the new moon.

When it covered the whole face and chest and was accompanied by unbearable itching. Then there was gradual improvement and the face became smooth, but scarcely had the full moon passed than all began again.

Moritz Hoffmann observed a young girl (daughter of an epileptic mother) whose whole body became swollen at every new moon, the swelling disappearing as the moon waned.

One of Swan's cases cured by Luna presented these symptoms: Excessive edema of face, neck and hands with neuralgic pain in the swollen parts.

Mead tells of a child who was subject to convulsions at each waning moon. Gale remarked that with weakly persons there are two epochs at which excitability is most pronounced at the new moon and the full moon.

PAGE 1018

Swan communicated a proving of Luna 1,000c. made on a lady physician, Dr. S. J. W. The prover was menstruating at the time the proving was commenced, but was otherwise in good health. Repeated doses were taken for two days. The effects lasted four weeks.

Compare

Lupulus humulus

(hops)

Pharmacy

Lup. Hops. *Lupulus humulus*. N. O. Cannabinaceae of the Urticaceae. Tincture of the seeded spikes. Trituration. Tincture of Lupuline, small resinous granules covering the scales. Historical dose: Tincture and all potencies, tincture to third potency.

Herbal

Lupulus has had a somewhat extensive proving to the symptoms of which have been added the effects of working with hops and of sleeping in rooms where hops were stored.

The "hops pillow" is remedy for sleeplessness is well known and this sleep-provoking effect passes into delirium and stupefaction. **Planets:** Moon.

Homeopathic

Lupulus is a good remedy in unstrung condition of the nervous system attended with nausea, dizziness, headache following a night's debauch. Infantile jaundice. Urethral burning.

Lup. has drawing and twitching in almost every muscle. Slow pulse. Nervous tremors, wakefulness and delirium of alcoholics. Giddiness and stupefaction. Perspiration profuse, clammy, greasy.

Clinical

Delirium. Dyspepsia. Dysuria. Excitement. Gonorrhoea. Headaches. Insomnia. Jaundice. Symptoms

MIND

Confusion. Frequent starting from deep sleep with violent delirium from which he could only be aroused with great difficulty, immediately lapsing again into stupor. Mental functions remained indolent several months. Morbid vigilance. Highly excited.

Abdomen

Fermentation and dull pains in abdomen. Dull griping in lower abdomen with nausea.

Eyes

Pupils remained dilated several months.

Female

Diminishes and allays sexual appetite.

Food

Appetite lost. Great thirst.

Head

Dull, heavy headache with dizziness. Drawing and twitching in every muscle. Rush of blood to head and eyes. Heat in head and face with confusion and dull headache. Violent pulsating of temporal arteries.

Heart

Slow pulse.

Kidneys

Burning in urethra during urination, not better by coffee. Urine retarded. Diuresis. Urine dark brown, clear.

Limbs

Great twitching of tendons. Paralytic weakness.

Lungs

Respiration is deep, almost stertorous.

Male

Painful erections. Emissions, depending on sexual weakness and after onanism.

Spermatorrhea. Diminishes and allays sexual appetite.

Neck

Strong pulsation of carotids.

Rectum

Stool softer than usual with urging so great he could hardly reach the closet. Stool retarded.

Skin

Scarlatina-like eruption on face. Feels like insects crawling under skin, feels chapped, skin peels.

Sleep

Drowsy during the day. Sopor.

Stomach

Belchings are nauseating, tasting of hops. Nausea. Vomiting. Sensation of increased warmth in stomach.

Tongue

Tongue thickly coated, dry.

PAGE 1019

Vertigo

Vertigo, stupefaction.

Comments

In a child of twelve, who remained several days in a room where hops were being picked, there was: Frequent starting up from deep sleep with violent delirium from which he could only be aroused with great difficulty, when he recognized the bystanders, but immediately fell backward into stupor. It was months before he recovered.

The Lup. effects which remained were: Dilated pupils, mental indolence, unsteady movements, erythema. Among other symptoms of Lup. are: Burning in urethra during urination. Nausea and vomiting. Turning sensation in stomach. Fermenting in abdomen. Twitching of tendons. Faintness. better In open air.

Lycopersicon esculentum

(tomato)

Pharmacy

Lycpr. Lycopersicum esculentum. Solanum lycopersicum. Tomato. Love apple. N. O. Solanaceae. Tincture of ripe fruit. Tincture of fresh plant. Historical dose: Tincture and all potencies.

Herbal

Cooper gave Lycpr. in a case of rodent ulcer and caused sharp pain and temporary spread of the disease. Cooper commends the use of tomatoes in cases of obesity.

Clarke knew of one instance in which the slightest indulgence in them brings on an attack of gout. When raw they require mustard or other condiment, being cold to the stomach. **Planets:** Mercury, Saturn.

Homeopathic

Lycpr. has marked action on deltoid and pectoral muscles, pain is better lifting arm upward and outward. Pains left after influenza.

A coryza worse out of doors should make Lycpr. a useful alternative to All-c., which has better out of doors. Polyuria was a feature of both proving and with the great thirst should give Lycpr. a place in diabetes. Right side principally affected, symptoms proceed from right to left.

Clinical

Backache. Coryza. Deltoid rheumatism. Diabetes. Diarrhea. **Eyes** disorders. Gout. Headache. Leucorrhoea. Metrorrhagia. Obesity. Rheumatism. Throat sore.

Modalities

Better in warm room. Better by external heat. The headache in one instance was completely better by tobacco smoke. Worse by noise, motion.

Symptoms

MIND

Thoughts disappear, worse when leaning head against anything, forgets everything he wishes to recollect. Peevish about trifles, worse by weakness of memory. Unusually active for short periods, followed by longer periods of dullness. Cannot keep mind fixed on work. Very irritable, noises greatly annoy.

Abdomen

Great flatulency of abdomen.

Back

Rheumatic pain near attachment of trapezius muscle to spine. Heavy dragging in right scapula. Intense aching through whole back, lumbar region. Backache in lumbar region, making them gloomy and depressed. Cannot get into a comfortable position.

Breasts

Relief of soreness and tenderness of scirrhus breast.

Chest

Slight sticking beneath left side of sternum without difficulty of respiration. Oppression in chest in lower lobe of right lung.

Eyes

Dull, heavy, ache. Sore and burn intense aching. Lids feel heavy and swollen. Pupils minutely contracted. Light painful. Letters run together when reading. **Eyes** water on close work. Keeps wiping eyes to see clearly. Twitching in left inner canthus.

Face

Face flushed. pale. Pressure in right zygoma. Stitch in left cheek. Stitches in left zygoma.

PAGE 1020

Female

Profuse leucorrhoeal discharge. In some cases too frequent menstruation, brought on by free use of canned tomatoes, the flow would return whenever this food was eaten for a few meals.

Head

Headache begins in the occiput spreads all over the head and settles with great violence in temples, worse tobacco smoke. Intense throbbing, bursting headache. Bursting pain in head, especially vertex and when coughing. Dull, heavy pain in occiput.

Heart

Fine stitching pains at base of heart. Lame pain in region of heart. Pulse 100, full and flowing.

Kidneys

Must rise at night to urinate. Constant debility when in open air, not at all in warm room. Increase of watery constituents of urine, not of total solids.

Limbs

Intense aching, rheumatic pain in muscles of all limbs. Lame, tired feeling in all limbs with great exhaustion. Sharp pain in right deltoid and pectoral muscles, worse lifting arm upward and outward. Lameness of left wrist, hand and fingers, where it is painful even when not moving it. Painful sticking behind articulation of left hip. Intense aching pain in lower limbs. Sharp sticking pain along course of right crural nerve.

Lungs

Coughs are deep, harsh, starting from irritation in lower chest. Dry, hacking cough coming on at night and keeping him awake. Explosive cough. Expectoration white and in lumps, early in morning.

Mouth

Itching and tickling in roof of mouth. Tongue: coated thick yellow, thick and white, more in center. Foul breath. Foul taste.

Nose

Stopped catarrh. Profuse watery coryza excoriating ale, drops down posterior sinuses, salty taste, markedly worse out of doors.

Skin

Erythematous lupus much relieved, (Cooper).

Sleep

Very restless sleep. Unable to fall asleep in evening tosses about, every position uncomfortable. Frequent waking and tossing, limbs when pressed feel paralyzed. Wakened by insignificant dreams. Confused, disagreeable dreams.

Stomach

Thirst for large quantities of water. Great flatulency between 10 a.m. and 11:30. Violent belchings of gas with taste of food. Burning sensation in stomach towards evening and during evening.

Stool

Brownish, watery diarrhea. Stool brownish, yellow, frothy, no urging, painless.

Temperature

Chilliness towards night, preceded by thirst for large quantities of water. Chilliness and sweat. Temperature from 100.5 to 101 F. Sweat on awaking confined to a strip about four inches wide along whole length of back.

Throat

Hoarseness towards night. Husky voice. Hoarseness with constant tickling in pit of throat. Constant desire to clear throat. The throat slightly sore on swallowing. Mucous

membrane of pharynx pale, tip of uvula and arches of pharynx red and inflamed. Burning raw feeling right side of throat, changing to left. Swelling of left tonsil.

Vertigo

Giddiness with inclination to faint on attempting to walk.

Comments

Gross made a proving of Lycpr. It caused sticking and pressing pains, a sense of paralysis, peevishness and loss of memory, pressing and boring pains in head, stopped catarrh. Some women cannot eat tomatoes without getting backache, leucorrhoea or metrorrhagia.

In Gross's proving the headache was worse in evening, she was obliged to rise in the night to urinate. The mind symptoms were worse and the headache better by leaning the head against something.

Dr. Herbert H. Roberts of Derby, Conn., has published provings made by himself, two with the 3x and two with the 30x tinctures. "The original tincture was made from the thoroughly ripened fruit, great pains being taken to thoroughly macerate the seeds as well as the pulp."

PAGE 1021

The rheumatic and congestive symptoms were mostly produced by the 3x, the nervous symptoms mostly by the 30x. Roberts remarks that the natives of Mexico and California eat quantities of the ripe fruit to prevent rheumatism.

The right deltoid was very markedly affected and should make Lycpr. a companion to Sang. in shoulder pains. Headaches were intense and characteristic in some great soreness remained after the pain had gone.

Dark-complexioned people seem to be suited to its action from two cases recorded by Roberts.

(1) Widow, 50, dark complexion, large, stout, gray eyes. Sudden attack of grip. Very severe aching pains all over, up and down back, limbs, head. Beating, throbbing in head, beginning in occiput, spreading all over head, settling with great violence in temples.

Excruciating pain back of eyes and in balls as if they would burst with the pressure. Light causes pain. Delirium. Severe, deep, racking cough. Thirst for large quantities. Pupils contracted.

Lycpr. 3x every hour, cleared away the fever and acute symptoms by the following morning and rapidly cured the remaining cough.

(2) Man, 40, dark complexion, black hair and eyes, tall, thick-set. Severe bursting, throbbing pain beginning in occiput and settling with great force in temporal and frontal regions, eyes painful, worse from light, pupils contracted.

Thirst for large quantities. Temperature 104 F. Pulse full flowing. Lycpr. 3x every hour given in evening removed headache before midnight. Next day right tonsil swollen and inflamed, sore on swallowing, feeling of a lump there. Temperature 101. Rapidly got well.

Lycopodium clavatum

(club moss)

Pharmacy

Lyc. *Lycopodium clavatum*. Club moss. *Muscus terrestris repens*. *Pes ursinus*. Wolf's-claw. N. O. Lycopodiaceae. Hilly pastures and heaths in Central and Northern Europe, Russian Asia and North America. Common in Great Britain, especially the North. Its medicinal properties are disclosed by trituration and succussion of the spores. Tincture of fresh plant. Etherial tincture of spores, (ether dissolves the spore cases). Historical dose: All potencies.

Herbal

The Lycopodiums stand between the mosses and the ferns and in past eras occupied a most important place in the world's vegetation as fossils show.

This drug is inert until the spores are crushed. The spores from which the potencies are made have been called "vegetable sulphur" (probably on account of their use for producing stage-lightning at theaters).

In the old school the function of Lyc. has dwindled into its use as an "inert" coating for pills and an "inert" powder dusting on excoriated surfaces. Earlier practitioners did not consider it as by any means inert.

Teste mentions that it is recorded of a decoction of the plant that it has caused vomiting. The use of the powder in intertrigo was not regarded as a physical one but as medicinal. In Poland it is used for powdering the hair in "plica polonica," a decoction being used internally and also externally at the same time.

In many cases where *Lycopodium* is the remedy, some evidence of urinary or digestive disturbance will be found.

PAGE 1022

Lyc. ranks with Sulphur and Calcarea in the central trio around which all the rest of the *Materia Medica* can be grouped. *Lycopodium* is adapted more especially to ailments gradually developing, functional power weakening with failures of the digestive powers, where the function of the liver is seriously disturbed.

Teste puts Lyc. at the head of a group containing Nat-m., *Viol. tric.* and Ant-c.

Homeopathic

Lycopodium affects the nutrition, due to weakness of digestion. Acts upon urinary organs and most of the symptoms develop on the right side and go to the left, throat, chest, ovary. Ailments develop gradually, with weakness. The liver is seriously weak. Deep seated progressive chronic diseases.

Symptoms characteristically run from right to left, acts especially on right side of body and are worse from about 4 to 8 p. m. In kidney affections, red sand in urine, backache in kidney region, worse before urination. Intolerant of cold drinks, craves everything warm.

The patient is thin withered and full of gas and bloating. Acidity, sour, taste, belchings. Descending symptoms, colds, emaciation. Stones, gall stones, gravel. Lithic acid diathesis. Dropsy, ascites in liver diseases.

Deep-seated, progressive, chronic diseases. Emaciation. Malnutrition. Cancer. Debility in morning. Marked regulating influence upon the glandular (sebaceous) secretions. Pre-senility. Ascites in liver disease. Lacks vital heat, has poor circulation, cold limbs. Pains come and go suddenly. Sensitive to noise and odors.

Oversensitive to pain, patient is beside himself. Sense of internal paralysis. One side of the body hypertrophied at change of life in women. Atrophy of infants. Hemorrhages, dark blood. Erectile tumors. Boils recurring periodically. Emaciation and debility from loss of fluids.

Clinical

Abdomen, weak. Albuminuria. Aneurysm. Angina pectoris. Aphasia. Asthma. Axilla, perspiration. Biliousness. Borborygmi. Bright's disease. Cancer. Cataract. Colic. Colitis. Constipation. Corns. Coughs. Cramps. Cystitis. Day-blindness. Debility. Diphtheria. Dropsy. Dysentery. Dysmenorrhea. Dyspepsia. Ear, eczema behind. Eczema. Epithelioma. Excoriation. Eye inflammation.

Face, eruptions. Feet, perspiring. Fibroma. Flatulence. Gallstone colic. Glands, swelling.

Goiter. Gout. Gravel. Hematuria. Hair, loss. Hands, chapped. **Heart**burn.

Heart, diseases. Hemorrhoids. Hernia. Hypochondriasis. Hysteria. Impotence. Indigestion. Influenza. Intermittents. Intertrigo. Labor-pains, abnormal. Lip, cancer. Liver, derangement. Liver-spots. Locomotor ataxia. Lungs disorders. Menstruation, disorders. Metrorrhagia. Miscarriages. Nosebleeds. Nymphomania. Otorrhea. Panaritium. Paralysis. Parkinson's disease. Peritonitis. Phlegmasia dolens. Plica polonica. Pneumonia. Polyps. Proctalgia. Prostatitis. Pylorus disorders. Quinsy. Kidney colic. Rheumatism. Sciatica. Skin, cracks. Sleep, abnormal. Speech, disordered. Strains. Sunstroke. Taste, abnormal. Throat sore. Tongue, coated, cramps. Tuberculosis. Typhoid fever. Urine, abnormal. Varicose veins. Warts. Water-brash. Whooping cough. Worms. Yawning.

Causations

Ill effects of fear, fright, abuse, anger, anxiety, embarrassment, fevers, overlifting, masturbation, riding in a carriage. Tobacco chewing. Wine.

Constitutions

Grauvogel's carbo-nitrogenoid constitutions. It is suited to: Persons of keen intellect, but feebler muscular development, upper part of body wasted, lower semi-dropsical, lean and predisposed to lung and hepatic conditions, herpetic and scrofulous constitutions.

Hypochondriacs subject to skin diseases, lithic acid diathesis, much red sediment in urine, urine itself transparent, sallow people with cold limbs, haughty disposition, when sick, mistrustful, low of comprehension, weak memory. Weak children with well-developed heads but puny, sickly bodies, irritable, nervous and unmanageable when sick after sleep cross, pushing every one away angrily. Old women and children. It has been more indicated in persons of dry temperament and dark complexion.

Undernourished states suggest it. It is adapted to old persons or who become old early, where the skin shows yellowish spots or to precocious weakly children. Lyc. are intellectually keen but of weak muscular power, lack vital heat, circulation poor, it seems to stand still with cold, numb limbs or numbness may appear in spots. **Planets:** Jupiter, Venus.

Modalities

Better by motion, Better after midnight. Better from warm food and drink. Better on getting cold from being uncovered, cold applications, belchings, urinating. Worse right side from right to left from above downward, 4 to 8 p.m. Worse from pressure of clothes, awakening, wind, eating, even a little, overeating, oysters. Worse from wet, stormy weather. Worse before or from suppressed menses. Worse from milk, vegetables, cabbages, beans, broad, pastry. Worse from heat, warm room, hot air, bed, warm applications, except throat and stomach which are better from warm drinks.

PAGE 1023

Symptoms

MIND

Indecision. Timidity. Loss of self confidence. Poor self-esteem. Constant fear of breaking down under stress. Cannot bear to see anything new. Anticipation. Stage-fright. Fear of public speaking. Averse to undertaking new things, yet goes through with ease.

Apprehensive. Sensitive, weeps when thanked or meeting a friend. Melancholy, afraid to be alone. Fear of men, presence of new persons of everything. Anxiety, as if about to die.

Awakes, irritable, angry, sad and anxious. Headstrong and haughty when sick.

Domineering, fault finding. Love for power. Hurried when eating. Weeps all day. Sad, on hearing distant music or cheerful and merry. Hateful. Cranky. Miserly.

Failing brain-power. (Anac., Bar-c., Kali-p.) Weak memory, confused thoughts.

Dyslexia. Spells or writes wrong words and syllables. Cannot read what he writes. Brain fag after influenza.

Incipient paralysis of the brain. Misanthropic, flees even from his children. Suspicious.

Abdomen

Gastro-enteritis from fright. Flatulence, much, noisy, pressing out. Immediately after eating, abdomen is bloated and full. Inactive intestinal tract. Fermentation in intestines like yeast working. Epigastric, anxiety, pressure. As of a band about waist. Colic in babies with gas and bloating, worse evening. Pain shooting across lower abdomen from right to left. Hernia, right side. Sensation of something moving up and down or as of a hard body rolling, when turning to the right side. Brown spots on abdomen.

Back

Stiff back. Lumbago, worse slightest motion, worse sitting erect, better urinating. One side of the neck stiff and swollen. Emaciation about the neck. Burning, as from hot coals between the scapulae. Pain in the back and right side from congestion of liver. Bubbling sensation.

Breasts

Hard burning nodosities in breasts with stitching aching pains and soreness. Rawness of nipples, sore, fissured, bleed easily. Delayed menses with undeveloped breasts at puberty. Milk in breast without being pregnant. Child vomits blood after sucking bleeding nipples.

Chest

Tensive, constrictive, burning pain in chest. Feeling of tightness in chest with burning. Brown yellow spots on chest. Difficult respiration due to hydrothorax and hydropericardium.

Ears

Otorrhea and deafness with or without tinnitus after scarlatina. Thick yellow offensive discharge. Eczema about and behind the ears. As if hot blood rushed into ears. Humming and roaring with hardness of hearing, every noise causes peculiar echo in ear.

PAGE 1024

Eyes

Eyes half open during sleep. Hemiopia, sees only one-half of an object. Day-blindness. (Both.) Sparks before the eyes in the dark. Polyps on external canthi. Feel cold, hot, seem too large. Styes on lids near internal canthus. **Night-blindness**.

Ulceration and redness of lids. Cataract with suppressed menses.

Face

Yellowish, pale, gray with blue circles around the eyes. Face withered, shriveled and emaciated. Grayish-yellow color of face with blue circles around eyes. Itching, scaly herpes in face and corner of mouth. Flushes of heat. Twitchings. Twists face and mouth. Silly expression.

Female

Menses of clots and serum, discharge of blood from genitals during stools. Vagina, dry, burning, worse during and after sex. Sex painful. Leucorrhea, acrid, periodical, milky, worse before full moon. Cutting from right to left ovary, ovarian, tumors, dropsy. Dropsy of uterus. Fetus seems to be turning somersaults. Dysmenorrhea, violent with fainting. Menses, suppressed, for months.

Food

Loss of appetite. Aversion to bread. Low blood sugar. Desire for sweets, delicacies, pastries etc. Flatulent food, cabbage, beans, oysters and onions disagrees. Likes to take drink and food hot. Cannot eat oysters. Canine hunger, the more he eats, the more he craves. Food tastes sour. Excessive hunger.

Head

Shakes head without any apparent cause or involuntarily, slow first, then rapid. Headaches over eyes in severe colds. Pain in temples as if screwed together, worse menses. Pain beings on one side goes to other where it is worse. Headache, worse if not eating regularly, lying down, stooping, better uncovering. Pulsating pain in occiput, at night, worse when hot. Hair falls, becomes gray early. Premature baldness after abdominal affections, childbirth. Dandruff. Eczema, moist oozing behind ears. Deep furrows on forehead. Hydrocephalus. Meningitis, tubercular. Catarrhal headache, worse when discharge from nose is slacked up. Shakes head without apparent cause.

Heart

Aneurysm. (Bar-c.) Aortic disease. Palpitations at night. Cannot lie on left side. Pulse, fast, worse after eating, evening. Sensation as if the circulation stood still. Hypertrophy.

Kidneys

Frequent urging to urinate better riding in cars. Pain in back before urinating, ceases after flow, slow in coming, must strain. Retention. Polyuria during the night. heavy red sediment. Child cries before urinating. (Bor.) Kidney colic in ureter (right) to bladder.

Urine, scanty, cries before urinating, red sand, must strain, suppressed, retained. Urine, milky, turbid. Polyuria during the night. Hematuria. Involuntary urination in fever or from fright during sex. Urine bloody with paraplegia or sometimes with constipation. Urine burning hot.

Limbs

Numbness, also drawing and tearing in limbs. Hands and feet numb. Heaviness of arms. Tearing in shoulder and elbow joints. Axillary abscess (right). One foot hot, the other cold. Chronic gout with chalky deposits in joints. Profuse sweat of the feet. Pain in heel on treading as from a pebble. Painful corns, callosities on soles toes and fingers contracted. Sciatica, worse right side. cannot lie on painful side. Cramps in calves and toes at night in bed. Limbs go to sleep. Twitching and jerking. Varicose veins on legs. Pain in bones at night. Emaciation of one hand or one leg. Curvature and decay of bones.

Liver

Weak liver and poor digestion. Sensitive, congested liver. Chronic hepatitis, atrophic, nutmeg liver. Ascites from liver diseases.

PAGE 1025

Lungs

Craves air but is chilled by it. Tickling cough. Short, rattling breathing, worse lying on back. Cough worse going down hill. Cough is deep, hollow. Expectations gray, thick, bloody, purulent, Salty, greenish-yellow, lumpy or foul expectoration. Night cough, tickling as from Sulphur fumes. Catarrh of the chest in infants, seems full of mucus rattling.

Abscess of the lungs, tuberculosis. Neglected or unresolved pneumonia with great dyspnea. Flying of ala nasi and presence of mucous rales.

Male

Sexual exhaustion, impotence, erections feeble. Falls asleep during sex. No erectile power, impotence. Premature seminal emission. (Agn., Calad., Sel.) Exhausting pollutions. Enlarged prostate. Condylomata. Yellow tumor behind corona glandis.

Mouth

Mouth hangs open. Sore lips. Bad odor from mouth. Dryness of mouth and tongue without thirst. Teeth, excessively painful to touch. Toothache with swelling of cheeks, relieved by warm application. Tongue dry, black, cracked, swollen, oscillates to and from. Tongue, trembling, painful ulcer on tip or below tongue. Blisters on tongue. Speech indistinct, stammers the last word. Saliva dries on palate and lips. Dropping of lower jaw in typhoid fever. (Lach., Op.) Teeth yellow. Mouth waters. Gums bleed when touched or cleaning teeth. Taste too acute, sour, bitter, moldy. Small tumors in mouth in various places.

Nose

Nasal troubles from childhood. Nose stopped up, snuffles, breathes through mouth, child starts from sleep rubbing the nose. Fan like motion of alae nasi in brain, lung and abdominal troubles. Feeling of dryness. Ulcerated nostrils. Crusts and elastic plugs. (Kali-bi.) Ozaena, acrid. Chronic coryza, blows nose often. Scanty excoriating, discharge. Fluent coryza. Sense of smell very acute.

Rectum

Constipation or diarrhea during pregnancy. Constipation of children from contraction of sphincters. Feeling as if much remained unpassed after stools. Constipation when away

from home or traveling. Ineffectual urging. Chilliness in rectum before stools. Diarrhea from cold drinks. Burning in rectum. Stool hard, difficult, small incomplete. Stools, contain sand, first part is hard is difficult to expel, last part is soft or thin and gushing.

Hemorrhoids, aching, painful to touch, better hot bathing. Alternating diarrhea and constipation. Rawness of anus.

Sensations

As if everything was turning round. As if temples being screwed together. As if brain vacillating to and fro. As if head would burst. As if head opened. Pain in head as if caused by wrong position. As if esophagus was being clutched and twisted. As if steam rising from stomach to head. As if something were moving up and down in stomach. As if suspensory ligament of liver would tear. As if stomach would fall down. As if drops of water were falling down. As if heart hung by a thread. As if gimlets were running into spine. As if dogs with sharp teeth were gnawing her. Tension as from a cord in diaphragm. As if chest constricted with tight waistcoat.

Skin

Eczema associated with urinary, gastric, hepatic disorders. Psoriasis. Hives, worse warmth. Violent itching, fissured eruptions. Blood boils. Boils, remain blue. Dry, rawness in folds. Skin becomes thick and indurated. Varicose veins, nevi, erectile tumors. Brown spots, freckles worse on left side of face and nose. Dry, shrunken skin, especially palms, hair becomes prematurely gray. Dropsies. Offensive secretions, viscid and offensive perspiration, especially of feet and axilla. Abscesses beneath skin. Ulcerates. Ulcers fistulous. Scabs do not separate.

Sleep

Drowsy during day, on waking, the child starts, becomes cross kicks, scolds or holds his mother. Awakes terrified. Anxious dreams of fatal accidents. Child sleeps all day and cries all night. Laughs or weeps in sleep. Starting in sleep.

PAGE 1026

Stomach

Great weakness of digestion with much bloating. Sensation as if fasting after meals, but without hunger. Hunger, but quick satiety. Eating ever so little creates fullness. Hiccough. Sour belchings. Belchings rise only to pharynx. Wakes at night feeling hungry.

Vomits, food and bile, coagulated blood, dark greenish masses after eating and drinking. Cancer, perforating ulcer. Churning sensation. Gnawing pain, better drinking hot water. Coldness in stomach.

Temperature

Chill between 3 and 4 p.m. , followed by sweat. Icy coldness. Feels as if lying on ice. One chill is followed by another, (Calc., Sil., Hep.) Body becomes cold during cough. Foul, viscid sweat, axillary of feet like onions. Fever, continuous, remittent intermittent.

Throat

Swelling and suppuration of tonsils. Ulceration of tonsils, beginning on right side. Chronic enlargement of the tonsils. Dryness of throat without thirst. Food and drink regurgitates through nose. Inflammation of throat with stitches on swallowing, better warm drinks. Diphtheria, deposits spread from right to left, worse cold drinks. Ulceration of vocal bands. Tubercular laryngitis, especially when ulceration commences. Sore throat, worse cold drinks. As if a ball rose up in. As if a hard body in esophagus.

Vertigo

Vertigo when looking at anything turning. Vertigo in morning on rising.

Comments

Lyc. was praised by Wedel, Lantilius, Gesner and others in (1) cardialgia and flatulent colic of children and young girls, (2) diseases of children, (3) nephritic colic and stones. Which is about as much as some homeopaths know about it at the present day. But Merat and de Lens speak of its internal use in: Rheumatism, retention of urine, nephritis, epilepsy and pulmonary diseases.

Among the common characters he attributed to them are: Primary action on digestive organs and adjoining glands, on liver and larger intestines rather than stomach. Aversion to bread and worse from eating bread and foods made of fermented and fermentable dough.

Frequent and painful belchings. Sour belchings, vomiting, distention, alternate diarrhea and constipation.

Pale, whitish, cloudy mucous urine often fetid. Premature and profuse menses.

Peevishness.

Rush of blood to head. Falling of hair with crusty scalp eruption. Inflammation of eyes and lids. Deficiency of vital heat. Contraction of the tendons, especially hamstrings. These are general features common to the group. Lyc. acts profoundly on the entire organism, on solids and fluids. It causes paralysis and paralytic weakness of limbs of brain, suppurative conditions, even gangrene.

But it is impossible to get the best therapeutic results for this great remedy without an intimate knowledge of certain leading characteristics.

Lyc. will cure any case in which the totality of symptoms correspond with symptoms of the remedy, but it will be found that in a large proportion of cases in which this is the case, there will be present some symptoms which are peculiarly characteristic of the remedy, constituting what are called keynote symptoms.

Practice on keynote symptoms alone is an absurdity, but the right use of keynote symptoms is an immense saving of labor.

The Lyc. keynotes are very pronounced. (1) worse from 4 to 8 p.m. In one case cured by Lyc. it was: "Bad from 4 to 6, better at 8, gone at 9." In any case, when the symptoms are worse from 4 to 8 p.m., the chances are very great that the rest of the case will correspond to Lyc., no matter what the disease may be.

The times may be not accurately at these hours and still Lyc. may be the remedy worse at 4 p.m. or from 4 to 6 p.m.

PAGE 1027

The condition may continue into the night without the 8 p.m. alleviation. But the grand characteristic is 4 to 8 p.m.

(2) The second keynote is in direction, right to left. Any affection commencing on the right side and spreading to the left is likely to require Lyc., whether it be headache, sore throat, chest affection, abdominal affection, pains in ovaries.

If the affection begin on the right side and spreads to the left Lyc. must be studied. Cutting pains shooting from right to left in any part indicate Lyc. In this it is complementary to Lach., which has just as characteristically the opposite direction. Lyc. is a right-side medicine, but right-sided is not so characteristic as the direction right to left.

These two features are perhaps the most valuable keynotes in the Materia Medica. After them in importance and scarcely less important, come other.

(3) better From uncovering. This is general, but it applies to sufferings in the head more particularly. If a patient complains of headache, no matter of what kind and if the headache is distinctly better by taking off the hat or other covering, Lyc. will probably be the remedy.

This is the great dividing line between this remedy and Sil., another great headache medicine: in Sil. cases the patient must warp up the head. better From loosening the garments is in the same category.

(4) The next characteristic is somewhat of an opposite kind: better From warm drinks, worse from cold food and drink. This does not refer to gastric complaints alone, but to headache, sore throat and any other condition.

(5) Fan-like movement of ale nasi occurring in cerebral, pulmonary and abdominal complaints. The movements are usually rapid, never slow and are not synchronous with the breathing.

In the same order with this are spasmodic movements of facial muscles: angles of mouth alternately drawn up and relaxed and spasmodic movements of tongue.

The tongue cannot be protruded, rolls from side to side like a pendulum. One prover had a kind of cramp in the tongue when speaking, cutting off the end of every sentence. Nodding and side to side movement of the head.

Loosvelt has found that "half-open condition of the eyes during sleep" is a strong indication for Lyc. and has led him to make cures in cases of bronchitis, pneumonia and typhoid when other remedies have failed.

The "fan-like movement" of the ale nasi led Halbert to the cure of a case of nervous asthma: Mrs. S., 28, had periodic attacks of spasmodic asthma, always ushered in by unusual excitement and attended by peculiar mental depression.

The attack for which Halbert saw her was induced by a violent fit of anger and persisted longer than usual. Extreme despondency and melancholy, would have nothing to do with her friends. Fan-like motion of ale nasi.

Constriction of throat like globus, but always induced by regurgitation of food. Excessive appetite easily satisfied. Fullness of abdomen with flatulence. Constipation, dry, hard stools. Dyspnea. Slight cough with chest constriction, better in open air. All symptoms worse 4 to 8 p.m. Lyc. 6x cured.

(6) Suddenness, sudden flashes of heat, lightning-like pains, sudden satiety. Pains and symptoms come and go suddenly, as with Bell.

(7) Sensation as if a hand were in the body clutching the entrails (also as with Bell.). (8) Restlessness better by motion. (9) Right foot hot, left foot cold. (10) Burning pains better by heat, burning like hot coals between scapula. Burning stinging in breasts. (11) Dryness of parts: of mucous membranes of vagina of skin, especially palms.

Prominent among mental symptoms is. Fear of being alone of men of his own shadow. Apprehensiveness. Susceptible to causes of fear which make a profound effect on bodily organs.

PAGE 1028

Profound sadness and inclination to weep. Peevish. Forgetfulness. Avaricious. Imperiousness. Lyc. is a remedy for misers.

The headaches are in great variety, but the modalities will generally decide: worse 4 to 8 p.m. from eating from warmth of bed from becoming heated during a walk from heat in general from mental exertion, better in open air in cool place, by uncovering. Hair falls out. Ophthalmia: conjunctiva looks like red flesh.

Lyc. has cured desperate cases of facial neuralgia with the general characteristics of the drug. The facial appearance is pale and yellow, deeply furrowed, looks elongated. Sordes in teeth.

Lyc. is in the front rank among flatulent remedies. Incarcerated flatulence, more in intestines than stomach, painful with better by belchings. There is the sinking sensation at epigastrium and it is worse in the night, waking up the patient or worse in afternoon.

Sour stomach, sour taste, sour vomiting. Thirst for little and often, but drinking cold water causes nausea. Great weakness with the vomiting. Cord-like tension across hypochondria. Flatulence incarcerated, pressing outward, sensation as if something moving up and down in bowels.

Great sensitiveness in liver region. Many cases of sciatica have this characteristic: cannot bear to lie on painful side it is so sensitive.

Especially in case of right-side sciatica of this description. Gums, epigastrium, abdomen, right side of chest, eruption round anus, all soft parts are sensitive. Touch and pressure worse all these, only better tearing in head.) The flatulence presses on rectum and bladder.

There is out-pushing also in right inguinal ring and Lyc. has cured many cases of right inguinal hernia, especially in children. Lyc. is one of the great remedies for constipation where purgatives have been abused.

Spasmodic constriction of rectum. Constipation of infants. The urinary symptoms present no less important characteristics than the gastric.

Kidney colic with stinging, tearing, digging pain in right ureter to bladder, as if some small calculus was tearing its way to bladder. Aching in back before urination. Child cries before urinating, red sand is found on diaper. Aching in kidneys worse before better after urinating.

The menses are too early and too profuse. Extreme sadness and irritability before, ceasing with the flow. Cutting pain right to left. Left leg colder than right. Borborygmi under left ribs in front. Ill-humor. Bearing-down pains and headache. Intolerance of tight clothing.

It has cured left ovarian pain, dull aching, worse on raising the limb or turning in bed. It is of great service in pregnancy (nausea, Varicose veins, excessive fetal movements) and in labor (unsatisfactory pains).

The "burning" of Lyc. is exemplified in the cure of a case of puerperal fever having these symptoms: Feels as though hot balls dropped from each breast through to back, rolling down back, along each leg and dropping off heels, this alternated with sensation as if balls of ice followed same course. Phlegmasia dolens.

Lyc. has a very large range in respiratory disorders. Salt sputa, milky, greenish yellow, thick yellow mucus, pus. Dry burning catarrh of nose, larynx, throat, chest.

A very characteristic cough of Lyc., which I have verified is this: "Dry teasing cough in emaciated boys". The cough of Lyc. is provoked by: Irritation from deep breathing, stretching out throat and by empty swallowing.

A patient of Clarke's took Lyc. 30c developed this symptom: "Pain under sternum as if food lodged there and she could not breathe through it." Cough worse on waking. All the blood-vessels from the heart to the capillaries are affected by Lyc. It has cured both nevus and aneurysm and relieved many conditions of disordered heart. It is also one of the most important remedies in varicose veins.

PAGE 1029

Excessive sensitiveness is a keynote of Lyc. Cannot bear any strong smells. Cannot endure noise. Sensitiveness to sound has a curious development in this symptom: In the evening she continues to hear the music she has heard during the day. "Heaviness of the arm" is a special feature among the general paralyzing effects of Lyc.

Nash mentions that the sphere of Lyc. in impotence is considerable. It covers the case of old men who marry again and find themselves impotent and the case of young men who have become impotent from masturbation or sexual excess. The desire is strong but the power is absent, penis small, cold, relaxed.

Majumdar records the case of a boy, 14, who had general dropsy and anasarca consequent on the subsidence of an enlarged spleen under allopathic medication. There was afternoon fever (worse 4 to 8 p.m.), slight chilliness, but no thirst, difficult breathing on lying down, urine scanty and high colored, bowels constipated, heart's action weak but regular.

Apis caused the urine to be more free, but a troublesome diarrhea set in. Apoc. 6x removed the diarrhea, but had no effect on the dropsy. Lyc. 30c was now given purely on the symptoms and quickly cleared up the case.

S. A. Jones calls attention to the irritability of Lyc. and instances the cure of a boy of typhoid with excessive tympanites when the case seemed almost hopeless, the guiding symptoms being: "When awake exceedingly cross, irritable, scolding, screaming, behaving disagreeably," which was quite different from his usual nature. Lyc. 30c was given.

The same writer relates an involuntary proving of Lyc. from inhalation of the fumes in the course of chemical experiment, Lyc. powder being added to a boiling mass. The writer (apparently a medical man) had at times while engaged in the experiments:

Frightful headaches (occiput, vertex and through right eye).

H. Goullon cured this case of cystitis: A man, 55, subject to attacks of enteralgia, was seized two days after such an attack with a severe cystitis with fever and palpitation of the heart. The calls to urinate were increased and he could hardly reach the vessel quick enough to prevent premature escape of the urine, so severe and sudden was the urging.

During and sometimes after the passage there was intense burning pain, "as if molten lead were flowing through the urethra." During the height of the pain he grasped the penis to obtain relief.

The urine, which was discharged in very scanty quantities, looked turbid, almost loamy, had a dirty brownish-red color and a peculiar odor of malt. Lyc. 12c was given, six drops in half a wine glassful of water: a teaspoonful every three hours. Cured in twenty-four hours.

Drysdale has recorded the cure of a young woman whose hands were covered with warts. One 2 grains tablet of Lyc. 6c trituration was given at bedtime. The warts soon began to shrivel and in less than six weeks were all gone.

Clarke gave Miss E. Lyc. 30c for constipation. Soon after taking it she had pains in upper abdomen in all directions, urging to stool without ability to pass it, much flatus which could neither be got up nor down.

Lyc. 1,000c. was now given, a few globules dissolved in water, a teaspoonful at bedtime. All symptoms vanished. On rising a second teaspoonful was taken and after this the bowels were well relieved.

On another occasion she took Lyc. 1,000c. in the evening and immediately felt her throat tight and uncomfortable, but this passed off and she went to bed. At 5 a.m. she woke with choking, had the greatest difficulty in getting her breath.

She managed to reach a bottle of Bell. 3c and a dose of this relieved her at once. A patient for whom Lyc. 5c had to her great delight reduced the gouty swellings about her finger-joints.

PAGE 1030

Now she could get rings on she had not been able to wear for years, was obliged to discontinue it on account of the distressing headaches it caused.

Compare

(1) Alumina. - Lyc. is the only vegetable that takes up aluminum.

(Allen.) (2) Ant-c., Nat-m., Bry., Nux-v.,

(3) Bothrops - day-blindness, can scarcely see after sunrise, pain in right great toe.

(4) Plumbago littoralis - a Brazilian plant, Costive with red urine, pain in kidneys and joints and body generally, milky saliva, ulcerated mouth.

Relations

Antidotes: Camph., Puls., Caust. Complementary: Lyc. acts with special benefit after calc. and Sulph., Iod., Graph, Lach., Chel., Hydr. follows Lyc. in indigestion.

SOURCES

Boericke. Clarke. Phatak.

Lycopus virginicus

(bugle weed)

Pharmacy

Lycps. *Lycopus virginicus*. Bugle-weed. Virginia horehound. N. O. Labiate. Shady and wet places in U. S. Tincture of fresh plant in flower. Tincture of the whole plant by macerating one part by weight of the fresh plant in two parts by weight of alcohol.

Historical dose: Tincture and all potencies, 5 drops of tincture, first to thirtieth potency.

Herbal

According to Hale Lycps. is mentioned by Rafinesque as "partaking of the properties of *Digitalis*, *Sanguinaria*, *Cimicifuga* and *Spigelia*," and as being "one of the mildest and best narcotics in existence."

He commends Lycps. specially as a substitute for Dig., as having the advantage over it of being non-poisonous, as useful in hemoptysis and "wherever it is required to quell inordinate motions of the blood." This gives a very good picture of the Lycps. place and action, which homeopathy has made good use of and developed.

Morriison made an extensive proving of Lycps. and developed unmistakable heart symptoms.

Lycopus virginicus lowers the blood pressure, reduces the rate of the heart and increases the length of systole to a great degree. (Adren.) Passive hemorrhages.

Briggs of Fort Lovell, relates the cure of a patient of Tarentula bite by application of a liquid made of Lycopus. He says the Cherokee Indians allow themselves to be bitten by rattlesnakes, centipedes and Tarentula, chewing as an antidote large quantities of Lycopus and swallowing the juice.

H. W. Felter, an eclectic is quoted as commending Lycps. in passive lung hemorrhage, wild, tumultuous beating of heart, which often precedes the lung hemorrhage, cough of tuberculosis. Lycps. does not disorder the stomach, he says, but acts a tonic and appetizer.

Planets: Sun, Mars. Moon.

Homeopathic

Lycopus virginicus is a heart remedy. Lycps. is indicated in diseases with tumultuous action of the heart and more or less pain. The characteristic heart is a feeble heart with distress and weak pulse. Cardiac irritability with depressed force. This may be found with organic disease as well as without.

The heart condition has many associated symptoms not directly referable to the heart.

When pulmonary complaints are associated with loose stools Lycps. will very likely be the remedy. There is a characteristic cough with hemoptysis associated with feeble heart action. If in addition there is a history of suppressed discharge the indications will be all the stronger.

It is of use in exophthalmic goiter and hemorrhoidal bleeding. Hemoptysis due to valvular heart disease. At night, violent cough. Lying down causes cardiac depression and lying on right side worse constriction of thorax. Pains shift generally right to left.

Beneficial in toxic goiter used in the pre-operative stage.

PAGE 1031

Clinical

Aneurysm. Bites of reptiles. Bright's disease. Cough. Diabetes. Exophthalmos.

Hemoptysis. Headache. **Heart**, diseases. Pericarditis. Snake-bites. Tarentula bites. Tuberculosis. Typho-malarial fever.

Causations

Suppressed hemorrhoidal flow.

Modalities

Motion, exercise, walking, ascending, all worse. Worse in morning with aching down spine, better after rising. Worse towards sunset and in evening.

Symptoms

MIND

Lycps. has increased mental and physical activity in evening. Stupid with lack of

expression during menstrual flow. **MIND** wanders from one thing to another. General wakefulness and morbid vigilance. Slight dullness of intellect with headache through sinciput increased power of concentration.

Abdomen

Tugging pain in spleen. Tenderness in left hypochondrium. Flatulence and rumbling. Aching in inguinal canal, bearing down as from hernia. Severe colic followed by profuse forcible diarrhea.

Back

Severe aching down spine. Acute pain at seventh cervical vertebra. Slight rheumatoid pain in left supra-scapular muscles.

Chest

Constriction across lower half of thorax. Pulmonary disease associated with looseness of bowels.

Ears

Burning in right ear.

Eyes

Protrusion, pressing, outward with tumultuous action of heart. Supra-orbital pain with aching in testicles. **Eyes** feel weak, as if fatigued. Neuralgic pain in right supra orbital region.

Female

Menorrhagia and metrorrhagia. Menses intermit for ten or twelve days. Vagina very hot, os uterus engorged and swollen. Puffing of parts on and around pubes and vulva, dilated condition of vagina.

Head

Frontal headache, worse frontal eminences often succeeded by labored heart. Pressure in forehead, worse left portion. Noise and throbbing in head preventing sleep after suppressed hemorrhoids.

Heart

Rapid heart action of smokers. Precordial pain, constriction, tenderness, pulse, weak, irregular intermittent, tremulous, rapid. Cyanosis. **Heart's** action is tumultuous and forcible. Palpitation from nervous irritation with oppression around heart. Rheumatoid, flying pains, associated with heart disease. Cardiac asthma (Sumb.).

Kidneys

Profuse flow of liquid, watery urine, especially when the heart is most irritable, also scanty urine. Bladder feels distended when empty. Diabetes mellitus, great thirst and emaciation. Tenderness in bladder. Urine is scanty, thick, muddy.

Limbs

Muscular rheumatoid pains. Rheumatoid pains in forearm and wrists with trembling of hands. Hands unsteady, writing difficult. Rheumatoid pains in knees, legs, thighs, wandering to back, slight lameness, unsteady gait.

Lungs

Asthma. Wheezing. Cough with hemoptysis, bleeding small but frequent. Breathing oppressed. Cough and irritation of lungs with irregular action of heart.

Male

Pain in testicles. Neuralgic pain in testicle with supra-orbital pain.

Mouth

Toothache in lower molars.

Nose

Nosebleed. Sneezing and slight nasal catarrh.

Rectum

Hemorrhoids. Bleeding from rectum. Diarrhea in jaundice from weakened heart.

Diarrhea with griping and rumbling. Constipation.

Skin

Prickings as if bitten by insects. Troublesome urticaria on left forearm and right leg, before retiring.

Sleep

Sleep restless, full of troublesome dreams. Wakeful on retiring, though fatigued.

Stomach

Indigestion with pain and distress in gastric region. Nausea with faintness.

Circumscribed pain and compression in region of stomach. Gastritis, enteritis, diarrhea, dysentery.

Throat

Rawness at back of right palate extending to left. Burning in spot on soft palate, following headache.

Vertigo

Vertigo, tends to stagger to right.

PAGE 1032

Comments

The association of Lycps. with Dig., Cimic. and Spig. particularly shows a very clear insight into the action of the remedy, which an experience of Clarke's seems to confirm.

Miss S., 25, came to him in October, 1899. About three years ago she had the first symptoms of exophthalmus, which was ascribed by her mother to a prescription of Macrotyn in low potency, taken for pains in the eyes and continued for a long period.

The first symptoms were sore throat with ulcerations, then the goiter appeared and the heart became painful, its action intermittent with breathlessness and inability to take exertion.

After a course of Thyroidin and later of Thuja 30c (she had been much vaccinated), Lycps. 12c was given and this took away all the heart pains. Attacks of influenza complicated the case later on and other remedies had to be given.

Now the patient is doing very well under Spig. 30c, as far as the heart is concerned, though no impression has been made on the goiter, which is small. The heart sounds are normal.

Two cases by Proell bring out a very important feature of the action of this drug, on the consequences of suppressions in his cases of suppression of hemorrhoidal flux.

The patients were each 60 years of age, a man and a woman, both fair with light eyes, tall, very irritable with weak innervation of the heart without decided organic disease.

Both had, years before, hemorrhoidal flux which stopped suddenly. Both were hypochondriacal and had noise in left ear.

This last symptom was the chief thing the man complained of, along with throbbing in the head preventing sleep.

Neither Cact., Kalm., nor Gels. helped radically. The night after taking Lycps. he was a little Better and in the forenoon came a bleeding from the rectum (about three table spoonfuls after defecation) with great general relief.

The lady had glycosuria, cataract of left eye and every third night was restless. Lycps. ix (same dilution as in the other case), one drop in evening. The following night was excellent and in the morning came an abundant bleeding from the rectum with great relief.

In a case cured with Lycps. by Morrison, the sufferings were associated with the menstrual period, which was exactly regular but intermittent in flow. The first symptoms appeared within three or four hours of the onset of the flow and was a deep-seated pain with heat in occiput. Then followed a train of symptoms, among them nausea and when the nausea came on the occipital pain was better.

This is quite a feature of Lycps.: the symptoms shift about.

In Proell's cases there was a shift from rectum to heart and head. Pains also shift from heart to eyes from head to heart from heart to left wrist and right calf and back to wrist and heart.

Stanley Wilde cured a desperate case of pericarditis associated with bronchitis with Lycps. tincture, also a case of palpitation with darting pain in heart in a young woman, following an attack of acute rheumatism two years before.

Lysidinum

Pharmacy

Lysidinum. Ethylene-Ethenyl-diamine. Methylglycoxalidine. Lysidin. occurs in red-white crystals. The solution is a thick pink colored liquid. Trituration. Solution. Historical dose: Trituration and all potencies.

PAGE 1033

History

Clifford Mitchel has given the 50 per cent solution in ten-drop doses well diluted in aerated water, thrice daily in two cases of oxaluria. **Planets:** Venus.

Homeopathic

One case recent in a young man, one in an old man and of long standing. In the second case the distressing lumbar pain was removed by a few doses though it had persisted for a number of days.

Clinical

Gout. Kidney stones. Oxaluria. Uric acid diathesis.

Lyssinum

(rabies nosode)

Pharmacy

Lyss. Lyssin. Lyssinum. Hydrophobinum. Nosode of rabies. Trituration of sugar of milk saturated with the saliva of a rabid dog. Triturations might also be made of Pasteur's strongest virus. Historical dose: All potencies, thirtieth or higher potency.

History

Hering was the first in 1833 to prove and to suggest the employment of this nosode in medicine and of late years it has become notorious from the experiments of Pasteur.

The nosode of rabies is prepared from the saliva of rabid dog. The pathogenesis of Lyss. is made up partly of symptoms observed in rabid animals and human patients, but chiefly of symptoms developed in the provings. The remedy has been pretty extensively used in practice, not only in cases of hydrophobia, but in many disorders in which the keynote symptoms have been present.

Cases of dysentery with pain and tenesmus on hearing water running from a tap have been cured with Lyss. Cannot bear heat of sun. Thirst with inability to swallow. Copious viscid saliva. A great variety of mental disturbances occur. Rapid speech and impatience are very noticeable.

A number of cures of hydrophobia have been reported from forced perspirations. Especially from prolonged and repeated use of the Turkish bath. This is known as the Buisson treatment from Dr. Buisson who originated it. Lyss. is better from sweating.

Planets: Moon.

Homeopathic

Lyssin affects the nervous system, throat and sexual organs. Senses become overacute. Convulsions brought on by dazzling light or sight of running water. Affects principally the nervous system. Complaints from abnormal sexual desire.

The Lyss. keynotes are sensitiveness to breath of air to bright objects, especially the surface of water to sounds and most of all to the sound of running water. Even the thought of it is enough to bring on an aggravation or a convulsion. Aching in bones. Bluish discoloration of wounds.

The mental irritability is as great as that of the senses and dangerously violent temper is developed. The irritation is further shown in the sexual organs. Suffocating feelings were experienced by several persons. Sighing and sighing respiration. Trembling or a quivering sensation throughout the whole body.

Clinical

Anxiety. Bubo. Clairvoyance. Convulsions. Corns, painful. Diarrhea. Dysentery. Esophagus, stricture. Fever. Hair, oily. Headaches. Hypersensitiveness. Insanity. Leucorrhoea. Lyssophobia. Mania. Nervousness. Neuralgias. Paralysis. Pregnancy, convulsions toothache. Rabies. Respiratory paralysis. Salivation. Sciatica. Sunstroke. Tetanus. Ulcers. Uterus, prolapse. Vaginismus. Wounds.

Causations

Ill effects of dog bites. Rabies injections.

PAGE 1034

Modalities

Better from bending backwards, gentle rubbing, steam or hot water bathing. Worse from heat of sun, glistening objects, dazzling or reflected light, wind, drafts, stooping. Worse from bad news, mental emotions, riding in a carriage. Worse from sight or sound of running water or pouring water or even thinking of fluids,.

Symptoms

MIND

Hypersensitiveness of all senses. Fear of becoming mad. Anger. Impatient. Violent temper, impelled to do reckless things, such as throwing a child through the window. Rapid speech. Roams about. Strange notions and apprehension during pregnancy. Rude, abusive, bites and strikes. Feels he cannot physically endure his fears much longer.

Emotions and bad news aggravate, also, thinking of fluids. Loss of consciousness. Does not hear or see persons around him. Thoughts of something terrible going to happen come into his mind against his will. Mental faculties are in the state of excitement.

Strange notions and apprehensions during pregnancy. Inclination to be rude and abusive to bite and strike. Ill-humor. Copper, if in his room, makes him restless and full of pains. The mere sight of a drinking vessel containing water is intolerable. Thinking of fluids of any kind, even of blood, brings on convulsions.

Abdomen

General soreness in whole of lower abdomen. A pressing pain in right side, near last ribs with breathing in hypochondria after quick walking. Tearing from left hypochondriac region to right. Rigidity of muscles of abdomen. Inguinal glands very much swollen, they pain for two hours.

Back

Pressing in neck and up back of head. Backaches with headaches. Considerable pain in lower part of back with soreness felt through to pubic region.

Breasts

Both breasts swollen when waking in morning,

Chest

Chest and abdomen feel expanded, expanding chest seems to invigorate him, though it usually fatigues.

Ears

Conversation in vicinity of patient may throw him into a most violent agitation. Hearing water poured out in next room makes him very irritable and nervous. Clairaudient.

Eyes

Sensitive to light. False vision, dullness of sight together with dilatation of pupils. Vision much impaired or absent, lasts twelve hours. Clairvoyance. Pain in small in spot over right eye brow, worse writing. **Eyes** are wild. rolling, staring and livid.

Face

The jawbones feel sore, aching in lower jaw. Gnawing and crawling sensation in zygoma. Facial muscles become contorted. Countenance changes its aspect frequently.

Face sweats with sensation of heat with flushes. Lower jaw stiff and painful with inclination to yawn. Spasms with froth before mouth.

Female

Uterine displacements. Uterine sensitiveness, conscious of womb (Helon.) Feels prolapsed. Vagina sensitive, rendering sex painful. (Berb.) Leucorrhoea, profuse, running down the legs. Pain in left ovarian region. Increase of uterine sensitiveness, conscious of having a womb. Any change of position that would tilt or rotate os uterus would cause much pain. Severe leucorrhoea with pains in back and lower part of bowels, sore vagina. Sensitiveness of vagina rendering sex quite painful.

Food

Voracious appetite, swallowed wheat without chewing. Excessive desire for salt. Strange notions, desires or cravings during pregnancy. Aversion to fat food and drink, there remains a long greasy aftertaste, worse after mutton. Warm drinks, such as milk, soups and wine, are more easily taken than water. Inability to take solid food or it is consumed with greatest difficulty.

Head

Headache from bite of dog, whether rabid or not. worse by noise of running water, bright light. Throws the head back when sneezing. Dry hair becomes oily.

Chronic headaches. Boring pain in forehead.

PAGE 1035

Heart

Pains as if needles were running into it. Stitches in heart from ringing of church bells.

Violent pain in heart, as if it would burst or had needles running into it. **Heart** palpitated violently and felt as if it was coming up into throat.

Kidneys

Desire to urinate or for stools on seeing running water or cannot urinate unless he hears water run. Urine too scanty and high-colored.

Limbs

Weight and heaviness of legs and shoulders. Severe twitching in arms and legs, much resembling chorea. Cramp in arms. The pain up arm was followed by cramps and drawing in back and limbs of bitten side. Weakness in arms. Left hip aches in bone. Along left sciatic nerve a dull pain. Twitching in legs. Weakness in legs when going upstairs.

Lungs

Barking cough. Voice altered in its tone. Breathing held for a time. Spasmodic contraction of respiratory muscles. Dyspnea with flatulency, cough and rattling in chest. Sighing, groaning respiration from cardiac pain. Oppression in breathing. Breathing, gasping, irregular and quite rapid.

Male

Complaints from abnormal sexual desire. Painful erection of penis and frequent seminal emissions. Semen is discharged too late or not at all during sex. Atrophy of testicles.

Mouth

Constant spitting. Froths at mouth. Saliva tough, ropy, viscid, frothy. Speech impeded from spasms of throat. Tongue coated with foam. Pricking sensation under tongue.

Feeling of coldness in mouth like essence of peppermint. Frothed at mouth. Saliva more viscid, constant spitting, feeling of general malaise.

Neck

Pain in neck better bending head backwards.

Nose

Strong odors may start spasms. The greatest sensibility to smell of tobacco. Frequent sneezing, as if a coryza would begin and from every little dust.

PAGE 1037

Macrotinum

Pharmacy

Macro. Macrotinum. Macrotyn. Resinoid of Cimic. racemosa. Trituration. Historical dose: Trituration and all potencies.

History

C. A. Howell cured with Macro. 2x, every two hours, a woman, 63, who after an interval of eleven years, began again to menstruate at 60, slightly but regularly and who had the following symptoms, which appeared suddenly at the time the flow was due, but failed to come on:

Intense pain at occiput worse at every throb of heart. Retraction of head and neck. Neuralgic pains in limbs. Pulse 96, temperature 99. The pain was relieved by Macro. in a few hours and the menses came on. **Planets:** Saturn.

Homeopathic

Macrotinum has muscular weakness, excessive restlessness, better by moving about in spite of the weakness, melancholy and irritable, dullness of intellect, these were prominent features.

Great restlessness. Whole muscular system seems exhausted after the least exertion. But the most important distinctive feature is the improvement of symptoms (other than dysmenorrhea pains) by onset of menses.

Clinical

Dysmenorrhea. Eye disorders. Fears. Headache. Irritable. Lumbago. Melancholy. Muscle pain. Rheumatism.

Modalities

Symptoms of the mind, eyes and breasts are worse before menses and better as soon as flow sets in. (Cimic. has worse of mental symptoms during menses). Backache is better after menses.

Symptoms

MIND

Melancholy, at times irritable, better when menses come on. Fear of impending danger or having an incurable disease. Sits for a long time thoughtless, moving hands and feet, frequent sighing.

SOURCES

Clarke.

Magnesium carbonicum

(carbonate of magnesia)

Pharmacy

Mag-c. Magnesia carbonica. Light carbonate of magnesium. Trituration. Historical dose: Trituration and all potencies, third to thirtieth potency.

History

Magnesia carbonica has many points of contact with Gels., Cham. and Ars. in nervous irritations and sleeplessness. But the nervousness of Mag-c. is of the type of nerve exhaustion.

Cooper says: Water containing Magnesia and that coming from magnesia limestone districts is peculiarly soft to the feel. There is reason for supposing that this softness has a soothing effect upon the nervous system when used in the form of baths.

Mag-c. is often found that the physical characteristics of substances correspond with their dynamic influences and thus with Magnesia, it very frequently is required for nervous systems that demand a permanently soothing and sustaining influence. Its effects on the skin are reflected upon the mucous surfaces. Quite apart from its antacid action, it proves soothing and sustaining.

Homeopathic

Mag-c. produces a catarrhal condition of stomach and bowels with marked acidity. A sour smell from the body, (Robinia) especially in children. Sour smelling with vomiting, regurgitation, stools etc.

Mag-c. is often used with advantage for complaints arising in people who have been taking this magnesia carb. to sweeten the stomach.

Effects of shock, blows, mental distress. Ailments from excess of care and worry with constipation and heaviness. Broken-down, "worn-out" women with uterine and menopausal disorders. Numbness and distention in various parts and nerve prostration. Tendency to constipation after nervous strain.

Mag-c. is sensitive to the least start, noise and touch. Sensitive to least touch. Intense neuralgic pains. Affections of the antrum of Highmore.

PAGE 1038

It is worse from cold winds or weather.

Emaciation. Marasmus, children do not thrive in spite of feeding and medicines. Cannot bear hands covered, yet chilled by uncovering. Spasms. Frequently indicated in children disposed to boils.

Epileptic attacks, while walking or standing he frequently falls down suddenly with consciousness. Dryness of mucous membranes, skin. Children, disposed to boils. Glands enlarged. Walking fatigues, causes involuntary urination, prickings in rectum, smarting leucorrhoea.

Clinical

Antrum disorders. Ascarides. Catarrh. Constipation. Cornea, opacities. Cough. Deafness. Debility. Diarrhea. Dyspepsia. Eyes inflammation. Hernia. Menorrhagia. Menstruation, delayed. Metrorrhagia. Nervousness. Neuralgia. Neurasthenia. Pregnancy, disorders. Spleen, pain. Taste, disordered. Tinnitus. Toothache. Tumors.

Causations

Ill effects of shocks, blows, mental distress, vexation, fit of passion, pregnancy, excess of care and worry. Poor feeding, milk. Pregnancy. Dentition. Cutting wisdom teeth.

Constitutions

It is suitable to ailing, worn out, nervous, flatulent and tabby persons especially women, children, nurslings. Persons of lax tissue and sour smell are suited to Mag-c. Mag-c. is suited to "persons, especially children or irritable disposition, nervous temperament, lax tissue, sour smell " (Hering) and to "worn-out women and dark-haired, sensitive people, spare and thin" (Cooper), it is just as ready to cure a tough old sailor, impassive and stolid, provided he has sufficient Mag-c. symptoms about him. **Planets:** Jupiter, Saturn.

Modalities

Better motion, warm air, walking in open air. Cold water better toothache for a short time, then aggravates. Worse warmth of bed. Worse every second day, every three week. Worse from rest.

Worse from change of temperature, cold, wind or weather, drafts, night. Worse from milk, starchy food. The pains are worse by rest insupportable, must get up and walk about. Worse from uncovering, great aversion to it. Wet and rainy weather causes itching of scalp. Draft aggravates facial neuralgia.

Symptoms

MIND

Anxious with perspiration all day. Sad mood with indisposition to talk. Trembling, anguish and fear as if some accident would happen, all day, better when going to bed. Least touch causes starting. Dazed feeling, packs and unpacks her clothes without consciousness of having done so. Insecurity and fear with trembling and heat. Ill-humor in evening.

Abdomen

Rumbling, gurgling. Cutting, gripping, pressing colic, followed by thin green stools, which aggravates. Colic followed by leucorrhea. Dragging towards pelvis. Cutting about navel better passing flatus. Very heavy, contractive, pinching pain in right iliac region.

Back

Pain in back and small of back at night, as if broken. Stiffness in neck. Tearing and pullings in nape of neck. Shootings in loins. Pain as if dislocated on raising arm. Contusive pains in sacrum and back, at night.

Chest

Oppression of chest, with sensation of constrictions. Constrictive pains in chest with dyspnea. Soreness in chest during motion. Shooting pains in chest.

Ears

Diminished hearing. Deafness, comes suddenly and varies. Deafness, on taking cold, cutting wisdom tooth. Numbness of outer ear. Feeling of distention of middle ear. Subdued tinnitus.

Eyes

Inflammation of eyes with redness, shootings, sensation of burning and confused sight. Black motes before the eyes. **Eyeballs feel enlarged and sensitive to pressure.** Opacity of cornea. Cataract, lenticular.

PAGE 1039

Face

Waxy pallor. Slovenly expression. Tension, as of white of an egg, dried on it. Tearing, digging, boring pain on one side, must move about. Pain in malar bone, worse during rest, night. Swelling of malar bone with pulsating pain, worse exposure to cold wind.

Female

Sore throat before menses appear. Before menses, coryza and nasal stoppage. Menses like thick dark molasses, tarry like pitch, viscid too late and scanty. Menses flow only in sleep, more profuse at night (Am-m.) or when lying down, cease when walking. Falls down in a faint at each menses. Leucorrhoea, white acrid, preceded by colic, regularly after the menses.

Food

Nibbling appetite. Craving for meat, fruits, acids and vegetables. Aversion to vegetables, green food. Cabbage, potato disagree. Milk is refused. Violent thirst.

Head

Pain in the head, as if the hair were pulled, worse mental exertion, stooping. Itching of scalp worse in damp weather. Pain above margin of right orbit. Brain heavy. Sinking of occipital bone in marasmic children.

Kidneys

Involuntary urination while walking or rising from a seat. Frequent emission of urine, even at night. White sediment in urine. Sensation of burning and excoriation when urinating. Bladder and rectum become irritable.

Limbs

Heavy, tired and painful in legs and feet. Tearing in shoulders as if dislocated. Right shoulder painful, cannot raise it. (Sang.) Swelling in bend of knee. Cannot bear hands covered, yet chilled by uncovering. Cannot put left foot on ground when walking.

Lungs

Craves open air. Tickling cough with salty, bloody expectoration. Cough from tickling in the larynx, at night. Cough, worse in evening till after midnight. Cramp-like cough at night. Expectoration of tubercles as big as a pea, and very offensive in smell.

Expectoration of blood when coughing.

Male

Discharge of prostatic fluid when passing flatus. Diminished sexual desire. Absence of erections. Scrotal hernia. Frequent pollutions.

Mouth

Mouth dry, at night. Taste, bitter, sour. Frequent sudden stammering speech. Vesicular eruption, bloody saliva. Sticking pain in throat, hawking up fetid, pea-colored particles. Toothache, especially during pregnancy, worse at night, worse cold and quiet. Teeth feel too long. Ailments from cutting wisdom teeth. (Cheir.)

Nose

Coryza and nasal stoppage before menses. Dry coryza, breathes through mouth. Nosebleed in morning. Vesicular eruption in nose with pressive pain. Stoppage of nose.

Rectum

Milk passes undigested in nursing children. Preceded by griping, colicky pain. Stools, frothy, greenish like water like scum of frog pond. Stools, lienteric with gelatinous fatty masses, grass green or dry, hard, crumbling, white clay, putty like. Bloody mucous stools. Sour stools with tenesmus, (Rheum) Constipation after mental shock or nervous strain.

Sensations

As if everything was turning round. As if hair was pulled. As if white of egg had dried on face. As if teeth too long. As if rectum pricked with needles. Back as if broken.

Skin

Hair and nails unhealthy. Earthy, sallow and parchment-like, emaciation. Sore, dry, sensitive to cold. Violent itching and great dryness of skin. Itching vesicles on hands and fingers. Large nodosities between the skin and the flesh with shooting pains. Nettle-rash with much swelling. Small painless, red tetter, which exfoliate. Spreading blisters. Small blood boils. Corroding vesicles.

Sleep

Frequent and violent yawning. Inclination to go to sleep during day. Unrefreshing, more tired in the morning than on retiring. Awakes at 2 or 3 a.m. and cannot fall to sleep.

Sleeplessness from flatus, cutting wisdom-teeth, exhaustion. Many anxious dreams, with talking, cries, and starting from fright. Dreams of fire, flood, robbers, quarrels, money, pleasures, misfortunes, dead persons.

PAGE 1040

Stomach

Belchings sour and vomiting of bitter water. Acid risings. **Heartburn**. Vomits, undigested milk or bitter water. Nausea and vertigo during a meal, followed by retching, and vomiting of bitter or salty serum. Sensation of emptiness in stomach. Pains, as from ulceration.

Temperature

Chilly in evening. Chilly, takes cold, before menses. Fever at night. Sour, greasy perspiration.

Throat

Sore throat with shooting pain when speaking and swallowing. Sore throat, worse before menses. Hawks up cheesy masses from throat. Sticking, pain in throat worse talking and swallowing. Burning pain in throat and palate. Soft, fetid tubercles of color of peas are hawked up.

Vertigo

Vertigo worse when kneeling. Vertigo in evening with swooning. Continual giddiness, can hardly stand, with numbness of left arm. Vertigo, staggers in the street and fears to go out, lest people should strike against her.

Comments

An indication of Cooper's has been of immense service in numbers of cases. It is "worn-out women." That is, the state of nervousness induced by excess of the cares and worries of life.

Mag-c. 200c, repeated three or four times a day, has given untold relief to many a patient of this kind. When constipation and heaviness are present these will be removed at the same time.

One leading keynote of Mag-c. is sensitiveness, mental and bodily, sensitive to touch, sensitive to cold air. Sensitive to touch, sensitive to cold air. The least touch causes starting. This sensitiveness passes into neuralgic pains of the highest intensity.

Neuralgia, lightning-like, worse on left side insupportable during repose, must get up and walk about.

Mag-c. is to exhausted nerves what Chin. is to exhaustion from loss of fluids. But it must not be supposed that Mag-c. is a "nerve" medicine only.

The sufferings of the pregnant state, neuralgia toothache and nausea come into this category. An extra tax is made on the woman's strength at this period and as so often happens the daily tasks go on as usual during the greater part of the time, so that a "worn-out" condition is induced. Mag-c. is of great value here.

Tumors, even bony ones, have yielded to it and it has been credited with the cure of cataract. Clarke has many times removed with it corneal opacities left by ulceration and practically cured with it a tumor of the right malar bone.

Two cases related by A. I. Harvey, illustrating the power of Mag-c. in neuralgia are quoted in Amer. Hom.

(1) Carpenter, 50, light complexion, spare, had facial neuralgia two years coming in attacks, lasting from three to seven days, at intervals of two or three weeks. Pain sharp, shooting from left side of face and head, worse at night from pressure from jar. Mag-c. cured promptly after failure of Spig.

(2) Blacksmith, 22, light complexion, full figure. For several years he had attacks of facial neuralgia coming on after taking cold. Pain very severe in left orbital region, shooting down into eye and face and back to occipital region, begins in morning, grows worse until noon, then subsides. No pain at night, rests well. Spig. and Kali-bi. failed. Mag-c., cured promptly.

Cooper mentions it as a possible remedy in pyorrhea alveolaris. In the homeopathic nursery Mag-c. is just as indispensable a blessing as it is in the allopathic nursery an indispensable curse. For children who are puny and sickly, who refuse their milk and get pain in the stomach if they take it.

PAGE 1041

Diarrhea, colic, stools green like the scum of a frog pond, jelly-like lumps, aphthae, Marasmus, Mag-c. is a sovereign remedy.

The acidity for which allopaths give Magnesia is a true enough indication, but not for the reason they give: Sour stools, sour sweat, sour smell of whole body, sour belchings from cabbage, sour vomiting, sour breath, sour taste, all these are caused and cured by Mag-c.

The whole body feels tired and painful, especially the legs and feet, aching, restless. Spasmodic disorders of stomach and intestines. Unrefreshing sleep, more tired on waking than on going to bed. Inordinate craving for meat in children of tubercular parentage.

There is much suffering at the menses in women. They are preceded by labor-like pain, cutting colic, backache, weakness, chilliness. A grand characteristic is: Flows only at night or when lying, ceases when walking. The period is usually late and scanty. Flow acrid, dark, pitch-like, difficult to wash off. During pregnancy there is vomiting and toothache.

There is periodicity with Mag-c. is every second day, every three weeks, "all symptoms Worse every third week." Touch and pressure worse almost all symptoms, but pressure in abdomen better menstrual flow. Pain is worse on the side lain on. Smoking aggravates the headache.

Compare

(1) Cham., Rheum., Kreos., Aloe.

(2) Cheiranthus - deafness, otorrhea, nose stopped up at night from irritation of cutting wisdom-teeth.

- (3) Mag-m., Mag-p., Aloe.
(4) Ant-c. - headache from smoking.
(5) Calc. and Rheum - sour stools. Nux-v. - sour breath.
(6) Cocc. and Sep. - worse from kneeling.
(7) Ip. - nausea and grass-green stools.
(8) Coloc. - griping pains with drawing up of legs, Coloc. has not the green slimy stools of Mag-c.
(9) Cham. - neuralgia, better moving about, anxiety, restlessness, griping before stools, stools of Cham. more yellowish green like chopped eggs.

Compare

(10) Calc. - sour stools, intolerance of milk, imperfect nourishment: Calc. has head-sweat, cold, damp feet, enlarged abdomen. (11) Lyc., Nit-ac., Sil., Lac-c., Lac-d. - intolerance of milk.

Relations

Antidoted by: Ars. and Cham. (neuralgia), Merc., Nux-v., Puls. and Rheum (abdominal troubles). It antidotes: Acet-ac. Compatible: Caust., Phos., Puls., Sep., Sulph.

Complementary: Cham.

SOURCES

Boericke. Clarke. Phatak.

Magnesium fluoratum

(fluoride of magnesia)

Pharmacy

Mag-f. Magnesium fluoride. Fluoride of magnesium. Remedy made from solution. Trituration. Historical dose: Trituration and all potencies, third to 30c potency.

History

There is no homeopathic proving for Magnesium fluoride. It was by clinical usage, based on the characteristics of magnesium and fluorine that Mezger established the following symptomatology. **Planets:** Mercury.

Homeopathic

Mag-f. has localized infections from bacteria. Streptococcus, enterococcus, staphylococcus. Nasal and pharyngeal infections of the maxillary sinus of the nose and tonsils. Post-infection conditions following influenza, sinusitis tonsillitis with: fatigue, asthenia, nervous irritability, lack of appetite, muscular and neuralgic pains, pains in the ligaments and tendons and joint pains.

Metabolic complaints of senescence with cholesterol disorders. Action on the liver, pancreas, digestive passage. Capillary and venous stasis. Venous thrombosis. Goiter. Thyroid problems with tendency to hyperthyroidism.

Clinical

Auto-toxins. Goiter. Chronic suppurations. Hyperthyroidism. Metabolic complaints. Neuralgia. Post-infectious conditions. Thrombosis.

Modalities

Better from the movement in fresh air. Worse from 3 a. m. Worse in the early hours of the morning. Worse from sleep especially after lunch. Worse a few days before menses.

Compare

(1) Sulphur - Auto-intoxication with fatigue. Itching eruption, alternating with other complaints, redness of the natural orifices, weakness at 11 a. m., sudden diarrhea. The need for fresh air.

(2) Hepar Sulphur - Tendency to suppuration. Hypersensitive, especially to the cold. Pain like that of a splinter. Skin unhealthy. Scrofulous lymphatic constitution.

(3) Bar-c. - Hypertensive heart - vascular sclerosis. Glandular and ganglion hypertrophy. Cerebral slowness.

(4) Stront. - Vascular and cerebral sclerosis. Pain in the bones. Muscular cramps.

(5) Cresol - Indifferent state with loquacity, tremors, trembling, paresis, oliguria, joint stiffness. Neuro-vascular sclerosis.

Relations

Mag-f. give after failure of Sulph. and Hep.

SOURCES

Julian.

Magnesium muriaticum

(chloride of magnesia)

Pharmacy

Mag-m. Magnesia muriatica. Chloride of magnesium. Magnesia chloride. Solution. Trituration. Historical dose: Trituration, tincture and all potencies, 5 drops of tincture, third to 200c potency.

History

While Mag-c. and Mag-s. are recognized old-school remedies, there is no mention of Mag-m. or Mag-p. in allopathic text-books. Mag-m. first appeared in Hahnemann's book *Chronic Diseases*. The general feature of Mag-c. appears in many symptoms, notably those of nervous disturbance and hysteria.

Mag-m. says Guernsey is found in many mineral water and in sea-water. It has a very bitter taste and is decomposed by heat. The note about the sea-water is important. Mag-m. is like Nat-m. and Aqua marina in the relation to seaside effects.

Nat-m. is particularly indicated in constipation, "biliousness," and generally, disordered health, which appear as soon as the patient goes to the seaside. Mag-m. is indicated when excessive weakness is felt after a sea-bath.

Homeopathic

The action of Mag-m. centers around the liver and nerves, uterus and rectum. A liver remedy with a characteristic type of constipation. Chronic liver disorders with tenderness and pain, extending to spine and epigastrium, worse after food. It is an after dinner remedy, many complaints such as fainting, fits, dyspnea, nausea and trembling etc., occur after dinner, better by belchings.

Mag-m. is especially adapted to diseases of women with a long history of indigestion and uterine disease. Ill effects of sea bathing. Children who cannot digest milk.

Spasmodic, hysterical complaints. Globus.

Soreness and sensitiveness to noises. Pains are boring, spasmodic, contractive, crampy, darting. Burnings. Shocks through the body like electric shocks when wide awake.

Perversions of taste, smell.

Clinical

Biliousness. Bladder, paresis. Cardialgia. Cold. Constipation. Deafness. Diarrhea.

Dysmenorrhea. Dyspepsia. Foot-sweat. Headaches. **Heart** disorders.

Heartburn. Hemorrhoids. Home-sickness. Hysteria. Leucorrhea. Liver disorders.

Nocturnal emissions. Ozaena. Palpitations. Pregnancy, nausea. Smell, disordered. Spleen, enlarged. Stomach, disorders. Taste, disordered. Tinea ciliaris. Urine, straining. Uterus, pain. Water-brash. Whooping cough.

Causations

Ill effects of sea bathing especially weakness.

Constitutions

It is especially suited to: Diseases of women, spasmodic and hysterical complaints complicated with uterine diseases. Headache at menstrual period in hysterical women.

Women after suffering months or years from attacks of indigestion or biliousness.

Enlargement and congestion of liver. Men with disordered livers and sexual problems.

Puny, rickety children during dentition. It is especially suited to liver disorders in children who are puny and rickety and have eruptions about the eyes. **Planets:** Jupiter, Moon.

PAGE 1043

Modalities

Most symptoms except headache are better in open air. Better from hard pressure, lying bent. Better hanging down affected part, gentle motion. Better cool open air. Better by belchings, (nausea and trembling). Worse from sea bathing. Worse immediately after eating. Worse after eating, salt, milk. Worse touch, mental exertion. Worse lying on right side. Liver symptoms worse lying right side. Worse noise, at night. Worse at meals (fainting). Worse after sex, pain in testes and cords.

Symptoms

MIND

Mental exertion aggravates. Peevishness and chagrin. Uneasiness, nervous excitability with tendency to weep readily. Uneasiness and lachrymose humor. Aversion to conversation, prefers solitude. Excited, unhappy, fitful, emotional. Fearful and inclined to weep. Anxiousness in room, better in open air.

Abdomen

Congenital scrotal hernia. Must use abdominal muscles to enable him to urinate.

Flatulence. Colic, hysterical, followed by leucorrhea.

Back

Throbbing below left scapula. Bruised or burning in hips or in back after sex (males).

Cramps in back worse walking.

Ears

Sensitive to noise. Pulsations in ears.

Eyes

Lachrymation and burning of the eyes when looking at anything in broad daylight.

Yellow sclera. **Tinea ciliaris**,

Face

Pale, yellow. Pimples on the face and forehead itching worse night, warm room and before menses. Blisters on lips. Facial neuralgia pains, dull, aching, worse damp weather, slightest draft, better pressure heat.

Female

Dysmenorrhea better by, pressure on the back or lying on a hard pillow. Menses, profuse, dark, lumpy like pitch with cramps. Menses black, clotted.

Pain in back and thighs. Metrorrhagia, worse at night. Great excitement at every period.

Leucorrhoea with every stool and after exercise. Tinea ciliaris, eruptions in face and forehead worse before menses.

Food

Appetite poor, bad taste in mouth. Cannot digest milk, (Nat-c.) Craves sweets, dainties. Hunger but knows not for what. Worse from milk, salty food.

Head

Sensitive to noise with bursting headache, worse motion, open air, better pressure and wrapping up warmly. (Sil., Stront.) Much sweating of head. (Calc., Sil.) Much sweating of head. As of boiling water on the side lain on. As if hair were pulled.

Heart

Palpitations and heart pain, worse while sitting, better by moving about (Gels.) or lying on left side. Functional heart disorders with liver enlargement.

Kidneys

Urine can only be passed by bearing down with the abdominal muscles. Urethra numb. In the dark one cannot tell whether one is passing urine or not. Stricture after dilatation. Urine passes in drops, some always seem to remain. Bladder can only be emptied by straining and pressure.

Limbs

Cramps in thighs worse sitting. Thighs and calves tense, must move limbs. Finger tips numb. Ankles cold or nervous worse night. Cutting in heels. Feet sweaty. Pain in back and hips in arms and legs. Arms "go to sleep" when waking in morning.

Liver

Jaundice. Pressing pain in liver, worse lying on right side. Liver enlarged with bloating of abdomen, yellow tongue. Sore, enlarged liver with bloating of abdomen, worse lying on right side, drags if lies on left side. Cramp in the gall bladder better by eating. Pain from liver to spine or epigastrium.

PAGE 1044

Lungs

Spasmodic dry cough worse fore part of the night with burning and sore chest. Bloody sputum or congestion and soreness of chest after sea bathing. Oppressed breathing, globus hystericus.

Male

Pain in testes and cords worse after sex or after unrequited sexual excitement. Burning in back after sex.

Mouth

Blisters on lips. Gums swollen, bleed easily. Tongue feels burnt, mouth feels scalded. Throat dry with hoarseness. Toothache, worse if food touches the tooth. Continued rising of white froth into the mouth. Loss of taste. Broad yellow scalloped tongue.

Nose

Red, swollen. Nostrils ulcerated. Coryza. Nose stopped and fluent. Loss of smell and taste, following catarrh. Cannot lie down. Acrid, crusty Ozaena. Nocturnal obstruction of nose, must breathe through the mouth.

Rectum

Constipation of infants during dentition, only passing small quantity, stools are knotty like sheep's dung, crumbling at verge of anus. Painful smarting hemorrhoids. Stools, dry, knotty of little balls like sheep dung, gray. Absence of desire for stools. Tape-worms.

Sensations

As if some one was reading after her. As if boiling water was on side of head. As if hair pulled. As if tongue burnt, mouth scalded. Stools as if burnt.

Skin

Formication all over the body. Abscess, yellow thin foul pus. Jaundice. Sweat on head and feet.

Sleep

Anxiety and restlessness of the body as soon as she closes the eyes from heat of the body or from shocks. Sleep unrefreshing, tired in morning. Restless at night on account of heat and shock, anxious dreams.

Stomach

Regurgitation while walking. Belchings like rotten eggs like onions. Hiccough during and after dinner, causing vomiting. Belchings like rotten eggs. Continued rising of white froth into mouth.

Temperature

Chill even near a stove, better open air.

Throat

As of a ball rising into the throat better by eructation.

Comments

Teste, who places Mag-m. in his Ferrum group, says that Mag-m. and Mag-c. "have been used for the cure of cachexia occasioned by long and painful diseases." He says he has seen Mag-m. produce great improvement in this case: "Hydrarthrosis of left knee with emaciation of left thigh, consequent on a wandering neuralgia, which after having commenced in the form of cystitis with (non-venereal) discharge from urethra, had successively invaded the shoulder, left elbow, eyes and lastly, knees, where it had become seated."

A connection between liver disorder and nasal obstruction has often been traced and Mag-m. has a large number of symptoms in both. The nasal symptoms have led to its successful use in Ozaena.

Once case cured had redness, swelling and scaliness of nose and sweat about the head and feet.

Mag-m. is one of the leading remedies in foot-sweat. Burning in soles, evening, must put feet out of bed. In liver disorders there is enlargement, sensitiveness worse from touch and Worse lying on right side tongue large, coated indurated.

The constipation of Mag-m. is very distinctive and has led to the cure of many very obstinate cases. The characteristic stool is knotty and conglomerate like sheep's It may remain in this condition or it may crumble at the anus. Painful urging before stool, burning at anus after. As well as intestinal atony, there is atony of bladder: urine can only be passed by bearing down with abdominal muscles.

The hysterical symptoms are marked: spasms, fainting, globus. Bearing down in uterine region, uterine spasms. Menses black or pitch-like, accompanied by pains in back when walking, pains in thighs when sitting. Leucorrhoea after every stool or following uterine spasms. Hysterical headaches.

Patient is anxious, restless, always worse by mental exertion during or after dinner seized with nausea, belchings, trembling and faint spells, better by belchings.

PAGE 1045

Palpitations, worse when quiet, better moving about. Perversions of taste and smell are marked in Mag-m. and Clarke has frequently restored with it loss of taste and smell after influenza. The pains are mostly boring and spasmodic contractive pains, dragging down. There is much burning and heat.

R. M. Skinner reports this case: A farmer had been treated allopathically three months for chills, which were checked, but the man did not feel well. Spleen very large, sensitive, felt heavy when he walked or rode. Constipated, goes three or four days without a stool. It was for this that he sought advice.

Abdomen distended, hard, especially in ileo-cecal region. Cold on left side and a crawling feeling like a cold snake. Beating in umbilical region as if his heart beat there.

Mag-m. 200c one dose on the tongue. At 8 p.m. the bowels began to act and went on acting with the exception of one hour until 3 a.m. He complained next morning that the medicine had "almost killed him," and he looked thin and tired. No further medicine was given and in ten days he had no complaint and the spleen was normal in size and without tenderness.

Boericke. Clarke. Phatak.

Magnesium phosphoricum

(phosphate of magnesia)

Pharmacy

Mag-p. Phosphate of Magnesia. Magnesia phosphorica. Hydric magnesia phosphate. Trituration. Historical dose: Trituration and all potencies, first to twelfth potency.

History

Mag-p. is one of the most important of Schÿssler's original additions to the *Materia Medica*. It has had a very fine proving in the potencies, conducted by H. C. Allen.

This sketch of Schÿssler's is confirmed in every point by Allen's proving and by the clinical use of Mag-p. in the highest potencies. Moreover, there is a very strong family resemblance between these features and those of Mag-c. and Mag-m.

But it is only right to say that Schÿssler arrived at them by a way of his own, which shows that there are other means besides provings of finding the keynote symptoms of remedies.

Allen adds to the above that the pains rapidly change place, that cramping is the most characteristic type of the Mag-p. pains. Dread of cold air of uncovering of touching the affected part of moving of cold washing.

Homeopathic

Schÿssler's states that Mag-phos. is contained in the blood-corpuscles, muscles, brain, spinal marrow, nerves, teeth. Disturbance of its molecules results in pains, cramps, paralysis.

Schuessler's biochemic remedy for cramps, convulsions, neuralgic pains and spasmodic effects, showing its influence on nerves and muscles.

PAGE 1046

Mag-p. is a great anti-spasmodic remedy. Cramping of muscles with radiating pains. Neuralgic pains relieved by warmth. The symptoms are worse by Motion, cold air, draft of air, cold wind, cold washing touch, lying on the back stretched out, when eating. The pains are shifting, better by rest, worse at night. The parts were tender to pressure and numb. Pains sometimes tense in paroxysms, compelling her to cry out. Anxiety, depressed vitality.

Spasmodic effects, hiccough, yawning, chorea, writer's, piano, violin player's cramps etc. Much pain. Nervous, tense and subject to sudden violent paroxysms of neuralgic pains. Sharp, shooting like lightning pains, that suddenly changing places. Radiating, boring, constricting pains, extorting cries, causing restlessness and prostration. Twitchings. Tic. Chorea better during sleep, worse at stool and emotions. Palsy. Parkinson's disease. Goiter.

Clinical

Catheterism. Chorea. Colic. Convulsions. Cough. Cracks. Cramps. Dentition. Dysmenorrhea. Headache. Intercostal neuralgia. Locomotor ataxia. Membranous dysmenorrhea. Meningitis. Menstruation, painful. Neuralgia. Rectum, prolapsed. School-headache. Sciatica. Stomach, cancer. Sobbing, spasmodic. Tic-douloureux. Toothache. Vaginismus. Whooping cough. Writer's cramp.

Causations

Ill effects of overuse of muscles, standing in cold water, cold bathing, working in cold clay, catheterism, study. Complaints of teething children.

Constitutions

Hering says it is suited to: Young and very strong persons, teething children. Allen says that though it is best adapted to emaciated persons, it acts promptly in stout, fleshy persons when well indicated. Especially suited to tired, languid, exhausted subjects.

Planets: Mars, Moon.

Modalities

Better by heat, warmth, pressure, bending double. Better from hot bathing, rubbing. Worse from cold, air, drafts, periodicity, night, uncovering, water. Worse right side, from lying on right side, touch, milk, exhaustion.

Symptoms

MIND

Mental depression and anxiety. Very forgetful. Always talking of her pains. Indisposition to study to mental work. Drowsiness on every attempt to study. Dullness and inability to think clearly. Talks to himself constantly or sits in moody silence. Illusions of the senses, sobbing, crying, lamenting all the time about pain in affected parts with hiccough.

Abdomen

Severe griping colic, at times shooting up towards stomach, better by hot applications. Flatulent colic, forcing patient to bend double, relieved by rubbing, warmth, pressure, accompanied with belching of gas, which gives no relief. Bloated, full sensation in abdomen, must loosen clothing, walk about and constantly pass flatus. Cutting pain into thighs. Abdomen contracted.

Back

Stiffness of neck and back. Cramps. One vertebra seems absent. Sore pain in neck and lower part of back. Aching in small of back. Dorsal spine, very painful and sensitive to touch.

Chest

Darting pains in chest, worse right side, which radiate from pain in bowels. Oppression: desire to take deep breath, worse on first entering warm room, worse walking.

Ears

Severe neuralgic pain, worse behind right ear, worse by going into cold air and washing face and neck with cold water. Nervous otalgia intermittent and spasmodic, better by heat.

Eyes

Hot and tired, vision blurred, colored lights before eyes. Supra-orbital pains, worse right side, relieved by the warmth when applied externally. **Increased lachrymation.**

Twitching of eyelids. **Eyes**, hot, aching, tired. Nystagmus, strabismus, ptosis, Photophobia. **Double vision.** Dark spots before eyes on attempting to read. Nystagmus, strabismus, spasmodic, ptosis, worse right side.

Twitching of lids. Itching and heat in lower lid.

PAGE 1047

Face

Facial neuralgia, worse when body gets cold from washing or standing in cold water, on opening mouth to eat or drink, better from warmth. Face distorted from pains and weakness, cramping colic. Lock-jaw.

Female

Menstrual colic, pain precedes flow. Menstrual cramps, better heat, bending over, by flow. Flow dark, fibrinous and stringy. Membranous dysmenorrhea. Menses too early, dark, stringy, tarry, flowing at night leaving a stain. Swelling of external parts. Ovarian neuralgia. Vaginismus. Labia swollen and at times intensely painful.

Food

Thirst for very cold drinks. Aversion to coffee. Acids taste stronger than usual. Appetite remains good, though food does not taste right.

Head

Headaches after mental labor with chilliness, always better warmth. (Sil.) Sensation as if contents were liquid, as if parts of brain were changing places, as if a cap on head. As of an electric shock in the head extending to all parts of the body.

Heart

Angina pectoris. Nervous spasmodic palpitations. Constricting pains around heart. Pulse irritable.

Kidneys

Nocturnal bedwetting from nervous irritation. Spasm of bladder of neck of bladder, spasmodic retention, tenesmus with constant and painful urging. Bladder neuralgia after use of catheter. Nocturnal bedwetting from nervous irritation. Cutting pain in bladder before urinating.

Limbs

Cramps in calves. General muscular weakness. Twitchings. Skin of fingers tight. Pains in lower limbs, alternating sides. Parkinson's disease. Involuntary shaking of hands. Cramps from prolonged exertion from prolonged use of tools. Crampy contraction of fingers. Sciatica with tender feet. Writers' and players' cramp. Tetanic spasms.

Lungs

Asthmatic oppression of chest. Dry, tickling cough. Intercostal neuralgia. Spasmodic, whooping cough, (Cor-r.), better cool air. Spasmodic nervous asthma.

Mouth

Cracks in angles of lips. Painful contraction of jaw joint. Spasmodic stammering. Ulceration of teeth with swelling of glands of face, throat and neck. Swelling of tongue. Tongue, clean with colic. Complaints of teething children. Spasms without febrile symptoms. Taste of bananas. Food does not taste right.

Nose

Alternate stuffing and profuse gushing discharge (of a white, thin substance), worse from left nostril. Smarting and raw feeling in left nostril.

Rectum

Constipation in rheumatic subjects due to flatulence and indigestion. Diarrhea ceases, spasms or other brain troubles set in. Dysentery with cramp-like pains, better by pressure or bending double. Constipation in infants. Itching and scratching feeling in anus.

Skin

Barber's itch. Herpetic eruptions with white scales.

Sleep

Sleepless on account of indigestion or toothache. Sleepy when attempting to study. Spasmodic yawning as if it would dislocate the jaw with tears. Drowsy at time of rising. Sleep disturbed by troublesome dreams.

Stomach

Hiccough with retching day and night. Burning pain, vomiting and hiccough better hot drinks. Constant nausea. Bilious vomiting, at times streaked with blood. Cancer of stomach. Intense cutting, shooting, cramping pains in region of stomach.

Teeth

Toothache, worse eating or drinking, especially worse from cold things. Toothache, better by heat and hot liquids. Teeth sensitive to touch or cold air. Neuralgic pain in a filled tooth. Complaints of teething children, spasms during dentition without fever symptoms. Severe pain in decayed or filled teeth.

PAGE 1048

Temperature

Chilliness after dinner in evening. Chills run up and down the back with shivering, followed by a suffocating sensation.

Throat

Voice harsh, larynx sore and raw. Soreness and stiffness, especially right side, parts seem puffy with chilliness and aching all over. Nervous angina. Spasmodic constriction of throat. Sensation of a corn-husk lodged in upper part of throat.

Vertigo

Vertigo on moving, falls forward on closing eyes, better walking in open air.

Comments

The pains of Mag-p. are shooting like lightning or boring often combined with or alternating with a sense of constriction, at times wandering, better by warmth, better by pressure, worse by light touch.

Mag-p. has cured: Headache toothache, pains in limbs when of this kind, also cramps in stomach. Pains in abdomen usually radiating from umbilical region, better by hot drinks, by bending double, by pressing on abdomen with the hand, sometimes accompanied with watery diarrhea. Spasms of various kinds, of glottis, whooping cough, lockjaw, cramps of the calves, hiccoughs, tetanus, chorea, spasmodic retention of urine, etc.

It is best adapted to disorders on the right side of the body to complaints from standing in cold water, complaints of dentition, headaches of school children, professional neuroses.

Writer's cramp. After-effects of catheter.

Nash says Mag-p. is in the first rank as a pain remedy and it has all kinds of pain, (though cramping pain is the most characteristic) except burning pain and this distinguishes it from Ars., since both have better from heat.

Allen's proving brought out canker sores in mouth, sore lips and cracked lips. A patient of mine who suffered intensely from cracks at the corners of the lips found nothing relieve so well as Mag-p. and it did best in the 1x potency.

Higher potencies were tried. The attacks (of pain, etc.) are often attended with great prostration and sometimes with profuse sweat. "languid, tired, exhausted, unable to sit up."

Mag-p. is more often called for in men than Mag-c., but the indication, "worn-out women," answers for both. The disorders of Mag-p. are often periodic.

Clarke cured with Mag-p. 6x a very severe attack of chorea in a girl of six. The spasms were general, but they affected the speech to such an extent that she could not make herself intelligible.

Rappaz of Montevideo cured with Mag-p. a young man of 17 of cerebral meningitis which began with violent pain and inflammation in left eye with terrific pains in head and delirium and intense fever. He was at first treated allopathically without success.

When Rappaz first saw him he was hemiplegic with frequent and alarming convulsions, crying out violent involuntary passage of feces and urine, dilated pupils, dropped jaw, escape of saliva, speech and comprehension difficult. Under Mag-p. 6x in water general improvement set in. Later the 12x was given and in two months he was well.

W. T. Ord cured Miss G., 48 of pain in back extending down right sciatic nerve and up since, following influenza with Mag-p. 3x, 5 grain doses.

Skinner has cured with Mag-p. a case of prolapsed of rectum with feeling as if rectum were torn, the symptoms being better by heat.

Compare

- (1) Kali-p., Coloc., Sil., Zinc., Dios.
- (2) Cham. - vegetable analog, but Cham. has worse from heat.
- (3) Shifting pains, Puls., Lac-c.
- (4) Neuralgia recurring violently every night.
- (5) better warmth, Ars.
- (6) Dysmenorrhea, Caul., Cimic, Xanthox., Cact., Lil-t., Coloc.
- (7) Colic better bending double, Coloc.
- (8) better from hot drinks, Lyc.
- (9) Meteorism, Lyc. Hydroa, cracks on lips, Nat-m.
- (10) Headache from occiput to eye better warmth, Sil.

SOURCES

Boericke. Clarke. Phatak.

Magnesium sulphuricum

(epsom salt)

Pharmacy

Mag-s. Magnesia sulphurica. Epsom salt. Sulphate of Magnesia. Trituration. Historical dose: Trituration and all potencies, third potency, 6x to 30c. Locally 1:4 in water in septic conditions, erysipelas orchitis, boils.

History

The ancient reputation of Mag-s. as a "refrigerant cathartic" under the familiar name of "Epsom Salts," or "salts" par excellence, has overshadowed its homeopathic uses. But Mag-s. is something more than a "refrigerant cathartic."

Recently old-school authorities have discovered in this "cathartic" a remedy for dysentery. It is the chief ingredient in many laxative mineral waters and popular saline aperient mixtures.

Mag-s. is of diagnostic and therapeutic value in Gallstone colic. The physiological dosage from 2 to 4 teaspoonfuls in glass hot water taken at onset of a colicky attack may abort or stop the colic.

Epsom salts is one of the most active saline cathartics, operating with little pain or nausea, especially if pure. Its action causing a rush of fluid into the intestine, which by producing a distention of the bowel produces evacuation. It causes little or no irritation in the intestine. In common with the other salines, it is the classical evacuant to be employed in connection with mercurials and anthelmintics and in cases of poisoning.

Epsom salt usually acts within from one to two hours, more quickly if taken in hot water and in the morning before breakfast. The ordinary dose as a mild laxative is a heaping teaspoonful, as a cathartic, two to four teaspoonfuls.

The taste may be improved, if necessary, by the addition of a little lemon juice and sugar. Use on compresses saturated with solution. Besides its chief use as a saline cathartic, magnesium sulphate is used to a considerable extent externally in saturated solution as an antiphlogistic and anti-itching in erysipeles, ivy poisoning, cellulitis and other local inflammations.

Homeopathic

The purgative action of Mag-s. is not a quality of the drug, but a quality of its physical state, which renders its absorption impossible. The properties inherent in the substance itself can only be discovered by potency. (Percy Wilde). The skin, urinary and female symptoms are most marked.

Greenish urine with red sediment. Profuse dark intermittent menses. Thick leucorrhoea as profuse as menses. As of a lump between shoulders. Back feels broken. Left arm and foot numb. Crawling in finger tips. Small pimples all over the body which itch violently.

Warts, large, soft.

Mag-s. has a depressive condition with hypersensitivity. Dysthyroidism. Tendency to spasms in the hollow organs. Liver weakness. Intermittent discomfort with prolonged periods of relief.

Clinical

Allergies. Bedwetting. Coughs, spasms. Diabetes. Diarrhea. Dysentery. Dysmenorrhoea. Epithelioma. Eye pain. Gallbladder pain. Headache. Hernia. Intermenstrual hemorrhage. Leucorrhoea. Liver complaints. Lumbago. Menorrhagia. Mental problems. Migraines. Neuralgias. Tetany. Thyroid weakness. Toothache. Warts.

Constitutions

Allergic, tubercular types with nervous hyperexcitability. **Planets:** Venus, Moon.

Modalities

Better from movement in the fresh air. Better from washing in cool water. Better from rubbing, walking. Worse morning, on awakening. Worse in the morning. Worse from traveling on a train. Worse in a closed vehicle.

PAGE 1050

Symptoms

MIND

Anxious, as though about to be struck by misfortune. Apprehensive. Depression. Melancholy and disposition to weep and restlessness. Bad-tempered with nervous tension. Tendency to fly into a passion, every thing is taken in bad part.

Prostration, almost beside herself with anxiety, she thought she would die. Foreboding anxiety, as if some accident would happen. Errors of imagination. Misunderstands everything. Sees persons who are absent. Hypersensitive to pain. Irritable with fear of dying.

Abdomen

Pain in the liver region, especially on breathing. Nightly attacks on the liver and gallbladder. Painful sensitivity in the region of the gallbladder. Sharp pains in left hypochondrium. Tension, hardness and fullness of abdomen after a meal. Violent shooting pains in whole abdomen, around the navel. Painful drawing in abdomen. Rumbling in abdomen with emission of flatulence. Itching of left inguinal region, not removed by scratching.

Back

Pain between the shoulders. Pains in the lumbar region. Lumbago. Bruised and ulcerative pain between the shoulders with a feeling as of a lump as large as the fist, on which account she could not lie upon her back or side, relieved by rubbing. Violent pain in the small of the back, as if bruised and as before menstruation.

Ears

Noises in ears. Shooting pains in ears. Tinkling in ears.

Eyes

Burning in eyes. Pains in eyes, **as if protruding from orbits**. Dimness of eyes with frequent drowsiness. Shooting pains in eyes. Lachrymation with photophobia. Supra-orbital neuralgia, left side.

Face

Face discolored, gray. Pain in the bones of the face. Earthy color of face. Tearing in bones of face. Dryness and burning in lips, in evening.

Female

Pre-menstrual nausea. Menses too early or late. Menses scanty or heavy. Blood thick and black. Thick leucorrhoea, as profuse as the menses with weary pain in the small of the back and thighs, on moving about.

Some blood from the vagina between the menses. Discomfort during menses.

Food

Desire for fruits, green salad and refreshing dishes. Intense thirst. Thirsty, morning and evening. Want of appetite and repugnance to all food, even when thinking of it. Aversion to sausages, meat, fats and fatty foods.

Head

Headache with feeling of fullness in the head, blood in the head and a prickling, drawing, piercing sensation.

Heart

Palpitations and breathlessness from physical exercise. Pricking pain in the heart, ameliorated by sitting and resting and aggravated by heat. Wakes at night with palpitations, following sleep filled with nightmares.

Kidneys

Stitches and burning the orifice of the urethra after urinating. Stream intermits and dribbles. The urine passed in the morning copious, bright yellow, soon becomes turbid and deposits a copious red sediment. The urine is greenish as passed is of a clear color and in a large quantity. Diabetes. (Ph-ac., Lac-ac.)

Limbs

The left arm and foot fall asleep in bed in the morning after waking. Sciatic pains, aggravated at night and during rest, ameliorated by walking. Chronic, non-inflammatory rheumatism of the hip.

Lungs

Spasmodic coughing. Laryngeal cough on waking, sometimes spasmodic and dry, sometimes with sputum. Respiration panting after exercise. Expectoration of sour mucus. Dry and shaking cough after waking in morning, and which compels sitting up.

Male

Urethritis. Prostatitis. Frequent stinging about penis when sitting or walking. Erections without amorous fancies or sexual desire.

Mouth

Dryness and bitterness of the mouth. Sweetish bitterness in mouth, especially in the morning. Toothache. Roughness of tongue. Dryness of mouth with sensation of numbness. Vesicles on edges of tongue with incisive pains.

PAGE 1051

Nose

Head cold and nasal discharge with ulceration inside the nose. Congestive pain. Pain, as from ulceration in nose. Nosebleed, at night. Copious secretion of thick and yellow mucus in nose. Fluent coryza with loss of smell. Rough voice and frequent flow of water from nose.

Rectum

Diarrhea after eating pancakes. Acid diarrhea of children. Diarrhea with diuresis. Diarrhea preceded by rumbling in abdomen. Stools like diarrhea, grayish in color or constipation with gray stools covered with mucus. Feces at one time hard, at another soft. Liquid stools with tenesmus. Ejection of ascarides during every evacuation. Soft stools early after rising. Loose evacuations with violent thirst. Neuralgia of rectum.

Skin

Eczema and vesicular eczemas. Boils. Generalized itching over the whole body, worse in bed. Miliary eruptions with burning and itching. Small pimples over the whole body, that itch violently. Suppressed scabies. (Sulph.) Crawling in the tips of the fingers of the left hand, better on rubbing. Warts. Erysipelas. Dropsy. Acne on the back. Hands moist from sweating. Epithelioma.

Sleep

Many dreams at night, sometimes disagreeable and anxious. Sleep with nightmares, dream lively, worrying with palpitations. Wakes at 3 a. m. with difficulty in falling asleep again. Extreme sleepiness in the daytime. Sleepy, early in evening. Sleeplessness at night, caused by violent pains in head, abdomen and loins.

Stomach

Frequent belchings, tasting like bad eggs. Regurgitation of fluid, preceded by a quivering in stomach. Disgust and nausea with accumulation of water in mouth. Vomiting, first of food, then of mucus.

Temperature

Chill from 9 to 10 a.m. Shuddering in back, heat in one part and chill in another. Chilliness with thirst, early in morning after waking. Shaking chill with violent headache in evening, succeeded by thirst.

Cold feet all day, although otherwise he feels hot. Heat of head with coldness of rest of body. Alternation of heat and shuddering, redness and paleness of face. Perspiration at night or in morning often accompanied by thirst.

Throat

Deep hollow bass voice. Sore throat on swallowing and pricking pains spreading to the ear. Sore throat, with shooting pains at night, worse by swallowing. Dryness and sensation of numbness in throat. Accumulation of mucus in throat.

Vertigo

Vertigo, head heavy during menses. Vertigo and numbness of the whole head.

Comments

Poisoning from Mag-s. has occurred from after an overdose, death apparently occurring from collapse and the proving of the salts produced many symptoms of utter prostration.

The provings bring out effects common to the other Magnesia: The diuretic action of the drug with great thirst has led to its successful use in diabetes. Tearfulness, restless uneasiness, pains in facial bones, sensitiveness to touch, better by walking.

The diarrhea is accompanied with great thirst. The chill is accompanied or followed by thirst. Shuddering in back from below upward. The toothache is worse coming into a room out of cold air, worse by contact with food, whether cold or warm. It is also better in bed.

According to Med. Press in Sept. 9, 1891, eight cases of new growth having all the outward characters of epithelioma have been cured by Graves with teaspoonful doses of a solution of three drachms to the pint.

Warts are allied to epithelioma and H. T. Webster has cured many cases in children, giving as much of the salts as would lie on a dime three times a day. One boy was literally covered with warts, his face being much disfigured. One girl of 16 was cured of large warts on her hands.

PAGE 1052

F. H. Pritchard gives his experience with Mag-s. (1/2 grains in a teaspoonful of water) in summer diarrhea with vomiting of food, copious yellowish, slimy and stinking stools and later merely watery serum.

The first sign of improvement was that the stools became bile-tinged after which they soon became of thicker consistency. The copious stools seemed to be the cardinal indication.

Magnetis poli ambo

(magnet)

Pharmacy

Mag-Ambr. Magnetis poli ambo. The Magnet. Trituration of Sugar of Milk after exposure of the influence of the both poles of the magnet. Dilution of distilled water similarly exposed. Historical dose: All potencies.

History

The effect of the Magnet as a whole and of each pole separately was tested by Hahnemann and the symptoms are mainly from his pathogenesis.

In his preface he says he does not expect "ordinary mechanical, materialistic and atomistic heads" to be able to regard diseases as "immaterial alternations of the vitality or pure dynamic derangements of our state of health and medicinal powers as merely virtual, almost spiritual, forces."

Hahnemann asks how they can reconcile with their materialistic notions the fact that "a single imponderable spark from a Leyden jar gives a shock to the strongest man and yet to ascertainable ponderable substance is communicated to his body?"

General symptoms of the magnet produced by touching either magnetic pole indiscriminately while handling the magnet or by laying the whole of the magnetic surface upon the body.

Sensations of coldness are marked. There is coldness where the magnet is applied. The eyeball feels cold, as if it were a lump of ice in the socket. On the other hand there is a sensation as if the blood was rushing towards the point touched by the magnet. **Planets:** Moon, Saturn.

Homeopathic

Mag-Ambr. has burning sensation in the limbs and joints. Burning lancinations across all parts of body in different directions. Pains as if broken in joints, when cartilages of two bones touch. Shooting and jerkings. Headaches as if a nail were driven in. Tendency of old wounds to bleed afresh.

Wrenching pain in the limbs. Shuddering, which traverses the whole body. Shaking in the body with fright or shocks, which cause violent bending and straightening of the body, sometimes with the loss of consciousness. Long-lasting swoons during which she feels her pains, but is not able to speak or move.

Clinical

Fainting. Hemorrhage. Orchitis. Paraphimosis. Prolapsed anus. Rheumatism. Toothache. Ulcers.

Modalities

The symptoms are worse by motion and on awaking. The toothache is worse from cold and on contact with anything cold. Touch worse pain in joints. Heat better uncovering.

Symptoms

MIND

Busy precipitation. Absence of mind. Irresolution. Inadvertence. Tendency to anger and rage.

Abdomen

Pressure and anxious fullness in abdomen, especially during mental exertion. Noisy, gas, grumbling and borborygmi in abdomen. Production of much flatus. Flatulent colic. Expulsion of flatulence with painful pressure.

Back

Jerking in the spine, as from something alive.

Painful sensibility of the joint of the sacrum in morning in bed, when lying on side or by day, when stooping. Wrenching pain in shoulder-joint or pain as from the starting of a tendon in wrist.

PAGE 1053

Chest

Burning insupportable lancinations in muscles of chest.

Ears

Humming in ears. Diminution of hearing.

Eyes

Itching in eyes, especially the lids. Pupils dilated. **Scintillation of white light**, beyond the range of vision in the twilight. Sparks before the eyes.

Face

Perspiration on face without heat in morning. Jerking tearing in upper jaw. Violent burning lancination in muscles of face in evening. Swelling of lips with salivation in evening. Small pimples with pain like that of a wound, on lips.

Female

Menses premature, profuse and of too long duration.

Food

Fetid breath. Metallic taste in mouth. Insipid taste of tobacco and beer. Many things have a moldy taste. Speedy satiety. Good appetite in evening.

Head

Headache from over-strained memory and reflection. Pain, as of a bruise in head, on waking in morning. Digging, stupefying headache, which is immediately dispersed by movements of flatus. Head pain, as if a nail were driven into the head, as if caused by a wound, especially after a fit of anger. Jerking tearing in head, appearing at intervals. Rushing or buzzing noises in whole head.

Limbs

Drawing pains in joints and muscles of arms often from head to fingers. Tearing jerking in muscles of arms after remaining some time in the cold. Red spots in palms like vesicles. Attacks of cramp in calves of legs and toes after waking in morning. Burning lancinations in heels and in corns on the feet.

Lungs

Paroxysms of dry cough at night. Spasmodic cough, especially after midnight, when awake or during reflection.

Nocturnal dyspnea, excited by mucus in trachea, which is easily detached in morning.

Male

Burning sensation in region of spermatic vesicles, which excites sexual desire. Dullness of sexual feeling and aversion to sex. Erection without amorous thoughts. Retraction of prepuce behind the glans. Swelling of epididymis with pain during movement and when touched.

Nose

Aberration of smell, a smoky or moldy scent is perceived.

Rectum

Constipation, as from contraction of rectum. Painless diarrhea with flatulence.

Hemorrhoids, smarting pain in anus after evacuation with constriction in rectum. Blind hemorrhoids. Prolapsed rectum.

Skin

Tendency of old wounds to bleed afresh. Ulcers painful like new wounds. Small furunculi. Small pustules with lancinating, drawing pain.

Sleep

Disturbed sleep with talking, snoring and continued tossing. Waking at 3 a.m. and falling into a drowsy lethargy towards sunrise. Lying on the back with the hand under the head, the legs wide apart and the mouth half open with snoring respiration. Amorous, lascivious dreams. Jerking of the body before going to sleep. After waking in morning, headache with pain, as of a fracture in all the joints, which forces constant change in position of limbs.

Stomach

Abortive risings. Risings with smell and taste of horn scrapings. Sour regurgitation, when stooping. Stomach-ache with cramp towards upper part, agitation, which allows no rest whatever, heaviness of tongue, paleness of face and coldness of body.

Teeth

Toothache after drinking anything cold or from contact with cold air. Pressive, jerking toothache in isolated shocks. Toothache in carious teeth with swelling of gums.

Temperature

Dry heat with need to be uncovered, at night and in morning in bed.

PAGE 1054

Vertigo

Vertigo, especially in evening after lying down, as if about to fall or as from concussion in head. Vertigo with staggering, when walking, objects seem to waver before eyes.

Comments

Clarke's experience with the magnetism is confined to Mag-aust. 2,000c., but that is sufficient to give him confidence in prescribing potencies of these remedies when their indications arise.

The leading symptoms of Mag-Ambr. are: Burning lancinations throughout the body, pains as if broken in joints, where cartilages of two bones touch, shootings and jerkings, disturbed sleep, headache as if a nail were driven in.

The Mag-Ambr. symptoms of the provings Hahnemann says they "occurred from various powerful magnets brought in contact with various sensitive individuals without distinction of the poles. They were observed in experiments conducted for half a year for the purpose of ascertaining the proper and most efficacious mode of stroking the steel with magnets in which a horse-shoe magnet, capable of lifting a weight of twelve pounds,

was held in the hands, which were held in contact with both poles for an hour at a time," with additional symptoms from Andry, Thouret, Unzer and De Harsu.

"Although each of the poles presents something peculiar in its power of altering the human health, yet each of them seems, when applied twice or oftener to produce alternating actions which resemble those of the opposite pole" (Hahnemann).

For curative purposes Hahnemann had recommended a much milder application of the magnet. (The popular use of electric rings for rheumatism is analogous to this.) The method of attenuating media saturated with emanations from the magnet does not seem to have occurred to Hahnemann.

Magnetis polus arcticus

(north pole of magnet)

Pharmacy

Mag-arct. Magnetis polus arcticus. North Pole of the Magnet. Potencies of saccharum lactis or water charged with the influence of this pole. Historical dose: All potencies.

History

The symptoms of Mag-arct. were obtained by applying it in the region of the 4th to 6th thoracic vertebra, at a distance of four or five finger's breadth from the body. **Planets:** Moon.

Homeopathic

Mag-arct. has a number of well characterized symptoms were experienced in the teeth and jaws. There was swelling, heat and redness of one cheek. Disturbed sleep, sleepwalking, cracking in cervical vertebrae, sensation of coldness toothache. Anxious, coldness of eyes as if a piece of ice lay in orbit increased flow of saliva, constipation, sopor, trembling, abdominal flatulence.

Mag-arct. has over-excitement with trembling, uneasy restlessness in limbs and great nervous weakness. Great lassitude and painful weariness of the whole body with dejection, especially in morning and in open air, as during sultry weather.

Drawing sensation in periosteum of all bones, as at commencement of intermittent fever. Sharp shocks, throbbing, trembling, coldness and sensation as if the blood were driven towards the parts touched by the magnet.

Clinical

Amenorrhoea. Clairvoyance. Hernia. Panaritium. Salivation. Sleep disturbed. Sleepwalking. Toothache. Vertebra, cracking.

Modalities

Better from uncovering. Headache is worse lifting or moving arm. Worse on waking. Toothache worse breathing through the mouth.

PAGE 1055

Symptoms

MIND

Peevishness and inclination to weep with shivering. Mildness, submission. Indolence when seated, as if power of moving were lost.

Speaking loud while quite alone and engaged in business. Irresolution, followed by prompt execution after a resolution has been once formed. Fickleness. Anxious hesitation and restlessness. Loss of sense. Loss of ideas. Weakness of memory. Tendency to make mistakes when writing.

Abdomen

Production and incarceration of much flatus. Flatulent, pressive colic. Shocks in abdomen, as if something in it were falling or blows proceeding from abdomen and passing upwards through chest, as far as the throat. Inflation of abdomen. Pressure and boring towards inguinal ring, as if preparatory to a rupture with relaxation of the inguinal ring.

Back

Cracking in the cervical vertebra during movement. Pains in back, as if broken, on bending it backwards.

Ears

Murmuring in ears and internal heat, as from boiling water. Deafness, as if caused by a band over ears.

Eyes

Eyes prominent and fixed. Icy coldness of (weak) eye, as if a lump of ice lay in orbit instead of the eye. Restless movements of eyes. Lancinations, itching and jerking drawing in eyelids with lachrymation. Painful sensation of dryness in eyelids, on awaking in morning.

Face

Paleness in face. Tension in face. Painful squeezing in maxillary joint with sensation, while moving it, as if it were dislocated. Swelling of one cheek only. Trismus.

Female

Menses too feeble, suppressed.

Food

Voracity in evening. Loss of taste. Acid taste in the mouth. Tobacco has a bitter taste.

Kidneys

Increased secretion of urine. Deep-colored urine.

Limbs

Inflammation of back of hand with pulsative pain. Heaviness in arms, hands and fingers. Pains, as of a fracture in hip-joints and lower limbs.

Great lassitude in lower limbs, which feel as if they would break, when walking. Pain, as from excoriation in toes and corns on the feet.

Lungs

Dry, asthmatic, suffocating cough, worse by walking in open air. Spasmodic, shaking cough in evening, on going to sleep, which hinders sleep. Spasmodic, suffocating cough

towards midnight, produced by irritation in bronchia, shaking the head and whole body and exciting heat until a general perspiration ensues with cessation of the cough. Constant want to cough in evening, which is removed only by restraining the cough.

Male

Immoderate erections with frequent pollutions. Excitement of sexual desire.

Mouth

At night, collection of saliva in mouth, so profuse that every time he wakes the pillow is quite wet. Itching in point of tongue, compels him to scratch it.

Nose

Aberration of smell, smell of rotten eggs or of fresh plaster or dust. Nosebleed, preceded by pressive head pain in forehead. Redness and heat in point of nose, followed by red spots, hot and plainly circumscribed, on cheeks.

Rectum

Obstinate constriction of abdomen and constipation. Hard feces of a large size, difficult to evacuate often preceded by drawing, dysenteric pains in the hypogastrium.

Skin

Tingling and lancination itching in skin. Burning sensation or burning tearing in tetter.

Panaritium.

Sleep

Violent spasmodic yawnings with wrenching pain in maxillary joint. Strong disposition to sleep by day. Coma. Profound sleep at night during which the patient generally lies on the back. Many vivid dreams (sometimes lascivious). Sings in her sleep is wakened by it, falls asleep again, recommences to sing and again wakes up from it. Waking in the evening after sleep, in consequence of a violent shock in the head and muscles of the neck.

Tossing during sleep with troublesome heat and urgent inclination to be uncovered without thirst. Imperfect waking in morning (2 a.m.) with perfect inner consciousness, vivid memory, great concurrence of ideas and reflections on some important subject. Almost as if in a zoo magnetic sleep-talking state, but when fully awake he cannot remember distinctly the subject of his thoughts.

PAGE 1056

Stomach

Frequent empty risings. Continued heartburn, especially after supper.

Teeth

Toothache in carious teeth, at intervals, as if they were being extracted. Pains in carious teeth with gums swollen and painful when touch. Pains in (carious) teeth, worse after a meal and by heat, better in open air and when walking. Toothache with red, hot, swollen cheeks. Toothache with shocks, which traverse the periosteum of the jaw or with drawing, pressive or else tearing, digging or burning sharp pains. Incisors set on edge, when breathing through the mouth. Numbness and insensibility of the gums, on the cessation of the toothache.

Temperature

Sensation of coldness or of coolness over whole body. Chilliness. Cool hands with cool perspiration upon them and over whole body. Shuddering, followed by transient heat and swelling of veins of hands. Sensation of heat over whole body with coldness of hands and lower limbs. Cold sweat on hands and soles of feet.

Vertigo

Vertigo, as from intoxication with staggering, when walking in open air and instability when standing.

Comments

Swan reports this case cure by C. M. Conant, Mrs. S. age 31, blonde, had pain in left lower jaw as if out of joint, worse morning, on moving it, sensation as if head of bone were squeezed and crowded into socket. Mag-arct. 1,000c cured.

One symptom of the proving, occurring in a half-waking state, suggests an approach to sleepwalking.

He thinks out a "difficult subject in the best form in a foreign language," but when awake he cannot remember distinctly the subject. Several provers complained of faintness. One had "sensation of dryness and lightness in the body with want of strength." Sensation as if scalp adhered to skull.

Magnetis polus australis

(south pole of magnet)

Pharmacy

Mag-aust. Magnetis polus australis. South Pole of the Magnet. Potencies of alcohol saturated with emanations of the south pole. Historical dose: All potencies.

History

South pole of magnet is useful for ingrown toe nails. Clarke has cured so many cases of ingrown toenail with Mag-aust. 2,000c., that he invariably gave it in the first place when there are no symptoms plainly indicating another remedy.

Here are the symptoms from Hahnemann which led to this use: Sore pain on the inner side of the nail of the big toe when walking, as if the nail had grown into the flesh on the side, very painful on being slightly touched and the shoe presses on the toes and on the nail of the big toe when walking, as from corns.

The accurate response to these symptoms on the part of the attenuated Mag-aust. proved to Clarke the possibility of attenuating and so fixing this "energy" for use as an ordinary homeopathic remedy. **Planets:** Saturn.

PAGE 1057

Homeopathic

Mag-aust. has severe pain in inner side of nail of the big toe. Ingrown toenails. Easy dislocation of joints of foot, feet are painful when letting them hang down. Dryness of eyelids. Aching in patella, shooting in soles.

Sore pain on the inner side of the nail of big toe, worse walking or slight touch. Drawings in fingers, joints of fingers, feet and ankles. Sharp pulsative pains in roots of nails, as if about to suppurate. Pains with pinching or burning, lacerations in different parts of the body. Contusive pains in limbs and joints, as if the patient had been lying on flints.

Liability to suffer from a chill. Tendency of nose, ears, hands and feet to be frozen by a moderate degree of coldness. Sudden lassitude when walking with anxiety and heat or sudden inclination to sleep. Lightness of whole body.

Clinical

Borborygmi. Colds. Coughs. Dislocation, easy. Frost-bite. **Heart**, palpitations. Hernia. Ingrown toe-nails. Levitation. Menorrhagia. Toothache. Varicose veins. Vertigo. Wisdom tooth.

Modalities

The symptoms are worse when walking in open air, worse when sitting, worse hanging limb down.

Symptoms

MIND

Morose and ill-humor with aversion to conversation. Dislike to society and to laughing faces. Passion and rage. Instability of ideas.

Abdomen

Pinching in abdomen caused by a current of air. Noisy borborygmi and grumbling in abdomen. Pressive, flatulent colic with pinchings and inflation of abdomen. Sensation, as if inguinal ring were dilated, preparatory to the rupture with painful sensibility of that part, when coughing.

Back

Pressive, burning pain in loins during repose and movement. Pain, as of a fracture or wrenching pain in joint of sacrum and lumbar vertebra.

Chest

Oppression of the chest, as if the respiration were tremulous and produced an impression of coolness.

Drawing pressure in both sides of sternum with anguish of conscience, which allows no rest.

Eyes

Dryness and smarting in eyelids, especially when moving them, worse morning and evening. **Lachrymation**. *Amblyopia*.

Female

Menses premature and profuse. Metrorrhagia.

Head

Great rush of blood to brain early in morning in bed. Heaviness, tingling and digging in head. Shocks in head, sometimes with tearing.

Heart

Violent palpitation of the heart with great heat in cardiac region. Palpitation of the heart during which it seems that it is not the heart that palpitates.

Kidneys

Involuntary emission of urine from paralysis of bladder sphincter, especially at night. Emission of urine, drop by drop with torpor of urethra. Very feeble stream of urine. Frequent emission of urine at night.

Lungs

Coughs and coryzas with expectoration of greenish mucus and shortness of breath. Paroxysms of fetid cough at night, when sleeping. Want to take full inspirations like sighing with involuntary deglutition.

Male

Strong disposition to emission. Emission (very unusual) in a hemiplegia patient, paralysis worse after the emission. Impotence with sudden cessation of all enjoyment in the moment of greatest excitement. Pain in penis, as if some tissues were torn or plucked away. Painful retraction of testes at night. Swelling of testes with tearing shocks and sensation of contraction.

Mouth

Metallic taste, at one time sweetish, at another acidulous, on and under the tongue. Accumulation of watery saliva in the mouth. Speech embarrassed, as by a swelling of the tongue.

Rectum

Stools, soft, loose feces, preceded by gripings. Evacuation of liquid feces with a sensation as if flatus were about to be discharged.

Contractions and painful constriction in rectum and anus, which hinder the expulsion of wind.

PAGE 1058

Sleep

Urgent inclination to sleep, evening and morning, closing of the eyes without power to sleep. Sleeplessness with over-excitement before midnight. Confused, frightful dreams. Prolonged dreams on the same subject with fatigue. Dreams of incendiary fires. Slow, noisy, snoring expiration before midnight after midnight inspiration is of the same character. Lying on the back during the night. Congestion in head in morning, which compels lying with head high.

Stomach

All kinds of food appear insipid. Extreme indifference to food, drink and tobacco-smoke. Bulimia at noon and evening, sometimes during the febrile shiverings. Aching in scrobiculus during mental exertion.

Teeth

Tearing, jerking toothache, worse by hot things.

Temperature

Excessive dread of open air, which penetrates to the very marrow of the bones, even when the weather is hot with ill-humor and inclination to weep. Shuddering with cloudiness before eyes, trembling and tossing of limbs without shivering, followed by heat in head and face.

Throat

Burning sensation in gullet.

Vertigo

Vertigo, as from intoxication with staggering gait.

Comments

Berridge reports this case: Miss X. had for three weeks aching in middle of front of left lower leg (where she has had varicose veins for eight months), when standing or when the leg is hanging down, removed by placing it horizontally, frequent feeling of hot water running down affected part, but only when leg is down, at times throbbing there when leg hangs down. Mag-aust. 100,000c, one dose.

The hot-water feeling never returned, the pain ceased in two days.

Pinching, squeezing sensations and bruised pains predominate.

Faintness comes on when walking and is worse when sitting. There is great rush of blood to the brain early in the morning in bed.

Magnolia glauca

(sweet magnolia)

Pharmacy

Magn-gl. Magnolia glauca. Sweet Magnolia. Sweet Bay. N. O. Magnoliaceae. Tincture of the flowers. Historical dose: Tincture and all potencies.

Herbal

The Treasury of Botany says: M. glauca is a low-growing, deciduous tree, called in America Swamp Sassafras from the nature of the locality in which it grows and from the resemblance in its properties to Laurus sassafras. It is also called Beaver-tree, because the root is eaten by beavers, which animals also make use of the wood in constructing their nests.

Our knowledge of Mag-gl. is based on two observations by S. A. Jones and T. F. Allen of the effects of the flowers on three persons. **Planets:** Mercury.

Homeopathic

The symptoms of Magnolia glauca were these: Sense of great oppression about his chest, strong tendency to fainting.

A woman had oppression of chest, could not expand the lungs with a feeling as if she had swallowed food without chewing and it distressed her stomach.

In a doctor it increased the pain of inflammatory gout and evidently increased the paroxysm of a pain which came on every afternoon.

Clinical

Asthma. Fainting.

SOURCES

Clarke.

PAGE 1059

Magnolia grandiflora

Pharmacy

Magn-gr. Magn. grandiflora. Magnolia yolotxochitl. N. O. Magnoliacee. Mexico.

Tincture of the flowers. Historical dose: Tincture and all potencies, third potency.

History

In his Handbook Allen gives a full pathogenesis of Magn-gr. Rheumatism and heart lesions are prominent features in the symptomatology of this drug. **Planets:** Saturn, Sun.

Homeopathic

The rheumatic action of Magn-gr. is particularly manifested in the chest and heart. Stiffness and soreness. Alternating pains between spleen and heart. Patient tired and stiff. Tiredness impeding motion. Soreness when quiet. Erratic shifting of pains.

Magnolia grandiflora produces bruised and constrictive and rheumatic pains in various parts and particularly the joints. Pains rapidly change their place or alternate. Alternating pains between spleen and heart.

A marked action was developed in the female sexual sphere and an inter-menstrual flow was observed.

Clinical

Aneurysm. Angina pectoris. **Heart** disorders. Inter-menstrual flow. Rheumatism.

Vertigo.

Modalities

Better dry weather, motion intermenstrual flow, (Ham., Bov., Bell., Elaps). Worse damp air, lying on left side in morning on first rising.

Symptoms

MIND

Nervous, easily frightened, illusions and hallucinations of sight with sharp pains in eyes. Apprehensive, thinks she will die. Repugnance to all occupation. Ill-humor with burning in hands. Sadness. Uneasiness. Confusion and dullness. Memory weak, lost.

Abdomen

Pain with griping in intestines, extending to hypochondria, as from a blow, rapid, pulsating and in left side of abdomen, burning, extending to chest. Flatulence. Contusive pain in liver and spleen, extending to the stomach. Lancinations in liver and spleen.

Back

Weight in neck with tiredness of spine. Stiffness of neck and contusive pain, stiffness and tiredness and in back. Stitches in right side of back.

Chest

Oppression of chest with inability to expand the lungs. Stitches in sides of chest in right side. Constriction as from a band just beneath axilla. Tired feeling. Stiffness of sides of chest, as from exposure to a draft when over-heated.

Ears

Lancinations in left ear traveling to shoulder. Pain: in right ear in morning, sharp in left, sharp, traveling to throat.

Eyes

Pain in eyes: from sunlight, sharp with nervousness and with visions. Lids heavy, sensation in lids as after weeping. Vision weak, *blurred*.

Face

Lancinations in jaw-joints. Pain in right side in joints, worse pressure, also impeding opening of mouth. Sharp pain going to ear.

Female

Congestion of left ovary with pain extending to left thigh. Thick white or yellow leucorrhoea with straining when urinating, also with constipation. Bloody flow in interval between menses. Menses delayed, pale and scanty of coagulated blood for two days, then normal, painful. Before menses: pain in small of back, hypogastrium and thighs with headache, flushes of heat to face, nausea and chill.

Food

Appetite lost after vertigo. Appetite lost with lassitude.

Head

Headache: with griping in abdomen with flushes of heat, congestive, throbbing. Pain in temples: on bending forward in left temple. Migraines. Pain in occiput and upper dorsal region. Pain in occiput as from a blow. Weight in occiput.

Heart

Crampy pain in heart. Angina pectoris. Endocarditis and pericarditis. Tendency to faint. Sensation as if heart had stopped beating. Pain around heart accompanied by itching of the feet. Stitches, which waking him frequently. Soreness after disappearance of pain. Sensation as if heart had stopped beating. Pulse weak and frequent.

PAGE 1060

Limbs

Stiffness and sharp erratic pains, worse in joints. Feet itch. Numbness in left arm. Rheumatic pain in clavicles. Shooting in all limbs. Sharp, erratic or rheumatic pains. Sprained pains in joints. Limbs tired, stiff. Arms weak. Rheumatic pains in wrists. Stiffness of lower limbs.

Lungs

Dyspnea. Hoarseness. Dry cough during the day, better night by going to bed. Suffocation: when walking fast, when lying on left side after a meal with desire for stretching with uneasiness in paroxysms. Suffocated feeling when walking fast or lying on left side.

Kidneys

Straining on passing water.

Mouth

Pain in mouth better by tepid water.

Rectum

Constipation.

Skin

Itching of feet, sometimes with uneasiness of legs.

Sleep

Yawning during the day with sleepiness. Sleepless early in morning. Extravagant dreams.

Stomach

Feeling of a large bolus of food which distressed the stomach. Sensation as from hunger with acidity. Nausea in morning on rising, better by breakfast. Nausea as from tobacco.

Emptiness with general lassitude, vertigo and nausea.

Teeth

Shooting in teeth. Soreness of teeth, impeding mastication.

Temperature

Chill in afternoon, then fever lasting into night. Erratic chill. Heat with burning in throat and headache, flushing with sweat of hands, hands and feet, upper limbs.

Throat

Fauces red. Pain in throat on turning head, waking him frequently at night. Constriction: worse right side, worse bending forward. Burning and dryness with pain in pit of stomach and often extending to abdomen, preventing sleep. Difficult swallowing saliva. Sensation of mucus with fruitless attempts to remove it.

Vertigo

Vertigo in evening, better going to bed with an emptiness at stomach with flushing of face. Vertigo with dislike for physical labor.

Vertigo beginning with blurring of sight. Vertigo as from seasickness, causing loss of appetite.

Comments

Allen gives as indications for Magn-gr.: Rheumatic pain in clavicles. Crampy pain in heart, alternating with lancinations. Pain in heart with suffocative constriction of throat. Aortic aneurysm, crampy pain in heart, dry cough, nausea with vertigo and angina pectoris. Rheumatic pains in back, especially when alternating with similar pains in different parts. Muscular rheumatism of left arm.

SOURCES

Boericke. Clarke.

Malandrinum

(grease of horses)

Pharmacy

Maland. Malandrinum. Grease of horses. Nosode of the disease in horses called "Grease." Trituration of Sugar of Milk saturated with the virus. Solution of the virus.

Historical dose: All potencies, thirtieth potency and higher.

History

According to Jenner, the origin of cow-pox is infection of the udders of cows by contact with grass on which a horse infected with "Grease" has trodden. This assertion is to some extent confirmed by the experience of homeopaths, who have found in Maland. a very effectual protection against infection with small-pox and against vaccination. Straube made provings of the 30c potency.

Maland. has been used on inferential grounds with great success in ill effects of vaccination Clarke has cured with it cases of unhealthy, dry, rough skin remaining for years after vaccination in small-pox, measles and impetigo.

Burnett has cured with it a case of knock-knee in a child who was constantly handling his penis. **Planets:** Saturn.

PAGE 1061

Homeopathic

Malandrinum is a very effectual protection against small pox and for ill effects of vaccination. Clears the remnants of cancerous deposits. Efficacious in clearing of the remnants of cancerous deposits. Toes feel scalded and itch terribly. Bone-like protruberances.

Clinical

Acne. Boils. Fistula. Impetigo. Knock-knee. Measles. Skin, unhealthy. Small-pox. Vaccination, effects.

Causations

Ill effects of vaccinations, (Thuj., Sil.).

Symptoms

MIND

Dullness. Dizziness.

Abdomen

Pains around umbilicus.

Back

Pain along back, as if beaten.

Ears

Profuse, purulent, greenish-yellow discharge, mixed with blood.

Eyes

Red stripes under eyes.

Face

Scab on upper lip with stinging pain when torn off.

Female

Vagina closed with crusts, yellowish-greenish-brown in color.

Head

Aching in forehead. Frontal and occipital headache. Impetigo covering head from crown to neck and extending behind ears. Thick, greenish crusts with pale, reddish scabs, itching worse in evening.

Limbs

Sore pains in limbs and joints. Run-around on nails of hands and feet. Impetiginous crusts on extensor sides of forearms. Pains, especially in left tibia with petechia-like

patches on anterior aspect of left leg from knee to ankle. Petechia on both thighs, worse left. Knock-kneed.

Male

Child constantly handles his penis.

Mouth

The tongue is coated yellow with red streak down middle (typhoid), cracked and ulcerating down middle, swollen.

Skin

Small-pox. Measles, also as preventive. Impetigo covering back of head, extending over back to buttock and even into vagina, covering labia. Impetigo on extensors of forearms. Dry, scaly, itching, cracks of hands and feet in cold weather and from washing. Boils.

Malignant pustule.

Bad effects of vaccination (dry, harsh skin). Small, dusky red spots on legs, not disappearing on pressure. Typhoid fever. Petechial typhus.

Stomach

Vomiting of bilious matter, nausea.

Stool

Dark, cadaverous-smelling stool. Yellowish, foul-smelling diarrhea.

Comments

Burnett's indications are: "Lower half of body, greasy skin and greasy eruption. Slow suppuration, never ending, as one heals another appears." Impetigo, ecthyma, fat, greasy-looking pustular eruptions are particularly acted on by this remedy.

Heath has cured with Maland. 30c fistula in a pony's neck, following strangles.

A. L. Marcey relates a striking experience with Maland. 30c. In the presence of a small-pox epidemic he vaccinated himself, taking at the same time Maland. 30c night and morning. The vaccination did not take. It was twice repeated and still did not take, nor was small-pox contracted.

Called to vaccinate four children in a family whose parents were recovering from small-pox, he vaccinated all and gave Maland. 30c to three of them at the same time, the remaining child was the only one whose vaccination "took." This was so severe that Maland. had to be given to modify its intensity, which it did effectively.

The other three were re-vaccinated but none "took." Of five children from six to seventeen years of age, only the eldest had been vaccinated and he had a good scar. All except the eldest were given Maland. and were vaccinated and none of the four "took." The eldest took small-pox. Maland. was then given and in a few days he was convalescent.

In another case of small-pox Maland. was given and the disease only lasted a few days, the eruption drying up. In Straube's proving the symptoms were worse in evening. Burnett considers Maland. a very deeply acting remedy and one not to be repeated oftener than once a fortnight.

Malaria nosode

Pharmacy

Malar. Malaria officinalis. Decomposed vegetable matter. Historical dose: All potencies, sixth potency and higher.

History

Malaria Officinalis has evident power to cause the disappearance of the plasmodium of malaria. Malarial cachexia. **Planets:** Saturn.

Homeopathic

Malar. has a general sense of weariness. Spleen disorders. Functional hepatic diseases. Sense of weariness from a very short walk. A kind of simmering all through the body. Typhoid, semi-paralytic condition. Malaria and rheumatism. Rheumatic paralysis and emaciation.

Fearful headache, nausea, aversion to food, distress through hypochondriac region, first in the spleen, then liver and stomach and chills. Bilious colic, nausea, cramps, diarrhea and headache. Dull headaches, dizzy and drowsy at all times, worse mornings.

Eyes weak, blurring, reading difficult.

Laryngeal irritation with cough and secretion of bloody mucus. Slow pulse. Right arm gets numb and has to be rubbed. Cold limbs, poor appetite but food does not distress her. Urine red, scanty. Bowels sluggish but stools natural. Menses regular, rather scanty.

Clinical

Ague. Bilious fever. Camp fever. Constipation. Diarrhea. Fever. Gout. Hay fever. Liver, disorders. Malaria. Malaria cachexia. Neuralgia. Rheumatism. Spleen, disorders. Tuberculosis.

Symptoms

MIND

Feels stupid and sleepy. Very forgetful. Dizzy and drowsy, (Gels.)

Comments

Yingling's cases cured with the potencies of Malar. are reported: (1) A Kansas volunteer, 28 after a week in camp in rainy, chilly weather had chill and fever, continuous nausea, vomiting bile, retching. Tongue white, thick coat. Mouth feels dry but is moist. Thirst for large quantities. Symptoms were moderated by Ip. and later Bry., but not removed. Skin, eyes and face very yellow. Malar. 1m. Improvement set in and in a week was in better health than usual.

(2) Mrs. S. A. H., 63, shooting pains all over muscles, bones ache. Diarrhea in morning, stools thin, yellow, foul. Bitter taste, parched mouth tongue white. Stretching and gaping. Malar. 1000c. cured quickly.

Compare

Mancinella

(manganeel apple)

Pharmacy

Manc. Manganeel apple. Mancinella. Hippomane mancinella. Manzanillo. N. O. Euphorbiaceae. Tincture of fruit, leaves and bark. Historical dose: Tincture and all potencies, sixth to thirtieth potency.

History

Mancinella is a species of the Euphorbiaceae and has all the virulent properties of the family in a high degree. It is one of the trees around which the upas legends have clustered.

PAGE 1063

It is certain that the juice, which resembles pure white milk, does possess a considerable amount of acidity and that some persons suffer great pain from incautiously handling it.

Perhaps its most dangerous property is that of causing blindness, if by chance the least drop of the milk or smoke of the burning wood, comes in contact with the eyes.

Dr. Seeman states that at Veraguas some of the ship's carpenters were blinded for several days by the juice getting into their eyes while cutting down Manchineel trees, while he himself suffered from temporary loss of sight from merely gathering specimens and that the same accident happened to a boat's crew from making a fire. Salt water is said to be an efficacious remedy (Treasury of Botany). **Planets:** Moon, Mercury.

Homeopathic

Mancinella has the skin symptoms most marked. Dermatitis with excessive blistering, oozing of sticky serum and formation of crusts. Loss of vision. Pain in the thumb. To be remembered in mental depressed states at puberty and at menopause with an exalted sexuality. (Hering.)

This remedy produces marked skin, throat and mental symptoms especially depressed states at puberty and menopause with exalted sexuality. Acridity. Burning, smarting in various parts. Favors rapid healing of wounds.

Clinical

Asthma. Blind. Borborygmus. Cholera infantum. Colic. Diphtheria. Esophagus, stricture. **Eyes**, disorders. Hair loss. Headache. Nervous disorders. Photophobia. Scarletina. Skin disorders. Sore throat. Stomatitis. Tongue, patched. Typhoid fever.

Modalities

Worse from cold, cold drinks, cold feet. Worse from dampness touch, puberty, menopause. Worse from anger and after eating.

Symptoms

MIND

Bashful. Melancholy. Homesick. Silent mood, sadness. Wandering thoughts. Sudden vanishing of thoughts, forgets what she wishes to do next, her errand. Fear of becoming insane. Fear of evil spirits.

Depressed with sexual weakness. Fear of going crazy. Averse to work and answering questions. Sadness. Anxiety, before menses. Bashful and taciturn, timid look.

Abdomen

Bowels sore and burn. Colic worse cold drinks.

Eyes

Lids, heavy and sore. **Eyes** smart or burn on closing them. Dull ache behind the eyes. Intense inflammation with loss of vision (for some days). Photophobia.

Face

Swollen, spotted. Herpes on lips.

Food

Craves cold water. Aversion to meat, bread, wine.

Head

Scalp itches. Hair falls out after acute sickness. Pain in vertex worse lying.

Heart

Pulse weak, very large and soft. Needle like stitches at heart.

Limbs

Icy coldness of hands and feet. Pain in thumb. Biting vesicles on soles, desquamation and dryness of soles. Pain in thumb. Acrid, sticky foot sweat.

Lungs

Cough worse cold drinks. Aching behind the sternum.

Mouth

Feels peppery. Burning and pricking in the mouth not better by cold water. Burning of fauces. Dysphagia from constriction of throat and esophagus. Copious offensive saliva. Taste of blood. Profuse foul yellow saliva.

Nose

Illusions of smell of gunpowder, dung, etc. Pressure at root of nose.

Sensations

Head feels as if bruised or as if it had been exposed to the sun. Ears as if closed. Electric thrusts in upper part of throat. As if flames rising from stomach. As if stomach drew together in a lump and then suddenly opened. Head as if hollow, as if lying on something hard. As if something alive in stomach.

Skin

Intense erythema. Vesicles. Large blisters, as from scalds. Fungoid growths. Erysipelas. Heavy, brown crusts and scabs. Pemphigus. Dermatitis with extensive blisters, oozing of sticky serum and formation of crusts.

PAGE 1064

Stomach

Swollen epigastrium. Vomiting of food, followed by severe colic and profuse diarrhea. As of flame, rising from. Repeated green vomit. Continual choking sensation rising from stomach. Vomiting of ingesta, followed by griping and copious stools. Burning pains and black vomit.

Throat

Cutting pains worse cold drinks. Choking sensation rises in the throat when speaking, preventing drinking though thirsty. Diphtheria. Tonsils swollen.

Vertigo

Feels empty with vertigo, while walking about. Vertigo, head feels light, empty.

Comments

Manc. was introduced into homeopathy by Bute, who proved it. It was also proved by Mure and Ackermann. The symptoms induced were very intense. Burning was experienced in all parts, vesication and ulceration of the skin and mucous membranes. Head, eyes, throat, abdomen and rectum were the parts most affected.

A leading feature of many symptoms was worse by drinking cold water. Cough worse from drinking water. There is general better from heat when lying down, but warmth of stove worse headache and there is inclination to uncover. Cough is worse at night.

Med. Cent. quotes the case of a lady who for several years was possessed with the fixed idea that she would become insane. She had become a wife and mother, but still the ideas possessed her. Happening to see in Puhmann's Therapeutics that Manc. has "fear of going crazy," she took Manc. 12c and was permanently cured.

Mandragora officinarum

(mandrake)

Pharmacy

Mand. Atropa Mandragora. Mandragora officinarum. Mandrake. N. O. Solanaceae.

Tincture of plant without the root. Historical dose: Tincture and all potencies, tincture to 30c.

Herbal

The mandrake does not derive its name from the shape of the human body which the root of the plant sometimes takes, but from the name by which it was known to the Greeks, Mandragora and which signifies injurious to cattle. It was used by the ancient Egyptian physicians for many conditions.

In legend and poetry the mandrake figures largely. It is said to be the "Insane root" spoken of by Macbeth and it is mentioned by name in Anthony and Cleopatra, also in Romeo and Juliet. Mand. must not be confounded with Podophyllum, which is also sometimes called "Mandrake," as also is Bryonia dioica in this country.

Mand. is known to homeopathy through some experiments of Dufresne made on himself and another by repeatedly smelling, at short intervals, the expressed juice of the plant, "which has a nauseating odor like adder's flesh," and also by an experiment of W. B. Richardson's.

There are two varieties of Mand. offic., the vernal and the autumnal. The plant Dufresne used was the Vernalis. The symptoms were very similar to those of Belladonna to which it is botanically closely related. Mandragora is like a cooled or attenuated Belladonna.

Homeopathic

Mand. has a restless excitability and bodily weariness. Great desire for sleep. The unpleasant symptoms go off at night in bed and are succeeded by a gentle perspiration. Bodily weakness. Lingering uneasiness and coldness after removal of other symptoms. Inactive bowels with white, hard stools, was one symptom.

PAGE 1065

There is exaggeration of sounds and enlarged vision. Depressive condition, nervous, hypersensitive to noise and odors, ameliorated by urination.

Striking tiredness, exhaustion, collapse. Congestive headache. Gout. Uric diathesis. Ocular complaints with mydriasis and dimming of the field of vision. Liver, gallbladder and stomach complaints. Joint and muscular pains. Herpetic eruption on the face.

Clinical

Chorea. Colitis. Congestive headache. Constipation. Coryza. Digestive weakness. Epilepsy. Gallbladder infections. Gallstones. Gastritis. Gout. Hiccoughs. Hypertension. Liver migraines. Neuralgia. Pancreatitis. Polyneuritis. Travel sickness, (sea, air, car). Writer's cramp.

Constitutions

Allergic and psoric constitutions. Arthritic tendencies. Uric diathesis. **Planets:** Moon.

Modalities

Better from discharges, urine, menses. Amelioration of anger after urination. Better from heat. Better from resting in bed. Better from stretching backwards. Better from continuous movement. Worse from the first movement. Worse between 3 a.m. and 5 a.m. Worse from changes in the weather from contact. Worse from dangling the legs. Worse from storms, greasy food. Worse from the cold, except for head congestion which is better by the cold.

Symptoms

MIND

Euphoria alternates quickly with depression and vice versa. Depressive psychosis. Restless excitability, hysterical. Very nervous and irritable, hypersensitive to noise, ameliorated by urination.

Alternates from good moods, generous, would embrace the whole world, then depressed, sad and discontented. Happy state alternating with depression. Poor powers of concentration.

Abdomen

Repletion and heaviness in the upper abdomen with dyspnea and palpitations, ameliorated by moving and getting up and by belching and expelling gas. Gastric, duodenal, pyloric ulcers. Diaphragmatic hernia.

Back

Severe pain in the right shoulder, worse with movement. Pain in the scapula and right hand.

Pain in the shoulder and left wrist, worse with movement.

Blood

Arteriosclerosis. High level of urea in the blood. Hypoglycemia.

Chest

Angina pectoris. Constriction of the heart, as if the chest were clamped in a vice, ameliorated by heat in bed and by rest. Anginal pain, lasting for an hour with cold sweat on the forehead.

Ears

Exaggeration of sounds. Persistent buzzing. Early otosclerosis.

Eyes

Pupils dilated. Red inflamed, tired, heavy. Eyelids painful, swollen, worse on the left side. Painful, irritated with photophobia. Stinging, smarting pains in the eyelids, which are red, swollen and itching. Eye movements painful, worse when reading. Eye neuralgia with spots before the eyes, dazzled and troubled vision. A peculiarly enlarged and confused vision. Hypersensitive to light. Styles. Conjunctivitis. Blepharitis. Keratitis. Iritis. Retinal infections.

Face

Sudden pallor of the face and feeling that the fingers are dead. Herpetic blisters on the face. Boils on the face. Face dirty, seborrhea of the face and nape of the neck, clothes become dirty.

Female

Menses either a few days too early or late. Blood thick, sticky, dark. Brown leucorrhea with lumbar ache and pains in the low abdomen, ameliorated in bed and by resting. Sterility. Post-menopausal osteoporosis.

Food

Feeling of hunger quickly disappears after eating a little. Desire for spicy, piquant dishes. Desire for meat, cheese and sweets. Aversion to and intolerance of alcoholic drinks. Desire for sweets, which are not tolerated. Aggravated by coffee and fats.

Head

Head feels numb. Heaviness and confusion of head. Sense of fullness in vessels of brain. Headache resulting from an empty stomach, ameliorated by eating. Morning headache following bad digestion, accompanied by bad mood. Pulsating headache, as if in a fog and the skull seems enlarged.

PAGE 1066

Heart

Heaviness on the heart with paresis in the left shoulder and arm. Cardiac pains aggravated in the morning, before a storm, by exertion or movement, ameliorated in bed, by resting and in the fresh air. Arterial hypertension.

Kidneys

Nightly bedwetting. Kidney stones. Extreme atony of the bladder despite urgent pressing feeling. Urination difficult, must force the last drops. Thick urinary stream. Urine copious, pale, milky from phosphate deposits, brown in color like beer. Urine with a strong odor, accompanied by conjunctiva jaundice. Amelioration of anger after urination.

Limbs

Needle-like pain in the upper part of the right arm, spreading to the hand with feeling of numbness. Cramps in the hands, causing great difficulty in writing. Numbness and coldness in the arms. Heaviness and numbness in the left arm. Muscular pains in the hips, thighs, legs. Legs heavy, cold, walking is painful. Cramping pains in all the joints with feeling of heaviness and numbing. Sciatic pain, worse in the morning on rising and letting the leg hang loose, better with heat.

Lungs

Slight cough with expectoration. Difficult breathing.

Male

Diminution of libido, aggravated after the proving. Sexual impotence. Prostatic adenoma.

Mouth

Lips, mouth, palate, dry and painful. Tongue dry, irritated, as if raw, as if scalded by hot water. Tongue benumbed. Singular taste and sensation of acidity and dryness. Ulceration of the gums and lips. Tongue covered with a white coating. Aphthae on the tongue and inside of the cheeks. Bad breath, which he notices himself. Inflammation of the roots of the teeth, painful to the touch. Hemorrhaging of the gums.

Nose

Coryza. Irritation of the nasal mucous membranes with discharge and sneezing. Nasal crusts in the morning. Spasmodic rhinitis.

Rectum

Hemorrhaging recto-colitis. Spasmodic constipation. Bleeding hemorrhoids.

Skin

Burning pain on the skin, resulting from the exanthemata and the boils. Skin itching. Sticky sweating on the palms and the forehead and at the hairline. Nocturnal sweating with strong odor. Exhausting, cold sweating from the trunk, around midnight, followed by feeling of improvement. Erysipelas. Shingles. Lupus erythematosus. Allergic dermatitis.

Sleep

Desire for sleep. Despite good sleep, feels tired, as if he had taken a sleeping pill. Sleep disturbed by unpleasant or horrible dreams, by muscular pains. Insomnia between 3 a.m. and 5 a.m.

Stomach

Travel sickness (sea, air, car). Vomiting of pregnancy. Cramping pains in the stomach, ameliorated by eating, drinking and lying down. Hiccough with salivation, eructation and nausea. Stomach painful like a wound, sensitive to pressure and movement, stinging pain, better by bending double and by resting.

Stool

Inaction of bowels with white hard feces when bowels are induced to act.

Temperature

Shivering in afternoon. Coldness remains after other symptoms. Febrile flush and pain in the bladder. Often, a sensation of fever with heat hot, shivering in the back and persistent, sub-febrile condition.

Throat

Hoarseness. Husky voice. Swallowing painful. Throat insensitive, as if anesthetized. Cryptic tonsillitis, purulent with sore throat. Intense dryness of the larynx with irritating cough. Glairy secretion from the larynx and throat. Chronic laryngitis.

Vertigo

Frontal congestive headache with vertigo, dizziness of the head and extreme tiredness.

Comments

The effects of the provings were removed by free indulgence in wine, coffee, and cigars. With regular dieting they lasted much longer and were removed by Nux-v., Camph. and Bell.

PAGE 1067

Compare

(1) Bell. - Hypersensitivity and hyper excitability of all the senses, pupils dilated and fixed, photophobia. Dryness of the pharynx, pulse full and bounding, menses too early, blood hot, abdomen distended.

(2) Dios. - Violent abdominal colic, ameliorated by leaning backwards, genital excitability, pains in the back and the right sciatic region, dryness of the mouth and flatulence.

(3) Sulph. - Irritation of skin and mucous membranes, hepatic and portal intoxication, plethora in arthritis, sclerosis, fat or thin types.

SOURCES

Clarke. Julian.

Manganum aceticum

(manganese acetate)

Pharmacy

Mang. Manganum aceticum. Acetate of Manganese. Manganous Acetate. Solution. Manganum carbonicum. Carbonate of Manganese. Triturations of the carbonate or solutions of the acetate, according to Hahnemann. Historical dose: All potencies, third to thirtieth potency.

History

The metal Manganese was isolated in 1774 in the year Priestly discovered Oxygen. It was introduced into the Materia Medica by Hahnemann, who made provings of the acetate and carbonate. The symptoms of the two have not been kept separate.

Manganese is a metal having a remarkable affinity for and in some respects a close resemblance to, iron of which it is an extremely frequent associate. Its medicinal as well as its physical relationship with iron is very close. Mang. is closely associated with iron and like iron Mang. causes anemia with destruction of red blood corpuscles.

Symptoms of chronic Manganese poisoning, according to Professor von Jaksch, were involuntary laughter, weeping and walking backwards. Exaggerated reflexes and physical disturbances, evidenced by men making fun of each other's gait.

Paraplegia progressive, wasting, feeble and staggering gait. **Planets:** Mercury, Saturn.

Homeopathic

Manganese has an action on the blood-forming process like iron and has been successfully used in cases of anemia. Moreover it has special affinity for inner ear, larynx, trachea, periosteum of shinbone. joints. Ankles and lower limbs. Jaundice, nephritis with albuminuria. Fatty degeneration of liver. Parkinson's disease. Cellulitis, sub-acute stage, promotes suppuration and hastens regeneration.

Inflammation of bones or joints with nightly digging pains. Asthmatic persons who cannot lie on a feather pillow. Syphilitic and chlorotic patients with general anemia and paralytic symptoms often are benefited by this drug. Gout. Chronic arthritis. For speakers and singers. Great accumulation of mucus. Growing pains and weak ankles. General soreness and aching, every part of the body feels sore when touched, early tuberculosis.

Parkinson's disease, paraplegia, come under its influence. Motor paralysis, ascending paralysis. Bones are very sensitive, Painful, deep soreness of the whole body, every part of the body feels sore when touched, ears, joints, skin. Pain extends to ear from other parts. Everything affects the ear. Diagonal pains. Yellow-green lumpy or bloody discharges.

Mang. has a chronic arthritis with infiltrated glistening joints. Weak joints. Festinating, walks backwards. Growing pains and weak ankles. Progressive muscular atrophy. Cellulitis, sub-acute stage. Suppuration of skin around joints. Fatty degeneration.

Wants to lie down in bed which improves all the troubles. Typhoid fever after, cases that are badly treated with prolonged convalescence. Necrosis and decay of bones. Malignant ulcers with blue border, following slight injury. Valuable for boys and girls whose voices are changing.

PAGE 1068

Clinical

Anemia. Ankles, weak. Asthenopia. Asthma. Bones, pain. Brain, concussion. Menopausal flushings. Cough. Deafness. Dysmenorrhea. Ear infection. Gallstones. Gout. Headache. Heel, pain. Hoarseness. Jaundice. Laryngitis. Lichen. Myopia. Palate disorders. Paraplegia. Parkinson's disease. Parotiditis. Periostitis. Pityriasis. Psoriasis. Cracks. Rheumatism. Scabies. Tongue disorders. Tuberculosis. Yawning.

Modalities

Better from open air, sad music. Better from eating, swallowing. Better lying down, (cough). Better or worse by change of weather. Worse cold wet weather, cold damp. Worse touch, at night, speaking. Worse laughing, motion, bending backwards. Lying on the feather bed aggravates, (asthma). Touching with cold things aggravates.

Symptoms

MIND

Constant moaning or groaning. Weak and nervous. Anxiety and fear. Involuntary laughing and weeping. Anxiety and fear when moving in the room, better lying down. Anxiety as if something bad is going to happen. Sad, weeping, silent. All the mental conditions are better when lying down. Does not enjoy joyous music, but immediately affected by the saddest.

Abdomen

Flatulence. As if intestines were loose and shaking when walking about. Pain and constriction at the navel. Cutting in umbilical region worse on taking deep breath.

Ears

Everything affects the ears. Pain extends to ear from other parts. Whistling tinnitus. Deafness in damp weather. Blowing the nose helps deafness. Swelling of the parotid glands in fevers. Stitching in the ears from talking, laughing, swallowing. Feel stopped, cracking on blowing nose.

Eyes

Field of vision contracted. Aching in the eyes from sewing, reading fine print.

Face

Pale, sickly. Stolidly mask-like. Twitching, jerking pain from lower jaw to temples worse laughing.

Female

First menses delayed. Menses, early, scanty, pale in anemic patients. Flushes of heat at menopause. Discharge of blood between periods.

Head

Feels large and heavy with rush of blood. Pains from above downwards, worse straining at stools, jarring, stepping.

Kidneys

Darting in urethra on passing flatus.

Limbs

Muscular twitching. Cramps in calves. Stiffness in muscles of legs. Rheumatism of feet. Parkinson's disease. Peculiar slapping gait, walks on metacarpo-phalangeal joint, walks backwards. Tending to fall forward, walks stooping forward. Inflammation of bones and joints with nightly digging pains. Every part of body feels sore when touched. Cannot walk backwards without falling. Children are unable to walk because of ankles are weak. Ankles painful. Legs feel numb. Wilson's disease. Bones very sensitive. Shiny red swelling of joints. Knee pain and itching. Intolerable pain in skin of lower limbs. Periosteal inflammation. Burning spots about joints. Suppuration of skin around joints.

Liver

Chronic enlargement of liver. Jaundice.

Lungs

Cough, worse evening and better lying down and worse in damp weather. Asthmatic persons who cannot lie on a feather pillow. Mucus difficult to loosen. Stitches in larynx extending to ear. Heat in chest. Hemoptysis. Every cold becomes bronchitis, (Dulc.)

Mouth

Nodes on palate and on tongue. Toothache worse anything cold or sucking, pain going up in the ears. Flow of saliva, while speaking with colic, paralysis etc. Taste oily. Tongue sore and irritable with ulcers or warts.

Nose

Dry, obstructed. Chronic catarrh with bleeding, worse in cold damp weather. Blowing is painful. Crampy pain at the root of the nose. Obstruction of nose and fluent coryza alternately.

PAGE 1069

Rectum

Passes much flatus with stools. Bowels are irregular, he has constipation or diarrhea. Cramps in the anus while sitting, better lying down.

Sensations

Head as if larger. As if pit of stomach enlarged. Ears as if stopped. Throat as if excoriated. Trachea as if closed with a film. As if bowels drawn together. As if tendons shortened.

Skin

Suppuration of skin around joints. Rough, cracked (flexures), bluish. Red, elevated spots. Chronic eczema with amenorrhea, worse during menses or menopause. Itching, better scratching. Itching of diabetes. Deep cracks in bends of elbows, knees. Psoriasis and pityriasis. Burning around ulcers. Dry hard ulcers.

Sleep

Languor and sleepiness. Much yawning. Sleepy very early in evening. Many vivid dreams which are well remembered.

Temperature

Sudden flushes of heat in face in chest and over the back.

Throat

Chronic hoarseness. Larynx dry, rough, constricted. Tuberculosis of the larynx. Hemming and hawking all the time and annoying everybody. Low, monotonous voice.

Comments

In an articles on Mang. by F. H. Pritchard, who cites the action of the metal is thus summarized: (1) On mucous membranes: congestion and increased as well as decreased secretions. (2) On the liver: a powerful cholagogue inducing inflammation and fatty degeneration. (3) Blood: destroys red corpuscles and causes anemia. (4) Bones and periosteum: sensitiveness of bones with periostitis. (5) Skin: fissures, excoriation, suppuration. (6) Cerebrospinal system: paralysis and progressive muscular atrophy.

Pritchard quotes observations of Grille that workmen in manganese mines do not get itch and those who come to the work with itch get cured of it. "Suppuration of skin round joints" is a characteristic of Lippe's. The manganese waters of Cransac cause: "Ill-humor, weeping, despondency, sudden palpitation."

The headaches of Mang. are boring, pressing and proceed from above to downwards. There is also a headache like concussion on every step or movement.

There is one curious symptom they have in common: Cough better by lying down. If there is any difference, the Mang. cough is more apt to be deep and it is also worse in damp weather.

Guernsey summarizes the Mang. effects thus: "The bones are very sensitive, red spots on the skin, which are elevated, owing to bone disorders. Ankles are particularly affected, children may have this trouble and be unable to walk. Typhus fever when the parotid gland is swollen and the bones are very sensitive to touch, disorders of the internal ear, upper part of chest. Hoarse voice, drawing sensation of the muscles."

Clarke has frequently verified the "cough better from lying down," and also this sensitiveness of the bones. Where this occur in connection with any other condition indicating Mang. it is sure to do good.

There are single nodes on the palate. Clarke cured in an elderly lady a flat growth on center of palate with Mang. 30c. Bluish nodes on the skin, malignant ulcers with blue borders following slight injury.

The skin will not heal, slight scratches ulcerate. Inflammation of bones and joints with insupportable nightly digging pains. Anemia (menses too frequent and too scanty in anemic girls), laryngeal tuberculosis, tuberculosis. Chlorosis, if gastric symptoms and loss of appetite predominate.

Every part of the body feels extremely sore when touched. This last is quite a keynote of Mang. Rheumatic patients cannot bear any weight on their heels. Rheumatic symptoms with dark, almost blue spots on skin.

Mang. has some remarkable paralytic symptoms. Paralysis with inclination to run forward if he tried to walk. Paralysis which begins below, extending upward. Paraplegia. Paralysis from degeneration of anterior portion of cord.

PAGE 1070

The tongue symptoms of Mang. are very pronounced.

Hansen cured with Mang-ac. 6c a case of neuralgia of the tongue following the healing of a little ulcer on surface near left border after an application with lunar caustic. Shortly after the healing the patient (man, 60) had severe stinging burning at left edge of tongue and inner side of left cheek touching the tongue. In this state he came to Hansen after allopathic treatment. Several medicines having been given without result, Mang-ac. was chosen and made a rapid and permanent cure.

A. W. Palmer reports this case of catarrhal deafness cured with Mang. 6c: Miss H., 38. Dull hearing, dry throat with hoarseness, itching in ears, loud rumbling, worse night, right ear, crackling on blowing nose, deafness in damp weather. The last was the guiding symptom.

Cooper gives the following ear-cases in which Mang-ac. has proved curative:

(1) A nodule appearance of malleus handle, thickened irregularly with history of bilious headaches and of previous discharges from the ears. The ear drum membrane has a granular appearance. Purple glazed appearance of the malleus handles, which are thickened and very prominent, upper segment of membrane also purple and glazed. (2)

Chronic periostitis of the meatus and middle ear with otorrhea, left ear.

(3) Otorrhea with earache, pain shoots up from teeth to ear, the earache is worse after early dinner, up until 8 or 9 p.m. Pains extend to and concentrate in ears from other parts.

(4) Sensitive ears, takes cold and gets headache, history of gall-stones and jaundice, sleepy and headache in afternoon, bitter taste in morning, lips glued together, whistling tinnitus worse in a cold. (Whistling tinnitus, Mang-ac., explosions, Mag-carb., rasping, shrill tinnitus as well as cardiac tinnitus, pumping, Kali-i.)

(5) Deafness, woman, 36, dating from 14 from over-strain in singing, when she lost voice and hearing for six months.

Left hearing returned, right remained deaf, worse after a cold or if over-excited or worried, subject all life to bilious attacks which last twenty-four hours and leave suddenly, head throbs, can't put it down on a pillow, headache comes on in morning on awaking and reaches a height at 3 or 4 p.m. and keeps on until next morning. Bilious headaches went away and the hearing of right ear improved under Mang. 200c.

Manganum muriaticum

(chloride of manganese)

Pharmacy

Mang-m. Manganum muriaticum. Chloride of Manganese. Solution in water. Historical dose: All potencies.

History

Mang-m. was proved by Lembke. The few symptoms obtained were manifested chiefly in the cranial bones, stomach, left shoulder, right knee and ankles. **Planets:** Saturn.

Homeopathic

Mang-m. has violent pain in front part of left shoulder joint, worse by pressure and by any motion of arm. Violent drawing pain inner side right knee.

Clinical

Ankles, painful, weak. Belchings. Bone pains. Borborygmus. Constipation. Rheumatism.

Modalities

The stomach pains were worse by external pressure.

Abdomen

Frequent rumbling.

Face

Pressive pain in right jaw-joint.

Head

Boring in right cranial bones, tearing in right occipital bone.

PAGE 1071

Limbs

Pain in articulation of left thumb. Drawing pain with weary feeling in right thigh while sitting.

Pressure in right knee extending into leg, a bruised sensation remains in ankles afterwards same pain in left ankle. Pressure and drawing in ankle and ankle bones.

Pressure in left foot.

Rectum

Stool harder and scantier than usual.

Stomach

Belchings of air (sour). Pressure in stomach worse by external pressure.

Vertigo

Vertigo and reeling when walking in open air, worse looking down, on descending or stooping.

Manganum oxydatum

Pharmacy

Mang-o. Mangan. oxydatum nativum. Manganese oxydatum. Historical dose: All potencies, 3x potency.

History

Workers in Manganese binoxide are frequently affected with bulbar paralysis. **Planets:** Mercury, Moon.

Homeopathic

Mang-o. has some symptoms similar to Parkinson's disease, progressive lenticular degenerations and pseudo-sclerosis. Peculiar slapping gait.

Easily fatigued and heated, sleepy. Stolid, mask-like face, low monotonous voice "economical speech." Muscular twitching, cramps in calves, stiff leg muscles, occasional uncontrollable laughter. Pain in tibia, dysmenorrhea, colic and diarrhea.

Clinical

Bulbar paralysis. Nervous disorders. Paralysis agitans. Parkinson's disease.

SOURCES

Boericke.

Manganum sulphuricum

(sulphate of manganese)

Pharmacy

Mang-s. Sulphate of Manganese. Manganum sulphuricum. Solution. Historical dose: All potencies.

History

"This Salt of Manganese," says Cooper, "deserves more attention than seems to be at present given to it. It has been proved to cause vomiting, paralysis without convulsions and inflammation of the stomach and small intestines.

As well as of the liver, spleen and heart. C. G. Gmelin, who experimented with it, records its property of causing such an extraordinary secretion of bile that nearly all the intestines were colored yellow by it and the large intestines had a wax-yellow color communicated to them.

The same preparation caused the following: Toothache in a bad tooth, on right side, upper jaw, shooting darting extending up the whole side of face and head, painful parts tender to touch. According to Rutherford, Mang-s. is a powerful intestinal, but a feeble hepatic stimulant. **Planets:** Moon.

Homeopathic

Ure found Mang-s. to act on man as a purgative and cholagogue in doses of one to two drachms in half a pint of water. It has, however, caused vomiting and sweating as well as purgation and is uncertain in its action from an allopathic point of view.

In one case of hepatic derangement where the stools were composed of large quantities of bile, Mang-s. Ix cured.

Clinical

Bile, excess. Gastritis. Liver, disorders. Toothache.

Marrubium vulgare

(horehound)

Pharmacy

Marrubium Vulgare. Horehound. White Horehound. N. O. Labiatae. Historical dose: Infusions, Tincture and all potencies.

Herbal

A valuable herbal remedy in coughs, colds and lung infections. Sold as "Horehound ale" a tonic pleasant tasting beverage. An infusion of one ounce to one pint of boiling water. Take in hot wineglass doses, as needed to induce sweating. Horehound candies and cough drops are popular. **Planets:** Mercury.

Homeopathic

Marrubium is a bitter digestive tonic, expectorant and a diuretic herb. It has a bitter, aromatic taste and odor. Culpepper used it to repel the afterbirth, as an antidote to poisons, snake bites and helps indurated livers. It calms the nervous heart. Irregular heartbeats. Reduces fevers. Malaria.

Clinical

Afterbirth. Bites, snake. Bronchitis. Colds. Coughs. Fevers. Itching. Lung disorders. Malaria. Poisons. Tetters. Throat, sore.

Matthiola graeca

(gilliflower)

Pharmacy

Matth. Matthiola graeca. Stock Gilliflower. N. O. Crucifere. Tincture of fresh plant. Historical dose: Tincture and all potencies.

History

Cooper has studied Matth. with which he has cured abscesses in hollow viscera and one case of cancer of stomach, abscesses in glands of neck discharging twenty-five years.

Cooper considers a leading indication for it "concentrated juices," which should be compared with the action of its relative Crucifer, Thlaspi bursa pastoris, which has cured obstruction of bile duct from inspissated bile.

Cooper relates a case which seems to indicate that Morphine causes neuralgia and that Matth. antidotes Morphine. A man had neuralgia of right arm from working in a damp house. Morphine was given. Then neuralgia of the left arm came on with numbness and paralysis.

Lobelia acetum gave some relief. One dose of Matth. tincture completely cured. When the man came under Cooper's care he was spending ten shillings a week on morphine.

Planets: Saturn.

Homeopathic

Abscesses in hollow viscera and abscesses in glands. Cancer of stomach. Neuralgia of the left arm with numbness and paralysis.

Clinical

Abscesses. Cancer.

Medorrhinum

(gonorrhoea nosode)

Pharmacy

Med. Gonorrhoea nosode. Medorrhinum. Glinicum. Potencies of the Virus. Historical dose: All potencies, the medium and very higher potencies.

History

Medorrhinum is prepared from gonorrhoeal virus, a powerful deep acting medicine indicated for chronic ailments due to suppressed gonorrhoea.

PAGE 1073

Med. is one of the most important of the nosodes. The constitutional nature of the gonorrhoea poison has within recent years been recognized in the old school as well as the new.

Negerath of New York and Angus Macdonald in England have pointed out a causal connection between post-partum pelvic cellulitis and latent gonorrhoea in the husband. Macdonald published several fatal cases.

The effects of the poison, constitutional or acute, may be taken as data for homeopathic prescriptions, but the virus has had an extensive proving in the potencies and the symptoms there recorded have been largely verified in practice.

The nosodes may be used according to their indication in exactly the same way as other homeopathic remedies and not merely for manifestations of the disease from which they are derived. At the same time, a knowledge of the origin of obscure disorders, especially if hereditary, will often give the clue to the remedy required.

Burnett cured with Med. 1,000c: (1) A patient who had fits at every menstrual period, the fits coming on in the early morning. (2) A man who had clonic spasms, the legs suddenly shot up from the bed. (3) A case of right wrist rheumatism.

(4) Polyps having their origin in a chronic suppurating discharge. He regards Med. as "the mother of pus and catarrhs". (5) Masturbation in children. (6) Albuminuria when the urine contains some mucus as well. (7) Sycotic asthma, worse 2 to 4 a.m. (8) Psoriasis palmaris.

Homeopathic

Medorrhinum affects the mind, nerves, mucous membranes is useful for chronic pelvic disorders of women, for dwarfish and stunted, sour smelling children. Often indicated for chronic ailments due to suppressed gonorrhoea. History of gonorrhoea often restores a gonorrhoeal discharge.

For women with chronic pelvic disorders. Chronic rheumatism. Great disturbance and irritability of nervous system. Pains intolerable, tensive, nerves quiver and tingle. Intensity of all the sensations. Disseminated sclerosis. State of collapse and trembling all over.

Children dwarfed and stunted. Chronic catarrhal conditions in children. Nose dirty tonsils enlarged, thick yellow mucus from nostrils, lips thickened from mouth breathing. Edema of limbs, dropsy of serous sacs.

Med. has profuse acrid discharges, causing itching. Fishy odors of the secretions. Offensive odor of the body especially children and women. Many different kinds of pain, stiffness, aching, soreness, edema of limbs, dropsy of serous sacs. Numbness, formication internal. Arthritic, rheumatic pains. Diseases of the spinal cord, even organic lesions ending in paralysis.

Poor reaction due to gonorrhea history. Enlargement of the Lymphatic glands all over the body with heat and soreness. Loss of power in the joints, joints feel loose. Burning. Small very sore aphthae, blisters. State of collapse, wants to be fanned all the time. Tumors, cancer, scirrhus etc. with history of sycosis. Body smells bad to her, cannot wash.

PAGE 1074

Clinical

Asthma. Clonic spasms. Corns. Diabetes. Dysmenorrhea. Epilepsy. **Eyes** inflammation. Favus. Gleet. Gonorrhea, suppressed. Gonorrheal rheumatism. Headache, neuralgic. Leucorrhoea. Liver, abscess. Masturbation. Ovaries, pains. Pelvic cellulitis. Polyps. Priapism. Psoriasis palmaris. Ptosis. Kidney pain. Rheumatism. Sciatica. Shoulder, pains. Sinusitis. Stricture. Urticaria. Warts.

Constitutions

Sycotic constitution. **Planets:** Venus, Mars, Saturn.

Modalities

Better at the seashore. Chronic rheumatism of joints is worse inland, better near sea. Better lying on stomach, damp weather. (Caust.) Better bending backward, stretching out, fresh air, being fanned. Better hard rubbing, sunset. Worse from damp, cold. Worse from after urinating touch, even slight, close room, before storms. Worse when thinking of ailment. Worse during daytime. Worse from sunrise to sunset, heat. Salt-water bathing aggravates sore throat and colds in the head. The early morning aggravation. Worse 3 to 4 a.m. is a leading characteristic of Med. and all sycotics.

Symptoms

MIND

Desperate. Sad, tearful and fearful. Cannot concentrate. Weak memory. Loses the thread of conversation. Forgets names, word, her errand. Cannot speak without weeping, tells it over and over again. Time passes too slowly. (Cann-i., Arg-n.) Hopeless of recovery. Things seem strange. Feels life unreal, everything seems unreal. Fears going insane. (Manc.) Apprehensive, anticipates events. Fear in the dark and of someone behind her.

Melancholy with suicidal thoughts. Sad, dismal outlook, better weeping. Sensitive, nervous, restless. Everything startles her. Hurried and anxious, irritable. Wild feeling. Impulsive, abrupt, rude, mean, cruel. Persistent ideas, alternating or erratic states. Cross through day, merry at night. Dread of saying wrong thing. High sex drive. Night people.

Abdomen

Rests more comfortably lying on abdomen. Heavy lower abdomen. Grinding colic better bracing feet, lying on abdomen. Burning in epigastrium. Flatulence with numbness.

Agonizing pain in solar plexus, applies his hands to stomach and to lumbar region.

Back

Pain in back with burning heat. Spine sore and tender. Burning heat in spine. Cutting, burning, crawling above left scapula. Pain from left to right shoulder. Lumbago from lifting.

Breasts

Breast sore at non-menstrual periods. Breast sensitive, cold, icy, the rest of the body warm. Sore, oozing or icy nipples during menses.

Chest

Pain and soreness through chest and breasts. As if a cavity in chest. Coldness in chest.

Ears

Partial deafness, pulsation in ears. Opening of ear is sore and tight. Pulsation in ears. Quick darting pains. Hears voices.

Eyes

Eyeballs ache. Feels as if sticks in eyes. **Swelling under eyes.** ***Objects look double*** or small. Sees imaginary objects. Feels as if she stared at everything. Upper lid hard as if it had cartilage. Lids irritated. Ptosis of lids. Eyelashes fall out.

Face

Pallor. Acne on face worse after menses. Blotches of red color. Small boils break out during menses. Grayish, greasy, greenish, yellow at the edges of hair. Red spiderlets on face. Small boils break out during menses. Lips thickened from mouth breathing.

Female

Intense menstrual colic, better pressing feet against support. Menses offensive, profuse, dark, clotted, stains difficult to wash out, urinates frequently at that time. Leucorrhea thick, acrid, excoriating, fishy odor. Sensitive spot near os uterus. Os uterus, ulcerated. Intense itching, vagina better rubbing and by bathing with tepid water. Drawing in ovaries better pressure. Sycotic infertility. Sycotic warts on genitals. Ovarian pain, worse left side or from ovary to ovary. Infertility. Metorrhagia. Intense menstrual colic.

Food

Very thirsty, warm drinks. Craving for ice. Craving for liquors, which she used to dislike. Craving for oranges. Craving for salt, sweets, ices. Craving for sour things, green fruits, refreshing things. Excessive thirst, dreams of drinking water. Ravenous appetite, hunger after eating.

Head

Burning pain in brain, worse occiput. Head is heavy and drawn backward. Headache from jarring of ears, exhaustion or hard work. Weight and pressure in vertex. Hair dry, crispy. Itching of scalp, dandruff.

Heart

Sensation of cavity where heart ought to be.

Kidneys

Painful tenesmus when urinating. Nocturnal bedwetting. Kidney colic. (Berb., Ocim., Pareir.) Scalding ammoniacal urine. Pain in kidney region better by profuse urination with craving for ice. Bubbling in kidney region. Urine flows very slowly.

PAGE 1075

Limbs

Bites nails. Burning of hands and feet. Legs heavy, ache all night, cannot keep them still. (Zinc.) Cramps in legs better stretching them. Heels, balls and soles tender and itching,

cannot walk on them, had to walk on knees. Finger-joints enlarged, puffy. Gouty concretions. Finger-tips cracked and burn. Ankles easily turn when walking. Edema of the limbs. Nails depressed, as if they were bent. Edema of feet followed and better by diarrhea. Heels and balls of feet tender. (Thuj.) Soreness of soles. Restless, better clutching hands.

Liver

Violent pain in liver and spleen.

Lungs

Air hunger, cannot exhale. Much oppression of breathing. Cough better lying on stomach, worse from sweet things. Incessant, dry, night cough. Asthma, sycotic infantile. Lungs feel stuffed up with cotton. Incipient tuberculosis. Larynx feels sore. Dyspnea, cannot exhale. (Samb.) Cough, better lying on stomach.

Male

Urethritis. Heaviness of prostate, painful and enlarged with frequent and painful urination. Impotence. Prostration after seminal emission. Heaviness in perineum. Gleet, whole urethra feels sore, persistent gleety, yellow discharge. Nocturnal emissions, followed by great weakness.

Mouth

Small very sore aphthae. Blisters on inner surface of the lips and cheeks. Water tastes like perfume. Teeth are serrated, soft, crumbling, yellow. Tongue coated brown and thick, blistered, canker sores.

Nose

Nasal catarrh running down throat. Post-nasal discharge, thick yellow. Coryza with loss of smell and taste. Snuffles in children. Nosebleeds. Exhalation hot.

Hay fever. Nose dirty (children). Intense itching of the tip. Coryza better sea bathing. Coldness of tip. Chronic nasal and pharyngeal catarrhs.

Rectum

Fiery red rash about anus in babies. Anus is red, moist. Can pass stools only by leaning very far back, then shivering. Painful lump sensation on posterior surface of sphincter. Dark fetid oozing moisture from anus of fish brine odor. Intense itching of anus. Cholera infantum with opisthotonus.

Sensations

As of sticks in eyes, lids and inner canthi, as if cold wind blowing in eyes, as if upper lid had a cartilage in it. As if something crawling in ear and nose. Lump in stomach. Tumor right side of abdomen. As if left lung collapsed or paralyzed. As if an abscess between left pectoralis major and minor muscles. As if the blood was boiling hot in veins. As if all bones were out of joint.

Skin

Itching, sore, worse night and when thinking of it. Sycotic red nodes. Deep red spots. Condylomatas. Yellow. Continuous itching worse thinking of it. Skin cold but feels as if the blood is hot. Copper colored spots, remaining after eruptions. Yellow copper colored spots. Tumors and warts.

Sleep

A short sleep seems a long one which better. Dreams she is drinking. (Ars., Phos.) Sleeps in knee-chest position.

Stomach

Coppery taste and belchings of sulphuretted hydrogen. Ravenous hunger soon after eating. Pernicious vomiting of pregnancy. Morning nausea.

Temperature

Cold skin but blood feels hot. Chills up and down back, coldness of legs, hands and forearms. Burning heat with sweat, wants to uncover, but is chilled. Night-sweat and hectic fever. Sweat easy towards morning. Hay fever. Wants to be fanned all the time. Flashes of heat in face and neck.

Throat

Hoarse while reading.

Vertigo

Vertigo, worse in vertex and on stooping.

PAGE 1076

Comments

Deschere published a Med. case: Miss S., 23, had chronic blepharitis since eleven. Her suffering was intense. Light, especially gas-light, was intolerable and this prevented her from going into society. She could not read in the evening and in the morning the lids would be closed and she suffered much on getting them separated. There was much discharge.

Before coming under Deschere she had been under strict homeopathic treatment all the time. Deschere remembered treating her father for gonorrhoea before his marriage and he suspected the taint had reappeared in this form. Med. was given in high potency, single doses repeated as the effect of each wore off and she was entirely cured.

A case of favus which had resisted all the external applications that allopaths could devise and which had such an appalling odor that the patient, a little boy, had to be isolated from the family, was traced by Skinner to the same hereditary cause and cured with Med. 1,000c.

Many cases of stunted growth and arrested development in children are due to latent gonorrhoea and syphilis and unless this factor is discerned and taken into consideration in prescribing, no great good will be achieved. Clarke has cured on this hypothesis extremely offensive body odors in children with Med.

One important point in distinguishing between the sycotic or gonorrhoeal taint and that of syphilis is in the time aggravation and consequently in the indications for this. Syph. has worse from sunset to sunrise, as also have all the great anti-syphilitic remedies. Med. has worse from sunrise to sunset, always brighter in evening, worse in early morning hours.

With Med. there is intense nervous sensibility, especially to touch of garment or a lock of hair by any one not en rapport. Sensibility is very exalted almost to clairvoyance. As if in a dream. Starting at slightest sound. Tremor, spasms.

There is a state of collapse and a desire to be fanned. The pains seem to tighten the whole body, especially the thighs. There is scarcely a spot on the body that is not full of pain. Obstinate rheumatism. Sequel of acute rheumatism.

McLaren relates in Hahn. Advoc. a case which illustrates the power and sphere of this nosode. A young French Canadian of delicate constitution after working in a factory all winter, began coughing in spring and running down in health.

He returned home and came under McLaren's care in May. The cough persisted and prostration increased in spite of carefully selected remedies and the patient took to his bed. It was then observed by McLaren that the cough and general condition was better

from lying on the face. This, coupled with a knowledge of there being a syphilitic taint in the boy's parentage, suggested Med., which was given.

The next day a profuse gonorrheal discharge appeared and the cough and all the threatening symptoms promptly disappeared. Exposure to contagion had occurred several weeks before, but from lack of vitality the disease could not find its usual expression and was endangering the patient's life.

Ernest Nyssens quotes some important observations by old-school authorities on constitutional gonorrhea.

Wertheim in a case of gonorrheal cystitis watched the entrance of the gonococcus into the blood stream. With the gonococcus taken from the blood of this patient he made cultures to the fifth generation.

A youth who had never had a venereal disease volunteered for inoculation with this. The sub-acute urethritis which resulted was so grave and in spite of all, became complicated so cruelly with cystitis, epididymitis, prostatitis, synovitis and pleuro-pneumonia, that Wertheim asked whether the gonococcus did not redouble its virulence by passing into the blood.

PAGE 1077

Jullien and Sibut witnessed the following case in Saint Lazare Hospital: Louisa M., 17, entered the hospital June 8th with urethra-vaginitis and was treated with tampons of ichthyol dissolved in glycerine (1 to 5). The urethritis ran a normal course until July 6, when this condition was reported:

The patient has had sufferings in the abdomen for a week, but has made no complaint. However, they became so acute the previous night that an injection of Morphine was given. Rectal temperature 100.2. Tongue coated. Right side abdominal pain.

In spite of rigid contraction of the rectal muscles there seemed to be a swelling deep down, but the observers were not certain it was not a swelling of the muscles themselves. Intestinal functions normal, rectum empty.

An eruption of roseola spots appeared on the body, abdomen and chest, so exactly like those of typhoid that the possibility of this was discussed. There was also acute pain in muscle of right calf. This pain persisted the following day when the abdominal pains had disappeared.

July 9. Right knee painful, swollen. At same time synovitis of left wrist, dorsal aspect. Temperature normal. July 10. Very few and slight traces of the eruption. Right arm the seat of acute sharp pain, especially at the level of the deltoid "V," deep down near the bone at the insertion of the tendon (probably a hygroma).

On examining the Achilles tendon, pain at the level of the left ankle, nothing to the right at the same level, but the pain is above all acute along the inner border of the right tibia to five or six centimeters from the flat surface.

This part is edematous and painfully sensitive. Another painful spot in the abdomen is behind the right anterior superior iliac spine and beside the navel (probably muscular). The urethral discharge contained abundant bacilli beside only gonococci.

Treatment by daily injection of one centigram of Merc-c. was commenced. The next day there was sharp fever, coated tongue. The abdominal pains were frankly muscular. Trace of albumen in the urine. Next night there was delirium and nosebleed in the morning. This case went on to recover.

Another case, also in a girl of seventeen of tubercular history and even complicated with syphilis, presented the same order of symptoms, along with the nosebleed, hemoptysis, albuminuria, endocarditis with suffocative attacks and violent palpitations, ending in permanent disablement.

These cases may be regarded as provings of Med. from the homeopathic stand-point. The rheumatic symptoms are of extreme intensity and Med. will cure many cases where the symptoms correspond. I have cured many cases of dysmenorrhea with it, following Burnett.

Gilbert traces rickets to hereditary gonorrhoea, there are often in these cases glandular enlargements and the patient is better at seaside. In such cases he gives Med. When there is syphilitic paresis and the patient is better in the mountains, he gives Syph. In acute bowel troubles in rickety children the finds Med. of great value.

Thomas Wildes considers that favus and scald-head and ophthalmia tarsi simplex (margins scaly, scurfy often angry red, falling of lashes) are due to suppressed gonorrhoea in one or both parents. The red, angry condition of skin may extend from face or scalp, down neck and back to perineum and genitals.

(1) Girl, 11, had been treated by many physicians with salves and ointments to the general impairment of her health. Face mottled with a profusion of red scurfy sores, eyelids involved and nearly denuded of lashes, hairy scalp one diffuse mass of thick yellow scabs from beneath which oozed a highly offensive mixture of ichor and sebum.

Passing down neck, back, perineum and involving genitals and pubes was a fiery red band as broad as the child's hand, oozing a pale yellow serum which caused the clothing to stick to the body. Wildes told the mother he could cure the case, but it would certainly get worse the first three months. This was not objected to.

Med. 100,000c (Swan) was given, one dose on the tongue. The external appearance grew rapidly worse but appetite, sleep and general health steadily improved and in nine months she was completely well.

(2) Child, 6, since infancy horribly disfigured with tinea capitis. Scalp a mass of dense scabs exuding fetid ichor, the only semblance of hair being a few distorted stumps ending in withered roots. One dose cured in a few months and at the time of Wildes writing patient was a healthy and extremely talented young lady and the possessor of a luxuriant head of chestnut hair.

Wildes thinks that suppression of favus when derived from gonorrhoea in the father leads to hydrocephalus, capillary bronchitis, severe teething diarrhoea, cholera infantum, etc., if derived from the grandfather, suppression leads to tuberculosis and lingering diseases.

Fiery red rash developing about the anus in babies a few days old, constipation with hard, dry stools, when the nurses say "baby's water scalds it terribly," the indications for Med. are clear.

Wildes regards the latent gonorrhoeal miasm as the true explanation of many of the disease-manifestations included by Hahnemann under Psora. Burnett in a way confirms this, as he traces gout to a sycotic origin.

Wildes regards Med. too dangerous a remedy to give in acute cases whether of gonorrhoea, rheumatism or scarlatina, on account of the intensity of the aggravation it is liable to cause, though single doses are often useful when there is a tendency to sinking in dangerous cases of cholera infantum.

Among other diseases Wildes traces to the same source are: Vascular meningitis in infants and cerebrospinal meningitis. In the former the efficacy of Med. is doubtful, but in the latter it is very efficacious after Cimic. has allayed the first acute symptoms. In the convalescent stage Lyc. has been his chief remedy.

He quotes from old-school authorities the following conditions traceable to latent gonorrhoea communicated from husband to wife: Ovarian tumors, endometritis, oophoritis, metritis, parametritis, and even peritonitis. Salpingitis,

Med. is the remedy in single doses, but it is rarely if ever to be given in the acute stage of a disease. In general motion Worse rest better. Lying on face or stomach better cough. Stretching out worse. Leaning head forward worse. Leaning far back better constipation: can only pass stool so.

Clarke cured with Med. 200c a most aggravated case of constipation on this indication. The patient said he was obliged to lean far back on the seat or he could not get rid of the stool. He was passing urine containing long white mucous shreds. Many years before he had gonorrhoea.

There is great sensitiveness to draft of air, takes cold easily. At the same time there is great desire to be fanned.

Compare

(1) Thuj., Nat-s., Puls.

(2) Picric acid - inability to walk right, priapism.

(3) Camph. and Sec. - collapse, skin cold yet throws off all covering.

(4) Verat. - collapse with cold sweat.

(5) Syph. - reverse aggravation, sunset to sunrise.

(6) as if in a dream, Ambr., Anac., Calc., Cann-i., Con., Cupr., Rheum, Stram., Valer., Verat., Ziz.

(7) better by leaning back, Lac-c.

Medusa

(jelly-fish)

Pharmacy

Medus. Medusa. Jellyfish. Medusa (various species). Sea-nettles. Class, Acalephe.

Tincture of living animal taken in summer. Historical dose: All potencies.

History

The effects of encountering jelly-fish while bathing are well known. These have been studied experimentally and the effects of drinking two cupfuls of a decoction, warm, by a woman affected with stomach disease and leucorrhoea has been recorded.

In this case there was rapidly produced edema, anxiety and difficult speech. Secretion of urine, which had been suspended for days, returned and milk came into the breasts three years after the birth of her last child. **Planets:** Moon.

Homeopathic
